Following in the tradition of a musical family are his wife and son, Gaby and Jean. They often join him in concerts and appear in special works for three pianos.

Casadesus, a "quiet unassuming genius", has in addition to his performing skills, already completed his own Opus 58, so the man whom the viewers of Lane Series will be seeing next Tuesday is a composer who will interpret the works of two of the most renowned composers of classical music.

Tau Beta Pi Initiates Five

Tau Beta Pi, National Honorary Society for students in Civil, Electrical, and Mechanical engineering, initiated five senior men into its ranks Friday, November 18. The five men are Harry Brooks, Electrical Engineering; Norman Cox, Mechanical Engineering; Cedric Farrow, Electrical Engineering; John Mayness, Civil Engineering; and Charles (P.) Smith, Mechanical Engineering.

Selection to Tau Beta Pi is based on curriculum; either civil, electrical, or mechanical engineering, scholarship, and character. Tau Beta Pi at UVM was originally Nu Beta Pi, a local engineering honorary society which three years ago became affiliated with the national society, Tau Beta Pi.

The initiation ceremonies held in Memorial Lounge, were followed by a banquet at the Lincoln Inn. In addition to the five new members, there are, at present, five undergraduate members, Chuck Eldred, president; Steve Berry, vice-president; William Foster treasurer; Bob Murphy corresponding secretary; and John Martell, recording secretary.

During the year, Tau Beta Pi sponsors an Engineering Smoker which this year was held November 2. At this time, all student and faculty engineering groups gather for the only social affair of all these organizations. In the spring, Tau Beta Pi also awards a prize to the senior there with the highest average for three semesters.

Ground Broken For Home Management Building

Ground for the new University of Vermont Home Management house was broken at 11 a.m. Monday on Redstone campus. The one-story contemporary structure replaces the old Home Management House which has been sold. The contract for the $65,000 house was awarded to the Pizzagalli firm, South Burlington. Freeman French Freeman of Burlington is the architect.

Attending the ground breaking ceremonies were UVM President John S. Fey; Joseph L. Carlisle, Dean Emeritus of the College of Agriculture and Home Economics and Mrs. Carlisle; Paul R. Miller, Dean of the College of Agriculture and Home Economics and the directors of the college, Thomas H. Dowe, Jack E. Littlefield, Robert P. Davison and Mrs. Virginia Trotter, and George N. Clerkin, University Treasurer.

Members of the Vermont Agriculture and Home Economics College Advisory Committee attending were: Mrs. Carroll Pyne, Stowe, Agricultural Alumni Association of Vermont; Mrs. Mary Sargent, Jericho, representative of the Vermont Grange; Mrs. Raiford Ingalls, Franklin, State Farm Bureau; Mrs. Lucia Ladd, Worcester, Board of Trustees; Mrs. Alice Hill, Burlington, Vermont Chapter of the American Association of University Women; Mrs. Frederick Patterson, President, Vermont Federation of Women's Clubs; Miss Marjorie Lucas, Waterbury, Vermont Home Economics Association; Mrs. Richard James, Weybridge, Vermont State Home Demonstration Council. A luncheon was held in the President's dining room following the ground breaking. The house, completely electrified, will have eight rooms, including five bedrooms, a dining and living room, a U-shaped kitchen and living quarters for an instructor. The basement will contain a classroom and recreation room. Eight senior girls will spend 7 1/2 weeks living in the home as part of the home management course.

The house is scheduled for completion by April.

Deadline

December 14, 1960

All petitions for KW Disposition Funds must be received by December 14, 1960, 4:00 P.M.

Drop them in the COSA Office IFC mailbox

Faculty To Dine With Girls

In order to promote better student faculty relations the CWA administration chairmen are now asking that faculty members of dinner that living unit [illegible] be able to have the dinner guest each night Mon. Oct. Thursday through the courtesy of CWSA food service.

The guest will be invited by the ad-hoc-grist chairman and will go to dinner with the girls. After dinner the girls will be able to take their guest to their lounge where they will have at it. Funny [illegible]

The new program is to show the faculty that the students are interested in them and want to get to know them better. It is to stimulate discussion that usually [illegible] primarily take place among the girls. Subjects and ideas which are unable to be brought up in the classroom can be talked over.

"THE INTELLIGENCE QUOTIENT OF NED FUTTY"

Chloe McFeeters was a beautiful coed who majored in psychology and worked in the I.Q. testing department of the University. She worked there because she loved and admired intelligence above all things. "I love and admire intelligence above all things" is the way she put it.

Ned Futty, on the other hand, was a man who could take intelligence or leave it alone. What he loved and admired above all things was girls. "What I love and admire above all things is girls" is the way he put it.

One day Ned saw Chloe on campus and was instantly smitten. "Excuse me, miss," he said, tugging at his forelock. "Will you marry me?"

She looked at his duck-tail haircut, his black-rimmed glasses, his two-day beard, his grimy T-shirt, his tattered jeans, his decomposing tennis shoes. "You are not unattractive," she admitted. "But for me beauty is not enough. Intelligence is what I'm looking for. Come to the I.Q. testing department with me."

"Of course, my tiger," cried Ned and giggled and smote his thigh and bit Chloe's nape and scampered goatlike after her to the I.Q. testing department.

"First, I will test your vocabulary," said Chloe.

"Be my guest," laughed Ned and licked her palm.

"What does *juxtaposition* mean?"

"Beats me," he confessed cheerfully and nibbled her knuckles.

"How about *ineffable*?"

"Never heard of it," guffawed Ned, plunging his face into her clavicle.

"*Furtive*?"

"With fur on?" said Ned doubtfully.

"Oh, Ned Futty," said Chloe, "you are dumb. Consequently I cannot be your girl because I love and admire intelligence above all things."

He flung himself on the floor and clasped her ankles. "But I love you," he cried in anguish. "Do not send me from you or you will make the world a sunless place, full of dim and fearful shapes."

"Go," she said coldly.

Lorn and mute, he made his painful way to the door. There he stopped and lit a cigarette. Then he opened the door and started away to his gray and gruly future.

"Stay!" called Chloe.

He turned.

"Was that," she asked, "a Marlboro you just lit?"

"Yes," he said.

"Then come to me and be my love," cried Chloe joyously. "You are not dumb. You are *smart*! Anybody is smart to smoke Marlboro, the filter cigarette with the unfiltered taste which comes to you in soft pack or flip-top box at prices all can afford at tobacco counters, drugstores, groceries, restaurants and trampoline courts all over America. Ned, lover, give me a Marlboro and marry me."

And they smoked happily ever after.

© 1960 Max Shulman

• • •

And if your taste runs to unfiltered cigarettes, you're smart to try Philip Morris—from the makers of Marlboro. We especially recommend Philip Morris's new king-size Commander—long, mild, and leisurely. Have a Commander—welcome aboard!

UVM Holds Open House For "Charley's Aunt"

David Hall etc. star as Charley in "Where's Charley" the Fall musical of the University Players to be presented in the Arena Theatre December 8, 9, 10 and 15, 16, 17. Rex Kelley will portray Jack Joan Hirschland, Amy Carole Demas, Kitty Ralf Bode, Spettigue, Phil Hall, Sir Francis, and Alice Zaron, Donna. Other speaking parts include Charles Gouley as Brassett, John Goldhammer as Wilkinson, Frank Pagliaro as the Photographer, and Robert Newton as Reggie. Singing in the chorus are Diane Jordan, Cynthia Landau, Andrea Lavman, Polly Page, Ellen Spencer, Sue Richterman, Eric Anderson, Barry Bloom, David Gibbs, Kenneth Handler, Albert LeBlanc, and Bob Newton.

This popular farce is based on the book *Charley's Aunt*, by George Abbott, with the music by Frank Loesser, author of such Broadway hits as "Guys and Dolls" and "Most Happy Fella." "Charley's Aunt," one of the top fifteen musicals, ran 792 performances on Broadway.

"Charley's Aunt" is set in the 1890's at Oxford in the days when young ladies were not seen in the presence of young men without proper chaperones. The play concerns two Oxford men, Charley and Jack, who are anxious to have dates with two young ladies, Amy and Kitty. They invite the girls to their room to meet Charley's aunt from Brazil, but at the last minute receive a telegram stating that the aunt will be delayed in her arrival. Now they are unchaperoned, and Charley is forced to assume a double role, that of his aunt and of himself, producing rather farcical and humorous events.

Some of Frank Loesser's memorable songs in the play include "Once In Love With Amy," "My Darling, My Darling," and "The New Ashmoleon Society and Student Conservatory Band," the latter to be staged with a band.

This year the players, under the direction of Mr. Greg Falls, are presenting six performances split into two weeks, rather than five consecutive performances as in past years. Through this new schedule, more people will be able to see the musical, and it will give the players a break between shows. This year, there will also be a reduction in the price of the Thursday night tickets, with the Friday and Saturday night tickets remaining at the same price.

Slave Labor Behind The Scenes

There's a lot to a production that meets the eye. And "Where's Charley", will be as colorful a production as any. The forthcoming musical comedy is set in the 1890's, a period in England that lends itself to bright costumes and interesting scenery and props.

In the show, to be presented by the University Players, there will be 88 costumes with a rental fee running close to $1000. Costumes are being rented from the New York company which costumed the original show. Many of the actors have several costume changes. In one scene alone, Charlie, playing both himself and "Charley's Aunt" makes five changes within a brief time span.

Besides the elaborate 1890's garb, Latin American costumes are needed for "Pernambuco", a song and dance about Brazil, "Where the nuts grow", and from where "Charley's Aunt" hails. Collegiate blazers and academic gowns are also needed for the Oxford University students.

Under the direction of Mr. Edward J. Feidner of the Speech Department, four settings are under construction, plus a permanent atmosphere setting of hanging latti[illegible] and screens of the period. The four scenes are the [illegible] at Oxford; a garden [illegible] room "where the [illegible] dress"; and the [illegible] the Red Rose Cot[illegible].

There are upward [illegible] lighting cues and [illegible] approximately 75 [illegible] which must be shifted [illegible] and quietly with the [illegible] present.

The show will be presented December 8, 9 and 10 [illegible] Arena Theater at the [illegible] Museum.

UVM Plans New Major Field

By ELLEN SPENCER

A [illegible] is Physical [illegible] now being plan[illegible] the Department of [illegible]ucation. As of [illegible] such program [illegible] Vermont. A poll [illegible] taken to see how [illegible] this would be inter[illegible] such a major. The [illegible] response so far has shown that there will be enough people interested.

A [illegible] physical educa[illegible] is available at the [illegible] one will qualify [illegible] to teach physical education. A major will make [illegible] better qualified [illegible] courses showing the [illegible] behind the teaching [illegible] physical education. This [illegible] will be equivalent to [illegible] course, and will [illegible] such subjects as [illegible] physics, anatomy, [illegible] physiology of exer[illegible]. The minor, as it stands [illegible] lacks many of these [illegible]rses.

[illegible]der for this major to [illegible] effect, it must first [illegible] approved by the Curriculum [illegible]mittee of the School of [illegible]cation and Nursing, and [illegible] must be submitted to the Faculty Senate. Sufficient faculty is now available for this program to get started. What is now needed are the extra courses, scheduling, and the approval by the committee of the Senate.

Mr. Charles Christenson, Assistant Professor of Men's Physical Education, believes that there is a tremendous need for physical education. He believes that our sedentary living has given rise to a definite lack of the physical work so necessary to health. He explained that the body and mind are now thought to be one unit related through the nervous system. A sound body is necessary for a sound mind. Other benefits of physical education are the many jobs available for teachers, the social advantages of being well-trained in all sports, and the chances for leadership, teamwork, and sportsmanship that physical education offers.

Anyone who is interested in this program is encouraged to talk either with Mr. Christenson or Miss Betty Jane Wills, head of the Department of Physical Education for Women.

Eugene Istomin Holds Audience Spellbound

On Wednesday, November 16th, Pianist Eugene Istomin and the National Symphony Orchestra of Washington brought the "Emperor" Concerto of Beethoven to Burlington in a performance which will not be forgotten. A spellbound Memorial Auditorium audience of Blue Lane Series ticket holders heard Mr. Istomin perform one of his specialties in a flawless, inspiring manner, and the National Symphony under the baton of Howard Mitchell was a noble instrument and partner.

The customary Haydn or Mozart for a prelude was dispensed with and instead the program began in startling fashion with William Schumann's "New England Triptych", composed in 1956.

Sandwiched between two modern compositions, the Concerto No. 5 in E flat, op. 73, of Beethoven was the premature climax of the evening. This, the last and greatest of Beethoven's piano concertos is an undying favorite of pianists everywhere. It is a work of great splendor, of heroic proportions and of triumph. Mr. Istomin's magnificent interpretation brought to life the spirit and grandeur written into the work.

Last on the program was Prokofiev's Symphony No. 5 in B flat, op. 100. Composed in 1944, it is a giant among contemporary symphonic compositions and the orchestra did it justice, employing an alternately rough and soft tone and demonstrating well the native Russian atmosphere of the music.

The encore, Brahms Hungarian Dance No. 1 in G minor, relieved those who would have preferred a more harmonious conclusion to the concert than the Prokofiev offered, and gave the strings of the orchestra an opportunity to display their sonoric tone and sparkling spiccato.

The National Symphony is a comparatively recent orchestra, founded in 1931; nevertheless it has inexplicably escaped the acclaim it is due. Really fine orchestras are rare. The musicianship and virtuosic ability of the National Symphony left everyone the impression that this is one of the fine ones.

Mr. Istomin has become firmly established as a member of the young musical elite. With performances such as the one he gave here, there is no doubt he will achieve the front ranks of the worlds great pianists.

UVM Music Club

The University of Vermont Music Club held its second meeting last Thursday evening in the Fleming Museum Lounge presided over by club president Jay Shepherd. During intermission two films "Music In The Air" discussing the construction of a pipe organ and a filmed version of the Beethoven Fifth Symphony were shown. Coffee and cookies were served.

The probability of revising the constitution was first on the agenda and this matter was tabled until the next meeting. Club members then decided to fix the date of the monthly meeting. The first Thursday in the month was selected, the time and place remaining 7:30 in the Museum Lounge. The last business topic discussed was the possibility of holding a public dinner just previous to Christmas vacation. Club member Jackie Prouty was delegated to investigate this situation. With this the business meeting was concluded.

The purpose of the Music Club as stated in its constitution is "to stimulate appreciation and interest in music and musical expression and to promote creativeness and foster artistic achievement in all possible fields of music at the University of Vermont". Qualification for membership is that the interested student be enrolled in at least one credit hour in a UVM music course. A fee of $1.00 for joining the group is solicited. There are 40 members at present, and all qualified students will be welcomed at the next monthly meeting in December.

Officers of the Music Club are: Jay Shepard, President Roy Kelly, Vice-President Joan Chicoine, Secretary, Frank Coderre, Treasurer, and Linda Langworthy, Historian.

All set to play Santa Claus?

What you need is a red suit, white beard, fat pillow, and a pack full of Esterbrook Classic Pen and Pencil Sets. You can be anyone's favorite Santa if you give the smoothest-looking, smoothest-writing Christmas gift this side of the North Pole. Your choice of 6 holiday colors and 32 changeable pen points, too.

PROGRESS REPORTS

A few weeks ago the CYNIC noted that work had begun on revision of the Student Association Constitution. This revision has proceeded during the intervening time and the Revision Committee has accomplished much of what it had hoped to do. Working with the recommendations made by the Camp Abnaki Conference as a guide, the revision has progressed through the re-apportionment of representatives and thorough consideration of the "Standing Committees." The sections pertaining to SA jurisdiction have not yet been considered. The Revision Committee is awaiting the report of a faculty-administration group currently attempting to define the areas in which SA will have jurisdiction.

Much has been accomplished, yet much remains to be done. As we stated before, the writing of a constitution is a difficult and time consuming job. To be done well, it must be done carefully and without undue haste. We salute, therefore, the Revision Committee for the job it has done so far and for the job it is continuing to do. The CYNIC again urges that each and every student carefully consider the advantages of the new constitution and vote for it's acceptance when the matter is presented to the student body in a referendum. This will probably be in early Spring.

Meanwhile, Back At Redstone

WSGA recently circulated a paper entitled "History of WSGA". This memo describes the history and development of WSGA from its original "town representative" form to today's larger representative form. Along with this memo came the announcement that WSGA will present the women with a questionnaire which the women will answer anonymously. We assume that the women will take advantage of this opportunity to express their TRUE FEELINGS about WSGA, whether they agree with recent CYNIC criticisms or not. We assume that WSGA will present questions which will allow the women to present to WSGA accurate and exact pictures of their position and opinions. If the women answer honestly and if the questions are properly prepared, this questionnaire could offer both WSGA and the women an opportunity for improving the current situation. The CYNIC feels that WSGA is at last taking action concerning the recent criticisms leveled at it. This, we feel, is good for the women and will eventually result in an improvement in WSGA as a governing body on the UVM campus.

Letters To The Editor

Go ROTC!???

Dear Sirs

I am alarmed but I say surprised by the frequent letters in your paper disparaging what has become a great American institution. I am referring, of course, to ROTC. Most of these critics seem to ignore the invaluable service ROTC renders our great and glorious country - the suppression of thinking. Every true American realizes that thought is subversive. As one Wisconsin senator put it, it leads to Communism and Democratic congresses. From my own experiences of ROTC, I can proudly affirm that after a Friday's drill, I was incapable of a single coherent thought Communistic or otherwise.

Unfortunately, I was unable to participate in the advanced ROTC program. My doctor advised me that my intelligence, small to begin with, would be seriously impaired. He said that instead of becoming a servant of the state, I was more likely to be a ward of it.

I only regret that I have but one mind to give to my country.

Jerol Harrington

The Assassin Skulks

Dear Sir,

It should be a surprise to to the reader that the following letter is signed; the basic human drive for self preservation normally takes priority over the numerous lofty appeals for outright martyrdom on the part of the so-called "strengthy individualist." In signing, I have denied myself the use of the protective "anonymous." But this "be a martyr" appeal is, none the less, destined to levitate to that dimensionless plane of imagined righteousness and platitudinous sonority. It will hover there with the countless other defunct conceptions of the traditional red-blooded approach to the regaining of ones' inalienable right of unrestricted individualism. In reality, it is no less admirable to remain anonymous than it is to be a stumbling martyr.

There has been an increasing fervor over the many injustices currently being suffered by the UVM students. These injustices have ranged from ROTC's compulsion to WSGA's intolerable constrainment. It is time for the intelligent students of this university to admit to an underlying and seemingly obvious truth. The truth is that the UVM student body (and the entire generation) is afflicted with a diffuse dissatisfaction and contempt. The students are suffering an hysterically weak inability to express or give direction to this nauseous irritation. We are a feeble, a blanched and a bloodless lot. But this is not, in itself important. There have been washed out generations before. What is important is the frightfully strong and ugly organism slinking just ahead of the present hour, waiting, ever waiting for its' chance to pounce, to sink its' vampire's teeth into the pale white flesh of this generation. The organizations of ROTC and WSGA are merely the feelers of this monster, faithfully sending proof to

(continued on page eight)

Why Not ?

by JULES OLDER

Let's play a game. We'll call it *School* with a *Million Bucks*! The rules are simple. Anyone can play. The players sit in a circle and [illegible] things they would do if they had a million dollars to donate to UVM their beloved alma mater. The person who makes the best suggestions is declared the winner and gets to donate a million smakers to the school under the conditions he has stipulated.

What's that? You say its my turn first? Well, o.k.! WHY NOT!

I'll start by getting rid of that dinky fountain that slobbers indifferently between Waterman and Science Hall. Come to think of it, I might as well get rid of Science Hall too. The fountain will be replaced by a marble job that shoots a real stream of water. The new Science Hall will be brick colonial. The [illegible] adorn the present structure will be ground [illegible] and scattered to the winds atop Mount Mansfield.

Next on the list of improvements is a Student Union. A part of it will be reserved for Independents exclusively (because non-Greeks now have nothing). There will be a room that no bridge player can ever enter, and a coffee shop that sells more than a milliliter of orange juice for a dime. Coffee, of course, will be a nickel a cup.

Then I'll buy a voting machine and give the old milk cans back to the farmer they were probably stolen from. My only stipulation will be that candidates must have a real platform and not just cute slogans before their names can appear on the ballot.

If I find myself running out of money, I'll [illegible] old gym to the city of New York for use as a bomb shelter. Or subway station. Or anything that will last a million years, but, nobody ever has to see.

Of course Lafayette Hall will be completely air conditioned, the stairways will be widened, the fountains adjusted for cold water, proper ventilation installed and -- perhaps it would be cheaper to tear the building down and start all over.

With the small change remaining in my pocket I'll buy a lot of new trees to plant all over the back campus.

Newman Club Officials Speak

By ANNE CLARK

The Newman Club of UVM had the privilege of being host to two of the top National Newman Club officials. Friday evening, November 18 Mr. Richard Dowd, the editor of the National Newman News, was the guest speaker at the club's Friday meeting. Sunday, November 20, Rev. Alexander Sigur, National Newman Club Chaplain, visited the campus.

Mr. Dowd's topic was "What Kind of Character Are You?" After the meeting, a coffee hour was held, and Mr. Dowd answered questions concerning the national news.

Mr. Dowd is a graduate of Holy Cross College in Worcester, Mass. He also attended New York University and Fordham University. After college he served for five and a half years in the U.S. Navy as a naval intelligence officer. The National Newman News has a circulation of over 50,000 throughout the country, and is the only publication of its kind. It is published monthly in Albany, New York.

Father Sigur arrived on the UVM campus Sunday afternoon. He said 4:30 mass at Ira Allen Chapel, and was the guest of honor at a coffee hour at the Newman Center Sunday evening.

Ordained to the priesthood in 1946, Father Sigur did post graduate work in canon law at the Catholic University of America in Washington, and earned his doctorate in 1950 at the Dominican Colleglo Angelico in Rome.

In addition to his duties as Chaplain Fr. Sigur is Newman Club Chaplain at the University of Southern Louisiana and editor of the Southern Louisiana Register, newspaper of the Lafayette diocese comprising 13 parishes (counties) of southwest Louisiana.

Father Sigur flies his own plane, a single engine Cessna. He visited Nashville, Tennessee last week and will visit Boston, Albany, and Rhode Island this week. The UVM campus was Father Sigur's first official visit to a New England University.

Father Sigur said that there are over 400 federated clubs in the nation with a total population consisting of 40,000 Newmanites. There are over one half million Catholic college students in the country who are enrolled in secular colleges, and 250,000 who attend Catholic colleges.

In some schools across the nation, Father Sigur said that credit hours are awarded for attending Newman Club classes.

Father Sigur termed Vermont and its campus as "beautiful."

Letter Sent To Local Establishments

Many of our sororities, fraternities, and other organizations at the University of Vermont are renting accommodations in Burlington and vicinity for their social functions.

During last year the management of several establishments contacted us to inquire regarding University policy on the use of alcoholic beverages. Because of these inquiries we have decided on this letter in an to clarify our position on this issue.

We know that you wish in your dealings with University groups to cooperate in having the social functions conducted in accordance with established University policies. The University statement regarding the use of alcoholic beverages denies this privilege to students, regardless of age, at any social function. Therefore, for example, our University organizations may not arrange for a bar to be set up in connection with their parties or for alcoholic beverages to be served in the area they have privately reserved for their social function.

Obviously this policy does not relate to the separate operation of your permanent facilities for the sale of legal beverages during the period when the social function is taking place. It does, however, prevent the University group asking that a bar be set up for their particular use or from "taking over" your permanent facilities for their private use.

We have purposely attempted to state the above as simply as possible. We hope that this letter accomplishes the purpose of communicating the University policy in this regard.

A. Rankin, Harris, Dean of Women
Earle W. Clifford, Dean of Men

Dr. Wolf Re-elected

The dean of the College of Medicine has been re-elected to a three-year term on the executive council of the Association of American Medical Colleges. George A. Wolf, Jr., was re-elected to the council, governing body of the association, at its recent meeting in Hollywood Beach, Florida. The executive council consists of the regular officers plus six elected members.

Cuba, Castro, And Me

by EDWARD KRITZLER

Just because I've been seduced by Communism, and Fidel is subsudizing me to the tune of a thousand per week, please don't think my articles are in anyway biased. Seriously though, I haven't been brain washed, nor do I consider myself a radical. Nearly all the Americans I met who visited Cuba this summer view the revolution as I do. In fact one American student I became friends with in Cuba views this as the primary reason behind our State Department's recent action in advising all Americans not to visit Cuba. Steve Kenin, like myself, writes for his school paper (the Temple University News) about Cuba. The following paragraph is a quotation from one of his earlier columns:

> The reason behind the U.S. Government's recent action in calling home all U.S. citizens in Cuba who do not have vital business there, is that the government wishes to put an end to the first hand reports from American visitors which completely contradict U.S. press and government statements concerning U.S. policies in Cuba. I believe this to be so because every American whom I have met who has visited Cuba and has not stayed in a very wealthy section of Havana, has come back contradicting the U.S. press and criticizing the U.S. government's Cuban policy. It seems logical to me that the U.S. government would want to stop these contradictory reports.

To state that it is dangerous for an American to visit Cuba is an unwarranted assertion. Oh, to be sure, if you go there for the purpose of overthrowing the government (as a few Americans have recently done) then you will not find the island a particularly safe place to be in. As I did not go down with this aim, in two months in Cuba not so much as one offensively intended word was uttered to me. Quite the contrary, I have never encountered such overwhelming friendliness and hospitality. I argued our governments continually and not once did I arouse any anger among the countless Cubans with whom I spoke. I found the Cuban people to be extremely friendly, happy and above all proud of their revolution. Apathy is a word not found in Cuba today. The people know about their revolution, about their foreign policy, about what is going on in their nation.

If anyone is interested in finding this out for themselves, a student tour has been arranged to accommodate those students who wish to visit Cuba. This tour which begins December 23rd and lasts until January 2nd is being sponsored by the Fair Play for Cuba Committee. This Christmas-in-Cuba tour is part of the Committee's program to acquaint students with the TRUTH about revolutionary Cuba. Student chapters of this organization have been formed at more than 20 schools throughout the U.S. This special 10 day tour is available to all students. For $100 from Miami or $220 from New York air transportation to Cuba and back and all expenses while there will be taken care of. If you are interested either call me at 2-5000 or write to Student Council, Fair Play for Cuba Committee, 799 Broadway, New York 3, N.Y.

O.E.C.C. Offers Fellowships

The faculty members at the University of Vermont are offered additional opportunities for study in science and technology through the National Science Foundation's Organization for European Economic Cooperation Senior Visiting Fellowships.

UVM as a university will benefit from these fellowships. The O.E.C.C. Fellow will be able to study for six months in one of many different foreign countries. He will be able to see and appreciate what progress is being made in advanced teaching and research programs of the country, and pass this information on to UVM. The University in turn can alter its courses if necessary to keep itself and the students up to date. As Howard Smith Jr., Coordinator of Research at UVM, said, "We do not want to be too provincial in this respect."

The Fellowship is a good opportunity for some travel. However, all the time abroad will be spent by the fellow studying in his chosen field. An accepted applicant will receive a travel allowance. He will also receive a subsistence allowance for every day in Europe. UVM will not at once become more cosmopolitan, but it will become a stronger university.

Selection for Fellowship will be made by UVM. The university would choose applicants for the National Science Foundation's Fellowships on the basis of what each applicant can contribute to UVM upon his return. This type of Fellowship would be appropriate for someone on sabbatical leave. It is possible to get the application and additional information from Mr. Howard Smith Jr., 136 Waterman Building.

Across the Campus

by SANDY CAMERON

NOTICE

[illegible] ALPHA EPSILON PHI

[illegible] Marge [illegible] director of WERP were out [illegible] great job in making the week a wonderful success.

[illegible] of our sisters gave their pins away to make big [illegible] during the week.

[illegible] the sale was its usual success. Thanks to our sisters [illegible] Sue Ostrow and Betty Bergman.

ALPHA EPSILON PI

[illegible] starting with the APE house the Saturday night before Thanksgiving. Had to look twice to believe what one before his eyes. Instead of nice young college ladies and good cooks, APE was inhabited [illegible]

[illegible] Jon Thayer, APE's pledge to Victor Borge showed [illegible] and Chuck Bennett [illegible] the great appearance [illegible] Bennett around the [illegible] Bundle got here [illegible] the waterbed was [illegible] and Chuck [illegible] were also there [illegible] Alpha Epsilon Pi fraternity wishes to sincerely thank these people for helping to make our party the great success that it was.

Congratulations to Brother-Master Mary Vigler who became pinned to Sue Schwartz last week. Lots of luck to two great kids!

[illegible] Kaye Burgers. Mary Vigler and Dick Gilman are [illegible] thinking of a store [illegible] on their routine for this February's big event. Keep up the good work, guys.

Hope everyone had a great time Thanksgiving and if the weather - or just returning - has gotten you down

ALPHA TAU OMEGA

[illegible] SERP Week [illegible] to the dregs and to revive the house after the week of [illegible] WERPD Miracles do happen!

[illegible] kept the rare snake night after night with the [illegible] that he had two dates for WERP Week. He enjoyed one in particular. She was so "excited" when she saw a fish she is that she couldn't move. She was the strong silent type, but on the whole a bit of a "dummy". Well Don, better luck next year.

George Bratsen gets ready to impeach Mr. Gould as he studies three days for the Conn. Law exam. How did you make out on that one, George? did the pen Marilyn used give you any good luck?

Dick Urban finally learned what turns the cars in our world go 'round. It seems like Donna's Volkswagen quit on them one night and Dick thought it might be a flat tire. It turned out to be a dead battery, much to his dismay.

Don Morse still looking for his car -- seems like he never can find that thing when he wants it!

KAPPA ALPHA THETA

The scales will be much used for a while now that everyone is back from Thanksgiving full of turkey and other goodies. Just as we're back down to [illegible] we start to that most wished for weight that took so much will power. Christmas will come around and the battle is on again. There are some who feel it is better to avoid the frustration and steer away from the almighty scales.

Just before Thanksgiving, Theta celebrated the coming vacation with an open house with the Sig Ep jazz band. Everyone must have been in a holiday mood as it was a grand success and the band was terrific!

It's not everyone who has the opportunity to be Phi Delt's guest of honor and Pat Bishop was the lucky girl last Monday night at dinner. It seems that Mrs. Sheffert and Pat had a very nice time. Who will be the next honored girl, boys?

The Thetas are in favor of having a WERP semester. There's never been so much excitement or so many fellows around that we hardly knew existed. There was also some serenading as Carol Tyler pinned Bill Van Tassel and Sally Green, with Cynthia's permission, pinned

[illegible] Hairline Notice [illegible] thing we [illegible] Phi Delt as we received coveted WELCOME [illegible] only one restriction [illegible] like to put [illegible] and that is the "Dutch" [illegible] after Christmas. There also been some [illegible] desire for some [illegible] puff football [illegible] be surprised [illegible] either make it [illegible] Take it from [illegible] broke.

DELTA DELTA DELTA

The UVM chapter of Delta journeyed down to Middlebury the Monday before vacation to celebrate Founder's Day with our sisters at that campus. It was a wonderful exchanging news, views and especially songs. All who went came back full of warm feelings and spirit.

Another occasion we enjoyed immensely was our pledge-active change dinner with the "Seven Stars" of Sigma Nu.

GAMMA PHI

Last week the Gamma Phi's enjoyed the visit of Miss Charles Payne, Province Alumnae Director. She was to be with us to help celebrate our Founder's Day activities. A thank you to the men of Phi Delt for remembering our Tenth Anniversary with flowers.

Congratulations to Sue Knandel, '63, who was recently invited to join Alpha Lambda Delta, an honorary recognizing high achievement during the Freshman year.

Wednesday night the Gamma Phi's enjoyed getting together with the Acacians and the Beta Mu's for a coffee hour. The Acacia even provided entertainment, which made the evening even more enjoyable. A special thanks goes to Don Morse for his part in the program.

The Beta Mu chapter is proud to congratulate Miss Eleanor Luse of the Speech Dept. here at UVM for being named to the National Phi Beta Service Roll. Alumnae who have served continued and outstanding service to Gamma Phi. Miss Luse was instrumental in bringing Gamma Phi to the Vermont campus and served as Alumnae Advisor from 1956 to 1958, and is presently serving as our Faculty Advisor.

PHI MU DELTA

We wish to welcome to the ranks of our brothers Dick Sawyer and Alex [illegible] also wish to extend congratulations to Robert [illegible] has become our new [illegible]

The Phi Mu house [illegible] sounds empty with [illegible] brothers out [illegible] Let's hope they bring [illegible] some trophies. We are looking forward to [illegible] we can hunt, uninterrupted [illegible] classes.

SIG EP

Last week seven [illegible] in the fraternity's [illegible] woods. Only two [illegible] however, were successful [illegible] their efforts. Neil [illegible] came home with a [illegible] 145 pound deer and [illegible] shot a fox.

After all the [illegible] "I've been WERPED down, Jungle Jim [illegible] Tom Neapolitano [illegible] Lewis had many [illegible] ments for the girls [illegible] who seems to [illegible] and they add [illegible]

(continued on page [illegible])

Filters for flavor

–finest flavor by far!

Tareyton has the taste–

Dual Filter does it!

Here's how the DUAL FILTER DOES IT:

1. It combines a unique inner filter of ACTIVATED CHARCOAL . . . definitely proved to make the taste of a cigarette mild and smooth . . .

2. with a pure white outer filter. Together they select and balance the flavor elements in the smoke. Tareyton's flavor-balance gives you the best taste of the best tobaccos.

SIGMA ALPHA EPSILON

On Thursday night, November 17, two Sophomore met ... Marks and ... pledged to SAE. Congratula... tions are ... to Mike ... Bill Cl... and ... who both became Pledges of Sigma Alpha Epsilon on Sunday November 20.

On Monday evening, November 21, the men of SAE had their annual Thanksgiving Dinner. Our guests for the evening were Dr. Gross and Prof. Hauger. After dinner Doctor Gross and Faculty Advisor spoke about the law, and the part that every student can play in the athletic rebuilding program at the University of Vermont. Prof. Hauger spoke about fraternity life when he was a brother of Minn. A. of SAE.

The Minerva Club's card party was a big success and thanks are extended to all who attended.

Brother Don Creasia, while hunting with Bill Burke shot the first deer of the season for the men of SAE. He bagged the 140 lb., three pointer near Middlebury. Figuring cost of the gun, ammo, transportation, etc. Don figures the animal only cost him $2.50 a pound. At this time we feel compelled to extend congrats to Brother Bill Mooza, who closed the season triumphantly over the four-legged foe, bagging himself a 100 lb. spike horn buck himself.

Lost and Found Department: LOST -- Tonseth's Rawhide shoelace.... FOUND -- the only student in the history of UVM to get locked in the library. . none other than J.B., of course.

SIGMA PHI

We're glad to see that everyone made it back to UVM safe and sound after a very enjoyable holiday. Some of the boys are still recovering from the romping, stomping party held last week in White Plains, where everything was nice and legal.

MERP Week seems to have been quite successful according to the "Sleeper". Some of the boys were in their glory last Thursday night when they were serenaded by the AEPhi girls after a previous ...

Annual Contest To Be Held

DECCA HI-FI'S TO BE CONTEST PRIZES

Fred Schnaars, Business representative for Philip Morris, Inc. has informed the CYNIC that his company is again this year conducting a box and package saving contest. Mr. Schnaars said, that this years contest will be unique here at the University of Vermont as two major prizes will be awarded. Identical Decca Stereophonic hi-fi sets will be awarded to the men's and women's housing unit which saves and turns in the largest number of Marlboro, Parliament, Philip Morris and Alpine boxes and packages.

THE RULES FOR THE CONTEST ARE AS FOLLOWS:

1. All empty packages must be in bundles of 25.
2. The empty packages and boxes must be turned into the Student Association Council Room by 2:00 P.M., Friday December 16.
3. All boxes and packages must be of a current packaging.
4. All empty boxes and packages become the property of Philip Morris, Inc.
5. In case of a tie, a drawing will be held.

Start saving today! Enjoy the finest smoking available and help the organization of your choice to win a handsome prize. The prizes are on display in the Book Store located in Lower Waterman. For any further information, contact Fred Schnaars.

Pan-Hel Sponsors Child

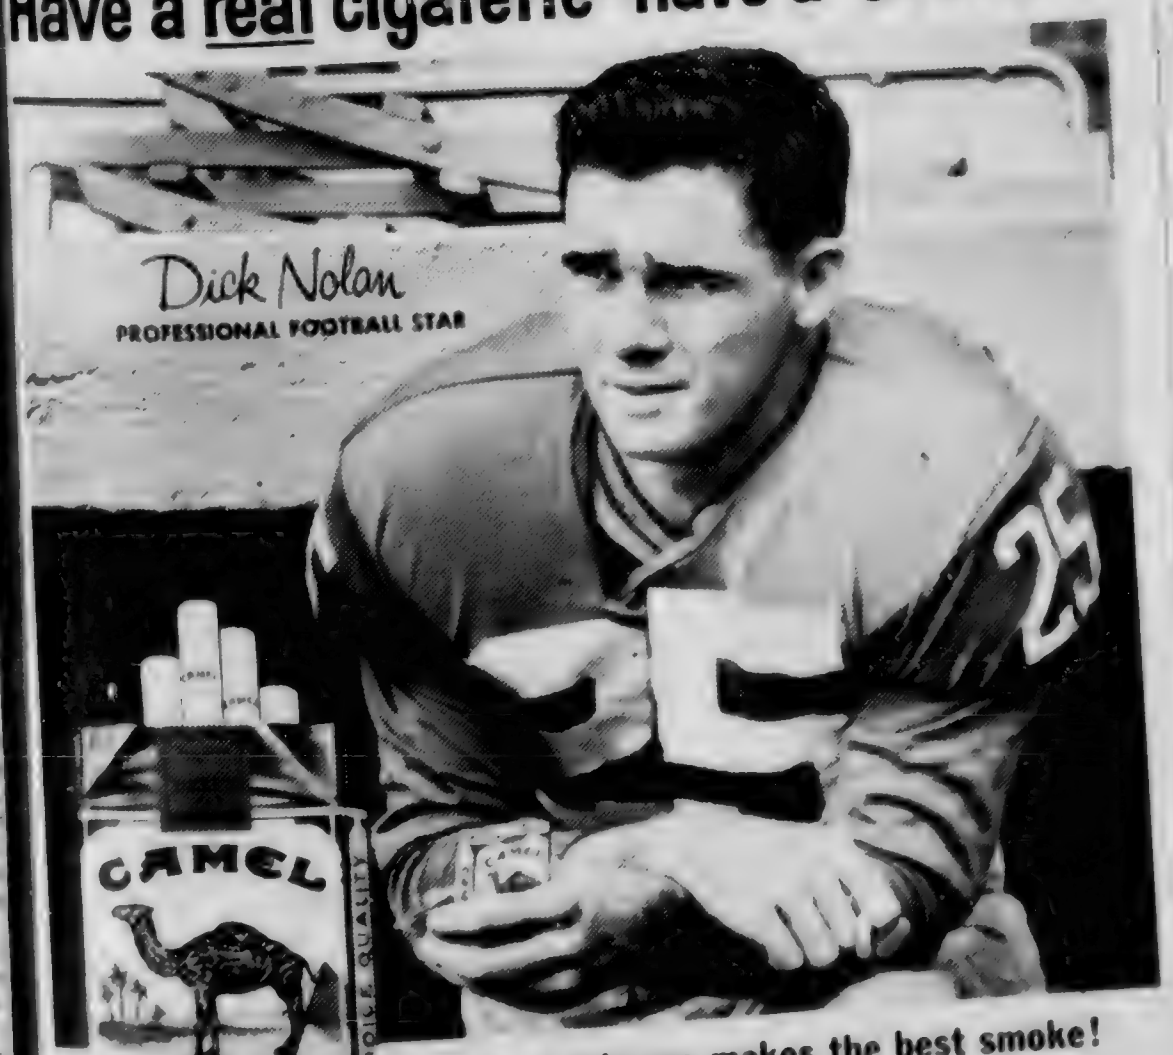
By ILENE BARD

When the cries of peace and victory ended World War II and the Korean War, the silent, hungry, deserted pleas of children echoed throughout the lands. "Name from demilitarized zone along the 38th parallel, lost home in war, father died, only bedding in home is ragged blanket and straw, kidnapped by Communists, children always hungry, children are beggers in streets." These children must not be the little forgotten generation. While the giant, international game of political chess is played across the conference tables of the world, hundreds of thousands of sick and hungry children sit and wait. "The Foster Parents' Plan has acted by caring for these forgotten children. Established in 1937, the Foster Parents have helped 76,000 children and are currently caring for 14,000. The plan is a non-profit, non propaganda, non sectarian, independent, government-approved relief organization which provides for the "care, maintenance, education, training, and well being of children orphaned and distressed and otherwise made destitute." Individuals and groups known as Foster Parents contribute $180.00 a year toward the support of a child. Relationship with the child is on a personal level.

The Panhellenic Council became Foster Parents to Skafida Paraskevi of Alagonia, Kalamata district, Greece in 1955. Paraskevi lives with her mother and a six year old sister, Pota. During World War I the child's father joined the army to serve his term of military duty, however he became entirely blind due to war hardships, and was released from service. He married Paraskevi's mother in 1940 and with the pension he received from the State, he was able to support his family. In 1950, during a revision of the war pensions, a co-villager made a false report to the War Ministry that the father had already been half-blind before joining the army. The pension was stopped and the family was left to struggle along in extreme poverty. The father died in March, 1956.

...(contains a small strip of land and two goats, the monthly income of the family is $9.56 which cannot begin to cover the basic necessities for three people.

Paraskevi is a bright, obedient and diligent worker. She is 5'3", weighs 84 pounds, and hopes to be a dressmaker's apprentice next year. Her mother suffers from heart trouble and has medical care provided free of charge. The one room house with oil lamps, no utensils, one bed and one table, has taken on a new look with the help of the Foster Parents' plan. Windows, additional bedding, clothing, partitions, and repairs on the roof and floor have been added.



Each month the Panhellenic Council receives a letter from Paraskevi. "I was so very happy to receive your dear letter! I imagine that the forest which you see from your window is bare now because all the trees have lost their leaves. For two weeks now, we are having very heavy winter and can't go out of our houses. My goat Galano had three charming kids. Thank you ever so much for the lovely blanket you sent me last month. It keeps me so warm at night, now that the weather is cold."

Under the Foster Parents Plan Paraskevi receives a monthly cash grant of $9.00 plus shoes, warm clothing, periodic distribution of food packages and medical care. Equally important is the knowledge that she has a far-off friend interested in her welfare.

The Panhellenic Council has given hope and courage to a family once lost in the jungle of extreme poverty. Paraskevi will soon receive her own sewing machine and become a self-supporting dressmaker.

The sound of victory in war has lost its glory when one can see the thousands of homeless children wandering across devistated lands. The deafening sound of a bomb becomes weak when one can hear the hungry cries of a lost child. The Panhellenic Council has answered one of the wishes of a wandering family, a peaceful world will answer the wishes of all families.

Letters

(continued from page four)

[illegible] the apparent mass [illegible] the opposition is [illegible] for insignificance. Even the minority is not [illegible] it still devour its' [illegible] food. All of the damned evil whispers of "injustice!" and [illegible] of freedom are not making matters for the enemy. The [illegible] arms are actually [illegible] feeding of the articles of protest in the recent issues of the school newspaper and its ugly face is smiling a cruel smile. It is fully aware that these whimperings are of no more significance than the pathetic twitching of a [illegible] and dying foe's [illegible] hind foot.

We must gather strength. We must learn to meet this [illegible] meeting term. We must find here and now an innovative spiritual movement by which we can take our dangling harmful ties to religious [illegible] tradition, to imagine! The fact that [illegible] is enough. We must unite with the [illegible] ities of complete realization, awareness and sensitivity. We must find again a universally esteemed fountain of ideals, through which we can communicate our individual senses of worth and right. We have the freedom and the beauties which we enjoy today only because our forefathers were united. It must say it would be an unimaginable tragedy if all that we still have were lost.

The vital entrails of our generation's intellect are irritated and must have expression. But before this expression can occur there has to be a serious, complete, and directed awareness there must be a total re-evaluation. Let us add fire to that irritation, join hands, and proudly march. Only then will we regain our precious rights of individualism, freedom, and unquestionable dignity.

Respectfully yours,

David L. Gibbs, '63

Student Honored

Continuing the successful program begun last year the Army ROTC Brigade chose its top cadet, the Cadet of the Month. The Cadet of the Month is selected on the basis of appearance at and performance in [illegible] knowledge of current events and leadership ability. This cadet is the most outstanding of the 749 currently in Military Science I and II.

C. James Newman, MS II, is the Cadet of the Month for October. Cadet Newman is in F Company at Grin. He was chosen as demonstrator by his platoon leader because of his excellent handling of the M1 Rifle. Cadet Newman hopes to be chosen for admission to Advanced ROTC and is a member of Pershing Rifles.

When asked how he felt about ROTC, Cadet Newman replied, "Guess I am pretty "gung ho!" "Gung ho" is also a fair description of Cadet Newman's other activities. He is Chairman of the Activities Committee, Class of '63, is Publications Manager for the Pep Committee and is majoring in Mechanical Engineering. His hometown is Gilman, Vermont. He did his 'prepping' at the Mount Hermon School, Northfield, Mass., and is a member of the Sigma Phi fraternity.

Some local businesses recognize the value of the Cadet of the Month Program by making gifts available, thus encouraging the cadets to develop their leadership abilities. The total value of these gifts is approximately $18. The Park Cafe is giving a $3 meal, and Valade's Restaurant and Buffet a $1.75 meal. Wood's Sporting Goods Store affords 5 pairs of Wigwam athletic socks. The Strong Theatre is making available two tickets to any forthcoming show and Miles and Riley, an Arrow shirt. The Cadet of the Month is also given a lighter with a distinctive insignia by the ROTC department.

Serafin Joins MS Dep't.

A Marine World War II veteran who went to college after his discharge and who then enlisted in the Army and received a direct commission has joined the Military Science department.

He is Capt. John Serafin of Mineola, New York. Following graduation from high school in Syracuse, New York, in 1942, Serafin joined the Marines and served in the Pacific theater. Following his discharge, Serafin matriculated to Syracuse U. in the fall of 1946 and received his degree from the Upstate New York school.

In December of 1950, Serafin enlisted in the Army as a private and in September of 1951 received a direct commission. Since then, he has served in Germany and Korea with a four-year state-side stint in between.

AFROTC Chooses Seniors

AFROTC Detachment 870 of the University of Vermont is proud to announce the selection of five seniors as Distinguished Military Graduate candidates.

The following senior cadets have been chosen to receive this honor: Charles M. Elliott, Thomas R. Hackett, Gordon H. Sprigg, Jr. all from Burlington, Roland J. Allen from South Hallsburg, N.Y.; and John H. Martel, Jr., from Rutland, Vermont.

It is Air Force policy to recognize those persons who, during Air Force ROTC training, have distinguished themselves academically and have demonstrated outstanding qualities of leadership for service in the Air Force. Selection of distinguished Air Force ROTC cadets is first made by the Professor of Air Science, Major John F. McGauhey, on a best qualified basis. Final selections are made by a board of officers at Headquarters United States Air Force.

Why Not ?

(continued from page four)

[illegible] hope of tiding the sons' dorms.

But before the school gets a cent, I'll [illegible] administrators sign a bloody oath to preserve [illegible] forever as a beauteous landmark on the campus. I [illegible] that shouldn't be necessary, because it looks like they're going to preserve it anyway.

That's it. I'm dead broke. But this [illegible] any day.

If anyone comes up with any ideas better [illegible] drop them into my box in the CYNIC office. [illegible] ones will be picked by an impartial judge [illegible] printed in next week's column. Get me off the hook [illegible] entering this big contest now!

And may the richest man win...

From left to right: John H. Martel, Jr., Gordon H. Sprigg, Jr., Stanley E. VanHorn, Jr., Vernon F. Fowler, Morton A. Lord. Frederick W. Harrington was absent when photo was taken. (Photo by Hazelton)

two heads are better than one

Especially when one happens to be a delectable girl-type head. Lovely heads are always attracted to male heads that use 'Vaseline' Hair Tonic — made *specially* for men who use water with their hair tonic. 'Vaseline' Hair Tonic's 100% pure grooming oil replaces oil that water removes. In the bottle and on your hair the difference is *clearly* there! Just a little does a lot!

IT'S CLEAR ; IT'S CLEAN ITS

SA

(continued from page one)

The biggest advancement of all that Student Association will make this year is the creation of a new constitution. During this executive term of Jerry Edelstein and Ted Edgecomb, (and much due to them), the old and rather fallible constitution will be completely revised by a committee from S.A. made up of council members, and other students. The new constitution will strengthen our Student Association undoubtedly, but ultimately S.A. will be a success not when it has more power to affect student activities, but rather, when the students have the interest to affect S.A.

Dinner Music IN Waterman

Upon returning from Thanksgiving vacations, students eating in Waterman Cafeteria will be greeted by music during the meal hours. Sponsored by Saga Food Service, the music will be provided by WRUV, the campus radio station, with new sound equipment to be purchased by Saga.

The music will be wafted through the air by means of six high fidelity speakers placed in the air louvres of the dining hall. Early risers will have music from 7:15 to 9:00 a.m., with the service resuming at 11:15 to 1:30 and again from 5:15 to 6:45. The plan was decided upon when trials earlier this month met with the enthusiastic approval of the students.

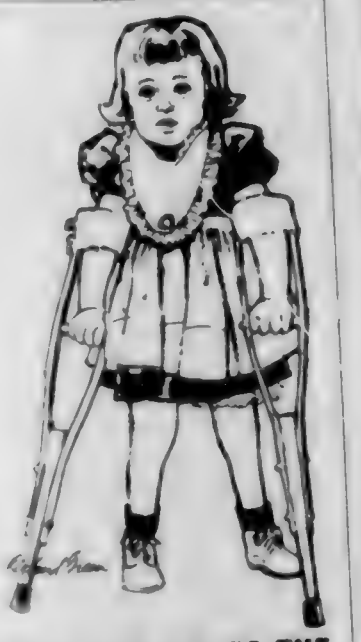
GERMAN CLUB

The German Club will sponsor a buffet supper on Sunday evening, December 11th, at 5:30 in the Waterman cafeteria. Entertainment will follow. Everyone is cordially invited to attend.

Solid opportunities with solid state devices

A big part of Western Electric's job is to manufacture the miniature "new arts" products that are changing the science of communications. It's a job which offers you a challenging career—a chance to plan new methods of mass producing ever-improving kinds of transistors, ferrite devices, diodes, special purpose electron tubes, etc.

You'll be with a company that is expanding rapidly in this field. At present our Allentown and Laureldale, Pa., plants are devoted exclusively to making electron devices, and a big new plant is under construction in Kansas City. The needs of the Bell Telephone System for these products are increasing daily and will multiply enormously with the introduction of Electronic Central Office switching now nearing trial operation.



These devices are changing the scene at all our manufacturing plants as they go into the startling new communications products developed by our associates at Bell Telephone Laboratories. From microwave transmission equipment to submarine cable amplifiers, our products call for creative production engineering, installation planning and merchandising methods. Our job for the Bell System and the U.S. government has grown to the point where we are now one of the nation's "Top 11" in industrial sales. And your chance to play an important part in our future growth is *solid!*

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of Consider a Career at Western Electric from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. Be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

Western Electric

MANUFACTURING AND SUPPLY UNIT OF THE BELL SYSTEM

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J.; Teletype Corporation, Skokie, Ill.; and Little Rock, Ark. Also Western Electric distribution centers in 32 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.

6 Harriers Win Varsity Letters

NOV. 17, 1960 — Six Vermonters have won Varsity Cross Country letters at the University of Vermont, it was announced today by J. Edward Donnelly, athletic director. The awards were approved by the Athletic Council and will be presented at the annual Letterman's Banquet.

At the same time Timothy J. Simpson, a sophomore from Lyndonville, was elected captain of next year's team. Simpson was one of the standout runners for Coach Archie Post's harriers this fall. His performances were instrumental in aiding the Varsity to end the season with a 3-2 record in dual meet competition.

Donnelly also announced that class numerals were awarded to seven members of the Freshman Cross Country team. The Frosh Harriers swept through their dual meet competition this fall, posting a final 6-0 record. They elected Gary Karch of Rochester, N.Y. and Ronald Bishop of Jericho as honorary co-captains for the season just completed.

Varsity letter winners were: Harold E. Billings, Clarendon; Dale A. Burroughs, Newbury; John E. Chesney, Stamford, Conn.; Stephen H. Russell, Hinesburg; Timothy J. Simpson, Lyndonville; Hugh B. Spafford, North Clarendon; and William F. Stillson, Windsor.

Freshman numeral recipients were Ronald L. Bishop, Jericho; Michael L. Grossman, Muskegon, Mich.; Gary Karch, Rochester, N.Y.; Paul Maffei, Wallingford; Donald A. Moreau, Swanton, Leighton D. Walker, Burlington; and Stephen M. Zecher, Bayside, N.Y. John R. Pratt of Chelsea and David J. Sargent of Chittenden received class numerals and were named manager and assistant manager for the 1961 season.

HALFTIME BREAK

By Stan

A WASTE

Situated behind Chittenden and Buckham Halls is a parking lot. There are usually no more than four or five cars parked there at any one time. As it happens, there is adequate room for these cars in front of the men's dorms.

It may be pure coincidence, but the parking lot is just about the right size for two tennis courts. All that need be done is to remove the grass mall in the center, and asphalt it over. These two tennis courts would help to remove some of the congestion that usually befalls the Centen and Redstone Courts. As it stands right now, that parking lot is a waste. The amount of money spent on that parking lot is wasted, unless the lot is used.

THE REASON WHY

When the first flakes of snow fall, many UVMers will turn their energy towards ice skating. It is almost natural that all eyes will turn towards the basketball court in back of Wills Hall. Last year, the court was flooded, and all went well, until it snowed again. In order to clear the snow from the court, a tractor was used. It cleared away all of the snow, but cut up the court so badly that it couldn't be used for skating. By the time the chopped ice was cleared away and the court was frozen over again, new snow had fallen, and the same problem reoccurred. The other alternative for clearing the snow from the court is to have the men shovel it by hand, but this is costly and time-consuming.

The same problem still is with us. How to get the snow off from the court without chopping up the ice, and at a minimum expense. The problem remains to be solved. Until the hockey rink in the gym is ready for use, there will be no ice skating at UVM. Money is still needed before the gym is to be started. After all, there can be no gym without money.

Sophs Comprise 9 Of 14 Catamounts

by ROBERT WEINER

Since November first the 1960-61 UVM basketball team has been practicing hard, so that they can be at their strongest when they meet their first opponent, Norwich, on the first of December. Carrying a twenty game schedule, this year's team will meet Yankee Conference foes such as Maine, New Hampshire, Connecticut, Rhode Island, and Massachusetts. In their quest for the State Championship, they will face traditional rivals Middlebury, Saint Michael's, and Norwich Academy. A highlight of the season will come during Kake Walk weekend, when Brandeis invades our campus in an afternoon contest.

This year's team consists of 14 players. Sophomores make up the majority of the team with a total of nine men. There are four seniors and one junior comprising the rest of the team. The tentative starting team includes veteran backcourt man Captain Harry Zingg (senior). Rich Ader (sophomore), high scorer on last year's successful freshman team will play the other backcourt position. In the frontcourt will be Benny Becton, another high scoring sophomore from last year's frosh team. Pete Beck (junior) and Ray Kelsey (senior) round out the starting five. Three sophomores have been looking very good during practice sessions, and can expect to see a good deal of action. They are John Stahler, Frank Willis, and Joel Shape. Added bench strength can be relied on from Bob Agel (senior), Pete Brem (sophomore), Bob Flemming (senior), Paul Flint (sophomore), Ray Houle (sophomore,), and Karl Kieslick (sophomore).

Back at the coaching helm this year will be John "Fuzzy" Evans. He plans to use 3 out and 2 in cutting offense. Occasionally he will change to a single or double pivot. The defense will vary with the opponents. They have been working on a man to man, and various zones.

Although the team has been hampered by last year's graduating seniors, Coach Evans is fortunate in having a great number of sophomores. As the season progresses, the teams' showing should improve, since Ader, Becton, and the rest of the sophomores will be gaining much needed experience and confidence. Coach Evans' estimation of this year's team is that it will be better than last year's with less experience

Burlington To Help Build Gym

Bishop Joyce To Head Group

A $200,000 Greater Burlington Gym Fund Campaign by the University of Vermont will have the time and service of more than 50 area business, professional and civic leaders, it was announced recently by F.W. Shepardson, chairman for the effort. Honorary chairman will be the Most Rev. Robert F. Joyce, Bishop of Burlington.

Shepardson said that the community goal of $200,000 was an important phase of a three-part effort to raise the $2.6 million fund needed to make the physical education facility an early reality. UVM alumni have raised nearly $400,000, he said. In addition, the University will ask the incoming Legislature to authorize a $2,000,000 bond issue, similar to that authorized for the new library, to be paid off by UVM students through an athletic fee. "Greater Burlington business and industry have already given indication that they believe the $200,000 goal is a very reasonable contribution toward a facility which will make possible improved educational programs for UVM students and give, additionally, many special benefits to the Burlington and state communities."

SA Concerned With Traffic Problem

Traffic on the University of Vermont Campus has become disturbingly heavy and dangerous. Not only are pedestrians finding it difficult to cross the streets, but also, busy corners may be in the future, the scenes of serious accidents. The UVM Student Association, alarmed by the numerous near-accidents, is sending a letter to the Burlington Police Department requesting safty provisions SA hopes in particular to have traffic at the corner of College and Prospect Streets regulated during periods when traffic is especially heavy. Slow down, stop signs or a traffic light would, it is felt, remedy the situation.

In the meantime, SA has said, students can help the situation by leaving enough room when parking their cars near the corners to insure ample vision by approaching automobiles and pedestrians. Also, it would be advisable to drive slowly so that pedestrians will be safe when walking across the campus.

A closer co-operation established in this instance will continue in the future, for both Student Association and University officials know that co-operation keynotes success.

Vermont's IFC Recipient Of National Award

by ANNE CLARK

Robert Goudman, the President of UVM's Interfraternity Council, recently returned from the National IFC Conference which was held in Los Angeles, California, as the proud possessor of a plaque symbolizing UVM's IFC program as the best in the nation for colleges and universities having ten to twenty fraternities on campus. UVM has fifteen fraternities. An award was given in three divisions - small, medium, and large. UVM received the middle division plaque.

The NIC is a national organization which serves as a medium of cooperation between fraternities. The council handles fraternity rushing, which will be held at UVM between the first and second semesters.

Goudman received the plaque from Mr. Roland Maxwell, National Interfraternity Council Chairman. The interfraternity sports program and Greek Week program sponsored by UVM's IFC were particularly singled out for praise.

The interfraternity sports program is conducted by the IFC on campus, and includes competition in most major campus athletics. The football season has just been concluded.

Greek Week was held last year on the UVM campus for the first time. Its purpose is to promote interfraternity relations and to attempt to solve mutual fraternity problems.

This year the week will open April 23, with exchange fraternity dinners. On Wednesday and Thursday of that week a series of workshops will be held with the various house officers participating. An evaluation of these discussions will be held the following afternoon. This session will be open to the general public.

The week will end Saturday, April 29, with interfraternity competition of chariot races in the afternoon and combined fraternity parties in the evening. A queen of Greek Week will be crowned.

Three members of IFC hold plaque awarded to them at recent conference.

Rushing To Be Explained To Freshmen

An important meeting for freshmen interested in fraternity rushing will be held this coming Thursday, December 15th, at 7:15 o'clock in the Ira Allen Chapel.

This initial meeting concerns members of the freshman class who plan to 'rush' during the mid term intersession period. The meeting is held yearly under the sponsorship of the Rushing Committee, this year headed by Chairman George Hatch of Acacia. The purpose is to present a clear picture of the UVM rushing procedure to the unaquainted freshman so that no misconceptions will later appear. The gathering will be of special interest to those as yet undecided to rush.

Under discussion will be not only intersession rushing, but also such pertinent topics as the pledging period and the 'frothering it' procedure.

PanHel

Freshmen women who are somewhat confused over the intricacies of the Sorority Rushing procedure will be happy to learn of Panhellenic Council's plan to relieve this confusion.

Panhel Council is sponsoring a meeting to be held Monday, December 12, at Southwick. The meeting, composed of a skit and an informal discussion is intended to solve any problems and answer questions of the prospective rushees. All Freshmen women are encouraged to attend, and sorority members are also cordially invited.

CENTAUR Undergoes Change

First Issue Soon

Centaur, the literary magazine of the University of Vermont, has undergone a revolutionary change this year. Not only will there be four issues, instead of the usual three, but many new features have been added.

In the past this magazine contained only short stories, poetry, and essays. Now, in addition, under the editorship of David Colburn, *Centaur* will feature a photography section, plays, and critical reviews. A startling new layout is being used to render the pages more attractive.

Centaur's first publication for the fall of 1960-61 contains a play, short stories, poetry, a dialogue, and photography section, an essay on Mark Twain, and an essay on photography as an art form.

The next *Centaur* will be published between Christmas and Final Exams. The third issue, in the spring of the year, will be in part, devoted to the Fine Arts Festival, while science fiction will permeate the fourth publication.

Dr. Leonidas Jones, Professor of English, and Mr. Robert Caswell, a UVM graduate and former editor of the *Centaur*, are advisors to the magazine. The Poetry and Fiction Editors are Sheldon Rothberg and Michael Bonneau, respectively. Anyone interested in contributing their original art or literary creations is welcome and encouraged to do so. All meetings of *Centaur* are open to everyone.

Deadline

December 14, 1960

All petitions for KW Disposition Funds must be received by December 14, 1960, 4:00 P.M.

"Where's Charley" Tonight

"Where's Charley" a hit musical on Broadway and in the movies will be presented in the Arena tonight and on Dec. 7, 8, 14, 15, 16 at 8:30 p.m. in the Arena Theatre at 8:30 p.m. Based on the book "Charley's Aunt" by George Abbott, the musical score was written by Frank Loesser, whose later hits include "Guys and Dolls" and "The Most Happy Fella."

Dave Hall will portray the main male role made famous by Ray Bolger in both the stage and film versions while Jean Hemingway and Bill play Amy. Other roles will be played by Ron Bailey, Carole Inman, Ralf Monte, Phil Judd, Alice Zalon, John Gallagher, Chuck Gousley, Frank Pagliaro, and Bob Newton. The play is being staged by Greg Falls, drama director. Sets have been designed by Edward Feidner of the speech department. Frank Litral is musical director, Francis Belarich, vocal coach; Herbert Schultz, band director, Carol Schelzer, choreography and Dave Kinney, accompanist supervisor.

"Where's Charley" will be the fourth musical presented by the Players. Others were "Brigadoon", "Carousel", and "Carmen". Two of the more familiar songs from "Where's Charley" are "Once in Love with Amy" and "My Darling, My Darling".

Because of several large production numbers and the frequent changes, local theatregoers will be treated to a fashion show of English dress of the 1890's and also a colorful Brazilian number. This year's show is being split into two runs of three nights each rather than on consecutive nights as in the past.

Tickets may be purchased at the bookstore or at the Arena Theatre box office.

Pershing Rifles Mounts Honor Guard

Friday evening, December 7, between 7 and 8 o'clock, there will visit the women's dorms in honoring Carmen will find an honor guard at each dorm composed of Pershing Rifles Pledges, armed with M-1 pledge Rifles (45" white broomsticks). The honor guard marks the climax of the 1st semester program for Pershing Rifles.

Pershing Rifles, as a freshman and Sophomore organization has four basic purposes:

1. To give recognition to those basic ROTC cadets deserving such recognition.

2. To provide more military instruction and more military activities such as a drill team for those cadets that desire them. As an inter-service organization independent of any department they are able to freely adjust their program to the interest of the members.

3. To provide a better understanding between students and the military by giving them more opportunity to meet outside of the classroom.

4. To provide an extracurricular activity geared strongly towards a freshman of the first semester who find at first that this is a University of upperclassmen.

But the activity has not all been wasted drill hours. On November 11, two platoons of Pershing Riflemen marched in the Armistice Day Parade in Burlington, the Coast Guard Department of [illegible] Pershing Rifles [illegible] entrance to the [illegible]

A week later, [illegible] 18 and 19 [illegible] Lawrence [illegible] Annual [illegible] tournament [illegible] system of [illegible] in by a radio only served as radiomen, but timekeepers [illegible] arose.

This airplane is actually a flying classroom. The course taught is Air Navigation, under *real* conditions. The students are young men who have been selected as possible future leaders of the Aerospace Team. Graduation after 52 weeks of training will win each of the students the honored silver wings of an Air Force Navigator and an Officer's Commission.

For certain young men this training can open the way to a bright career of executive potential. Right now the Air Force is scoring impressive technological advances in the fields of navigation, guidance and tracking, electronics and radar. And here is where its highly trained and experienced Navigators will be expected to take over command positions of increasing responsibility.

To qualify for Navigator training as an Aviation Cadet, you must be between 19 and 26½, single, healthy and intelligent. And you must want to build an exciting, interesting career in the Aerospace Age. If you think you measure up, we'd like to talk to you at the nearest Air Force Recruiting Office. Or clip and mail this coupon.

There's a place for tomorrow's leaders on the Aerospace Team.

COSMOPOLITAN CLUB

The Cosmopolitan Club recently held elections of the executive committee. Those elected were: President-Raouf Malak, Vice-President-Birute Vileisis, Secretary-George Adams, Treasurer-Sandra Larkin.

Mr. Malak showed slides of Lebanon and commented on his country.

The Club will hold it's annual Christmas Party on December 16 in the Student Lounge of Waterman. Everyone is most cordially invited.

KAKE WALK SECRETARY AT WORK

Judy Hunt, Kake Walk Secretary on duty at the typewriter

One of the people behind the scenes of the Kake Walk organization as often for a better member of the Kake Walk Committee is Judy Hunt, Kake Walk's talented secretary. She is usually occupied behind the keys of a typewriter or on the phone making arrangements in any one of numerous areas for the directors and assistant directors.

Judy is a member of the Class of 1961, majoring in Elementary Education. She is a member of Pi Beta Phi and a ...treasurer of Burlington in her junior year. Judy was president of Staff and Sandal and co-chairman of Homecoming. At the present time she is Assistant Chief Justice of the Student Court.

Judy, adds the feminine and artistic touch to the other wise all male organization. In the words of one of the directors, "Judy is an important asset of Kake Walk and will become more indispensable as Feb. 23 draws nearer."

Newman Club

Following the 9 o'clock mass on December 11, the Newman Club will hold a communion breakfast in the lower Waterman Cafeteria. The breakfast will be a testimonial for Bishop Robert F. Joyce. While a student at the University of Vermont, Bishop Joyce was President of the Newman Club. Later he served as Newman Club chaplain.

Tickets are 50 cents for members and $1.00 for non-members.

ONE-STOP SHOPPING FOR A NEW CAR *at your Chevrolet dealer's!*

Now you can make your car-shopping rounds the easy way—all under one roof! For '61 your Chevrolet dealer offers nearly any type of car you could want—at the kind of price that'll make you want it all the more. There's a whole new crop of Chevy Corvairs with lower priced sedans and coupes and four wonderful new wagons unlike any ever built before in the land. There are new Chevy Biscaynes—the lowest priced full-size Chevrolets, beautiful Bel Airs, elegant Impalas, six easier loading Chevy wagons, including three 9-passenger models. Come in and pick and choose to your heart's content!

CHEVROLET

New '61 Chevrolet
NOMAD 9-PASSENGER STATION WAGON

There are six easier loading Chevrolet wagons for '61—ranging from budget-pleasing Brookwoods to luxurious Nomads. Each has a cave-sized cargo opening measuring almost five feet across and a concealed compartment for stowing valuables (with an optional extra-cost lock).

New '61 Chevrolet IMPALA 2-DOOR SEDAN

Here's a new measure of elegance from the most elegant Chevrolets of all. There's a full line of five Impalas—each with sensible new dimensions right back to an easier-to-pack trunk that loads down at bumper level and lets you pile baggage 15% higher.

New lower priced '61 CORVAIR 700 CLUB COUPE

There's a whole crew of new Chevy Corvairs for '61—polished and perfected to bring you sparkle, space and savings. Lower priced sedans and coupes offer nearly 12% more room under the hood for your luggage—and you can also choose from four new family-lovin' wagons.

New '61 Chevrolet BEL AIR SPORT SEDAN

Beautiful Bel Airs, priced just above the thriftiest full-size Chevies, bring you newness you can use: larger door openings, higher easy-chair seats, more leg room in front, more foot room in the rear, all wrapped up in parkable new outside dimensions.

New '61 Chevrolet 4-DOOR BISCAYNE 6

NOW BIG-CAR COMFORT AT SMALL CAR PRICES—Chevy's new Biscaynes, 6 or V8, are built to save in a big way. They offer a full measure of Chevrolet quality, roominess and proved performance, yet they are priced right down with many cars that give you a lot less.

See the new Chevrolet cars, Chevy Corvairs and the new Corvette at your local authorized Chevrolet dealer's

Editorial:

Coffee Shop Blues

One of the most popular places on the entire University of Vermont Campus is the Coffee Shop in Waterman Building. Unfortunately this informal and lively eating-place is the most disgusting place on campus.

THE PROBLEM

It is seldom known that one can enter the Coffee Shop any time and find a table that is not piled high with dirty dishes, stale fragments of doughnuts, and milk bottles. It is even harder to find a chair not coated with a fine film of sticky spilled coffee. If one persists in finding a relatively clean table or chair, he risks both life and limb wading across the welter or refuse and unidentified trash to it.

Periodically, the Coffee Shop issues pleas for more cleanliness and neatness within its bounds. These pleas sometimes result in a temporary improvement of the situation. But conditions soon return to normal. So far no one has come up with a solution which offers any hope of permanent rectification. Obviously, this situation should not be allowed to continue.

CLEAN IT . . .

The CYNIC would like to suggest that one thing that could easily be done to alleviate the situation would be to locate a number of trash cans in convenient places around the Coffee Shop. It is true that there are presently several cans in the Shop, but these are not only inconvenient, but also almost impossible to find. Cans which were both easily found and convenient might induce the student to make use of them as he left. These cans would also make it practical for one to clear a table for his own use without either depositing the debris on the floor or a neighboring table.

. . . OR CLOSE IT

If this or some similar measure did not result in an improvement in the Coffee Shop, we would suggest in all seriousness that the Shop be closed. As things stand now the Coffee Shop stands as a major condemnation of the students of the University. A glance into it cannot fail to give any visitor the impression that he has discovered the University Pig Farm and, as one of the University's more obvious features, cannot help but give a bad impression of the type of people who could not only allow such a mess to exist, but apparently enjoy wallowing in such filth.

Letters To The Editor

Letters to the Editor policy

The CYNIC welcomes letters to the editors on any subject pertinent to the CYNIC, its stories or its policies. Agreement or disagreement with CYNIC policies plays no part in the decision whether or not to print any letter.

Letters must be typewritten, pertinent, to the point and should be readable. No unsigned letters can be considered. Names may be withheld from letters upon request, however, if the Editor-in-Chief feels that sufficient reason for such action exists.

Kritzler Questioned

Dear Editor:

I [illegible] the article "Cuba, Castro and [illegible]" with great interest. However, there are still a few questions to be answered.

Why in such a democratic nation, that Mr. Kritzler describes, do the people not have elections? Why are 80% of the businesses and private dwellings now owned and operated by the government? Why is this democracy is not [illegible]. Why did the entire Cuban Supreme Court of 24 members resigned? Why is the press controlled by the Government? Why in this society where free enterprise flourishes and efficiency is a must do the people take the main product sugar, away from a country that pays a higher price over the world market, and sell it to the Soviets for one third less? Why are executions allowed without [illegible] Why is [illegible] this [illegible] Why do they purchase all their military hardware, and most of it, from the Soviet Union and satelites? Why in a democracy, like Cuba, are Marxist theories taught in the armed forces and in schools? Why are foreign communists roaming about the country from Russia and China, etc.? Why have the oil imports been switched from many nations to Russia alone, and then say they have done away with a form of Colonialism? Why does

(continued on page five)

The Melting Pot

By ROGER ZIMMERMAN

The struggle for equality burns with [illegible] in the deep North. Anti-discrimination in housing and in employment, have done much to retract the effects of racial and religious [illegible] But always, there's that certain intangible in the Northern air. Like a sickness.

The reason that there is so much news devoted to Southern prejudice is that, more often not, the spectacular is involved. There's a front page spread on a bomb explosion in the more papers. Southern prejudice invariably seems to take the form of direct, overt action. Not so in the North. Here we see the behind-the-back sort of thing. And I really wonder which is more sickening, or is more indicative of sickness. At least the South holds a few pretenses. This is not a justification of Southern racial attitude, but the fact remains that they conceal little of their true feelings in the open.

THE SUBTLE NORTH

In the North we often find something akin to the parade party. For instance, let's take a hypothetical example which really isn't so hypothetical. Neighborhood X has been for years and years an all-white middle-class suburban area. But, socio-economic factors being what they are, a Negro family tries to move in. Things start happening. First of all, the [illegible] is turned on. Joe Blow, who considers himself to be as liberal as his next-door neighbor, has been intending to move. So here's an opportunity to sell his property. But neighbors, being so friendly and all, pay a few visits to Joe and family and before you know it, Joe isn't so anxious to sell his house to a Negro. Next Neighbor has insisted that property values would fall sharply. (Just for the record, in a great many cases the reverse is true).

THE SICK NORTH

I wonder why there is this masquerade. I mean why don't the characters like Joe Blow and Norman Next stop kidding themselves? They're as prejudiced as their Southern cousins, the only difference being the latter rationalize while the latter come out in the open and let their hatred spill forth for what it is—despicable.

Why Not ?

by JULES OLDER

[illegible] this column, kindly note that it lacks [illegible] sparkling wit, savage sarcasm, and bitter irony [illegible] nationally unsyndicated weekly series [illegible]. It is more of a venture into the marginal [illegible] syndromes and free association. That is the [illegible] this week's effort is titled

WHY?

[illegible] was yelling at me the other day. She's a house [illegible] of a similar type of female wheel. She was [illegible] she said, because I didn't have a full under- [illegible] of her favorite organization -- WSGA. She [illegible] that the Council Girls were doing the best job [illegible] said, that the honor system was perfectly real- [illegible] and if the girls didn't like it, why they could [illegible] to another school. A little later in the con- [illegible] she told me how she happened to chug-a-lug [illegible] scotch last Saturday night.

I don't know why she swallowed the fly -- perhaps [illegible] . . .

It's strange how ideas about college change once [illegible] there. You know, stuff like, "Last year I [illegible] even spell furturnity and now I are in won." [illegible] anyway, this friend of mine told me that *he* came [illegible] with the intention of visiting other schools, [illegible] all the time, clowning around, and that sort [illegible]. And that's just what he's doing today. But [illegible]? Naturally.

Wouldn't it be funny if all the students and profes- [illegible] (well, maybe not the professors, but at least the [illegible] instructors) opened the doors of Waterman one Friday [illegible] and let in all those wondrous dogs that forever [illegible] around the entrances. Maybe just to keep them off [illegible] streets. Anyway these dogs would all come charging, [illegible] prancing, dancing, bow-wowing, and woof-woof- [illegible] into the building. Into classrooms. Into the sanc- [illegible] of the ladies' lounge. Into the deans' offices. [illegible] to the mechanical engineering laboratory. Even into [illegible] philosophy department (if they can find it.) These [illegible] dogs would go hopping in and out of doors, [illegible] down the halls, leaping through windows, jump- [illegible] from telephone booths, creeping from out of the [illegible], and biting girls' legs. Gawd! It would be [illegible].

I see in the papers that there has recently been [illegible] of an Atlanta chain store. And it appears [illegible] the Ku Klux Klan is picketing the picketers.

I'm *glad* America hasn't lost her sense of humor.

Why there is a little dog walking around Waterman [illegible] right now. He is a very sad looking little white dog. [illegible] has three black paws and a cloven hoof. He is sad [illegible] because he can't be in Atlanta where it is sunny and [illegible] where he could picket a chain store that refused to [illegible] serve dogs. Or he could picket a zoo. Or the anti- [illegible] Section. This particular dog's name [illegible] Spot. Picket, Spot, picket.

I'm sad too. I'm sad because English perfessors will [illegible] for symbolism in this otherwise insane article. [illegible] sad because there ain't none. So prithee don't [illegible]. There is actually vurry little, this is just [illegible] nuttle. Yes, this is indeed a nuttle article. [illegible] history is pretty nuttle too. Have you ever [illegible] how it's taught? When you are vurry, vurry [illegible] you learn a few handy facts. Like George Washing- [illegible] cut down a cherry tree. Like the Dutch wear wooden [illegible]. Then, when you have matured a bit, you learn [illegible] these facts are handy, but not quite true. They [illegible] are lies. Violins weren't even invented when Rome [illegible] and Ben Franklin didn't discover electricity. [illegible] learn other facts instead. These are not as handy [illegible] are not true either. College is where you learn [illegible] these facts are lies too. These lies are driven [illegible] your mind and replaced with pure white truly cer- [illegible] truths. And only an occasional certified half- [illegible] but they are absolutely golden and unchangingly [illegible]. As long as you don't go to history graduate [illegible]. So don't.

It is time I stopped writing and it time you stopped [illegible]. It is time we all had a good rest.

Placement

On Tuesday, December 13, Mr. Edward Loeffler, will [illegible] the UVM campus to talk [illegible] with students interested [illegible] the position of Immigra- [illegible] Patrol Inspector in the [illegible] Patrol. Applications [illegible] take the examination for this position must be submitted by December 16. Starting salary is $5355 a year.

Individual and group appointments for interviews with Mr. Loeffler may be made through the Placement Service, 159 Waterman.

Letters

(continued from page four)

one of Cuba's bosses, excuse me, leaders, admire the Red Chinese commune system and will he ever try it out in democratic Cuba? And lastly, (but by no means the end), why is the Church at odds with the Government in this People Democratic Republic of Cuba?

Before closing, it seems to me that Mr. Kritzler has been misled in judging the situation; as also true with some of the uneducated Cuban Populace. These points he would like us to believe.

1. The U.S. government is ruled by business chiefs.
2. The U.S. engages in Colonialism, and exploits and suppresses the economics of other countries.
3. The U.S. has only materialistic aims.
4. The U.S. press is imperialistic, biased and loaded with lies to deceive the American people.

I think it is obvious that Mr. Kritzler, whether he knows it or not, is singing the leftist line. Although I do not propose to alter the heading of his article to "Cuba, Castro and Comarde Kritzler", as some people would like to do, but instead I'd rather hope he would re-examine his position most carefully, not only from the United States view point, but as well from the Latin American conception of this touchy and indeed, urgent problem.

Donald W. Burton
161 South Prospect St.

Go ROTC!

Dear Sirs

In reply to last week's letter, "GO ROTC!???", might I say that it would benefit those who express feelings such as Jerol Harrington's to reflect seriously upon their country's goals and ideals. It must certainly be a great tax on their minds and "able bodies" to spend a little effort at something so trivial as the military service. It soothe the mind to see these inspiring comments flow from such an eager pen!

As for the remark directed at the late Senator McCarthy, maybe Jerol should be reminded of the striking difference between "free thought" and the well known subversive drive of those who would destroy our way of life.

The lazy mind and the unwilling spirit are communism's greatest promoters.

Ginny Worstell, '61

Notices

Tonight at 7:30 P.M. the Young Republican Club will sponsor a pair of speakers. The topic will be PARI MUTUEL BETTING and will be primarily related to the State of Vermont. The speakers will be the Attorney General of Vermont Mr Thomas Debevoise - Mr Austin Noble After their talks, time should be available for any questions regarding the topic This is an open meeting and everyone is invited to attend. The time again is 7:30 P.M. and the place is the Student Lounge in lower Waterman...

The Student Nurses Association is holding a Card Party on Saturday, December 10, in the Waterman Coffee Shop from 2 to 5 PM. Cost is 50¢ per person. Members and friends invited.

Cuba, Castro, And Me

by EDWARD KRITZLER

The Cuban people fear an invasion. This is a real fear and the Cuban's have many good reasons to possess it. For this reason the Cuban people have formed volunteer militias all over the island as their primary means of defense. The number of people composing these militias has been estimated as being anywhere in a range from 200,000-500,000. Even the lesser figure constitutes a large percentage of Cuba's 6½ million people. These are Cuba's "Minute Men." It may seem strange to us that civilians carry guns and know how to use them, if necessary, to protect their newly won liberties. Each village has its own militia, and though it is on a voluntary basis, nearly the whole village turns out and participates, drilling twice a week. It is really a remarkable thing to see. There are regiments of men, women, and both men and women. The people have to buy their own uniforms, and for those who can't afford them, everyone chips in. The weapons and ammunition however are issued to each by the government. This is not to say the militias are directly tied to the government. That is not the case; each militia serves as the army of its village, and is practically sovereign in its own right. The fact that the government has armed the people is one reason one would have to doubt that Castro has any evil intentions. What leader (*especially in Latin America*) having any undesirable aims or wishing to set up an oppressive dictatorship, would furnish his populace with the arms with which to overthrow himself??? It just does not make any sense. If the Cuban people were dissatisfied, Fidel wouldn't continually issue them more arms, but his is exactly what he is doing. 1960: *AÑO DE LA REFORMA AGRARIA*.

Agarian reform is one of the primary goals of the Cuban revolution. A large percentage of Cuba's population is farmers. Prior to the revolution one would probably have preceeded the word farmers with two descriptive adjectives - poor and hungry. A very small minority of this large segment of Cuban society owned land. The rest earned their living working for the *Latifundistas* (owners of the large estates which held nearly all the land in Cuba). This unequal distribution of the land and the plight of the average farmer were major problems faced by the revolutionary government. Back in 1953 Fidel proposed a solution to this as one of the aims of the revolution:

> First it would establish . . . a maximum holding for each type of agricultural enterprise, acquiring the excess through expropriation, claiming the unsurped lands for the state, filling in mangrove and other swamplands, planting enormous areas and reserving zones for reforestation. Second, such a government would distribute the remaining land among the farming families with preference to the most numerous, it would encourage agricultural co-operatives for the common use of costly equipment, cold storage plants and a single professional technical direction in cultivation and breeding, and would facilitate, finally, distribution of resources, equipment, protection, and useful knowledge to the farmers.

NIRA, (the National Institute for Agarian Reform) is in charge of this land reform program. In acquiring the land for the co-operatives, and for distribution to individual owners, NIRA first took over all the uncultivated lands. It then confiscated the lands of the Batista followers. Finally, because of the revolutionary law limiting the amount of acreage a man may possess, depending upon what his land produces, most of the land acquired by NIRA was taken from the big land owners. Payment for this land is being made by issuing twenty year 4.5% government bonds. These payments are based on the value the owners themselves had placed on their property in paying their taxes. "Thus if you had cheated the government, you yourself got cheated in the end." This is one of the reasons our big companies are screaming.

> "In his first big cane field expropriation he (Castro) announced that he would pay United Fruit Company *only* (italics mine) $6,119,416 for its 266,400 acres or about $23 an acre," said a story in the New York *Herald Tribune* on April 20.

What the article failed to mention was that United Fruit Company was being paid $23 an acre for land it had acquired for 1/3 to 3 cents an acre. Sure the improvement of land raises its value considerably, but even so Fidel paid a fair price, for that's the amount

Tables Turned, Men Spinning

Brant Duffy crowned MERP King (Photo by Hazelton, SPS)

Academically speaking, the week of November 14-18 was rather routine and no different from any other week during the semester, but socially, things were undergoing a bit of a reversal. Undergraduate men shaved a little closer, dressed a little more neatly, and were a little more polite, while the phones in the Wems' dorms and fraternity houses were

HAVE ALWAYS HAD an abiding hatred for the bottom crust of rye bread. There is no particular reason for making this point, except that whenever I think of Fort Lauderdale, I think of rye bread. There is no particular reason for that either, but I have been thinking of Fort Lauderdale. Fort Lauderdale is "where the boys are." Right now that is. Most of the time, serenity reigns in Fort Lauderdale. (The Chamber of Commerce will hate me for this, say it never rains in Fort Lauderdale.) But, for two weeks, twenty thousand collegians descend on this peaceful community and take it apart, piece by piece. They call it Spring Vacation, but it's more like amateur night at Cape Canaveral. They capture Florida and throw the Keys away. But I shouldn't joke. Not while people are holding mass prayer meetings for an early hurricane season.

This is "where the boys are." And gosh, the girls, it makes you dizzy to look at them. If you look long enough, you reach an advanced stage of dizziness called aphrodizzier. It's like being in love. That's what happened to me, and it will happen to you, too. Everywhere you turn, beaches full of them, motels and hotels full of them, cars full of them, pools full of them, bathing suits full of them. Ah, bathing suits, when the man said, "It's the little things in life that count," he must have been thinking of bathing suits. But mostly, it's the girls. Girls in love, girls in trouble, bright girls with a future, not-so-bright girls with a past, rich girls in the lap of luxury, poor girls on any lap that'll have them, girls of every size and discretion. It isn't any wonder that this is "where the boys are." And the things that happen are wacky and wild and wicked and warm, wonderful "where the boys are." Someone should make a movie about it. Hey, someone did! M-G-M calls it "Where The Boys Are" starring Dolores Hart, George Hamilton, Yvette Mimieux, Jim Hutton, Barbara Nichols, Paula Prentiss, with Frank Gorshin and introducing popular recording star Connie Francis in her first screen role. You'll not want to see all the things that happen "Where The Boys Are."

Metro-Goldwyn-Mayer presents
"WHERE THE BOYS ARE"

affair were Jon Tenzer, Alice Zalkan, Carole Demas, the Jaberas, Sue Bichterman and Phil Judd.

Wednesday afternoon a cheering crowd was on hand at Southwick Field to witness the titanic struggle between the Powders and the Puffs. The field was a flurry of red and yellow as these two all girl football teams clashed. Touch football was played until the final two minutes when rougher tactics were allowed and pandemonium reigned. The Powders emerged from the fray with a 12-0 victory, and the only "injury" of the game was sustained by a member of the Puffs. Kappa Sigma brothers provided energetic cheerleading, and the referees were Brant Duffy, Dom Parlato, Jim Pine, Al Godfrey and Pete Lakis, the MERP king candidates.

On Thursday, votes for the MERP king were held in the Waterman building, each voter paying a penny for the privilege of expressing his or her choice. Friday night, at 10:30 during the Twin Dance held in the boys' gym, Brant Duffy was crowned MERP king by Marge Coleman, general chairman of the week, and presented with his votes which totaled $7.93. He was led to the stage by Caroline Thomas, president of Panhel, and Elaine Margolin, MERP week publicity chairman.

the sights of veritable mob scenes seconds after the first ring.

Responsible for these goings on was the first institution on the Vermont campus of a Mens' Economic Rehabilitation Program or MERP week. Since it was deemed a complete success, it is sure to be repeated in the future.

On Tuesday November 15, the first scheduled event of this Panhellenic Council sponsored program took place in the Waterman Coffee Shop. A large crowd of coeds and their invited escorts packed the Coffee Shop to view Skits and Singing MC'd by Linda Kyttle. Entertainers in the enjoyable

SOPH CORNER

Now that December is here, the members of the Class of '63 as well as several Freshmen are working enthusiastically toward the Barn Dance to be held on December 16. Penny Clark, chairman of the publicity committee has had flyers prepared and Jon Tenseth, who made UVM's Homecoming poster, in addition to last year's Kake Walk poster, has designed one for the dance. There will also be a banner made to hang between the trees on the Green.

Since the theme is a barn dance it should be more fun if everyone comes dressed in blue jeans or if the girls want to, they could come in square dance skirts. Get in the mood and dress for the occasion!

In the event that members of the class can't get [illegible] to the barn [illegible] buses which are [illegible] paid for by [illegible] Residence Hall [illegible] the Sophomore [illegible] buses will leave [illegible] man around 7:00 [illegible] the dance.

Once there, [illegible] the music of B[illegible] hand and be [illegible] the surprises [illegible] social committee [illegible] pared for anything [illegible] of fun.

The tickets will [illegible] in all living units [illegible] fraternities and [illegible] today and tomorrow [illegible] again in lower Waterman [illegible] Monday, Tuesday and Wednesday. The price [illegible] five cents, which [illegible] transportation, and refreshments.

Gerald Donavan Appointed To Agriculture Faculty

Dr. Gerald A. Donovan has joined the faculty of the College of Agriculture and Home Economics to do research in poultry and nutrition. He succeeds Robert Smith, who left to take a position at another institution.

Dr. Donovan will have the rank of associate professor of poultry husbandry. In addition to his research activities, he will also teach and give part time service to Agricultural Extension work. A native of Hartford, Conn., he received the bachelor's degree in chemistry and the master's in poultry nutrition and chemistry from the University of Connecticut, and the doctorate from Iowa State College. A Navy veteran of World War II, he received his UVM from the Agricultural Research Center of Pfizer and Co., where he was in charge of poultry nutrition research.

Filters for flavor
–finest flavor by far!

Tareyton has the taste–
Dual Filter does it!

HERE'S HOW THE DUAL FILTER DOES IT:

1. It combines a unique inner filter of ACTIVATED CHARCOAL definitely proved to make the taste of a cigarette mild and smooth

2. with a pure white outer filter. Together they select and balance the flavor elements in the smoke. Tareyton's flavor-balance gives you the best taste of the best tobaccos.

NEW DUAL FILTER Tareyton

Across the Campus

ACACIA

10th anniversary here we come. This fall starting our 10th year on campus, the boys are planning a big blowout. At the Christmas formal the festivities will be culminated with a lot of formal fraternal love. We hope to have many of the alums back, the more the merrier.

Last weekend six pledges were initiated into the ranks of the brothers. They were Val Barnes, '62, Dick Smith, '63, Tim Grant, '63, Tim Simpson, '63, Jim Donnahoe, '63 and Ed Mills, '63. Now the remaining pledges better watch it because new brothers are really b-b-b-better brothers.

The stationery business around the house is quite stationary. Rod Fisk seems to have a peculiar over abundance of this commodity in fact about $90.00 worth, all nicely imprinted with the Acacia crest upon it. Anybody want some nice cheap writing paper?

ALPHA CHI OMEGA

Our best wishes and congratulations to Bonnie Biggs and Jay Aylwood, who were recently engaged.

Our Province President, Mrs. Shaffer, visited us for four days and has given us lots of helpful ideas for the coming year. All in all, her stay was very much enjoyed.

Congratulations to Bonnie Burgess who was recently elected by SA to be next years chairman of Freshman Orientation Week. Also congratulations to Marty March who was recently elected to Alpha Lambda Delta.

If some of you were downtown last week you noticed a survey taking place on Alcoholism. Ellie Lissner and Marianne Monnier were among those students who participated in taking it. It was a very interesting topic they reported and it seemed to denote many fond remembrances to some of the students who were stopped.

ALPHA DELTA PI

Congratulations are in order for Carlie Otis on her initiation in Alpha Lambda Delta, Freshmen Women's Scholastic Honorary Society. Also to Barb Clayton and Jean Pillsbury who have been recent Pledges of the Week.

Thanks to arts and crafts and Kay Marino, the house has several additions, including some much needed ash trays very handsomely etched with ADPi. Happy smoking kids (we all know which brand, of course!)

Last Sunday we all enjoyed our buffet with the Alpha Delta Pi alumnae. It's always a great pleasure to see the alums around the house.

ALPHA EPSILON PHI

This past week the Alpha Omicrons were paid a visit by our National President, Mrs. Blanche Greenberger. Mrs. Connie Abraham, our National Vice-President and chapter adviser was also present. After dinner we all enjoyed our informal discussion and we greatly benefited from this exchange with our National officers.

Roxanne Bokar will never forget this year's cake sale. She sold a cake to Mr. Trowithick who gave it right back to her. His "generosity" will long be remembered.

Four AEPhis have been busily rehearsing for Where's Charley. Arline Zalun is already vocalizing for her part of Donna Lucia. Elaine Margolin, Phyllis Rabbit and Eve Solomon have been limbering up for their dancing roles in the show.

We are very proud of our champion debater, Betsy Lissman. She talked her way through many winning debates and brought distinction to UVM as well as AEPhi.

ALPHA EPSILON PI

All is in readiness for our big Winter Formal Weekend. Two bands have been hired for the occasion; the first of which will play at the dinner-dance Friday night at the Olde Board. Come Saturday evening the second combo will wail for the Apes and their dates at what should prove to be the wildest house party ever.

In an effort to bring AEPi's scholastic average from second to top position scholarship chairman, Howie Maltz, has divided the house into two opposing teams. Brother Artie Altholz has agreed to donate to that team pulling the highest average one slightly used Oldsmobile piston.

Last week, Tuesday, proved to be AEPi's night of triumph. The bowling team, headed up by Al Kleger, beat Sig Phi to chalk up a win for their first match of the season.

Congratulations to Bob Denner to his engagement to Arlene Seegman to North Bergen, N.J., and to Mickey Leavitt who became pinned to Sharon Cohen of New Hyde Park, N.Y.

DELTA DELTA DELTA

We are very proud of our pledge, Anne Larros, who was initiated into Alpha Lambda Delta. Earlier this year, Anne received the Howard Award, for having the highest average of any freshman woman in the College of Arts and Sciences. Congratulations, Anne!

Interesting artistic developments have been appearing recently on the far corner of our front lawn. We would like to ask all future painting parties to confine their original (and they are original) efforts to the rock only Thank you, Dewdrops and friends.

Last Thursday night, we met with the brothers of SAE for a most enjoyable exchange dinner. After dinner, we gathered at SAE for dessert and some highly interesting James Thurber readings delivered by Dr. Gregg. At that time, our favorite resident of 56 Summer St., John Wonseth, was presented with a special award from the Tri Deltas. Our thanks to the SAE's for a wonderful evening.

We would like to thank the Phi Delts for remembering us on our Founders Day with a beautiful bouquet of flowers a most thoughtful gesture.

KAPPA ALPHA THETA

Danny's wishbone broke for her and George presented her with a lovely diamond. George, a graduate of the University of Va., is now at Harvard Business and they will be married in June. Best wishes go to both from the whole house.

The mystery is solved at last! After summoning a fleet of fire engines to the house just before Thanksgiving because of the smell of smoke from an unknown source and then an inspection of the laundry and washer, it was discovered that the lint trap was the source of smoke. However, this still didn't reveal the reason for the peculiar smell, issuing from that same area. Last week the suspicions of some members of the house were confirmed as scant remains of a cremated mouse were found in a group of cells. We are wondering if he was related to the one running around on third floor.

Congratulations to Nancy Barber once again after doing an excellent job as chairman of the Lawrence Debate Tournament held the weekend before Thanksgiving. This is a big job and Nancy certainly handled it well from all reports.

There have been many ooh's and aah's as the pledge project progresses. A great deal of careful and skilled work has gone into the song book covers made of wood and varnished and we'll all be grateful to the girls when they are completed.

A fun time was had by all during and after the exchange dinner with Phi Sig last Tuesday. The girls were certainly impressed with the hospitality of Fern Hill.

KAPPA SIGMA

The Kappa Sigs got off towards another successful intramural season with victories in basketball and bowling. In basketball the victory was over Phi Sigma Delta. A first half scoring spurt by Mike Pesaro and Ted Jones provided the impetus. Pete Voytek and Gordy Miller were outstanding on defense.

In bowling Tim Luzietti and and Danny Rich were the stars while leading the Sigs to overwhelming victory against Delta Psi.

Pats on the back were extended Bob Stone and Jim Guyette for being named to the 1960 Vermont Collegiate All-Star team. Jim also considerable talent in front of the TV camera.

LAMBDA IOTA

First off, the Owls are proud of Norm Cox, mechanical engineer, who was just initiated into Tau Beta Pi, the National Engineering Honor Society.

We are also glad to see another old Owl, 2nd Lt., Norm Brochu alight at 440 Pearl after his stint with the Air Force.

It looks like a great Winter Formal coming up this weekend. We'll dance to the music of the "Stardusters". And Saturday will be the scene of one of those traditional incomparable Owl Beach Parties.

An air of gloom still pervades the Owl house since John Brush fractured his skull over Thanksgiving vacation.

Skiis are being obtained at a phenominal rate in the Owl House lately. Looks like a little SOCIAL skiing is on the docket.

Say, does anyone know who Jose III is going steady with for the 125th time since school started this year?????

GAMMA PHI BETA

The Gamma Phis all enjoyed our after-dinner get-together with the Kappa Sigs last week. Highlights of the evening were a little jazz piano, Erroll Garner style, and a couple of songs sung by Cha-cha Parlato.

Congratulations to Lee Cawley for the goood job she did in the recent UVM Swim Show which was held down at the Burlington YMCA.

We were very fortunate to have Mrs. Acken of Burlington as our guest last night. She gave a very interesting discussion and demonstration which kept everyone fascinated.

PHI DELTA THETA

The Phi's were kept busy during MERP Week. One young lady wasn't able to take advantage of Leap Year and found this to be her golden opportunity. Carol Tyler pinned Willie "Tubes" VanTassell. The Phi's wish them both best of luck.

Phi Delt was honored to host Patty Bishop on Patty Bishop Day last week. We wanted to thank Patty for her efforts on behalf of Phi Delt. Everyone enjoyed lobster and the serenade provided by Theta.

"Gutter Ball" Graff reports the Phi's now have a 0-8 record in our bowling league. He tells us that the team is spotting the others a few points to make the league more even. "Shotgun" Wilkenson lead the Phi's with 12 points in a close league opener against SAE.

The Brothers have initiated a new award for members of the house. It is to be awarded to the most outstanding Phi each month in recognition of his efforts to improve Phi Delt.

Our Xmas formal is in some stage of doubt but we ARE having it. We haven't yet decided on which weekend to have it. Plans have been made for elaborate decorations and we are looking forward to another success.

Bill Poborsky is the new cook at the Marble Palace this year. Bill has really put out excellent chow as the girls can testify. In addition he has saved us a lot of money in the kitchen. The Phi's really appreciate Bill and are looking forward to having him around a long time.

Last but not least the Phi's had a really successful Thanksgiving dance. We attracted many of the debators who were up here for the Vermont Tournament. In addition we were host to several of the IPC Presidents who were here for their conference. Everyone enjoyed themselves and felt this was the best weekend event so far.

PHI SIGMA DELTA

Final plans are being made for a great Winter Formal weekend. A dinner party will be held at Jeri's Restaurant. Jeri "Bone" will be remembered by many as one of our more illustrious cooks.

Everybody is looking forward to our annual Christmas Orphan's Party. "Skip" Platt is in charge of the toy collection and it was rumored that half of last year's toys could be found in Frankie Quint's room. Oh, yes, as it stands now Phil Schoolnik is an odds-on favorite to play Santa Claus. Congratulations to Richie "Bugs" Ader who was one of the high scorers in the Vermont-Norwich basketball game and to Bobby Agel who chipped in with two points. Congratulations also to Bill Likosky and Jim Seldon on their [illegible] in the recent debate tournaments. We are pleased to welcome Bob Bernard of Burlington who is the newest member of the house.

Contrary to popular opinion Melvin "da putty cat" has returned to Fern Hill, much to the utter dismay of all who know. The only two individuals not affected by all this excitement were Finster and Tubby [illegible] who just kept wandering about the third floor.

PI BETA PHI

Last Monday night November 28 was a big night at P. Phi. This was the night that the election of the new officers was held. We are happy to announce that Noel Hanley and Ag Esposito are the new president and vice-president, respectively. Diane Hadley was elected recording secretary, Connie Anderson treasurer, Mary Jo Brush assistant treasurer, Kay Gleason scholarship chairman, Jean Ginarelli pledge trainer, and Marty Russell assistant pledge trainer. The warmest congratulations are extended to these girls and we are looking forward to a great year under their leadership.

Congratulations to Anzie Maclean, '62, who was married to Hugh Sinclair, Delta Psi, '59, during the Thanksgiving vacation.

The annual Hernando's Hideaway dinner held November 20th turned out to be a big success. We want to thank Kappa Sigma so very much for all their help.

SIGMA ALPHA EPSILON

The exchange dinner with Tri Delt last week produced a few surprises. After dinner, the famous "Pan Award" was given to Jo "Weak Willie" Tonseth. Our guests for the evening were Mrs. Fifield, Housemother of Tri Delt, and Dr. and Mrs. Gregg. Dr. Gregg spoke after dinner on James Thurber.

Last week was also successful on the Intramural slate with a 23 pin victory over TEP in the bowling league while the basketball team won a 26-23 squeaker over Delt.

The Deacon has finally finished his house improvement project for the semester and Moon, Pansy, and Rover thank him, as do all the boys on the third floor.

Duano has been convinced of the merits of professional barber service.

SIGMA NU

The rambling wrecks from the "House that Ted Built" ran over Kappa Sig (21-0), and Chittenden Shacks (82-12) to notch their 28th consecutive victory, 5th undefeated season. The basketball team opened the season by allowing the string JV's to trip Phi Psi 28 to 25. Retiring coach George "Pigskin" Cain was honored recently at the Nu's, Mallett's Bay "A-Way". Also honored was "Golden Toe" Fine, the oscar-winning gridiron star of the past season.

Congratulations to the members of the pledge class, Neil Rockoff, Greg Pratt, Lou Sage.

Because of a mail parcel post delivery "Mobutu" Martel was [illegible] to have dropped out.

Society

[illegible] pre-holiday oc- "definitely" a [illegible].

[illegible] sources disyesterday that now- Felix "Skipper" [illegible] soon be donning a [illegible] Lincoln (OD) Green.

[illegible] AMERICA'!

[illegible] of John "Crash" [illegible] ssful reproduc- 'The Apartment" over [illegible] holiday, the [illegible] has been undergoing [illegible] room. It is rumored [illegible] will offer [illegible] Policy" Moore a late [illegible] ontract, and that [illegible] apartment neighbors have [illegible] a migration back [illegible] have fled to outlying

[illegible] Chateau is nearing [illegible], thanks to the [illegible] B. Williams, B. [illegible] Gurbitt, R. Mc- [illegible] Di Stefano, and S. [illegible] Among the outstanding [illegible] are a fieldstone [illegible] fireplace and a 20 ft.

[illegible] seen at Pop's-Razz.

THETA CHI

"These wedding bells are [illegible] up that old gang of [illegible]." Congratulations to [illegible] Frank Harrington who [illegible] up for the long hitch. [illegible] luck to both you and [illegible]. Frank. The five musket- [illegible] are wondering if you [illegible] found your mattress; we [illegible] it was misplaced shortly [illegible] you returned home the [illegible] the wedding, Nov., 26. [illegible] get pinned? eh? to [illegible], by which, and with [illegible].

[illegible] Ole TC won its first [illegible] ball game, we beat AEPi [illegible] a rough and ready game. [illegible] got some rebounds and [illegible] next time fellas.

[illegible] Chi and Hamilton [illegible] sponsored a Christmas [illegible] last Saturday at St. [illegible] orphanage. Carole [illegible] and Mike John did a [illegible] job as Mr. and Mrs. [illegible] Claus.

[illegible] Christmas formals [illegible] is held this weekend. [illegible] looking forward to a [illegible] weekend at Sunny

Hollow.
Hark! The herald angels sing,
Come on Bonnie and Ding.
When it's time for Mill to leave,
ADPi's will be bereaved.

God Rest ye merry merchants, may you make the yule-tide pay.
Remember Ced collects the bills and also pitches hay.

Angels we have heard on high, telling us to go out and BUY!
Joe's our leader and prohibitionist too, he stays sober and sho should you!

Parts of the above were stolen from Tom Lehrer without permission.

KRITZLER

(continued from page five)

the company had said their land was worth when they paid their taxes.

The expropriation process is now substantially complete, and there is not a single *latifundia* left on the island. In their place nearly 400 co-operatives have been established. The peasant farmer is not forced to join these co-operatives. If he does not wish to the co-op -- he is shot??? no he is still parcelled out a certain amount of land to own. "INRA delivered 1,230 individual land titles in the first year of its existence, and approved 6,050 others, currently being delivered to former tenants and squatters." The co-operative however, is the main element of the land reform.

A TYPICAL CO-OPERATIVE

I visited many co-ops but speaking of one may serve as a generalization for the rest. The first one I visited was located in Pinar del Rio, a province west of Havana. I visited it with two other American students, both of whom could speak Spanish fluently. What follows is part of a letter I wrote home describing this co-operative.

> It looked like a small modern housing development. Forty or fifty homes all set in a semi-circle around a beautiful park. All of these houses were relatively the same, with each having four or five rooms. As we walked around, the first people we came upon invited us into their home. As everywhere else, these people were so proud and greeted us with such enthusiasm that it is hard to believe Castro is in any way doing bad things. I'll just tell you what they told us and you can form your own opinion. They first told us how they had lived under Batista. Their home was a *bonto*, a little but with a palm thatched roof and a dirt floor, on a tobacco plantation. As there were no schools, the older children worked with their father on the plantation where their daily wage for a 10 hour day never rose above sixty cents. Very often the soldiers of the Batista government would come along, beat up men, rape their women, and take their food. Though this sounded very hard to believe, the father and son both showed us scars where they had been beaten with machetes.
>
> Under Fidel all this is no longer true. INRA put up these new prefabricated homes for less than $2000 each. Title to them was given to the people at once, and the cost for them will be paid out of the profits of the co-operative. A school, medical center, and a swimming pool have been built. The woman told us that before Fidel (everyone calls him that) they had to purchase all their needs at the plantation store. This store operated on a very substantial mark-up and charged high interest rates. They now have a co-op store which operates at a non-profit. Before the revolution, the land produced only tobacco; the land now also produces bananas, potatoes, corn and peanuts. The workers are paid a wage of $3.50 a day for a eight hour day, and if they work overtime they are paid accordingly. Also each December the profits of the co-operative are distributed among the workers.

Shown here is but a brief sketch of the land reform program. This program, though still in its infancy, has already paid huge dividends.

SOME RESULTS OF THE AGRARIAN REFORM

The rice crop this year is up 30%; next year all domestic rice needs will be satisfied (before this Cuba had to import nearly all her rice). Beans and corn, previously imported, are sufficient this year for all domestic food needs, though outside corn is still required for the expanded hog and poultry output. Potato output has been doubled. Cotton, henequen, and

AFROTC Airborne

Two Burlington students, seniors at the University of Vermont who the first to complete solo flights this year as part of the Flight Instruction Program for AFROTC senior cadets. Cadets Gordon H. Sellar Jr. and Marcus A. Lord have each received the traditional "Red Hat" given to each cadet upon completion of his first solo flight. The solo flight is the first in a series of accomplishments which culminates in the achievement of a private pilot's license.

Cadets enrolled in the Flight Instruction Program have been receiving flight instruction from civilian instructors at the Burlington Municipal Airport.

Zimmerman

(continued from page four)

traditional ignorance.

Wherein lies the difference between the schools in the North which have been economically segregated and those traditionally-segregated schools in the South. So the Southern segregationalists boycott a newly integrated school, and the Northerners ship their kids off to private schools. What's the difference? Within a framework of some pretty large generalizations (of this I stand guilty), I'm afraid there lies some truth.

Oh yes, one more case. There's always the real "liberal" who hangs a medal on himself because he has been so lag as to allow some member of a minority group to join his local organization. Now he can point to something concrete. But he prides himself on his careful conversation. I mean after he blows his horn for awhile, and after the cloak of pretense has been left unbuttoned, there's always that little hush-hush joke. It assures the original solidity of the group. Bias really slays me - for this character is the biggest bigot of all.

NO EASY SOLUTION

Race relations, to say the very least, are composed of a mass of complex situations. The problems can't be expressed in a simple one to one mathematical relationship. We can't say the Southern segregationist stands on no ground whatsoever. That isn't true, for a better states-right controversy is integrally bound up in this whole problem. But this Northern masquerader - he does stand on nothing, absolutely nothing at all. He succeeds, just like his Southern cousin, in undermining the basic tenants of human dignity.

Oral Interpertation Contest Announced

Attention! You have only eighty-three days left in which to mail your tapes. You say, "What tapes?" Of course, I am referring to the contest announced by Dr. Ralph A. Micken, Chairman of the Speech Department of Southern Illinois University. It is the 1960 National Inter-Collegiate Competition in the Oral Interpretation of Literature, a speech contest made possible by a sponsoring grant by WEBCOR, Inc., manufacturers of tape recorders and recording tape.

The contest is open to all college students who make a tape recording of Edna St. Vincent Millay's poem, "Renascence," in the unabridged form. But, please notice! All competitors *must* be approved and sponsored by the Chairman of the Speech Department. Not more than four recordings may be submitted by the University of Vermont.

The rules of the contest are simple. The selection must be taped at fast speed on a five-inch reel. "Although it is not a rule of the Contest, and will have no bearing on the Award, it is suggested that as a matter of courtesy (and for best results) WEBCOR tape recorders and recording tape be used." Tapes can be submitted any time before, but not later than March 1, 1960.

AWARD? Yes, there will be an award. Five hundred dollars will be presented to the reader submitting the best tape. Other readers who do well will be recognized in a national speech magazine.

For the edification of those who thus far have taken no speech courses, oral interpretation is the study of literature through the medium of a reader reading aloud in the presence of others.

Watch the CYNIC for further announcements. If additional information is desired, you may speak to your speech teacher or write to

Mr. Lou Sirois,
Contest Director,
Speech Department, Southern Illinois University,
Carbondale, Illinois.

Mademoiselle's Contest

Mademoiselle's Third College Publications contest is here again. They will be awarding prizes for the best articles written by an undergraduate, an alumnus, and a faculty member, and to the college periodicals in which each article appears.

The articles should be of nation wide interest, but may be of any length and on any subject. Only prose nonfiction published during the 1960-61 academic year is eligible. The contest closes June 30, 1961, and the winners will be announced by October 16, 1961.

"Entries (no more than three in each category) must be submitted by the editor of the publication and accompanied by the name and address of the editor and the name and address of the author of each article." Send your entries to

Publications Contest
College and Career Department,
Mademoiselle,
Street and Smith Publications,
575 Madison Avenue,
New York 22, N.Y.

The tobacco harvest was the biggest ever (523,368,892 for 1958-59 to $41,377,000 for 1959-60). Domestic demand for beef, 60% higher this year, has been met at the lowest consumer price in history.

Thus, even though food prices have been pushed down, and consumption of food is up 40% compared to the Batista era, the government has been able to save $60,000,000 on food imports. In another year or so the island should be self-sufficient in this regard.

I'm just wondering how these results of the land reform have helped to supposedly, plunge Cuba into economic chaos???????

From left to right Jerry Kolker, Dave Brandstein, and Miss [illegible], who are [illegible] studying in France

UVM REPRESENTED ON LEFT BANK

[illegible] December 30 [illegible] University of Vermont [illegible] Junior Year Abroad program of the [illegible] for American students [illegible] Aix-en-Provence, France. They are [illegible] the [illegible] which was started in the [illegible] and other [illegible] a part of the Rome [illegible] in Italy.

All three students are from New York. Mr. Kolker's parents are Mr. and Mrs. Murray M. [illegible] 95-01 111st Street, Forest Hills. The parents of Mr. Brandstein are Dr. and Mrs. [illegible] Brandstein, 100 Riverside Drive in New York City, and Mr. and Mrs. P. K. [illegible] 34 Morris Crescent, Yonkers are the parents of Miss [illegible].

The Institute is at the University of Aix-Marseille which was founded in 1409 and is now the second largest in France. Students follow intensive studies in the Institute's French Language and Literature program. The courses are given in English in the American curriculum, and the faculty includes professors from Oxford, Paris and the University of Aix-Marseille as well as from America.

By living in French homes in the charming eighteenth city of Aix noted for its fountains and elegant architecture and by participating in field trips and excursions in historically and artistically rich Provence these students are discovering another way of life in southern France.

They also have [illegible] many opportunities for [illegible] in Europe and [illegible] including Alpine [illegible] sports on the [illegible] year round swimming [illegible] site of Aix's ancient [illegible] thermal baths.

The program thus offers opportunity for [illegible] cultural enrichment and [illegible] intensive academic [illegible] which is designed to [illegible] award of college credits.

Phi Delta Kappa

An organizational meeting to initiate a Phi Delta Kappa chapter at the University of Vermont, was held Saturday [illegible] Waterman.

Phi Delta Kappa is a graduate educational honorary [illegible] for promotion of research, service and leadership [illegible] education."

At Saturday's meeting Kenneth Mosher, assistant Dean of Men, was elected president of the UVM club. Eight attended while another 15 or 20 have expressed interest in joining. A January meeting is planned at which time a representative from the national will be present.

Meetings for the UVM group are planned for [illegible] the state with headquarters for the group at Burlington.

SAVE - SAVE

Fred Schnaars, Business Representative for Philip Morris, Inc., would like to remind you that the cigarette Box and Package contest is now approximately at the half way point. Friday, December 16th is empty boxes and packages of Marlboro, Alpine, Philip Morris and Parliament should be turned in at the Student Association Council Room in Lower Waterman.

There the boxes and packages will be counted by Mr. Schnaars under the supervision of representatives of the IFC Council and the Panhellenic Council. All boxes and packages must be turned in by 3:00 P.M. The winners will be announced at 4:00 P.M.

What would YOU do as an engineer at Pratt & Whitney Aircraft?

Regardless of your specialty, you would work in a favorable engineering atmosphere.

Back in 1925, when Pratt & Whitney Aircraft was designing and developing the first of its family of history-making powerplants, an attitude was born—a recognition that *engineering excellence* was the key to success.

That attitude, that recognition of the prime importance of technical superiority is still predominant at P&WA today.

The field, of course, is broader now, the challenge greater. No longer are the company's requirements confined to graduates with degrees in mechanical and aeronautical engineering. Pratt & Whitney Aircraft today is concerned with the development of all forms of flight propulsion systems for the aerospace medium—air breathing, rocket, nuclear and other advanced types. Some are entirely new in concept. To carry out analytical, design, experimental or materials engineering assignments, men with degrees in mechanical, aeronautical, electrical, chemical and nuclear engineering are needed, along with those holding degrees in physics, chemistry and metallurgy.

Specifically, what would *you* do?—*your own engineering talent* provides the best answer. And Pratt & Whitney Aircraft provides the atmosphere in which that talent can flourish.

Development testing of liquid hydrogen-fueled rockets is carried out in specially built test stands like this at Pratt & Whitney Aircraft's Florida Research and Development Center. Every phase of an experimental engine test may be controlled by engineers from a remote blockhouse (inset), with closed-circuit television providing a means for visual observation.

At P&WA's Connecticut Aircraft Nuclear Engine Laboratory (CANEL) many technical talents are focused on the development of nuclear propulsion systems for future air and space vehicles. With this live mock-up of a reactor, nuclear scientists and engineers can determine critical mass, material reactivity coefficients, control effectiveness and other reactor parameters.

Representative of electronic aids functioning for P&WA engineers is this on-site data recording center which can provide automatically recorded and computed data simultaneously with the testing of an engine. This equipment is capable of recording 1,200 different values per second.

Studies of solar energy collection and liquid and vapor power cycles typify P&WA's research in advanced space auxiliary power systems. Analytical and Experimental Engineers work together in such programs to establish and test basic concepts.

World's foremost designer and builder of flight propulsion systems

Donald Steele, '63

FROSH FROLICS

by Wayne Mirsky

BASKETBALL SEASON OPENS

While the Varsity was suffering its first defeat of the season at the hands of Norwich, the Frosh Five displayed a fine offense and rugged defense to up-end the Norwich frosh. Four out of the five starters scored in double figures and every member of the team saw action. High scorer of the game went to Johnny Babcock with twelve, followed by Dave Strassburg and Bill Rundle with 11 and Chuck Glick with 10. Hobby Nurse and Dick Lawson each chipped in with 6, while Jimmy Sunkin helped the winning way with 4. Coach Lapointe used his starters sparingly in an attempt not to run up the score. The frosh displayed tremendous drive and a unique desire to win, although they were smaller than the Norwich team. In the future, the greater part of my column will deal with the Freshman Basketball team. Each week, I will give a short biography of one or two of the ball players so you'll be familiar with them. This week, it is only fitting and proper to start with the high scorer of the first game, Johnny Babcock.

John starred at McBurney High School in New York City, where he made the All Private School first team. He averaged about 20 points a game and led his team in assists for two years. It is interesting to note, that Johnny came up to UVM on a baseball scholarship and is supposed to be quite a hot prospect according to reliable sources. He is an excellent offensive ball player, blessed with a deadly jump shot and a good pair of hands. On offense, he plays the point position, where he sets up every play and is also the team leader. There is definitely a rosy future for Johnny Babcock, both in basketball and baseball here at UVM.

FROSH SKIERS GETTING READY

With the weatherman predicting snow in the near future, some of the hopful candidates for the Freshman Ski team have been diligently working out at Stowe, Vermont. Included in these are Larry Kraemer, Larry Solomon, Howie Jacobs, Neil Yeston, Steve Ratner, and Willie McClung.

Kraemer is the only jumper among the sixsome. In fact, last year he was all set to go to Squaw Valley for the Olympic trials, when he broke his elbow water-skiing in Florida. Kraemer is the only person credited with falling off the ski tow on his way up and not getting hurt. This is when Larry decided to become a ski jumper.

Solomon on the other hand, is a bright hopeful in the slalom events. He broke all existing records in his home state of Mississippi and is here on a scholarship. Larry has powerful legs which enable him to turn corners at impossible ninety degree angles.

Ratner, Yeston and Jacobs are new-comers to the sport of skiing but all of them have made enormous progress these past two months. Each boy has given up girls and dates and spent all of his leisure time improving his skiing.

There are so many things I can say about the skiing of Willie McClung, but I don't have enough time or space to do it. So, I won't be prejudiced, and I won't mention any of them

INGMAR BERGMAN'S THE MAGICIAN

Cadets Beat Cats In Opener 85-76; Hoopsters Travel To Maine For 2

Face Bears Fri., Sat. UNH Next Wednesday

by JOEL KAPLAN

After sustaining an opening season loss to an inexperienced but talented five, the Catamounts open their Yankee schedule with a two day trip to the lair of the Black Bears of Maine.

The Cats will be favored underdogs against a Maine quintet, which is a perennial to be Yankee Conference champions for the second time in fifteen years. With their entire starting five returning, the Bears will have a great edge in experience over the sophomore-studded Catamount Five. Playing on their own court will also be an advantage to the Bears, who are always a rough team to beat at home.

The Cats will be going into this game under no pressure and could very easily pull one of the biggest upsets of the Yankee Conference season.

Things will look somewhat brighter next Wednesday night when the Cats will face UNH at Durham. Both UNH and UVM have young squads and the Cats should be able to ring up a Yankee win. This is one of the few games where Vermont won't have had great a height disadvantage, and the sharp shooting sophomores should be able to pull it out.

The Cats' first home game will be next Thursday against the University of Connecticut.

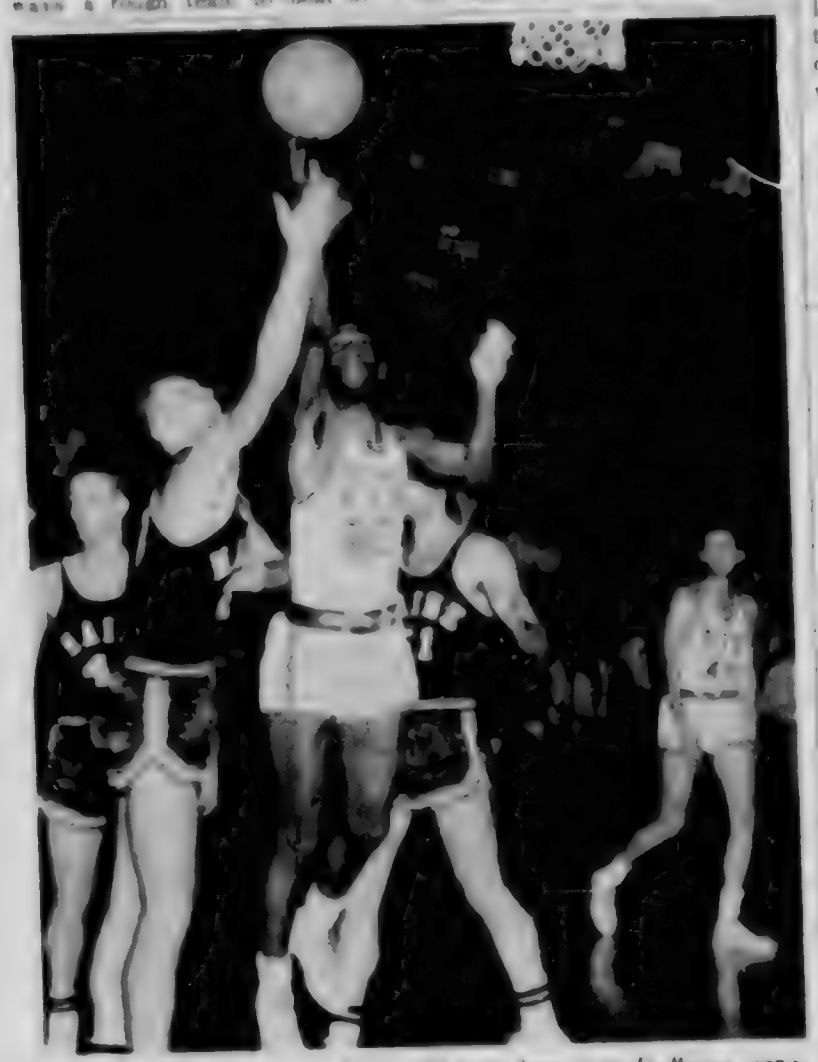
Loss Is First Of Season; 3 Sophs And Zingg Star

by FRANK HOLDEN

"We couldn't buy a basket, and they couldn't miss." These are the words that Catamount Captain Harry Zingg used to describe our loss of the season's opener to Norwich last Thursday night. The inspired Cadets of Northfield were red-hot. Cadets Francis Kasheta, Bob Potuin, and Don Sweeny, with a dazzling display of accurate shooting, combined their scores for a total of 63 points. Kasheta was top scorer with 23.

UVM started slowly and trailed throughout the game. We didn't score our first field goal until 5:37 of the first half. During this time, Norwich completely dominated both boards, and their quintet of sharpshooters chalked up an 18 point lead, which the Cats never erased.

It was a new Vermont team that took the court in the second half. They began to fight like cornered Catamounts. Taking no credit from the Cadets, who played well both halves, if the Cats had played the first half like the second, the final score would have been a different story.



Norwich used a 2-1-2 zone, which forced Vermont to shoot from the outside. At this point, the Green and Gold put on a really great exhibition of basketball, as basketball should be played. A trio of sophomores, Jack Shabel, Ben Becton (roommate) and Ritchie Ader teamed togethe to wreck the Cadets' zone. Ader and Shabel put on a display of shooting that equalled that of Kasheta and Potuin in the first half. Becton cleared both boards and Vermont fought desperately to close the 18-point gap.

Midway through the half, in an attempt to stop the Cats, Norwich went into a 3-1-1 zone, but even with three men chasing them, Shabel and Ader continued to hit. When they left the game, with four minutes remaining, the two backcourt men had hit a total of 13 field goals in the second half.

Vermont used a man-to-man defense most of the game. With two minutes left to [illegible] "Fuzzy" Evans had [illegible] use a full court press in an attempt to reduce the [illegible] gin of 9 points. The [illegible] was Norwich 85, Vermont 7[illegible]

Four Cats hit double [illegible] Shabel was high with 17 [illegible] and Ader was second, [illegible] Captain Zingg and Forward [illegible] Becton followed with 14 and [illegible] points respectively. Ray [illegible] totaled 9 points, and Center [illegible] Beck was held to only [illegible] points. Beck did a va[illegible] of rebounding.

For the benefit of those pessimistic fans who still remember the past football season, the basketball team hit 53 points [illegible] second half. If they can continue to score like this, they will average high in the double figures. Keep your chin up, your fingers crossed, and be prepared to turn out to cheer for your team at the home opener against UConn, Thursday night, December 15. Let's all do Friday night's homework Wednesday night. Okay?

Letters To The Sports Editor

Dear "Stan",

I read with great interest your sports column in last week's CYNIC, in which you explained why it was impractical for the basketball court behind Wills Hall to be flooded this winter for use as a skating rink by UVM students. I have a suggestion which, though radical, might help the situation.

There are about 600 Freshmen and upperclassmen living in the three men's dorms in that row. Some of them must be skaters, and some of the skaters must know how to handle that useful, though outdated, tool known throughout the North as the "snow shovel". I suggest that if one or two "shovels" were placed in Wills Hall and made available to those with the necessary interest and skill, the basketball court could be "shoveled" clean in a remarkably short time and at no cost to the University by those who wished to use it.

I am aware that some provisions would have to be made so that non-Vermont Freshmen (and upperclassmen) who do not realize the value of the "snow shovel" to humanity will not be tempted to remove it from its place of habitation unlawfully, or alter its shape in a manner which would decrease its efficiency in performing the task for which it was designed. This is an arrangement that could easily be worked out. Perhaps some Wills Hall skater could be appointed Keeper of the Shovel, and could loan it out to interested and worthy members of the student body who wish to expend some of their [illegible] energy in "clearing the [illegible]

This plan will probably be greeted with groans and [illegible] by those students not [illegible] quainted with the [illegible] "snow shoveling", and [illegible] more severe criticism [illegible] those acquainted with [illegible] above-mentioned joys. Nevertheless, this plan might [illegible] it possible for interested and willing students to [illegible] a skating rink. And even [illegible] hard-hearted University [illegible] ficials would find it [illegible]

Meet The Catamounts

By Steve Sohn

PETER E. NELSON "PETE"

Pete Nelson is a senior from West Newton, Massachusetts, and one of our hard running halfbacks who will be missed next Fall. While attending Newton High, Pete won letters for his gridiron skills and his ability at track. He was the Massachusetts state champ in running the 440, and was also an apt student. At UVM, Pete is a zoology major in the College of Arts and Sciences, and he is a member of Delta Psi fraternity. Pete was named to the Varsity Club, and is an honor scholar, shown by his being president of the Phi Eta Kap honor society. This is Pete's third season with the Catamounts as a halfback. If one thinks that football and athletics don't pay, Pete Nelson is testimony that a person can play varsity football and also score on the scholastic side of college life.

THOMAS F. ELDRIDGE "CHIEF"

Tom is a junior from Rouses Point, N.Y. While at Rouses Point, he attended Champlain Central High where he won letters in soccer, baseball, and basketball. Tom was an honor student and valedictorian of his class. Tom was also given the American Legion Award and the Lumbe science award. At UVM Tom is an English major in the College of Arts and Sciences, and is a brother of Kappa Sigma fraternity. He plans a career in the Marine Corps, and is an outdoorsman. He likes to go out with a good rifle and go hunting in the woods. Besides hunting, Tom is a fair hand at the guitar. He made a good showing with the '60 Cats, playing end.

TIMOTHY R. LUZIETTI "TIM"

Tim is a junior from New Britain, Connecticut, where he attended New Britain High School. While he was in high school, Tim played football. After transferring to Vermont Academy, He kept up his athletic skills, and won letters in three sports: football, baseball, and basketball. While captain of the V.A. gridders, Tim won the Edward Kimball Football Award. At UVM Tim is an Economics major in the college of Arts and Sciences, and a member of Kappa Sigma fraternity. He was a guard on the '60 Catamounts.

It's a toss-up.

VOL. 7[illegible] NO. 22

Two Lane Series Presentations Immediately After Christmas

The Belafonte Folk Singers, Blue Series attractions, will appear January 5 in the Auditorium.

By PAT CONWAY

In 1957, when a chorus of twelve men joined to provide the background harmony for the singing of Harry Belafonte, no one realized the impact they would have or that today they would be famous in their own right as the Belafonte Folk Singers. This group, to be heard on January 5 as part of the Blue Series, has now added two singers, including a guitarists and has incorporated two additional musicians who provide further accompaniment.

Throughout their short existence, the Singers have made an impressive series of appearances. They have performed in places like the Village Gate in Greenwich Village as well as the Empire Room of the Waldorf-Astoria in New York. At each they were enthusiastically received. During this time, the Singers also cut two records for R.C.A. Victor: "Presenting the Belafonte Folk Singers" and "Cheers."

An interesting facet of the group is the technique used for their appearances. While most choral groups merely stand in one set formation throughout their performances, the Singers employ colorful costuming and unusual lighting effects, as well as motions to dramatize their songs. This new approach to the deliverance of folk tunes makes the Belafonte Singers a unique chorus.

But, with all the "extras" one shouldn't forget the actual singing ability and style of the group. Under the direction of Robert de Cormier, who is well-known as an arranger, they have been called "the most exciting, overwhelming, stimulating, interesting, thrilling, heart-stirring choral group (I've) seen and heard in years," by Cue magazine. This is quite a tribute to sixty-five cities in the United States and Canada. The program which the Lane Series will present is part of that tour. There are four divisions entitled "American the World." The first part includes "Ox Driver Song," "Red Rosy Bush," "We'll Have Another Drink," "Drill Ye Tarriors, Drill," and "Mule Skinner Blues." The next is a selection of songs of the American Negro, while the third group is a number of Norwegian and Slavak folk songs. In the final portion of the program the Singers go on a trip around the world with songs like "Jamaican Ye," "El Caballo Blanco," "Les Raffineos," "Cock Robin," "Kalenka," "Didn't It Rain," and an English marching song version of "Old King Cole." This greatly varied collection of folk tunes certainly has something to offer every listener who comes to the Lane Series to hear the Belafonte Folk Singers.

"The human race in its poverty, has unquestionably one really effective weapon laughter. Power, money, persuasion, supplication, persecution, these can lift at a collosal humbug — push it a little, weaken it a little century by century, but only laughter can blow it to rags and atoms at a blast. Against the assault of laughter nothing can stand." In this quotation from "The Mysterious Stranger," Mark Twain set down one of his most important basic tenets. It was in this idea that Mark Twain showed himself to be s great humanitarian. This grand half legendary folk-hero who came with Haley's Comet and then departed with it when it blazed again was more than a great humorist. To the end of his life he fought, sometimes with savage satire, sometimes with gentle whimsey, for individual justice and enlightenment.

After Hal Holbrook, whose performance in "Mark Twain Tonight" has been acclaimed the world over, returns to America from a triumphant tour of leading European capitals in his re creation of America's greatest humorist, he will be seen at Memorial Auditorium on Wednesday, January 11 as George Bishop Lane Red Series presentation

This one man show promises to be one which will not be easily matched. Holbrook has spent years perfecting his performance of Mark Twain. He has visited friends of the author, studied photographs of him in his seventies, made every effort to keep his impersonation as accurate as possible. Every word that he speaks on stage is Twain's. Every gesture is genuine, according to the best recollections of people who knew the celebrated humorist or attended one of his lectures.

Hal Holbrook's sole show was conceived in 1953. From that year until 1959, Mr. Holbrook performed his impersonations on TV, in small theatres and in nightclubs around the country. On April 6, 1959, "Mark Twain Tonight" opened at the 41st Street Theater in New York City and was accorded a critical ovation such as few attractions have received in the history of the American Theater.

The one-man show played for 22 weeks in New York, selling out at every performance. Prior commitments forced Holbrook to curtail the engagement. He has since played a two-week engagement in Saudi Arabia. He was the first American actor ever to appear in a solo performance at the Edinborough Festival. Everywhere Halbrook has appeared he has received rave notices. Record albums of excerpts for the show are selling in great numbers, and his book, "Mark Twain Tonight! — An Actors Portrait", has become a best seller.

Hal Holbrook was born in Cleveland, Ohio on February 17, 1925. He studied for the stage at Denison University and made his first professional theatrical appearance at the Cain Park Theater in Cleveland, July 1942 in "The Man Who Came to Dinner".

Donald Malcolm, reviewer for "New Yorker Magazine", said of Holbrook, "Hal Holbrook's uncanny resurrection of Mark Twain extracts the utmost possible amusement from his Material." Atkinson of the New York Times said, "Mr. Holbrook's material is uproarious, his ability to hold an audience by acting is brilliant. Elliot Norton of the Boston Record wrote" there is nothing like it on stage today."

Hal Holbrook (left), age 34 and (right) as Mark Twain, age 70. He will appear in "Mark Twain Tonight" January 11 in Red Series.

Music Recital This Sunday

Jane Butler

The VW Department of Music will present its annual Christmas Choir Concert by the University Choir, Sunday, December 18 at 4:00 p.m. in Ira Allen Chapel. Personnel include: Professor of Music, Dr. Frank W. [illegible], Conductor; Assistant Professor Mr. Francis H. [illegible], Associate Conductor and Organist, David Kinsey [illegible], Roy Kelley, Student Director; Linda Langworthy, Student Organist; Jean Cherubin, Librarian. Soloists are: Soprano, Kay King, Patricia [illegible] and Alice Zalon; Alto, Jeanine Cloutier; Tenor, [illegible] Villemaire, Baritone, Roy Kelley.

To set the Christmas spirit the hour carillon and organ recital will precede the concert. Professor Weinrich will play the carillon followed by Linda Langworthy at the organ. "The Christmas Story Oratorio" by Heinrich Schultz, will comprise part one of the program. For the introduction the choir will sing "Break Forth O Beauteous Heav'nly Light" and the traditional processional, "O Come All Ye Faithful."

Included in the nineteen separate numbers will be sung by the whole choir, duets, trios, soloists, and the full chorus. Members of alto section are, Joan Chicoine, Jeanine Cloutier, and Barbara [illegible]. Members of the tenor section are, James Beams, Robert [illegible], and Jay Sheperd. Part one will conclude with "The Birth of Our Lord and Savior, Jesus Christ," sung by the choir.

During the second portion the choir will sing mostly contemporary carols. The first selection will be "Fanfare for Christmas," followed by "Be Still O Heav'n," conducted by Roy Kelley; "Chrubin Song" and "Lo, How a Rose E'er Blooming." Linda Langworthy, organist, will play, "Joy of Men's Desiring." Jeanine Cloutier will sing "I Wonder as I Wander." followed by "Alleluia". To close the program the choir will sing, "The Lord Bless You and keep You."

Following the concert the University Music Club is sponsoring the Round Hearth Dinner in the cafeteria at the Waterman Building...

NOTICES

ANYONE INTERESTED IN OBTAINING THE CONTRACT FOR LIGHTING DURING THE ENTIRE WAVE WALK WEEKEND PLEASE CONTACT JOE LEVIN AT UN-4A329, FOR FURTHER INFORMATION.

This will be the last issue of the CYNIC before the Christmas vacation. The next issue will appear on Thursday, January 12, 1961. Articles for that issue will be due Friday, Jan. 6. The issue following that will not appear until Thursday, February 9. Articles for that issue will be due Friday, Feb. 3.

Music Club Sponsors Dinner

At the monthly meeting of the UVM Music Club held last Thursday at the Music Building, members voted to sponsor a 'Round Hearth' Banquet as the club's Christmas project.

The pre-holiday event will take place on December 18th at 6 o'clock at the Waterman Cafeteria, directly after the Christmas Chorus Concert which occurs in the Ira Allen Chapel at 4. Club member Barbara Rifkin is General Manager of the project, and will be assisted by Publicity Chairman, Jackie Prouty.

Tickets for the 'Round Hearth' Banquet are one dollar each, may be purchased from Music Club members in lower Waterman Building or at Bailey's, Carbee's, and Auchter's Music Stores in downtown Burlington.

Fleming Features Victorian Display

On December 11th the Fleming Museum opened a new display entitled "Dressing for the Ball Costumes and Things from Victoria to Edward."

Exciting ladies clothes and elegant accessories can be seen dating from the times of Queen Victoria in 1838 to the reign of her son Edward in 1911. A festive spirit permeates the room as the viewer moves from case to case eyeing jewelry, opera glasses, hand painted mother-of-pearl evening fans, and many other items of interest. No ball is complete without refreshments as Mrs. Margit Molzinger, museum curator, knew when she set up this display with authentic Hobnail glass decanters, a china tea set, and pieces of silver. Also included in the showing are a few pieces of Victorian Furniture and a Toulouse Latrec poster. The poster, although of a later date, illustrates similar costuming to that worn in the times of Victoria and Edward.

On December 29th between 4 and 8 p.m. there will be a Tea Dance in the Marble Court of the Fleming Museum. It will be open to the public

Casadesus Excels In Schumann; Chopin Weak

By Dan S. Kerr

The fourth event of this season's Lane Red Series was the recital in Memorial Auditorium on Tuesday, December 6, by the distinguished French pianist, Robert Casadesus. Those people who are especially fond of Chopin found the first two-thirds of the evening delightful. I am sure, however, there were those of us, including this reviewer, who had difficulty keeping awake. The performer, however, was as much to blame as the composer. Casadesus is a fine pianist, but Chopin is definitely not his forte. The four Ballades, the Polonaise, Op. 26, #2, the Barcarolle, Op. 60, and the Third Scherzo were well-done as a whole, but many of the ornamental passages exhibited a glaring lack of technical polish here. I am the last person to say that technique is all-important -- indeed, what the music world needs more than anything else at this point is less technicians and a few more good musicians -- but Chopin needs a display of technical prowess, after all, the music is so inferior that one must have something to make it interesting. And one could not help feeling that an artist of the stature of Casadesus could have hit a few more right notes if he had wanted to. The performer seemed to use the damper-pedal more than was necessary, and he used too heavy a left hand; although this may have been the fault of the instrument as much as it was his.

The performance of the Schumann *Carneval*, however, was another thing altogether. I will grant that Schumann may be likened to Chopin in some respects, but there was more real music in one section of the *Carneval* than there was in all of the Chopin pieces. Casadesus was by far more at home here, too, for he exploited the text to the full, with a "Frenchy" touch which made it most delightful. *Carneval* is one of the most successful pieces of its kind to come out of that period. Casadesus is without peer in his performance of it, and the recital was worth hearing for this piece alone; indeed, for the reviewer at least, it was the one redeeming feature of the evening.

Rowell Speaks To SA Council

by Steve Cohn

Mr Lyman S Rowell, Dean of Administration at the University of Vermont, recently spoke to the Student Association concerning its role in the student community. Dean Rowell began by outlining the functions of each organ of the university, and closed with a specific examination of the Student Association's place in school affairs.

D Rowell stated that the first function of the SA is to represent the views of the students. Its second function is that of student advisor to the president. The Dean indicated that the present Student Association revision will aid these functions by assuring that the Council's representation correctly expresses the views of the students, and by strengthening the lines of communication between the organization and the President. With these functions bolstered by revision, the SA will be better able to carry out its duties.

These duties, according to the Dean, are the following:

1. Provide a framework under which all students may participate in student activities.

2. Help protect the rights and needs of all groups and individuals.

3. Help other organizations to establish themselves. A main duty of the SA in this case is the examination and approval of all constitutions under which these organizations function.

4. The regulation and approval of finances required by other student organizations.

5. The establishment and support of a student judicial body, presently the student court.

Any matters not included under these points are outside direct Student Association jurisdiction, stated the Dean. He added that these matters should be taken to the University officials governing them, for only there can anything positive be accomplished. In closing, Dean Rowell indicated that the University would welcome any such constructive ideas put forth by the SA.

Language In Stereo

The language lab in room 217 Waterman is an invaluable help to the students of UVM who are taking a foreign language. Here, with the help of modern stereo tape recorders, students can improve their pronunciation, diction and comprehension in the language that they are studying.

The system in our language lab is an extremely ingenious one. On a master table there are four recorders, each hooked up to a series of booths. In each of these booths there is a recorder, a microphone, a set of earphones and four outlets. The instructors of the courses give prepared tapes to the student-in-charge who then sets up one of the master machines with a particular tape. When a student desires to use a tape, he is told by the student-in-charge which master machine has this tape and which outlet number should be plugged in. Once the recorder in the booth is plugged in, it contacts with the corresponding master machine and the student may hear the master through the earphones.

There are several types of tapes used in the language lab: first, there are the tapes on which the instructor says a series of passages and which are then repeated by the student on his own tape; second, there are dictation tapes on which the instructor reads a passage and the stu-

Dr.Raab and Son Honored

USSR Publishes Work

The works of a [illegible] of Vermont father-son combination have received [illegible] notice in medical and educational circles of the Soviet Union.

The father - Dr. [illegible] Raab - has contributed an article to an anniversary volume in honor of Russia's leading cardiologist while some information gathered by Dr. Raab enabled his son Fredrik, a junior, to write an essay on the founder of Moscow university. That essay has been incorporated and catalogued in the library of Moscow University. Several months ago, Dr. Raab, director of the cardiovascular research unit at DeGoesbriand Memorial, was invited, along with six other American cardiologists including Dr. Paul D. White, to contribute an article on Alexander [illegible] Myasnikov, Russia's leading cardiologist. The Academy of Medical Sciences of the Soviet Union requested the article.

Since Dr. Raab's last visit to the USSR in 1958, three of his articles on heart disease have been published in Russian medical journals. One of the monographs was translated into the Russian language while a story on Myasnikov which was translated from Russian to English by Dr. Raab, recently appeared in an American professional journal. Last year, Dr. Raab requested some biographical literature on Mikhail Vasilyevitch Lomonossov, 18th century scientist, poet, statesman and founder of Moscow's Lomonossov University. From this material, Fredrik, a chemistry major, wrote an essay on Lomonossov's life and achievements and was notified that the material had been included in the Moscow University library.

OPEN SEASON BEGINS ON KAKE WALK POSTERS

The rules for the Poster Contest of the Sixty-Fourth Annual Kake Walk are as follows:

Posters are to conform to the measurements of 14 inches wide and 22 inches long. They are to consist of no more than three colors, and in this case black and white are considered colors. They must be original and be constructed so as to leave adequate space for pertinent information such as where Kake Walk is held and at what time.

Posters must contain the words "64th (either written or in numerals) Kake Walk, University of Vermont."

Posters will not be accepted with personal or fraternity names or initials anywhere on the poster. The name and address of the artist should be attached on a separate piece of paper.

The poster contest is open to individuals representing fraternities or sororities as well as all members of the University. An individual may submit as many entries as desired. The posters will be judged as their artistic merit and ingenuity.

All entries are to be wrapped and submitted to the Kake Walk Office in Waterman Building, *and slid under the door. The deadline for submitting posters is January 27, 1961 at 1 p.m. No posters will be accepted after that time.*

Outing Club

WRUV DJ's Do 43 Hour Radio - Telethon For C.P.

Bob Howard and Ray Bentley, two of WRUV's DJ's, will do a 43 hour Radio - Telethon for Cerebral Palsy this weekend. From 1 P.M. Saturday, Dec. 17, to 8 A.M. Monday, Dec. 19 Howard and Bentley will be on WRUV - 570 K.C. - to raise money for Cerebral Palsy. Your support can be given to them by listening to them and giving money in any amount. Donations can be made by telephoning WRUV - Ext. 369. Listen to WRUV for details.

"Where's Charley" Again Tonight
Choice Tickets Still Available

by Pam Middleton

The UVM Players reached a ... of performance which ... patrons have presentation of "Where's Charley" last Saturday evening. Although the cast ... and ... as the performance progressed, the show was put on a par with productions of the past.

The first spark of the old Players' spirit was kindled by Dave Hall as Charley when he was forced by circumstances and his roommate played by Roy Kelley, to impersonate his aunt from Brazil. Dave filled Ray Bolger's shoes admirably except when he tried to tap dance in them.

His ability as a comedian was equalled by Ralf Bode who played Mr. Spettigue the gold digging suitor of Charley's aunt. The combination of the two in several scenes resulted in hilarious comedy. Both showed remarkable talent at sustaining humor throughout the lengthy pantomime. They managed to execute slapstick comedy with nearly professional skill.

The humor of the show far surpassed the musical elements. Joan Hirschland as Amy, reached the height of her performance in a musical sketch with her male lead, Dave Hall. She combined her talents as a singer, dancer, comedienne and smart girl in this scene, which ended with her kicking of a ballet slipper when it came untied.

The talents of Miss Carol Schelper, UVM's new dance instructor, were evidenced throughout the performance. Miss Schelper did the choreography which was executed by a chorus of dancers and the major vocalists in the show. Carole Demas as Kitty, Roy Kelley as Jack, Alice Zalon as the real aunt, and Phil Judd as Jack's father.

The costume crew also deserves special commendation. Some superior effort was shown in the ladies' dressing room scene, although the members of the chorus contributed greatly to the latent potentiality of that underwear. Diana Jordan's shoulders were of special interest to the occupants of my corner of the Arena.

The low spots in this production may be attributed to the choice of plays. As Greg Falls pointed out, the play was first performed in 1892. The demands of audiences have been greatly revised since that date. This may account for the dull glow that emanated from UVM's usually scintillating theatrical talent last Saturday evening.

SCENES FROM MUSICAL

Roy Kelley and Carole Demas in "Where's Charley?"

Dave Hall is well disguised in the Player's musical production.

Ralf Bode makes a distinguished Mr. Pettigue in the play.

WHERE'S CHARLEY?

ARENA THEATRE

NOTE CHANGE FROM DATES LISTED IN DATEBOOK.

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

DECK THE HALLS

The time has come to make out our Christmas shopping lists, for Christmas will be upon us quicker than you can say Jack Robinson. (Have you ever wondered, incidentally, about the origin of this interesting phrase "Quicker than you can say Jack Robinson"? Well sir, the original phrase was French—*Plus vite que de dire Jacques Robespierre.*" Jack Robinson is, as everyone knows, an anglicization of Jacques Robespierre who was, as everyone knows, the famous figure from the French Revolution who, as everyone knows, got murdered in his bath by Danton, Murat, Caligula, and Aaron Burr.

The reason people started saying "Quicker than you can say Jacques Robespierre (or Jack Robinson as he is called in English-speaking countries)" is quite an interesting little story. It seems that Robespierre's wife, Georges Sand, got word of the plot to murder her husband in his bath. All she had to do to save his life was call his name and warn him. But, alas, quicker than she could say Jacques Robespierre, she received a telegram from her old friend Frederic Chopin who was down in Majorca setting lyrics to his immortal "Warsaw Concerto." Chopin said he needed Georges Sand's help desperately because he could not find a rhyme for "Warsaw." Naturally, Georges Sand could not refuse such an urgent request.

Well sir, Georges Sand went traipsing off to Majorca, but before she left she told her little daughter Walter that some bad men were coming to murder daddy in his bath, and she instructed Walter to shout Robespierre's name when the bad men arrived. But Walter, alas, had been sea-bathing that morning on the Riviera, and she had come home loaded with sea shells and salt water taffy, and when the bad men came to murder Robespierre, Walter, alas, was chewing a big wad of salt water taffy and could not get her mouth open in time to shout a warning. Robespierre, alas, was murdered quicker than you could shout Jacques Robespierre (or Jack Robinson as he is called in the English-speaking countries).

There is, I am pleased to report, one small note of cheer in this grisly tale. When Georges Sand got to Majorca where Chopin was setting lyrics to his immortal "Warsaw Concerto," she was happily able to help him find a rhyme for "Warsaw," as everyone knows who has heard those haunting lyrics:

In the fair town of Warsaw,
Which Napoleon's horse saw,
Singing cockles and mussels, alive alive o!)

But I digress.

We were speaking of Christmas gifts. What we all strive to do at Christmas is, of course, to find unusual, offbeat, different gifts for our friends. May I suggest then a carton of Marlboro cigarettes?

What? You are astonished? You had not thought of Marlboros as unusual, offbeat, different? You had regarded them as familiar, dependable smokes whose excellence varied not one jot or tittle from year to year?

True. All true. But at the same time, Marlboros are unusual, offbeat, different, because every time you try one, it's like the first time. The flavor never palls, never gets hackneyed. Each time Marlboro is a fresh delight, a pristine pleasure, and if you want all your friends to clap their hands and exclaim, "Yes, Virginia, there is a Santa Claus!" you will put them at the very top of your Christmas list.

© 1960 Max Shulman

• • •

And for further Yuletide joy, give Marlboro's nonfiltered companion cigarette, mild, flavorful Philip Morris—in regular size or the sensational new king-size Commander. You'll be welcome aboard!

Editorial:

Highway Slaughter

Beginning with this weekend, UVM students will start their exodus from Burlington by car, bus, train and plane. On the next two weekends something resembling a numbers game will appear on the front page of every newspaper in the country. Headlines will read "350 Killed Over Weekend" and "Traffic Deaths Set New Record". The occasion is the annual Christmas and New Year's weekend slaughter on the highway.

Perhaps the most important thing to bear in mind while driving on those weekends is that the figures published in the newspapers and heard over radio and television are not statistics bearing no relation to anything in real life. Each of those numbers represents a person -- a dead person. These are not vague, impersonal reports of some huge sporting event, these are the reports on the death of individual Americans.

This unhappy fact is made still more unpleasant when one stops to consider that almost every one of these fatal automobile accidents could be prevented. Perhaps a little less speed on those icy patches of road, perhaps a little more attention to traffic and a little less to entertaining the passengers, and especially, perhaps a little less driving after a few fewer drinks.

It is this last "perhaps" that concerns us most. Despite warning after warning by the National Safety Council, and despite stiffer penalties for drinking drivers, the numbers of people injured and killed each year by drunken or drinking drivers continues to mount. This year is not expected to be any exception.

We hope and pray that this year *will* prove to be an exception. Such an event is possible only if everyone does his part. Besides exercising extra caution during this Christmas holiday we urge that everyone remember "Alcohol and gasoline do not mix." This is not merely a clever truism. It is an established, scientific fact. We urge anyone planning or attending a vacation function involving the use of alcohol make sure that persons attending this function will be able to return home without endangering their own lives and the lives of other persons. If no arrangements can be made, we urge that the use of alcohol be severly curtailed. Only in this way can the frightful toll on our highways be reduced.

SOMETHING FOR NOTHING

IT'S ALMOST FREE

Recently an old form of the American desire for something-for nothing swept the UVM campus when a series of chain letters promising 32 bottles of liquor (think of it! 32) for the price of one. This looked like a good deal to many people, who immediately continued the circulation of these letters. After all, it was something for almost nothing. The only expense involved was the purchase of one bottle of liquor, and the slight amount of time involved in making two copies of the letter and distributing them to two trusted friends. Then all one had to do was to sit back and wait for the the golden fluid to start flowing in.

WELL, ALMOST

There is, of course, 2 fallacy in this scheme. Assuming that no one breaks the chain -- which would vastly reduce the number of bottles the person would get when his turn came -- and which is in itself a ridiculous proposition, if a person's name is the 15th to reach the top of the five name list, there are 65,-534 letters which either are or have been in circulation. This is something more than the entire population of the Burlington area, including children and dogs.

THE BUBBLE BURSTS

Obviously, the people whose names are near the top are the only ones who have a chance to do as well as to break even, since, after the first two rounds, the bearer of the letter will find it impossible to get rid of the two copies which will start the chain for him. Since the CYNIC is interested in helping everyone reap the benefits of the some-for-nothing system, we offer this risk-proof system of getting the 32 bottles, for which the person otherwise might have to contend with some thousands of competing letters as well as the human weakness that permits some irresponsible persons to break the chain.

WHY TAKE A CHANCE?

We would suggest that someone who wishes to reap the benefits of this scheme at no risk to himself, and with an almost guaranteed return of the same amount as he would theoretically get through the true chain letter

Letters To The Editor

Pro Kritzler

Dear Editor

Having read Mr. Burton's letter, I should like to come to the defense of Mr. Kritzler. If Mr. Burton should read the November 18 issue of *Student Council*, he would find out why the Cuban people do not have elections. "It is true", the magazine admits, "that they did not want to elect him. Elections have always been used to legitimize a thief in office in Cuba. Remember how Batista was elected after he staged his *coup d' etat*? The Cubans have given a real mandate to Fidel Castro. More than 80 per cent of the Cuban people support him -- and that is a conservative estimate. Further, they demonstrate their support very actively. They have been armed and are willing to die for their revolution and its ideals, which they feel Fidel Castro represents."

That is why they do not have elections. If all Kritzler's critics were challenged to state, at the beginning of their letters, whether or not they have ever been in Cuba, as he has been, most of them would find this challenge quite embarrassing. And if anti-Castro letters-writers in general were challenged to produce the indignant letters which they wrote to editors complaining about Batista, while he was perpetrating the slaughter of the twenty thousand, this too would embarrass a great many of them.

When Kennedy is President, he should go to Havana in person and make a speech to the Cuban people, apologizing to them for what the United States has done, and asking their forgiveness for the United States. He should admit that for sixty years the United States bled Cuba white in behalf of Big Business; that the United States set up and maintained Batista's Inferno; and that the United States has suddenly developed the novel theory that anyone who objects to being bled white is therefore automatically a Communist. He should admit that Dr. Castro is anti-Communist and that the American press had lied about him on this point. He should praise Dr. Castro's great personal qualities and his leadership, and perhaps even compare him to Washington, Bolivar, Lincoln, and Madero, as one of the great liberators in the history of the Western Hemisphere. He should praise Dr. Castro's magnificent confiscations and expropriations, admit that they have absolutely no ill effect at all except against an infinitesimal part of the American people, and that nearly all of those adversely affected are so fabulously rich that they can easily sustain the loss. He should encourage the continuation of these confiscations and expropriations. He should promise the Cuban people more American financial aid. He should advocate the extradition of Batista, the Eichman and Khrushchev of Cuba, in order that he may be tried by an international tribunal for crimes against humanity.

He should say all this to Cuban people face to face, so that the Cuban people will know the United States is

(continued on page ten)

Why Not ?

by JULES OLDER

GRAPES OF WRATH

Right and wrong are variable factors. It is absolutely and positively wrong for students at the University of Vermont to drink intoxicating beverages. WHY NOT? Under-age imbibing is against the statutes of God and man, i.e. the University Family and State of Vermont. Naturally undergraduates at our venerable alma mater are not allowed to taste of the fruit of the vine. Who would be so foolish as to seriously defy devine law?

OTHER PLACES, OTHER RULES

But the world is filled with many deities and many sets of laws. Forty-one miles to the south, on a green hillside, sits an equally venerable institution -- Middlebury College. Although this school also lies within the domain of Vermont, the rules of right and wrong are quite dissimilar. Residents of the little college are permitted to use their own discretion as to whether or not they wish to skirt the law at their own risk and take a "taste" when the mood strikes. And the risk doesn't seem to be too great since the law enforcement officers in the town have adopted the position of letting the college police its own affairs. This is not only true in Middlebury, Vermont. It is historically the position taken by the local gendarmes in town-gown relationships.

The same situation exists at Williams College, located just south of the border in Massachusetts. And at Harvard. And Colby, and University of Maryland, and Boulder and University of North Carolina, and Yale.

All of which just goes to show that although the gods who rule the University of Vermont may be omnipotent here, they are by no means universally powerful.

COLLEGE CONFIDENTIAL

Actually the local deities are not even all-powerful here. Students at UVM do drink, of course. The main difference between the drinking here and at a school like Middlebury is that the alcohol is consumed in the open there and is confined largely to basements and attics here. It is amazing how many people can squeeze into a damp and uncomfortable cellar. And it is even more amazing how the fun of being "bad" brings them back again and again. This is why the speak-easy flourished during prohibition. So, Hello Suckers.

Prohibition was a "Noble Experiment" that failed miserably. Finally it was repealed.

Prohibition is failing here too.

O mighty Lord of UVM, it is within your power to change the law.

It's your move.

"Continued silence" does ... not always denote guilt. In ... many instances it denotes ... thinking and a deep desire to ... understand the source and the ... issues of the issues at hand. ... How often are hasty replies ... or statements not a true ... representation of facts??

Each year there is a Joint Conference or Rules Revision made of W.S.G.A. policies at which time all women may make themselves heard. In addition, suggestions are constantly examined throughout the year. As a result of this, all rules under our jurisdiction deemed "petty" are eliminated.

At any University, state or otherwise, tradition does and/or should play an important role. Tradition leads to respect and respect leads to betterment of group living. W.S.G.A. rules are based on consideration for others in a group situation, individual honor leading to group honor. Perhaps a quoting of the Women's Student Government Oath would be appropriate at this time:

> "We will never, by any selfish or other unworthy act dishonor this our college; individually or collectively we will foster her ideals and do our utmost to instill a like respect to those among us who fail in their responsibility; unceasingly we will strive to quicken a general realization of our common duties and obligations to our college. And thus we will render our Alma Mater greater, worthier, and more beautiful."
>
> (Adapted from Athenian Oath.)

Signed, Ellen Lessner, President
The Women's Student Government Council

WSGA HISTORY AND RESPONSIBILITY

TO: Women Students of the University of Vermont
FROM: Women Student Government Association Council
RE: Information about your Student Government

In the light of recent attacks on the Women's Student Government Association the Council feels that the women students would appreciate some basic information.

Upon petition from the undergraduate women the University of Vermont Council in September, 1920, granted permission for the women to organize a self government on an one year trial basis. This body known as the Student Union has evolved over the years to what we call W.S.G.A. It has been constantly changing to meet present campus needs and with increasing responsibility granted to it by the administration for the conduct of the women students.

It has never been a subcommittee of Student Association but an entity with its own jurisdiction. Funds, formerly collected by W.S.G.A. itself in the form of fees, are now allocated to it by Student Association from the general Student Activity Fee. This was agreed to by the two organizations in the '40's for the purpose of establishing a uniform fee for all students.

At the start, all Association meetings were held weekly or bi-monthly. With the growth of the campus, efficiency was found in a representative form of democracy, i.e.; Council, House Presidents and House Committees. Mass Meetings, as they are called, were established for the purpose of creating a feeling of active student participation in the Association. Mass Meeting, like sorority and fraternity meetings, and graduation exercises have always been compulsory as probably the only way to get more than a token attendance, quality of program provided notwithstanding.

The Joint Conference Committee was created and holds at least one meeting per semester to provide a forum for discussion of campus problems and to make reports and recommendations for change to the W.S.G.A. Council. Attendance is voluntary except for officers of the Association.

The Honor Code and "system" were adopted through a VOTE of the women students who felt adult enough to accept the responsibility of their actions. This was done after several attempts to establish a campus wide honor system had been repeatedly voted down.

The Constitution of the Association provides for orderly change if a majority wish it.

The specific areas in which W.S.G.A. has jurisdiction and responsibility as a governing body are:

1. Freshmen Orientation (Freshman Camp)
2. Big-Little Sisters' Program
3. Promotion of scholastic achievement
4. Fire safety
5. Education for group living including discipline.

In all other areas, the W.S.G.A. can only act as a pressure group, informing the administration and the faculty of the women students' opinion.

May we suggest, at this time, that a careful reading of pages 2 through 22 of the "black" book may be both informative and beneficial to the individual student.

Ellen Lissner
President of W.S.G.A.

Nancy Paquin
1st Vice President

November 21, 1960

SUMMARY OF WSGA MEETING WITH PRESIDENT FEY & DEAN ROWELL

Members of the Women's Student Government Association Council met on Wednesday, November 30th, with President John T. Fey and the Dean of Administration, Lyman Rowell, to discuss the position of the Women's Student Government on the Vermont campus.

In discussing the roles of student organizations on campus, President Fey stressed that decision making is not the sole privilege of any one individual in the University. Even the office of the President is one which articulates decisions which have been produced by discussions at many levels. It is necessary for each group within the University to understand its role and area of primary responsibility. Within this area, decisions may be reached. Outside of this area, their opinion and judgement can be of value when referred to another group which has jurisdiction. In the University of Vermont, final authority is vested in the Trustees.

President Fey expressed his hopes for a student organization which would effectively combine the student opinions into a single voice. This is not to say that such organizations as Panhellenic, I.F.C., or W.S.G.A. would be eliminated; rather, they should continue serving their defined and necessary functions. President Fey reiterated the problem for which the Abnaki conferences were held, namely to promote the formation of a sole body from which may be obtained a majority student opinion. The President pointed out that through the present organization of W.S.G.A. he is able to get women student's opinion, but the men on campus are still not adequately represented.

In discussing central organization, President Fey stated that if a strong organization similar to W.S.G.A. were built, so far as the Administration is concerned, it would be an organization that does represent majority opinion. He added that the present W.S.G.A. is an effective, enviable type of organization.

Dean Rowell, in presenting his views on the current issues, agreed with much of what had been said about this one representative group. It was pointed out that each of the three times that reorganization of Student Association has been attempted, W.S.G.A. has been subjected to the type of criticism exhibited in the recent articles.

THE HONOR CODE

The University of Vermont believes that "the only truly effective discipline comes from within - from one's own will, rather than from external authority." A high standard of personal honor is the basis upon which the Women's Student Government Association rests.

THE HONOR PLEDGE

I, _____ as a University of Vermont student do hereby accept the Constitution and By-Laws of Women's Student Government Association and assume responsibility for living by its spirit and I do pledge my honor as a woman:

1. That I will accept the responsibilities of citizenship in my college community.
2. That I will live in accordance with the Women's Student Government Oath and the Vermont Pledge.
3. That I will myself report any violations by me of the regulations under which we live, and will do my utmost to encourage similar action on the part of my associates.

The CYNIC would like to thank WSGA Council for this statement of their position, which we have printed in its entirety. We would, however, like to point out several things which we feel should bear inspection.

Miss Lissner, in her letter, points out that matters such as cellophane tape on the walls and bottles in rooms are not within the jurisdiction of WSGA. A later statement in the "History" section states that in areas outside of specific WSGA jurisdiction, WSGA can operate only as a pressure group. When matters such as the issue rule about bottles in rooms come up, we suggest that WSGA do precisely that. Then, and only then, will WSGA inform the "administration and the faculty of the women student's opinion."

We question Miss Lissner's definition of true democracy. Most of us have been taught that the closest thing to true democracy still extant is the New England Town Meeting. We have yet to discover a town meeting where attendance is compulsory. To extend our analogy further, the non-required attendance at town meetings is certainly more than "token". Is it possible that this is because of the quality of the program presented? In our private definition of democracy, one of the redeeming features is the right not to participate, if one so desires.

The CYNIC would be the first to admit that a knowledge of WSGA rules is a necessity for every UVM woman. But that in itself is no reason for rules test. The United States has far more involved rules by which the people must live. Yet it does not find it necessary to give every citizen a rules test to establish his knowledge. The principle that "Ignorance of the Law is no excuse" takes care of that necessity rather well. We presume that such an attitude on the part of WSGA Council would have a similar effect.

No one can argue that WSGA's machinery is the most efficient and effective on campus. The CYNIC has nothing but praise for organization of WSGA. We would, however, like to see this efficient organization used for the benefit of the women students, rather than as a means to harass them.

In conclusion, we would like to reiterate that the above is a statement of current WSGA policy. The CYNIC feels that much of this policy is harmful to the women students, and still hopes for some rectification of WSGA stands. The CYNIC feels that the questionnaire currently being prepared by WSGA will, offer the women of the University of Vermont the opportunity to express their feelings about WSGA, and will give WSGA the opportunity to reconsider those parts of their program the women feel to be unfair.

David Steele
Editor-in-Chief

Theta Chi And Hamilton Star

News Flash -- A new show hit Burlington Saturday, and was immediately proclaimed a "sleeper". The troupe, made up of a group of Hamilton Hall 3rd girls and Theta Chi men wound up a long road tour by presenting a Christmas Party for an audience of 100 orphans at St. Joseph's Orphanage in Burlington, Saturday.

Some of the comments made by the several critics in the audience in the orphanage gym were "Silly!", "Funniest thing I ever saw," and "Keep those girls away from me." The climax of the afternoon came when Richard Aldinger, as Rudolph, the Red Nosed Reindeer, took a spectacular dive off the bongo board for a 10 minute curtain call.

Bringing the technique of the Theatre in the Round into use, the cast later circulated through the audience, organizing games. Attention then centered on the children. The riot scene at the end of the act entitled "Doggie and the Bone" was cited the "most moving scene in recent drama."

The supporting cast included most of the members of Hamilton Hall 3rd and of Theta Chi fraternity. Especially effective were Ellen Lipp as Charlie Catamount, Rosalie Satherby and combining talents as mistresses of ceremonies, the eight Theta Chi reindeer, and the many elves, ducks, seals and other animals dominating the scenes. "This certainly is a talented group," said David Steele, renowned owner of a group of Cuban newspapers and patron of the fine arts.

Opportunity Knocks

By Michael Zeltzerman

Opportunities for advanced scientific training are now offered by the U.S. Department of Agriculture and the National Academy of Science - National Research Council. The trainees will be offered research associateships and the chance to work with qualified veteran scientists. 25 associateships will be awarded in April, 1961.

The person receiving one of the associateships will train and do research for a year at one of the 13 ARS Pioneering Research Laboratories. The laboratories were established about three years ago for advanced scientific exploration.

Albany, California; Philadelphia, Pennsylvania, and Washington, D.C., are a few of the locations at which the associates will have the opportunity to work. The associate will also have a great many fields of study to choose from.

An applicant must have a Ph.D. or Sc.D. degree, or the training equal to these degrees. He must also have the ability for creative research. If the applicant receives an appointment, he is not obligated for any other work during the time he is working under the association. The applicant must be evaluated before he is selected. This is done by ARS officials. If accepted, the associate may begin his fellowship work after July 1, 1961.

Additional information describing separate associateships may be obtained from the National Fellowship Office. February 1, 1961 is the deadline for filing applications. They must be sent to the Fellowship Office, National Academy of Sciences - National Research Council, 2101 Constitution Avenue N.W., Washington 25, D.C.

The Navy, Army, Air Force, and National Bureau of Standards are also participating under various programs in the National Academy of Sciences - National Research Council.

Speakers Bureau

The Evening Division has established a speakers bureau to provide speakers for interested Vermont groups.

A 12-page booklet outlining faculty and staff interested in speaking to Vermont groups is available from the Evening Division Office, and is being sent to Women's clubs, education and fraternal groups.

Groups interested in speakers or in obtaining a copy of the speakers bureau booklet may write, call or visit the Evening Division Office, Waterman Building.

Doctorate Program

The UVM Board of Trustees heard plans for a new Ph.D. program in chemistry to be begun probably next semester.

The Board, which earlier approved the establishment of UVM Ph.D. programs in biochemistry, pharmacology and physiology, endorsed continued expansion of the University's offerings at the doctorate level.

Contract Given

The Pizzagalli Construction Co., of South Burlington was low bidder on UVM's new home management building.

President Fey reported to the Board of Trustees that the South Burlington firm had been awarded the contract for the $52,416 bid. Architects' fees and equipment will bring the total cost of the project to $60,916. The Board had earlier authorized the University to begin the project, to be paid for from funds received from sale of the old home management house and other property.

SA MOVIE

In 1953 a young man named Robert Anderson achieved a great deal of critical acclaim for a play he had written. The play "Tea and Sympathy", which was one of the longest running "straight" plays on Broadway. Several years later, this play was made into a movie. M.G.M. used the same performers in the celluloid version that appeared in the original stage production - Deborah Kerr (returning to the "lady" type of role after her performance as Karen, the wayward wife in "From Here To Eternity"), Leif Ericson, and a comparative unknown, John Kerr.

"Tea and Sympathy" is a story of loneliness. The main character is a sensitive young man who is unable to find understanding in any of his contemporaries. However, he is attracted to the wife of one of his teachers, a kindly and very sympathetic woman. This woman is unable to find fulfillment in her marriage and she is drawn very deeply to the boy in a common bond of loneliness and the desire to be loved. The relationship of these two people and its tragic aftermath provides the basis for a deeply moving and absorbing motion picture which is indeed a credit to Hollywood, which is criticized so often for its lack of artistry.

The performers are magnificent. Deborah Kerr proves once again that she is one of Hollywood's most competent performers. She received an Oscar nomination for this film and was the recipient of many awards for her outstanding work. Mr. Kerr (no relation) is excellent in his screen debut as the troubled boy and Leif Ericson is fine as the brutish husband.

This superlative film will be shown this Friday night, Dec. 16, at 8:00 in Southwick. Give yourself a Christmas treat and make sure to view this touching little masterpiece.

Trustees Accept Gifts

More than a half-million dollars worth of [illegible] gifts and scholarship funds was accepted by the Board of Trustees at its meeting recently. Teaching and research grants accounted for $508,[illegible] gifts for $23,986 and scholarships from outside sources for $2,856. Included in the gifts figure were numerous objects for the Fleming Museum, totalling nearly $4,000 in value.

Included among the gifts was one for $6,000 by [illegible] Lawrence of Rutland for the Lawrence Debate Fund. This latest contribution added to more than $65,000 the amount given by Lawrence to the University for the programs of debating and the speech department. Also included were gifts of $4,[illegible] from the American Philosophical Society for a post-doctoral research fellowship, $3,750 from the Helen [illegible] Whitney Foundation for a medical research fellowship and $2,475 from the A.H. Robins Co. Fund for a new surgery fellowship.

Faculty Resignations Accepted

The Board of Trustees recently accepted the resignation of three faculty members including that of Dr. Arthur R. Eckels, professor and chairman of the department of electrical engineering, effective June 30, 1961. Eckels joined the engineering faculty in 1956.

Dr. Robert H. Linne, associate professor of chemistry, and Kenneth M. Sm[illegible], assistant professor of medical social work, also placed their resignations before the Board, effective June 30, 1961 and Nov. 25, 1960 respectively.

In other personnel matters the Trustees approved leaves of absence for Dr. Wilfred Raab, for Dr. Wesley L. [illegible]borg, and for E. Wi[illegible] Steele. The Board also changed the effective date of a leave of absence previously approved for Extension editor, [illegible] Spaven.

SOPH CORNER

Tomorrow's the big night. The Sophomore Class Barn Dance will be held at 8:00 in New Haven, Vermont. Those who are taking the buses, don't forget that they leave at 7:00 in front of Waterman. For those who are driving we have directions: Take Route 7 south (this goes straight to New Haven Junction), after crossing the railroad tracks in New Haven take a left, you should see a general store on this road, take the second right (a dirt road) and the barn is on this road. Hope you find your way with no trouble.

Besides the round and square dancing planned for the Dance there will be entertainment by the intermission committee. A skit has been written which will add variety to the theme of the event. There also will be a few competative games to provide some excitement.

Our chaperones for the Barn Dance will be Miss Eleanor Mauville, class advisor, and Arthur Mahoney, coordinator of student activities, and his wife. The class has extended invitations to Dean Harris, Dean Wing, and Dean Clifford, who we hope will attend since this should be a "real swingin' affair."

Tried Regular Filter Cigarettes?

Tried Other Menthol Cigarettes?

NOW! Come Up...All The Way Up to the MENTHOL MAGIC of KOOL!

When your taste tells you it's time for a change, remember: Only Kool—no regular filter cigarette, no other menthol cigarette—gives you real Menthol Magic!

YOU FEEL A NEW SMOOTHNESS DEEP IN YOUR THROAT!

STRONG THEATER

Fri. &

Sat. Dec. 16 & 17 Only

"'THE MAGICIAN' is full of extraordinary thrills that flow and collide on several levels of emotion and intellect. Supremely contemplative, eerie and Rabelaisian . . . rich in comedy and melodrama as well as deep philosophical thought and wonderful in its graphic details . . . *it is a thoroughly exciting film.*"
—*Bosley Crowther, N.Y. Times*

"A Masterpiece . . . nothing short of miraculous . . . all of Bergman's skills are on view in 'The Magician' which all in all *is a superb motion picture.*"
—*The New Yorker*

INGMAR BERGMAN'S THE MAGICIAN

Essay Contest Announced

[illegible] Zeltzerman

[illegible] announcement of [illegible] ay contest, an [illegible] s submitted to [illegible] ollegiate students [illegible] l essay skills. [illegible] the essay con- [illegible] "What Do You Want The United States To Do At Home And Abroad In The Sixties" [illegible] side of each sheet of plain paper. Be sure to print your name, college, college address and class [illegible] each entry. You may enter as many times as you wish.

2. Mail your entry to America in the 60's Contest P.O. Box 12e Mount Vernon 10, New York

All entries must be postmarked not later than midnight, December 28, 1960.

Judging will be on the following basis: Content (up to 70 points) and Form (up to 30 points).

4. Winners will be flown to New York City for the day and night of January 18th where they will be the guests of ABC Radio, and will be transported from there to Washington, D.C., on January 19th, where they will remain as guests of ABC Radio, and members of the ABC News Team through January 20th. During the Washington stay, they will attend the inauguration ceremonies and ball.

If students desire further information please contact the CYNIC.

[illegible] ABC Radio in con- [illegible] Edward P. Morgan, [illegible] journalist, has [illegible] contest to all [illegible] and colleges.

[illegible] graduate student [illegible] as many essays as [illegible] es, each with a [illegible] six-hundred words. [illegible] is timed so that [illegible] will be in Wash- [illegible], D.C., for President- [illegible] Kennedy's inaugu- [illegible]. Therefore, the [illegible] the contest is [illegible] 28. In addition to [illegible] Morgan, the judges [illegible] such notables as [illegible]-assistant and [illegible] J. Hughes; na- [illegible] dicated columnist [illegible] and Doctor Paul [illegible], Dean, General [illegible] Division of New [illegible] University.

[illegible] and a girl will be [illegible] winners of the con- [illegible]. They will fly to New [illegible] to lunch with industry [illegible]ers, visit the United [illegible]s, and see a Broadway [illegible]. The next day, the win- [illegible]s will fly to Washington [illegible] meet with government and [illegible] leaders and participate [illegible] the ABC News Team in the [illegible]rage of the inauguration. [illegible]. Morgan will also in- [illegible]corporate the winning essays as part of his radio broadcasts.

The rules are:

1. In 600 words or less, write on the subject "What Do You Want The United States To Do At Home And Abroad In The Sixties" [illegible] side of each sheet of plain paper. Be sure to print your name, college, college address and class [illegible] each entry. You may enter as many times as you wish.

2. Mail your entry to America in the 60's Contest P.O. Box 12e Mount Vernon 10, New York

All entries must be postmarked not later than midnight, December 28, 1960.

Judging will be on the following basis: Content (up to 70 points) and Form (up to 30 points).

4. Winners will be flown to New York City for the day and night of January 18th where they will be the guests of ABC Radio, and will be transported from there to Washington, D.C., on January 19th, where they will remain as guests of ABC Radio, and members of the ABC News Team through January 20th. During the Washington stay, they will attend the inauguration ceremonies and ball.

If students desire further information please contact the CYNIC.

Dr. Sadler To Study In India

Dr. Albert Sadler is one of 20 Americans who will participate in a two-month seminar in India next summer under a U.S. exchange grant under the Fulbright Act. Dr. Sadler, assistant professor of religion, is one of 20 professors who will participate in a seminar on Indian civilization in Hyderabad, to be conducted by members of the local university.

One of the stipulations for the grant was that the person must spend a considerable amount of time in teaching about India and that the person must have been to India. Since India is the birthplace of Buddhism and Hinduism, and Sadler's first semester religion class deals primarily with Asia, this stipulation posed no barrier.

In addition to the seminar, Sadler hopes to be able to make some field trips on the side and to do some individual research. He is working on a book dealing with monastic communities and hopes to gather research on Muslim, Hindu and Buddha communities. An article by Sadler on Monastic Communities in Islam will appear in the April edition of the *Muslim World*, a world-wide, scholarly journal. If time allows, the professor hopes to stop off in Burma and Japan.

Mortar Board Expands Activities

As a result of a very successful Mum Sale during the Homecoming Weekend, Mortar Board has been able to expand their activities and services for the school year.

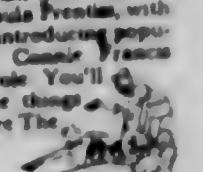
Members of this senior women's honorary were host esses for a student faculty reception which was held in the Fleming Museum lounge Sunday, December 4, from 2-4 p.m. Members of Boulder Society senior men and women, the Deans of Men and Women and the Assistant Dean of Women and Faculty attended the get together which was for the purpose of promoting better student faculty relations.

Hamilton 3rd will be able to retire the present scholarship cup, awarded by Mortar Board since funds allow the purchase of a new scholarship cup. The award is announced at Honor's Day in May and is presented to the women's residence of Floor comprised of girls from all four classes which has the highest average for this first semester. Though rooms of Hamilton 3rd have been occupied by different girls the past three years, the cup has been received by the same floor and has been displayed there for that period of time. WSGA Scholarship chairmen cooperate with Mortar Board in compiling the semester averages from each living unit.

During the year, the seven girls of the Ahrata Chapter will be working on bringing up to date the membership files of women who were Mortar Boards since the first recognized group in 1924. The main project will be preparation of a booklet to be used by future elected senior women which will contain information concerning the history, structure, buildings, colleges and various vaulable statistics of the University. The calendar of plans also includes meetings with the Middlebury chapter and the and the alumna in the Burlington area.

UVM OK's Audit

The Board of Trustees of the University of Vermont has again voted to accept the official state audit of the University's financial operation as the University audit.



Haskins and Sells, certified public accountants of New York, performed the audit for the State.

I HAVE ALWAYS HAD an abiding hatred for the bottom crust of rye bread. There is no particular reason for making this point, except that whenever I think of Fort Lauderdale, I think of rye bread. There is no particular reason for that either, but I have been thinking of Fort Lauderdale. Fort Lauderdale is "where the boys are." Right now, that is. Most of the time, serenity reigns in Fort Lauderdale. (The Chamber of Commerce will hate me, they say it never rains in Fort Lauderdale.) But, for two weeks, twenty thousand collegians descend on this peaceful community and take it apart, peace by peace. They call it Spring Vacation, but it's more like amateur night at Cape Canaveral. They capture Florida and throw the Keys away. But I shouldn't joke—not while people are holding mass prayer meetings for an early hurricane season.

This is "where the boys are." And girls, too. Such girls, it makes you dizzy to look at them. If you look long enough, you reach an advanced stage of dizziness called aphrodizzier. It's like being in love. That's what happened to me, and it will happen to you, too. Everywhere you turn — beaches full of them, motels and hotels full of them, cars full of them, pools full of them, bathing suits full of them. Ah, bathing suits . . . when the man said, "It's the little things in life that count," he must have been thinking of bathing suits. But mostly, it's the girls.

Girls in love, girls in trouble, bright girls with a future, not-so-bright girls with a past, rich girls in the lap of luxury, poor girls in any lap that'll have them, girls of every size and discretion. It isn't any wonder that this is "where the boys are." And the things that happen are wacky and wild and wicked and warmly wonderful "where the boys are." Someone should make a movie about it. Hey, someone did! M-G-M calls it "Where The Boys Are," starring Dolores Hart, George Hamilton, Yvette Mimieux, Jim Hutton, Barbara Nichols, Paula Prentiss, with Frank Gorshin and introducing popular recording star Connie Francis in her first screen role. You'll want to see all the things that happen "Where The Boys Are."

Metro-Goldwyn-Mayer presents "WHERE THE BOYS ARE" A Euterpe production in CinemaScope and METROCOLOR. Screenplay by George Wells, based on the novel by Glendon Swarthout. Directed by Henry Levin. Produced by Joe Pasternak.

Filters for flavor

–finest flavor by far!

Tareyton has the taste–

Dual Filter does it!

Here's how the DUAL FILTER DOES IT:

1. It combines a unique inner filter of ACTIVATED CHARCOAL . . . definitely proved to make the taste of a cigarette mild and smooth . . .

2. with a pure white outer filter. Together they select and balance the flavor elements in the smoke. Tareyton's flavor-balance gives you the best taste of the best tobaccos.

NEW DUAL FILTER *Tareyton*

Society

PHI SIGMA DELTA

The [illegible] of Phi Sig held [illegible] successful Winter [illegible]. A dinner-dance party was held at Jeri's Restaurant. The Brothers of Fern Hill in [illegible] come from behind [illegible] trounced the TEP's in [illegible] and won out by [illegible] points. Credit should be given to Steve Fireman who [illegible] both boards and some [illegible] clutch shooting by [illegible] Jellnick, Ken Miller and [illegible] Watt.

We had a great exchange [illegible] with Kappa Alpha Theta last week. Alan "Cat" Kaniss said he was very impressed with their House and plans to go back for second rushing.

It was also an honor for our House to have been chosen at the National Convention as having the best social program of all the chapters across the country. This trophy was given to House President Marc Pecker by Supreme Court Justice Black.

Buddy Lewis has been very busy these last few days. It seems that he has been giving haircuts to some of the Brothers at quite reasonable rates. The only drawback is who is willing to be seen on campus with one of Buddy's "trimmings"! Oh, well, there's always Crazy Eight's.

SIGMA ALPHA EPSILON

Last Friday night the Cupola House was the scene of the Annual Christmas Formal. The buffet was fabulous, but the real fun came after dinner when the dancing and a little bird-dogging took place. Everyone had a good time except possibly the manager who seemed to be disturbed about some broken glass on the floor, and Ken "Round" Hyatt doing a belly dance.

The Lions have extended their undefeated streak to three. Led by such outstanding performers as Frank "But I can't reach the basket from here" Amato, Bill "Outside" Bradford, and Frank "Can I play Coach?" Boynton, the SAE's edged Kappa Sig 26-24, and rolled over ATO 32-20.

The key to the house and and lock-up duties go to J.B. and Rube, who will definitely be the last to leave. In fact they probably won't get a chance to go home at all. J.B. can always move into the library.

After weeks of desperate searching and close interrogation of all possible suspects, John (the walking stick of Metrical) Tonseth has given up trying to find the culprit who handled his Rawhide Shoelace, and has broken down and bought a new one.

The Brothers of Sigma Alpha Epsilon would like to extend the Season's Greetings to everyone, and to wish you all the best of luck in the new year.

SIGMA PHI

Winter formals were very successful this year, including the splendid work that was done on the decorations. Credit for this great job goes to Ron Pero.

If you happen to see a strange looking person walking around campus wearing a wierd looking hat (Sherlock Holmes type) don't panic, it's only "Rip".

Missing: One mattress, last seen in the Boston area.

Our basketball team is off to a rousing start this year with an amazing record of 2 to 1. Pacing the team in every respect is "the Frog"

SIGMA PHI EPSILON

This week was another winning one for Sig Ep. The bowling team rolled over Acacia sweeping both strings. It took a cab ride to the gym during half time by Bob Villanova to whip the team into shape and with his help the boys won another this time over the Owls 30-21.

With a tremendous defense and the cheering section shouting encouragement to the starting five and the referees, Sip Ep was able to beat a great Theta Chi ball club 30-24.

John P.E. Eccher is a shoo-in for the cadet of the month. His secret of success: he never forgets to shave.

Sigma Phi Epsilon is sorry to report that no one has profited from the cheer chain.

After a great dinner dance at the Lincoln Inn on Friday, the house was greeted by the early arrival of Sig Ep's Santa Claus, Angelo Lombardi. With presents for all, Angie made the Mistletoe Mingle a memorable party. Credit must also go to Chris Collins for procuring our Christmas tree.

SIGMA NU

The snow piles high under the Harris sky,
The boys from "The House that Thorpe Built"
Scramble prepared to die,
The flak is thick over Jeffersonville
Williams calls a bye.
"ALL PILOTS RETURN TO THEIR GUNNY SACKS"
Perhaps next year we'll fly.

Our itinerary of events for next semester was submitted to the administration for approval this week. A few of the more promising events include:

Jan. 16, Lollypop Hunt at Redstone Campus.

Feb. 11, Symposium at Sigma Nu - Guest speaker, Mickey Mouse.

Feb. 18, Exchange dinner with Taft Elementary School.

March 4, Pocket Pool Tournament - Sigma Nu vs. Delta Psi (Away).

Last weekend our Stowe Chateau was the scene of a heated housewarming party. The Dairy Bar suprisingly enough became stocked with 28 flavors, thanks to the ingenuity of Collins, Sells and Bergen. The 20's and their bathtubs have nothing on us, folks.

Due to security declassification, White House Press Haggerty was able to announce this week that UVM's Cadet Colonel "Mobutu" Martel will be demoted to the rank of Airman Basic. This move might seem unorthodox to most readers, but one must keep in mind that House Manager Martel has of late been hurling too many sheets to the wind.

Ron "Thurbles" Fine and faithful Brother Jim (never misses a CYNIC edition) have been cracking the cat-o-nine-tails on the posteriors of Messrs. Bob and Stan Williams as the Williams St. skating arena (minus water) nears reality. By the way readers, considering the water problem, let me say that any donations will be graciously accepted.

As soon as concentration can be removed from Whale Boat Races and the local Submarine maneuvers at Mallett's Bay Hide-A-Way, various members of our illustrious group will embark on the ice-boat project. It looks like a swift, swing-in winter, people.

TAU EPSILON PHI

The Brothers of Tau Epsilon would like to thank the University Faculty for helping us make our Dedication Open House a success.

Meanwhile, the "Brear Boy" will officially be addressed as "Peter Gunn". With the help of our "Ex-Duke" his new haircut should send the whole dirty coffee shop in a turmoil. Hope "Make-a-million" and his roommate are feeling better. Get well soon?

"Waldo" to Syracuse this weekend? Bye Bye "Fish", its been swell you great guy. "Bullwinkle" will miss you. Me too.

Best wishes to our own "Simone", that great guy. I'm sure he'll be missed as historian. Hey! Guess who made that phone call and charged the boys to listen for the first three minutes? Pleasant vacation all!

Kappa Phi Kappa Receives Award

A helping hand extended to neighboring St. Michael's College has earned a citation from Kappa Phi Kappa, professional education fraternity, to the Alpha Gamma chapter here. The UVM chapter, established in 1927, helped establish the Gamma Alpha chapter at St. Michael's last spring.

The citation was awarded at the general assembly meeting in Philadelphia Nov. 18, but the citation was not received until this week. It reads. "For outstanding service in expansion for Kappa Phi Kappa through the establishment of the St. Michael's College Gamma Alpha chapter during the school year of 1959-60."

Hillel Party

The Hillel Chanukah party for Saturday evening, December 17, has been postponed to Sunday, December 18, at 7:30 P.M. in the Student Lounge. A movie entitled, "Professor Mamlock" will be shown followed by a coffee hour. Everyone is welcome.

Meeting For Frosh. Men

A meeting for all Freshmen interested in fraternity rushing is being held this evening at 7:15 at the Ira Allen Chapel.

Speakers will include Dean of Men Clifford, and President of the Alumnae Interfraternity Council Mr Abraham. Rushing Committee Chairman George Hatch of Acacia will conduct the meeting.

The importance of this meeting to fraternity-minded freshmen was stressed by Chairman Hatch who, when interviewed, was quoted as saying that attendance was 'almost compulsory' for the freshman. The reason for this statement is that the meeting will not only explain the UVM rushing procedure to them, but they will also be required to leave their names at the end of the meeting, this for the purpose of keeping a pre-rushing enrollment record.

Dr. Babcock Returns To UVM

A popular and well-known figure will return to the classroom here next semester. The Board of Trustees, meeting recently, announced the appointment of Robert S. Babcock as associate professor of political science on a full-time basis.

Babcock had resigned from the faculty to pursue the Republican gubernatorial nomination in the September primary. He has been teaching a course in the history of political philosophies at Stowe and one on state government at Randolph in the Evening Division. Babcock was appointed to the faculty in 1946. Subsequently, he served three terms in the State Senate and also as lieutenant governor.

UVM Alumni In Top Ten

University of Vermont alumni rank high in the nation's top ten major public institutions in terms of the percent who participate in alumni giving, thus joining UVM medical alumni who also stand in the top ten in the nation in terms of giving.

UVM alumni, who have pledged nearly $400,000 toward UVM's new gym, rank fourth in the nation in terms of giving by alumni of public institutions.

Their record of 34.2 percent participation places them fourth among the top ten. Georgia Tech alumni with 42.1 percent participation lead the nation's public institutions.

Another New England state university, the University of Massachusetts, claims second place with a 39.2 percent record. Miami University of Ohio alumni stand third with 36.8 participation.

A third New England state university, the University of Rhode Island, also achieved ranking in the top ten, with 30 percent participation for seventh place.

The study, made by the Brakely Companies, Inc., covers the 1958-59 year.

UVM's medical alumni, now completing a three year pledge period for UVM's new medical building program, stand fifth in the nation in terms of medical alumni giving. Two years ago, UVM medical alumni ranked first in the nation in terms of total dollars given. Last year, they ranked third in the nation.

NOTICE - NOTICE

Tomorrow, Friday, Dec. 16 is the day that the empty boxes and packages of Marlboro, Alpine, Philip Morris and Parliament should be turned in at the Student Association Council Room in Lower Waterman. Mr. Schnaars would like to remind you that, all packages and boxes must be in no later than 2:00 P.M., all packages must be in bundles of 25, all packages and boxes must be of a current packaging, and all boxes and packages become the property of Philip Morris, Inc. After the contest all of the empty boxes and packages will be destroyed.

Cuba, Castro, And Me

by EDWARD KRITZLER

Before I begin what is the last of my series of articles on Cuba, I feel it necessary to correct two printing errors that appeared in last week's article. It was printed that there are nearly 400 co-operatives in Cuba - the one that preceded the figure had been omitted; there are nearly 1400 co-operatives in Cuba. The second error is found under the subheading SOME OF THE RESULTS OF THE AGRARIAN REFORM. The first two paragraphs should have been designated as a quote. As I do not wish to add *"plagarist"* to the list of descriptive adjectives bestowed on me, I feel it necessary to correct this error.

CUBA'S RELATIONS WITH THE SOVIET UNION -- ANY CHOICE?

In a few of my past articles I have written on the economic structure of Cuba prior to the revolution. Nearly every industry in Cuba was owned by American interests. These interests, taking advantage of the cheap labor force they found, maintained this condition through a monopolistic control over the Island's economy. These interests, to a large extent did not produce many consumable items and thus it is found that Cuba was the sixth best customer of the United States. The tremendous profits derived by these interests (in many cases 20-30% yearly) combined with the fact that Cuba was our sixth best customer were responsible for draining Cuba of a fantastic sum of money yearly. Castro reiterated this condition in his U.N. speech when he said, "a poor and underveloped country in the Caribbean area, with 600,000 unemployed, was contributing greatly to the economic development of the most highly industralized country in the world."

The small amount of capital that did remain in Cuba was mostly in the pockets of Batista and his friends. When the revolution was successful these men fled and Cuba's money fled with them. For all practical purposes Cuba was broke. Thus, when the revolution was successful, in order for it to carry out its extensive program it desperately needed help in the form of capital and technical aid. Without this help the revolution would fall on its face and die. Fidel first turned to the United States for this help. Shortly after he took power in 1959 he came here and brought with him all his economic advisors to negotiate with our government. It is self-evident that Castro and his advisors never got anywhere on anything. It was after this trip that the denouncements from both sides began pouring forth. As soon as the Agrarian Reform Law was enacted our press began labeling the revolution Communist. This was before even so much as a diplomatic note exchanged hands between Cuba and the Soviet Union.

The expropriation of American land holdings brought up the question of compensation. Notes from our State Department rained on Cuba each calling for - speedy, efficent and just payments. Under ordinary circumstances this demand might seem fair. One must remember, however, that Cuba was without funds. The revolutionary government could not possibly begin making payments immediately. Instead it proposed to pay for the expropriated lands with bonds that would mature in twenty years at 4½% interest yearly. Our State Department and press demanded cash on the spot. Thus the revolution had to make a choice - either forget about the land reform program and perpetuate the economic misery of the country, or carry out the program, thereby exposing themselves to incurring the hatred of their powerful northern neighbor. Cuba chose to go ahead with the land reform.

It was around this time that Russia first entered the picture. She began by offering Cuba aid which Cuba so sorely needed to carry out its aim of internal development. Cubans have told me many analogous stories to this situation, one of which follows. "Say you are starving and in desperate need of help. You are standing with your best friend and supposedly your worse enemy offers you $10 -- Should you refuse the money?"

The attitude of the revolutionary government was now too bold, not only did she clash with American interests, but now she even turned to the Soviet bloc for economic help. This proved too much, and so the verbal barrage between the two countries continued. A continuous cycle was set up whereby the U.S. would denounce Cuba in return for denouncing the United States. Was anything done towards easing the situation - No.

As of today has the United States done a single thing toward alleviating this conflict - No. But what have we done? We have been forcing Cuba into the position we had originally placed her; that being the closeness between her and the Soviet bloc of nations. This closeness is out of necessity, not out of choice. American actions have made it imperative for Cuba to turn to the Soviet Bloc for help and support - there is no longer

Letters

(continued from page four)

worry and is prepared to mend its ways and be friends. In this way, they will be more willing to forgive us for what we have done to them. I am not suggesting that the President of the United States degrade himself. To be man enough to admit that one's country has been wrong is not degrading oneself. On the contrary, it is degrading when our government continues to allow Big Business to dictate our policies toward Cuba. I am no more of Mr. Kennedy than any Hungarian would ask of Mr. Krushchev, and for the same reason, too. We are hypocritical about Hungary until we mend our ways in Cuba.

Daniel Waine, '61

Con Kritzler

Dear Editor:

We were wondering just why Mr. Kritzler did go to Cuba this summer. After much thought, we came up with the following possible theories:

1) To investigate the international scene.

2) He had just read *The Ugly American*.

3) To join Castro's army (Perhaps he was rejected as 4F?).

4) He wanted to grow a beard.

5) To practice the riflery skills learned in ROTC.

6) To get his name in the CYNIC.

The absurdity of the above suggestions is equal only to that of the ideas put forth in Mr. Kritzler's articles.

Let us put an end to this abhorrent waste of space in our otherwise fine newspaper. This space could be better devoted to articles of more widespread interest and intellectual merit.

We believe that consideration should be given to the great many letters of complaint on Mr. Kritzler's column.

With the best interest of the CYNIC readers in mind, we remain.

Sincerely,

Round Three

Dear Sirs:

It is about time that someone showed these spineless insurrectionists where they got off, and Miss Worstell's letter, "Go ROTC!" certainly did it. Even though those of her sex have been traditionally noncombatants, her spirited militarism exceeds that of most of the MS I and II cadets. Alas, her enthusiactic nationalism is found only in too few of us- we of the D.A.R. and Ku Klux Klan, for example.

It a shame that Miss Worstell should have been deprived of the cultural benefits of ROTC. It is an even greater shame that the ROTC cadets and officers should have been deprived of Miss Worstell, and her moral fiber

I propose that ROTC be supplemented by an auxiliary corps of stouthearted women. Perhaps this auxiliary corps could be called the "MacCarthy Youth," since the valiant American's approach to Communism was so curiously reminiscent of the Third Reich.

There is one minor point of disagreement, however, that prevents me from completely affirming Miss Worstell's views. I feel that free thought is as un-American as free love.

Jerol Harrington

Editorial:

(continued from page four)

should do the following: A person, instead of waiting for a copy of the chain letter to come into his possession, writes his own. He puts his name at the top, takes three names at random from the directory for the next three on the list, and puts a friend's name at the bottom of the list. Instead of making only two copies as the true chain letter suggests, he makes 32. The friend, whose name is at the bottom, distributes the 32 copies in the manner stated in the letter. (Suppose give the new person the letter until the new person has contacted the person at the top of the list.) The person who wrote the letter receives the 32 bottles without any investment of his own, and is more sure that he will receive them than the person who participates in the true chain letter. This system is even better than the true chain letter, because it offers even more for even less. There is no risk that the chain will be broken because no chain exists. There is no chance that the liquor won't materialize because the man at the bottom is working with the man at the top, and he will make sure that each person who gets a letter gives the man at the top the bottle to which he is entitled. This way, no one can lose, since neither expense or risk is involved. So why should one get in on a chain letter when this method promises quicker, safer and more satisfactory results?

This won't be a dry Kake Walk!

"What Do You Mean I need a Yellow Ski

Language Lab.

(continued from page two)

dent is expected to copy this passage on paper; and there are the tapes on which the instructor asks a series of questions which the student answers on his own tape. The student then hands his tape in to the teacher who is able to catch many pronunciation errors as well as hearing what sounds or word formations the student is having difficulty with.

A fairly recent addition to the University, the language lab has proven to be an extremely worthwhile institution. Through this lab, students are able to get help which might otherwise have been difficult to obtain.

Sincerely,
Jane Leon
Judith E. Matreck
Marian R. Gang

Loans Repai

University of Vermont dents were awarded loan f totalling more than $166 during the 1959-60 col year, including $64,000 federal funds under the tional Defense Education

UVM President, John T. in reporting on the funds to the Board of tees, said the University $95,000 available for l with $503,000 outstandin loans.

He said the loan repa record of UVM student 99.79 percent. "We that is a pretty good rec he said.

Act on Cuba were the same, for only two of ... (Japan and Canada) have not gone along with ... embargo. Cuba was dependent on us for nearly every- ..., and we have now made her dependent upon the ... Union.

These two acts, the cutting of the sugar quota and ... embargo, along with the press coverage accorded to ..., I view as being largely responsible for straining ... relations, pushing Cuba closer to the Soviet ..., and raising the prestige of Communism within ... These three factors are far from the only ones ... have kindled this fire. There are many others of ... and lesser importance.

WILL CUBA BECOME A COMMUNIST SATELLITE??

Ernesto "Che" Guevara, one of the top leaders of the ...evolutionary government, told some Austalian journal- ...sts this summer that while Cuba is grateful to the ...viet Union, Cuba would ". . . resist to the last drop ... blood any Soviet attempt to establish a Communist ...atellite in Cuba." Herbert Matthews, associate editor ... *The New York Times*, said in commenting on this state- ...ent -" This need not be doubted. This young Cuban ...evolutionaries did not fight as they saw it against ...Yankee Imperialism' just to fall under the yoke of ...ssian imperialism."

The Cuban revolution wasn't waged to free itself from ...e fetters of one of the world's great power blocs ...ly to become entangled in the other, Cuba does not ...sh to become anyone's satellite. The one master aim of ...e revolution is "to make Cuba economically sovereign ...d economically prosperous."

WHAT THEN IS THE REAL REASON BEGIND THIS CON- ...LICT?

Cuba today represents the small nations' struggle ...ainst Great Power domination. The Cuban revolution ...as always bad news for the U.S. A full scale revolution ... Cuba was inevitably going to damage American property ...nd business interests inCuba and American influence ...roughout the hemisphere. Castro had no choice; he ...ould not play ball with foreign capitalism, except by ...noring the needs of his own people. It may appear as ... shock but ". . . this means that a revolution that ...as benefited more than 80% of the Cuban people *has* to ...e against the 'best interests' of the United States." ...Cuba though is not an entity within itself. We live in ... Nationalistic Era. This is evidenced all around us in ...Latin America, Asis, and Africa. The underveloped na- ...ions of the world want their sovereignty, and to be at ...east partially free of Great Power domination. Through- ...ut Latin America, the people look to Cuba as represent- ...ng this tsruggle.

Our Cuban policy has failed. It has bolstered the ...restige of Communism in Latin America; It has threat- ...ed world conflict and it has done that which it was ...pposed to halt - the "Fortress of America" is weak- ...ing daily. This is clearly seen just by reading the ...ily newspapers; e.g. the revolutions in Nicaragua and ...Guatemala. "Unless our Cuban policy is rectified, and ...soon, a revolutionary wave of unprecendented proportions ...is like to shake the entire continent."

There is only one way we may successfully rectify ...his policy, and that is to mend the broken fences: ...Aid should be included in our aid program to L.A. which ...should be increased drastically. We should stop throw- ...ing our weight around by sending patrols into the ...Caribbean. Congressman Porter of Oregon believes we ...should leave Guantanamo as we do not need it, and sug- ...gest to Castro that he turn it into an agricultural ...school for people from all over Latin America. These ...broken fences may also be mended by buying Cuban sugar, ...buying petroleum to Cuba, guaranteeing her Agrarian ...reforms, halting activities of the counter-revolutionaries ...in the U.S. and ending the smear campaign.

This change in policy would certainly be more sensible ...than bringing a possible world war close to our shores, ...breaking the hearts of the Cuban people, and perhaps ...fomenting a dozen Cuban revolutions elsewhere in Latin ...America.

Frosh To Face AFB

This Saturday the undefeated UVM Freshman Basketball team will be out to keep its winning record intact, when they travel across Lake Champlain to encounter the Plattsburgh Air Force Base. This year's team is one of the finest in recent years, as indicated by their previous victories over stubborn Norwich, always tough Dartmouth, and small college power St. Michael's (thereby snapping a Purple Knight 28 game winning skein). The members of the Plattsburgh Air Force Base Basketball team, however, have two advantages over the Frosh Cagers; superior height, and experience gained through college and service basketball.

The well-balanced Kitten squad should be able to overcome their opponent's advantages, and win by a comfortable margin by continuing the fine shooting, determination, aggressiveness, and teamwork, which has characterized their play thus far under the fine coaching of Ralph Lapointe.

'Mural Mirror

by Larry Yarkin

The Intramural basketball season got under way November 29, with a full schedule of games. This year there will be four leagues represented. Games will be played every night excluding Saturday and Sunday, until the end of the season. They will start at 6 p.m.

Below are the results of the first week's competition:

	Won	Lost
League A		
SAE	3	0
TEP	1	1
SN	1	1
KS	1	1
PDT	1	1
PSD	1	1

Aces	0	2

FROSH FROLICS

by Wayne Mirsky

BASKETBALL TEAM CONQUERS ST. MIKES AND DARTMOUTH

The Vermont Freshman Basketball team stunned the experts this past week with two surprise victories over strong Dartmouth and St. Michael's Quintets. The first win was won going away, while the second was a squeaker by one point. I suppose Johnny Babcock read what I wrote about him, because Tuesday night, "Babs" was everything I said he was. He pumped in twenty-one points, had innumerable assists, and stood out as a rose stands out in a field of weeds. Whenever the team needed a clutch basket, Johnny became "Johnny-on-the-spot". Guarded by a man seven inches taller than him, J.B. proved the old adage, "The bigger they are, the harder they fall." The team played without their ace rebounder Dick Lawson, so the burden fell on Dave Strassbourg. "Strass" rose to the occasion vengefully, and had twenty-five rebounds if he had any. Strong games were turned in by the always-reliable Chuck Glick and Gerry Torch, a surprise starter. Glick wound up with 7 and Torch with 12.

Friday afternoon, while many upperclassmen were preparing for the gala evening ahead, the Frosh team unselfishly gave up the privilege of taking the ROTC test at 4:00 and journeyed over to Winooski, where they were forced to play a basketball game against St. Mikes. With the thought of an ROTC exam ahead, their only incentive, the boys went out and completely demolished the taller SMC team by one point 73-71. Seriously though, the team played great. High scoring honors went to Dave Strassbourg with 17, followed by Bobby Nurse and Chuck Glick with 11 and John Babcock with 7. A yeoman job of rebounding was done by Ed Gallagher, who made many individuals stand up and take notice.

BIOGRAPHY

Dave Strassbourg or "Strass" as his friends call him, is a coache's dream as a ball player. He is big, strong, agile and willing to learn. As a high-schooler, Dave started on his varsity (Essex Junction) three straight years. Last season, he was an All-Stater. Dave was a member of the successful Freshman Football team and was a bulwark on it's great line. I hear that "Strass" is quite a soccar player and I witnessed his ability with his foot while watching the frosh football team scrimmage.

Sports Questionnaire

by HOWARD GORNEY

Some controversy has arisen from the Sports Editorial printed in the CYNIC on December 2, concerning the impracticality of flooding the basketball court behind Wills Hall for skating this winter. It was asserted that it would be very difficult to clean the court by either machine or manpower. On December 9, a letter-to-the-editor appeared, setting forth the suggestion that the skaters themselves take care of keeping the court free of snow. Therefore, the logical step to take was to discern the opinions of the freshmen, since they will be the ones concerned. Consequently, this week's question is: If the basketball court behind Wills Hall were flooded for skating, would you be willing to help to keep it clean?

MIKE SCHOENFELD--'64

Yes, I am willing to work. Furthermore, if everyone else does his share, it will lessen the work for all concerned.

DAVE SALDERFER--'64

Yes. If, for example, an intramural hockey league were formed, and the teams did their share, then there would be few problems involved.

DON MILLER--'64

This is a very good idea. Cooperation given by all concerned would make everybody's task easier and would add to the enjoyment of all the skaters.

YVON BERGEVEN--'64

I don't think that there would be very much interest in this skating rink if it doesn't have hockey boards. I would gladly clean the rink it it had hockey boards, and I doubt that I would be alone. Without the boards, however, I wouldn't have much interest in the rink so I doubt if I would help out.

STEVE COHN--'64

Definitely, if a sufficient number of individuals would be interested in forming teams. This would eliminate confusion.

DAYTON ALLEN-- '00

Why not? I would greatly enjoy supervising an ice-cleaning detail.

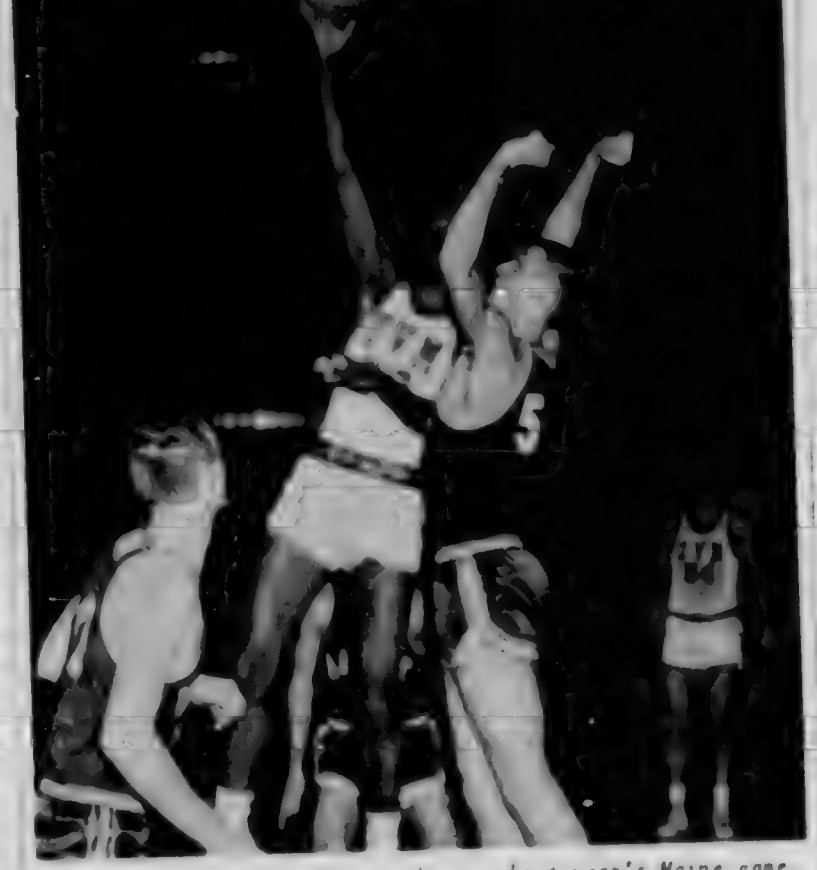
Evansmen Drop Two To Maine; Face UConn Tonight At Memorial



Game To Start At 8

by MIKE STEINBERG

The 1960 edition of the UVM Varsity Basketball team has found the going very rough in their first three games' losing one at Norwich and two at Maine. However, after facing the UNH Quintet at Durham, N.H., the Cats return to Burlington for a four game home stand. They face an insuperable task of defeating last year's Yankee Conference victors, Connecticut, at the Auditorium tonight. The Huskies have many returning lettermen this year, and are favored to regain their title. In their opening contests, they have shown a lot of finesse and ability, and will enter tonight's fray with an unblemished record. The Catamounts, on the other hand, have not won a game to date. (This does not include the game with UNH.) We have a very young team, with three sophs assisting senior Capt. Harry Zingg on the starting five.

At a glance, the Huskies should have an easy time with the Cats. However, UConn has a lot at stake to stay in the lead of the Yankee Conference.

The Bears from Maine are giving them a rough battle for the top spot. When you are all down at the Auditorium tonight, look for the Cats to make Connecticut work for their victory, and possibly play the role of spoilers.

Inexperience Hurts Cats: 94-63, 85-51

by FRANK BOLDEN

Experience is a very important factor in the world of sports. If two teams are matched physically, the more experienced team will almost always walk away with the prize victory.

The University of Maine lost only two men from their varsity squad last year, and are expected to win the Yankee Conference Championship this year. No one expected the young inexperienced UVM Catamounts to be any match for the Big Black Bruins of Orono; but everyone was shocked at the result of the first half of Friday night's contest between the two teams.

UVM, with a concerted team effort, was able to match the Bears basket-for-basket, rebound-for-rebound for twenty minutes. The score at the end of the first half was Maine 40, UVM 38.

The Catamounts were so elated over their feat that they went out and fumbled the game away. Chappelle hit ten straight points as the second half began, and then it was all over for Vermont. Our soph-studded team walked, threw away passes, and missed shots in an over anxious attempt to get back in the game.

UVM was unable to duplicate its performance in the first half, but Maine was red-hot. As a result, the final score was Maine 94, UVM 6 3

Saturday afternoon approximately 2,000 people turned out to witness the second contest between the Bears and the Cats. Of course very few of these people were there to cheer on the visiting Cats. Such a large crowd can have a terrible effect on a young team. It hurt very much. Maine, with Cappelle and Schiner leading the attack, took control from the opening tap and won the game 85 to 51.

A high point for [illegible] was the excellent [illegible] sophomore Ben Beeton, [illegible] playing with a [illegible] the team in rebounds [illegible] Saturday he came [illegible] pts. and 11 rebounds. [illegible] "Buggs" Ader also [illegible] job of rebounding [illegible] Capt. Harry Zingg [illegible] Although this was [illegible] straight defeat, the [illegible] not become discouraged. [illegible] can combine two halves [illegible] last half of the [illegible] (53 pts) and the first [illegible] Maine game (38 pts, [illegible] be in business. [illegible] they can do it; so NEW HAMPSHIRE--LOOK OUT"

HALFTIME BREAK

By Stan

CALLING ALL FRESHMEN

In last week's issue of the CYNIC, there was an article about freshmen rushing, on page one. To quote in part, "An important meeting for freshmen interested in fraternity rushing will be held this coming Thursday, (TODAY) December 15, at 7:15 o'clock in the Ira Allen Chapel." As it happens, at 6:30 the frosh basketball team plays Middlebury College in the gym. This game will not be over until at least 7:30, 15 minutes after the scheduled rushing meeting was to begin. Remember, this is YOUR class. The last minutes of a basketball game are usually the best, and Middlebury promises to be a close contest.

At 8 p.m., the Varsity plays host to the University of Connecticut at Memorial Auditorium. It does not sit favorably with upperclassmen when the frosh they have their eyes on, not only don't appear at the Varsity game, but fail to support their own freshman class as well.

What am I trying to say? This!! TONIGHT, go to one, or preferably both, of the basketball games. The Varsity game just happens to be the Catamounts' first home game of the 1960-61 season. It might help if they had a little support from ALL FOUR classes!

As far as the rushing meeting, I think you'll be told something like this: If you want to rush a fraternity, you MUST be back on campus by Sunday evening, January 29, 1961. On Monday and Tuesday, the 30th and 31st, you will go to each of the fraternity houses for one hour. Wednesday is a day of rest. On Thursday and Friday, February 2 and 3, you will go back to the fraternities (no more than four) of your choice for two hours. If you are not back on campus for rushing, you will have to wait six weeks to pledge a fraternity.

I hold nothing against the rushing committee, but I do think that a more appropriate date might have been chosen. See you ALL at the game.

MAY I EXTEND.

to you all a very Merry Christmas, Happy New Year, and a Happy Chanukah. You are all approaching the "Real" HALF-TIME BREAK, and when you come back next year, I hope you all have your noses buried in your books. After all, it would be nice to see you back next semester.

When you make out your New Year's Resolutions, don't forget to include "I will attend every home athletic function possible, and try to attend those away also."

Toodoolooll!

SKI TEAM

Among the 15 skiers who will compete for the University of Vermont during the coming intercollegiate skiing season are 11 Vermonters,--three from Burlington. Sam Miller, coach of the Vermont skiers announced the final selection of the team along with the events the skiers will compete in.

Vermont, [illegible] placed fourth in the Eastern Intercollegiate Championships last season, will compete in five college winter carnivals for team honors. Team members will also compete individually in ten other ski meets sanctioned by the U.S.E.A.S.A. Vermont will ski in carnivals at Dartmouth, Williams, St. Lawrence, Middlebury and Norwich.

Skiing for Vermont in the Alpine events (slalom and downhill) will be team captain Bill Adams of Montpelier, Larry [illegible] of Stowe, Rob Lutz of Owosso, Mich., John Seely of Pittsfield, Mass., and Chris Terrien of Burlington.

In the Nordic events (cross-country and jumping) Miller will enter Gary Carrier of Brattleboro, John Cheney of Stamford, Conn., Chris Collins of Putney, Sargent Goodchild of Winchester, Mass., and Tim Grant of Lyndonville. Two other Vermonters skiing in the Nordic events are Garth Peterson of Waterbury Ctr. and Jack Titus of Burlington. Two skiers, Tom Hackett of Burlington and Dick Hubbard of Middlebury, will ski in both the Nordic and Alpine events.

IFC And PanHel Announce Rushing Plans

by MICHAEL ZELTZERMAN

After exams are over another big problem arises for the freshman. What fraternity Should he join? What is rushing all about? When rushing starts there is much pressure and tension on campus. Buddies walk arm in arm around campus. As one rushing chairman puts it, "snow flies beautifully during intersemester." The freshman must weigh all the information he has about fraternities, and then make a careful choice.

First, the schedule for rushing should be noted carefully in the date book. All freshman are required to follow the schedule and visit each house during first rushing. Missing one house will exclude the freshman from further rushing. During second rushing, the freshmen will choose four houses to which they wish to return. A new feature pertaining to second rushing has been added this year. The fraternity has the option to cut the group returning for second rushing to one hundred rushees. This new feature should help freshman get a closer look at more fraternities during second rushing and the fraternity should get a better look at the returning freshman. There is another new feature that the freshman may have noted by this time. Fraternity men are not allowed to communicate with freshman from Christmas until rushing formally begins. This year the freshmen men have sixteen fraternities to rush because of the addition of a new fraternity Thursday, January 5, registration for rushing took place. Four-hundred freshmen signed up for rushing. This is a larger rushing turn-out than ever before. Bob Goldman, president of IFC, had this to say about fraternities, "In my opinion, fraternity is good for freshmen. You will find that most of the campus leaders are in fraternity. Fraternities are good for scholarship, leadership, and social adjustment."

We spoke to a rushing chairman, and he gave us some tips for freshmen who are going to rush. "Being a rushing chairman for three years, it has been belief that freshmen choosing a fraternity and vice versa is an important decision for all involved. A lot of thought must be given to the fraternity in mind. A fraternity has certain objectives when looking over a perspective pledge for the fraternity. The rushee must be presentable, well mannered, show interest in the fraternity, be willing to join in and, above all, be willing to adjust to fraternity life. The freshman should not try to push himself. Relax! Stand on your own merits."

He indicated that the freshman must also have definite ideas about what he wants in a fraternity. "Don't join a fraternity on the basis that your friends are joining it. Don't be gullable! Step back and take an over all objective view of the situation. Is this fraternity that you have in mind a fraternity that you wish to contribute to as a person? Join the fraternity where you will be most at home. The characters of its members are most important. you must fit in."

Mass Cutting Disturbs Administration

Action To Be Taken

Mass cutting before vacations has been a major problem at UVM for sometime, to say nothing of the hardships of obtaining transportation to and from Vermont. The University is taking action now to curb this.

The difficulties in securing means home before vacation have added to the students cutting before the holiday officially begins. Many have rides home which are leaving early, and cut regardless of the classes and work that they are missing.

Due to a lack of attendance many professors are forced to ... all their classes, wasting the day before vacation which was previously scheduled for teaching a lesson. The day after the holiday is then spent in reviewing where the class left off, and hence, another day is wasted. The number of days to each semester are planned ahead of time by educated people who know the time required to cover the material. The majority of the UVM students pay no attention to this fact. At some universities a student is suspended for cutting before vacations and at others he is fined.

The UVM studen: begins school in September and goes

All bids should be sent to the Base Ball Directors at a special meeting to be held later that [illegible]

THE ENGINEERS HAVE HAIRY EARS

Today in the age of technology when engineering graduates are wooed and courted by all of America's great industries how do you account for the fact that Rembrand Signboard, who finished at the very top of the class at M I T, turned down hundreds of attractive job offers to accept employment as a mechanic at very modest wages at the Acme Ice Company at a salary of $30 a week with a twelve-hour day, a seven-day week, and only fifteen minutes for lunch?

I know what you are thinking. "Cherchez la femme." You are thinking that Mr. Acme, head of the Acme Ice Company, has a beautiful daughter with whom Rembrand is madly in love and he took the job only to be near her.

Friends, you are wrong. It is true that Mr. Acme does have a daughter, a large, torpid ass named Claudia who spends all her waking hours scooping marzipan out of a bucket and staring at a television set which has not worked in some years. Rembrand has not the slightest interest in Claudia, nor indeed does any other man, excepting possibly John Ringling North.

So how come Rembrand keeps working for the Acme Ice Company? Can it be that they provide him with free Marlboro Cigarettes, and all day long he is able to settle back, make himself comfortable and enjoy the filter cigarette with the unfiltered taste?

No, friends, no. Rembrand is not allowed to smoke on the job and when he finishes his long, miserable day he has to buy his own Marlboros, even as you and I, in order to settle back and enjoy that choice tobacco, that smooth, mellow flavor, that uncompromising filter, pack or box.

Well, friends, you might as well give up because you'll never in a million years guess why Rembrand works for the Acme Ice Company. The reason is simply this: Rembrand is a seal!

He started as a performing seal in vaudeville. One night on the way to the Ed Sullivan show, he took the wrong subway. All night the poor mammal rode the B M T, seeking a helping hand. Finally a kindly brakeman named Ernest Thompson Seguinus rescued the hapless Rembrand.

He took Rembrand home and raised him as his own, and Rembrand, to show his appreciation, studied hard and got excellent marks and finished a distinguished academic career as valedictorian of M I T.

Rembrand never complained to his kindly foster father, but through all those years of grammar school and high school and college, he darn near died of the heat. A seal, you must remember, is by nature a denizen of the Arctic, so you can imagine how poor Rembrand must have suffered in subtropical New York and Boston, especially in those tight Ivy League suits.

But today at the Acme Ice Company, Rembrand has finally found a temperature to his liking. He is very happy and sends greetings to his many friends.

Long time, long time, you get a lot to like with a Marlboro—and with Marlboro's newest partner in pleasure, the unfiltered, king-size, brand-new Philip Morris Commander. Get aboard!

Sprigg Heads AF Squadron

Cadet Lt. Col. Gordon Sprigg, Jr., new AFROTC Cadet Commander.

The Department of Air Science proudly announces the selection of Gordon H. Sprigg Jr. as the new Group Commander. Mr Sprigg presently holds the rank of Cadet Lt. Colonel.

The following appointments were made to the Cadet Group Staff to assist Mr Sprigg in the running of the Cadet Corps. Cadet Major James A. Rogers, Operations Officer; Cadet Major William A. 'Hill' III, Personal Officer; Cadet Major Morton A. Lord, Administrative Officer; Cadet Major Thomas R. Hackett, Material Officer; Cadet Major Frederick W. Harrington, Inspector; Cadet Captain Richard T. Aldinger, Information Officer.

The Squadron 1 Commander is Cadet Major James A. McCarthy. The four flight commanders assisting Mr. McCarthy are as follows: Cadet Captain Charles H Eldred, Flight A Commander; Cadet Captain Roland J. Allen, Flight B Commander; Cadet Captain Stanley E. VanHorn Jr., Flight C Commander; Cadet Captain William R. Benner, Flight D Commander.

The Commander of Squadron 2 is Cadet Major Ronald P. Kilburn. The four Flight Commanders assisting Mr. Kilburn are as follows: Cadet Major Thomas R. Hackett, Flight A Commander; Cadet Captain Richard T. Aldinger, Flight B Commander; Cadet Captain Joseph R. Buley, Flight C Commander; Cadet Captain Vernon P. Fowler, Flight D Commander.

IRC Program

(continued from page one)

Felt teaches the history of that area. Mr. Kritzler spent considerable time in Cuba during the past summer observing the Revolutionary Government in action and has written a series of articles on Cuba for the Cynic.

The IRC was revived by a group of interested students in October and held a similar discussion just before Christmas on Red China and Red Russia. Participating on that panel were Prof. Clayton Lane and Prof. Robert Daniels. A record high audience of over 75 was present.

Because of recent developments in Cuba, the great interest now being manifested in the Caribbean by the U.S., and the presence at the discussion of such knowledgeable panelists, a heavy attendence is expected and encouraged.

Belefonte Singers Called Exciting

by BILL GRANDEY

"I'm glad" tell you 'bout the concert at the Judgement Fare ye well! fare ye well!"

From the "Ox Driver's Song" to the last encore, "Chicka-ma-ma," the Belafonte Folk Singers and the audience in the Memorial Auditorium were together.

Robert De Cormier's inspired direction and arranging have welded twelve voices of solo calibre, augmented by guitar bass, and drums, into an ensemble that performs with equal spirit a panorama of folk music of American (especially American Negro), South American, African, Russian, French, English, and Irish origin, to name but a few. Every man has been educated at college level and all have had wide professional experience in many fields of music and drama. Solo parts are freely distributed, with attention to individual styles and abilities. Tenor Arthur Williams impressed this reviewer especially, although his first solo, on "Red Rosy Bush", was damaged by the inevitable late arrivals to the hall. John Wheeler, tenor, skillfully handled the comic "Frozen Logger," and bass Roy Thompson commanded respect whenever he stepped forward.

The Belefonte Folk Singers were organized by Harry Belefonte in the Spring of 1957, for background purposes only, but [illegible] to the group [illegible] as Belefonte [illegible] that these [illegible] up as a dist[illegible] choral group [illegible] merit." In Fe[illegible] they performed [illegible] fonte for the [illegible] the Village Gate [illegible] and from there [illegible] move to Carnegie [illegible] was one of nine[illegible] on this tour [illegible] and three of [illegible] are available, [illegible] come.

It us tradi[illegible] cially in these [illegible] "critic" to [illegible] negative critic[illegible] cost. No matter [illegible] ing a show may be [illegible] be some point made [illegible] that it wasn't [illegible] suppose that if I [illegible] brain I might br[illegible] up with something [illegible] didn't like about [illegible] fonte Folk Singers. I [illegible] claim that all this [illegible] "authentic" [illegible] meaning that they [illegible] some practicing. I [illegible] object to the [illegible] staging of the numbers [illegible] ground of "authenti[illegible] But I prefer to try [illegible] a new critic trad[illegible] believe I speak for the [illegible] of the audience when I [illegible] that the effect the Belefonte Singers produce is ex[illegible] stimulating, and [illegible] entertaining. Let's let it at that.

SCA To Hold Book Sale

by FRANK DECAVALCANTE

The Student Christian Association has announced that they will be holding their annual second semester book sale before the official opening of school next semester. This sale will be held Friday, February third; Saturday, February fourth, and Monday, February sixth. Any student wishing to purchase or sell second semester texts should be aware that the sale will be held all day on the specified dates. The location of the sale will be at the library of the Student Christian Association house, which is located next to the parking lot of Waterman on Prospect Street. The sale will last from Friday until Monday, and might continue on Tuesday, February seventh if there is a demand; however, students are advised to come as early as possible on assigned dates to get the best selection.

People wishing to SELL books should go to the S.C.A. on either the first or the second of February in order to save time and trouble during the actual sale. Books will be sold for two thirds their original cost minus ten per cent commission for the S.C.A. All types of textbooks-hardbacks and paperbacks will be handled. Also, anyone wishing to donate the sale of a book to one of the functions of S.C.A. would be highly appreciated.

There will be a meeting on the first of February for all interested S.C.A. members who wish to donate their services during the sale. The S.C.A. would appreciate it if the students follow the "first come-first serve" basis. Also, try to make texts as presentable as possible. Finally, again it must be stressed that in order to get the books of your choice, come early, for the supply of books may be very limited.

UVM Receive Electron Microscope

A "first" for the Un[illegible] sity of Vermont will [illegible] scored sometime early [illegible] year. At that time, an e[illegible] tron microscope labora[illegible] will be established in [illegible] basement of the Colle[illegible] Medicine. The laborator[illegible] being made possible th[illegible] the awarding of a Na[illegible] Institutes of Health [illegible] totaling $93,000 to the [illegible] versity. Fred W. Dun[illegible] professor of anatomy, [illegible] be project leader.

With the establishme[illegible] the laboratory, Dunihue [illegible] undertake a project of [illegible] involving the kidney [illegible] heart. With the kidney, [illegible] concerned with the pr[illegible] of absence of a specia[illegible] cell in the filtering [illegible] merulus) part of the [illegible] while in his study [illegible] heart, he is concerne[illegible] the structure of the [illegible] which are believed to [illegible] or spread the elec[illegible] impulses leading to [illegible] chronized heart bea[illegible] electron microscope [illegible] necessary for such r[illegible]

Students will [illegible] taught how to use the [illegible] cope as part of their [illegible] ing which, Dunihue fee[illegible] enrich their overall [illegible] medical background. T[illegible] oratory will consist [illegible] rooms for the pr[illegible] tissues, one for the [illegible] of the microscope and [illegible] for the darkroom and [illegible] facilities.

An electron mi[illegible] compared to the ord[illegible] light microscope, i[illegible] times more powerful, [illegible] ing up to 100,000 [illegible] opposed to about [illegible] the light scope. T[illegible] permit visualiza[illegible] structural detail[illegible] can't be seen w[illegible] microscopes. Every[illegible] filmed for greater [illegible] complex is an e[illegible] that considerable [illegible] is necessary to [illegible]

KAKE WALK PLANS PROCEEDING SWIFTLY

With the arrival of the Vermont winter white-out and the sounds of the [illegible] the traditional [illegible] scenes of UVM's Kake Walk in preparation. The [illegible] and Southwick gym [illegible] utilized every [illegible] minute by worried [illegible] teams and their heart-[illegible]. Various frater-[illegible] and sorority houses are [illegible] preliminary plans for [illegible] and Queen campaign [illegible] fraternities in the [illegible] of writing an accept-[illegible] skit, are beginning to [illegible] in the appearance of the [illegible] office of a musical [illegible]. However, the winter [illegible] planning has prog-[illegible] well beyond the pre-[illegible] stages. Since early last spring the Kake Walk [illegible] has been the scene of [illegible] for the 64th Kake [illegible] on February 23, 24 and [illegible]. This year, America's [illegible] winter carnival has [illegible] evidence of being the most spectacular in its long history. Leading the development of this detailed production are three senior men: Rolly Allen, Bill Carrigan and Dave Howe.

K W directors, left to right: David Howe, Rolland Allen, and William Carrigan.

Roy Allen, a member of Sigma Phi claiming residence in Mirah, N.Y. and NY City, is responsible for putting the weekend on stage. His production details include the ball and jazz concert, as well as the skits and the walking itself.

The man whose job is to bring Kake Walk to the public's awareness is Bill Carrigan of Sigma Alpha Epsilon and Rutland, Vermont. The publicity department has responsibility for all press releases and communication concerning all phases of Kake Walk.

Dave Howe, a member of Phi Delta Theta who makes his home in Tunbridge, Vermont, has the impossible task of filling ticket applications, along with responsibility for all other financial aspects.

Lending able assistance to the Directors is their charming secretary, Judy Hunt, of Pi Beta Phi and Burlington. Faculty assistance is given by Dr. Fred Marston and Gordon Paterson, UVM's Assistant Treasurer. Also assisting behind the scenes and doing the leg work for the Directors are Gabe Jaffe, Joe Levin, Al MacLean and Ralph Matthews, Assistant Directors.

As February 23 quickly approaches, the activities in the Kake Walk Office will be ever increasing until the crowning of the 1961 Kake Walk King and Queen, the sounds of one of America's leading big bands and that climatic moment when the first walking team steps down the floor to the tune of "Cotton Babes."

Three KW Skits Selected

The Kake Walk Directors have announced that Phi Sigma Delta, Sigma Nu and Tau Epsilon Phi skits have been accepted for production at the 64th Kake Walk, February 24, 25. Phi Sig's "Once a Knight", Sigma Nu's "There's Charles?", and TEP's "Great Robbery" all promise an entertaining evening of laughs and unusually keen competition.

This year the point judging system has been somewhat altered, placing more emphasis on continuity and originality and less on properties and costumes. This change plus others in the financial area will allow for wider participation of all fraternities in the future.

One-Stop Shopping makes it easy to make the right buy at your Chevrolet dealer's!

No need to look farther than your Chevrolet dealer's to find the car you're looking for. There under one roof you can pick from 30 models—almost any type of car for any kind of going. A whole new crew of Chevy Corvairs for '61, including four wonderful wagons unlike any built before in the land. Thrifty Chevrolet Biscaynes, beautiful Bel Airs, elegant Impalas and six spacious Chevy wagons—all with a Jet-smooth ride. Come in and choose the one you want the easy way—on a one-stop shopping tour!

CHEVROLET

New '61 Chevrolet IMPALA 2-DOOR SEDAN

Here's all anyone could want in a car! One of a full line of five Impalas with Chevy's sensible new dimensions, inside and out.

New '61 Chevrolet 4-DOOR BISCAYNE 6

NOW—BIG-CAR COMFORT AT SMALL-CAR PRICES

These new Biscaynes—6 or V8—are the lowest priced full-sized Chevies. Yet they give you a full measure of Chevrolet roominess.

New '61 Corvair 500 LAKEWOOD STATION WAGON

One of Corvair's wonderful new wagons for '61, this 6-passenger Lakewood gives up to 68 cu. ft. of storage space.

New '61 Chevrolet BEL AIR 2-DOOR SEDAN

Beautiful Bel Airs, priced just above the thriftiest full-sized Chevies, bring you newness you can use. Larger door openings, higher easy-chair seats, more leg room in front, more foot room in the rear.

New lower priced 700 CORVAIR CLUB COUPE

Corvair brings you space, spunk and savings in '61. Thriftier sedans and coupes with more luggage space. That rear engine's spunkier, too, and there's a new gas-saving rear axle ratio to go with it.

See the new Chevrolet cars, Chevy Corvairs and the new Corvette at your local authorized Chevrolet dealer's

Editorial: The "Greeks"

Before the next issue of the CYNIC appears a good percentage of the freshman class will have rushed and pledged fraternities or sororities. Good arguments can be advanced both by those urging that one join Greek letter groups and by those urging that one not join. It is our purpose here to bring forth some of the arguments for both sides. It is not our purpose to make the freshman's decision for him. The question of whether or not to join a fraternity or sorority is one which must be decided by the individual himself.

LEADERSHIP

Fraternities and sororities claim to build leadership. This claim is supported by the fact that the majority of the student leaders on this campus are Greek-affiliated.

SCHOLARSHIP

The average of the "Greeks" is generally above the all-student average. This would seem to indicate that the scholarship of these Greeks is above that of the "independents". Last semester, however, all men's averages did rise above the fraternity average. Though the "Greeks" do usually stand above the all-student average, the vast majority of the truly intellectual students on campus prefer to remain independent.

SOCIALLY SPEAKING

Socially, a fraternity or sorority is nearly a necessity. All-student social activities at the University of Vermont are so few that the independent has almost no opportunity to practice the "social graces". "Big" weekends such as Homecoming and especially Kake Walk are almost entirely "Greek" affairs. Granted, the "independents" is welcome at the public functions, but he misses out on much of the spirit of the weekend merely because he is independent.

On the other hand, despite pious assertions to the contrary, most of the fraternities and sororities on campus continue to exclude students because of race, color and religion. The written laws requiring this have been stricken from the books; as yet their effect has not been much decreased.

THE HOUSING QUESTION

There is one strong though selfish reason for seriously considering a fraternity or sorority. As everyone knows, women who do not live at home must live either in a sorority house or in the women's dorms. It is to be assumed that by far the more agreeable alternative is to live in the sorority house. This same situation will soon apply to the men students. When the new men's dorms are completed, probably by the beginning of the second semester of next year, only Senior men will be permitted to have off-campus apartments. Sophomore and Junior men will have the choice of fraternity houses or the men's dorms. By far, the more attractice alternative is the fraternity house.

The CYNIC does not wish to make the decision of whether or not to join a fraternity or sorority for any student. This is a decision that can be made only by the individual concerned. We would urge that any person even remotely considering the possibility of "going Greek" complete the entire rushing process. While rushing he should carefully consider each and every group, with its advantages and disadvantages. This rushing process, confusing and tiring as it is, will give the Freshman the facts and background he needs to make an informed decision. The decision, then, will be his.

DEAD? WEEK

In this year's Date Book the appropriate spaces for the current week are marked with the words "DEAD WEEK." The "green pages" of the same date book inform us that "During the period of seven days immediately preceeding the beginning of the semester examinations, by action of the Student Association Council, no extracurricular activities may be scheduled." Yet we find a basketball game, a Lane Series presentation, an S.A. movie, an International Relations Club program and even an issue of the CYNIC during the week.

Academic Dead Week, we are told, died a necessary though regrettable death several years ago. Now, it would appear, the non-academic aspects of Dead Week are suffering the same fate; this despite the SA regulation curtailing extra-currics.

We mourn the passing of Dead Week. Serving the same purpose as Lent, Dead Week was a period of mourning and meditation before the awful moment of Final Exams. If nothing else, the period allowed a moment of quiet introspection. Now there is not even that.

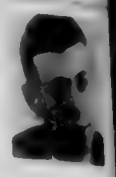
Letters To The Editor

Con Kritzler

Dear Editor

I wrote an editorial in the Dec. 8 issue of the CYNIC asking Mr. Kritzler a few questions in relation to Cuba. It seems he tried to answer two of these, but failed. The rest he could not answer because he doesn't know the situation as it exists (if he thinks he does, I'd be glad to debate him). Likewise for the CYNIC to state that Mr. Kritzler's column was his own work was a fallacy. The truth is Mr. Kritzler PLAGIARIZED major portions of his column, even to the extent of using other persons's works verbatim. This is a strong charge, but I will back it up and expose part of the KRITZLER HOAX within this short space. Here are his sources and their implications:

1. Two examples of Plagiarizing verbatim----
 a. Nov. 10 CYNIC page 5, same as in article "Cuba" by S. Shapiro on page 9 in *New Republic*, Sept. 12. Mr. Shapiro is definitely pro-Castro.
 b. Dec. 15 CYNIC page 11, last para. same as last para. on page 362 of *"The Nation"* Nov.12, an article by Carleton Beals on Cuba.



Now, Carleton Beals has been the subject of articles at least 4 times in the *Daily Worker* (the former Communist mouthpiece in the U.S.): and has been an influential mover of several leftist organizations, such as the "Legislative Conference for Legislation in the National interest. In addition, he is listed in the 1956 Comm. for Un-American Activities (House of Rep.) report on "Communist Political Subversion" Lastly, *The New Republic* and *The Nation* magazines are questionable reading materials.

2. The "Student Council" or "The Fair Play for Cuba Comm." in the United States also supplies him with much information. The latter is now under suspicion and investigation by the F.B.I. and the Senate Judiciary Comm.; as to its probability of being a leftist front organization. One of this organization's "prime movers" is a Mr. Laundis of the Un. of Wisconsin, who writes "Studies on the Left."
3. Mr. Kritzler constantly printed a mass of twisted facts to misrepresent the true circumstances as they really are. An example of this is in his last column under the heading "Cuban Relations with the Soviet Union".
4. Mr. Kritzler doesn't know Spanish too well, and moreover he cannot become a specialist on a country in 2 or 3 months.

"In closing, the Kritzler affair is part of a well organized plot that is nation wide, and with the objectives to deceive and poison the minds of the American College youth. Daniel Waine '61, who wrote an anti-American editorial (Dec. 15 CYNIC) was succumbed to this venom. I personally asked him where he got his information-his reply- "Eddie told me, Eddie says so, Eddie was in Cuba, and Eddie is right." I sincerely

(continued on page five)

The Melting Pot

By ROGER ZIMMERMAN

Last month, a daily college newspaper [illegible] editorial entitled "Frats vs. Philos". Very [illegible] the article dealt with the idea of "a typical [illegible] fraternity today as being a demonstrable expression [illegible] democracy in action . . . of its being a bulwark [illegible] the spread of Communism and socialism on the [illegible] Lightly sprinkled with quotations by arch conservative Barry Goldwater (Goldwater had given an address [illegible] members of the National Interfraternity [illegible] the editorial reeked of a peculiarly stale anti-[illegible] sive fume.

The very title of the editorial is nothing [illegible] stupidity. How can fraternities as opposed to [illegible] phies be the least bit logical, when fraternity [illegible] is a distinct philosophy. The article quotes [illegible] as saying "where fraternities are not allowed [illegible] nism flourishes". He pointed to Harvard as a [illegible] where "communist and socialist philosophies are [illegible] mitted to breed a faithless generation". Aside [illegible] the fact that this accusation is a gross exaggeration [illegible] if not entirely wrong, he fails to mention Harvard [illegible] the university that consistently turns out many of the [illegible] country's leading minds in a host of fields. He fails [illegible] to mention that Harvard is looked upon by much of the [illegible] free world as the most outstanding of America's great [illegible] universities. And Goldwater makes no reference to the [illegible] fact that our president-elect has filled his cabinet [illegible] with several Harvard-educated men. Relative to his [illegible] remark about a faithless generation, Goldwater obviously [illegible] equates faith with agreement-agreement with his "give [illegible] me-the-good-'ol-days" ideas.

DISTORTED VIEW

The newspaper editorial, for all practical purposes, [illegible] put communism and socialism on the same plane. That is [illegible] wrong. The two isms have some fundamental differences. [illegible] Goldwater and the article seem to ignore history. In [illegible] their effort to thumb their noses at all leftist policies [illegible] cies and ideals, they became rigid within their beliefs. [illegible] The socialist tendencies in our government are not [illegible] they are a result of a constant growth and trend. The [illegible] editorial, so intent at showing how fraternities must [illegible] stop all "subsersive" activities, was permeated by an [illegible] atmosphere of insecurity, and I think, disbelief in the [illegible] ideas it attempted to express.

Taking a somewhat logical approach to the article, [illegible] how could fraternities stop socialist ideals from [illegible] flourishing when in many respects the fraternities [illegible] themselves are socialist organizations - at least in [illegible] theory, if not in practice. Here we are dealing with [illegible] organizations which supposedly pride themselves on the [illegible] creation of a "third being" - a something more than [illegible] the sum of the parts. In order for this "something [illegible] more" to emerge, the members must obviously believe [illegible] wholeheartedly in the ideal, and they therefore must [illegible] give of themselves so that the "third being" will have [illegible] substance. In this creation of a limited state, all [illegible] members must function, to an extent, for the good of [illegible] the house-the house being the rather nebulous "third [illegible] being.

ONE OTHER THING

One other point should be mentioned. It is important [illegible] for it has much meaning for our generation-a generation [illegible] which has been called a whole gamut of names, from [illegible] to quiet. Let me, then, quote a full paragraph [illegible] from the aforementioned editorial:

"At any college campus, there are many opinions [illegible] around among the students concerning the good and [illegible] points of world philosophies. Communism and socialism [illegible] are among the most widely discussed philosophies [illegible] side of democracy, in college campuses.

"There is nothing particularly wrong with discussing [illegible] these philosophies, as long as all a person does [illegible] ends and work begins on fostering these ideas as truth, [illegible] then it does become wrong."

If we were to follow the advice implied in the [illegible] quoted paragraphs, our generation could quite easily [illegible] be called the "stagnant generation". Those two [illegible] graphs draw a picture which could be appropriately [illegible] tioned, "little boys should talk, but not act". The [illegible] ideas presented in those quoted paragraphs exist on an [illegible] absolute standard. But that is a mistake, for we live [illegible] in relatives. What one person considers sacred [illegible] another would not. What belief one person lives by [illegible] another makes the core of his life.

Now, perhaps more than ever before, today's youth of [illegible] the world over must not only talk about what he believes [illegible] in, but must also act on his beliefs. And this does not [illegible] necessarily involve cloak and dagger situations [illegible] the violent overthrow of the existing government as the [illegible] goal of the belief. This action in support of ideals, [illegible] contrary to the subversiveness which the editorial spoke [illegible] about, will make for a stronger free world-a free world [illegible] for all ideologies.

Why Not ?

by JULES OLDER

suggestion to abolish compulsory ROTC ... been largely ignored by the administrators ... I'll present a few counter-proposals. Through ... to show how the system can be beat without ... moved, since destruction doesn't appear fea... this point.

... idea requires the support of athletic coaches, ... fans, and team members. IFC Speaks

Letter to the Editor.

It is not my policy to criticize fellow students who make mistakes when writing for the CYNIC. This policy has come to a halt since the last issue of the CYNIC was published. There have been ... past editorials which have criticized both the IFC and the fraternity system in general, and many of these criticisms have been valid. I have not felt that the impact of these past editorials has been severe enough to warrant a letter to the editor.

In the new limited Sports section of the CYNIC, there is space allotted for what is commonly called in most university newspapers, a Sports Column. It is my belief that the Sports Column should deal with athletic issues and not IFC Rushing Rules. It is not the job of the Sports Editor to explain the Regulations which are set up by the fraternity system in regard to rushing procedure. There were several changes made in Rushing which were not announced in the Sports Editorial, and Freshman who were influenced by reading this trivial section of the CYNIC did not receive the correct information.

Furthermore, it was announced that "at 6:30 the frosh basketball team plays Middlebury College in the gym. This game will not be over until at least 7:30, 15 minutes after the scheduled rushing meeting was to begin. Remember, this is your class. The last minutes of a basketball game are usually the best, and Middlebury promises to be a close contest." This statement or announcement absolutely false, especially the part about the Middlebury game. There was no Freshman game scheduled at this time, and all indications point to the fact that our "Sports Editor" was using an outdated sports schedule. I would also like to make it known that the IFC planned the meeting so that it would end 15 minutes before the scheduled varsity game against U. Conn.

Stan went on to state, "It does not sit favorably with upperclassmen when the Frosh they have their eyes on, not only don't appear at the Varsity game, but fail to support their own freshman class at all." In regard to this statement, I don't understand how one person may state that upperclass fraternity men in general have this feeling. This may be the opinion of the author, but does not extend to all fraternities. Freshman do not have to concern themselves with Stan's remark, but maybe Stan took attendance himself at the game, and intends to keep his eye only on the Freshman present.

This has been a rather long critique, but I feel that I had to empty out my thoughts before they burst forth in an unorderly and uncontrollable manner. We on the IFC are trying to do a job, and it is a difficult one, but when we are up against such irrational and misinformed writers, it makes our work even harder.

Bob Goldman, President
Interfraternity

"Compulsion" SA Movie

Compulsion, one of the finest movies to be presented this year, gives a fascinating evocative insight into the 1920 sensational Loeb-Leopold murder case.

The story is centered around the fanatic scheme of two wealthy young law students at the University of Chicago Judd Steiner and Artie Strauss -- portrayed by Dean Stockwell and Bradford Dill... ... mad to commit the perfect crime. This plan includes kidnapping a fourteen year old boy, Paulie Kessler, killing him and dumping his body in a culvert.

Actors open to ovation in this film include Orson Bellos who creates a fetching caricature of the great defense lawyer, Bradford Dillman as the senseless frenzy free college student and Dean Stockwell, who dominates the drama with his intensity and insight which do much to explain the character's homosexuality and do something to clarify his fearful crime. Supporting actors include Diane Varsi as confident of Stockwell and E.G. Marshall as prosecutor.

The SA Council will present this exciting thriller Saturday night, January 13, at 8:00 in Southwick. Take a break from exams and be sure to see this movie.

NOTICE

If articles for this section are to be printed they must be typewritten, may be rejected if typewritten, and handed in by three o'clock Friday afternoon.

CLOUD NINE

Congratulations go out to Sue Manhera, ADPi, '62, and Dave Street, Phi Delta Theta, '61, on their recent pinning. Mary Gaughran, Sigma Nu, '62, and Lois Engelmann, Kappa Alpha Theta, '63, who were joined over vacation, warrant our best wishes too.

Two couples are to be congratulated on their engagement: Nancy Breiner, ADPi, '62, to John Breed, Sigma Phi Epsilon, '59 and Jean Humphreys, ADPi, '62, to Pete Muria. Also we say best wishes to Joan Myers, Delta Delta Delta, '62, and Mick Manning, '61, who became engaged before vacation.

ALPHA CHI OMEGA

We would like to congratulate Nancy Davis and Rose Keegan who recently became sisters. Welcome to the fold. We all had a grand time celebrating at the Harbor Hideaway.

Everyone at 384 Main is just thrilled, since we won the stereo set! We had collect thanks to the efforts of various and sundry people around the campus and even others. All besos. This is an all time high, we've been told. At any rate - we're going to have a Sherry Party in the near future for all those people who have contributed besos. So stay tuned - and we'll let you know about the date.

ALPHA DELTA PI

Bill Christmas firmly behind us and exams rapidly approaching the house has taken on the busy hum of clattering typewriters as those last minute papers come and hopefully go. With all this activity we have only one major problem, the light bulbs keep disappearing. Actually, we're on a little economy drive and the chief bulb snatcher seems to be in the person of our treasurer, reasoning that you can't waste electricity if you don't have light bulbs. We may even save money; of course, it gets pretty expensive having the furniture refinished to get all that candle wax off.

We would all like to thank our alumnae for the Christmas party which they gave us just before vacation. The refreshments were extra good and we all had a wonderful time. Thanks, a little belated I'm afraid, also to the actives for our pre-vaca tea parties.

DELTA PSI

Before revealing the latest news of what is going on at Delta Psi, all the members of the house would like to extend best wishes for a Happy New Year and a rewarding spring semester to everyone at UVM.

Kane Hall is fast approaching and there is the usual preparatory discussion and activity. Jack Alger and Ralph Gurdull, our two veteran oarsmen, have been working out diligently since October.

For those avid followers of the world of sports, Fred Hafferman is taking up winter quarters here. Also in the sports vein, our ice rink is taking form under the able guidance of Tim Lugetti.

GAMMA PHI BETA

Best wishes to Anne Wakefield, '61, whose Christmas was made merrier by a diamond . . . she's now engaged to Dick Bailey, '61, of St. Michael's College.

Mid the holiday festivities was our annual Christmas caroling with Sig Ep. In our rented truck we cruised around the greater Burlington area until the transportation was confiscated. After our serenade was over, we retreated back to the house for some much appreciated hot coffee. Thanks to Jack Danyos and our patient driver, Chris Collins. A new event on our Christmas calendar this year was an egg nog party in "Woodpecker Alley" which was hostessed by Joan Meyerhoff, Muriel Mills and Mary Lou Olcott.

Congratulations to Marg Knandel who was just initiated into Alpha Lambda Delta. And also to Lois Lorand who was elected President and Mary Langlois who is this year's treasurer.

KAPPA ALPHA THETA

By now, all the Theta's have resigned themselves to the horrible reality of classes, dead week, and, ugh, exams. But, everyone is cheered by the fact that there will be three or four days intersemesters vacation before the long anticipated rushing period.

All were pleasantly surprised when Eunie returned with her most favofite Christmas present Bill, oops, rather her diamond. It's really lovely and best wishes to both from the Thetas. Happy New Year! said Mike Cosgroves as he pinned Lola.

Hermene, B.J., and Nancy Arnold Gorman will be returning soon.

There has been a recent combat between the [illegible] SAE's due to [illegible] various articles [illegible] composites and [illegible] Theta's at 11 [illegible] ranted a trial of five [illegible] SAE brothers. The [illegible] the appeal of [illegible] the judge, re[illegible] acts of benev[illegible] brothers, such as [illegible] pledge project 1958, [illegible] lending, etc., [illegible] water fights, [illegible] wee hours, etc. [illegible] of nothing to do but pass [illegible] charge of GUILTY [illegible] being wonderful n[illegible]

PHI DELTA THETA

All the Phi's have returned to the Marble Palace after the vacation and are presently "booking it" for final exams.

Bob Billings and Mike Metterer, his able assistant, are working hard on rushing plans and seem to have everything under control. Their plans call for a few surprises.

On the romantic side, Dave Kirker has parted with his beloved and treasured Phi Delt pin, which now can be seen in the person of Shoemanbeck of Alpha Delta Phi. Congratulations and best wishes go out to them from all the Phi's.

PHI MU DELTA

Phi Mu Delta is once again in the winners column. CLOBBERED Acacia in basketball with a score of 36-[illegible]. This amazing feat upped the boy's morale after being EDGED by such fraternities as Sig Ep 38-8. Our boy Hotshop Welch, came through with a total score of [illegible] points. D-d-- Good job.

During vacation, we sanded and varnished most of the floors on the ground floor. It seems nice to be able to see the wood on the floors instead of several layers of various colored varnish. The floors look so good that we haven't walked on them yet. Going to keep them for [illegible] I guess.

Speaking of vacation, nearly everybody got home safe, sound and somewhat fat. The only exception is Brother Bert Mongeon. He has a badly injured back. Claims he fell on a New Years party.

Prior to leaving school for vacation, we sold Christmas trees at Gaynes. Our profits totaled $50. We had lots of fun even though we almost froze to death.

December 17, we and our dates went caroling at several old peoples homes here in Burlington. Afterward we all returned to the house for dancing and warm refreshments. John Black and Bunker entertained with selections on the piano and the trumpet.

PI BETA PHI

We hope everyone had a nice vacation and came back rested and ready for exams. Or rested just ready for a change of scene.

Congratulations to Sue Hentz who was pinned to Bill Maynes of Sigma Nu, the occasion at which the event took place was Sig Nu's winter formal. Congratulations are also in order to Barb because of her recent initiation into Alpha Lambda Delta. Alpha Lambda Delta is a national honorary society who receive a high honor in their freshman year.

Our Olympic volleyball team after practicing [illegible] day, was finally able to [illegible] the W.R.A. champion[illegible] sia awaits your arr[illegible]

Salem refreshes your taste

"air-softens" every puff

"Take a puff ... it's Spring!" That's what smokers say about Salem because its smoke is as softly refreshing as the air of a springtime morning. Special High Porosity paper "air softens" every puff. And Salem's fine tobaccos make Salem taste rich as well as refreshing. Smoke refreshed pack after pack ... smoke Salem!

•menthol fresh •rich tobacco taste •modern filter, too

Society

[illegible] to have Mrs. [illegible] as in the absence [illegible]

SIGMA ALPHA EPSILON

[illegible] ation brought [illegible] to Bill Mazza, [illegible] Paul O'Connor, [illegible] who had operations.

[illegible] for Christmas [illegible] Dan Clifford and [illegible] Ryan of the [illegible] ment. We enjoyed [illegible] men as guests, [illegible] for coming.

[illegible] let's settle down to [illegible] studying, we would [illegible] everyone the best [illegible] their finals.

SIGMA PHI EPSILON

And strains of "O Holy [illegible]" and "Jingle Bells", [illegible] and Gamma Phis went [illegible]. Long walk home, [illegible]?

The [illegible] men ran away with [illegible] last game winning the [illegible] championship. Bring on [illegible] SAE's.

Tony Smart, as he stepped [illegible] from a Hawaii bound jet, [illegible] several Mai-Tais and later went hunting on the Parker ranch and bagged a wild boar.

The New Year saw a brand [illegible] lock to our dining room. [illegible] Jay Harvey green paint has been removed.

Congratulations to the [illegible] team for winning another game. The game could have gone either way, but Sig [illegible] after a tid game rallied [illegible] beat TEP in the extra frame.

Ballet

(continued from page one)

[illegible] of this selection who seem to skate across the stage are Sharon Lane, Annette Page, Antoinette Sibley, Brian Shaw, and Donald MacLeary. During the evening the orchestra will be conducted by the principle conductor, John Lanchberry.

This is an opportunity for those who are avid ballet fans and for those who aren't since the Royal Ballet is of [illegible] world renown. Among the ranks of this organization are several famous ballerinas, whereas many ballet companies only have one or two. In trying to fit Burlington into their schedule the Royal Ballet must leave early on Friday in order to perform in Boston the next day, so that Friday night's performance will begin at 8:00 P.M. and not the usual 8:30.

REMEMBER, THE ROYAL BALLET BEGINS AT 8:00 P.M., NOT AT 8:30 AS IS LISTED ON THE TICKETS.

Tuesday, Wednesday, Thursday, February 7-9 --
Formal Parties By Invitation

Times 7:00 - 8:30 p.m.
8:45 - 10:15 p.m.

Dress: Stockings, heels, "party dress" (not formal)

Friday, February 10 --
Panhellenic Balloting

Time 7:00 - 10:00 A.M.
Student [illegible]

NO BALLOTS WILL BE ACCEPTED AFTER 10:00 A.M.

Saturday, February 11

Bids will be delivered by Panhellenic. Girls in the dorms will receive theirs by 12 noon. Town girls will be notified by telephone.

For the first time on this campus there has been instituted a Rushing Fee of 75¢ in order to partly defer Panhellenic's Rushing expenses. This fee will be collected from every rushee at the meeting at Southwick on Monday, January 30.

Each Rushee is reminded that an average of 72 must be octained before a girl can be pledged to any sorority. However, there is *no rushing average*.

It is to the rushee's advantage to participate in all rushing functions even though there is volunatry attendance after the guided tours. Every girl who is to continue rushing must visit each of the seven sororities on the days of the guided tours. Excuses will be granted only in case of sickness or emergency at home.

Panhellenic wishes also to stress the importance of the optional meeting on Wednesday, February 1 when the members of the Council will be available for questioning.

Rushees should refer specific questions concerning sororities to the Panhellenic Council members, to the Panhellenic dorm representatives, or to Dean Harris. For general rushing questions the rushees should consult their 1961 Panhellenic Handbooks.

Exodus

(continued from page one)

for approximately nine weeks until Thanksgiving, which falls on a Thursday. The University allots Wednesday off in order to give the student time to get home. However, mass cutting results and many people leave as early as the previous Friday. Classes resume the Monday after Thanksgiving and then there are three more weeks and another premature exodus occurs before the Christmas holiday, which lasts two weeks. We return for about another three weeks including finals, and then break again for ten days of intersemesters. Second semester begins and before we know it the excitement of kake walk rolls around. As soon as that's over Spring Recess begins and another series of mass cutting. We return for six weeks and finals begin again.

President Fey said that in the past mass cutting has "disrupted the entire organization of the university." Action is being taken now by the trustees and faculty to present a better schedule for the entire school session because there are too many vacations during the academic year and not enough periods of serious concentration.

Nothing definite has been decided yet, but there have been a number of proposals to exclude the five day Thanksgiving break from the University calendar. A tri-semester program has been suggested in which the first semester would end before Christmas vacation. Second semester would begin the first week of January and end before Spring recess. The third semester would begin right after this break and and the beginning of June. Dartmouth follows this program. Under this system the student would only take three courses a semester which would allow for a greater concentration in each subject with more library work. Another idea was to allow only one day for Thanksgiving and then a longer Christmas vacation, as Harvard University does.

No final decisions have been have been made yet as to a replanning of the University calendar, but action is definitely being taken to end the incidences of mass cutting before vacations.

Will the person who picked up my Greek, hard-cover UVM notebook in the bowling alleys Thursday, please return it. The notes in it are very important. Thank you.

Sports Questionnaire

by MIKE ZELTZERMAN

QUESTION:

Do you think that a new third league in baseball would commercialize our national sport?

BOBBY HOBBS '61

"[illegible] would [illegible] a [illegible] ever, I [illegible] the quality of the players will be as far [illegible] those of the [illegible] as we know them now. You would be strengthening the third league with some ball players from the two major leagues, but I don't think that the remainder of the rosters can be filled adequately."

MIKE ADESS '62

"No, but I do not think it will better the sport any. It will degrade it."

BARBARA BUBAR '64

"[illegible] it will provide more competition, and competition [illegible]."

BOB KATZ '62

"[illegible] a league will be [illegible] commercialize baseball."

DIANE CONSTANTINE '61

"[illegible] will provide its own [illegible] and simultaneously [illegible] interrupting advertisement. The concentration of good players per team will be so spread out that it will become boring."

CAROL MABLE '64

"Yes. Now baseball is controlled pretty well by big business, and adding a third league would be like adding a third member to a corporation."

'Mural Mirror

by RICHARD RAPPAPORT

[illegible] the final week [illegible] the intramural basketball season three of the four leagues have already been decided while the fourth is [illegible] record is possible [illegible] last [illegible] the last game [illegible] the season.

The three league titles have been won by Sigma Phi Epsilon, Quimby's, and the Knights. The capture of the title in League B by Sigma Phi was accomplished with their overwhelming victory of 51-21 over Acacia. In League C Quimby's with its 3-0 record has finished its regular schedule with a one and one half game margin over both Converse A and Wills. League D finds the Knights in first place by the scant that resulted from the playoff victory 42-35 over Thurstons, which was necessary to break the first place deadlock which had existed between them. The one close race is in League A between first place Sigma Alpha Epsilon, and second place Phi Sigma Delta, with only one half game separating them, and SAE having 2 engagements remaining on the schedule while PSD has three.

Today the Fraternity playoffs pairing the winner of League A against the first place team of League B (Sigma Phi Epsilon) and the Independent playoffs pairing Quimby's the highest finisher in League C against the Knights top finisher in League D will take place today. The two victors of Thursdays games will meet for the A II Campus Championship on Friday.

Upset

(continued from page eight)

again tied up as Vole did the same for Ullman. Shabel [illegible] from the foul line, Crutchfield one. 77-76 Vermont. Zingg hit again for 2, and Becton put the [illegible] beach ad with a free throw.

UVM clearly won this game from the foul line, hitting 26 for 44, while the Redmen hit only 16 for 30. Much credit should be given to Mentor Evans, for his fine job of coaching the Cats to their victory. The halftime score was 38-38.

Halftime Massachusetts 38, Vermont 38
Officials: Vanderhoef and Hart.

This was Vermont's second victory of the season, their first being over the University of New Hampshire 65-59, on December 13, at Durham. There too, the score was tied at halftime, 24-24. Becton again led the scoring column with 18, while Ader was second with 17. Zingg had 13. The high man for UNH was Harken, with 24.

Two days later, in their first home game of the season, a large crowd witnessed the Cats' defeat at the hands of UConn, 84-73. At the half, the Evansmen led by one, 45-44. Becton was high scorer with 25, while Zingg and Shabel had 13 and 12 respectively. King was high for UConn with 18, while Haines had 17.

The next game the Cats play, is against Middlebury Panthers, at Middlebury, on January 14. The next home game, is against UNH on February 4.

FROSH WIN

by Mike Steinberg

The undefeated Freshmen Five continued their winning ways tonight by defeating Champlain College for the second time, 69-44. This makes five in a row for the talented Kittens. Led by the fine play-making and shooting of John Hatcock, and sound rebounding off both boards by Dick Lawson and Dave Strassburg, the Frosh Quintet rolled up a 37-23 half-time score, which provided enough of a cushion for sub-coach Norm Strassburg to clear the bench in the second half. Three men scored in double figures. Lawson and Hatcock both hit for seventeen, with Strassburg getting twelve. The remaining points were thrown in by Glick (4), Rundle (4), Torch (4), Gallagher (4), Greer (2), Fitzgerald (2) and Suskin (2).

Although the score shows a runaway, the Kittens looked very sloppy at times, making wild passes, taking bad shots, and just not thinking.

VERMONT 80, REDMEN 76

Cats Drop 2 To Rams

by JONNY KAPLAN

Led by Charlie Lee and company, the Rhode Island Rams swept by the Catamounts for two more Yankee victories. The Cats dropped the two games at Memorial Auditorium 80-69, and 75-48 respectively.

In the first encounter on Friday night, the Cats pulled into a 4-0 lead before the roof fell in. The Rams then started popping in long outside shots over the tight Vermont zone. The Cats were trailing 14-4 before they could hit for another point. With Rhode Island steadily hammering away, the Cats were on the short end of a 48-37 halftime deficit. With three men converging on Benny Becton the Vermont scoring and rebounding ace, he was pretty well bottled up the first half on the boards and from the floor.

The second half was pretty much like the first with the Rams going ahead by 22 points until the Cats narrowed the margin to 15 with three minutes to go. At this point both coaches cleared their respective benches.

Vermont's one bright spot was sophomore Jack Shabel. Jack netted 26 points mainly on jump shots from around the key. He also hit 12 out of 14 from the foul line. Also playing a very fine game was Captain Harry Zingg. He scored 18 points on long sets and driving lay-ups.

In Saturday night's encounter, the Cats played a fine first half before they fell apart at the seams. Rhody's outside shooting, which had been so effective Friday night, was given a rush by a tightened Vermont defense. The teams went into the intermission with URI, ahead by one point, 33-32. The Cats tied it at 34 all, on Becton's one hander from the corner. They were unable to score however, for the next six and a half minutes. The Rams jumped ahead 58-35 before Becton was able to hit for another field goal. The score rose to 66-37 before Coach Evans cleared his bench. The final tally was 75-48. High man for the Cats was Becton with 17.

Now is the time to get out and support your team.

Evansmen Upset Favored UMass Five In Overtime

by STAN

They said it couldn't be done. Nobody thought UVM could possibly defeat the powerful Redmen of Massachusetts, especially after the Cats' dual defeat at the hands of the URI Rams last week. Without a doubt, this was a game for the books. The only time there was more than a four point difference in the score, was midway in the second half when UMass took the lead by seven, 53-46. A short 2 minutes later, the Green and Gold was out in front again, 60-59.

The Redmen used a 1-2-2 zone, but Coach Evans faced the challenge by using varied passing and fast breaks.

Ben Becton, 6'2" Vermont ace, pulled down eleven, while racking up 25 points, 7 of which were from the foul line. Ader scored 24, hitting 10 from the line, while Shabel and Captain Harry Zingg racked up 14 and 12 points respectively.

For the Redmen, Crutchfield was high with 22, followed by Leslie with 20, Mole with 12, and Wheeler with 11.

The score of the game was tied up 18 times, with the Evansmen holding the edge 13. Pete Beck, the tallest man on the squad at 6'5", played what is perhaps his best basketball of the season. Beck and Shabel worked well from the corners, with Zingg calling the shots from the backcourt.

Coach Evans employed a 2-1-2 zone, with Becton playing the middle. The Cats simply outplayed and out-hustled the Redmen. The scores at which the game was tied are as follows: 6, 8, 10, 12, 13, 15, 17, 21, 26, & 35.

Becton tied up the score at 69-69 with a minute to play with a one-handed shot from just off the key. UMass controlled the ball the remaining minute, failing to score.

Vermont took a 73-69 lead early in the overtime. The Redmen tied it up. Zingg scored in a lay-up, and the score was

Cats To Face Panthers

by STEVE SOHN

The big question dealing with the Middlebury-UVM game coming up on January 14 is, "Will UVM do it again?" Ever since the series was inaugerated, back in 1918, UVM has held the edge in games won. The series record against the Panthers has been UVM 50 and Middlebury 26. Last year the Cats took the Panthers twice, 87 to 72, and 71 to 63.

To date the UVM cagers haven't been making a very good showing. This is due to our two main problems,--lack of experience and height. As far as experience goes, the only returning lettermen in Fuzzy Evans' [illegible], number three, a very unfortunate number. The other nine players (all sophomores), whose height hovers about 6' are all good men, but lack the experience of playing varsity college basketball. The team has the necessary confidence, which is more than half of the battle. And, if we hold together in both halves we should add another win to the record.

So how will it go? All we can do is take a look at the facts, and hope for the best. One of the most important things we can all do is get out and cheer for our team. So let's back our team to another victory over the Panthers.

Keeping an eye out for the Panthers.

Les Brown And Band Play For 64th Kake Walk Ball

Brothers Four, Kai Winding Star In Jazz Concert

After an outstandingly successful out-door show during last year's Senior Week, The Brothers Four have been signed for an encore performance at the Kake Walk Jazz Concert February 24 in response to persistent student demands. These four young gnetlemen are the first nationally prominent entertainment group to ever obtain a return engagement to the Vermont campus within one year.

Success stories are always exciting in the entertainment world, but the skyrocketing success of The Brothers Four is remarkable even by show business standards. Just a little over a year ago, Dick Foley, Mike Kirkland, John Paine, and Bob Flick, brothers in Phi Gamma Delta, fraternity, started singing together just for fun at the University of Washington in Seattle. Then they began to sing in public. The response to their refreshing, relaxed, yet enthusiastic style was overwhelming.

In choosing their material, the Brothers pick songs which naturally seem to lend themselves to an enthusiastic, collegiate kind of performance. Many of these songs come out of the American folksong and ballad repertoire: honest, full, and emotional songs which become even greater and more meaningful when sung with honesty, belief, and dedication.

They hit the big time with their first professional job at the hungry i in San Francisco, where they were spotted and signed by Mort Lewis, manager of Dave Brubeck. Within six months they had a Columbia contract and one of

The Kake Walk Ball Thursday, February 23 will be the scene of the musical performance of Les Brown and the Band of Renown, winner of every major dance band poll.

The Les Brown band is one of the few remainders of what bands were like during their golden period of the late thirties and early forties. As the best of that era, the Brown band of Renown bears all the happenings of distinction, professionalism and outgoing pride, and most importantly, a cohesive voice it can call its own.

More of a dance band than anything else, it has not been ensnared by its very function, and has always managed to be something more. Through Les' sharp emphasis on musical values over the years, the band has come to occupy a rather unique position in today's musical firmament.

Les Brown's band is known all over the world through his years with Bob Hope on Radio and TV, his recordings on Decca, Columbia, Coral, and Capitol, and his personal appearance tours as well as his tours before armed forces units in Europe, Japan, Alaska, Korea and many other far countries.

Les is a graduate of Ithaca Conservatory of Music, New York Military Academy, and Duke University. He was somewhat of a child prodigy. At the age of twelve he was playing the Rudy Wiedoft solos that were a part of every saxophonist's repertoire of that era. At sixteen he was featured soloist with Conway's concert band.

At Duke University Les played tenor sax with the Duke Blue Devils, his first two years at school. He became leader of this band his junior year, which under his leadership became one of the best college bands ever known. In 1936 Les took the Blue Devil Band to Budd Lake, New Jersey for the summer. Through this engagement the band recorded for Decca and made world transcriptions. After a year of travel, the band disbanded.

Les headed for New York, and as well as playing dates as a sideman, turned to arranging. He did both stock arrangements for publishers and "specials" for such leaders as Isham Jones, Red Nichols, Ruby Newman, and Jimmy Dorsey. In 1940 Les organized the "Band of Renown", which has moved steadily forward to number one. Les early adopted the policy of surrounding himself with the best possible sideman and paying the best possible salaries to keep these men together. This policy has paid off in a cohesive playing unit. There has been far less turn

Les Brown

over in the personnel than is common in most such organizations.

Les Brown worked 11 years with Bob Hope and traveled all over the world. Sept. of 1959 Les and the band started with Steve Allen and were featured on the Steve Allen Plymouth Show N.B.C. TV.

The name Les Brown has become a symbol of good, danceable music throughout the continent. Time Magazine recently quoted him as saying "We prefer sound to noise, we prefer the beat over effects, we prefer consonance to dissonance, and we like the melody if it's good." This seems to have been the formula of success of the Band of Renown and its personable leader, Les Brown.

All through the years Les Brown has appeared battling for first place in all the popularity polls; however 1953 through 1960 he won all major first place honors. The latest honors accorded the Band of Renown are:

1- Voted #1 Downbeat's annual readers popularity poll
2 Voted by Metronome magazine as #1 big band of the year
3- Voted #1 dance band Billboard magazine annual popularity poll.

Chamber Performers

The George Bishop Lane Series Committee has announced the four performing artists which are to make up the Chamber Arts Series. The Chamber Arts Series, offered on an experimental basis this year, will present unusual types of entertainment in the more intimate atmosphere of a small auditorium.

The first presentation of the Chamber Arts Series will be the Vienna Octet on February 28. This octet, making its first American tour, is a world-famous ensemble made up of first-desk players of Vienna Philharmonic Orchestra.

Master Cellist Leonard Rose will appear on March 13. He has played with many major orchestras and in many major music festivals in both North America and Europe.

Chamber Arts Series Announced

On April 14 the series will present Merce Cunningham and Dance Company. Cunningham, a pupil of Martha Graham, has been called "a superlative dancer" by the New York Herald Tribune. His company is considered one of the foremost exponents of modern dance.

The final presentation of the Chamber Arts Series will be the appearance of Robert Frost, world famous poet. Mr. Frost, considered by many the most distinguished poet of our times, is a resident of Vermont and has made many appearances at the University.

Season tickets for the Chamber Arts Series are available at $4.50 in the Lane Series Office, 142 Waterman Building. Single (un reserved) seats are also

KW Ball

(continued from page one)

Concert at the Pa[illegible] Auditorium A[illegible] Best Band Album of the year" [illegible] voted #1 swing band by National Ballroom Operators Assoc.

Winning the [illegible] every year is old stuff to the Band of Renown. Over in recent years since the dance band business has had its ups and downs Les Brown continued to maintain the high standards he established for himself a long time ago. Refusing to compromise with perfection Les has always had the best arrangers and the best musicians. It is this talent and personality that has made Les Brown and the Band of Renown an integral part of the musical scene.

Les Brown has weathered the lean years of dance band business for a number of reasons. He began years ago with all the qualifications of a band leader. In addition Les is a musician who listens to the music around him and grows with it. He and his band have the same enthusiasm for music they had in the 40's and they cannot off to the road of one nighters playing for kids and likes the way they always have. Four recent Brown albums which exhibit his ever new arrangements are "Les Brown Band ang[illegible]" "Concert Modern" "The Les Brown Story" and "Love Letters in the Sand." Based in California where golf is regular and the disc jockeys love the sound of bands they manage to keep alive at least their share of America's big band fame.

Concert

(continued from page one)

the big record hits in the country - *Greenfields*. Since that time the Brothers have three LP's out for Columbia. "The Brothers Four," "Rally 'Round the Brothers Four," and most recently "The Brothers Four, EMOC."

One month after they arrived in New York they made their network television debut via the Jimmy Rodgers Show, and have since appeared on the Ed Sullivan Show, the Kate Smith Show, Mitch Miller's Ford Startime Spectacular, the Dick Clark Show, "The Ouz Ghost", and Canada's award-winning Music '60 Show. They have appeared at many of the colleges from coast to coast and recently completed an engagement with Johnny Mathis at the Carter Barron Theater in Washington, D.C. They have also popular and critical acclaim at the Newport Folk Festival.

Young, good-looking, and immensely talented, The Brothers Four are proud to admit that their secret is simply having fun with a good song. Their goal? They just hope their audiences have as much fun listening as they have singing.

With the arrival of the Kai Winding Septet at the Kake Walk Jazz Concert comes a new concept in musical entertainment called "The Trombone Sound." The instrumentation of the Septet is four trombones and three rhythm: piano, bass, and drums. In the trombone section there is an important diversity; conventionally Kai utilizes three tenor trombones and one bass trombone foursome and a more recent innovation in the Winding presentation has been to alter the trombone section to two tenor trombones and two bass trombones. This change within the section proves to offer new avenues of versatility from the standpoint of scoring and consequently in the over-all sound of the group. "Kai Winding is one of the most versatile, entertaining, and musically gifted jazzmen of this generation."

The wide appeal of the Winding sound is evidenced by the fact that aside from the idiom of listening and concert-type engagements the group is in ever-increasing demand for college dances and ballrooms. This is the first time a highly acclaimed first-rank jazz group has gone on to enjoy acceptance as a dance group.

Presently the Kai Winding Septet has three recent Columbia recordings: "The Swinging States," "Trombone Panorama," and "Dance to the City Beat." A few of the Septet's outstanding engagements to date are: Birdland, Newport Jazz Festival, New York Jazz Festival, Brown, MIT, Notre Dame, The University of Michigan, Penn. State, and the University of Florida.

Born in Aarhus, Denmark, Kai Winding came to our shores at the age of 12. That was in 1934. A few years later, someone handed Kai a trombone and the two have been going steady ever since.

After High School, Kai played with local dance bands, joining Sonny Dunham in 1941, Alvino Rey in 1942, and the Coast Guard soon thereafter. Upon receiving his discharge from the Coast Guard in the latter part of 1945, he went with the Benny Goodman Organization. At this time he recorded his first jazz sides under his own name for Savoy Records. These were acclaimed as milestones in modern jazz. With Stan Kenton in '46 and '47, Kai's name took a new prominence through his featured work on Kenton's "Artistry in Rhythm" series. "The Trombone Sound", created by Kai, stayed on with the Kenton band, after he moved on to the Charlie Ventura All-Star Sextet, and finally to his own group. "The Downbeat" and "Metronome" annual polls show Kai as consistently among the top three trombonists from 1947 through the present.

From late 1949 through early 1954, Kai combined two careers; with his own jazz group he played some of America's top rooms. With sidemen such as Gerry Mulligan, Max Roach and George Wallington, he opened "Bop City" and was a regular feature at "Birdland".

And, at the same time he was ranked as a top Jazz Artist, Kai met the challenge of playing the "commercial scene". Establishing his roots in New York City, he worked Radio and TV - Hit Parade, Patti Page Show, Robert Q. Lewis show, Arthur Murray Dance Party. He did commercial recording, jingles, was in the pit for Broadway success "Pal Joey", and even played the Horse Show at the Madison Square Garden.

In August 1954, Kai Winding decided to return to his field and, teaming up with another great trombonist and close friend of many years, J.J. Johnson, he did a dual trombone date for Savoy Records. The results of the date were so gratifying that Kai and J.J. decided to "put the act on the road". The rest, as they say, is history. Within a year, the J & K Quintet had five LP's on the stands, all on different labels.

The 1955 Metronome yearbook noted "J&K -- distinction of being the most widely recorded duo in jazz history".

A tremendous hit from coast to coast, the quintet firmly established "The Trombone Sound", created by Kai, and led to its natural extension in a Columbia LP featuring no less than eight trombones.

In mid 1956 Kai and J.J. came to an amicable parting of the way, each resuming his individual career. Kai formulated a new group that would represent the "The Trombone Sound" at its peak. Four Trombones and three rhythm; and wait until you see the boys put down Trombones and come up with four Tromboniums!

As explained by Kai, the idea behind the Septet was to create a band, ensemble-wise based on four trombones, that could create mellow moods or give the impression of a [illegible] band sound about [illegible] "Solo-wise, from [illegible] is always [illegible] challenging. There [illegible] for complacency. [illegible] an average work night between five and [illegible] we can get plenty [illegible] tunity to play [illegible] express ourselves."

With the launching of the Kai Winding Septet, more [illegible] History is being made [illegible] that's a habit with Kai [illegible] ing.

Winding expresses [illegible] ion of jazz in "[illegible] "Jazz is a living [illegible] comparable to a tree [illegible] grows with each [illegible] contributes to it. [illegible] the future with confidence that the inevitable [illegible] will be healthy and strong as the roots have been [illegible] planted".

Kai Winding

Susan Ware, vocalist for Les Brown and Band.

Series

(continued from page one)

available for each of the presentations at $1.50. Professor Jack Trevithick, Executive Secretary of the Lane Series, has announced that interest in all of the artists is great. There are, he noted, less than 100 of the 500 reserved season's tickets to be sold. Professor Trevithick also pointed out that only about 300 unreserved tickets remain for the Frost program, and that only 100 unreserved tickets will be available for the Merce Cunningham program which is to be held in the smaller Southwick Auditorium. The other three programs, he said, will be presented in the Ira Allen Chapel.

Professor Trevithick noted that interest in the Chamber Arts Series was great, although ticket sales by students were lagging. He stressed that this series was in an experimental stage and that it would not be repeated in future years unless interest this year was great enough to warrant such continuation.

Pops Night Skits Introduce Kake Walk Royalty Candidates

Marcia Bernhoft
Delta Delta Delta

Mike Pearo
Kappa Sigma

Bill Brigham
Phi Delta Theta

Delta Delta Delta proudly presents lovely Marcia Bernhoft as their candidate for Kake Walk Queen. A Junior sociology major in the college of Arts and Sciences, Marcia comes from Buffalo, New York. She is a participant in student activities and has various outside interests, including skiing and her favorite sport, swimming. Her "classic beauty" and warm friendliness make her a worthy choice for UVM's Kake Walk Queen.

Bonnie Burgess
Alpha Chi Omega

Bill Brigham, Phi Delta Theta's candidate for Kake Walk King of 1961, is a senior in Commerce and Economics majoring in Business Administration.

Bill is a native Vermonter coming to UVM from Randolph.

During his four years at UVM he has been active in his fraternity, has been a member of the UVM Band, - of which he is currently president, - and has served as Advertising Editor of the CYNIC.

Bill has also participated in various interfraternity athletics. His outside interests are skiing and other sports. Upon graduation, he intends to make a career in the business world.

Bonnie Burgess, Alpha Chi Omega's choice for Kake Walk Queen, is from Brattleboro, Vermont. A Junior, majoring in Elementary Education, Bonnie's activities include House Presidency of third floor Coolidge, Staff and Sandal Honorary, Student Association class representative, co-chairman for Freshman Orientation 1961, and sweetheart of Sigma Nu. Her charm, graciousness and warm personality have made Bonnie a well known individual on the Vermont campus.

Maynard Ducatte
Sigma Alpha Epsilon

Sigma Alpha Epsilon is proud to present Maynard Ducatte as their Kake Walk King candidate. A Junior in the field of Commerce and Economics and a member of the Advanced Army ROTC Corps, Maynard plans a career in Industrial management following graduation and a tour of service duty. Maynard has played varsity football and baseball, and this fall was starting half-back of the Catamounts. This Spring "Duke" will be captaining the Cat's starting nine.

Ducatte is also a member of Key and Serpent, the Sophomore honorary society, Vice-President of the Newman Club, and President of SAE fraternity.

Anne Saari Parker
Gamma Phi Beta

Miss Anne Saari Parker, born and raised in Maynard, Massachusetts is Gamma Phi Beta's charming candidate for Kake Walk Queen. Anne, 20 years old, is a junior in the College of Arts and Sciences. She carries a major in German.

Anne, an active member of Gamma Phi Beta Sorority, is currently Activities' Chairman. A member of the WSGA Council, Anne is also in the junior women's honorary, Staff and Sandal. She belongs to Ariel staff and has served on the Homecoming Committee and the Social Committee of SA.

Elaine Bright
Alpha Delta Pi

Michael Charles Pearo is Kappa

(continued on page nine)

Penny Carnival And Skits Initiate KW

Now that Kake Walk is fast approaching, the Greeks of UVM are busily working on snow sculptures, skits, and of course walking. Several Sororities and fraternities are also preparing campaigns to make one of their number king or queen of the 1961 Kake Walk. But the kickoff for candidate pushing won't occur until Pops Nite on February 17. This event, which is held in Memorial Auditorium, officially initiates Kake Walk. Traditionally, however, the evening begins with Penny Carnival, sponsored each year by the Women's Recreational Association.

From 7-9 concessions in downstairs Memorial will amuse customers with various tests of skill as well as by merely comic situations. And, as the name of the Carnival suggests, each both charges only pennies. Marcia Bickel and Mary Manton, co-chairmen of the Penny Carnival, as well as the members of WRA, have organized such booths as a mock fair, or penny-pitching, sauerkraut-ring, and a maple sugar booth where maple syrup on snow will be served. An added feature will be the telegram service provided by messenger girls from physical education classes. During the Carnival music will be provided by members of the University band under the direction of Mr.

The booths will be run by the Outing Club, the coke and coat concessions. This to raise money for a cabin at Stowe for the Club and other student activities. In fact, the entire proceeds of Penny Carnival are going for this purpose, so the money will be well spent no matter which booth you like the best.

At nine o'clock the hour comes to unveil the candidates for this year's king and queen. Upstairs in Memorial Auditorium, three fraternities and four sororities will participate, each with a unique Skit built around their candidate. As of printing Alpha Delta Pi and Sigma Alpha Epsilon have kept the themes of their skits a secret in presenting Elaine Wright and Maynard Ducatte respectively, but the others are known.

Alpha Chi Omega is planning a skit entitled "Our Bonnie Lassie" in nominating Bonnie Burgess. The skit includes some Scottish dancing and singing.

Gamma Phi Beta's "Timeless Dream" carries the audience through different eras up to the present time in a skit built around their candidate, Anne Parker.

In a toy shop adventure Delta Delta Delta will introduce their candidate for queen, Marcia Bernhoft. The theme centers around a "Classic Beauty."

The fraternity skits promise to be quite amusing in content and theme. Kappa Sigma will begin their campaign for king with a "More Kingly Than the Average Type Bear" theme in presenting Mike Pearo.

Phi Delta Theta answers the age-old problem of where to have a party that won't be raided by the Dean in their skit to publicize their candidate. Bill Brigham.

"King Of World" To Crown Self "King Of University"

"I can say that my Campaign for U S President, starting there Feb. 1st last year was most auspicious, the news going ahead clear across the nation, and St Michael's students were the first to announce themselves ready for a "Theocratic Party" unit, while several University of Vermont cars of students joined me in my "one man parade" . . . I plan to arrive at the Vermont Hotel (by Northeast Airlines) in time to plan a News Conference at 6:00 P.M. Sunday Feb. 19th. I will display our "THEOCRATIC PARTY" 1964 Button, believe the whole program will be new and distinctive. . . Will appreciate your consideration. . ."

...HOMER A. TOMLINSON

Burlington, Vt. Feb. 11.

Bishop Homer A Tomlinson of New York, sends word he plans a second "Coronation" visit to Burlington Feb. 20 coming again as "King of the World" and holding snugly to his title "King of Vermont."

Bishop Homer A. Tomlinson soon to be King of the University of Vermont

which he assumed in ceremonies here Feb 1st last year he wishes to crown himself "KING OF UNIVERSITY OF VERMONT" and "KING OF ST MICHAEL'S COLLEGE." Hmmmm!

The "King" writes that he is so inspired by the help students in four hundred colleges and universities gave him in his campaign to be elected U S President in the recent campaign, he is on a "coronation" tour to "crown himself king" of each of fifteen New England University and colleges Feb 13th to 24th to make his formal announcement that he will seek the office of U S President in 1964 "Both Mr Nixon and I were really disappointed," he claims "But this does not discourage me. I believe it was the older voters who let me down as all the older people fearfull and unbelieving set great Moses back when he wanted to enter the promised land like Moses also turned to those twenty years old and under I am turning to the youth for my 1964 campaign." The Bishop noted that governments of many countries had recently been overthrown reorganized by student leadership and effort says he represents the forces of right eousness infinitely greater than any other

Library Regulations

LOAN PERIOD - ONE month - No Renewals

Recall after TEN days upon request of another borrower

FINES - $ [illegible] per day per volume

Overdue or recall notice is sent. If book is returned after notice no fine is incurred. Failure to respond results in billing. If book is returned after billing, the replacement cost is incurred and a $10 fine is assessed. RESERVE BOOK FINES - $1.00 per overdue hour

Reserve books are for two hour periods during the day and overnight. Fines are made beginning at 9 P.M. each nights and 4 P.M. on Saturday and are due one half hour after the Library opens the next day - by 8:15 A.M. Monday through Saturday and by 2:30 P.M. Sunday

"A GUIDE FOR THE DATELESS"

With the cost of dating rising higher and higher it is no wonder that so many of us men are turning to discus throwing. Naturally, we would prefer nuzzling warm necks to flinging cold discs, but who's got that kind of money? Prices being what they are, the average man today has a simple choice: dating or eating.

Unless the average man happens to be Finster Sigafoos.

Finster came to college with the normal ambition of any average man: he wanted to find the prettiest coed on campus and make her his. He looked long and carefully, and at last he found her—a tall job named Kretchma Inskip, with hair like beaten gold.

He asked her for a date. She accepted. He appeared at her sorority house that night, smiling, eager, and carrying a bouquet of modestly priced flowers.

"Now then," said Kretchma, tossing the sleazy flora to a pledge, "where are we going tonight?"

Finster was a man short on cash, but long on ideas. He had prepared an attractive plan for this evening. "How would you like to go out to the Ag campus and see the milking machine?" he asked.

"Ick," she replied.

"Well, what *would* you like to do?" he asked.

"Come," said she, "to a funny little place I know just outside of town."

And away they went.

The place was Millionaires Roost, a simple country inn made of solid ivory. It was filled with beautiful ladies in backless gowns, handsome men in dickeys. Original Rembrandts adorned the walls. Marlboro trays adorned the cigarette girls. Chained to each table was a gypsy violinist.

Finster and Kretchma were seated. "I," said Kretchma to the waiter, "will start with shrimps remoulade. Then I will have lobster and capon in madeira sauce with asparagus spears. For dessert I will have melon stuffed with money."

"And you, Sir?" said the waiter to Finster.

"Just bring me a pack of Marlboros," replied Finster, "for if ever a man needed to settle back and enjoy the mild bouquet of choice tobacco and easy-drawing filtration, it is the shattered hulk you see before you now."

So, smoking the best of all possible cigarettes, Finster watched Kretchma ingest her meal and calculated that every time her fetching young Adam's apple rose and fell, he was out another 97¢. Then he took her home.

It was while saying goodnight that Finster got his brilliant idea. "Listen!" he cried excitedly. "I just had a wonderful notion. Next time we go out, let's go Dutch treat!"

By way of reply, Kretchma slashed him across the face with her housemother and stormed into the house.

"Well the heck with her," said Finster to himself. "She is just a gold digger and I am well rid of her. I am sure there are many girls just as beautiful as Kretchma who will understand the justice of my position. For after all, girls get as much money from home as men, so what could be more fair than sharing expenses on a date?"

With good heart and high hopes, Finster began a search for a girl who would appreciate the equity of Dutch treat, and you will be pleased to hear that he soon found one—Mary Alice Hematoma, a lovely three-legged girl with sideburns.

* * *

We're no experts on Dutch treat, but here's an American treat we recommend with enthusiasm—Marlboro's popular new partner for non-filter smokers—the Philip Morris Commander.

Smolen On Court Warning

A University of Vermont student has been placed on "official court warning" by the University and by the Student Court for his part in an incident which took place in front of a fraternity house in October.

Robert Smolen, a sophomore from Great Neck, N.Y., was fined in Chittenden Municipal Court on January 30 after he pleaded no contest to a charge of firing a revolver and injuring a Shelburne youth in a quarrel outside the Tau Epsilon Phi House Oct. 29. The injured youth [illegible] court last week. [illegible] did not contest a disorderly conduct charge, and sentence was [illegible] in his case pending a [illegible] investigation.

The University's action placing Smolen on "official court warning" was a joint action of the Office of the Dean of Men and of the Student Court.

The action means that "any subsequent misconduct before either the Dean of Men or the Student Court for failure to meet conduct standards will result in consideration of suspension" for Smolen.

In a joint statement from the Student Court and the Office of the Dean of Men, the University expressed "concern regarding the misuse of firearms in this case, regardless of the circumstances involved," and stated the University's hope "that the shooting incident would not be interpreted as typical of student-town relationships."

Debaters Lauded For Winning Season

University of Vermont debaters "out-talked" the opposition [illegible] ago clip during the first semester's busy schedule. Taking part in 144 [illegible] of the Lawrence Debate Club garnered 98 decisions while dropping only 46 in facing many of the top teams in the East and debating the question 'Resolved - that the United States should adopt a program of compulsory health [illegible]

"Vermont got off to a fast start in the initial round [illegible] teams from Dartmouth Norwich, Middlebury, St. Michael's and UVM winning 14 of 20 verdicts. In the Hamilton College novice debate (a novice is a person debating for the first time regardless of class status), Vermont took first place honors with a perfect [illegible] slate. They came a second place finish in the St. John Fisher (Rochester, N.Y.) debate in which Gil Tornabene of Weston, Mass. walked away with best affirmative honors. Following came a third place finish in the St. Joseph's College (Philadelphia) tourney and a second place laurels in the St. Lawrence, tournament. In this debate, Betsy Lisman, a sophomore from Burlington, was chosen best speaker of the tournament.

In the 15th [illegible] Invitational [illegible] tracted debate [illegible] schools, UVM compiled a 21 won-lost mark [illegible] of Charles Tierney [illegible] Van Graber [illegible] went undefeated [illegible] is announced [illegible] After a 6-4 [illegible] Tufts tournament [illegible] eled to Pittsburgh [illegible] nev and Val [illegible] first place aff[illegible]

Richard Nort[illegible] was selected [illegible] affirmative spe[illegible] Anselm's novice [illegible] first semester [illegible] at New York [illegible]

The overall [illegible] even more impres[illegible] a unique setup [illegible] comes out for [illegible] chance to debate [illegible] most successful [illegible] in order that [illegible] too much class w[illegible] uals participate [illegible] of the debates [illegible] everyone on the [illegible] to test his orat[illegible]

The team is [illegible] Robert B. Huber [illegible] the department [illegible] by Norman T. [illegible] C. Travis, also [illegible] department.

Six Elected To Phi Beta Kappa

Six students have been elected to the Vermont Alpha chapter of Phi Beta Kappa. The new members include four seniors and two students who are in a special program in which a student may combine undergraduate study with his first year of medical school. Newly initiated members are Virginia Clark, James Battersby, Brian Machanic, Daniel Weine, Merrill Benson and Robert Keimowitz. The UVM chapter was the first to Phi Beta Kappa to initiate women into membership.

Miss Clark is a senior in the College of Arts and Sciences. She is the daughter of Mrs. Phyllis W. Prescott of 3211 Thomapple St., Chevy Chase, Maryland. Machanic is a senior in Arts and Sciences and is the son of Mr. and Mrs. Philip Machanic of 134 Buell St., Burlington. Ba[illegible] senior in the Co[illegible] cation and Nursing [illegible] of Mr. and Mrs. James B[illegible] of RFF #2, Laurel [illegible] nam, Conn. Weine [illegible] senior in Arts and [illegible] He is the son of Mr [illegible] Max Weine of 253 [illegible] St., Camden, J.J.

Benson and Keimowitz [illegible] their senior undergra[illegible] with the first [illegible] College of Medicine [illegible] a special program at UV[illegible] son is the son of Mr. [illegible] L. Bedard of Alburg[illegible] Keimowitz is the [illegible] and Mrs. Henry K[illegible] Starhaven Ave., [illegible] N.Y.

Students are [illegible] Phi Beta Kappa [illegible] the conclusion [illegible] ters.

"IT'S HERE—IF YOU WANT TO WORK FOR IT"

Even before Ron Spetrino received his engineering degree from Case he had good job offers from six companies.

He joined The Ohio Bell Telephone Company —his reason: "I was convinced an engineer could go further here—if he was willing to work for it."

As soon as Ron got his feet on the ground in telephone engineering, he was tapped for a tough assignment. The job—to engineer switching equipment modifications needed to prepare Cleveland for nationwide customer dialing of long distance calls.

Ron wrapped it up in five months, and found he had earned a shot at another tough assignment. In this job Ron helped engineer a completely new long distance switching center for Cleveland. This switching center connected Cleveland with the nationwide customer dialing network. It was about a year later that Ron put the finishing touches on the specs for this $1,600,000 project.

Today, as a Supervising Engineer, Ron heads a staff of five engineers and is responsible for telephone switching in much of the greater Cleveland area.

He supervises the design and purchase of $3 million worth of equipment a year. And even more important, he is charged with developing the technical and managerial skills of his staff.

Ron knows what he's talking about when he says, "In this business you have to do more than a good job. We expect a man to be a self-developer. We expect him to take responsibility from his first day on the job and think for himself. You don't get ahead around here by just doing time."

If you want a job in which you're given every chance to prove yourself, and real responsibility right from the start—you'll want to see your Placement Office for further information.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

FREDERICK R. KAPPEL, *President*
American Telephone & Telegraph Co.

BELL TELEPHONE COMPANIES

Editorial:

Calendar Proposal

Elsewhere in this issue is a statement from the Office of the Dean of Administration concerning a revised University Calendar. This calendar would, according to the proposal, reduce interruptions of classwork and simplify the transportation complications caused by the Thanksgiving and Christmas exodus of students to their homes. It would also be of great benefit to faculty members seeking summer teaching jobs.

There is serious doubt, however, that these advantages would offset the many disadvantages inherent in the proposal.

One of the major "advantages" of the situation is supposed to be the elimination of Thanksgiving vacation and the combining of Christmas and intersemester vacations into one longer period between (roughly) December 22 and January 25, the beginning of the second semester.

In order to complete an entire semester's work before Christmas, it will be necessary to register even before Labor Day. This system could impose a double burden on those who depend on the summer and Christmas vacations to earn money for school expenses.

Students are naturally dependent on seasonal demands for labor. Jobs during the Christmas season depend largely on the Christmas shopping and mail rush. Students who are not free until three days before Christmas itself will not be able to obtain Christmas jobs. Similarly, many students are dependent on demand for summer labor, especially those whose jobs depend on the summer vacation season. The majority of those who work in this field will find no jobs open before the first of June at the very earliest. Since the vacation season is at a peak Labor Day Weekend, and now even continues several weeks beyond that date, students who must return to school before Labor Day will be put at a definite disadvantage when they apply for jobs.

Furthermore, we contend that unless something is done that entirely changes the existing situation, a full semester of school, with only one one-day break, will result in complete demoralization of the student body. With only nine weeks of unbroken classes between the beginning of school and Thanksgiving vacation under the present system, students are so tense and eager for a change that some leave for their vacations as much as a week early.

Freshman men, especially, live in a social desert here at UVM until the beginning of the second semester. Imprisoned in their cell-like dorms, not allowed automobiles, shunned and scorned by Freshman women and mobbed by "townies" when they seek off-campus amusement, the Freshman man lives in a veritable Hell, broken only by these vacations, until the second semester, when he is rescued from his predicament by joining a fraternity. It is probable that a complete semester of unbroken study and not much else would result in the loss to the University of many students who have the intelligence to graduate, but not the dullness to stand the situation.

It is true that the existing first semester vacation policy needs investigation and, possibly, revision. But we feel that at least as many people would be harmed by the proposed revision as would be benefited by it. Change for the sake of progress is good, but change that does not result in some form of progress is not necessarily good. The proposed Revised Calendar, we feel, does not represent enough of a solution to the present problem to be worth the effort and inconvenience of putting it into effect.

CORONATION

On Monday, February 20, 1961, Bishop Homer A. Tomlinson, King of the World and King of Vermont (among other states) will again visit Burlington. Encouraged by support among college students for his proposed Theocracy in the last Presidential election, Bishop Tomlinson will proclaim himself King of the University of Vermont and King of St. Michael's College. This is a part of his plan to become King of institutions of higher learning all over the United States.

We expect that students at the University of Vermont will turn out in large numbers for the coronation, to be held in an undisclosed location on campus. No special dress is required, and it is seldom, indeed, that UVM students are able to attend an occasion as solemn as a coronation.

We trust that Bishop Tomlinson, as head of the University, will continue to encourage the advancement of the University of Vermont in both physical and intellectual areas.

Letters To The Editor

Questionable Material?

The Editor
The CYNIC

Dear Sir

I do not make it a practice to write letters to this newspaper, but I was so impressed by Mr. Donald Burton's letter of Jan. 12, I cannot contain myself any longer. No, it is not the Cuban issue which roused my interest and ire, but Mr. Burton's remarkably wide reading. This is the kind of student we dream about! To get at what I mean, I want to illustrate my point by taking Mr. Burton's list in order of appearance.

1. He reads *The New Republic* and *The Nation* so avidly that he can cite the specific articles and paragraphs from which Mr. Kritzler plagiarized his material.

2. He reads *The Daily Worker*, for he says that Carleton Beals "has been the subject of articles at least 4 times" in that paper. How else would he know, except by reading them? Apparently, he missed a few issues, because he is not definite about the number of times. That is excusable, of course. (Incidentally, I figured out that he must have the *Worker* smuggled in, because if it came through the mails, Mr. Burton would most certainly be on some FBI list, right now, and I am sure he isn't.)

3. He reads House Committee on Un-American Activities reports, for he even cites one man's listing in the 1956 report.

4. He reads FBI and Senate Judiciary Committee reports and memoranda, because he knows that the "Fair Play Committee" and some individuals are now under investigation. He also reads the writings of those under investigation, for he cites an example of a work written by some fellow at Wisconsin.

(Incidentally, I am pleased to find out that *The New Republic*, and *The Nation* are "questionable reading materials." In my own silly way, I have been going around reading *The New Republic* for years, and I thought it was a good periodical. I haven't read *The Nation* in a long time, so I feel pretty good about that. I'm pleased to know that Mr. Burton knows the real, 100%, truth; otherwise, how could he know the periodicals were "questionable"? We know from a previous part that he reads both very carefully.)

There are some skeptics, no doubt, who would say, "Aw, go on, Mr. Burton didn't read all that stuff! He probably got the information canned from some source or other, and is just repeating it in a letter of his own!" I doubt that, because that would be a form of plagiarism of a dangerous kind, and that was what he accused Mr. Kritzler of doing. We'll just ignore such carping.

I am pleased that we have such widely read students who can do such remarkable research. More power to them, I say!

Very truly yours,
Milton J. Nadworny

Cadet Officers Named At Army ROTC Banquet

The Army ROTC Senior Banquet was held this past Thursday February 9th at the Lincoln [illegible] Among guests were [illegible] Pay, Dean Earle W Clifford, Dean George V Kidder, Dean Thomas C. King [illegible] Edd R. McKee and Dean Lamar S. Rowell. As guest speaker, President Pay stated ROTC was an important part of the educational program at UVM providing invaluable experience to students in discipline, cooperation and initiative.

Roberto C Eaton of Burlington was named the Commander of the Army ROTC Brigade. The Military Ball Queen and honorary cadet colonel, Miss Ann D VanGilder, pinned on Eaton's insignia. Eaton will hold the rank of cadet colonel.

Cadet Stephen L. Berry, Burlington, was appointed Brigade Executive Officer in the rank of Cadet Lt. Colonel. Other Brigade Staff Officers are Cadet Major Peter E. Nelson, West Newton, Mass.; Cadet Captain Daniel J. Prescott Essex Junction, Vt. and Cadet Captain Kenneth O Daltner Huntington Vermont.

Appointed Battle Group Commanders with the rank of Cadet Lieutenant Colonel were: Paul B. O'Connor, Bellows Falls Vt. and George S. Hatch, Rutland, Vt. Named Members of Battle Group Staffs are Ralph F. Guidali, Barre, Vt. and Stanton Williams, Charlotte, Vt.

Commanders of the eight drill companies with the rank of Cadet Captain are: William F. Carrigan, Rutland, Vt.; John T Ide, Danville, Vt.; Douglas R Jarret, Burlington, Vt. Anta Luse, Mahopac, N Y.; Peter C. McGibney, Burlington, Vt. John E. Mannes, Rutland, Vt. John T Moore, Forest Hills N Y.; Marvin Vipler, Catskill N Y.

Cadet First Lieutenants named executive officers are: Robert B Billings, Burlington, Vt. Dale A. Burroughs, Newbury Vt., Carl R. Butterfield Jacksonville, Vt.; David J Hose, Tunbridge, Vt.; Roger J Knisley, Chester Depot, Vt. Kenneth B. McCormick, St Johnsbury, Vt.; Richard A Metcalf, Springfield, Vt. and Robert J. Perry, Essex Junction, Vermont.

A.S. Promotion

The Department of Air Science at the University of Vermont has announced the selection of Gordon H. Spriggs Jr., as the new Group Commander. Mr. Spriggs is a 1956 graduate of Burlington High School and is the son of Mr and Mrs. Gordon H. Spriggs of Charlotte. At the University of Vermont, Mr. Spriggs is majoring in Economics. He is a member of Phi Delta Theta Fraternity and is president of the Astronaut Society. Mr Spriggs is married to the former Susan Ramsey of Burlington.

Winter Alumni Reunion Planned

UVM alumni, long in the habit of returning to the campus only for Homecoming in the fall or for class reunions at graduation, will have a chance for a winter reunion under a new program being christened at Kake Walk on Feb. 23, 24 and 25.

At that time, the first annual Alumni Kake Walk Weekend Reunion will be launched with a busy agenda planned for all returning, starting with the Kake Walk Ball on Thursday evening and concluding with an alumni get-together at the new Hi Hat Restaurant on Saturday evening following the final Kake Walk festivities.

Seven hundred Kake Walk tickets have been set aside for the alumni on the preferential plan. Under this plan, members of the past two graduating classes and of classes going back from 1950 at five-year intervals are given ticket preference. Thus classes on this year's preferred list are 1894, 1899, 1904, 1909, 1914, 1919, 1924, 1929, 1934, 1939, 1954, 1959 and 1960.

The full alumni program has not yet been decided. Parents visiting sons and daughters during Kake Walk will be invited to join in the alumni gatherings. The reunion is being sponsored by Alumni Association.

Notice

The CYNIC announces the resignation of News Editor Sandra Timmermann. Miss Timmermann has transferred to the University of Colorado for the remainder of the current year.

Miss Mary Ploof, a senior in the school of Dental Hygiene has been appointed News Editor for the remainder of the current term. She has been connected with the CYNIC during her four years of college, serving on the News and Feature Staffs. She has also served on the Rewrite Staff and unofficially as secretary to the Editor-in-Chief.

IBM WILL INTERVIEW FEBRUARY 27-28

Candidates for Bachelors or Masters Degrees are invited to discuss opportunities in:

Marketing and Sales
Engineering and Science

This is a unique opportunity to find out about the many career opportunities at IBM. The IBM representative can discuss with you typical jobs, various training programs, chances for advanced education, financial rewards, and company benefits—all important factors that affect your future.

SOME FACTS ABOUT IBM

An Unusual Growth Story: IBM has had one of the exceptional growth rates in industry. It has been a planned growth, based on ideas and products having an almost infinite application in our modern economy.

Diverse and Important Products: IBM develops, manufactures and markets a wide range of products in the data processing field. IBM computers and allied products play a vital role in the operations of business, industry science, and government.

Across-the-Country Operations: Laboratory and manufacturing facilities are located in Endicott, Kingston, Owego, Poughkeepsie and Yorktown, N. Y.; Burlington, Vermont; Lexington, Ky.; San Jose, Calif.; Bethesda, Md., and Rochester, Minn. Headquarters is located in New York City with sales and service offices in 198 major cities throughout the United States.

The Accent is on the Individual: No matter what type of work a person does at IBM, he is given all the responsibility he is able to handle, and all the support he needs to do his job. Advancement is by merit.

The areas in which IBM is engaged have an unlimited future. This is your opportunity to find out what that future has to offer you.

Call or stop in at your placement office to arrange an appointment with the IBM representative for the date above. If you cannot attend an interview, write or call the manager of the nearest IBM office.

Letters

(continued from page four)

Appreciates Zimmerman

Sir:

I would like to ask Roger Zimmerman's "Walking Dust" column in the January 27th issue.

It seemed to me an unnecessary [illegible] and malicious [illegible] Incidentally, contrary to the [illegible] Dust I found it most [illegible] paper. I presume [illegible] ing that college papers are very important media. [illegible]

Sincerely,
Clayton Lane

Burton vs...

Sir:

The January 12th issue of the Cynic contains a letter written by Ben Burton attacking the Pro-Castro and inaccurate "Red tinged" essays of Ed Kritzler. The author alleges that Mr Kritzler did not study his eyes and extra-

[illegible] Nation and New Republic. Mr Burton states that one Carlton Beals (author of the article appearing in *The Nation*) has been the subject of [illegible] in the now defunct Daily Worker in addition to [illegible] Mr Burton has read *The New Republic* and *The Nation* are [illegible] reading materials.

[illegible] Mr Burton may be [illegible] the witch hunting Senator Joseph McCarthy. Our country was founded by radical outsiders who were not afraid of new ideas. Publications such as *The Nation* and *The New Republic* keep society dynamic and promote such all American activities as the preservation of civil liberty.

Furthermore, how can Mr Burton have such detailed information concerning the *Daily Worker* and *The Nation* unless [illegible] reads these [illegible] I would hasten to suggest that Mr Burton take time from his obsequious study of Henry Luce and Barry Goldwater in order to read the U.S. Constitution and Arthur Miller's *The Crucible*. They may be just the thing to sever [illegible] with the [illegible] who dream up [illegible] of democracy as [illegible] affidavits.

Respectfully,
Joel Morris '63

...vs. Kritzler

To the Editor:

I'm taking back some statements in my last letter. After all, who do Krushchev, Castro, and Kritzler think they are, trying to reduce American multi millionaires to mere millionaires, from ten Cadillacs apiece to a mere nine, just so Cuban peasants can indulge in such luxuries as adequate diets and clothing? That tenth Cadillac is the bulwark of democracy, and without it our precious free enterprise system could not survive. Castro's building schools, roads, and hospitals should convince anyone (except Kritzler) that he is a Red.

because such [illegible] found in Russia.

So Kritzler [illegible] parting of ways [illegible] have accepted a [illegible] as an authority [illegible] Any psychologist [illegible] one automatically [illegible] ject to visual [illegible] hallucinations [illegible] sets foot in [illegible] Kritzler thinks [illegible] lion Cubans [illegible] whereas any [illegible] enough *not* to [illegible] that they can [illegible] have Batista back.

My solution [illegible] Kennedy to apologize [illegible] him to apply to Cuba [illegible] lent plan Swift [illegible] Ireland. After [illegible] Cuban babies taste [illegible] And the best [illegible] into effect is [illegible] Batista. He [illegible] wholehearted (and [illegible] mached) support in [illegible] Let's form a Fair Play Batista Committee [illegible] our poor sugar and oil [illegible] will be reduced to [illegible] vation at the rate [illegible] going.

Daniel Miller

Kritzler Confesses All

On page nine of the [illegible] tember 12th issue of the [illegible] *Republic* there appears [illegible] sentence concluding a [illegible] cription of a few [illegible] showplaces cooperatives [illegible] up by the Cuban government. This sentence states - "[illegible] the ordinary co-op, visited at random and without a [illegible] arranged tour, is impressive enough." In one of my articles in which I described a typical cooperative, I believe I wrote - "I [illegible] any cooperative visited at random and without a [illegible] arranged tour to be just impressive.

An individual might [illegible] to my defense and state that because Mr. Kritzler in all probability has done a great deal of reading on the Cuban situation after his return it is possible that the few short words stuck in the back of his mind as expressing very accurately what he found to be true about the Cuban co-ops. However, since I have been justly expelled for what I am, I may as well make my full confession. The statement was part of one of the populace of our nation. I guess one of our representatives was able to sneak into the *New Republic* [illegible] the similiarity of the [illegible]

One of the best investments you'll ever make...

You know what you invest in advanced ROTC . . . two years of classroom time and outside study.

But just see how handsomely your investment pays off.

First and foremost, there's the proud moment in Graduation Week when the gold bars of a Second Lieutenant are pinned on your Army uniform . . . and deep inside the warm sense of accomplishment at having made it.

There summer jobs help in meeting expenses . . . a subsistence allowance of $535 for the two-year advanced ROTC course. Uniforms and military textbooks paid for. $117 for your six-week summer camp training plus travel allowance. And when you're commissioned, a $330 uniform allowance.

You discharge your military obligation with the traditional rank, pay, privileges and responsibilities of an officer in the United States Army.

And later, when you're starting your climb up the civilian ladder, advanced ROTC will still be paying off. Success in the executive areas of business and industry comes earlier and more substantially to the man who can lead. Few are born leaders, but leadership can be learned. And advanced ROTC is a great place to learn it.

Talk with the Professor of Military Science at your school. Learn more about advanced ROTC. Ask particularly about the ROTC course in Leadership, with its practical experience in command responsibilities.

...ional might also ... defense for the ... charge of plagarism. ... - "A few ... before the couple ... of plagarizing. ... a quote from ... article he has ... also steal that ... the vacillation? ... be that his ... giving credit ... oversight on his ... this is not the ... follows is my ... confession.

... it all began the ... before I entered the ... I remembered ... was a Tuesday in ... when my grandmother, ... the original Bolshe- ... told me how her plans ... the downfall of the Czar ... answered. Dusk was ra- ... descending when I ... memorized the chant ... that proved successful in ... her wishes. I sprung ... her lap and rushed out ... upon the oncoming ... There standing in the ... hush of the evening ... up into the sky and ... the weird rhetotic I ... learned: "Star ... star bright first star ... tonight wish I may wish ... make my wish come ... tonight". Sure enough ... appeared a solitary ... illuminating the heavens ... a bright red glow. Need- ... to say due to that ... experience in the ... of my formative years, ... fascination for all ... colored red was instill-

ed in me.

I then passed through childhood joining such Communist front organizations as the Temple Sinai Youth center. Adding up, through the years, an impressive list of credentials - membership in twenty-eight other subversive groups I was finally offered a chance to play in the big leagues.

Our nation-wide organization met once a month in Indianapolis, Indiana due to its central location. Not wishing to detract from Mr. Mr. Burton's expose I feel that he mistakenly stated our central purpose was to poison the minds of American youth. This was not the case as our prime objective in mind was to make the world safe for Communism. At these meetings the members received the lie of the month. We were then instructed to return to our stategically located areas. Here we would spread and enlarge upon the lie through such medias as college newspapers, P.T.A. meetings, church groups, etc.

But now that's all over, for thanks to Mr. Burton, J. Edgar Hoover, that stalwart of democracy became aware of this national plot, and obliterated our organization. As I have been embarrassingly exposed for what I am my life here on campus is finished. By the time this article comes to print I will have boarded a ship carrying me back to mother Russia.

Good-by cruel world,
Edward Kritzler

Candidates

(continued from page one)

[illegible]

Elaine Wright, Alpha Delta Pi's beautiful Kake Walk queen candidate, was born in Bound Brook, New Jersey on November 11, 1939. While attending high school in her home town she was a member of McCalls Teen Fashion Board and a twirler. Elaine is presently a junior at the University of Vermont and is majoring in Home Economics. As a member of Alpha Delta Pi sorority, she is both the Stewardess and the Chaplain and every fall Elaine graces the University football games as a twirler.

Congregation Enjoys Clemens

by BILL GRANDEY

At the Memorial Opera House on January 11, the citizens of our fair city were privi-

leged to hear a lecture by the renowned humorist, world traveler, and reporter, Samuel Langhorne Clemens. In the past few years, Mr Clemens has gained quite a following with his pen, under the name of "Mark Twain," and his two books, Tom Sawyer, may survive the erosion of time.

Probably, though, it will be as a lecturer, not a writer, that Mr. Clemens is remembered in years to come. His easy style of delivery, unusual material, and excellent sense of timing make it impossible for an audience to remain sober for long.

However, Mr. Clemens may be criticized for a want of taste. His anecdotes about drinking, smoking, and lying, while enjoyable for adults, could hardly avoid misleading the young ladies and children in the audience. Your reporter noticed three prominent church members leaving as soon as it was convenient to register their disapproval of such subject matter.

This faithful reviewer stayed, of course, for the complete performance and enjoyed it enormously, as did the majority of the congregation. In his rambling fashion, Mr. Clemens covered in comic style such varied subjects as dachshounds, Satan, hymnbooks, Mexican horses, the aforementioned smoking, drinking, and lying of his boyhood.

The highlights of the evening were a selection called "The Shooting of Boggs" and a thrilling "Ghost Story." Both were well staged and acted with great. "The Shooting of Boggs" seemed rather brutal for children to read, but was very effective in performance, especially the characterization of Boggs. In telling the ghost story, Mr Clemens used audience reaction for a fine surprise ending he shouted at an errant little girl in the front row, and her fright amused and entertained me and all.

I had hoped to gain an interview with Mr Clemens, but after his description of the confusing way he answers questions, I decided against it. We must remember that Mr. Clemens is, to put it charitably, "past his prime," and we should be grateful that such a famous figure on the Chautauqua circuit should include our small but prosperous village in his itinerary.

Sports Summary

by Steve Kuhn

On January 14, the UVM Cagers met with the quintet representing Middlebury College, and sent the Panthers home with their tales between their legs. The 70 to 44 defeat suffered by Middlebury was handed to them by an up-til-then, hapless Catamount five. The two high scorers in the game were Shabel and Recton, scoring 17 and 11 points respectively. The Cats scored well both halves, racking up a 28 to 15 score against the Panthers at the end of the first half. In the second half, UVM scored 42 points to Middlebury's 29.

UVM vs UCONN, Jan. 28

Following the victory over Middlebury, the Cats slipped down again, losing to UCONN by 20 points, in an 81 to 61 ball game. The Cats started off well, but were soon trailing behind powerful Connecticut by eight points, with a halftime score of UCONN 40-UVM 32. In the second half we scored 29 points against UCONN's 41.

The score was held up by Recton, Zingg, Shabel, and Stahler. They scored 18, 11, 10 and 10 respectively. As "Fuzzy" Evans stated, "Stahler is definitely improving."

UVM vs St. Michael's, Feb. 1

After dropping the UCONN game, UVM's Cager Five dropped another to St. Mike's. Once again it was due to a low scoring first half. We scored 12 points to St. Mikes' 23.

In the second half, however, we topped St. Mikes' by four points, 32-28. The high scorers again were: Recton with 19 and Zingg with 10. The final score of the contest was UVM 44, St. Mikes' 51.

UVM vs. U. of New Hampshire, Feb. 4

The UVM-UNH game is, in Coach "Fuzzy" Evans' opinion, "The best game that the Green Mountain Boys have played this season."

The high-scoring men were Recton-21, Shabel-20, Zingg-13, Ader-12, and Stahler-11. Recton's high scoring justifies Coach Evans' statement that "Benny has a good chance at the All-Yankee Conference team." Shabel's scoring also shows his improvement.

The teams went to the locker rooms with a halftime score of 37 to 31 in favor of UVM. We kept up our scoring in this contest to knock out 92 points to 42 of UNH. The final score was UVM 93, UNH 75.

Tareyton delivers the flavor...

Here's one filter cigarette that's really different!

The difference is this: Tareyton's Dual Filter gives you a unique *inner* filter of ACTIVATED CHARCOAL, definitely proved to make the taste of a cigarette mild and smooth. It works together with a pure white *outer* filter—to balance the flavor elements in the smoke.

Tareyton delivers—and you enjoy—the best taste of the best tobaccos.

5 Games Left

by Mike Zeltzerman

The 1960-61 edition of the UVM basketball team is now heading into the final stretch of their present campaign. Their record of 5 wins and 9 losses so far is not very impressive, but, by the improved actions in their last two games, it is the opinion of many that they will finish out the season with a .500 record. Their fine showings in the last few games with St. Michaels, Norwich, and Union, have illustrated that the Evansmen have come a long way since their first contest with the University of Maine. Much credit must be given to Coach Fuzzy Evans who has led the Cats with limited personnel. However, Fuzzy would be the first to admit that the five starters have really come into their own successfully. Benny Becton, has been a standout all season with his terrific shooting and superb rebounding. Fine shooting and great playmaking by Capt. Harry Ellis and guard Richie Ader have aided the squad thus far and will the rest of the season. Jack Shabel, like Becton, has been a standout in popping in those points, fine playmaking, and strong defensive work. The most improved player has probably been John "Spider" Stahler. His fine work under the boards has given the squad the needed assistance in a very weak spot.

The team has 5 more games to play, and they should be successful in 4 of them. The two New York schools, St. Lawrence and Clarkson will probably start the parade of our victims. Massachusetts will be very hard to beat on their home court, but another win over Middlebury topped off with a "Kake Walk" victory over a strong Brandeis team will result in a very successful .500 season. Even if this sophomore studded team does not produce, the under-classmen will see some fine basketball from returning lettermen in the next few years.

RIFLE

(continued from page twelve)

captain, says confidently, "We expect to walk away with the First Prize Trophy."

The second rifle team fighting for the Vermont colors is the ROTC Rifle Team. It boasts a [illegible] out of 21 wins. Their only loss was to Tennessee but was close. 1425 - 1420. The team average is 1421, ranging from a high of 1429 to a low of 1415. At the XIIIth US Army Corps match, in which all universities in the New England area competed, the team placed fifth, shooting a 3689 out of a possible 4000. Last year, it placed twelfth. The ROTC team also recently competed in the William Randolph Hearst and First Army Intercollegiate and Interscholastic meets. It hopes to place among the first three places in both meets.

The third University of Vermont rifle team is the Freshman Team. This team has so far had an undefeated season. Most of its meets are postal. In these postal meets the opposing teams shoot at their own respective schools and send in their scores to the league Chairmen. The Freshman Team is a member of the University of Pennsylvania Rifle League. There are fifteen schools in the league, including some southern schools such as the University of Tennessee and others as far north as Western Michigan University.

All three teams have already remarkably improved their performance over the past year. This is evidenced by the fact that the Varsity Team has a definite possibility of winning the Yankee Conference, that the ROTC Team will most probably go all the way to the National Intercollegiate and Interscholastic championships, and that the Freshman Team has had an undefeated season. When asked about the cause of their more obvious successes this year, most team members point to their new coach, M/Sgt. Joel Surrell. A typical comment is, "Sgt. Surrell really works hard for us. He sure got us going the right way."

'Mural Mirror

by Dick Rappaport

This year's play in Intramural Basketball was characterized by exciting games and close races in all four leagues.

The league with the best balance was League A, which at the conclusion of the regular campaign had a three way tie for first place, among Phi Sig, Kappa Sig, and Delt Psi. In the playoff, to determine the circuit's top finisher, Phi Sig edged out Delta Psi 30-27, for the right to encounter Kappa Sig, which had drawn a bye. The following day Phi Sig defeated Kappa Sig 31-21 for the league crown.

The race in League B, although not as close as League A, was close nevertheless. Sig Ep was forced to sweep all of its six contests to capture first position by one game over Theta Chi, and become the only undefeated fraternity team.

In the Fraternity Championship between the winners of Leagues A and B, Sig Ep trimmed Phi Sig 35-30, and stretched its winning skein to seven.

The two independent leagues, C and D were won by Quimby's and the Knights respectively. An unblemished record was registered by Quimby's in regular loop play, as it finished with a margin of one game over Wills. The Knights were forced to oppose the Thurstons in a playoff game to break the first place deadlock that existed between them. In the contest, the Knights triumphed 42-35.

The Independent Championships saw the Knights hand Quimby's their first loss of the season, 44-32.

The All-Campus Championship originally slated for a month ago, was rescheduled due to final exams and mid-semester vacation and was played yesterday between the Fraternity Champion, Sigma Phi Epsilon, and the Independent Champion, the Knights.

League A	Won	Lost
*Phi Sig	7	2

FROSH FROLICS

By Robert Weiner

FROSH WIN TWO

The UVM basketball team continued on the [illegible] ways by defeating the Norwich plebes last [illegible] afternoon, 70-49. This was their ninth win [illegible] games. Chuck Glick and Dave Stassburg led the [illegible] ing 34 points between them.

The first few minutes of the game saw [illegible] on the part of both sides. Eventually, the [illegible] ed their superiority by building up a [illegible] The half-time score was 49-19. A pleasant [illegible] ing the first half was the fine playing of [illegible] also clicked for three baskets.

In the second half, Chuck Glick hit for ten [illegible] give him a total of 18 for the afternoon. St[illegible] Lawson had 16 and 11 respectively.

On Monday night, the Kittens won their tenth [illegible] 70-41. Stassburg had 18 points and John Babcock [illegible] 16.

The freshman team is now 10-0. With four [illegible] maining, they have a very good chance of going [illegible] al. The only serious obstacle appears to be [illegible] Michael's frosh. In a previous game UVM [illegible] one point on home court.

KITTEN SPOTLIGHT

It has been generally been accepted that the [illegible] school basketball played in the country has been in the New York Area. The UVM Kittens have taken advantage this fact, by having six players from this area [illegible] team. Leading this group are John Babcock and [illegible] Glick.

Babcock is 6'1" guard who played alongside his friend Dick Ader at McBurney Prep School. Ader is starting Varsity for UVM.

Glick played his high school ball at Far Rockaway High, where he starred in his junior and senior years. Chuck is also 6-1 and plays guard.

Bobby Nurse, Jerry Torch, Jim Suskin, and Larry Bo[illegible] round out the New York City ballplayers. Although they have not broken into the starting lineup, they have proven their worth to Coach Lapointe.

The team has two home games left on its schedule, Middlebury on February 15 and St. Michael's on the 18th. Let's all get out and give this team the much needed support they deserve.

A dunk by UVM's Ben Becton, with room to spare. (Photo by R.H. Reis)

Meet The Catamounts

by Howie Gorney

DICK ADER

A sophomore from New York City, Dick has been one of the "standout sophs" for Fuzzy Evans' Catamounts this season. "Bugsy" was leading scorer on the freshman team, with 207 points in 12 games, and apparently has not lost his touch in this campaign. While at McBarney High School in New York, he captained the baseball and basketball team for two seasons and was all-prep choice in basketball for three years. As a result, he won the Athlete of the Year award in his senior year. Dick is an accounting major in the College of Technology, and is a member of Phi Sigma Delta fraternity.

BENNY BECTON

Not much can be said about "Bouncing Benny" that has not been set forth in praise of him before. When watching 6'2" Becton on the court, one would insist that he uses an invisible trampoline to soar into the stratosphere to grab rebounds out of the arms of men five or even six inches taller than he. As an example, we must express our deepest regrets and condolences to that 6'8" center from the University of Mass. who evidently had not heard of Benny's kangaroo-like instincts. Many was the time when this amazed opponent, a few inches off the ground himself, had to crane his neck to observe Becton grabbing rebounds or popping in points.

Benny is a sophomore, from Boys' High in Brooklyn. He played basketball, naturally enough, in high school, but also made the honor roll and graduated cum laude. Benny is an accounting major in the College of Technology.

JACK SHABEL

A slender 6'1" sophomore, Jack looks like anything but a basketball player off the court. Yet, once on the floor, those who doubt his ability are immediately reassured that Jack is the "scrapper" on the squad: always on the move, quick to spot a defect in the opposition's plays or strategy. In the point-producing department, he can really produce. Look for a lot of fine play from Shabel the rest of this season, and for the next two years. Jack is a math major in the College of Arts and Sciences and plans a career in math.

Sports Questionnaire

by Mike Zeltzerman

Do you think that the girls' ski team at UVM should be encouraged?

Terry Safford '63 – The girls' ski team should be encouraged if proper training were available, as well as adequate facilities.

Mary Bunting '63 – Definitely. Girls sports are just as important as boys. Vermont has the facilities for skiing and they should be taken advantage of by girls as well as boys.

Ann Van Guilder '62 – I do, because I think it is an integral part of the north and should not be limited to men. There are not enough competitive sports for women. Any sport that contributes to intercollegiate rela-

tions should be en[illegible] Many of the women s[illegible] pecially from Vermont, not be denied this [illegible]

Sharon Berry '62 – [illegible] girls have the interest [illegible] ability, it should be en[illegible]

Dave Scott '64 – Yes. [illegible] are good for girls. Th[illegible] more unifying organiza[illegible]

Larry Scuder '64 – [illegible] not take advantage of [illegible] here.

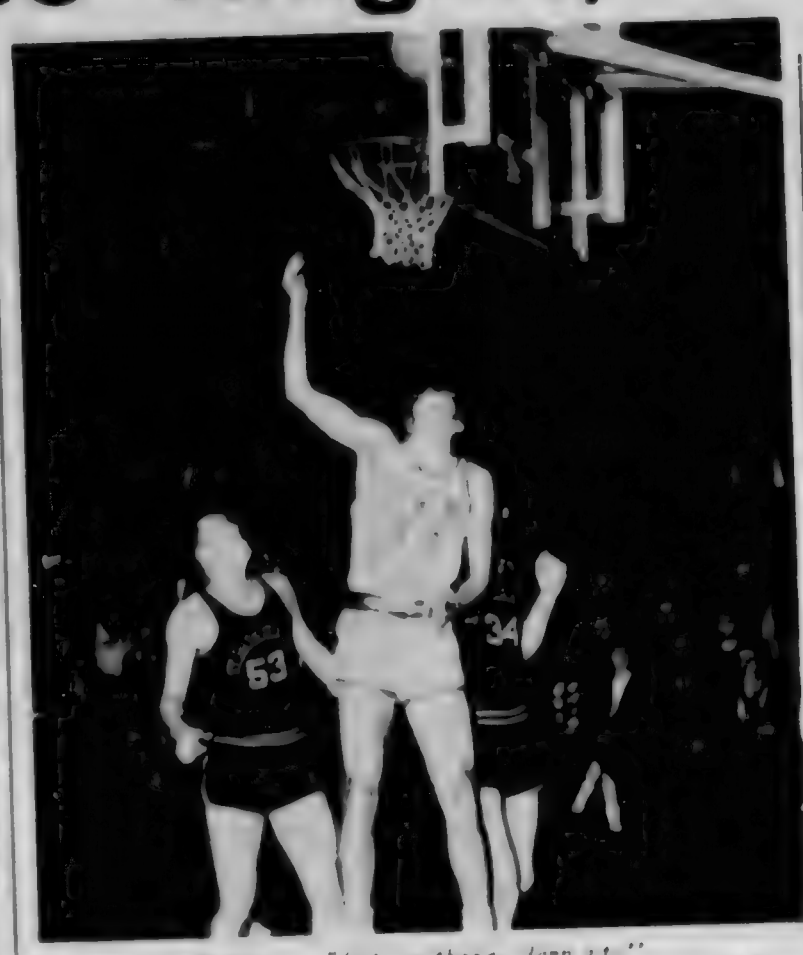
Evansmen Upset Union 76-68; Unhorse Knights, Lose To Cadets

Avenge Previous Loss

by Frank Bolden

"Go Cats go!" -- Go Cats go!" This is the sound that filled Memorial Auditorium last week, as the UVM Catamounts inaugurated the competition of a new sport by beating the Purple Knights of St. Michael's for the first time in league competition since 1953.

The new song, "Oh, When The Saints Go Marching Out" - played to the rhythm of the clapping hands and stamping feet of spirited UVM rooters -- was sponsored and conducted by Coach "Fuzzy" Evans. Its tune was sweet music to the ears of all Vermont fans.



There seems to be a bit of doubt as to who was the star performer of the evening. Some critics claim that first string leader, Captain Harry Zingg, who tanged 25 points off the backboards was the star. Others maintain that sophomore Benny Becton, who often received standing ovations from the audience for such timely executed maneuvers as lofting the ball from underneath to splashing the nets from 25 feet was the star performer. Big Ben scored 20 points.

Jack Shabel need some of the spectators with the thrilling manner in which he executed some of the more difficult passages of the score.

The rest of the orchestra comprised Dick "Bugs" Ader and John "Spider" Stahler. These two performers played the parts that harmonized the harmony of the symphony. Bugs, also did a little of everything, played the counterpoints to a turn of 12 points.

Stahler, the man who has made the difference in Coach Evans' new orchestra, provided a steady beat by snatching down many valuable rebounds. He scored 6 points in the process.

This game will probably go down in history as the revival of UVM spirit. The fans supported the Cats as if they had bet all of their worldly possessions on the outcome of the game. Prior to the game, Vermont was the underdog, but our team came through. The final score was St. Michael's 66, Vermont 78.

John Stahler - "Get in there, Jann it."
(Photo by R.H. Barber, SPS)

Roy Stanton ON SPORTS

ONCE AGAIN

Once again, an old question arises. Should UVM institute a Physical Education Major? The facts have been gathered, and I shall try and relate them as "unbiased" as possible.

According to Mr. Charles Christensen, Ass't. Prof. of Men's Physical Education at UVM, "There is a definite need for Physical Education teachers in the state of Vermont." FACT: 50% of the high schools in Vermont offer no physical education program whatsoever. FACT: Properly trained Physical Education teachers are needed immediately. FACT: Although many large universities offer Physical Education as a major, an all-sports curriculum does not constitute a TRUE Physical Education major. FACT: A Physical Education program, of the type desired at Vermont, is NOT a "snap course". A few of the courses listed in the University of Vermont Physical Education curriculum are Human Anatomy, Human Physiology (nervous system, etc.), Physiology of Muscular Activity (conservation of energy, proper dieting, and the respiratory, digestive, and circulatory systems), and Kinesiology (analysis of movement in sport -- body movement; the system's function in various activities). In addition to these courses, a related study of Psychology, Sociology, etc., -- or a basic two year Liberal Arts program is to be instituted.

A common misconception is that in order to be a Phys. Ed. major, you have to be "big and thick." A person is educated through physical activities, NOT physically. Activity develops the proper breathing method, posture, and body function in general. The University's Physical Education program will be taught in cooperation with the UVM Medical College.

At present, there is no major school in Vermont that offers a Physical Education major. Johnson Teachers College currently has a Phys. Ed. minor, and is thinking of instituting a major.

The following, quoted from John Chamberlain by Red Blaik in the Burlington Free Press on Wednesday, November 16, 1960, is self-explanatory.

"Caught between the incompatabilities of text book, the student often loses all contact with the cause-and-effect world. "In football this does not happen. On

(continued on page eleven)

RIFLE TEAM

There are three rifle teams at the University of Vermont. The first is the Varsity Rifle Team, which has recently scored victories over St Michael's, Bowdoin and Dartmouth in shoulder to shoulder matches. This coming Friday the team will be shooting New Hampshire at Durham and the following day February 11th the Yankee Conference Match also held at the University of New Hampshire. The team has improved over the last year that Carl B. Braun team

Come From Behind To Defeat Dutchmen

by Frank Bolden

This past Monday night, the UVM Catamounts closed a 6 point ga and went on to defeat Union College from Schenectady by a score o 76-68. The Evansmen compiled an early 20-9 lead in the first nine minutes, but in their anxiety to really gain a decisive victory, the Cats became careless and Union took the lead. The halftime score was Union 39, Vermont 33.

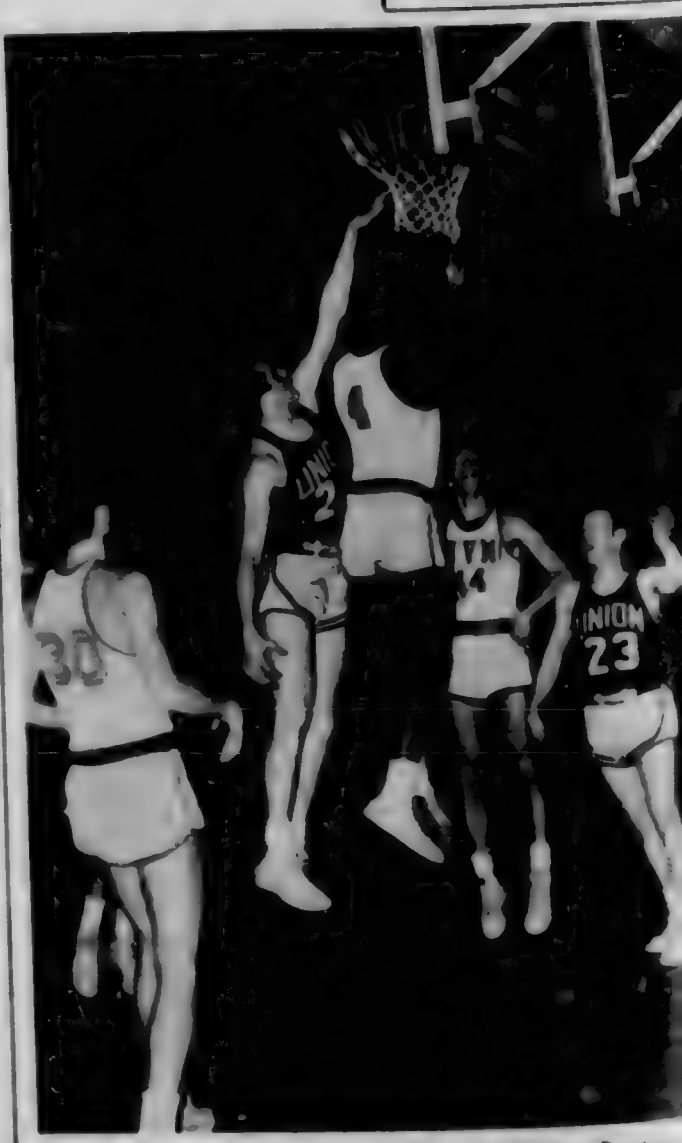
"Rim-riding" Benny Becton, the Cats' center who was named to last week's ECAC team of the week, proved that he deserved the honor, by showing his great versatility. Having difficulty with his jumpshot in the first half, Benny moved inside and tapped in 20 points in the last 20 minutes of the game. He scored a total of 28 points.

Captain Harry Zingg, currently enjoying a hot shooting spree, hit consistantly for 19 points. Richie "Bugs" Ader, who showed the great shooting form that enabled him to be high scorer on last year's frosh team, scored 12 points.

Ader and Jack Shabel often teamed together to execute some really marvelous fast breaks. They were able to do this only because of the fine rebounding of John Stahler.

Union gave Vermont a rough time because of a fine performance by their star, Santos, who set and drove for 27 points--second only to Becton.

Midway through the first half, Coach "Fuzzy" Evans had his team switch from a man-to-man defense, which they had used to some degree of success in the opening minutes of the game, to a zone. Union with some fine shooting by Santos, and a few timely sets by Tyndall, s took the lead.



Vermont, in order to re the lead, had to abandon the zone and return to the man man defense. Pete Brem did good job of guarding Santos a Shabel had to leave the with 4 personal fouls.

With about 14 minutes le the game, the score was 51, Vermont 45. With the port of the fans, Zingg, B and Ader rebounded, passed, shot until Ader put the ahead with a twisting, dri lay-up. From here the opened up an eight-point that Union couldn't overc

It was obvious from the ing that the fans expected ther thriller like Saturday's wich game. This, however not the case. Final score: mont 76, Union 68.

Snow Sculptures Glamorize Kake Walk Weekend

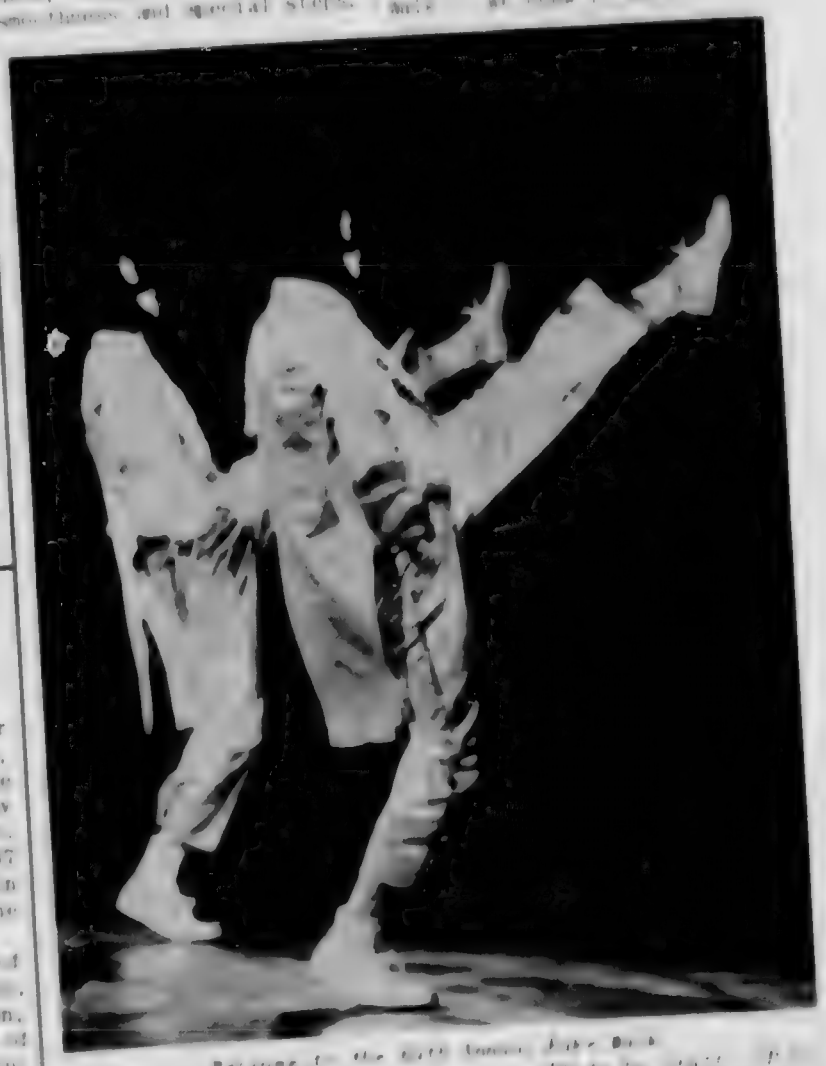
By Katey Schleifer

The past few weeks UVM ... have been anxiously ... the skies for some ... reason -- Kake Walk ... and so is the snow ... contest. Even at ... ent, fraternity and ... members are busily ... additional snow to ... their projects.

... sculpture contest ... the newer events of s winter week-... in 1940 on a non-... basis, snow sculp-... ture as it, gained such ... enthusiasm from the ent that trophy was offered t displaying ture. The stru... ... to be judged on theme, its exe... ... the sculpture's d and night. ..., 1941 was a to the present ... was little snow, ... to be reported pport the fra... ed a the past prove re.

... ...ed are ow is pack... ...ed down firmly and water is poured over sections of the structures to hold its shape. Usually the sculptures have a wood base or supports which are covered completely with snow. Hot irons are usually from the house to melt the snow in desired places. This year snow has been carted in from Stowe or nearby fields. Once the huge piles of snow are collected they are guarded for dear life and prayers are said so that the rain or sun will stay away until the contest is over. Finally the sculptures will not be completed until the judges are walking up to the houses.

Although this year's snow has settled far to the south of the UVM campus, the snow sculptures are proceeding as if we had an abundant supply. The fraternities and sororities have taken over the contest for this year although one sister living quite a ways away came to compete. Since the weather has been so warm the past week and since some of the fraternity ... from the Vermont countryside is



... very fine sculptures this year if the cold weather holds out until Sunday when they will be judged.

Octet Begins New Series

As the initial program for the Lane Chamber Arts Series, the Ira Allen Chapel will be the setting next Tuesday night for the Vienna Octet. The group founded in 1947 has appeared once before in Burlington on the second Lane Series in 1956.

The octet is comprised of two violins, a viola, a cello, a bass, a clarinet, a bassoon, and a french horn a group of stringed and woodwind instruments which are world-known for their "exquisite and enchanting music." As the name suggests, the musicians all come from Vienna, and all except for one, occupy first chairs in the Vienna Philharmonic.

The octet first made its bow in the Lucerne Festival of 1947, and since that time has traveled to play in the major ... festivals throughout Europe. In the ten years ... already made in the United States, the Vienna octet has received outstanding reviews, as witnessed by the New York Times Comment "It was the sort of concert that makes one know their passion is a real one." This reaction ... clear and without hesitation

Self-Crowned King Of UVM Not Interested In KW

by STEVE SOHN

Bishop Homer A. Tomlinson, of the Church of God and king of the World amongst other self-given titles, today crowned himself King of the University of Vermont.

The coronation was held at 4:00 on the steps of Waterman Building. To a cheering gathering of at least 300 cheering students, Bishop Tomlinson presented himself in his regal robes and carried the flag of his organization, the Theocratic Party. On hand also were several press and cameramen from the local newspapers and radio-TV stations.

Before this cheering crowd, the King crowned himself and proclaimed some of his aims, principles and a history of his party. After his own coronation, the King crowned a prince and a queen as his representatives at UVM. He then offered more oratory, after which he retired to Lower Waterman to change from his regal robes. When asked how his coronation was received, the King's reply was, "This is great!"

In a press conference held in the Student Lounge prior to his coronation, he answered several questions. As to his success, the Bishop looked forward to this with the help of his church and also gave some background on the movement. The church of which the King is head was founded in 1903 by his father, Bishop A. J. Tomlinson. The congregation started with 15 members and now has 150,000,000 interested members. As Life Magazine reported, his congregation is the "Army Air Force in Christ-ianity." Tomlinson wishes the world as a "larger parish" in which to preach and to abandon their "evil ways" of alcohol, smoking, war, etc.

His campaign of prayer started in Burlington this year, when the King received Divine call to be a witness to the peoples of the world. UVM included. After his meeting at UVM, the King proceeded to a similiar campaign at St. Michael's College in Winooski, one more stop in his current campaign to be crowned of all American colleges.

Uneasy rests the head that wears a crown, even a paper one.

Bishop Homer A. Tomlinson, King of the University of Vermont, shortly after his recent coronation. (Coleman, '65)

KW Cover Credit

Kake Walk Weekend, the University of Vermont's traditional Winter Carnival, is an event concerning the entire University. For this reason the Kake Walkers gracing the covers of this issue are walking against a background of College Row buildings. They are also wearing green and gold costumes, representative of the entire university rather than of any one particular fraternity.

The color photographs for both the front and back covers of this issue were taken by Mr. Horace Eldred, head of the University's Audio-Visual Services, with the able assistance of Morton Lord. Reproduction of the photo was done in a four color offset method by the George Little Press for the CYNIC's regular issue.

UVM is the first college in the United States to publish newspapers with the cover in color. The first color cover was on the Kake Walk issue of 1954. Since then many schools throughout the country have followed the CYNIC's lead in this field.

David Steele, CYNIC Editor-in-Chief says: "I would like to thank everyone who helped to make this issue a success I am sure it is. Without the magnificent cooperation of everyone involved in this year's cover, the walkers to photographers, the printers and myself would not have been able to

NEW ENGLAND ELECTRIC SYSTEM

From the 73 steps across the turbine [illegible] of New England Electric System's [illegible] Steam Harbor generating station [illegible] as fast you can do it in a minute [illegible] a half. But Dick Dunn hasn't had [illegible] count the steps or measure the [illegible]. He's been too busy learning [illegible] the plant.

His engineering training has al[illegible] taught him plenty about what [illegible] engineers should do. Now, as a [illegible] student with New England [illegible] he's getting a first rate chance [illegible] actually see the equipment oper[illegible] in a large modern generating [illegible] — one of the most efficient [illegible] of its kind in New England.

Before Dick's training program is [illegible] he will have spent some time [illegible] each of the Company's modern [illegible] electric stations worked with the [illegible] engineers who control the flow of [illegible] through New England Electric's [illegible] and growing service area. [illegible] closely with other departments in [illegible] generation, distribution, sales and [illegible].

Another training student would per[illegible] prefer to be assigned to one of [illegible] engineering departments. But Dick is an engi[illegible] who likes his engineering plant [illegible]. When his training program is [illegible] completed he'll be assigned to a large [illegible] generating station. It will be a big [illegible] and working there will be a big [illegible]. But that is what Dick prefers [illegible] that is what New England Electric [illegible] knows about people like Dick.

Each year the Company recruits a [illegible] number of young men — promising [illegible] college graduates — who are eager [illegible] and capable of handling responsible [illegible] positions. From this group the Com[illegible] in later years will select its top [illegible] executives and with 12 managerial [illegible] and supervisory people due to retire [illegible] early for the next 10 years, the [illegible] opportunities are excellent.

New England Electric will be re[illegible] interviewing on campus on March 10. [illegible] your placement director for de[illegible].

Editorial:

How've You Been?

Welcome back alums!

The traditional Kake Walk editorial asks the returning alumni for money. This year however, we assume that the average alum has been made well aware of UVM's need for money through the various activities of the Alumni Office and other interested bodies. The CYNIC has, therefore, decided to review some of the various activities of students throughout the entire year -- to inspire nostolgia in alums and wonder in others. Kake Walk is a logical time to do this since Kake Walk marks a climax in the "activities" year -- a year which, like the financial year, has little to do with the Julian Calendar.

Those of you who celebrated Kake Walk with us last year remember a weekend of walking and skits which far outshone any previous efforts -- except, of course, the ones you participated in -- and perhaps you will agree with us when we say this year is ever better. But after you left last February, we got to work, trying to keep the *joie de vivre* and friendly rivalry of Kake Walk to season the activities still to come. Remember the IFC Sing? We still have it, and last year the harmony and variety actually managed to let us forget the unbelievable acoustics of our beloved Memorial Auditorium. To remind you subtly of money and the Gym, we also watched a number of courageous fraternity men cavort joyously in an event labelled the Hairy Legs Ballet, which added a sizable sum to the Gym fund. And with spring fever, and the restless idealism of youth, we picketed local chain stores in protest against segregation policies in the South.

The year wore on, and we never wore out -- SA elections were accomplished with a fine flair, adding for the first time a party system complete with platforms and candidates elected for looks *and* thoughts. The roller coaster was on its way down the hill -- Spring Formals (Wow!), Beach Parties and Social Pro. Dead Week (Like yeah?). Exams (Whew!), and here were Senior Week and Commencement before we felt March was over! And, we had produced a new lot of alums to come back at Kake Walk time.

The roller coaster hit its usual low during summer "vacation" but come September the passengers climbed aboard again -- some of us new to the sensation, others taking that "Second ride, only a quarter," that the barker heralds. Here again, and once more the pace picked up -- SA is revising its Constitution (how many times did you try to do it?), meeting with all sorts of VIPs and problems away out in North Hero. Homecoming -- who came? -- it's becoming a big alum week end, almost vying with Kake Walk for the title. Being sociable souls, we remember most vividly occasions like Winter Formals, Christmas vacation (and the big party boys lived it up at home), and then that hiatus of exams which always means -- just a few more weeks until Kake Walk!

Here we are, and here you are -- we all know what goes into making Kake Walk the biggest event in the United States. Right now we're pondering a rumor which has it that JFK was Kake Walk King back in '41 -- during the War the girls had to import just about everything!

Like the man says, Mabel, welcome back, alums -- have the greatest Kake Walk ever, and remember -- WE DIDN'T ASK YOU FOR MONEY. But since you've got your checkbook out...

D.H.S. - F.P.

Series Begins

(continued from page one)

Mozart, and Clarinet Quintet in A Major by Mozart. The major work of the program will be the octet in F Major by Schubert. This is recognized by the critics and is among a number of albums they have on sale on the London label.

There are still season tickets for this series on sale, and single tickets may be bought at the door of the theater for this performance. Because this year is the first time that such a series is to be presented, the enthusiasm with which it is received will determine the future of any such type of program. If the response is not strong enough, the series will be discontinued next year. So, those who are interested should try to attend or else we will lose this most valuable group of presentations.

Letters To The Editor

Opposes Change

To the Editor of the CYNIC:

In your issue of February 2 of the CYNIC I was surprised to discover that a new Academic Calendar is being considered by the Administration. Upon further examination I was disturbed to learn of the exact nature of the changes involved.

I freely admit that the present system is in need of revision. In particular, the period Thanksgiving through Intersemester is somewhat impractical and leads to a partial disruption of the academic process. I do not think that fourteen weeks of continuous classes would be much of a solution. Most students tend to become rather edgy under the present system where only nine weeks of continuous classes occur. It may be imagined what the five additional weeks would produce.

A further objection to the proposed plan stems from the opening and closing dates of the academic year. As the Editorial pointed out, few students would benefit and many would suffer, particularly those with jobs in the resort areas. The contemplated opening occurs on Labor Day. This is one of the biggest weekends of the summer and all available help is needed. A very considerable number of employers will ask for assurance from the college student that he will be available for this weekend before giving him a job.

I realize that this is only a tentative program and that there are many alternative plans that could be adopted. I feel that three or four such programs ought to be proposed by the administration. A referendum could then be held for an expression of student opinion. The student must accomodate himself to a new Academic Calendar and should be allowed some measure of choice in its acceptance. It is time that the present Administration ceased its 'father knows best' attitude and began to treat the men and women of this University as mature and responsible adults. I earnestly hope that on this particular issue at least, the student body will be treated as partners in their own educations.

Respectfully,
Russell J. Marx, '63

'61 Greek Rushing

An extremely successful rushing period on our campus has taken place this year.

Interfraternity Council reports that 300 men rushed and from this number the 16 fraternities pledged 260. A new feature in IFC rushing this year was the extension of the isolation period preceding rushing. Previously this period covered the final week before rushing, but this year it began immediately following christmas vacation. The purpose was to eliminate much of the so-called "dirty rushing". In all, a member of IFC Rushing Committee has called this season's rush period a "smashing success".

Approximately 200 women students took part in Panhellenic rushing. The seven sororities have pledged a total of 118 girls. The only discrepancies from previous years were that one of the parties was made slightly less formal, for the comfort of all, and that the formal rush period was extended a day.

Why Not ?

by JULES OLDER

FOR IMPORTS ONLY

Little girl, is your date acting [illegible] this weekend? He probably is, but don't [illegible] sanity. Honey, it's KAKE WALK -- [illegible] since frozen custard! Your date loves [illegible] love it, because there just aint' [illegible] Saturday night you'll probably be [illegible] strange yourself.

That's the way this weekend affects [illegible] -night-strangers say tearful goo-byes or [illegible] girls find themselves with their dates [illegible] the end of the festivities. Yes, it's an [illegible]

WORKING FOR WALKING

A deep analysis of the causes of this [illegible] merriment would be silly. But a few [illegible] subject won't hurt.

We at UVM take Kake Walk seriously. We [illegible] it. This may give you some insight into [illegible] your UVM bred date. He's just put so much [illegible] and toil into preparations for this gala affair [illegible] he's *got* to have a good time. No two ways about [illegible]

And if you expect to win (or keep) the [illegible] you'd best be in high spirits yourself.

PHUN AND PHROLIC

For at Kake Walk, nothing is tolerated except phun, phun. When in Vermont, do as the Catamounts. Drop your books, let down your hair, and work on establishing a few vivid memories for those declining years.

And if you don't enter into the spirit of the occasion, dear, not only will you have a perfectly miserable time, but your hair will fall out, your eyelids will turn to sandpaper, and a wicked ogre will gobble you up.

Now you wouldn't want that to happen, would you? Of course not. So live a little, child.

WHY NOT? It's KAKE WALK, isn't it?

From Stunts To Skits: Part Of KW History

Way back in 1903, Washington's Birthday was set aside for the day of UVM's new addition - Kake Walk, with all its excitement of walking fo de kake. As the years went by, the interest in Kake Walk grew and in 1921, the activities of the winter carnival were extended for two nights and later three. With this extension, the skits were born.

At first the skits were called stunts, but contained the same ideas as today's skits. However, the number of fraternities participating was greater, usually numbering nine in all.

Well once more, Kake Walk time is upon us. The fraternity brothers had worked hard on the writing of their skits. They submitted them to the committee which after reviewing them all, decided that Sigma Nu, Phi Sigma Delta, and Tau Epsilon Phi would present their skits at this year's 64th Kake Walk festivities.

With the time appr[illegible] so quickly, the three [illegible] nities are busily pr[illegible] with one thing in mind [illegible] ing away with the priz[illegible]

The Sigma Nu's will [illegible] what excitement goes [illegible] right before Kake W[illegible] of the fraternities [illegible] self without a chap[illegible] house mother. You will [illegible] to see how they so[illegible] problems in their skit[illegible] Charles?" Phi Sig[illegible] will present "Once A[illegible] an allegorical musi[illegible] with King Arthur's [illegible] its setting. The h[illegible] himself facing many [illegible] ments before the c[illegible] prise at the end of [illegible] In the 3rd skit, "[illegible] Robery", the Billings [illegible] will be robbed of [illegible] books. The UVM 'rus[illegible] assistance in findi[illegible] did it. In the con[illegible] Epsilon Phi pursues [illegible] bers to find out [illegible] that crime does pay.

Fraternities Present Traditional Colors

By ILENE BARD

Endless hours of practice . . . and then the big night! (Carr Studio)

Where is that home-brew? This is worse than lipstick! (Carr Studio)

Acacia:

The walkers from Acacia will be wearing black vests with gold stripes, black trousers with a gold stripe. The Acacia fraternity house suffered the loss of one ice cream truck when the walkers were practicing.

Alpha Epsilon Pi:

Alpha Epsilon Pi can be identified in their traditional outfits of gold pants with a blue stripe. The vest and coats of the outfit are gold with blue trimming. Alpha Epsilon Pi recommends a light supper reputation and loosening up before the walking to all Kake Walkers.

Alpha Gamma Rho:

Making its debut on the Kake Walk floor, Alpha Gamma Rho will be wearing green and gold outfits. The fraternity house was curious as to what brand of liquid the brothers were bringing into the house in large cans. To his amazement the liquid turned out to be liniment!

Alpha Tau Omega:

A blue outfit trimmed with a gold stripe and gold buttons on the vest will be worn by the walkers of Alpha Tau. They suggest the removal of make-up by using cold cream, soap, water, and more cold cream.

Delta Psi:

The traditional outfits of Delta Psi resulted from a mistake. The costume, instead of arriving all black with a white stripe, became black and white verticle stripes.

Kappa Sigma:

Kappa Sigma will be wearing its fraternity colors with green pants, red vests, and a green coat with tails.

Lambda Iota:

The walkers for the "Owl House" will be representing their fraternity with white pants, a wine-red vest, and a red and white, candy-cane striped jacket. The Owls suggest the removal of make-up with the use of equal parts of worcestershire sauce, bitters, and rubbing alcohol mixed in a wooden bowl and applied externally with steel wool.

Phi Delta Theta:

Blue pants and blue jacket with silver trimming will identify Phi Delta Theta.

Phi Mu Delta:

The brothers of Phi Mu Delta will be especially interested and proud when the walkers appear in orange and black outfits.

Phi Sigma Delta:

Phi Sigma Delta will be represented by walkers wearing a violet outfit with white lapels and a white stripe down the leg. The walkers suggest that a "home-brew [illegible] is quite effective, but "the pain lasts for about an hour after losing the leg."

Sigma Alpha Epsilon:

Kelly green and [illegible] sequins trim the traditional outfit of Sigma Alpha Epsilon. Excessive amounts of ice cream and plenty of grease remove the make-up on their walkers.

Sigma Nu:

The Sigma Nu suit of [illegible] for the Kake Walk is made of pink and white satin. The problem of removal has been taken care of by an [illegible] the face any excess kake from the house parties on Friday and Saturday nights."

Sigma Phi Epsilon:

The walkers from Sigma Phi Epsilon will be wearing red and purple outfits.

Tau Epsilon Phi:

Tau Epsilon Phi will be represented by walkers wearing blue tails and white pants with a blue stripe down the walkers seems to amaze the brothers by his quick recovery powers; a sprained ankle was kicking the next day after it was injured.

Theta Chi:

Military red and white costumes will represent the walkers from Theta Chi. After a few experimental trys they decided that the most effective make-up remover was lighter fluid. With the assistance of a match it peels right off. One of the walkers burned his back while trying to take care of the other walkers.

And now the colors of life, the 64th Kake Walk of the University of Vermont.

On Campus with Max Shulman

Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.

"THE SLOW RUSH"

Illustrated below is the membership pin of a brand-new national fraternity called Sigma Phi Nothing. To join Sigma Phi Nothing and get this lofty membership pin absolutely free, simply take a pair of scissors and cut out the illustration and paste it to your chest.

Let me pause to state that I do not recommend your joining Sigma Phi Nothing. The only thing I recommend in this column is Marlboro cigarettes, as any honest man would who likes a filtered cigarette with an unfiltered taste, who yearns to settle back and enjoy a full-flavored smoke, whose heart is quickened by a choice of soft pack or flip-top box and who gets paid every week for writing this column.

It is difficult to think of any reason why you should join Sigma Phi Nothing. Some people, of course, are joiners by nature; if you are one such I must tell you there are many more ill-better organizations than Sigma Phi Nothing for you to join—the Mafia, for example.

But if you should join Sigma Phi Nothing, let me give you several warnings. First off, it is the only fraternity that admits girls. Second, there is no pledge period; each new member immediately goes active. Perhaps "inactive" is a more accurate term; there are no meetings, no dances, no campaign managers, no games, no dues, no grips, and no Greek.

The only thing Sigma Phi Nothing has that other fraternities have is a fraternity hymn. In fact, two hymns were submitted

to a recent meeting of the national board of directors (none of whom attended). The first hymn goes:

Hotcha, hoop-hoopee-hoop
Watta a rooking holiday soup

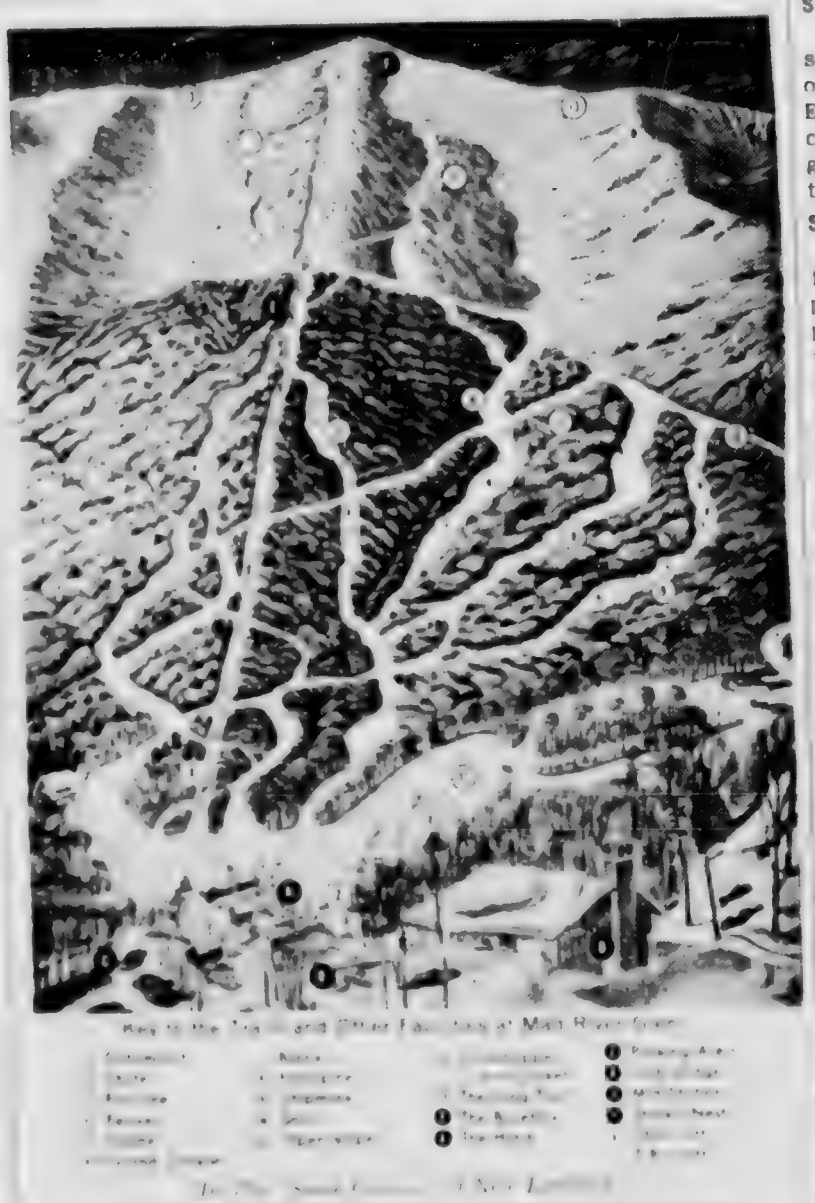
The second hymn is considerably longer:

A [illegible]
I want it to [illegible]
When you're sitting alone
Remember the name!

Pending the next meeting of the national board of directors, which will never be held, members are authorized to sing either hymn. Or, for that matter, *Stardust*.

Perhaps you are asking why there should be such a fraternity as Sigma Phi Nothing. I will give you an answer—an answer with which you cannot possibly disagree. *Sigma Phi Nothing* fills a well-needed gap.

Are you suffering from mental health? Is logic distorting your thinking? Is ambition encroaching on your native sloth? Are your long-cherished misapprehensions retreating before a wave of facts? In short, has education caught up with you?



If so, congratulations. But tell the truth—wouldn't you like to make an occasional visit back to the good old days when you were not so wise and composed and industrious—when you were, in fact, nuttier than a fruitcake?

If you pine for those old familiar miasms, those dear, dead vapors, join Sigma Phi Nothing and renew, for a fleeting moment, your acquaintance with futility. We promise nothing, and by George, we deliver it!

© 1961 Max Shulman

• • •

We, the makers of Marlboro, promise smoking pleasure and we think you'll think we deliver it—both from Marlboro and from our new unfiltered king-size Philip Morris Commander. Welcome aboard!

... success. After the
... the boys are prac-
... several hours a day,
... and sleeping most
... time.

During the week preceding Kake Walk, there is a final rehearsal in the gym. Although this lacks the resplendence of the "big nights," it is significant inasmuch as this is the first public appearance of the walkers.

And now the time has arrived. The excitement and nervousness have reached their peak and the boys go on to "Walk fo' the Kake," entertaining the audience and bringing honor to their fraternities.

One-two-three-four. Running together builds toughness and stamina.

Make the most of this [illegible] get this treatment after KP.

Stiff, sore muscles are par for the course - a [illegible] run helps.

"I don't care if it is 4 A.M., [illegible] time."

Brown's Vocalist

Les Brown has been a maker of stars throughout the history of "The Band of Renown". The long list of great vocalists including Doris Day, Gloria Wilson, Lucy Ann Polk, and Ann Greer, we would like to add the name of Susan Wise.

Susan has been chosen for the vocal spot with Les Brown for two reasons — she has an excellent voice and she is very attractive.

Singing has been her life for the past eight years ever since she discarded an art career to enter and win the Arcade of Music contest in her home town, Des Moines, Iowa. There were three thousand contestants in this contest from which Susan was chosen best of show. Her prize was an engagement at the Oriental Theatre in Chicago.

The Chicago engagement led to her own daily radio show on station KWOM Des Moines called "Songs by Sue."

After a long rail engagement, Les decided to gain more exposure by singing with the three lads touring the states.

Sue and Les went to Hollywood where auditions received a contract for a local TV show. Offers were overwhelming but Sue, for the same reason she left Des Moines, turned down six-month contracts for the exciting fantasy land. Now Hollywood citizens from Sue's home state can see the girl who has made the most.

"Hey, Mort. You know how much I like to start each new day, [illegible] practice!"

Kake Walk VIPs:

The Band Plays On

The UVM band - as it recently played at Penny Carnival. (Porter, '61)

by SCOTT ASTLE

Everyone knows that Kake Walk is a hectic time around the fraternity parties, a chance to meet a fresh foreign commodity. Little does the realize that Kake Walk is not here that those things. It is but a bit of work. It seems that the people who the most work are those that receive the least credit.

As one is ushered into Memorial Auditorium on one of the Kake Walk evenings it is to the background music of the UVM band. The band is one of the many "unsung heroes" of the Kake Walk week-end. Like a great deal of behind-the-scenes work, it is necessary to make Kake Walk what it is.

Since the end of Thanksgiving vacation, the band has been gathering in Ira Allen Chapel twice a week to work on arrangements for the Kake Walk concert. Mr. H.L. Schultz, Asst. Prof. of Music has spent many hours working over which songs should be played and how he has met with the band and tried to iron out difficulties. It is these difficulties that we little realize.

Practice sessions are interesting for the band has sung its practiced many times in many different ways so that the best arrangement possible is presented. The band is composed of over sixty members. Each one is worked with to get the right effect for the overall performance.

Kake Walk itself presents innumerable problems to the band and its director. The instruments must be taken to the auditorium. The music must be kept together. The lighting for the players is impossibly bad.

The band has to play at most total darkness since part of the effect of the walking is the contrasting darkness of the Auditorium to the spotlighted walkers. The band members have a little light on their music racks but these have a tendency to burn out at the wrong time. The music for "Cotton Babes" is faded and eyes reading almost impossible.

One of the band member's regards is Mr Schultz's problem. He has to keep the attention of the players on him self rather than of the walkers. This is a difficult task since the real performance is much different than the practice sessions. The band has a natural tendency to let their eyes stray from the music and the director to the walkers. Mr. Schultz has a lighted baton, but this doesn't do much in the way of keeping attention.

Mr Schultz's other problem is trying to match the tempo of the band to the timing of the walkers. Each team has a little different style which means that the band has to consider these styles. The walkers have resting steps and different routines. These have to go with the music, but it is not the walkers' job to time themselves to the music, but the music must time itself to the walkers.

After all this, don't get the impression that the band doesn't look forward to Kake

Resident Recalls Origin Of KW Song

Mrs. Ferdinand Streeter of Queen City Park in South Burlington has fond recollections of the Kake Walk of 1912, when she hears the annual promotion of UVM's winter festival with the frequently repeated strains of "Cotton Babes."

At that time her fiancee, Ferdinand Streeter of Manchester, Vt., in the College of Medicine, was student bandleader at the University. Mrs. Streeter tells that Dr. Streeter was the one responsible for the first selection of the famous tune which has become the essential ingredient of the high-spirited carnival.

"Cotton Babes" was composed by Percy Weinrich, who was one of the most famous and productive songwriters of the 1910's and 20's. Although no one except the UVM band ever performs "Cotton Babes" anymore, Weinrich is still remembered as the writer of some of the century's biggest and durable hits, including, "Moonlight Bay," and "When You Wore A Tulip and I Wore a Big Red Rose."

The late Joe Lechnyr, former director of the UVM band, is responsible for making "Cotton Babes" the traditional Kake Walk song. In 1929, the Hayward Building was destroyed by fire and many of the musical instruments burned, plus "Cotton Babes". There are no copies to be found at publishing house, so he sat down and from memory the complete score for all instruments saving the "Cotton Babes" for posterity.

At this 64th Kake Walk a trophy will be awarded for the second time, to the fraternity "which most nearly approaches the spirit and devotion of Kake Walk, exemplified by Joe Lechnyr's memory of this wonderful man." This coveted award was prized last year by Theta Chi.

Mr. Herbert Schultz, present director of the band has worked long and hard with rehearsals of the band and walkers to make this Kake Walk another successful one. The band devotes many hours of practice to the walkers. They also play during Penny Carnival, and perform a short concert before and during the intermission of the walkers both Friday and Saturday nights. A few of the band numbers they will be playing are "South Rampart Street Parade", "Bill Bailey", and "Ain't She Sweet".

MEDICAL SERVICE REPRESENTATIVE

Pharmaceutical sales positions are now available throughout the United States for men graduating with Natural Science majors or Liberal Arts Business Administration majors who have some natural science background. The Medical Service Representative promotes the sales of antibiotics and other pharmaceutical products to physicians, hospital staffs and pharmacists. After an initial training period covering product information, medical terminology, sales techniques and field experience, he is assigned to a territory in which he alone is responsible for sales organization and growth. Territories are designed so that little or no overnight travel is required. He is paid a salary and has an opportunity to earn a bonus for "plus" performance. Car and expense account are provided.

CHAS. PFIZER & CO., INC.

A leading producer of antibiotics with world wide sales, [illegible] more than one quarter billion dollars annually, will have a representative on this campus on

Wednesday, March 1st, 1961

Contact the placement office for an interview appointment.

BELL TELEPHONE SYSTEM

Opportunities for Majors in

PHYSICAL SCIENCES • ENGINEERING
MATHEMATICS • SOCIAL SCIENCES
ARTS • BUSINESS ADMINISTRATION

Telephone representatives will be on the Campus Wednesday and Thursday, March 1st and 2nd, to discuss employment opportunities in the following organizations:

BELL TELEPHONE LABORATORIES

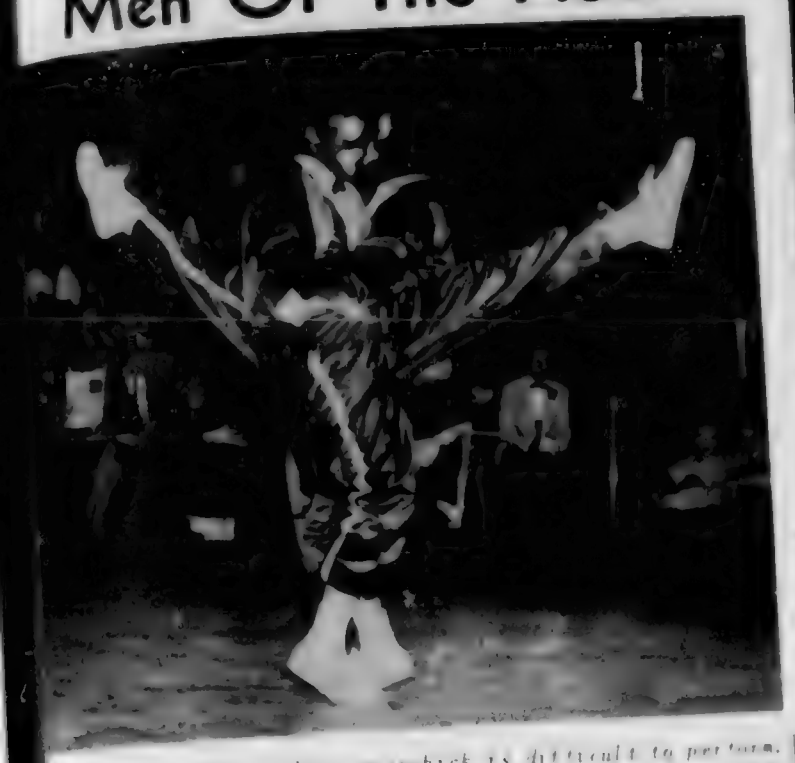
Research and development in electrical communications, electronics, microwaves, acoustics, switching systems for the Bell System, and national defense projects.

OPERATING TELEPHONE COMPANIES

Engineering, construction, operation and maintenance of communication facilities. The following companies will be represented on the campus:

New England Telephone and Telegraph Company
The Bell Telephone Company of Pennsylvania

Applicants will be interviewed for other regional operating companies in the United States and Canada.



WESTERN ELECTRIC COMPANY

Manufacturing, purchasing, installation and distribution of equipment and supplies for the Bell System and national defense projects.

Please make arrangements for interviews through your Placement Office.

By HOWIE SOLOMON

The climax of UVM's annual Kake Walk festivities will come this year, as in the past, with the actual "Walkin' fo' Kake." Here is where the fraternities vie with one another for the top honor of the famous tradition. Much time and energy goes into the preparing of the Walk, both in organizing the skit, and in the actual rehearsing of it. Most of the houses, the director of the Walk for the fraternity has his job simplified a little by the fact that the fraternity traditionally walks in the same style. The walkers may change, but the Walk may not.

The Kake Walk rules are very specific in their description of the Walking form to be used; however the variations in style are easily noticed. These variations are usually found either in the tempo of the glide across the floor, or in the manner in which the important kick is done. Each of these two factors, combined in the judging with the amount of teamwork and coordination displayed by the fraternity's Walkers, will determine the success or failure of the Walking team.

Alpha Tau Omega, with Walkers John Wills and Austin Cleaves, traditionally walks with a long step and a high kick. Sigma Alpha Epsilon's walkers, Bob Carr and Carl Hausler, can be expected to use a high kick also, traveling with a real snappy bounce. The boys from Phi Mu also do what is known as a "Phi Mu walk". Strolling for Alpha Tau Omega, George Beisham and Jack Mello will use their fraternity's traditional two basic steps, a forward and back step and a bounce spin around step. Also look for Phi Mu's walk to have a high kick similar step, sharply performed. The Walkers for Theta Chi, Frank Harrington and Mike Hanson will be striving for perfect unison between them, using a fast step with a high kick. Tau Epsilon Phi, represented by Steve Bernstein and Ed Rutner, will use a fast walk and glide on the floor. They will also show a new reverse diamond routine to Garbell, a winning walk-

er for Delta Psi last year, along with Jack Alger, a walker two years ago, will introduce a new routine for their fraternity this year, utilizing a fairly high kick with double kicking and rest kicking. Kappa Sigma's Tom Eldridge and Max Lauder will show the judges a very quick step. Traditionally from Sigma Phi 'the Walk is performed at medium speed, with a lot of

KW Poster Painter To Receive Cake

Sue Elwood

On Friday night, February 4, a pretty girl junior from Bayonne, New Jersey will receive in the form of a cake and a trophy one of the highest individual Kake Walk awards.

She is Sue Elwood, winner of the 1961 Kake Walk Poster Contest. Her poster, depicting the symbolical Kake Walker in striking orange triangles all on a field of black, was considered the best of the eighteen entries. The posters were judged on their artistic merit and ingenuity.

"At first I was scared," says Sue. "I really didn't think I'd win. Then I got the phone call and I almost fainted. It's wonderful." The call informed her that her poster had been accepted.

All this did not happen by accident. Sue's talent for painting was first revealed in high school where she became Art Editor of Bayonne High's student paper, "Beacon." She has continued her art study and is at present working under Prof. Francis P. Colburn, Chairman of the art department. As a UVM Player, Sue designed the posters for the Player productions, *"Where's Charlie, Arsenic and Old Lace, Brigadoon* and *Ring Round the Moon.*

But it was to this Kake Walk project particularly that she devoted herself; she worked on her poster for more than fourteen hours, in addition to the time spent in preparation.

Sue is an English major and is thinking of entering either the field of commercial art or going into some form of advertising which utilizes English and art.

Ghosts Of KW Past...

February, 1899.

STUDENTS SAVE THE DAY WITH NEW IDEA FOR WINTER HOLIDAY!

The Mid-Winter Ball, [illegible] planned and most anticipated [illegible] University students has been cancelled this year. Always a source of merry-making and general relaxation after [illegible] this annual festivity disappointed many if the students to such a degree that a committee formed under the energetic Frederick T. Sharp, has devised [illegible] which, if met with the success anticipated by Mr. Sharp, might well become a permanent institution here at UVM. It is to be an evening of skits invented, directed and performed by the students, and everyone at the festival will be costumed. The idea is causing much excitement [illegible] and certainly promises to be an unusual and exciting event.

February, 1894:

UVM IS WALKIN' FO' DE CAKE!

Exams are over at least and the annual "relaxation weekend" is drawing near. The question is how shall the University students celebrate it? Last year, a new idea was introduced by Frederick Sharp, a Skit Night. This year the UVM students have really outdone themselves and have come up with a novel idea which promises one of the most unique festivities ever to be enjoyed: a Cake Walk. Any twosome who can walk together and demonstrate their attractiveness, skill, and uniqueness in 'stepping', compete for the grand prize, a cake. Following the precedent set by last year's students, all walkers are to be masked and costumed. The walking couples, boy and girl, aren't restricted to any of the several "Greek Houses" on campus but anyone may sign up to "walk fo' de cake"

February, 1903

WASHINGTON'S BIRTHDAY WEEKEND OFFICIALLY DESIGNATED FOR KAKE WALK!

This year marks the tenth anniversary of Kake Walk, and more than ever the students at UVM are preparing for this most unique winter festival. Following the new rules established in 1897, there will be the traditional skits, in costume, and of course, the Walking. However, this year's Kake Walk Weekend promises to be even more competitive than in times past [illegible] nities are [illegible] skits. The Ind[illegible] better be on the[illegible]

February, 1908

"COTTON BABES" CHOSEN AS [illegible] WALK THEME!

This year for the [illegible] Kake Walk Weeke[illegible] lington Military [illegible] the direction [illegible] Sherman will be [illegible] music for the [illegible] Walking fo' de [illegible] Man has selected [illegible] rich's "Cotton Babes" [illegible] of the more [illegible] walking melodies [illegible] the UVM theme [illegible] Walk. The definite [illegible] lively melody makes "Babes" the obvious [illegible] for the high-stepping [illegible] the Walkers, and it [illegible] that this tune will [illegible] traditional part [illegible] end.

KAKE WALK FEATURES REVIEWED

This year marks [illegible] Annual Kake Walk [illegible]

(continued on page eleven

Walking And Skits Closely Judged

The highlight of Kake Walk is the walking or "walking fo' the Kake", and the skits, which are presented on Friday and Saturday evenings of the weekend. There are certain rules and regulations which must be followed and a point system is used in order to score the teams.

The skits are judged on the basis of Plot, Presentation, Properties and costumes. The first of these is worth forty points, and is subdivided into two parts, continuity and originality, each sharing equal weight. The second is worth fifty points, and again, is subdivided into two parts: teamwork and smoothness, and delivery and voice, each equivalent in value. The third criterium on points which scor- based is properties and costumes worth ten points. The total number of points, therefore, for the scoring of skits is one hundred points. Various rules also apply to skit performance. Each skit is allowed twelve minutes to be presented, which includes entrance onto the floor, production, exiting and clearing the floor of props. During the performance two horns are sounded as warnings, one at the end of nine minutes, the other at the end of twelve. Skits which run over the allotted time are penalized by subtracting the required number of points from the [illegible] score. The rules require [illegible] the skits be composed [illegible] of UVM undergraduate [illegible] who are brothers or [illegible] of the fraternity by Feb[illegible] 13.

The walking is done [illegible] tune of "Cotton Babes" [illegible] is performed by two [illegible] each fraternity. There are [illegible] tain essentials of Kake W[illegible] which the walkers strive [illegible] meet in order to get [illegible] their performance.

The head should be [illegible] rear of the body and s[illegible] form an arch with the s[illegible] ders. When kicking, the [illegible] should be parallel [illegible] ground before the rest [illegible] leg is extended, legs s[illegible] be straight and toes [illegible] When the hands are [illegible] above the head, the [illegible] should be extended and [illegible] rated.

The two walkers who [illegible] pose a team should sh[illegible] ordination and precis[illegible]

As is the scoring [illegible] skits. The walking [illegible] based on a one hundred [illegible] system. The position [illegible] head and shoulders [illegible] twenty-five points, [illegible] thirty points, teamwork [illegible] smoothness, forty [illegible] stunts and special st[illegible] valued at five points [illegible]

The skits and w[illegible] judged on the night [illegible] formance, and the w[illegible] then announced.

keep a head of the game!

Gentlemen preferred by blondes, brunettes, and redheads prefer 'Vaseline' Hair Tonic. That's because most men use water with their hair tonic – and 'Vaseline' Hair Tonic is specially *made* to use with water! The 100% pure grooming oil in 'Vaseline' Hair Tonic *replaces* the oil that water removes from your hair. In the bottle and on your hair, the difference is clearly there! Just a little 'Vaseline' Hair Tonic does a lot!

Essentials Needed In Kake Walking

Thighs are parrallel to ground and toes are pointed down before rest of leg is kicked out. Head is to the rear forming arch with shoulders. Leg and knee are straight and toe is pointed.

Head and Shoulders
a. Head should be to rear forming arch with shoulders.

Kick
a. Thighs should be brought up parallel to the ground before rest of leg is extended.
b. Leg should be straight.
c. Toes should be pointed.

Teamwork and Smoothness
a. Walkers should display high degree of coordination.
b. Rapidity of movement ought not necessarily be considered desirable over less rapid and more decisive actions.
c. Hands when raised in air above head should have fingers extended and separated.

KW Past

(continued from page ten)

ultimate in the history of its development. The various activities added to the gala weekend since its origin in 1893 have grown since that bygone date. The skits and Walking were the basic ingredients of this holiday, and it is usually these two events which come immediately to mind when we think of Kake Walk. However, the ice sculptures which we regard today as an integral part of the Weekend weren't innovated until 1921 and then the competition wasn't among the fraternities and sororities alone. Pops Night and Penny Carnival are distinctive features of Kake Walk which are fairly recent to the holiday.

Kake Walk 1961 shines with such stars as the Brothers Four and Kai Winding at the Jazz Concert and with Les Brown playing at the Ball. Other 1961 Kake Walk activities include Coffee Shop Skits, Royalty Election, Coronation of King and Queen, Basketball Game between UVM and Brandeis and — of course — Skits and Walkin' Po' De Kake!

Judy Hunt, KW Sec'y, At Work

by JANE BUTTLER

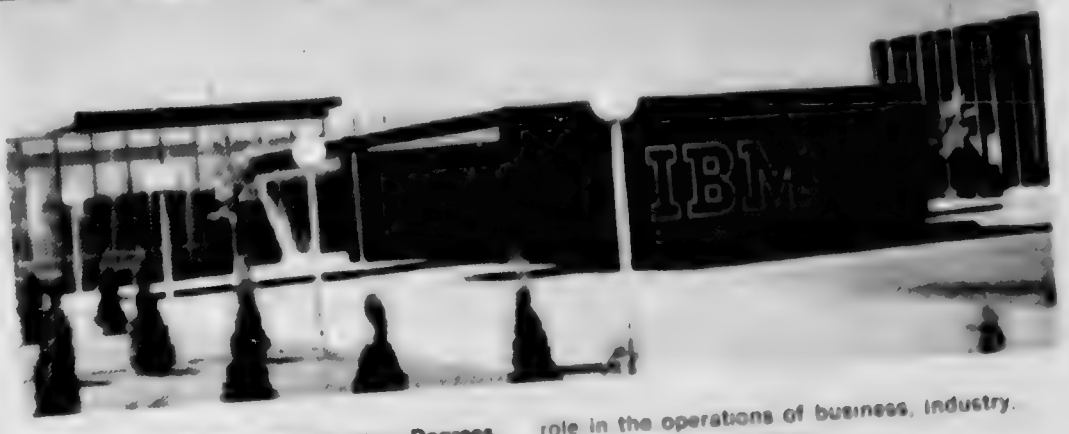
Miss Judy Hunt, secretary for Kake Walk 1961, may well be considered one of the busiest co-eds on the UVM campus these days. As secretary, Judy works in association with the Kake Walk directors and the faculty advisors all year. However this position, despite its attract[illegible] has taken a great deal of responsibility. Judy not only handles all the Kake Walk correspondence and press releases, but also plans with the directors, attends meets for a band at the Jazz concert, and the [illegible] at Memorial Auditorium. During spare moments between [illegible] she is in the Kake Walk office acting as an information service for any people who have questions about any phase of the activities. Her work didn't begin just before Kake Walk weekend nor will it end immediately following. The first plans began last May and the work will carry on through March for there are many letters to be sent out and a scrapbook of this year's weekend to be completed.

In addition to her position as secretary, Judy is active scholastically and participates in many extra curricular activities. She is a member of Pi Beta Phi sorority, the Assistant Chief Justice of Student Court, President of Staff and Sandal 1960, and Co-Chairman of Homecoming 1959. In the College of Education and Nursing, Elementary Education curriculum she carries five subjects and does honors work in her major.

Moody, Eckels Acclaimed As Authorities

Two University of Vermont professors are among the contributors to a new scientific encyclopedia. The two are Dr. Paul A. Moody, chairman of the Department of Zoology and Dr. Arthur R. Eckels, chairman of the Department of Electrical Engineering. The publication is the McGraw-Hill Encyclopedia of Science and Technology, a 15-volume work that encompasses more than 100,000 entries in 7,224 articles. The work covers the entire span of today's scientific, engineering and technical knowledge.

Moody has written the section on organic evolution while Eckels has authored a variety of articles in the electrical and engineering field. Organic evolution of the universe, planets or the solar system.



Moody is also the author of a textbook that is used in many universities.

New Faces Of Kake Walk

[illegible] waves heard wiggling through the air of the new AGR and Phi Mu Delta fraternity houses during the past few [illegible] indicate that walking [illegible] the kake is not quite as [illegible] as the strutters make it [illegible] on the big night. Entering into the competition for the first time, the athletic [illegible] representing these new [illegible] can be heard puffing [illegible] groaning and refusing Winstons from well-meaning [illegible].

The boys have been extremely [illegible], and refuse to comment officially on any new [illegible]-defying steps. Their main problem, they did disclose, has been organization and attainment of the top physical condition required for the strenuous UVM tradition. Are or lose, the experience of walking will be unforgetable for these students. Good luck to all competitors, and may the best house eat cake.

IBM WILL INTERVIEW FEBRUARY 27-28

Candidates for Bachelors or Masters Degrees are invited to discuss opportunities in:

Marketing and Sales
Engineering and Science

This is a unique opportunity to find out about the many career opportunities at IBM. The IBM representative can discuss with you typical jobs, various training programs, chances for advanced education, financial rewards, and company benefits—all important factors that affect your future.

SOME FACTS ABOUT IBM

An Unusual Growth Story: IBM has had one of the exceptional growth rates in industry. It has been a planned growth, based on ideas and products having an almost infinite application in our modern economy.

Diverse and Important Products: IBM develops, manufactures and markets a wide range of products in the data processing field. IBM computers and allied products play a vital role in the operations of business, industry, science, and government.

Across the Country Operations: Laboratory and manufacturing facilities are located in Endicott, Kingston, Owego, Poughkeepsie and Yorktown, N. Y.; Burlington, Vermont; Lexington, Ky.; San Jose, Calif.; Bethesda, Md.; and Rochester, Minn. Headquarters is located in New York City with sales and service offices in 198 major cities throughout the United States.

The Accent is on the Individual: No matter what type of work a person does at IBM, he is given all the responsibility he is able to handle, and all the support he needs to do his job. Advancement is by merit.

The areas in which IBM is engaged have an unlimited future. This is your opportunity to find out what that future has to offer you.

Call or stop in at your placement office to arrange an appointment with the IBM representative for the date above. If you cannot attend an interview, write or call the manager of the nearest IBM office.

Mr. J. F. Golden, Branch Manager
IBM Corporation, Dept. 882
54 State Street
Montpelier, Vt.

Story Written By UVM Grad Concerning The Composer Of "Cotton Babes"

by Andrew J. Gerber '58

Pictures courtesy of ASCAP

The story of "Cotton Babes" and its composer is taken from the Alumni Bulletin, January, 1950. It was written by Andrew J. Gerber, '58, who was a feature editor and columnist on the CYNIC. He is now a lawyer, a legal staff member of the American Society of Composers, Authors, and Publishers. A former Kake Walker, and Alumnus, and therefore, he was asked to write the story on "Cotton Babes." Here are portions of that article.

Percy Wenrich, the composer of "Cotton Babes", shown at his home in Hollywood before his recent death.

One of the best investments you'll ever make...

You know what you invest in advanced ROTC: two years of classroom time and outside study.

But just see how handsomely your investment pays off.

First and foremost, there's the proud moment in Graduation Week when the gold bars of a Second Lieutenant are pinned on your Army uniform . . and deep inside the warm sense of accomplishment at having made it.

There's immediate help in meeting expenses: a subsistence allowance of $535 for the two year advanced ROTC course. Uniforms and military textbooks paid for. $117 for your six week summer camp training, plus travel allowance. And when you're commissioned, a $440 uniform allowance.

You discharge your military obligation with the traditional rank, pay, privileges and responsibilities of an officer in the United States Army.

And later, when you're starting your climb up the civilian ladder, advanced ROTC will still be paying off. Success in the executive areas of business and industry comes earlier and more substantially to the man who can lead. Few are born leaders, but leadership can be learned. And advanced ROTC is a great place to learn it.

Talk with the Professor of Military Science at your school. Learn more about advanced ROTC. Ask particularly about the ROTC course in Leadership, with its practical experience in command responsibilities.

Joe Lechnyr ever performs "Cotton Babes" any more, memory is still remembered by the outside world as the author of some of the century's biggest and most durable hits, including "Moonlight Bay," "Put on Your Old Grey Bonnet," and "When You Were A Tulip and I Wore a Big Red Rose."

During the early part of this century, music for the UVM Kake Walk was played by the Burlington Military Band, under the direction of the late George D. Sherman. "Cotton Babes," one of a number of cake-walking melodies popular at that time, was selected as the UVM theme song for Kake Walk and it has continued as such throughout the years.

Joseph Lechnyr, who came to the University in 1921, started playing "Cotton Babes" with the Burlington Band in 1913. And it is because of Mr. Lechnyr that we are able to listen to the melody today. In 1925, the Hayward Building was completely destroyed by fire and with it were burned many of the band's musical instruments plus every copy of "Cotton Babes." Joe wrote to all music publishers to obtain new scores, but the piece was out of print and even the plates had been destroyed. So he sat down and rewrote from memory the complete musical score for all instruments, saving the "Cotton Babes" [illegible] eternity.

WENRICH'S YOUNGER DAYS

Wenrich was born [illegible] Missouri, in 18[illegible], was the postmaster [illegible] a politician of [illegible] Dutch descent [illegible] write songs [illegible] rallies and conventions. [illegible] boy's mother, [illegible] musician, taught [illegible] the piano and the [illegible] he began composing [illegible] teens, his father [illegible] take him to the ma[illegible] a Wenrich-organized [illegible] would perform Wenrich [illegible] with lyrics written [illegible] the spot--by the [illegible] rich.

When Percy was [illegible] his family allowed [illegible] to the Chicago Musical [illegible] to study the organ. [illegible] to his studies for a [illegible] and even sold some "[illegible] pieces" in the classroom; [illegible] but away from [illegible] sober influences [illegible] tired of organ lessons [illegible] decided to try his [illegible] popular songwriter and [illegible] to make the rounds [illegible] Chicago publishing [illegible] His first attempts were [illegible] plete flops. . . .

Just when a return [illegible] and eating seemed [illegible] he landed a job [illegible] songs in the music department [illegible] of Gimbel's Milwaukee [illegible] ment store. Another song, "Under the Tropical Moon," became a local hit in Milwaukee, and provided Wenrich with enough confidence and money to get to New York. More hard times followed, until he wrote "Rainbow". It sold over a million copies, took care of Wenrich's back rent and established him as a professional composer.

THE FRUITFUL YEARS

The following years were Wenrich's most successful. "Put On Your Old Grey Bonnet" was President Wilson's favorite song, a source of pride to Wenrich for the rest of his life. "Moonlight Bay" soon followed, and Wenrich set up his own publishing firm in partnership with Homer Howard. After two successful years they sold their catalogue to Leo Feist, with Wenrich's services as part of the package. While writing for Feist he turned out "When You Were A Tulip and I Wore a Big Rose".

Still more hits followed. During the First World War Wenrich composed "Where Do We Go From Here, Boys," which --as Wenrich himself wrote years later-- "was sung by the Marines when they first went 'over the top' for the first time in World War I and the fact was headlined in all New York papers." .

After his retirement from vaudeville he lived in Hollywood for several years. Then he was stricken with tuberculosis. He moved to Saranac Lake where his wife, Edna, became ill. She was institutionalized for the rest of her [illegible] . . .

He died in March, [illegible]

But every year, Percy Wenrich, composer of [illegible] well-known hits, lives [illegible] as the UVM campus [illegible] the strains of his "[illegible] Babes."

by JACK LIPKINS

The film was shot on our own Mount Mansfield, thus

TINY MEMORY UNIT
GUIDES GIANT ROCKETS
INTO SPACE

on this tiny drum—only four and one half inches in diameter, is recorded all the significant data needed to direct a rocket into space.

As the rocket blasts skyward, the electronic computer, which includes this small memory unit, begins to monitor the flight. The computer continually correlates data on flight progress with data in the memory unit and makes course corrections instantly.

The very small size and weight of this memory unit is an achievement in itself. Yet other difficult problems had to be overcome: shock, pressure, vibration and extremely high G forces. Only by using new materials and design techniques were these problems solved.

People with backgrounds in the sciences, engineering, and liberal arts all contributed to the success of this project. Ideas which create new products can come from anywhere at IBM. From research, development, programming, manufacturing, marketing.

If you would like a job where your ideas can be put to work in interesting and important areas, then you should consider the many opportunities at IBM. The IBM representative will be interviewing on your campus. He will be glad to discuss career openings at IBM. Your placement officer can make an appointment. Or you may write, outlining background and interests, to: Director of Technical Recruitment, Dept. 897, IBM Corporation, 590 Madison Avenue, New York 22, N. Y.

You naturally have a better chance to grow with a growth company.

Director of skits ... sitions and Co- ... Director of Pub- ... is a member of ... Dave, of Phi Delta ... Assistant Finance ... last year and acted ... roses skit in both ... and sophomore

... Director of 1961 Kake ... work Last March, ... the 1960 Kake Walk ... were over. Fall ... band negotiations, ... work were all ... of many summer ... hours. Skit rules are ... and skits have been selected f... Presentation.

Kake Walk is expected to make a profit of about $5000 this year, all of which will be placed in the IFC controlled Kake Walk bursary fund which is distributed to campus activities like radio station WRUV. Catalyst. Plus the Actually, the Kake Walk committee is a sub-committee of the Interfraternity Council. The main problem ... the committee this year ... to be rising costs. The tickets sold to the jazz concert ball and walking are ... sources of revenue and they do not wish to raise the prices. Yet, the directors noted that they are loosing money on the ball and the jazz concert. Trophies alone for various Kake Walk competitions come to $1200, and this includes a substantial school discount.

Dave, Rolly, and Bill all felt strongly that the future prestige and national fame of UVM's Kake Walk depended on the new gym. As the oldest college winter carnival in the United States, Kake Walk receives mention in national newspapers now, but it can never be "really big until the new gym." To support this statement, the directors offered these ticket statistics from last year: over 500 attended ... Ray Charles or ... "Something Like Ray McKinley." The directors also consulted publications like *Downbeat* and ... usually ... tive. Cl... so they know what ... satisfactory 64th annual Kake Walk for it.

Dave Howe, Rolly Allen, and Bill Carrigan ... years experience as Directors

Across the Campus

by SANDY CAMERON

CLOUD NINE

[illegible] Congratulations [illegible] Two Sigma Nu's are to be congratulated on their pinnings of last week. [illegible] Peter Lapp, '62, [illegible] Pat Dunn, '62, [illegible] Lee Fiske, '61, [illegible] Ann Van Ornum, '62, [illegible] Theta Phi.

ALPHA DELTA PI

[illegible] the affiliation of Sandra Alpert's has elected [illegible] officers - President, Cathie Day, Vice-President, Karla Landmann, Secretary, [illegible] Fiske, Scholarship, Betsy Jackson.

Election and installation of the new officers for 1961 took place last week. Peggy Link is our new President, with Julie Lanier, Vice-President, June Beechinor, Recording Secretary; Jean Pillsbury, Treasurer; Nancy Underwood, Rush Chairman; Carol Linoroth, House Manager; Rolaine Morck, Guard; Barb Clayton, Registrar; and Marion Force, Reporter-Historian.

The crew received a big load of staples last week, and Elaine, our efficient stewardess, was kept busy unpacking various and sundry packages. This slight confusion was only surpassed by the uproar that occurred when the cast for the Player's new production was announced with Corinne Szeglin as Antigone.

ALPHA EPSILON PI

Excitement and great anticipation reign supreme at the AEPi house on the eve of another great Kake Walk. For the past two weeks the brotherhood and pledges, under the inspired guidance of Barry Marcus, have been modeling out of the rather scarce supply of snow a true "work of art".

Kake Walk pinnings:

Jack Stern to Reido Onose of Parsons School of Design.

Joel Efrein to Roz Freidman of Hunter College. The brotherhood and pledges of Alpha Epsilon Pi congratulate, and wish the best of luck, and everything to these two couples.

To our Kake Walkers, Dick [illegible] and Mary Ann [illegible] Adj.

ALPHA EPSILON PHI

[illegible] Kake Walk [illegible] Jerry Feldman, Rosie Friedberg, Phyllis Padrunch and Iris Steinert.

Congratulations are in order to [illegible] Fred Stone, '61 and [illegible] Ware, '61, a graduate of N.Y.U. Law School, and Barry, a graduate of N.Y.U. Law School.

Last weekend [illegible] Dartmouth this past weekend with her usual champion debates.

All the AO's must be congratulated on [illegible] a wonderful Kake Walk for the house.

ALPHA GAMMA RHO

The members and pledges of Alpha Gamma Rho enjoyed a delicious turkey dinner Feb. 7, 1961.

On Feb. 9, Maynard Coe, extension director of AgR, spoke favorably on the progress the house has made during the past year. He also briefed us on our coming installation.

At the regular business meeting of Feb. 13, the following officers were elected for the coming year: Noble Ruler, Erwin Clark; Vice Noble Ruler, Hall Thompson; Alumni Secretary, Jim Davenport, Secretary, John Pratt, Treasurer, Sherrill Nott, Usher, Larry Hamel, Reporter, Fred Stone, Social Chairman, Roger Bombardier; Pledge Master, Hugh Spafford; Sr. IFC Rep., Ian Swett. Following the election Dr. Gaylord, a lowly pledge, gave the officers a pep talk.

Alpha Gamma Rho extends an invitation to all, especially those of the fairer sex, to enjoy our skating rink and to visit our house.

KAPPA ALPHA THETA

It's really great to have Hermene, D.J., and Nancy back. Oh, yes, and Smitty, Nancy's cocker to keep her company at 15 So. Williams, between Smitty and Nancy, Nancy will have stimulating dinner companions.

Everyone at the Theta house hopes a festive Kake Walk is had by all. Some of it should. However, in the meantime, we'll be a few aching [illegible] of that previous [illegible].

KAPPA SIGMA

New officers were recently elected. They are John Hart, Grand Master, Donald Parsons, Grand Procurator, Wes Penny, Grand Scribe, Gordon Mercer, Grand Master of ceremonies, and Thomas A. Orr, Grand Treasurer.

[illegible] Saturday, [illegible] of the year to be held at [illegible]. The banquet was held at the Hotel Vermont, where Father Bruno was the guest speaker.

Scholastically, Kappa Sig did well last semester and the boys pulled the [illegible]

The Kappa Sigs extend [illegible] a happy Kake Walk and [illegible] Mardi Gras [illegible] Theta [illegible] Tau [illegible] Theta [illegible].

PHI MU DELTA

[illegible] Mu [illegible] has started another [illegible] We [illegible] the [illegible] Old [illegible] Then [illegible] Kake Walk, and [illegible] have [illegible] Sigma [illegible] Ray Bunker, and [illegible] Howard, [illegible] [illegible] "[illegible] [illegible]"

Our new officers for the next year were elected last month. They are Barrett [illegible], president, Paul [illegible], vice-president, Chuck McGrath, secretary, Claude Paquette, treasurer, Frank [illegible], [illegible], and Reg Blair, chaplain. Our pledges being very good men, have been piling up grand heaps of [illegible] under the watchful eyes of the [illegible] brothers. "Woody" Manners and "Rebel" Sawyer are in charge and assure us that this year we have a winner.

Realizing that our high scholastic average was [illegible] as a handicap, we have worked [illegible] to [illegible] and [illegible] place for one semester. This is to prove that we can and also to give some of the other houses a chance at the trophy.

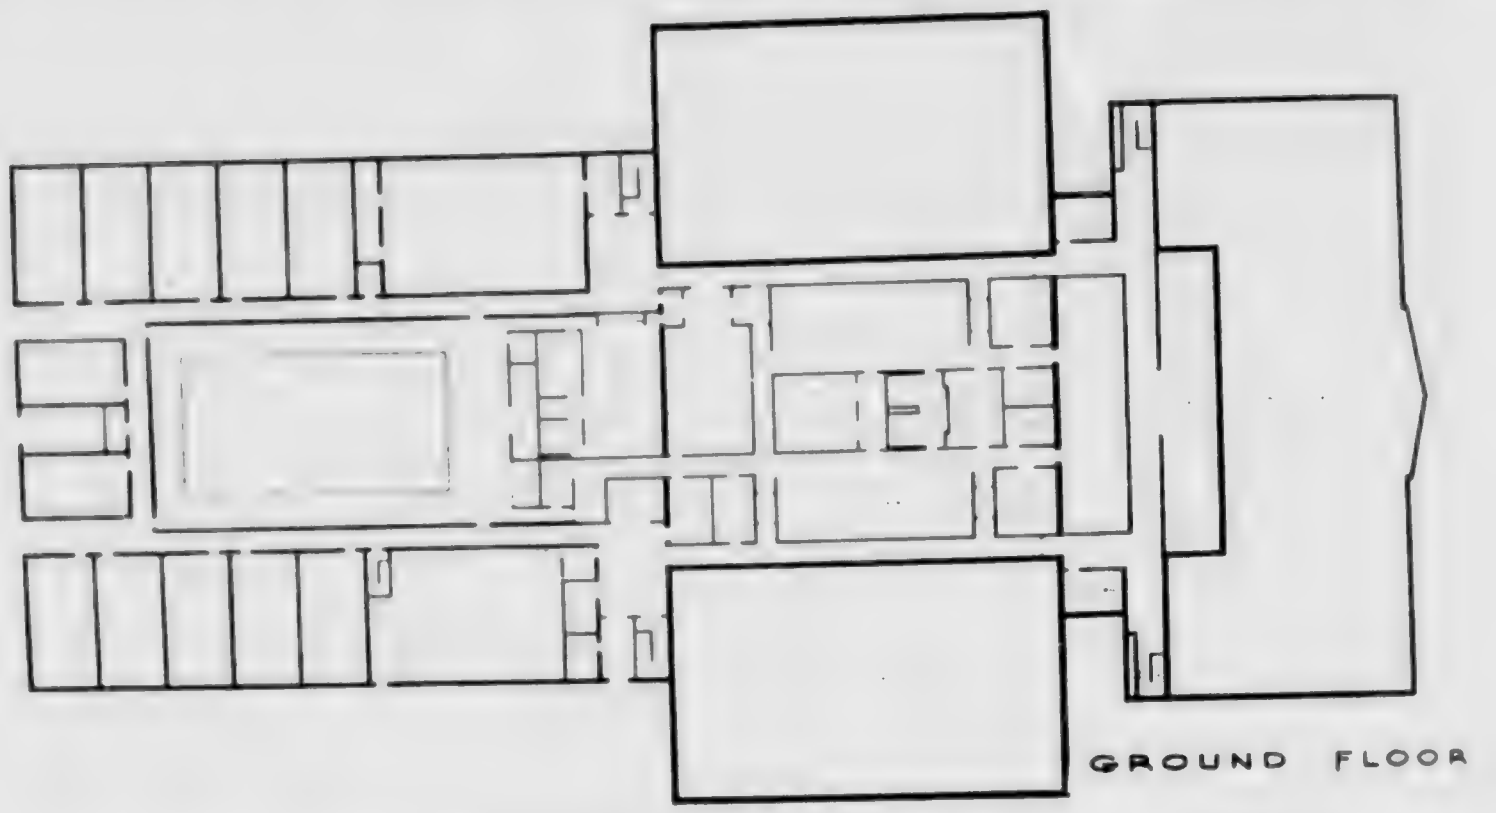
PI BETA PHI

Now that rushing is over the Pi Phi's are proud to announce that they have the [illegible] pledges.

Congratulations are in order for Peggy Waterman who was initiated on Wednesday, February 8th.

We are very happy to have Di Hedley, Linda [illegible] and Pris Paul back with us this semester. These girls were on affiliation in Boston last semester. Pris came back sporting Ron Miller's Alpha Phi fraternity pin. Ron attends Curry University.

SIGMA ALPHA EPSILON



The brothers of 56 Summit Street had a successful first semester this year. We didn't [illegible] a single man during the house scholastic [illegible]. After our [illegible] for first semester exams [illegible] left for [illegible] days. The rest stayed [illegible] the best [illegible] the house [illegible] for [illegible]. After these [illegible] were back they held [illegible] The [illegible] the [illegible] [illegible] [illegible]

Sports Editorial:

(continued from page twenty)

TO TELL THE TRUTH

A LOOK INTO THE FUTURE was actually an editorial by Wellington E. Aiken '01, in the Vermont CYNIC of February 1, 1901. The original title of Mr. Wellington's Editorial was THE NEW GYMNASIUM. The statement by the President was just that--made by President Buckham in 1901. It is clear that the students of the past desired aid from their Alumni. Perhaps they will aid US today. The subscription blank may be dropped off at either the Alumni House or the CYNIC office, room 40, lower Waterman.

FROSH FROLICS

by ROBERT WEINER

The UVM Freshman Basketball team looked very impressive last night in the process of humiliating the Saint Michaels' frosh, 79-65. The Kittens, with their pivot cutting and screen plays, appeared to be clearly superior by four points when the first half was over. The Kittens looked good during this half, but just could not cope with the "hot shots" of the opponents.

The second half was a completely different story. The Kittens threw on an all-court press and completely rattled the St. Mikes' cool. There was one stretch of 4 minutes when St. Mikes couldn't get the ball up past the mid court line. Meanwhile the offense began to click as John Babcock and Chuck Glick started hitting. They were assisted considerably by the fine passing of Chris Greer. The play in the second half was all the more admirable due to the absence of "Farmer" Lawson, who was inactive because of foul conditions.

Babcock, Glick, and Bobby Nurse led the scoring with 18, 16, and 12 respectively.

A SUGGESTION

The question now arises, how come the Vermont Freshman team doesn't have more formidable opponents on their schedule? It seems a shame that this year's fine team had to waste their energies on such underclassed teams as Castleton Teachers and Champlain College.

Why don't the officials schedule games with other Yankee Conference Freshman teams? It is granted that it is an expense to transport a team to such Yankee Conference schools as Maine, Connecticut, and Rhode Island. If the team could be transported along with the Varsity, there would not be that much of an added expense. They could then play before the Varsity game.

I think this should be looked into. It is probable that by allowing our Freshmen to play better opponents, they will be better prepared to play Varsity ball as sophomores.

Meet The Catamounts

by WAYNE MIRSKY

JOHN STAHLER

A sophomore from South Huntington, Long Island, John started his athletic career as a soccer player. However, after watching his snare rebounds like a gorilla and "pop" his soft jump shot, I can honestly say that there is a tremendous future here at UVM for Mr. Stahler on the hard-wood boards. In high school, he was named to the All-scholastic team in soccer, while also lettering in basketball and track. Here at UVM, John is an all-around guy. He is the social chairman of S.A.E., and the recording secretary of Phi Key. During the past summer John worked on a construction gang in an attempt to build himself up. The result is..... A.A. An Economics major in the College of Arts and Sciences, John is looking forward to next season. He believes that the present frosh team will help the team, and also acknowledges the need for a big man. An affable fellow around campus, John is known as the "Spider".

HARRY ZINGG

Co-captain and team leader, Harry mans the backboard of the UVM team. Although he is 6-2, Harry moves exceedingly well, with a deadly jump shot to go along with his devastating drives. In Montclair High School in New Jersey, Harry earned All-County acclaims in both football and basketball. At UVM, he is the President of the Varsity club. Harry is married with one child, and is an all around top guy. His biggest thrill here was our 61-60 victory over a powerful UConn team in '58. A Marketing major in the College of Technology, Harry plans a career in business after graduation. GOOD LUCK HARRY!

Construction On New Gym To Be Started In Fall

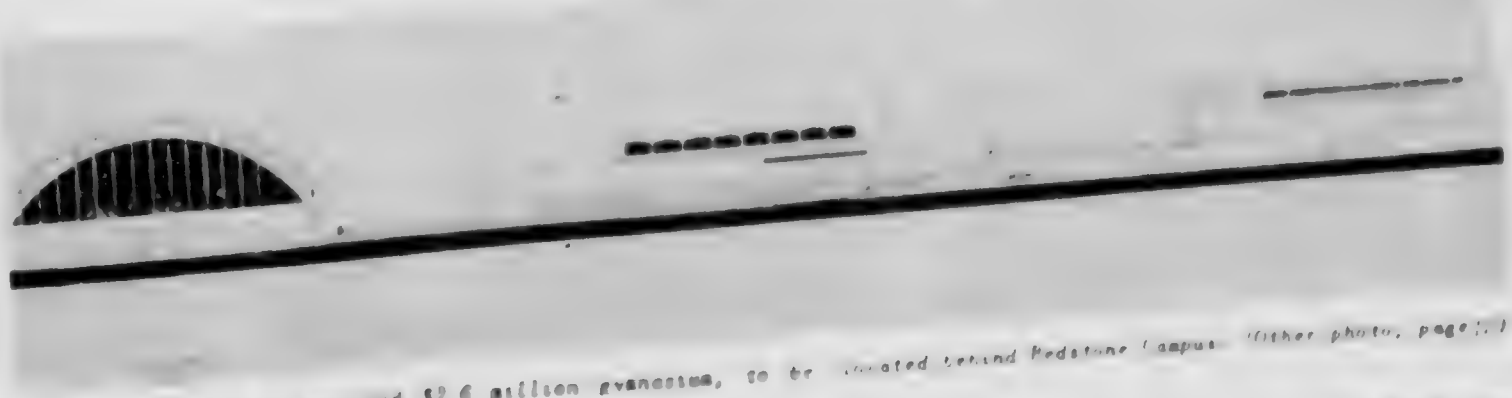
by STEVE SOHN

As one looks around the UVM campus, it is evident that [illegible] years. Following World War II when our enrollment nearly tripled itself, and has never fallen to the amount before the war.

Of late, the University is adding new men's and women's dorms, and a new library which is reaching the late-40 completion rapidly. But University has also added Lafayette Hall, the progressive classroom addition to the old Main, and closed the now-completed, but outdated Old Mill. And [illegible] on the drawing board are plans for renovation and extension of the Engineering Building and the Science Hall. The Old Mill Library is now about to have a face-lifting. But Ann [illegible] about after the new library is functional. The Billings Library will serve as a much needed Student Union building.

One of our foremost and pressing needs is that of a new gymnasium. A gym in which we can have our own home court for inter-collegiate sports, pep-rally functions, and many a dance where none of the student body can be turned away from physical education. The plans for the new gym include the [illegible] will be upon us we dare hope to read, there will no longer be any reason to turn students, alums, parents, and friends away for lack of room. Before I go further into the new gym, let me relate some facts and figures.

Back in 1922, our gym was considered to have adequate facilities for a student body of 1,000. Now, 39 years later, we have 4,000 students, and the same gym. Back in 1922, our gym was the finest physical education plant in New England, and those were the "good old days." Father Time has put our gym in the ways of years, but has not been kind. Our gym is not large enough for UVM's current needs. If we made plans for a new gym, we could provide adequate physical education facilities, intramurals and intercollegiate sports program, and for our social functions. It would have the cafe, since the new recommended with completions from the student body, but those days are gone. Memorial Auditorium is not a basketball court. We cannot rely on Memorial Auditorium for basketball because it is a public facility, and a University facility. To emphasize the need for a new gym, let's look at the back of 1927. At that time there was a



The target date for the ground breaking is set for the Fall of 1962, but if we complete our goal [illegible] sooner than expected, then we will break ground this Spring. The gymnasium is the goal of [illegible] for the Fall of 1963.

The question now is raised, "What is to be done with our present gym?" Nothing definite has been decided, but the way things look now it will become a facility for the Military Science department.

So those are the facts on the gym, and right now our new gym is in paper. With $975,000 already put out of the [illegible] Board and the UVM campus, let us get the ball rolling and make that dream gym to our future" a new gym on our campus.

Facilities like these we can expect to accept this winning tool (courtesy, [illegible])

Revised sketch of proposed $2.6 million gymnasium, to be located behind Redstone Campus (other photo, page [illegible])

Redmen Take Revenge 101-66; Cats Win 3 In Yankon Competition

BRANDEIS

The 64th Annual Brandeis Basketball game will be played against Brandeis University on Saturday, February 25. The game is scheduled to start at 2 p.m. In last year's encounter with Brandeis, UVM won by the score of 81-71. In a series that started in 1954, UVM has won once, and Brandeis twice. The last Brandeis win was in 1955, 101-62.

HALFTIME BREAK HALFTIME BREAK

By Stan

A LOOK INTO THE FUTURE?

"In this issue we place before the alumni and friends of the University, a cut of the new gymnasium, accompanied by an article by (the) President.... The gymnasium is no longer numerical, enough money has been subscribed to warrant beginning the structure, and work has, in fact, already begun on the foundation. But although the success of the enterprise is assured, we would not have friends of the University infer that there is no further need of money to carry the work to its ultimate success. The response to the appeal for funds has been generous, but not as generous as might be desired.

"The plans provide for a building ample in dimensions and complete in equipment. The desirability of such a building at the University of Vermont needs no argument. What we wish to call attention to, is the opportunity of those who have the interest of the University at heart, to do it a good turn. Every dollar subscribed will add to the success of the project. In behalf of the students of the University who have so long waited for the hoped-for gymnasium, we appeal to the alumni to respond to this call to show their loyalty to their Alma Mater."

"THE GYMNASIUM--A STATEMENT AND AN APPEAL BY THE PRESIDENT

"Though among the foremost in securing many good things essential to the modern university, our Institution is late in getting a gymnasium (of quality). This is not owing to either lack of effort or lack of demand. For the last twenty years the University's appeal for means to build a Gymnasium has been incessant. On every public occasion when a favoring sentiment could be aroused, the call has been sent forth. Every new impulse in the development of athletics, every defeat, has been turned to account as an argument for a Gymnasium.

"Having.....labored and waited long enough--too long for the gift which ought to have come but did not, the Trustees resolved to set about raising the funds for erecting a Gymnasium by private subscription among the alumni and friends of the University. Much as we should have enjoyed seeing one more building in the sumptuous style of those we already have, we may well content ourselves, for the purpose contemplated, with a building which, not attempting to vie with the others architecturally considered, will not be out of harmony with them.

"The building will consist of a central part 60x140 feet, 50 feet in height to the peak, and two wings 20 feet in width with sloping roof and dere-story windows above, and a basement under all. The basement will contain beside a boiler room, a shooting gallery 18x130 feet, and other spaces, which if needed in time can be excavated and utilized.

"On the ground floor will be the main room, 60x120 feet, height to trusses 30 feet, height to ridge 48 feet; overhead the running track, 60 and 127 feet, and 7 feet wide, with gallery over-looking the interior, 18x60 feet. The room will be lighted by the dere-story windows above the roof of the wings, and by windows in the gables. On this floor will be the armory 18x44 feet, the bowling alley 18x92 feet, locker room 18x52 feet, toilet room 18x17 feet, bath room 18x11 feet, Instructor's room 18x13 feet, and Superintendent's room 8x16. The interior walls will be furred out protected by two thicknesses of sheathing paper, and finished with North Carolina pine ceiling. The floors will be of hard pine.

"In order to give the younger Alumni and undergraduates an opportunity to have a modest part in the enterprise in which they have shown so much interest, a special subscription was circulated.....

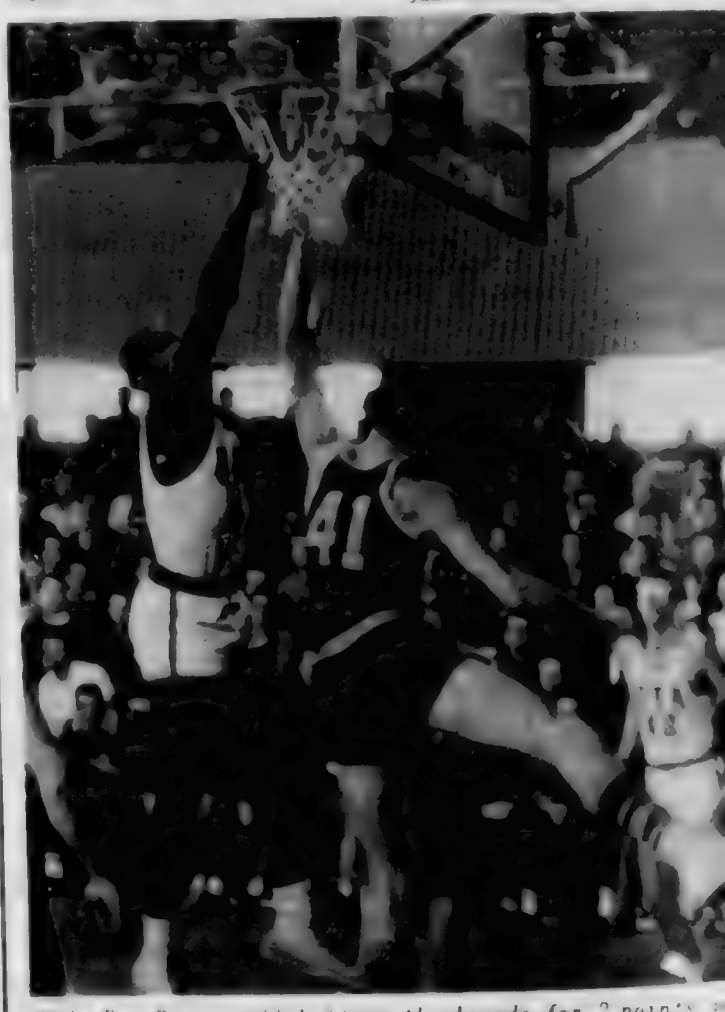
".....It will be seen that thus far only a small fraction of the Alumni and friends of the University have taken part in this effort which we of the Trustees, Faculty and Students feel to be so vital to the welfare and progress of the Institution at this juncture. We hereby make our earnest appeal to the many who, we feel sure, have the interests of the University as much at heart as those who have already manifested this by their subscriptions, to help us to carry forward this enterprise to completion without debt, and without any unnecessary anxiety and embarrassment on the part of those who have assumed this burden counting on the cooperation of all the Alumni and friends of the University.

"Blanks for signatures accompany this issue--or subscriptions may be made by note to the President."

(continued on page nineteen)

Becton High Scorer With 24 Points

by JONNY KAPLAN



The Catamounts ran into a stone wall Saturday night, when they locked horns with the Redmen from the University of Massachusetts. The Cats sustained their seventh Yankon loss and wound up with an overall 3-7 Yankee Conference record. The Redmen were unbeatable as they avenged their previous 80-76 loss to the Cats. A combination of Doug Grutchfield, Kirk Leslie, and 6-8 Don Black were too much for the Cats to overcome. The U. of Mass. hit with startling accuracy as they buried the Cats under a 52 point avalanche in the first half. The absence of Captain Harry Zingg definitely hurt the Cats. However, UMass with their prolific scoring effort would not have been denied. Sophomore Ray Houle started in his place.

In the opening [illegible] Cats led 4-2 on Ader[illegible] kets but the Redmen [illegible] head, never to be [illegible] again.

Vermont's one bright spot as their center, the amazing [illegible] Becton. Held to six points in the first half by Black, [illegible] exploded in the second half to finished as the game's top scorer with 24 points.

The Cats started the game in a 2-1-2 defense, but switched to a man-to-man defense after the intermission. UMass [illegible] with a 38/70% accuracy [illegible] the floor was just too hot. They were especially tough [illegible] inside where their height advantage did devastating [illegible]

The Cats played good [illegible] half ball, but the Redmen were just too much.

UVM's Ben Becton (34) hitting the boards for 2 points [illegible] Adler (44) looks on. (Photo by R.H. Potter)

Sports Questionnaire

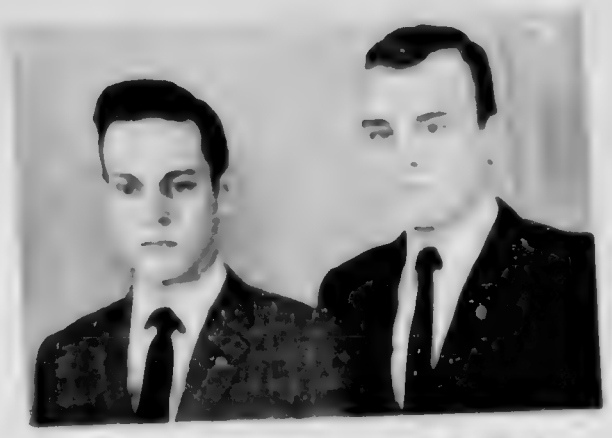
by MIKE ZELTZERMAN

Should UVM have a Crew team?

Jay Kronfeld '62. Yes, I believe that UVM should have a crew team. Firstly, it provides an activity for more of the athletes at UVM to participate in. Secondly, UVM has the facilities of Lake Champlain. Thirdly, because it is an excellent team sport, where the utmost cooperation is demanded.

Danny Batcnick '63. No, because we have enough trouble with all the other sports. People at UVM are not interested in sports as evidenced by our other athletic teams. We have a few enthusiastic athletic supporters, and this small group would be split up still more by another team. Also, from [illegible] we could not get [illegible] body wholly interested [illegible] ther sport.

Claude Phipps '64. [illegible] that UVM should have [illegible] of water sport team, [illegible] we are on a lake. Sing song is "Champlain, [illegible] ought to do something [illegible] Champlain other than [illegible] about it.



Georgene Walter '61. [illegible] cause there are too many [illegible] ties now. You can't [illegible] the lake for sailing [illegible] weather is so unpredictable.

Barbara Fruchtbaum [illegible] I don't think that [illegible] adequate length of time [illegible] spring. There is not [illegible] time for all the practice [illegible] require.

DELT PSI WINS WALKING BOTH NIGHTS PHI SIG AND TEP SPLIT SKITS

Also Split Seconds

By Betty Bergman

The lights were dimmed, the curtains parted, and this year's Kake Walk skits brought a lot of action to the floor of the Auditorium. Copping honors and cakes for both nights were Phi Sigma Delta and Tau Epsilon Phi.

The setting for Friday night's entry by Phi Sig's "Once Upon A Kake," a musical written and directed by Marty Singer, Ken Freeman, and Mark Rosen. Second place went to Tau Epsilon Phi's "The Great Robbery", written by Arnie Wexler, Chuck Lowenstein, Steve Kramer, and Rick Nalen. It was directed by Prober and Rosen. "Where's Charles?", Sig Nu's skit, directed by Tom Pagliaro, placed third in the skits.

Saturday night's results reversed the Friday decision with TEP placing first and Phi Sig taking second place.

Many weeks of rehearsing and scheming produced the twenty minute skits that were judged by a panel of three members of the faculty

Delta Psi's winning team steps out in its "walk fo'de cake." (Photo by Quanca, '63)

Kappa Sig Places

Acacia And Theta Chi Show

Friday and Saturday night enthusiastic crowds cheered, shrieked, and shouted "Go, Go, Go" as the Delta Psi Kake Walkers Ralph Guiduli and John Alger, clad in their traditional black and white striped uniforms, kicked their way to victory in the sixty-four year old tradition of 'Walkin' fo de Kake." Similarly, Kappa Sigma's green and red fireballs, Tom Eldridge and Max Lauder, blazed speedily to a second place win for both Friday and Saturday nights. Third place on Friday night went to Acacia's precision team of John Mills and Austin Cheaves. However, Theta Chi's high kicking, fast paced routine received the third place award on Saturday night. Theta Chi's walkers were Frank Harrington and Mike Johns. Phi Delt took honorabld mention Saturday night.

All the teams put on an excellent show. Of these, Phi Sigma Delta, Sigma Nu, and Alpha Epsilon Pi, put on exceptional performances. The amount of time and effort put into all these routines was obvious in the comparative ease and coordination with which they were presented.

Tension was high and tears could be seen in the eyes of those who, after months of preparation, missed one step because of split second distraction. The spirit of Kake Walk was so instilled in these boys that many went on with injuries which added pain to their glory. Phi Sigma Delta's Joel Bauer had pulled a muscle shortly before Kake Walk but gallantly and skillfully went on anyway. Steve Bernstein of Tau Epsilon Phi, showed his showmanship and character by walking in spite of a muscle he pulled a few days before. These walkers exemplified the unusually fine spirit of Kake Walk and of UVM.

ATO, Sig Nu, Theta Chi Win Sculpture Contest

By EMILIE GRUPPE

Snow sculptures have become part of the tradition of the Kake Walk celebration. This year however, there was doubt as to whether or not this part of the tradition could effectively be carried out since we had received so little cooperation from the weather. But the spirit of Kake Walk could not be dampened that easily. Despite the lack of snow, the fraternity brothers set to building their monuments to Kake Walk.

For three fraternities the grueling job of collecting snow and the work of the wee hours of the morning were well spent. Alpha Tau Omega fraternity took first place with their sculpture, "Walking Time Again". A large calendar with

BILLINGS TO BECOME STUDENT CENTER WHEN LIBRARY IS BUILT

ANNOUNCEMENT BY THE PRESIDENT

It is a pleasure to announce to the students of the university the moving ahead with plans for a Student Center to serve both the organized group needs of UVM's student body and the informal activity needs of individuals and groups.

With the anticipated completion of the new library in the fall, the present Billings Library will be freed for other use.

Recognizing the need for a student center, the University's Trustees have authorized conversion of the former library building to the Billings Student Center, and $150,000 is being requested from the Vermont legislature to make this conversion.

Student Association leaders were scheduled to meet last evening with representatives of the architectural firm of Barr, Linde and Hubbard, and preliminary sketches for the Billings Student Center have been placed in the Student Association Council rooms where it is hoped many students will find an opportunity to study them.

You will see that these plans are pointed toward the development of service and of an environment capable of being a unifying force in student life. Student leadership will be expected to share in the responsibility for the planning of programs designed to achieve this goal and to work with the director of the center toward their accomplishment. To provide continuity and guidance we plan to redefine the role of the COSA in terms that will result in his acting as the director of the center.

I am pleased to invite you to study the preliminary conversion sketches and to bring your ideas for your student center to your Student Association leaders.

John T. Fey, President
University of Vermont

Mr. Linde is a member of the architectural firm of Barr, Linde & Hubbard which was invited by President Fey to suggest plans for the conversion of the Billings Library building to the Billings Student Center. In this article Mr. Linde gives a word picture of the preliminary thinking.

As envisioned by William Linde

The long felt need for a student center is at last to be filled by the conversion of the Billings Library to the Billings Student Center. This Building, undoubtedly the finest on the campus, was designed by Henry Hobson Richardson, leading American architect of his period. The building lends itself admirably to its new purpose. No significant changes are contemplated on its exterior. While interior alteration will be necessary to properly accommodate the new functions, the distinctive atmosphere, which Richardson created some eighty years ago and which has been enjoyed by so many generations of UVM students, will be preserved

The accompanying sketch shows the existing entrance to the building. The same will be changed and a new entrance vestibule will be provided to eliminate the present unsightly temporary structure which mars the winter appearance of the

Kappa Sig Places

Acacia And Theta Chi Show

Friday and Saturday night enthusiastic crowds cheered, shrieked, and shouted "Go, Go, Go" as the Delta Psi Kake Walkers Ralph Gardner and John Alger, clad in their traditional black and white striped uniforms, kicked their way to victory in the sixty-four year old tradition of "Walkin' fo de Kake." Similarly, Kappa Sigma's green and red firemails, Tom Fiddrige and Max Lauder, blazed speedily to a second place win for both Friday and Saturday nights. Third place on Friday night went to Acacia's precision team of John Mills and Austin Chenves. However, Theta Chi's high kicking, fast paced routine received the third place award on Saturday night. Theta Chi's walkers were Frank Harrington and Mike Johns. Phi Delt took honorable mention Saturday night.

All the teams put on an excellent show. Of these, Phi Sigma Delta, Sigma Nu, and Alpha Epsilon Pi, put on exceptional performances. The amount of time and effort put into all these routines was obvious in the comparative ease and coordination with which they were presented.

Tension was high and tears could be seen in the eyes of those who, after months of preparation, missed one step because of split second distraction. Exiting Memories For Mike And Bonnie

Mike Pearl and Bonnie Burgess ruled over the Kake Walk festivities. Photo by Jorgensen, '63

by Abel CLAY

The 1961 edition of Kake Walk was an exciting one for many individuals, but for two UVM juniors, Mike Pearo and Bonnie Burgess, it proved to be absolutely unforgettable and unbelievable. Of course, they were the reigning king and queen.

Bonnie's campaign got off to a rousing start at Pops Night when her sorority sisters from Alpha Chi Omega introduced her as "Your Bonnie Lassie." The statuesque blonde's campaign never lost any ground as the Alpha Chi Omegas ardently campaigned for their favorite sister.

Mike's campaign was one of the most spirited that this campus has ever seen. This was mainly due to Mike's spirited Kappa Sig brothers who were leading his bandwagon.

Mike, who is affectionately called "Bear" by his brothers, was introduced at Pops Night at the end of a rollicking skit concerning Huckleberry Hound and his pal Bobo. The strains of "Running Bear for Kake Walk" could be heard in the auditorium long after Mike had made his appearance.

Mike found his reign to be "most exciting." He was especially proud of the campaign his Kappa Sig brothers waged for him. He felt the campaign was "an excellent one and well handled by his brothers." Of course, no one is about to dispute that statement.

One of the amicable Mike's biggest thrills during Kake Walk was being chosen to represent Kappa Sig in the voting. This was an honor which made him feel "most proud."

Mike's date was an import from Paterson State College.

Mike's beautiful queen hails from Brattleboro, Vermont. Bonnie still finds it difficult to believe that she was chosen by the student body as their queen for Kake Walk as she still walks around "in a daze."

The elementary education major found her reign to be "very exciting." Of course, Bonnie attributes her success to her campaign, Alpha Chi sisters, who worked so diligently for her election.

Thus, ends the 1961 edition of Kake Walk, but for Mike and Bonnie its gay pagentry and excitement will always claim a place in their memories.

Notice

Applications for positions as Men's Residence Hall Counselors are available in the office of the Dean of Men. Deadline for return of the applications is Friday, March 10, 1961.

There are 17 positions to be filled for the fall of 1961, with an additional 11 positions to be filled February 1962. It is hoped that selections can be made to fill all 28 positions from those who apply prior to the March 10 deadline.

Remuneration for the post of Floor Counselor is room and $205.00, while that of Head Counselor is room and $500.00.

NOTICE

The University Players are announcing open tryouts for their student directed workshop production of *Janus*, a romantic comedy in three acts by Carolyn Green, for Thursday, March 2nd, at 4 PM in the Arena Theatre and Friday, March 3rd, at 8 PM in the Projection Room in East Hall.

The production will have complete scenery, costumes, lighting and sound etc. and differs only from regular University Players productions in that it is directed by a student.

Janus will be a part of the Fine Arts Festival.

Antigone

Antigone, a Greek tragedy by Sophocles will be presented by the University Players in the Arena Theater, March 16, 17 and 18. The production has been cast by Greg Falls with Corinne Szeglin as Antigone. The supporting cast is composed of Heidi Mocek as Ismene; Eric Anderson, Choragus; Chuck Goudy, Creon; Steve Lemberg as the sentry; and George Maxwell playing Haimon. Teiresias is played by Howard King. Barry Beckerman plays the Messenger; and Eurydice is portrayed by Sheila Rosen. The remaining persons in the play are in the background as a chorus. These people are Sue Beaudin Bonnie Bixby, Ann Harrington, Fred LaBelle, Pam Middleton, Sue Stalbird and Ellen Spencer.

UVM Represents France At Model UN Council

The University of Vermont was one of 11 American and Canadian colleges participating in St. Lawrence University's 13th Model United Nations Security Council Thursday (February 23-25).

Each institution represented a nation at the conference. Vermont's delegation represented France. Other colleges taking part and the country they represented were: Dartmouth, Ceylon; Loyola of Montreal, Russia; West Point, the United States; Albany State, Turkey; Queens of Kingston, Ont., the United Arab Republic; the Royal Military College of Kingston, Ont., the United Kingdom; Sir George Williams College, Liberia; Syracuse, Ecuador; University of Western Ontario, China; and Skidmore, Chile.

The resolutions placed before the Council were presented in the official languages of the United Nations: English, French, Russian and Spanish. St. Lawrence language students did the translating.

UVM students participating were Margo Hathaway, Colchester; Steve Elias, West End, New York; Sue Roussin, Milton; Russell Marx, East Meadow, New York; and Christopher Rheuby, Woodstock.

Each delegate presented at least one or more resolutions before the council, stating the views of the country they were representing. Margo Hathaway presented the views of France concerning the resolution submitted by the United Arab Republic calling for an accounting of what has been done about the Arab refugees and France's views on the acceptance of the Secretary-General's report on the Congo. Elias presented the views of France of the People's Republic of China on the question of disarmament. [illegible] stated France's [illegible] establishment [illegible] of Berlin throug[illegible]

Marx discussed [illegible] of U.S. aggress[illegible] Rheuby discusse[illegible] lishment of a [illegible] oversee the tec[illegible] ance of nati[illegible] the possibility [illegible] new Secretariat [illegible] to replace the [illegible] General's positi[illegible] possibility of [illegible] next meeting of the [illegible] Council in the [illegible] Congo.

Two of the student[illegible] to say about the [illegible] general. Margo Hat[illegible] "Besides being an opport[illegible] get a feeling of how the re[illegible] U.N. runs when it is in [illegible] we were able to meet and [illegible] talk to many students fr[illegible] many colleges throughout t[illegible] United States and Canada. [illegible] could sit down and discuss [illegible] variety of subjects [illegible] these new friends and [illegible] the varied reactions of [illegible] other delegates to [illegible] issues in the world today [illegible] national and internat[illegible] Even at the receptions a[illegible] the dinners we exchanged v[illegible] points and listened to [illegible] another's ideas on [illegible] of interest to all. The [illegible] real problem we came [illegible] st was getting the f[illegible] assistance for the trip. [illegible] all financed it ourselves."

Steve Elias elaborated [illegible] this last point by stat[illegible] "I was very disappointed [illegible] the amount of interest sh[illegible] by the school in reference [illegible] financing the trip as it was [illegible] relatively small amount [illegible] school to pay but a fair [illegible] large one for the individ[illegible] We were the only delegat[illegible] not financed by their sch[illegible]

Bathing Beauties Sough[illegible]

The 1961 version of the Miss Vermont Pageant has been officially opened.

Bob Callahan, Pageant Director, has announced the date of the Pageant as May 19. This is a Friday evening. Proceedings will commence at 8:00.

According to Callahan the date has been moved back a full month to give the various girls in Vermont colleges a chance to compete without taking any unnecessary time [illegible] from their studies.

The site of this years P[illegible]eant will be Burlington Memorial Auditorium. Previously Miss Vermont Pageant's were held in the Burlington High School Auditorium. However with the increased interest in the Pageant over the years Pageant officials feel that this year there will be a need for additional space for spectators.

The annual dance [illegible] other Pageants will be eliminated this year to allow officials more time for concentration on the competition.

A band will be chosen at a later date. The band will furnish the background music for the event.

Girls from all over the state are welcome to enter. The entrants must be between the ages of 18 and 28, must have never been married, must have completed their high school education or be scheduled to graduate in June 1961.

The three phases of the contestants compete in are swimsuit, evening gown, and swimsuit competition.

The newly crowned Miss Vermont will receive a $1000 scholarship from the Coca-Cola Foundation and will represent the Green Mountain State at the Miss America Pageant in Atlantic City during the Labor Day week.

Entrants must be residents of Vermont with the exception of college students presently attending Vermont colleges.

Interested girls should write to contact Bob Callahan, Director, Miss Vermont Pageant, Vermont Publishing Company, Burlington, Vt.

There will be an open meeting of the IRC at 4:30 P.M. March 7. Election of officers will be held.

MISS DE LOS ANGELES TO PERFORM

Victoria de los Angeles, featured in final Lane Series presentation.

By PAT CONWIT

"Vocal sheen like this usually disarms criticism," said the New York Times of Victoria de los Angeles, noted soprano of the Metropolitan Opera. This enthusiasm is not unlike that of many people around the country who have heard this "Lovely Lady of Spain." Since her arrival in the United States in 1950, she has thrilled audiences at both Carnegie Hall and the Met.

Tomorrow night, as the final Lane Series of the year, Miss de los Angeles will present a recital including selections of varied origin. Some famous composers to be represented are Handel, Schubert, Brahms, de Falla, Turina, and Rossini whose "Una voce poco fa" from the "Barber of Seville" will be the only excerpt from an opera. There will also be some Spanish songs representative of Miss de los Angeles' home.

A native of Barcelona, Miss de los Angeles studied music at the Conservatorio del Liceo. At twenty she made her debut in Barcelona singing the role of the Countess in "The Marriage of Figaro." Following this appearance she sang in music festivals throughout Europe, performing at the Royal Opera House in London as a highlight of her career.

News of her success reached America and in 1950 S. Hurok brought Miss de los Angeles over here to perform at Carnegie Hall. The response was so great that, after fulfilling her European commitments, she once came to the United States to appear at the Metropolitan Opera in soprano roles in "Faust," "Madame Butterfly," and "La Boheme."

This season she is on a North American tour during which she will come to Burlington. The tour began in January and as her ninth one in the U.S. will take her to eighteen cities. And in addition to it, Miss de los Angeles in singing the title role of "Martha" at the Met, and will be seen at a recital in Carnegie Hall.

So it is with great pride that the Lane Series presents this Spanish singer of world fame, who has sung with the major opera companies of this day.

UVM Scholastic Standing

[illegible] semester, [illegible] had Kappa Alpha Theta and Phi Sigma Delta with the top averages [illegible] 1.80 [illegible] and 75.68. Editorial:

The Student Center

[illegible] completion of the new university Library, the [illegible] Billings Library will be converted into a Student Center. This Student Center will fulfill a great need on the University of Vermont Campus.

The administration of the university is of the opinion that our campus is quite institutionalized. In order to help correct this institutionalization new dorms are being constructed. These are intended to make campus living a more meaningful experience as well as to facilitate the transfer of ideas and concepts learned in the classroom. It is hoped that this total "university" experience will result in a whole that is "greater than the sum of the parts."

However, in order to make that concept a reality it is also necessary that students have a "home of their own", or, as Dean Powell puts it, "a campus living room". This means a Student Center which is more than a building or a business enterprise. Thus the Student Center should be a laboratory for ideas learned in the classroom, eliminating the possibility that these ideas will stagnate from lack of use.

With all student activities under one roof there will be far greater opportunities for unified student activities. It is assumed that these programs will be constructive and will lead to an all-university concept. This is necessary as the University of Vermont is at present no more than a group of individuals without a coordinating spirit. The money to be spent on the Student Center -- $150,000 for the renovation alone -- is not needless expenditure which could be used for construction of classroom. The Student Center will indirectly result in the creation of much classroom space for when student activities move out of Waterman they will be replaced with classrooms. Thus both the classroom needs of the University and the needs of the University students will be satisfied.

Because the proposed Student Center will be a big step forward in the realization of the true purpose of a University it must be understood that student support is necessary -- students must not only support the Student Center, they must take upon themselves responsibility for its maintenance and usefulness. For without student support for the proposed Center its purpose will be defeated and once again the concept of University will not hold true at UVM.

Ring Out The Old

One year ago today a new Senior Staff took command of the Vermont CYNIC. This afternoon that staff will be replaced by a new staff for the coming year.

Largely because of the cooperation of the many people involved in the "workings" of the CYNIC, the paper has been able to present well balanced and detailed coverage of campus news in readable and eye-pleasing form. A student newspaper cannot exist without the cooperation of its student workers -- in whatever field they labor -- or its student and faculty advisors. This Senior Staff has been fortunate in working with a group of students whose cooperation has been most gratifying. Now the Senior Staff would like to thank these students for their work in the past year and to express hope that their work will continue under the incoming Senior Staff.

It would seem appropriate at this time to look over the past year to see what the CYNIC has done with its editorial columns and with its news space. Editorially, the CYNIC proudly supported picketing of local chain stores to protest the chain's segregation policies in the south. When the Student Association criticized this picketing, the CYNIC objected to the criticism. The motion in question was rescinded at the next SA meeting. The controversial Disclaimer Affidavit and Compulsory ROTC were questioned editorially, though nothing happened because of this. WSGA policies and practices became the target of several editorials this fall, and resulted in a questionnaire from WSGA Council to the women students. Nothing concrete has yet been done, nor will anything be done until Joint Conference in May gives the women an opportunity to air their grievances before a body empowered to make changes.

(continued on page five)

Letters To The Editor

KW Criticism:

Tickets

[illegible] Kake Walk more [illegible] Student's [illegible] Kake Walk [illegible] Student Body. It is [illegible] that the entire student body be given the first opportunity to acquire tickets and the alumni, the graduate school or the public.

Why are blocks of tickets allotted the Medical School, to dormitories who have no intention of coming and to the public? Have they a greater vested interest in Kake Walk than the Students? Why should the alumni, who have already participated in and attended past Kake Walks be allowed tickets when students who have never attended are not?

The Kake Walk Committee chooses to turn its head in an effort to please a portion of all. It ignores the resale of tickets for a profit, and it disregards the unorganized methods of public sale. In short, the students are sacrificed to promote inefficiency and confusion.

Seating is indeed limited, but until a structure of sufficient size is erected to accomodate all interested in attending Kake Walk, the students of UVM should rightfully be given the first opportunity to acquire tickets.

Somewhere amid the hustle and bustle of future Kake Walks, enough voices may be raised in protest to force a reconsideration in favor of those who, in one way or another, carry on the tradition of Kake Walk.

Sincerely yours,

William A. Hill, III, '61

Skits

Dear Sir:

Since coming to UVM some 10 years ago my wife and I have wanted to attend Kake Walk and on Friday night past we finally fulfilled that desire. We left Memorial Auditorium with mixed feelings and our first impressions of this gala occasion are here described in brief.

The walking was delightfully exciting and evoked feelings of admiration as we realized that such perfection could have been acquired only with arduous and persistent training. The fraternity skits could have and should have contributed greatly to the evening. Unfortunately we found ourselves wishing there was some way to hurry them along and get them over with. We found the skits profane and tawdry, serving, only to downgrade their respective fraternities and the whole occasion. It was deplorable to us that fraternity members feel, that to be entertaining, skits, must smack of sex, liquor and profanity. The only thing that made them bearable was that musically speaking the singing was harmonious. On the whole, the skits to us were a spectacle of misguided and wasted talent.

Sincerely,

Betty and Glen Wood

The Melting Pot

By ROGER ZIMMERMAN

'A FINAL WORD

And so we come to the last [illegible] column (?), the melted pot. It is [illegible] some sense of nostalgia that I write this [illegible]. Actually, I was thinking that when I ran [illegible] and resigned to write about (someone told me) happened shortly after I began the column [illegible] select a three-man committee to help me pick [illegible] of my past columns and begin a new series [illegible] least of Zimmerman". Well, to make a long story [illegible] I finally selected a committee. But, they [illegible] anything appropriate for this new series; [illegible] come up with the fascinating thought of devoting [illegible] after issue, the entire page five to a group [illegible] called "the worst of Zimmerman". Naturally I [illegible] them. All of this, however, brought to mind [illegible] past work which I've done for the CYNIC. Some [illegible] was good (refer to parents for definitive statement [illegible] this), some not so good, and some terrible. As a matter of fact, I like to think of the really bad [illegible] coming from my formative period in writing, but [illegible] doesn't know where the formative period ends and the experienced part begins. I digress.

Anyhow, I do remember, in particular, a few columns that centered around a minor intra-paper skirmish involving a former CYNIC columnist, Ed Darer, and myself. The issue was something about Greek Week, the honorable Mr. Darer extolling the week's virtues, its [illegible]iosities, etc., while I, taking myself quite seriously, said a few things on the needless quality and restricted appeal of Greek Week (the same things could still be said about it). One thing led to another, and soon I received a letter from five senior girls telling everyone how great Ed was and how stupid, illiterate, etc. I was. Well it was a lot of fun, especially when I learned from unofficial sources that the letter was written by Ed himself.

IN GRATITUDE

Writing for the paper has been one way of learning about all those things in this collegiate world that you really, I mean like with a passion dig like. Of course this is nothing but a statement of good old-fashioned negativism, but then again, why not? But for the sake of introducing the overworked, overplayed and overused element, namely, the "well-adjusted" end of it all, there have been many positive moments. I remember particularly, and this was B.C. (before column), one really beautiful incident. At this time I was writing feature. My assignment was to review a scientific convention which had met in the summer of '58. I had to see a doctor at the medical school to get the information for the article. As it turned out, the doctor played a prominent part in the congress, and was (still is now) a very busy and active person in the medical school. After seeing him I wrote the article and when it hit print I left a copy of the CYNIC in his office. A week later a note came from the doctor complimenting me on the article. Boy did I feel big. Here was a man who, with all his importance and prominence, decided to pay tribute to a very small spoke in the CYNIC wheel. It was a rewarding way to learn what a really "big man" is like.

Well, seeing as though I'm about to cry and [illegible] now, I guess it's time to close. I would like to thank the present editor-in-chief for being at all [illegible] courteous, kind, thrifty, cheerful, etc., etc. (I was a former boyscout). I would also like to thank my followers for being tolerant. And to those who weren's so loyal, they don't know what they missed (do they former loyalites, eh, eh, do they . . . eh?) Au Revoir.

Column Contest Announced

Mr. Zimmerman's resignation from his [illegible] columnist for the CYNIC opens space for another column. The CYNIC hereby announces that this will be filled by means of a columnist contest. Anything to become a regular weekly columnist for the CYNIC should submit a column to the CYNIC by, March 9. The submitted columns will be [illegible] quality of material and writing by a panel of the Senior Staff members. Entries should be [illegible] words in length and must be typewritten. [illegible] columns will not be considered.

Candidates should be aware that, if chosen, [illegible] will be expected to produce a column of equal quality each week that the CYNIC appears.

Billings

(continued from page one)

[illegible] A controversial [illegible] will be undertaken at the lowest level of the east side of the building. The treatment of the [illegible] on the north [illegible] looks to be quaint, a meeting place with plenty of [illegible]

The Billings Student Lounge will have a particularly attractive view to the mountains. Due to the [illegible] the lounge will be [illegible] The [illegible] will be [illegible] The lounge will be [illegible] The [illegible] will be [illegible] [illegible] The [illegible] will be [illegible] [illegible] [illegible]

Across the Campus

ALPHA DELTA PI

The ADPi's attempted to [illegible] to UVM with our "Winterland" skit [illegible] Night. This resulted in a serious dilemma last [illegible] night, namely, the [illegible] of the missing pillow- - which were substituted for snow. Corinne Szeg- is to be complimented for her terrific enthusiasm and energy in our recent [illegible].

All the ADPi's extend warm congratulations to the Alpha [illegible] with Bonnie Burgess as [illegible]'s K.W. queen. Their [illegible]sh skit campaign was certainly a colorful one.

Being second highest again in the Women's Scholastic Average for last semester stirred up some excitement this past week. By the way, what did happen to our "in-sensitive" steak dinner?

Marty Wahl was chosen by the house as a nominee for the Dorothy Shaw Memorial Leadership award, a national NSP, recognition award.

Several appointed officers for 1961 were announced: Carleen Otis, Scholarship; Sue Vecchiolla, Standards; Elaine Wright, Social Chairman. Betty Lou Sherry and Janet Tinker were elected to the executive committee as members at large.

KAPPA ALPHA THETA

"Hooray, we did it again!" No one was more surprised than the Thetas when they found they were first in scholarship. The increase in the amount of coffee has been worth it a hundred times over.

However, there have still been a few sad faces around the house. It is pretty obvious that there won't be any spring skiing and it wasn't much fun going to Kake Walk in hip boots. Susie Adams managed to have a heck of a good time in Stowe last weekend, though. Was it the skiing Susie or *someone* else? Anyone who is going West this summer please tell L. Foley or S. Adams or possibly Scottie. Big plans are in the making whether or not they pan out.

Among many others, Pattie Pires was walking around all day (all smiles) last weekend. One has to admit that boy does add a lot to this place.

With or without sculptures, most people were feeling no pain over the weekend. Congratulations to our King and Queen. Unless this springy weather is a complete fake-out, everyone can begin to dig out their sun tan lotion and bathing suits. Maybe the time for North Beach will come sooner than usual.

SIGMA PHI

For the second straight semester, the Sigs haveplaced fifth out of sixteen fraternities scholastically.

Everything is back to normal again after a very festive Kake Walk weekend. Congratulations to Bob McBride who did such a wonderful job planning the buffet which was held Thursday night. We were very happy to have so many alums back with us this weekend. Among them were Charles Tetzlaff, Pete Snow, Frank Owen, Jack Robb, and Frank Orr.

Congratulations are in order for Stu Burroughs, '63, who became engaged this weekend to Jeneva Peterson of Boston University.

We also want to welcome our new pledges, Jim Hall, Dick Lerusso, and Harry Dickerson.

A large delegation is planning to attend the annual Sigma Phi Society anniversary Tunk which will be held on March 4th in New York City.

TAU EPSILON PHI

Tau Epsilon Phi has nothing but memories now - memories of a very wonderful and exciting Kake Walk weekend. The 64th annual Kake Walk was not only an exciting one, but also a profitable one for Tau Epsilon Phi, as we took a second place in the skits the first night of walking and a first place in the skits the second night of walking. We thank Rick Nalin, Steve Prover, Arnie Wehler, and Chuck Lowenstein, our skit authors and directors for supplying us with plenty of cake both Friday and Saturday nights.

Thanks are also in order to our Kake Walkers, Steve Bernstein and Ed Rutner for putting on a fine show even with the handicap of Bernsteins injured leg.

Congratulations are appropriate for several Teps and their new Tepesses. Namely Al Glazier and Stu Rauch who pinned their Tep sweethearts this past weekend.

We are also very proud of Larry Simon, who, now in his junior year here at UVM received acceptances to 3 medical schools, Michigan, Syracuse and Buffalo.

The Tep volley ball season is about to start and we are looking forward to a successful season. We have planty of height and plenty of go-power.

THETA CHI

If you have that tired-out feeling after Kake Walk, Theta Chi suggests you try a change of scene -- studying! If that doesn't work the ice will soon be melting on Lake Champlain, and the ferries will be running on regular schedule.

Among the large number of alums returning to share in the festivities this weekend was Dave Holterling, who brought a real "Yellow Bird" with him. A precedent has been set at 17 Summit Street as "Yes We Do The Charleston Too" might have found applications for gallons of [illegible] - what of the [illegible]?

Kennard was duly awarded the Kake Walk as Theta Chi enjoyed serenading Carol Bailey. Do I have to name them all. Tom's, Jackie Prouty (It's about time), and Gerry Greenwood I'm thrilled. And Buzz Stone lost his pin to Kathe Simpson, just too late to join the group for the serenade.

Pam Harrington is glad that Kake Walk is over so she will be able to see her winning walker Frank, and Mike Johns is happy it's over because now he can go back to smoking!

In all seriousness, Theta Chi certainly hopes you had a real fun-filled weekend, and in the unhappy event that you did not, remember that there are more coming.

SIGMA ALPHA EPSILON

The Brothers of 36 Summit Street are glad to announce that we had some pledges in the House this week end. It is reported that we also had some kake misses. Oh Peter. We would like to extend our congratulations to the winners of Kake Walk and to show sentiments. Good were especially those of you that were able to come through and hold such good sentiments.

We were very happy to welcome so many alums back to the house during the week end. So many were back that at times it was difficult to see any of the present members at all. We must admit that these alums of ours are some of the wildest people that we've met in a long while. It was they who were still singing songs at 6 A.M. on Saturday and Sunday mornings.

Many was the brother who had to stay up all night just because there was already someone asleep in his bed. Dot Capaldo got the surprise of her life to find all those guys asleep in his bed.

John Stabler is our new athletic chairman, Al Fyfe our new social chairman, and Don MacDonald our new Vice Pres. Now we have to go back to the books.

Letters

(continued from page five)

[illegible] like the *New Republic* and the Nation and books I [illegible]

Mr. KUNZIG "Have you ever [illegible] the New Republic and the Nation"

Mr. BLAISDELL "Yes."

[illegible] Committee on [illegible] Activities, 1954

The above is only a sample [illegible] facts. Like George Marzotty and thousands [illegible] elected simply [illegible] even to the extent of [illegible] Communist activities [illegible] the New Republic and the Nation.

As the presence of Carlton Beals in the Nation draws skepticism on my part because of his links with Communist front organizations [illegible] listed in Part 1 and 2 of Communist Political Subversion - House Un American Activities - 1956.

My observations of the publications reflect these points, among others:

1. Both are appeasers and very bad ones indeed.
2. Both ridicule the East administration and the U.N.
3. Both stand more at Russ[illegible] but not Labor.
4. Both push the nuclear disarmament issue as the really big factor for survival, month after month.
5. The *Nation* in its last publication featured a cover on Senator Eastland calling for the ouster of the House Un American Activities Com.
6. Both call for government intervention into [illegible]
7. Both call for recognition of the Chinese Reds, and at the same time castrate our ally Taiwan.
8. Both are for "cultural exchanges" but of course will not broadcast that book condemning and radio censorship in Russia.

Now most of these points echo the Communist Party's line will these be [illegible] opinion, but if you don't [illegible] I suggest you read page 4 and 5 of a study on "THE TECHNIQUE OF SOVIET PROPAGANDA" by the Senate Internal Security Sub-Committee. [illegible] You can get this report for 15 cents sending to SUPERINTENDENT OF DOCUMENTS, GOVERNMENT PRINTING OFFICE, WASHINGTON, D.C.

In summary I want to make it clear that nobody has branded the *New Republic* and the *Nation* as subversive [illegible] and [illegible] of these nations have at sometime [illegible] Communist [illegible]. The point about propaganda is the fact that Communist strategy is geared to a covert and frantic effort to neutralize and if possible to brainwash leaders, bring liberal groups into action for Soviet benefit, especially the genuine Anti-Communist one. I think I can say after the last ten weeks of research on the subject that in my mind there is no doubt over some similarities of thought between the *New Republic*, the *Nation* and the Soviet Foreign Office these two publications have been sucked in by Soviet propaganda, and ARE INDEED QUESTIONABLE MATERIALS.

Yours,

D W Norton

Evansmen Tip The Scales 97-87; Split With St. Lawrence, Clarkson

Both Games Result In Overtime- Triple & Single

Becton Scores 37 Points To Set New UVM Record, And Shabel 25, As Cats Claw Judges

by Bruce Mirsky

A [illegible] Vermont basketball team brought a four-game winning streak to an [illegible] Clarkson, 97-87, at the conclusion of the Evans, the Cats split a doubleheader with the Saints of St. Lawrence, a [illegible] game with last year's champs in the process, and [illegible] UVM title at contention. The game was tied 70-70 at the end of the four extra five minutes, and tied at the end of the second. Three straight points by the home team, and the game was out of reach for the Cats who lost it [illegible]. Bengo Becton, Vermont's answer to Bo Mcmillin [illegible], was high scorer for the evening with 33. He was followed by Jack Shabel's 25 and Harry Zingg's 13.

Bengo looked mighty frank for Vermont as the Cats traveled to Potsdam, New York for a game with Clarkson College. Having [illegible] Lou Foster a three overtimes the night before, Bengo was [illegible]. However, the Cats came charging out of the locker room a flaming start, and when the final buzzer sounded at the end of one overtime the score stood Vermont 68, Clarkson 64. Foster, a fifth-year man for the losers, was [illegible] by Coach Fuzzy Evans. Again it was Becton and Shabel who provided the winning spark. Ben started on a three point play with fifteen seconds to go on a driving lay-up, enabling Vermont to go into an overtime period. In this period, Becton scored twice from underneath in the first minute. Zingg added a set shot, Benny a lay-up shot, and Shabel wrapped it up with two free throws. Becton finished the game with 27 points, 7 points above his season's average, and Shabel ended with 21, the same total he registered the preceding evening.

by Frank Bolden

Members of the Brandeis basketball team must have thought that the "walk [illegible] lake" was last Saturday afternoon. After the performance by UVM's Benny Becton. The spectacular 6-2 sophomore [illegible] high over the head of 6-5 Al Leibowitz, for a total of 37 points, a Vermont record for a single game.

Becton, received a thundering [illegible] when he left the game with his fifth personal foul, after having broken the former record of 36 points, set by Earl Steinman against Clarkson in the 1954-55 season. Benny received the game ball as a momento for his great performance.

Vermont, behind the strong rebounding of Becton and the smooth driving of Jack Shabel, piled up a 16-14 lead at 11:14 of the first half. The belligerent Brandeis team fought hard and managed to tie the score twice, but they could never take the lead.

Coach "Fuzzy" Evans had his men employ a 2-1-2 zone that clogged up the middle and forced the Judges to shoot from the outside. By the time the visitors found the range, the Cats had too big a lead to be overtaken. At the half the score was 43-39 in favor of Vermont.

There were many fouls in the game. Four starters, two from each team, left the game by whistle express. Goldberg and Leibowitz for Brandeis and Stahler and Becton for Vermont were the unfortunate victims. Vermont scored 29 points and Brandeis 35 at the charity line.

Jack Shabel scored 25 points, even though he didn't play the entire game. Jack extracted many "oohs" and "ahs" from the crowd with his needle-like drives and long jump shots.

Richie Ader and Captain Harry Zingg also scored in double figures. Ader, who set Becton up for the record with a beautiful pass, scored 17 points, while Zingg hit for 10. Pete Brem did a great job on defense [illegible] Stahler left the game.

A bright spot for the [illegible] was the shooting of [illegible] and Paris. The two [illegible] scored 28 and 18 points [illegible] tively. Other highlights of the well-played, high-scoring [illegible] were the fast-Fast-FAst [illegible] by Vermont and the long [illegible] point plays by Becton, who [illegible] managed to pull down 22 re[illegible] bounds, to go with his 37 [illegible].

Final score: Vermont 97, Brandeis 87.

"I've got it! I've got it!" (Photo by Hazelton, St[illegible]

BECTON 3RD IN SCORING

[illegible] Chatfield, University of Massachusetts captain, is making a determined bid to overtake Tom "Bay" Chapelle of the University of Maine as Yankee Conference scoring leader as the teams enter the final stages of the campaign. Grutchfield, with two games to go, has narrowed Chapelle margin to one percentage point.

Benny Becton the University of Vermont's sensational sophomore, has moved into third position with 308 points in 14 games. Don Harger of New Hampshire is fourth with a 19.4 average and Larry Schiner of Maine is fifth with a 19.1.

The leaders of those in last week, currently leading the conference, have four players in the top 15. Charlie Lee has averaged 16.8 points per game. Next comes Muller, 15.9, Dave [illegible], 13.6, and Mike Weiss, 11.7.

The leaders, their total points and averages follow: Chapelle, Maine, 198 and 22. Grutchfield, Mass., 168 and 21. Becton, Vermont, 308 and 20.3. Harger, New Hamp., 155 and 19.4. Schiner, Maine, 172 and 19.1. Lee, Rhode Island, 134 and 16.8. Muller, Rhode Island, and Kirk Leslie, Mass., 127 and 15.9.

Also, Ricereto, Rhode Island, 110 and 13.8; Mike Mole, Massachusetts, 101 and 12.7 Jack Shabel, Vermont, 124 and 12.4. Don Sturgeon, Maine, 112 and 12.4 Harry Zingg, Vermont, 106 and 11.8 Weiss, Rhode Island, 107 and 11.7 and Don Black, Massachusetts, 90 and 11.3.

Chamber Series Presents Leonard Rose, Cellist

By PAT CONWIT

In 1958 at the Brussels World's Fair a precedent was set when a solo recital was presented by a celloist - a rather unusual program to attempt. Yet one critic said of this soloist that his recital was not only equal to all the great recitals so far heard in the American Theatre, it was the high point of the musical events organized there." Here was one man who as an American was held in esteem in the same manner as we once held those European musicians who had performed in the United States.

Leonard Rose, to perform before UVM students. (Credit: Bruno of Hollywood)

Leonard Rose will again set a precedent when he appears for the Lane Chamber Art Series on March 13. The first appearance of a Cellist as a solo artist will take place in the Ira Allen Chapel on Monday night. A solo Cello performance has not been attempted in Memorial Auditorium because of the acoustical problems.

Mr. Rose, a native of Florida, studied music at the Curtis Institute of Philadelphia after receiving a scholarship at the age of sixteen. Four years later, in 1938, he was engaged by Arturo Toscanini to play with the NBC Symphony. He was then appointed assistant first cellist with the same group. Following months brought overseas appearances including one with the New York Philharmonic at the Edinburgh Festival in 1951 and the aforementioned World's Fair recital.

A tour last year brought Mr. Rose to sixty American cities to perform with such noted orchestras as the New York Philharmonic and the Cleveland and San Francisco Symphonies.

After this season he will appear throughout the United States and Canada, and will record with the New York Philharmonic and the Philadelphia Orchestra.

When the audience hears Mr. Rose on Monday night, he will be playing an Amati cello, circa 1662. It is considered to be among the world's finest instruments, having been made at Cremona, Italy, the home of Stradivari as well as other fine craftsmen of that day. Rose hopes that this cello, a museum piece, will soon bear the name of the Rose Amati.

The program will consist of five major works for the cello. They include *Adagio* from the *C Major Organ Taccata* by Bach; *Sonata in A Major* by Beethoven; *Sonata Number 2* by Martinu; and *Variation on Rococo Theme, Opus 33* by Tchaikovsky. Martinu is a contemporary Czechoslavakian composer whose strains of rhythm and harmony are typically Czechoslavakian in derivation.

The final piece in the recital, *Variations on a Rococo Theme*, as its name suggests, is ornate in the sense that it has much grace and charm. This selection won acclaim for Rose at the Stratford, Ontario Festival in Canada.

Tickets are now available for the first solo performance in Burlington of Leonard Rose, "the superlative cellist of today."

Vt. Conference Brings Three Noted Speakers

The eighth annual Vermont Conference will convene on Wednesday evening, March 22, for a three day session. This year's theme is to expose the discrepencies of traditionally accepted social and institutional values in contrast to personal ideas and convictions.

"Contradictions? - Public Myth and Private Motive," is the subject area to be covered. The committee chose this because they felt it was more limited than the scope has been in the past. It will provide a common meeting ground for the three speakers, and give continuity to the conference. Each speaker will be on campus for the three day period, March 22, 23 and 24, and the formal talks will be given in the Ira Allen Memorial Chapel starting at 8 p.m. each evening.

Pierre Delattre, a minister of the so-called "Beat Generation" artists and rebels of San Francisco's North Beach, and the author of both religious and secular poetry, will speak on Wednesday night. Dr. Ernest Dichter, President of the Institute for Motivational Research, concerned with almost every area of manufacturing, advertising and selling, will present a psychologist's views on the conference theme on Thursday evening. Dr. Paul Goodman, the concluding speaker, is presently teaching methods of group therapy. His primary field of interest is the problem of career-block. He is the author of several works, the most recent of which is *Growing Up Upsurd*.

Following each session, an informal panel discussion in Waterman cafeteria will be held, and coffee will be served. The evening's speaker will serve on a panel with the other two speakers at this time. The Dean of Administration has granted permission to close the Coffee Shop for each of the three evenings.

During their stay on campus, the speakers will be visiting classes and discussion groups. Any faculty member who is interested in having one of the gentlemen attend a class should contact a member of the committee if they have not already done so.

The Vermont Conference is subsidized by the S.A. This year's members are Chairman, Christine Borgmann; Vice Chairman, Gail Staggenborg; Secretary, Olive Holmes; Treasurer, Mark Michelman; Publicity, Virginia Huntington, Peggy Link; Arrangements, David Colburn; Hostess, Sally Greene; Executive Committee, Hermane Terry, Joanne Bregatein, Joan Hindson. Advisors, Mr H McArthur, Dr. R. V Daniels Mr P Aschenbach, Mr. M Nadworny

Jules Older Heads New CYNIC Staff

New CYNIC Staff begins work. Present are: Frank A. Bolden, Judie Feigin, Jules Older, Pat Conwit, Ed Crane. Absent from picture are Linda Herzenberg, Carl Sherter. (Credit: Ojamen, SPS)

The staff of THE VERMONT CYNIC is proud to introduce Jules Older, familiar to CYNIC readers as author of the column "Why Not?", as its new editor-in-chief. Jules hopes, among other things, to raise the writing standards of the CYNIC and to emphasize the intellectual achievements of the school. He feels that he has a very competent staff and has remarked that he appreciates the fact that the CYNIC has come to him from good hands in its former editor, David Steele.

In addition to having written for the paper since his freshman year, Older has worked with the University Players. He is a psychology major and is a member of the Gold Key and of Phi Sigma Delta fraternity.

Best wishes are extended to Jules for success in his new position, and it is hoped that under his management and direction this paper will continue to serve as a credit to the University.

Thursday, March 2, the UVM CYNIC held its election of Senior Staff members for the year 1961-62. Jules Older is the new Editor-in-Chief of the CYNIC. Among those who have been chosen to aid him in his work are: Judy Feigin, Assistant Editor; Pat Conwit and Steve Cohn, Co-News Editors, Frank Bolden, Sports Editor; Linda Herzenberg, Managing Editor; and Edward Crane, Student Advisor.

Judy Feigin is a Sophomore student from New York City. She is in the college of Arts and Sciences and majoring in Zoology. In High School she was Co-Editor of a History magazine and Organization Editor of her yearbook. Judy began as a reporter for the CYNIC in her Freshman year. In March, 1960 she was elected to the position of Feature Editor, and held this post until the elections of last week. The new Asst. Editor plans to make her post an active one, and will utilize it to make the CYNIC "more the voice of the campus." "I hope to encourage articles of a more serious nature, and to improve the quality of the

(continued on page five)

Staff Openings

The 1961 Editors of the CYNIC would like to announce that they have openings on many staffs of the paper for all interested and qualified members of the student body. We urge any student, regardless of past experience, to apply for a position in either of these fields. For those interested in writing there are the News, Feature and Sports staffs, for those who feel that their command of grammar is adequate there is a rewrite staff, for those interested in the mechanical aspects of creating a newspaper there is a Production staff; there is also an advertising and circulation staff for students interested in those facets of newspaper production; and for a limited few with experience in photography, the Student Photography Society (SPS) has several openings.

The new Editors of CYNIC would like to make this year's paper an improvement over last year's; but they can only do so with participation of interested students on its staffs, and suggestions from the entire student body. Applications to positions on the paper should be made in writing, and placed in the mailbox of the Editor of the appropriate staff. CYNIC office lower Waterman Room 40.

Applications will be accepted at any time during the school year, but for a guaranteed position they should be submitted by March 15.

Dean Wolf Of Medical School To Leave

Dr. George A. Wolf, Jr., dean of the College of Medicine for nearly nine years, will assume the positions of executive director of the Tufts-New England Medical Center and vice president for medical affairs of Tufts University effective September 1. News of the appointment will be made by Tufts officials Sunday.

In the newly created position Dr. Wolf will assume responsibility for the overall activities of the Tufts-New England Medical Center. Each unit exists within the Medical Center: the Boston Dispensary and Rehabilitation Institute, the Boston Floating Hospital for Infants and Children, the Pratt Clinic, New England Center Hospital, and the Tufts University Schools of Medicine and Dental Medicine will continue to operate under their respective Boards of Trustees, administrators and Deans, but will work closely with Dr. Wolf to achieve unified goals in service to patients and responsibilities to medicine and dentistry in education and research.

Dr. Wolf has been Dean and professor of clinical medicine at UVM since July of 1952. Under his guidance Phase One

Grange Is Co-ed Frat

Grange meetings on campus, which are conducted in the economics classroom at Merrill Hall include program items which are inspirational, educational, and recreational in nature. These programs include such items as speakers, slides, square dancing and refreshments.

The UVM Student Grange is a unit in the Vermont State Grange Youth Program. As such, it is eligible to take part, either as a group or through individual members, in State Grange training conferences, procedure team work, tours, the prince and princess project, and youth travel scholarships. Robert Parker, a member, was the Vermont IFYE delegate to Costa Rica in 1960. In the fall of 1960 Everett Mudgett, Master, and Joyce Spooner, Secretary, were awarded travel scholarships to the National Grange Convention in Winston-Salem, N.C. The Student Grange is active in community service work, for which it received special awards in 1959 and 1960 from the State Grange.

There is a chance to develop leadership through the various Grange offices which are similar to those of a modern business corporation. There is also opportunity to advance to higher Degrees in the Pomona and State Granges if time permits

Music Club

The UVM Music [illegible] weekly meeting [illegible] evening in the Music [illegible] Present besides [illegible] were Dr Frank [illegible] Department Head, and Francis Wetherell [illegible] Music Department.

Following weekly [illegible] Secretary Jane Schequind Treasurer Frank [illegible] motion proposed of [illegible] club dues of members [illegible] Music Educator's National Conference was discussed and members decided that the members who take [illegible] nority of club members should not be excused from the $1.00 annual membership fee. A report on the Christmas Round Hearts [illegible] was presented to the club by Jacky Prouty, as was a report on the recent successful Orchestra Concert by [illegible] Cederre.

Discussion was then held on the sponsoring of two forthcoming Spring concerts as well as the sponsoring of the Menotti operas, "The Medium" and "The Telephone" which will be given in May by the Music Department. The club voted unanimously in favor of sponsoring these projects. Plans for entertaining the high school students on School Day were submitted by Joan Schequind elected Chairman of the Planning Committee.

A new club member, Alice LeBlanc, was welcomed into the organization, after which April 13th was elected for the next monthly meeting. President Jay Sheperd adjourned the meeting.

Dr. Kirtley Mather To Deliver PBK Lecture

Dr. Kirtley F. Mather, professor from Harvard University will conduct a discussion.
(Credit: Koby of Cambridge)

by ILENE BARR

The PK. Beta Kappa Visiting Scholar Program, which began in 1950 to enable more schools to have leading scholars participate in campus activities, will present Dr. Kirtley F. Mather to the University of Vermont student body on Tuesday March 14, at 8:00 P.M. in the Student Lounge.

Kirtley F. Mather, professor of geology, emeritus, at Harvard University is president of the American Association for the Advancement of Science.

He began his teaching career at the University of Arkansas and taught at Queen's University, Ontario, and Denison before joining the Harvard faculty in 1924.

Particularly concerned with the social implications of science, Dr. Mather has been active in many varied organizations. He served as president of the National Council of YMCA's and was a founder of the Boston Center for Adult Education. He has traveled extensively overseas since 1947, attending scientific, educational, and religious conferences. He is the representative to the United Nations of the World Alliance of YMCA's.

Dr. Mather is the author of numerous books and articles, including *Old Mother Earth*, *Source Book in Geology*, *Science in Search of God*, and *Crusade for Life*. He is a member of the Royal Geographical Society, the American Geographical Society, the American Geophysical Union and other professional organizations.

Dr. Mather has chosen for his topic "The United Nations and International Cooperation." He will consult with those interested in Student Christian Associations and the World University Service.

Library Fee Set For Fall

University of Vermont students - excluding medical students - will begin paying a $15 per semester library fee next fall, under the terms of the $2,100,000 bond issue voted by the 1959 legislature to make possible an early start on the construction of a new library for the University.

Expectations are that the new library, presently under construction, will be ready for use next fall. The present Billings Library will be converted to a student center.

Special and graduate students taking fewer than 12 semester hours will be charged a $7.50 library fee each semester.

Funds received from the library fee will be paid to the State annually until the library bond issue is retired.

IFC To Elect New Officers

This week's meeting of the Interfraternity Council of the University of Vermont is an especially important one to all the pledges and brothers of fraternities on campus. It is the meeting in which the Officers of this year's council will be elected.

There will be elections for President, Vice-President, Secretary and Treasurer. This year's officers are Bob Goldman, President; Dave Pallin, Vice-President, Stan Williams, Secretary, and Grant Allen, Treasurer.

While commenting on the position of President, President Goldman told of the many duties of the position. He said that the President is usually a senior member of the IFC, and also a senior student at the university.

The President has many important responsibilities, as do the other officers. Since fraternities are the basis for social life on campus, the person responsible for the coordination of the many fraternity functions is extremely important.

The council regulates all interfraternity functions, and helps smooth fraternity paths with the administration. The council has charge of such things as the Intramural Sports Program, Homecoming Floats, and other IFC competitions. They also have charge of the Interfraternity Sing.

All in all, the IFC is an integral part of social activity on campus; therefore, the coming elections, on March 14, should be looked for with expectation and anticipation for a good and happy year.

"Antigone" Cast Rehearses

Corinne Szeglin and Chuck Goudey, leads in "Antigone", take a coffee break after a long evening of rehearsal.
(Credit: Coleman, SPS)

Rehearsals for *Antigone* have been underway for a while now. With Chuck Goudey as Creon and Corinne Szeglin in the title role, the practice sessions are progressing quite well.

The stage will be as near a copy of the original Greek arena theatre as possible. The sets are being made by students with the help of Mr. Ed Feidner of the Speech Department. If anyone is interested in working on sets he can be sure of a welcome at the Southwick Scene Shop at 8:00 P.M. any evening.

The togas, robes and the Greek masks are being designed and constructed at the costume shop in East Hall, also with the help and guidance of our ever capable Mr. Feidner.

With these and many other things going on behind the stage, the Players are extremely busy. Opening night will be Thursday, March 16th. The show is planned to run also on the two following evenings, the 17th and 18th of March. Tickets are on sale now at the museum and the book store.

Is it Teiresias, or are they playing Blind Man's Bluff?

Editorial:

Ring In The New!

[illegible] thoughts, and cultural events deserve full coverage, as do intellectual achievements by members of the University. Little can be accomplished, however, without the cooperation of those in a position to publicize these events and enlightenments. Only through the efforts of committees, department chairmen, and the like, can the many worthwhile pursuits at UVM receive the coverage that they deserve.

Finally, although the CYNIC is a newspaper *to* the students of UVM, it is a paper *for* the entire University. With this in mind, we hope to extend our interested audience to the members of the faculty and administration. One way of accomplishing this will be the initiation of a rotating column written by the staff of the University. Interested parties should contact the editor.

These are some of the basic tenets that the CYNIC will rest on during the coming year. There are other ideas, both big and small, that will find their way into the coming issues.

We hope for a good year. We'll work for it.

Greek Walk

[illegible] Walk [illegible] exciting and colorful [illegible] Walk is always after the work, the campus [illegible] still 'talking about it'. But not everyone is equally happy about it.

One half of the men at UVM were not allowed to take an active part in Bake Walk. No Independent could enter the running and none could enter the skit contests. For the campus coordinators, participation was limited to buying tickets.

And surprisingly, some weren't even allowed that privilege this year. There just weren't enough tickets to supply everyone. But so surprisingly, the ones who didn't receive tickets were all Independents.

As we see it then, there are two issues. Should Independent organizations have the privilege of entering the skit and running competitions, and is there a way to insure that all students get to see these events?

The answer to the first question has very well be no, for this year, as in the past, there was no living unit for non-members of the fraternity houses. There was probably no organization with enough cohesiveness to support and finance walkers. But soon the situation will be different. The new dormitories will enable upperclassmen to live together for extended periods of time. There should be enough spirit and manpower to support skits and walkers.

An argument against this is that more teams will drag out the event but [illegible] a [illegible] exhibition to be entered in the skit contest. But there is a solution to this. Just as inferior skits are rejected long before February, a qualifying trial could be held before the actual event. In this way the number of teams could be held down to a set number, perhaps fifteen.

The important point is that everyone would have the same chance to participate.

The [illegible] question will resolve itself when the two [illegible] Bake Walk. Until then it is most important to keep all students here informed concerning the [illegible] Bake Walk as far as all of UVM's students are [illegible] Bake Walk [illegible]

Letters To The Editor

Credit Given

[illegible] 6, 1962

The Vermont CYNIC

To the Editor:

Dear Sir:

[illegible] reading your Bake Walk edition of The CYNIC and having seen the Bake Walk performance myself, I feel that the Theta Bakers did a tremendous job, and I wish I could let them know how much I for one, appreciated their long, hard hours of work and the terrific performance they put on.

However, in your CYNIC, [illegible] article "Introducing The All Men of The Hour", by Howie Solomon, Mr. Solomon went to great length to explain the styles of thirteen Bake Walk teams, giving the names of twenty six Bakers. Didn't he neglect somebody? It seems to me that fifteen fraternities competed, or doesn't Mr. Solomon feel that the two he omitted deserve mentioning? These two, obviously were Phi Delta Theta and Sigma Nu.

I think it is just too bad when these men do not all get credit for their efforts.

Sincerely,
Marjorie M. White

New Debate Season

Vermont debaters who posted an outstanding 98 won, 46 lost record during the first semester, face rugged competition during the spring semester in an attempt to repeat their sterling mark.

Friday and Saturday (Feb. 24-25), one affirmative and one negative team participated in the Capital Hill tournament at the University of Maryland. Thursday, the team staged a series of exhibition debates with American University at various Washington, D.C. high schools. Representing the affirmative team was Elaine Zak of Burlington and Mike Cronin of Richmond. Stating the negative viewpoints were Toni Appel of Elmont, New York and Ed Zuccaro of Floral Park, New York.

At the start of the second semester, UVM took part in the MIT tournament and tied for third place. Last weekend at Dartmouth in a debate that attracted 40 colleges, UVM finished with a 9-7 mark.

On March 3-4, a Vermont team will enter the Notre Dame Tournament, one of the largest in the United States with schools coming from as far west as Utah and as deep south as Florida and Alabama.

Following this tournament, UVM debaters have dates coming up for tournaments at Georgetown, in Washington, D.C. and also at Bowdoin College for the New England Forensic tournament, both on March 10-11; possibly at Brooklyn College on March 17-18; and will be host for the district (New England and New York) West Point regionals on March 24-25. The best three to five teams will then participate in the national finals at West Point in April.

Tentative debates, all in April, are at Hamilton College, the Judge Marks tournament sponsored by Xavier [illegible] University and the [illegible] Novice.

The UVM team is coached by Robert B. Huber, chairman of the Department of Speech and [illegible] Vermont. Lawrence and John C. Dennis, also of the speech department.

PROFESSORES

[illegible] the first of a new series, written [illegible] staff, and taking [illegible] UVM. Jones's column will be [illegible] Reverend Richard Leuthesser, Pastor for the [illegible] Congregational organizations.]

OBSERVATIONS OF A PERIPATETIC CHAPERONE

[illegible] as introduction to life in the University [illegible] Sherry, each and every opportunity to meet and become acquainted with students was eagerly accepted. It seemed to me that the raison d'etre of a University was the students -- their education, their vocational interests, their dreams, and their ideas -- and the sharing and communicating to them of one's own experiences and ideas. When the invitation to chaperone a fraternity party, then, was first offered, it seemed an opportunity to meet persons on a less formal and more intimate level. Chaperoning appeared to be a way of coming out from the lectern or pulpit into the daily lives and experiences of individuals.

My first "tour of duty" in chaperoning partially realized some of these opportunities. (Of course, the fraternity obvious prejudices had to first be overcome in my regard, i.e., Brother to Social Chairman: "You invited a *Clergyman* to our party?" In all it was a pleasant and enjoyable evening. Friendships were made, which, in a few cases, have even survived the graduation of individuals from the institution.

It was but a short time, however, before I began to realize that my wife and I were on some kind of list. We were new and were considered easy marks for desperate social chairmen who had to have the names of all-too-scarce chaperones down in black-and-white by a certain date.

We began to ask ourselves, "Do they want us at their party because of our charming personalities, our scintillating conversation, our social graces, or because they have to have us?"

Much to our chagrin and disappointment, we found that the latter was all too often the case. We began to know the experience of being shoved off in a little room with refreshments and a deck of cards with our companion chaperones. We were tolerated. Occasionally we were spoken to by a few appointed delegates whose job it obviously was to amuse the chaperones.

It was at this point that we started to consider seriously this word "Chaperone." We began to feel, in fact, that the administration of the chaperone system was preventing students from entering into informal and social relationships with faculty and administrative

Why Not ?

...st Evelyn Pflug writes:

...something eminently dissatisfactory about a ...overnment which claims complete representa... two-direction flow of information and ... does not operate according to its claims. ... upon what grounds WSGA Council bases its ... superiority to various other campus organiza...

... many discussions in Council meetings during ... semester the general tone of conversation ... two things: pride in a system which theoretic... ...ents each girl equally, a system which would ... designed for immediate action on any problem ..., and an individual and collective refusal ...'s part to act on the complaints which were ... rising in volume. Don't mistake the problem ... WSGA members -- it's not the system that ..., it is the "tradition" or "custom" fol... Council members.

...ually the girls who have been our leaders ... past few years have carried out the duties ... respective positions, but collectively they ... miserably. Communication pathways from the ... Women's Office to WSGA members resemble four... superhighways; in the opposite direction, the ... resemble overgrown game trails! The blame for ... situation does not lie entirely with the individ... who are governed, as Council would like to have ... large share of the blame must be laid to WSGA ..., which has been acting as a sponge -- complaints ... as far as Council and stop. When action upon these ...plaints is not within Council's sphere, they have ... made any attempt to employ their much vaunted ..."pressure group" function. When action is within their ...risdiction they either deny the validity of the com...nt or never do anything about it. Council's func...ion is designed to be that of a clearing house, to ...t and to forward information. Somewhere along the ... Council has changed itself to an arbitrarily selec... warehouse, and every time a new Council is elected, ... information stored in the warehouse dies a natural ...th with the outgoing Council.

...se in point is the questionnaire presented to WSGA ...bers these many weeks ago. Only when it had been ...fficiently goaded by the CYNIC campaign and the ...orandum from SA Council did Council's smugness and ...self-satisfaction begin to give way to constructive ...ought. Why must we wait so long for our representa...ives to heed us?

After much indecisive discussion and veering about, ...action was taken and the questionnaires were distrib...ed. In filling them out, many girls indicated bluntly ...at they did not expect anything to come of their at...mpts to have WSGA represent their opinions. They are ...me out in the "letter" distributed last week, Coun...il's answer to its constituents.

One point with which this writer differs sharply is ...e comment that because "a large percentage of stu...ents did not reply . . . we cannot give an accurate ...es-no count." The entire letter is vague; one gets ...e feeling that one is regarded as a nice little six-...ear-old. What percentage is "a large percentage?" ...ere is nothing to prevent an accurate statement on ...at point. Why can't "an accurate yes-no count" be ...iven us as far as the returned questionnaires go? ...ecause most of those who answered did not use "yes" ...r "no" but wrote closely reasoned arguments instead. ...hy don't Council divulge this information? Is it ...eing saved to provide something to do to fill in the ...me during the Mass Meetings scheduled this month?

The old WSGA Council did not do its job, and there ...s no particular reason to expect the new one to do any ..., since all candidates were "recruited" from ...e pool which has been supplying our "leaders" and ...epresentatives" for years. The Women's Student Gov...rning Association is not doing its job. WHY NOT?

Column Contest

...Zimmerman's resignation from his position of ...or the CYNIC opens space for another Student ... The CYNIC hereby announces that this position ...e filled by means of a columnist contest. Anyone ... to become a regular weekly columnist for the ... should submit a column to the CYNIC by Thurs... 13. The submitted columns will be judged for ... material and writing by the CYNIC Senior ...mbers. Entries should be 300 to 500 words in ... and must be typewritten. Unsigned columns will ...t be considered.

...ntestants should be aware that, if chosen, they ... expected to produce a column of equal quality ... that the CYNIC appears.

SA Movie

"...e Inn of the Sixth Happiness" ... biography of Britain's ... Gladys Aylward, a self-appointed missionary to China. SA will show this Twentieth Century - Fox movie on March 10 at Southwick. The story tells the adventures of this courageous woman in a wild and terrifying country. Rejected by a missionary society, Miss Aylward achieves far more ... of her contemporaries. Converting a powerful Mandarin, winning over a band of ... drivers and leading 100 children through a Japanese attack are just a sampling of the tremendous deeds which this gallant woman achieves. An affair with an Eurasian army officer adds a love interest. This movie promises to be a story of ... and glory.

Elections;

(continued from page one)

reporters by training them from the beginning."

Patricia Conwit, Co-News Editor, is a Sophomore in the College of Arts and Sciences. She was a Headline Editor of her High School paper in Tenafly, New Jersey, and a Feature writer on the CYNIC since her freshman year. Pat is striving for "better coverage of news rather than social events." She hopes to have feature articles that will be of more interest intellectually to the student body.

Steven Cohn, a Freshman from Ossining New York, has been chosen as Co-New Editor. In High School Steve served as Business Manager and Editor in-Chief of his newspaper, and Photography Editor of the yearbook. Since September he has been a reporter of the news staff of the CYNIC. He says that he will "indeavor to improve comprehensive news coverage of campus activities and news pertinent to UVM."

Frank Bolden, the newly elected Sports Editor, is a Sophomore in the College of Technology. Frank was a reporter on his High School paper in Brooklyn, New York, and has also had experience in the planning, writing, and production of his High School yearbook. He has been a reporter on the CYNIC since the football season, and has covered most of the basketball games. Frank plans "to have a complete sports page including the woman's intermural program." He also would like to open up the page to the coaches and the gym teachers so that the student body may hear their comments. Along with these improvements Frank wishes to have a fuller coverage of the men's sports, such as the Skiing and Rifle team.

Linda Herzenberg, a Freshman in the College of Technology, is from the state of Vermont. In the past she has worked on a camp newspaper and was on the Business and Production staff of her High School paper. Since the beginning of the year she has been on the Production Staff of the CYNIC. In her new position as Manag... Editor, Linda would like to assign students to specific jobs. She's "like to see people do individual things they're suited for."

The CYNIC's new Student Advisor, Edward Crane, is a Junior Pre-Medical student from Larchmont, New York. Ed was Photography Editor of his High School yearbook and Newspaper. In his Sophomore year of College he was Production Editor of the CYNIC and for the past year has served as Executive Editor. In his position of Student Advisor, Ed will help out and fill in wherever he is needed.

Professores

(continued from page four)

personnel. Being a chaperone meant having a certain function, a certain responsibility. As to what this function was, we were never quite sure. Our attempts to gain information on the matter were either met with cold stares, or an admonition to be on the lookout for "certain things" students at parties were doing or attempting to do and to either prevent these things from happening or report them if they did happen.

This, then, was the great "Game." Students played at fulfilling certain minimum requirements, while the chaperones played at pretending that each party was a warm and friendly time. I do not doubt that a social function can still, occasionally, be an all-around good time for the chaperones and students. But this only happens when the "game" is dropped and when chaperones and students enter into a relationship of mutual trust and confidence.

The continuing difficulty that fraternities have in securing chaperones, however, indicates that much is still amiss with the present system. Persons acting as chaperones do not want, not can they be expected to act as policemen. Now perhaps the powers that be, don't in fact expect this, but no one has ever made it very clear as to what is expected. And since no one wishes to be in this position -- particularly when one wants to have meaningful social experience -- chaperones are becoming as scarce as the proverbial hen's teeth.

The students, too, can hardly, be expected to develop an attitude of cordiality or sincere friendliness toward chaperones, when after a hard search, they finally come up with a couple who grudgingly consent to act as chaperones. Both parties know that the chaperones are a necessity and not a privilege.

I have now arrived at the point in my chaperoning career where I am willing to be a guest at only a few "houses." At these "houses" it is no longer necessary, to play the great "game!" My wife and I have a pleasant social time, have made some fine student acquaintances and are always pleased to participate in these particular fraternity social functions. We are treated by the students in a sincere and genuinely friendly way.

When we infrequently venture into a new chaperoning situation, we all too often find the experience a bad one. We are treated coldly and casually by the fraternity members and their dates. Our response to these situations has been not to go back. The fraternity or social organization, then, is back on the same old treadmill of pouring over lists of available chaperones. It is unfortunate that they do not also stop to evaluate and consider their responsibilities regarding the proper reception and treatment of chaperones. If this were done, and some re-evaluations were made, they might find less difficulty in securing chaperones.

The fault, however, does not entirely lie with the fraternities or social groups. To a very real extent they find themselves victims of a system not of their choosing, and all too often beyond their comprehension. I will grant that a part of the chaperones', or faculty persons' or administrators' tasks should then be to help the group responsibly and intelligently understand and deal with the system, or pre-supposed set of values. Such, however, becomes difficult, indeed almost impossible, when human beings are submitted to form-filling, application-making, and all the rest in order to be able to come together for a social engagement.

I certainly don't have any answers to this dilemma. I feel that the entire faculty-student relationship situation needs re-thinking, and re-questioning on all levels. Until this begins to happen among the fraternities, administration and others involved, the securing of chaperones will remain difficult as it now is. In the meantime, I shall confine the entertaining of students to my home, and will continue to chaperone only at those "houses" where I am treated as a human being.

De Los Angeles Lauded As Fine Performer

El Circulo Espagnol honors Victoria de los Angeles after her performance. In the foreground are Cindy Heilig, Mary Jane Scozzetto and Miss de los Angeles. [illegible]

by BOBBY DILLIG

On March 2 at Memorial Auditorium, Victoria de los Angeles, the distinguished soprano of the Metropolitan Opera of New York gave a recital comprised of works from the 17th century to the present time. The works included were those of the following composers: Scarlatti, Handel, Debussy, Respighi, Rosenthal, Nin, Barrios, de Falla, and Turina.

Miss Los Angeles gave a fine performance and was obviously the favorite of the audience as an encore was requested during the recital. The full-throated tones produced in her middle range in the performance of Schubert's "Ihalt and The Maiden" and "Ständchen" equaled those produced at the Metropolitan during the previous week in her rendition of Flotow's "Martha"

The German language is one of the most difficult for a foreigner to sing but Miss Los Angeles did an excellent job with Brahm's works although the songs she undertook for Lois Marben Wright was a little slow and her phrase markings could have been better. "Una voce poco fa" from Rossini's "Barber of Seville" was the only aria in the recital and Miss Los Angeles' singing for this selection was superb. Her legatos were admirable and her falsetto, in which a less competent singer might have faltered while singing the high A, was sung in complete control. Although she executed her other notes in an excellent manner, Miss Los Angeles performed best when singing in the Spanish language.

The sextet of encores served as a challenge to which she could not fail to rise. Her spirited and her dramatic ability of expressive [illegible] The works [illegible] were [illegible] but showed [illegible] [illegible] [illegible]

Aschenbach says that a kind of form semantics involving the forms of bodies and the forms of things can be used to create statements which do

not necessarily express an idea but perhaps surround it.

Two of Aschenbach's works are owned by the University's Fleming Museum, Crucifix and The Basement, both done in [illegible] steel. He will hold his second one-man show in New York starting March 12 and running the remainder of the month at the Sculpture Center, 167 East 69th St. This will be his second New York showing, the other being in 1957. He also has had one-man shows at the Fleming Museum and at the Behn-Moore Gallery in Cambridge, Mass. in 1956.

Aschenbach studied at the Rhode Island School of Design, worked with R.W. Johnston and managed a village development center near Nagpur, India for two years prior to coming to Vermont about 10 years ago.

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

WORDS: THEIR CAUSE AND CURE

Let us take up the subject of etymology (or entomology, as it is sometimes called) which is the study of word origins (or insects, as they are sometimes called).

Where are word origins (insects) to be found? Well sir, sometimes words are proper names that have passed into the language. Take, for instance, the words used in electricity! *Ampere* was named after its discoverer, the Frenchman Andre Marie Ampere (1775-1836); similarly *ohm* was named after the German G. S. Ohm (1781-1854), *watt* after the Scot James Watt (1736-1819), and *bulb* after the American Fred C. Bulb (1843-1912).

There is, incidentally, quite a poignant little story about Mr. Bulb. Until Bulb's invention, all illumination was provided by gas which was named after its inventor Milton T. Gas who, strange to tell, had been Bulb's roommate at Cal Tech! In fact, strange to tell, the third man sharing the room with Bulb and Gas was also one whose name burns bright in the annals of illumination—Walter Candle!

The three roommates were inseparable companions in college. After graduation all three did research in the problem of artificial light, which at this time did not exist. All Americans used to go to bed with the chickens. In fact, many Americans were chickens.

Well sir, the three comrades—Bulb, Gas, and Candle—promised to be friends forever when they left school, but success, alas, spoiled all that. First Candle invented the candle, got rich, and forgot his old friends. Then Gas invented gas, got rich, and forgot his old friends. Then Bulb invented the bulb, got rich, bankrupted Candle, and forgot his old friends.

They became fast friends all over again

Candle and Gas, bitter and impoverished at the age respectively of 75 and 71, went to sea as respectively the world's oldest and second oldest cabin boy. Bulb, rich and grand, also went to sea, but he went in style—as a first-class passenger on luxury liners.

Well sir, strange to tell, all three were aboard the ill-fated Lusitania when she was sunk in the North Atlantic. And, strange to tell, when they were swimming for their lives after the shipwreck, all three clambered aboard the same dinghy!

Well sir, chastened and made wiser by their brush with death, they fell into each other's arms and wept and exchanged forgiveness and became fast friends all over again.

For three years they drifted in the dinghy, shaking hands and hailing the Cal Tech rouser all the while. Then, at long last, they spied a passing liner and were taken aboard.

They remained fast friends for the rest of their days, which, I regret to report, were not many, because the liner which picked them up was the Titanic.

What a pity that Marlboros were not invented during the lifetimes of Bulb, Gas, and Candle! Had there been Marlboros, these three friends never would have grown apart because they would have known how much, despite their differences, they still had in common. I mean to say that Marlboros can be lit by electricity, by gas, or by candle, and no matter how you light them you always get a full-flavored smoke, a filter cigarette with the unfiltered taste that makes anyone—including Bulb, Gas and Candle—settle back and forget anger and strife and smile the sweet smile of friendship on all who pass.

© 1961 Max Shulman

Another peaceful smoke from the makers of Marlboro is the brand new unfiltered king-size Philip Morris Commander. Try one soon and find out how welcome you'll be aboard.

Ford Grant

A $21,000 grant from the Ford Foundation to the University has opened the door to a study "looking toward the establishment of an educational television facility for the state of Vermont." One of the principle aims of the grant is to determine the most feasible means of transmission of educational television to the entire state.

Attention will be given to transmission into the school systems of the state as well as to the general public; and to means of affiliating educational television in Vermont with other educational television in Vermont with other educational television stations in the east.

UVM's application for the Ford Foundation was supported by Vermont's three teachers Colleges, by Middlebury, Norwich and St. Michael's, by the Vermont State Department of Education, and by the Vermont Educational Television Commission.

Attention!

Attention all party goers and pizza lovers! Come to our Pizza Party at Alpha Chi Omega sorority Friday, March 10, from 8 to 11:30 p.m. Featured will be the famous Italian gourmet cooking of Kappa Sigma fraternity, the swinging music of Tom Eldridge and the Sig Notes, plus the shining royalty of Kake Walk's King "Bear" and Queen "Bonnie". Especially for you, large, tasty Italian style pizza - 75¢, with pepperoni - $1.00, and 10¢ for soft drinks.

Sportorial

(continued from page eight)

will be Conference Champs this year, but with a number of experienced juniors on next year's team, the Catamounts will be a definite threat to the Beanpot--symbolic for the best team in the conference.

This season, in spite of our record, will go down in the books as perhaps the most exciting season in history. At every game there were thrills galore. Benny Becton, Harry Zingg and Jack Shabel are names that will long be remembered in connection with basketball at UVM.

Becton, with high-arching jump feet, perfectly timed tap-ins and incredible rebounding, broke no less than three Vermont records. Benny set scoring records for the most points for a single game, most points for a twenty-game season and the highest average for a single season. As a reward for his outstanding performances, he was named to the ECAC Team of the Week twice and also to the second team of the New England All-Stars.

Captain Harry Zingg made his last year as a Catamount his best. As the only experienced man on the team, Harry was the foreman on the floor.

Jack Shabel is a name that popped up many times this season. Jack with his twisty drives, scrappy defense and sharp passing was a big help to the success of the 1960-61 Vermont basketball team.

There were many tight games and a number of upsets this year. One week UVM played a triple overtime one night and an overtime game the next night. The victory over UMass was a very big one, but the biggest upset of all was Vermont's victory over St. Mikes--our first victory against the Purple Knights since 1958. The closest game of the season was our heartbreaking loss to Norwich University.

The 1960-61 basketball season will also be given credit for reviving UVM's spirit. Memorial Auditorium was packed for most of the home games, and the walls of the building trembled from the thundering roar of enthusiastic fans.

Even though we did not have a winning season record-wise, we did have a successful season in that it accomplished the goals of any athletic team. The season provided many moments of pleasant enjoyment for the student body.

Frosh

(continued from page eight)

to a six point lead and the Dartmouth supporters never again saw their team regain this lead. The final tabulations saw Dave Strassburg as the teams leading scorer for the day, as he's been all year, and Johnny Babcock with 18 assists for the encounter. Heads up games were turned in by Gerry Torch, Bobby Nurse, and the always reliable Charlie Glick. The latter has been the man on the spot whenever a clutch play or basket was needed throughout the entire year.

Right now, it is a good time to review the season and some of the individuals who made this undefeated season possible. Nobody ever expected Vermont to knock off St. Michael's twice, a feat which couldn't be accomplished by Benny Becton, Richie Ader and Jack Shabel. The most credit due for this unbelievable task goes to Coach Ralph Lapointe, whose able and shrewd coaching molded a bunch of kids who had never played together into a team which any student body would be proud of. Hats off to a job well done!!!! Also worthy of mention are team managers Richie Rappaport and Steve Moore and trainer "Shorty" Lyman Cote, whose salves and ointments healed many an aching muscle.

As for the team itself it is only fair to start off with the player who leads the team in scoring and rebounding and without whose presence under the baskets would have spelled disaster. Dave Strassburg is the gentleman in reference, and it is quite a tribute to Dave, as he maintains a B average and was also a starting member of the freshmen football team. Every game save the first Dartmouth game, the St. Mike's one and the encounter with Plattsburgh, Dave was the high scorer and finished out the season with a 17 point average. Hope is very high that he will start on the varsity next year, or at least be a much desired sixth man. Whatever Dave didn't do for the team Johnny Babcock and Chuck Glick did by filling in the missing links. Charlie a 40 minute man and John the team leader were both All City recipients, in New York high schools, and by their play this season, this award seems very appropriate. In the first Dartmouth game, with Vermont trailing by 6 midway in the third quarter, Johnny got a hot hand and scored 10 straight points to give Vermont a lead they never relinquished. It is noteworthy that three of his baskets came on feeds by Mr. Glick. If Dave Strassburg doesn't get the starting berth vacated by the graduation of Harry Zingg, it is a good bet that either John or Chuck will.

It would not be fair to end this article without the mention of Bobby Nurse, Gerry Torch, Ed Gallager, or Dick Lawson. The latter did yeoman work off the boards this past campaign, and along with Gallager provided much needed height. Both Torch and Nurse were sparkplugs on defense, and occasionally became an offensive threat. For example, in the first Dartmouth game Gerry replaced the ailing Dick Lawson and "popped in" 15 points. In the second St. Michael's game Bobby, besides being all over the court scored 17 points. It is undoubtedly a fact that this years freshman team will add enormous depth to next years varsity, a requirement which might have changed many losses this year into wins.

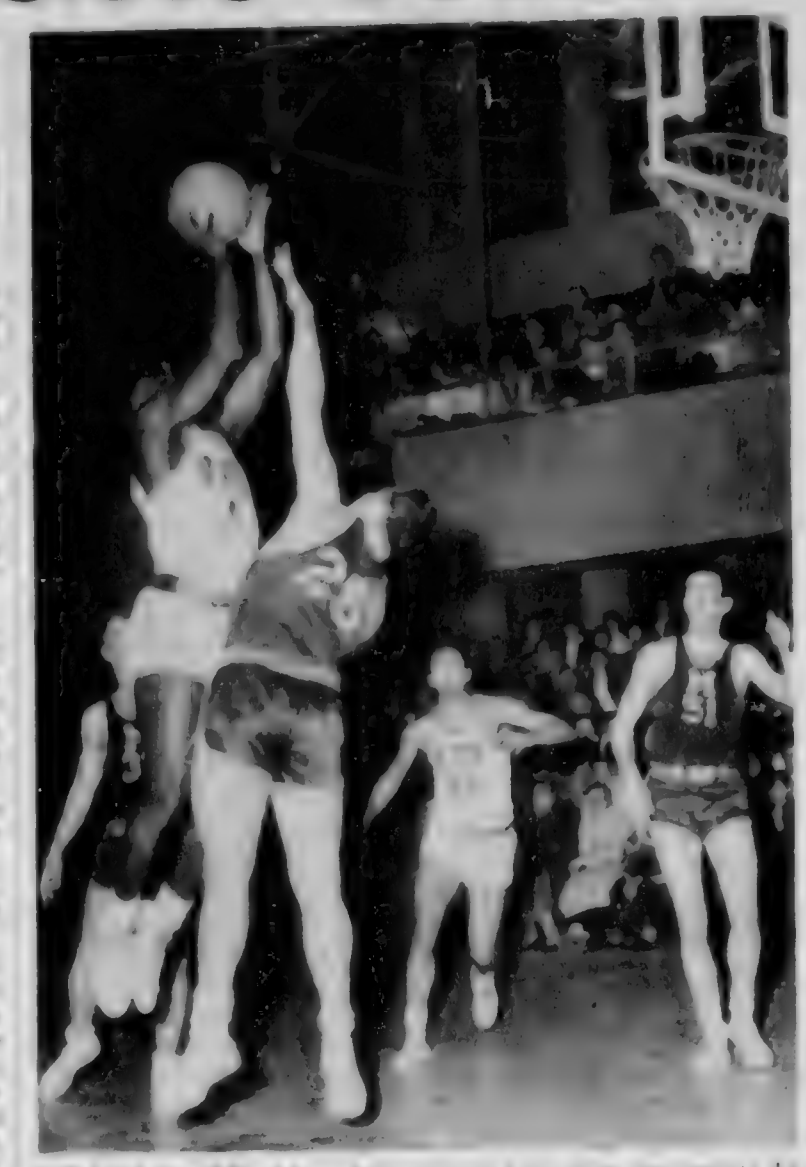
Meet The Catamounts

PETE BREM

Pete, a defensive specialist, has contributed a great deal to the success of the basketball team during the second half of the season. A zoology major in the College of Technology he is secretary-treasurer of Gold Key honor society and a brother of Phi Sigma Delta fraternity.

Being a Pre-Med student, Pete does not have much spare time, but whenever possible, he likes to read and listen to music. In the Spring, he can also be found on the tennis courts over at Redstone.



RAY HOWLE

A native Burlingtonian, Ray played his high school basketball at Rice Memorial where he was an all-star pick. He started the Massachusetts game and did exceptionally well.

Ray's hobbies include reading, swimming, bowling and listening to popular music. A political science major in the College of Arts and Science, he plans on either a job with the government or a teaching-coaching combination. Only a sophomore, Ray has his eye on a permanent starting position on next year's basketball team.

PAUL FLINN

Paul is a transfer student from Northeastern (La.) State College. This season he reached his peak in the St. Lawrence game in which he did an excellent job of rebounding. A member of Delta Psi fraternity, Paul hopes to become a landscape architect and is taking a pre-forestry course in the College of Agriculture. He'll be on next year's basketball team.

A Middlebury [illegible] player tries in vain to stop two points by Benny Becton (4). UVM's Pete Brem [illegible] looks on.

Sportorial

by FRANK A. BOLDEN

The Sports page of the *Cynic* has been the topic of much criticism. Some of this criticism by mature thinking individuals has been honest and sincere. Other criticism has come from lazy irresponsible students (?) who, having nothing better to do after stuffing themselves at the dinner table, arbitrarily decide to degrade the struggling efforts of the *Cynic's* sports writers. These writers have unselfishly sacrificed time that could have been utilized for studying or just relaxing in order to publish an interesting sports page. Granted, (that) sometimes these writers have been unsuccessful in their attempts to achieve their goal, but THEY HAVE DONE. They have not just talked.

As the new Sports Editor, I would like to invite anyone with constructive criticism to feel free to let me know about it in order that something may be done. You may talk all you like, but unless your ideas reach the right hands, they will be a complete waste.

The right hands are in the *Cynic* office, room 40 Waterman Building. Please feel free to drop by anytime in order to discuss your opinions.

There is room for some good writers on the Sports Staff. Girls, this also applies to you. In the 79th volume of the *Cynic*, women's athletics, both intercollegiate and intramural, will be included. Some of the best stories are written in the locker-room, therefore, women writers are needed to report on women's sports.

Any interested parties, see me in the *Cynic* office tomorrow between three and five-thirty p.m.

This year there will be a broader coverage of sports than ever before. Fans of such sports as skiing, tennis, riflery, etc., will be glad to learn that there will be room on the sports page for the activities of these teams as well as for that of the big four, football, basketball, baseball, and track. There is no reason for fans of the big four to become alarmed These sports will continue to receive adequate coverage.

Remember, constructive criticism is welcomed at all times, and there is always room for anyone desiring to help.

The 1960-61 basketball season is past the boards. Vermont ended the season with 9 victories and 11 defeats. This is a very good record considering that four of the starters are sophomores.

Vermont placed fifth in the Yankee Conference with a record of 3 and 7, an improvement over last year. It looks as if Rhode Island

(continued on page seven)

Varsity Mauls Middlebury 65-55

by J. KAPLAN

In their last tilt of the season, the Cat hoopsters swept by a weak Middlebury squad by a score of 65-55.

In the first half, the man-to-man defense used by Middlebury was strong enough to make the game a fairly even contest. At the half-time intermission, the Cats maintained a three point bulge and led 29-26 despite their effort to throw the ball away.

With about five minutes gone in the second half, UVM broke the game open. Led by Becton's five quick points, Vermont piled up a lead of 40-38. Halfway through the period, when the score became 59-45, the Vermont reserves entered the fray. The last few minutes turned into a foul shooting contest with the Panthers slightly narrowing the gap.

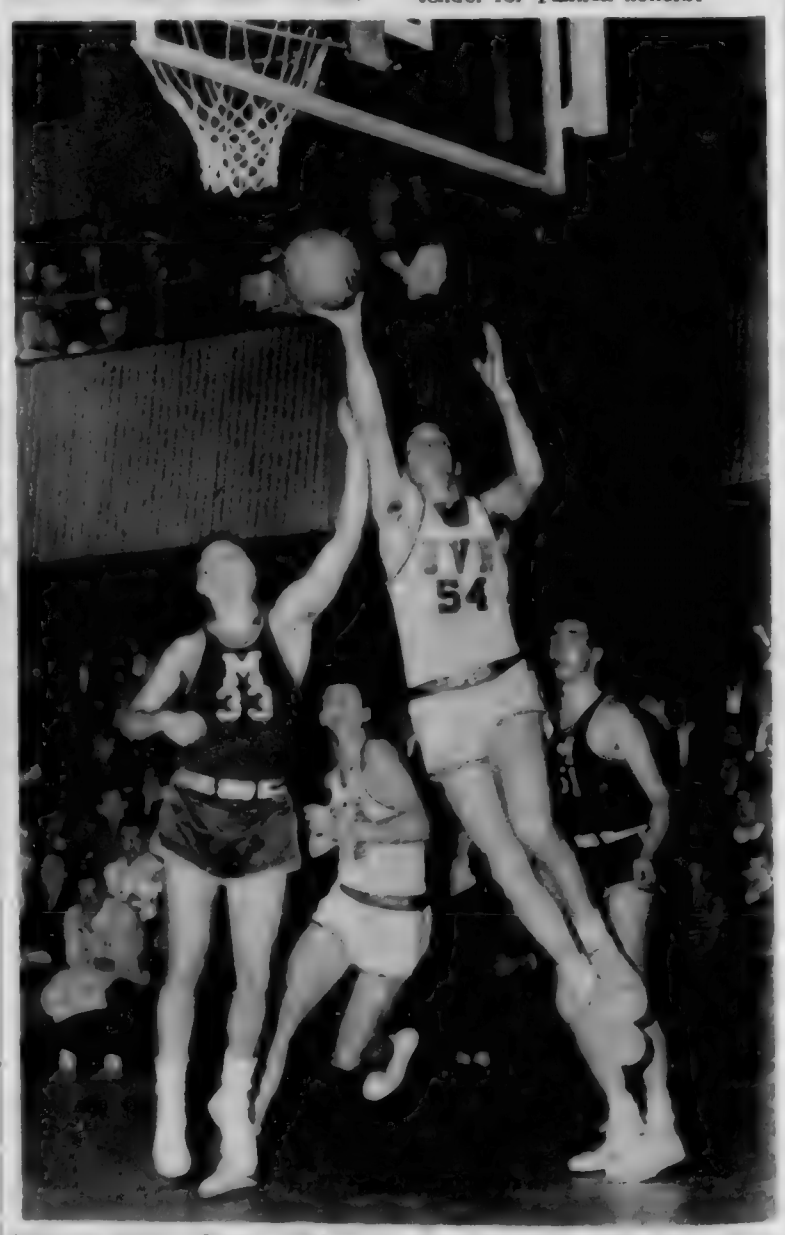
Benny Becton, who led the Cats with 20 points, set two UVM records. He ran his total points to 435 - the highest in UVM's history in a 20 game season. His leaping legs enabled him to gather in 22 rebounds bringing his total to 350 for the season, an average of 17.5 per game.

Captain Harry Zingg, the only starting senior for Vermont, played his last game for the Catamounts, and wound up with 13 points. Jack Shabel was second high scorer with 16 points.

"Considering the many injuries and the absence of Ray Kelsey and Pete Beck, two potential starters, the Cats had a very successful season. Loaded with the outstanding sophomore talent of Ben Becton, Jack Shabel, Dick Ader, and John Stahler and led by the guiding hand of Captain Harry Zingg, UVM compiled a record of [illegible] for the season.

Becton, possibly one of the greatest basketball players in Vermont history, was outstanding in every department. Jumping Benny was third in Yankee Conference scoring with a 20.1 average, and ended the season with an overall average of 21.7. He also picked off rebounds at a 16.3 clip, third in the Yankee Conference. This is quite amazing considering that Benny is only 6' 2".

Jack Shabel averaged 14 points a game with his fine jump shots, and twisting drives. His best performance was against Brandeis when he scored twenty-five.



Harry Zingg, the senior member of the quintet, was a valuable leader. Although he only averaged 12 points a game, Harry took command at all times. His proficient set shots and drives netted him a season high of 25 points against St. Mikes.

Dick Ader, last year's frosh high scorer, took over the role of playmaker this year. "Bugs" netted 24 in the Cats' big upset over UMass.

John Stahler, who did not start at the beginning of the season, came along brilliantly. "Spider" added good rebounding strength, which the Cats desperately needed in order to become a successful ball club.

Although Pete Brem, Bob Agel, and Paul Flinn did not start, they saw considerable action, and all did commendable jobs.

All-in-all, the Varsity should be stronger next year. With some help from our undefeated freshman squad, the Cats should be able to produce a strong contender for Yankon honors.

Captain Harry Zingg (54) scores two more for Vermont. Jon Stahler (12) gets set for a possible rebound.

Before the end of the semester, all undergraduates at the University of Vermont will be asked to vote on the new S A constitution. This new constitution, along with able leadership, is intended to bring effective student government. Marty Singer, chairman of the elections committee has stated, "the coming elections can prove to be the most important student elections ever held on this campus. The time has come to have effective student government. Only through continued able leadership heading our new student government, to be introduced in the beginning of May, will the students be able to have their proper say in the runnings of the University. I urge you all to take an active interest in the coming elections".

New WSGA Council Elected At Recent Mass Meeting

Pat Bishop, President of WSGA (Credit: Audio-Visual Services, H.B. Eldred)

by ILENE BARR

The Women's Student Government Association held the second mass meeting of the year on March 15, 1961 at 7 P.M. in the Ira Allen Chapel. The meeting marked a transitional phase in the history of the organization. Ellen Lissner, President, called the meeting to order and proceeded with the official reports. Martha Wahl, secretary of the Council, read the minutes from the previous mass meeting. Barbara Rifkin, treasurer, reported a $292.76 balance in the treasury.

The transition of the WSGA was initiated by a hand vote deciding a technical aspect of signing in at curfew. The issue, although trivial as compared to the recent discussions concerning WSGA, did increase the validity of the Honor System with girls initialing their arrival at the dormitory or living unit rather than indicating exact time. The important change was *not* the signing in decision, it was a change in procedure of the WSGA. A hand vote was taken and tabulated before the meeting concluded. The issue was carried, 491 to 140. The individual will take it upon herself to report any infraction of the curfew rule and initial procedure after March 13, 1961.

Linda Sack, President of Mortar Board, reminded the Woman Students of the method for selecting Mortar Board members and asked the Junior Women to help chose a council for the 1961 62 season.

Ellen then began the second phase of the WSGA transition. She read the results of a questionnaire sent to all women students from the WSGA. Although only 500 students responded to the questionnaire, the results were indicative of the general attitude of the women at the University of Vermont. The tabulated opinions were divided on the responsibility of the WSGA, however, definite conclusions were reached. The women students suggested for discussion:

1. The House Committee seems to be only a disciplinary measure.
2. Rules for obtaining peach cards for daytime baby sitting.
3. Phone calls concluding at 11 P.M.
4. Week end dating hours or curfews.
5. Required Mass Meetings.
6. Objectionable decorations in rooms.

Ellen stated that the WSGA had jurisdiction only over a *very few* of the initial complaints. Attendance to Mass Meetings seemed to cause the most discussion. Ellen explained the policy of admission to WSGA. Each woman student, before entering the University of Vermont, is asked to sign a pledge of honor and to be willing to guide her conduct and actions under the rules and regulations of the Woman's Student Government Association. If she is willing to become a member of the University of Vermont student body she must accept the constitution of the WSGA. Ellen concluded this phase of the meeting by inviting all who wish to help with this transition to the Joint Conference in the Spring.

Barbara Rifkin (Credit: Audio-Visual Services, H.B. Eldred)

These students who wish to offer their opinions, be they constructive or complimentary, are invited. The transition of the WSGA is a method for action. Pamphlets, withdrawing or withholding votes for elections, and newspaper articles are the initial step for change. Participation in the Joint Conference is the effective method for action, an invitation to help improve the WSGA.

Miss Wing spoke of the Student Loans and Scholarship program. The applications for loans are completed and can be obtained at her office.

Accept Grants

More than a million dollars in teaching and research grants, gifts, and scholarship funds were accepted by the UVM Board of Trustees at its February meeting here recently.

Teaching and research grants contributed $690,073 of the total amount, gifts $414,306.37, and scholarships $4,365.50. Included were a number of gifts to the Medical Building program. Received from the Dr. Julius E. Dewey estate, Westpelier, was $59,932.37. Dr. Dewey was a UVM alumnus. A number of gifts for the Medical Building program had all been previously announced but were formally accepted Saturday. Included were $10,000 from Scova Speare of Nashua, N.H., bringing to $50,000 Mr. Speare's gift towards construction of Phase III of the medical building. $10,000 from the Rosary Charitable Foundation toward Phase II construction, and an anonymous gift of $150,000, also previously announced and formally accepted Saturday, toward Phase II construction.

Sit-In Demostration Protests WSGA Meeting

On Wednesday, March 1, the Women's Student Government Association held its second Mass Meeting of the year, in Ira Allen Memorial. The purpose of the meeting was to introduce the candidates for WSGA Council, to elect the new Council by written vote, to decide by hand vote an issue involving a change in sign in procedure, to discuss the questionnaire filled in by WSGA members several weeks ago, and to discuss honorary societies and financial assistance for the coming year.

Several young men, calling themselves "Interested Men Students," distributed flyers before the Meeting. The flyers urged the women students to protest "being treated like children" by staging a sit in demonstration, refusing to participate in the Meeting in any way except by voting.

According to these men students, identical flyers had been placed in the mailbox of every girl on campus the previous evening. They had been removed by the Head Residents before the girls had received them. It was later reported that this action had been taken upon the invocation of a little used rule concerning permission to "stuff the boxes." The prevailing opinion among the men involved seemed to be that of satisfaction, in that the ensuing controversy excited more interest in the flyers than they would have warranted in themselves.

When questioned, one of the young men explained his interest by saying, "We know that inasmuch as our life here on campus is connected with the women students, WSGA is important to us. If our girls are unhappy and feel that their efforts to be heard and to have action taken on their complaints come to naught we must try to help. We believe that as we show our interest, WSGA Council cannot but come to understand that this is a campus wide problem not one due merely to a few of what

University Players To Portray Greek Drama, "Antigone"

Death Scene from "Antigone" (Credit: Coleman, SPS)

The University Players under the direction of Greg Pa..., will present the great play "Antigone" in the Arena Theater. "Antigone" was the last of the Theban plays written by Sophocles. The action centers around the conflict between Antigone daughter of Oedipus former king of Thebes, and Creon, who has succeeded her father as king.

This conflict concerns their disagreement on proper burial of Polyneices, the brother of Antigone. Creon feels that because her brother was warring against the city, his body should be treated with neither respect nor honor. Antigone however insists that Poly-

The University Players rehearse for the coming production (Credit: Coleman, SP

neices must be buried in a manner befitting one who was the son of the former king. The play should prove to be an interesting contrast between the right of civil law and justice, and the moral laws of God.

Antigone will be presented at 8:30 P.M. on the 17th, and 18th of March. Hope to see you there!

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf," "The Many Loves of Dobie Gillis," etc.)

"LOVE IN REVERSE"

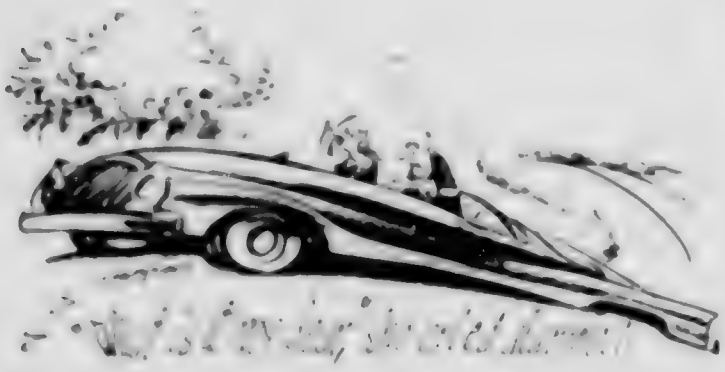
"I love you," he said. "Love me," he cried.

"No, no," she cried.

"Let me," he cried. "Are you a girl of expensive tastes?"

"Yes, yes," she cried. "I am a girl of simple tastes."

"Good," he cried, "for my cruel father sends me an allowance barely large enough to support life."



"Money does not matter to me," she cried. "My tastes are simple, my wants are few. Just take me riding in a long, new, yellow convertible and I am content."

"Excellent," he cried, and ran away as fast as his chubby little legs could carry him. For he had no convertible, nor the money to rent one, nor the means to get the money, short of picking up his stingy father by the ankles and shaking him till his wallet fell out.

He knew he must forget this girl but, lying on his pallet at the dormitory, whimpering and moaning, he knew he would not.

At last an idea came to him: though he did not have the money to buy a convertible, perhaps he had enough to rent one.

Hope reborn, he rushed at once to an automobile rental company and rented a yellow convertible for $10 down plus 10¢ a mile, and with manly heart and cheer drove away to pick up the girl.

"Oh, goody," she said when she saw the car. "This suits my simple tastes to a T. Come, let us speed over rolling highways and through lowly dells."

And away they drove. All that day and night they drove and drove, tired but happy, they parked high on a windswept hill.

"Marlboro," he said.

"Yes, yes," she said.

Then it up. They puffed with deep contentment. "You know," he said, "you are like a Marlboro—mild and fresh and inviting."

"But there is a big difference between Marlboro and me," she said. "Because I do not have a Selectrate filter, nor do I come in soft pack or flip-top box."

They laughed. They kissed. He screamed.

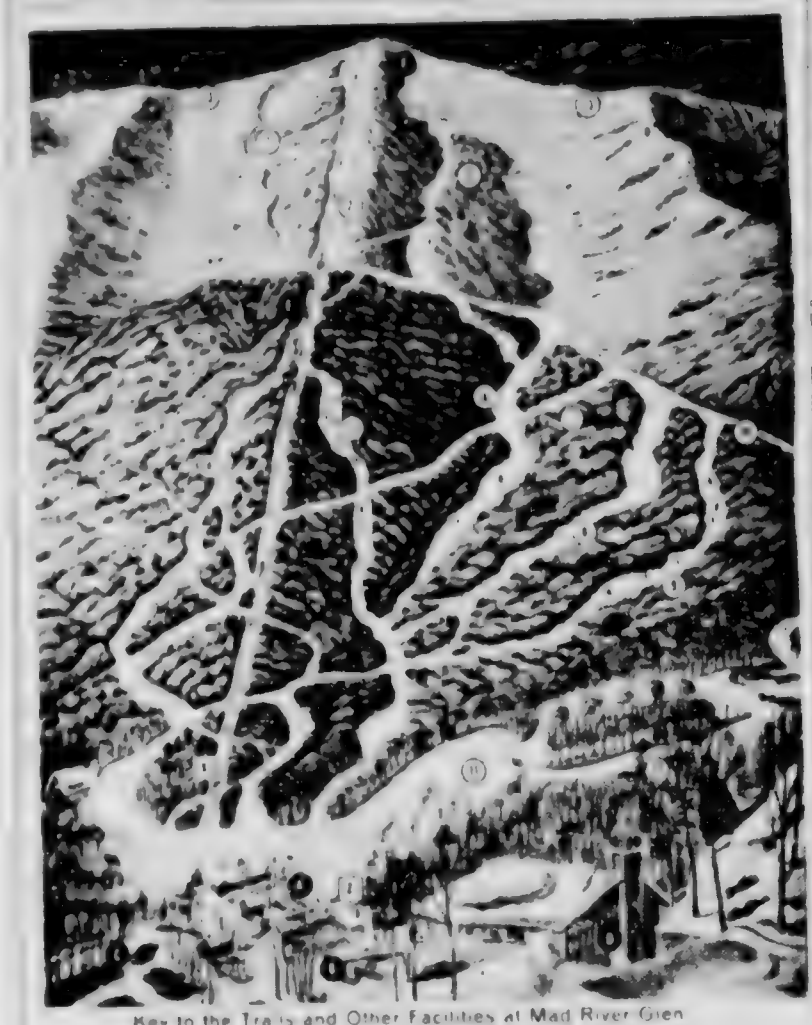
"What is it, my dear," she cried, alarmed.

"Look at the speedometer," he said. "We have driven 500 miles and this car costs 10¢ a mile and I have only $20 left."

"But that's exactly enough," she said.

"Yes," he said, "but we still have to drive home."

They ran into a profound gloom. He started the motor and rocked out of the parking place.



"Hey, look," she said. "The speedometer doesn't move when you're backing up."

He looked. It was true. "Lordy," he cried. "That solves my problem. I will drive home in reverse. Then no more miles will register on the speedometer and I will have enough money to pay."

I think that's a marvelous idea," she said, and she was right. Because today our heroine is in the county jail where food, clothes and lodging are provided free of charge and his allowance is piling up so fast that he will have enough money to take his girl touring again as soon as he is released.

UVM Summer Session Offers Art Courses

[illegible]ty of Vermont [illegible] Vermont Art [illegible]ester, Vermont [illegible] this summer to [illegible]VM Summer Session [illegible] art, dance and [illegible] Art Center.

[illegible]ses to be taught [illegible] the University's [illegible]on's faculty, in- [illegible]ing in America, [illegible] painting, dance [illegible] analysis, opera [illegible]dents may earn [illegible] credit for the

[illegible] will begin in the [illegible]rn courses on June [illegible] through August 4. [illegible]asses will begin [illegible] and run through

[illegible]ern Vermont Art [illegible] non profit insti- [illegible]rted solely by [illegible]ributions with the [illegible]ringing to the youth [illegible] the educational [illegible] of art in all its [illegible] Center was estab- [illegible]1950 while this year [illegible] 12nd year of the [illegible] Southern Ver- [illegible] Artists Inc.

[illegible] Center's president, [illegible]we, the UVM presi- dent John T. Fey both expressed pleasure with the establishment of a UVM summer study program at the Art Center. They termed the program "a happy and a logical joining of forces making possible an extension of the service of both institutions."

The Manchester program will be the second off-campus Summer Session program to be established by the University within a year. A UVM summer program was begun on the campus of Castleton Teachers College last summer and will be expanded this summer.

Both off-campus programs will be in addition to the regular Summer Session program which last year attracted nearly 1500 students to the University campus.

Class Of '64

An important class meeting will be held on March 21, 1961 at 7:00 P.M. in the student Lounge. The purpose is to elect four class representatives to the Executive Committee, to vote on the class constitution, and to meet the class advisor

Annual Sugar Party To Be Held

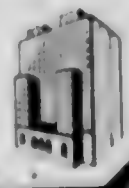
The sweetness of "sugar on snow" will savor the mouths of scores of students on the UVM campus next weekend. For many this will be their first contact with Vermont's product-Pure Maple Syrup. Beginning at 2:00 P.M., Sunday, March 19 the annual Dean Hills' Sugar Party, sponsored by Alpha Zeta will be held in the UVM Cage.

An attraction of the afternoon is the woodmen's contest. There is a wood chopping contest and sawing contest with two-man cross-cuts and buck saws.

However the real reason for attending the festivity is the Sugar on snow. About 30 gallons of syrup or 340 pounds will be boiled down and poured on snow as anxious students wait. Sour pickles will help neutralize the penetrating sweetness of the delicacy. Other items on the menu are coffee and doughnuts, to be served by the girls of the Home Economics.

The sugar parties were started in 1938 by Kenneth Sheldon then a professor in agricultural education. At that time Alpha Zeta and the Aggie Club sponsored the event [illegible] to the Gym. Since that time Alpha Zeta has been the [illegible] sponsor. For many years the event was held in the Gym, where a dance added to the attraction. In 1941 400 people attended the event at which Gov. Wills and Joseph L. Hills, then Dean of the College of Agriculture led the Grand March. After the death of Dean Hill, the sugar parties were named for him. Also a Dean Hills' Loan Fund was set up, to which all proceeds from the sugar parties would go.

From 1947 to 1956 the sugar party was held at the UVM Experiment Farm in Underhill. The woodsy atmosphere contributed much. However in 1956 because of a heavy snowfall which blocked the road to the forest, the event became an on-campus activity. For the past several years it has been held behind Hills' Hill but due to threatening weather conditions it has been moved this year to UVM Cage.



Awaiting Your Arrival

Clean, comfortable and reasonable accommodations for male students, clubs, teams, athletic clubs and groups in the heart of midtown New York close to all transportation and nearby Empire State Building. All conveniences, cafeteria, coffee shop, valet, laundry, barber shop, TV room, tours etc. Rooms for [illegible] Single rooms $7.50-$7.60 [illegible] rooms $4-$4.70

Date Problem

To the Editor of the CYNIC:

It has come to our attention that a larger number of the Freshman men at this university do not date. The reason for this, the men claim, is that the upperclassmen have monopolized the dating of Freshman women. The Freshman lasses, the men moan, enjoy the prestige of dating upperclass men so much that they seldom date Freshman. Furthermore, the women insist on a man's possession of a car and his membership in a fraternity. The last two statements are ridiculous and untrue, although, we must admit, excellent excuses for the men's apathy.

We assume that among the large, non-dating male portion of the Freshman class there are those who DO want to date. To these men we now appeal. Contrary to popular opinion, there is still a large proportion of the Freshman women who do not date but who wish to date. The dating women join their non-dating friends in urging the Freshman men to show a little enthusiasm and rise out of their smug indifference. We wish to make it clear that we DO want to date *them* and that we do not care if they have a car, belong to a fraternity, or own Fort Knox. What's more, we do not expect to be entertained as royalty on dates. It is the Freshman men themselves we wish to date!

COME ON, MEN, GET ON THE BALL!!!

Sincerely,
The Freshman Women

(Editor: All of them?)

Chaperones

To the Editor:

As a fraternity man often aware of the problems of chaperonage I was especially interested in the Rev. Liedberg's discussion of the chaperone problem in last week's CYNIC.

Reverend Liedberg's experience of being shunted off into a side room with a deck of cards and refreshments is by no means typical of the treatment accorded those faculty members who consent to chaperone parties. Reverend Liedberg, however, does not realize how lucky he is that refreshments and cards are provided. In some cases they are not, and in some cases even the appointed delegates fail to "amuse" the chaperone.

I think that a part of the problem lies, as Rev. Liedberg has stated, in the fact that the chaperone is a necessity, not a desired guest, and that both parties recognize this fact. This, plus the aura of well-preserved mystery surrounding the duties of the chaperone to the administration. The chaperone is expected to report some transgressions to the administration --- which ones or under what circumstances is not clearly defined --- make it no wonder that chaperones are looked on as enemies.

The fact that the chaperone is probably not interested in harassing his charges and or reporting them to the administration makes no difference in this situation. The "game", as Reverend Liedberg calls it, is a massive defense mechanism on the part of both chaperone and fraternity. The "sympathetic" (i.e. the chaperone who feels that he need not find sin in every dark corner, thus the only kind of chaperone in which the fraternity is interested) chaperone is protected by this in conscience and in fact, since he cannot be expected to disapprove of that which he does not see. The fraternity is also protected since this chaperone, involved as he is card game and refreshments, cannot accidentally discover transgressions despite himself. The "assigned" students are, if the truth may be admitted, in effect chaperoning the chaperone. Their function is to keep the chaperone entertained so that he, out of sheer boredom, does not feel he has to wander around.

Any attempt to make a sincere effort at making chaperones feel welcome in any group is, it seems to me, foredoomed under the existing circumstances. Fraternity attitude toward chaperones is almost always the attitude "We have to have them but, we don't have to like it." Any friendliness encountered by the chaperone is suspect, because the fraternity is probably interested mainly in making a good impression so that the chaperone will allow himself to be used again.

It is indeed a shame that such opportunities for real faculty-student contact must be turned into the great "game" of chaperoning. One must, however, recognize that the "game" is a basic part of campus life. Until the fraternity is ready to treat and accept the chaperone as an honored guest and not feel that the chaperone must be relegated to a safe (for himself and the fraternity) place, the problem will exist and grow. The only real solution is for the fraternities to be prepared to state and prove that they are capable of acting in such a manner that the "game" is no longer necessary. The fraternities must learn to conduct parties that avoid the necessity of hiding their chaperones. They must do two things. First they must recognize and submit to the University's rules and regulations, regardless of how much of a personal affront this may seem to the individual. The second, and more important thing is that the fraternities must re-evaluate their social functions to allow for inclusion of chaperones as their guests. This will take far more planning on the part of those responsible for the function, but in the long run it will pay off in better functions and in a steady supply of chaperones.

The chaperone is, as Reverend Liedberg points out, a human being. Let's recognize this fact.

Name Withheld

Pro Bolden

To the Editor:

I should like to add an enthusiastic "I wish I'd said that" to sports columnist Frank Bolden's comments on the 1960-61 basketball season, just concluded.

It was, indeed, a season of many exciting moments, and the members of this year's freshman and Varsity teams are to be congratulated for so typifying UVM's athletic ideals.

Raymond L. Finehout
Alumni Secretary

WSGA Elections

(continued from page one)

the Deadline is May 15, 1961 however, applications will be accepted after that date if there are any remaining funds.

Patricia Morse, Chief Justice of WSGA, introduced the candidates for the 1961-1962 Council. Ballots were completed by the women students and were tabulated. Election results were:

President, Patricia Bishop; First Vice-President, Agnes Esposito; Second Vice-President, Georgene Walters; Chief Justice, Barbara Rifkin; House Chairman, Joan Manley; Assistant House Chairman, Nora Barclay; Scholarship, Harriet Katz; Assistant Scholar, Ann Maynes; Treasurer, Marilyn Woodcock; Social Chairman, Patricia Irving; Assistant, Social, Melissa Metzel; Secretary, Anne Parker, and Town Represent, Barbara Wool.

The new administration of WSGA marks another New Frontier, a beginning to improve, revise, and to understand and employ rules and regulations which will benefit all of the women students at the University of Vermont.

Professores

(continued from page four)

pretend (even to himself) that his fallibility is part of his teaching method (keeps others on their toes) or is excusable because he is dreadfully busy, horribly overworked.

The death of the student mind is often the result of exposure to the dead mind of the teacher. Since he is not caught up in a process of free reasoning, a mutual exchange of interrogation and declaration, the student too retreats behind the comfortingly solid walls of absolute principle or inert fact. He knows what he likes! Therefore he tries to retain only that which is reassuring for intellectual allegiances prematurely contracted. Besides, whatever is said, one principle is sure: The professor is old and he is young; outside the unreal vacuum of the college the world waits to fall at his feet.

But permanent youth and petrified age are only two ways of dying; the bodies continue to move but the minds are ultimately alike in being dead.

INERTIA OR PURSUIT

"To rest upon a formula is a slumber that, prolonged, means death." Justice Holmes said that. However, it is clear that one cannot dispense with principles altogether. I suggest that it is desirable to invoke as few as possible and to keep those carefully engaged in the open process. If this is done college may not be a warehouse of inert ideas in vacuum storage but a vital source of intellectual and moral strength. The primary basis of human freedom (and therefore the possible justification of the claim we make to dominate the other species and the matter of the solar system) lies in the pursuit of knowledge for its own sake and not for any other end -- for the sake of the pursuit, which turns out to be inextricable from the goal.

As usual this season brings surprising new developments amidst several new transferred hands over the KB weekend. Congratulations to sister Sigma Nus who lost their pins. Pam Wilson to Richard Goodrich, Lambda Chi Alpha; Jo Jeanne Forsyth, Tri-Delt and Ed Friedman of Live Love of Brandeis. The AEPi's are celebrating Joan Fillmore's pinning to Lance Jacobs of the Navy and Carol Gingerich to Dick Stone, Theta Chi. Pat Cummings, Gamma Phi, was the pin of Jerry Jacobson, Sig Ep. Several engagements have been announced lately. Kathy Fiore, President of A. Peterson at SAE alum, Kathy Hostetter, Theta to Bobby Allen, Sigma Phi, and two ATO's have fallen to Harriet Wood and Jim McCain of Theta Sweetie. Gil Pi Phi's Cookie Weyerhaeuser was pinned to Dwight Stevenson, a Missouri Sig Ep. Congratulations are also in order for Bob Schell, Sigma Nu, and his fiancee Bride, Sue Simmons.

PARTY LIST

Several new jeans were added to this year's Bake Walk. All agreed that ADPi's, Alpha Chi's Gamma Phi's and the AEPhi-Tri-Delt team were an innovative way to end the marathon weekend. Phi Mu Delta's Italian house party was more successful than their attempt at home cooking, although the spaghetti water failed to boil. The Pi Phi's conjured a delightful evening at the coffee hour for their housemother, Mrs. Harris. They hope that all those who attended this, as well as their pledge tea on Sunday, had a good time. Pizza was the theme at the Alpha Chi-Kappa big party Friday night.

everyone is welcome at the pledge teas at ADPi, Tri-Delt, and Theta on Sunday afternoon. The AEPhi pledges are preparing for an open house on Saturday night. They have all been very evasive about the surprise theme. The ADPi pledges still hold their pledge party on March 25.

The Elect

Several fraternities and sororities have recently installed new officers. These are

Alpha Epsilon Phi

Loren Gergens briefs two of his salesmen on new telephone services for business customers.

"I DIDN'T WANT TO BE STOCKPILED"

When Loren Gergens was working for his B.S. degree in Business Administration at the University of Denver, he had definite ideas about the kind of job he wanted to land. He was determined to profit from the experience of several of his friends who had accepted promising jobs only to find themselves in "manpower pools"—waiting to be pulled into a responsible position. "I didn't want to be stockpiled," Loren says. "That's no way to start."

As a senior, Loren talked to twelve companies and joined The Mountain States Telephone & Telegraph Company, an associated company of the Bell Telephone System.

From his first day challenges were thrown at him thick and fast. First, he supervised a group of service representatives who handle the communications needs of telephone customers. Then he served as manager of several telephone business offices. In these jobs Loren had to prove himself on the firing line, make right decisions and carry them through. He knew his next jump depended on only one man—Loren Gergens.

In July, 1960, he was made Sales Manager in Boulder, Colorado.

"I'm on the ground floor of a newly created telephone marketing organization. And I can tell you things are going to move fast!" Loren says. "It's rough at times, but hard work is fun when you know you're going somewhere—in a business where there's somewhere to go."

If you're interested in a job in which you can be your own prime mover—a job in which you're given a chance to show what you can do, right from the start—you'll want to visit your Placement Office for literature and additional information.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

FREDERICK R. KAPPEL, *President*
American Telephone & Telegraph Co.

BELL TELEPHONE COMPANIES

CIVIL WAR COLLECTION

It seems as if the big cry around campus lately is for more culture. Students complain that they are degenerating to ignorance of the finer things in life." Yet few realize the actual number of places of interest throughout the buildings of the University. If one were only to take the time to explore the nooks and crannies of UVM they would probably find a wealth of intellectual knowledge. Such a nook is the Civil War room of the Billings Library.

This collection of books, printed mostly during the period of the Civil War, is located in a rather obscure section of the Library: on the West Balcony over the reserved desk. An one climbs the winding stairs to reach this second floor, he doesn't expect to find anything over to the right, where the collection is. But, upon opening the door, he sees before his shelves filled with antique books.

These include diaries and accounts made during the War, categorized by states. Each group of books from a state has lists of the soldiers who served from certain districts, the battles in which each regiment fought, and personal glimpses into life at that time. Even anecdotes are found in the pages of these chronicles.

Probably the section of most interest to the students in Vermont is that concerning the regiments which were made up of Vermont residents. The books, donated by decendants of soldiers who took part in the War, contain newspaper clippings from the 1860's.

Once in the Civil War room it is hard to tear oneself away, for there is so much information concerning a topic of interest to all students. And, this is just one of the "cultural" places to stimulate the intellect of UVM students. Why don't you try to find the others? They are there, you know.

Student Protest

(continued from page one)

they term 'crackpots' or 'malcontents.'"

Response to the flyers was not overwhelming, but several girls who had been seated on the platform during the Mass Meeting later said that enough people refused to participate to generate "an atmosphere of considerable tension" among the members of the out-going Council. One of the participants in the sit-in said, "I'm glad we did this. It's about time! Our demonstration hardly interfered with the proceedings, an excellent indication of how unimportant and unnecessary these Mass Meetings are in the first place."

Dorm Council

The Men's Residence Hall Council, composed of representatives from each of the Men's dormitories, has recently expanded its activities. Originally formulated to promote better group living and provide a source of practical self-government, the Council has striven to broaden its activities during the year. Besides providing funds for small social functions held by the individual dorms, the Men's Residence Hall Council helped to finance the highly successful Freshman Homecoming Dance. In cooperating with the sophomore class, the Council played a major part in organizing the Freshman-Sophomore Barn Dance, which was unfortunately cancelled due to inclement weather.

In early March the administration requested that the Men's Residence Hall Council take up the question of the proposed calendar revision for 1962-1963. The Council is presently working on a schedule that they hope will meet the approval of both the administration and the students. In accordance with the Student Association revision program for next year that makes the group a student court, the Council is also in the process of handling cases of those freshman who violated their Kake Walk car privileges.

In May the Council intends to aid in making the proposed Freshman Weekend a big success. Finally, the organization is now in the final stages of completing its own constitutional revision. It is believed that this revision will allow the Men's Residence Hall Council to offer even greater service to the University of Vermont.

Catamounts

(continued from page eight)

petition. He fired well enough to graduate to the Varsity in his junior year and, as a senior, was elected captain of the team. By his fine showing at what could be termed a relatively new sport to him, Carl is perpetuating the Vermont tradition of fine marksmanship.

BILL ADAMS, Captain of the Ski Team

Bill is a senior in the College of Arts and Sciences where he is majoring in Psychology. Like most good skiers, he started young, first donning the planks at seven years of age. A native of Montpelier, Bill captained his high school ski team in his senior year. Since coming to UVM, he has copped many honors in his favorite events: downhill and slalom. At the Middlebury Winter Carnival last year, he placed sixth out of forty contenders in the slalom, and in this year's St. Lawrence Winter Carnival he placed first in the same event. Bill plans to attend graduate school after which he intends to pursue a career in education.

FROSH FROLICS

by ROBERT WEINER

Throughout the past basketball season, this column has featured short biographies on members of the Frosh Basketball Team. It has been brought to my attention that one very important person has been excluded from these stories. This man was the main contributing factor towards the undefeated 14-0 record of the Freshman Team. Hats off to Ralph Lapointe, coach of this great team!

Ralph graduated from UVM in 1951. The next year he took over the coaching reins of the Baseball Team. He has remained at this position ever since and has never had a losing season. Ralph is liked and admired by all who come in contact with him because of his good nature and spontaneous wise-cracking. Besides coaching baseball and basketball, he is kept busy during the fall as the backfield coach of the Football Team.

Ralph had an active life before he graduated from UVM. He is a veteran of World War II and major league baseball with the St. Louis Cardinals and the Philadelphia Phillies.

After talking to a few of the ballplayers on this year's Frosh Basketball Team, it is obvious that they respect Ralph greatly because of his wonderful achievements. It is quite a difficult task to mold a group of boys into a cohesive winning unit, especially when these boys come from different areas and are accustomed to different types of playing. Again, I salute Ralph Lapointe.

ATTENTION

Anyone interested in entering a team in the Intramural Softball Tournament had better hurry. Entry blanks, which can be obtained in the gym office, MUST be turned in to Norm Strassburg no later than tomorrow, Friday, March 17 at 4:00 p.m.

JUNIOR WEEK

Junior Week will be held on April 14-15. Plans are now being made for the activities of the week.

Baseball Team Practicing Hard

Co-captains Joe Silveira (l) and Maynard Ducatte (r) discuss a point with Coach Ralph Lapointe. (Credit: Reiber

by ROBERT E. WALSH

There's baseball in the air fans. The UVM baseball squad, in preparation for the coming season, has been working out in the cage for the past month. The team will carry twenty men, eleven of whom are returning lettermen.

Among the veterans of last year's Vermont State Champs will be Co-Capts. Maynard Ducatte ('62) and Joe Silveira ('61). Ducatte led the UVM nine in R.B.I.'s last year and is being counted on to turn in another fine job with his big bat. Also, in the hitting department, Coach Lapointe will rely heavily on the bats of Spike Jarrett ('61), who batted .297 last year, and Levi Brown ('63), a left-handed hitter who can send them for the distance.

Around the horn the team looks good defensively. Catchers Ducatte and Mike Pearo ('62) are solid, dependable receivers with experience behind them. At first base, Silveira appears to have the position down although Mike Yendrzeski ('63) will offer competition for the job. Bill Federici ('61) and Gil Smith ('63) are the candidates for second base with an edge going to Federici due to his showing as a gloveman. Shortstop should be filled by Joe Pare ('63) who teams with Federici to form a formidable double play combination. At the hot corner, third base, Nick Carmoli ('62) should nail down the job with Bob Sherriff ('63) close behind. In the outfield, five men are competing for the three available positions. Spike Jarrett, Levi Brown and Reg G[illegible] ('61) are the top candidates thus far. Not to be counted out, however, are Danny Prescott ('[illegible]) and Al Ploof ('63), who have the talent to see a lot of action this season.

On the mound, Coach Lapointe is looking forward to another winning year from Bob Hobbie ('61). Hobbie, a left-hander with a lot of stuff, posted a 5 and 1 record last year. Harry Zingg ('61), captain of this year's basketball team and a good all-around athlete, should post a string of K's with his right-hand slants. Three juniors, all left-handers, Dick DeNicola, Wally Schilo and Gordy Miller will see unlimited action this season. The pitching staff will be rounded out by two promising right-handers, both sophomores in the persons of Dick Cassani and Ted Lorres.

The team will leave for the 50th annual Southern Trip on the 31st of March and open the season against Long Island University on April 1. A total of eight games will be played on the trip which will range as far south as Washington, D.C.

Make a date to support your team this Spring.

Sportorial

by FRANK A. HOLDEN

[illegible] the UVM

Whenever I hear people hear these words they automatically think of football, basketball, hockey, or one of the other sports that requires a great deal of training, practicing, and teamwork. These people are just willing or do not have time to acquire and maintain the physical fitness necessary to participate effectively in these sports of games, say, "leave sports to the athletes." This should not be.

There is a sport for every type of person. It is true that games such as football, hockey, etc. should be played by the athletic, but there are other games. Handball, golf, swimming, tennis, etc. are sports that can be enjoyed by all, men and women, big and small.

The basic purpose of sports should be relaxation, and a lot of sports have this quality. Games such as golf, skiing, archery, bowling, etc. require only a minimum amount of physical fitness and can be enjoyed by a small number of individuals at a time. A large team is not necessary. This is an important asset because a lot of bashful people prefer personal competition. Strong individualists can maintain their individuality. They will not become lost, as they may on a team.

How can we get this information about sports?"

American youth, American youth of UVM in particular, are in terrible physical condition. One has only to visit one of the gym classes in order to see this point. A 220 yard jog will completely fag most of the students enrolled in these classes. If these people are in poor condition, imagine what kind of shape the many people not taking health education are in. Participation in some sport will solve this problem.

The answer that most people give for their unfitness is, "I'm here to study, not to play games." This is a lot of BULLSHIT.

A sports body is an invaluable aid in the development of a sound mind. This point is proven again and again by the fact that many, even most, of our athletes are also our "solid" students not the A students but the B and the C students, and also many campus leaders participate regularly in some sport - not the big sports, but sports that relax them, skating, volleyball, etc.

Another reason given by the unfit people as an excuse for their position is simple, "Let the big boys play the game. They're better than I am."

This is a burdening excuse. Sure they are better than you are in some things. This may be because of natural ability, but in most cases it is true because the big boys have worked harder than you have. He may be a better basketball player, but perhaps you are a better swimmer or skater.

No one should ever sell himself short. The person who does this on the field or court will usually do the same thing in the classroom. An individual should recognize his abilities for what they are and always follow Emerson's advice. "Thank God for . . . great men, but say that I also am a man."

Should the gym is occupied by the strong, lean, fit individuals, but it should be occupied by the short, fat, unfit persons as well. The latter can derive the greatest benefit from the building.

To those who still are unconvinced that everyone should participate in a sport, just remember bowling, which is becoming the largest sport entertainment in the country.

When you hear the word SPORTS, don't think about the Floyd Pattersons and the Penny Pitous. THINK ABOUT YOURSELF!

Becton Makes All-Stars

For the first time since the 1958-59 season, the University of Vermont is represented on the first team of the Yankee Conference All-Stars.

Henry Becton is the Catamount that received the honor. He is the only sophomore in the conference to make the team.

The All-Yankee Conference team is composed of members of the Champion Rhode Island Rams and one player each from Vermont, Maine and Massachusetts.

The two players from Rhode Island are Harry Multer and Gary Kolning. Doug Grutchfield is the delegate from U-Mass, and the conference's scoring champion, Tom "Skip" Chappelle is the representative from Maine.

Becton, who finished second to Chappelle in scoring with a conference average of 20.3 points a game, is the first player to represent the Green and Gold on the team since the days of Clyde Lord.

Sensational! Outstanding! Amazing! These are just a few of the superlatives that opposing coaches have used to describe Benny's performances on the court. In his first year of Varsity competition he has established three scoring records.

Although his opponents were often from three to eight inches taller than he, Becton managed in most cases to out rebound them. Bashful Benny, who is very quiet, maintains that light weight-lifting helped his jumping ability a great deal.

Coach Fuzzy Evans says of Benny, "Gee.' I wish we had another player like him."

Harry Zingg, Vermont's captain, received Honorable Mention. Harry, who had his best year as a basketball player, is now preparing to start the baseball season as a starting pitcher for Coach Lapointe.

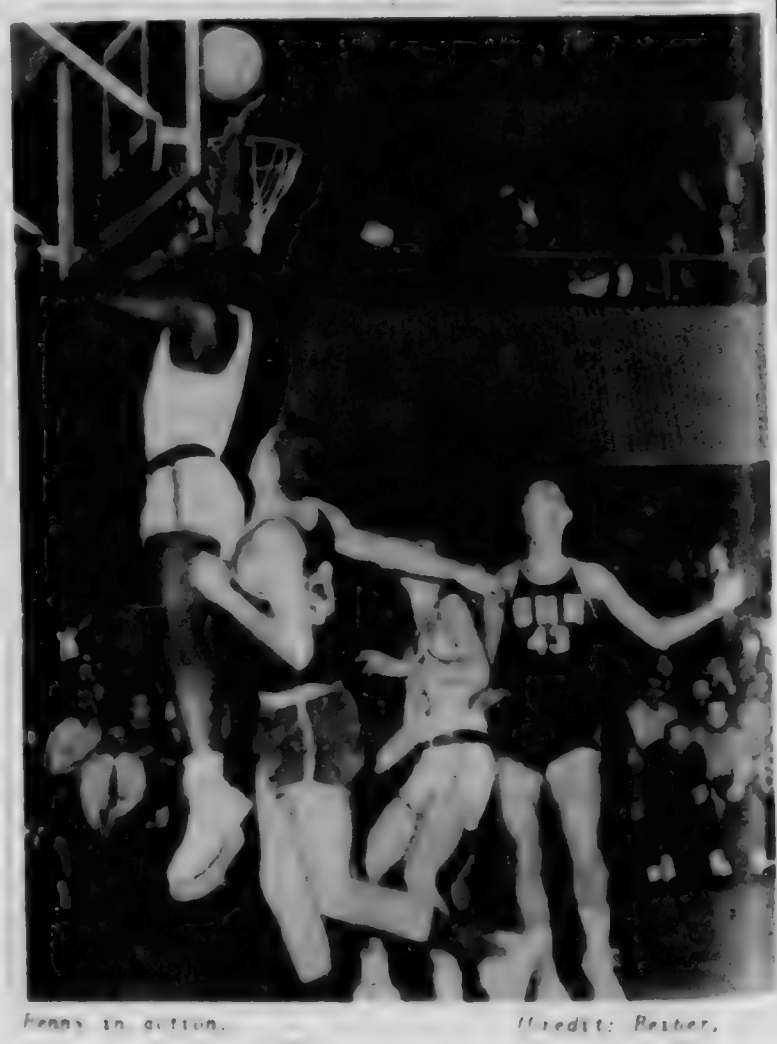
Meet The Catamounts



by HOWIE GORNEY

This week's edition of "Meet the Catamounts" could be subtitled "Meet the Captains," for in this issue we shall meet the heads of two unhearalded but important sports in the athletic program at UVM: riflery and skiing.

CARL BRAUN, Captain of the Rifle Team.

Carl is a native of Burlington and is a senior in the College of Arts and Sciences where his major is History. He is, in effect, the story of an unknown breaking into the ranks, for he had had no previous shooting experience prior to his sophomore year. At that time, his friend, Ronnie Brand, who was then captain of the rifle team, asked Carl if he would like to try out for the squad. He went out and made it, shooting with the ROTC team in his first crack at com-

Cunningham Dancers Here For Lane Series

[illegible] and Merce Cunningham to perform for Lane Series.

[illegible] contemporary [illegible], when the next presentation of the Lane Chamber [illegible] for you. A company of dancers under the direction of Merce Cunningham will perform three dance compositions which are original works by Mr. Cunningham: "Suite for Five," "Crises", and "Battle Meet."

The second modern dance group to appear at UVM, this company is headed by one of the leading avant garde dancers of today. He began his tours in 1953 and last August performed in Europe in major cities. During the summers he usually spends his time in dance workshops and festivals. In the past few years Cunningham has appeared at the American Dance Festival in Connecticut. He is also active as a teacher and lecturer.

The choreography of this controversial artist is taken from many phases of art, including collaborations with painters, musicians, and composers.

Performing along with the company will be Carolyn Brown, Cathy Wood, Viola Farber, Judy Dunn, and Remy Charlip. In conjunction with the appearance of Merce Cunningham and his company, Orchesis is conducting a lecture and demonstration of various techniques of the dance. Since three of the girls attended the Dance Festival in New London, they are acquainted with his style and will try to interpret it to the audience. In addition, they will exhibit the techniques of Weidman, Limon, and Graham.

Brian Reynolds of Orchesis will act as commentator for the program presented by Marsha Snyderman, Carol Shapiro, Carol Mable, Petie Hirshland, Sally Buerman, Phyllis Babbitt, Eve Solomon, Diana Jordan, and Dick Pearlstein. Miss Carol Schelper of the women's physical education department is their advisor.

After explaining the several styles, the members of Orchesis will combine them into an original dance at the conclusion of the evening's presentation. This will be given at Southwick Auditorium on April 12, at 8:00 P.M. as will the Cunningham program on April 14, at 8:30 P.M. Because of the size of the ballroom and the atmosphere, these two presentations should be more interesting to the audience.

Pierre Delattre Opens Vermont Conference

On Wednesday, March 22, Pierre Delattre opened the Vermont Conference and presented his views on the Conference theme, "Contradictions: Public Myth vs. Private [illegible]."

Mr. Delattre oriented his [illegible] towards the theological viewpoint. He is a graduate of the University of California (1951) and the University of Chicago Divinity School (1954). He was ordained a Presbyterian minister in 1954 and served for an interim period at the Community Presbyterian Church of Stinson Beach. He served for two years at the University of California, developing a program in the area of religion and contemporary culture at the University YMCA. This work led to his employment by the Congregational Board of Home Missions as a minister to the "beat generation". Artists and rebels of San Francisco's North Beach. Mr. Delattre worked at a storefront coffee house, the Bread and Wine Mission, for two years to encourage the growth of a religious community and to develop a ministry for the people there. At this Mission, they held

(continued on page nine)

SA Political Parties Announce Platforms

As March 28, 1961, the date of the Student Association Elections comes closer and closer, the UVM student body will be drawn into a fever of activity. Posters will bloom across campus, and discussion of politics - SA politics will be the order of the day.

Behind the scenes, that game of politics has already been played. There has been the dissolution of a party. Candidates have decided to run late, and candidates have decided not to run at all after signing up. Pressure groups, blocs, lobbys, influence, all have found their way into this election. We of the CYNIC reflect the feelings of Marty Singer, Chairman of the Elections Committee, when Marty said, "It is very important that each student learn a little about the candidates who are running for these high offices. It is important, too, that each student familiarize himself with the topics under discussion, so that he will be able to make qualified decisions when he votes on March 28.

"Remember that these men and women whom you elect to office will be running your government for the next year. They are your representatives. This is a very important election, and I hope a great majority of the students vote, and vote wisely."

There is one unified party, the Student Action Party. It is headed by Ted Edgecomb, who is running unopposed for the office of President of the Student Association.

Here is a rundown of the candidates running for office.

Running for president of the Student Association: Ted Edgecomb -Student Action Party

Running for Vice-President of the Student Association: Jon Tenzer -Independant, Paul Chervin -Student Action Party

Running for Secretary of the Student Association: Sharon Comey -Student Action Party

Running for Treasurer for the Student Association: John Stahler, Dave Maickuk, Bill Musson -Independent, and Mike Collins -Student Action Party

Running for Class Offices

Class of 1962

President, Al MacLean; Vice President, Jay Kronfeld, Pete Laikum; Secretary, Romane Baker; Treasurer, Dick Ullman; SA Council, Ben Black, Ronnie Burgess, and Bill Billado.

Class of 1963

President, Lloyd Hoffman, Joel Bauer, and Gary Carrier; Vice-President, Frank Amato, Larry Yarkin; Secretary, Jean Powell, Toni Citerella; Treasurer, Bob Hazelton, Mike Zeltzerman, SA Council, Butch Heller, Paul Valencenti, Mark Rosen, Joseph Fortin, Don Capalbo, Steven Krintzman, and Grace Waters.

Class of 1964

President, Al Mintz, Brian Little; Vice-President, Doug Barrett, Ken Shopsin; Secretary, Lynn Baier, Sue Chagnon; Treasurer, Stan Carr, Steve Cohn, Larry Bender; SA Council, Rowe Balmer, Ivan Bergivin, Dick Lawson, Lee Eversley, Frank Lewis, Bob Weiner, Janet Cole, Don Feldman, and Ellen Lipp.

Biologist To Speak

A distinguished nuclear physicist, Dr. Dean B. Cowie, will visit the campus on April 17, to speak as part of the University Lecture Series, on "Mistakes in Protein Synthesis".

His lecture will be given at 8 p.m., in the Memorial Lounge, Waterman Building.

Dr. Cowie is a molecular biologist and staff member of the department of terrestial magnetism of the Carnegie Institute in Washington, D.C. His background includes work in the radiation laboratory at Berkeley under Dr. E.O. Lawrence, Nobel prize winner in nuclear energy; work on the Manhattan project; directing the 60-inch cyclotron at the Carnegie Institute; and consultancies for the Army, Navy, Public Health and Veterans Administration in microbiology.

Future lectures in this series will be given by outstanding authorities on Latin America, Cuba, and on the African situation.

GREEK ELECTIONS HELD

IFC

by ROBERT BERNARD

Jerry Emery of Sigma Phi fraternity was elected to the office of IFC President on Tuesday, March 14, the office previously held by Robert Goldman of Phi Sigma Delta. With this post, Jerry assumes the time consuming responsibilities and burdens with which Robert had to contend in the previous year. However, Jerry is an ambitious worker, which is easily seen from his past campus activities, and hopes to acclimate himself to the job quickly. A junior, and a premedical student majoring in Mathematics, he has found time to participate in SA affairs as well as to take part in various IFC events as a member of the Rushing Committee, Kake Walk Disposition Committee, and as this year's Chairman of Greek Week. This experience will be an invaluable aid to him in administrating the diverse affairs of an IFC President.

The experience will help Jerry in contending with next year's rushing and with overseeing various fraternity social functions. One of the most difficult and probably most important jobs Jerry will have to handle, is acting as a laisson officer between the administration and the fraternities. This requires a great amount of tact and diplomatic skill, something Jerry

(continued on page eight)

Editorial:

What's In A Word?

[illegible] its language grows with it. New words are born in the ever complicated business life and old words take on new meanings. These meanings are often a subtle indication of the state of affairs of a nation. One of these words that frequently changes in connotation is "student", a word that stems from the Latin verb studeo, to study. Indeed the definition of student is "A person who studies something."

But the word connotes far more than its definition. In former years America the mental wage to spend the better part of their waking hours [illegible] studying young men always fighting passionately for some cause or other.

In the Middle Ages the word has had many meanings and has had the power to evoke many responses. In the Eighteenth and Nineteenth Centuries a student was almost always the son of a wealthy merchant, gentleman farmer or aristocrat. Then, in the twenties [illegible] the student concept shifted several times.

The college man of the twenties was as flamboyant and individual as the decade in which he lived. Raccoon coats and hip flasks were the symbols of this generation's wild years. Big automobiles, and illegal booze seemed to be all these kids care for cried the elders of the day. Perhaps they were right. Certainly they were correct in speaking of these students as kids. Everyone was working under the "You're-only-young-once" principle. But that all changed with the depression.

The student of the Thirties looked a lot more like his European cousin. Although less riotous, the American student became actively involved in the social struggles of the day. The student concept shed its raccoon coat and shipped it to a Spanish soldier fighting a losing fight to keep his own country out of fascists hands. The courses and ideas of college took on new meaning when the money to pay for them grew short and its source, uncertain. Hungry students felt a new closeness with hungry laborers and farmers. But the Depression Student died in the early days of World War Two.

He was overseas during the war years, and when he came back after the fighting was over, he was a different person altogether. The professors loved the G.I. Student. His thirst for knowledge was even greater than his thirst for beer. Often he was married and as much involved in raising children as he was in working

[illegible]

Peace Corps

The Kennedy administration has announced its intentions to initiate a program of a new and potentially explosive nature. The Peace Corps has the potential to be a great outlet for the propogation of American ideas and ideals if carried out correctly. If not, it could become "Kennedy's Folly". We believe that the Peace Corps is a risk well worth taking.

It should be made clear that the Peace Corps will be no [illegible]. Its director, Sargent Shriver has said, "It won't be an easy job . . . (it will require) extensive language study and completion of courses on the history, economics, politics, and culture of the area to which the student will be sent . . . There should be no (permanent) draft exemption because of the Peace Corps service." Salary will only cover necessary expenses and a small allowance. Hard work, long hours and the danger of illness are constant factors to consider. Why, then, has the response been so overwhelmingly in favor of the Peace Corps?

President Kennedy, in his inaugural address stated, "Ask not what your country can do for you . . . ask what you can do for your country".

We believe that the youth of America have longed for just that opportunity. The many thousands of inquiries already received in Washington are proof of this fact. The Peace Corps will give us the opportunity to develop an invaluable personal rapport with the people of countries where the future of the free world lies. This will help to fill a critical vacuum now present in our foreign policy. But even more important, it will be a natural, natural opportunity for the people of the world and for ourselves.

It may be added that those who are interested in this opportunity to be of great service to their country, themselves, and the underdeveloped areas of the world can [illegible] themselves via [illegible] inquiries to: Peace Corps, The Peace Corps, International Cooperation Administration headquarters, Washington, D.C.

Letters To The Editor

Dr. James P. Chaplin, chairman of the Sociology Department discusses forms of education. (Photo by Coleman, SPS)

... will see televised education as a grand op-
... for the gimmick-minded professor who will
... his disposal a whole Aladdin's cave of elec-
... wonders to fire the imagination of his viewers
... (did I say tele-students?). Still others --- the
... minded professors will predict the final collapse
... already tottering standards. And so on through the
... spectrum of opinions, each according to his pre-
...

We can prejudices convince me that the entire subject
... no more relevance to higher education than a dead
... and that all the heat, dreary committee reports,
... "research" that we will be bombarded with in the
... future will be irrelevant and a waste of time.

A college *education* consists of the personal interac-
...tion of minds with one common attribute -- intellectual
...riosity. Television, at its best, consists of a slick
...ogram of *information*, often effectively presented,
...ut often merely superficial. It is a disembodied,
...epersonalized, and highly useful technique for convey-
...ing facts, visualized impressions, and complex technic-
...al demonstrations. But it cannot convey the subleties
...that somehow make up the heart of a true education and
...that often remain in the mind long after the facts are
...forgotten. Nevertheless, educational television will
...prevail whether educational or not. After all, progress
...is our most important business. So let us look at the
...future when all higher education is conducted by tele-
...vision.

Gone are the professor's mistakes. They have been
...edited out of the tape. What happened to the visit to
...his cluttered office where an occasional exchange of
...prejudices took place? He has no office. Of course, I
...suppose you might become a stage-door student and lurk
...around the studio to catch a glimpse of him, if you
...insist on this sort of thing. Then, the poor teacher
...with his dog-eared notes and abominable presentation
...we griped about for years afterwards never even got
...on television. Yet by contrast we even learned something

Chaplin At Hillel Brunch

Sunday March 19 Dr James P Chaplin, chairman of the UVM Psychology Department spoke at the Hillel Brunch on the subject "What is Existentialism?"

He informed those present that existentialism is a very [illegible] branch of philosophy whose basic ideas of which can be found as far back as Biblical times in the Book of Job. This philosophy deals with the "basic condition of man's existence, and how man is to find meaning in life." How can Job reconcile his existence with God? How can Camus' *Stranger* reconcile himself to the world?

Existential philosophers seek to investigate the ambiguities of man's existence. They are concerned with the individual's relationship to society, and the need for faith in a transcendent Being in a society, where so many ethical and religious values have been lost.

Professor Chaplin traced the evolution of existential philosophy from its beginnings in the 17th century, with Descarte's theories to the 19th century when modern existentialism was ushered in with Nietzsche's and Kierkegaard's resurgence of subjectivism. Descarte's philosophy maintained a division between objective matter and subjective mind. Modern existential

(continued on page seven)

"Barn" Hears Dr. Torch

"The formation of ideas in an active mind" is the basis of Dr. Reuban Torch's Philosophy of education. His ideas on this subject touched off the usual barrage of questions, comments, and wit for which the weekly Barn meetings are known.

A concern with the intellectual level of the UVM campus shaped last Sunday evening's discussion. Dr. Torch, as "guest instigator of argument" for the evening, criticized extra-curricular activities as they exist on this campus as detracting from academic pursuits. As a specific illustration of his point, he mentioned the idea of requiring a minimum fraternity average for participation in Kake Walk. This type of requirement might be extended to include all extra-curricular activities, in an attempt to raise the academic level of the institution.

In the realm of academic calendar changes, Dr. Torch presented his "revision of the proposed revision", which includes a three week Christmas vacation, with the last four days of the period designated as a study period. Final exams would begin on January 8.

Factions evolved when such topics as a utopian educational system and federal aid to education came under discussion. The voice of the rugged individual clamored for recognition when more government aid was advocated by some in the group.

An educational reform consisting of a Grade A school system for the intellectual "cream of the crop" and still undefined "trade schools" for the less able met with both opposition and approval. The game of theoretical speculation was played by all. The dangers and values of such a system were expounded, philosophers gave vent to the products of their active minds, and many students left with a new insight into the problems which exist in today's institutions of higher learning.

STUDENTES

by MAUREEN MORRIS, '64

The faculty advisors at the University of Vermont are interesting enough to have an entire column devoted to them.

If you are in need of advising, don't go to your advisor for advice! The advisor is a charming person who will chat with you for a half-hour and then send you out into the teeming corridors in a more confused state of mind than when you entered his office.

The advisor's duty is to make sure you are taking the proper courses and to provide a solid shoulder to cry on. After the advisor outlines your next semester's courses, you need a shoulder to cry on. A good appreciation for the ridiculous is helpful, too. If you are in Pre-Med he will probably suggest you go to the Home Economics Department for a course in fancy needlework. (You never know when you might have to use a Lazy Daisy stick on a patient.) Quite frequently Math majors are asked to take poster painting classes, so they will have less trouble with their sines. The Liberal Arts student is in for a new surprise every time he visits his advisor's office. The advisor usually suggests, "Why don't you take the course in Contemporary Congolese Political Practices? It's not too complicated." (What the student doesn't know is that the text book for the course was written by the advisor's unemployed brother-in-law, who has been living on relief provided by the advisor. The author of the text makes a dollar on every book that is sold.)

The advisor is also faced with some pretty strange requests. Most of the coeds want to know if any of the new instructors are unmarried. About once every four years an unmarried instructor joins the faculty; usually in the Military Science Department. (You ought to see all the girls cleaning those rifles!) One of the students' most urgent question is, "Does the German professor allow smoking in class?" The plea that always pleased the advisor to no end is, "But sir, Spanish meets three mornings a week at 8:00 a.m. Can't I take French, instead?"

Before long you'll be pre-enrolling for the fall semester. (Why they make you enroll before you're even sure you'll be in the Dean's good graces come next semester, is another mystery.) If at this time, you find yourself in need of advice, consult your horoscope!

The Circular File

by MIKE GROSSMAN and DICK SNIDER

THE CIRCULAR FILE

Years ago, when a new Joe-College-to-be donned his Brooks Brothers Blazer and headed for his first year at UVM, he risked a full fraternity frontal attack by screaming brothers who were lying in wait for him. When Joe stepped off the train, thirty brothers descended upon him, each one insisting that his fraternity was "Joe's fraternity." A few minutes later Joe emerged from the huddle, a little dazed, more bewildered, and stuck with a shiny new pledge pin. Joe never had a chance to decide on a fraternity, or to see which group of brothers he likes most. He did not even have time to decide if he wanted to pledge in the first place. This was before deferred rushing, which was instituted to do away with this problem.

SEMESTER OF THOUGHT

Theoretically, deferred rushing eliminates these problems, and Joe is left with a whole semester to think about fraternities. Under our present system, the freshman has a semester to adjust to his new life, and to develop study havits which will remain with him throughout his entire college career. He is given time to decide whether or not to go fraternity, and if so, to decide which fraternity is best for him.

Deferred rushing has definitely removed many problems of the old system, but at UVM it is not being used to its fullest advantage. To make this system truly effective, the freshman must be allowed to associate with the brothers of the various fraternities during first semester. How can the freshman benefit from these advantages if the fraternities are forbidden him? As it stands now, he must select one fraternity from sixteen in eight days when he could and should have an entire semester. But how can the freshman use the first semester to his advantage when he cannot even speak to a fraternity men? Eight days of rushing, in the literal sense too, is not enough for the potential pledge to make a careful choice. In eight days he cannot see the everyday life of a fraternity, meet all the brothers, and become familiar with the traditions of each house. Sure, he can declare himself undecided and pledge later, but he cannot afford to take the chance; there is so much competition that after formal rushing the house he wants may already be full. And if he does wait, he will probably miss out on Kake Walk tickets.

Antigone "Springs To Life"

By PETE BETZ

Thursday, Friday and Saturday evenings last week three performances showed the unusual experiment of witnessing a modernized ancient Greek tragedy coming to life on the University stage. The play was Sophocles' Antigone presented by the University Players at the Arena Theater.

Playing Creon was Steglin as Antigone and Chuck Rugh as Creon. The play revolves around the conflict of women with ... and the Play... ...'s acting talents. Possibly the best presentation among the supporting cast was the satisfying portrayal of the blind prophet Terresias by Freshman Howard King. Other members of the supporting cast included Heidi Wocek as Ismene; ... Anderson, Barbara George Maxwell, Carmen Shull as Eurydice; Playing chorus leaders ... and Barry Bercowitz. The accompanying ... was ... choral ... Its members were Sue Beaudin, Beatrice Beaty, Ann Harrington, Jon Stagnitti, Ellen Spencer, Pam Whitcomb and Fred LaBelle.

The impressive stage built by the Stage Crew to recreate as closely possible the original Greek stage not only gave the audience a feeling of realism during the play but helped to set the mood prior to the play's start. Most satisfying too, were the artful and authentic Greek masks, togas and colorful robes created by the costume shop. Both departments were under the supervision of Mr. Ed Pfeiffer of the Speech Department.

It is interesting to note the composition of the audience present at the three performances of Antigone. On Thursday and Friday nights the audiences were ... composed of citizens of Burlington and the university ... but Saturday night the majority of the audience was formed by UVM students. On this night the play was sold out, and on the previous two presentations, the theater was almost full.

The majority of ... seemed to agree with this reviewer that under the direction of Mr. Greg Falls this unusual and difficult type of play was excellently presented by the University Players.

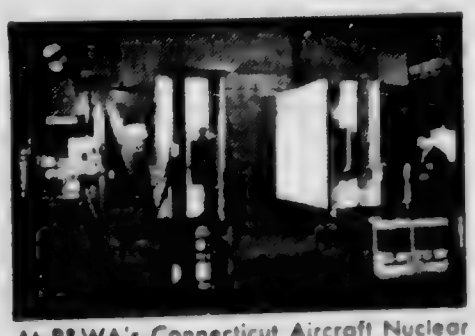
What would YOU do as an engineer at Pratt & Whitney Aircraft?

Regardless of your specialty, you would work in a favorable engineering atmosphere.

Back in 1925, when Pratt & Whitney Aircraft was designing and developing the first of its family of history-making powerplants, an attitude was born—a recognition that *engineering excellence* was the key to success.



That attitude, that recognition of the prime importance of technical superiority is still predominant at P&WA today.

The field, of course, is broader now, the challenge greater. No longer are the company's requirements confined to graduates with degrees in mechanical and aeronautical engineering. Pratt & Whitney Aircraft today is concerned with the development of all forms of flight propulsion systems for the aerospace medium—air breathing, rocket, nuclear and other advanced types. Some are entirely new in concept. To carry out analytical, design, experimental or materials engineering assignments, men with degrees in mechanical, aeronautical, electrical, chemical and nuclear engineering are needed, along with those holding degrees in physics, chemistry and metallurgy.

Specifically, what would *you* do?—*your own engineering talent* provides the best answer. And Pratt & Whitney Aircraft provides the atmosphere in which that talent can flourish.

Development testing of liquid hydrogen-fueled rockets is carried out in specially built test stands like this at Pratt & Whitney Aircraft's Florida Research and Development Center. Every phase of an experimental engine test may be controlled by engineers from a remote blockhouse (inset), with closed-circuit television providing a means for visual observation.

At P&WA's Connecticut Aircraft Nuclear Engine Laboratory (CANEL) many technical talents are focused on the development of nuclear propulsion systems for future air and space vehicles. With this live mock-up of a reactor, nuclear scientists and engineers can determine critical mass, material reactivity coefficients, control effectiveness and other reactor parameters.

Representative of electronic aids functioning for P&WA engineers is this on-site data recording center which can provide automatically recorded and computed data simultaneously with the testing of an engine. This equipment is capable of recording 1,200 different values per second.

Studies of solar energy collection and liquid and vapor power cycles typify P&WA's research in advanced space auxiliary power systems. Analytical and Experimental Engineers work together in such programs to establish and test basic concepts.

World's foremost designer and builder of flight propulsion systems

FACULTY HANDBOOK pps 82-83)

...rpose of Social Functions

... ...versity grants to ... the privilege of ... and holding social h activities are encouraged be... ...versity considers and practice in ...quette and social ... are important en and women. ...ences, however, ... this goal only al functions are ... within the framework ... acceptable codes ... and good taste.

...e of the Chaperon

... are present at t functions as ...sentatives of the Uni... ... lend maturity, ... and graciousness to ...al gatherings and ... the students with ...al education. Mem... ... faculty and admin... ... are not required to ... invitations to chaperon. ... they do so, it is pri... because they enjoy ... students in a social ... and because they are willing to help them with their social education. The role of the chaperon should be that of a guest. It is easier for a chaperon to feel like a guest when the student organization is willing and able to maintain acceptable social standards. Chaperons should be neither policemen nor proctors, nor are they held responsible for laws and regulations are broken by students who are present. However, when in their opinion such action is warranted, they should call to the attention of the students in charge of the party, those conditions which they feel are unsatisfactory, or in poor taste. Needless to say, the chaperons themselves are expected to observe both the spirit and the letter of all University regulations.

Role of the Host

Wherever there are guests, there must be a host. The host, logically, is the student organization. Accepted standards of social etiquette impose certain responsibilities upon the host, among other things, the obligation of conducting himself, and the activities for which he is responsible so that pleasand courteous social relationships will prevail. The host should make certain that all guests, including the chaperons, are made to feel at home in all rooms in which the social function is held.

Working Together

If the host organization is to derive the maximum benefit from the presence of chaperons and if the purposes of sponsoring social functions are to be most fully realized, a responsible representative of the host organization should take it upon himself to talk over the event with the chaperons. In this way, student groups will have the benefit of the advice and suggestions of faculty and staff members who are interested in assisting young men and women with their social development.

JUNIOR WEEK

Junior Week, open to all but sponsored by the Junior Class, will take place on Friday, April 14 and Saturday, April 15. Friday night at Southwick from 8 to 12 p.m. the Junior Prom will be highlighted by the five reigning beauties that are chosen from approximately twenty junior girls, each representing a living unit. Temple Conner's Quintet from Burlington will provide the music at a dollar a couple, which includes refreshments.

Saturday there will be a picnic and jazz concert from 3 to 10 p.m. with entertainment by Rick Nalin's TEP Jazz Band. Transportation will be available at Waterman and cost for the entire day is $1.00 per person.

General Chairmen for Junior Week are the Junior Class Officers - Al MacLean, President; Pete Lakis, Vice-President; Marge Coleman, Secretary; and John Tenzer, Treasurer. Working under them are: Refreshments, Dag Pfanzelter and Bob Adler; Location and Tickets, Janet Levine and Buzz Stone; Entertainment, Betty Navin and Mike Goldberg; Publicity, Carl Hausler and Ann Van Gilder; Junior Beauties, Rosalie Wetherby and Pat Dean; and Decorations, Elaine Oral and Dave Gardner.

Schedule Baseball

BURLINGTON - The University of Vermont baseball team will play a 28-game schedule this spring, including eight games on the Catamounts' 50th annual southern trip and two home night games.

Vermont, coached by former major-leaguer Ralph Lapointe, will open its season with the southern swing which this year lists contests with Long Island University, George Washington University, Howard University, Baltimore University, Villanova University, Columbia University, Fairleigh-Dickinson University, and Upsala College.

The regular season slate will include ten Yankee Conference games, six games with Green Mountain rivals, and contests with Coast Guard, Brandeis, St. Lawrence, and Dartmouth.

The two arc-light affairs will be played at Vermont's Centennial Field against Massachusetts and Middlebury.

The complete Vermont schedule follows:

50TH ANNUAL SOUTHERN TRIP - April 1, Long Island at Brooklyn, N.Y.; April 3, George Washington at Washington, D.C.; April 4, Howard University at Washington, D.C.; April 5, Baltimore University at Baltimore, Md.; April 6, Villanova at Villanova, Pa.; April 7, Columbia at 10:00 a.m. in New York City and Fairleigh-Dickinson at 3:15 p.m. in Teaneck, N.J.; and April 8, Upsala at East Orange, N.J.

REGULAR SEASON - April 21, Coast Guard at New London, Conn.; April 22, Brandeis at Waltham, Mass.; April 28, 29 Rhode Island (2) at Kingston, R.I.; May 1, Norwich at Northfield, Vt.; May 2, St. Lawrence at Burlington; May 5, 6, Connecticut (2) at Storrs, Conn.; May 9, St. Michael's at Winooski Park, Vt.; May 10, New Hampshire at Burlington; May 12, Massachusetts (NIGHT) at Burlington, May 13, Massachusetts at Burlington; May 15, St. Michael's at Burlington; May 17, New Hampshire at Durham, N.H.; May 18, Middlebury (NIGHT) at Burlington; May 19, 20, Maine (2) at Burlington, May 22, Norwich at Burlington; May 24, Middlebury at Middlebury, Vt.; and May 30, Dartmouth at Burlington.

Conference

(continued from page one)

poetry readings, exhibits, original plays, publish magazines and books, and are also open for nightly conversations focusing on questions of religion and rebellion.

Mr. Delattre is now writing a novel and a book about the religious basis of rebellion and is experimenting with the potentialities of a lay ministry to the North Beach area. He has written poems that have been published in more than a hundred religious and secular publications.

Paul Delattre's field of interest has been in the theology of culture with special interest in a Christian ministry to the centers in our country on creative ferment. The title of his talk, "The Religious Basis of Rebellion" was correlated with the Conference objective of pointing out the existence and manifestation of contradictions between the individual and his society.

Senior Division events for both men and women are:

Freestyle	40 yds.
	100 yds.
	200 yds.
Backstroke	100 yds.
Breastroke	100 yds.
Butterfly	100 yds.
Individual Medley	160 yds.

Further information can be obtained from the places listed above.

Sportlite Southwick

by CHARITY GREENWOOD

On March 5 the Women's Ski Team went to Colby Junior College for the annual Intercollegiate Ski Races. The Catalina Swim Club traveled to Green Mountain Junior College on March 11 for a workshop. The same day UVM participated in a basketball playday at Skidmore College. The Womens' Intramural Basketball Tournament is nearing the end with the finals coming on March 23. This year at the end of the tournament the Womens' Recreation Association will make awards to those players who were outstanding in the tournament.

UVM placed fourth in the Ski meet at Colby Junior. Other schools participating in the meet were Skidmore, UNH, Northeastern, St. Laurence, Middlebury, Colby, Colby Junior and Mt. Holy Cross. The UVM team consisted of Debby Keith, Lynda Kittle, Jackie Humphrey, Sue Chagnon, and Ginger Loyd, Manager. Jackie Humphrey placed second in the Slalom and second in the Giant Slalom. She also placed second in the Combined.

Catalina Club participated in a workshop with the swimming group from Green Mountain Junior College. Miss Schelper and Miss Davenport, who accompanied the group, served on a panel with two other instructors from the field of [illegible] All three performers involved there were evaluated by the panel. The girls who went were, Pat Bishop, Peggy Parker, Linda McColl, Eileen Mahan, Drew [illegible], Grace Waters, Martha Russell, and Mary Milne.

At Saratoga Springs, the UVM girls won one basketball game and lost one. UVM was defeated by Skidmore but turned the tables on Russel Sage. Schools attending the playday were, Colby Junior, Russel Sage, Emmons, Skidmore, Vassar, Middlebury, and UVM. Vermont also placed 6th in the swimming competition which was being held.

The groups were accompanied by Mrs. Ebert and Miss Dimitroff.

The finals of the Intramural Basketball Tournament will be held today, Thursday, March 23. Kappa Alpha Theta will play Coolidge I for the title. Theta reached the finals by downing a tough Pi Phi team by a score of 18-11.

This year W.R.A. has decided to honor those girls who prove to be outstanding in the tournament. The awards are based on skill, sportsmanship, attitude, cooperation, and enthusiasm. These players will be announced the last week before spring vacation.

Sloppy Slalom Entries Wanted

It's Sloppy Slalom time again. All skiers in the University family are invited to take part in the fourth annual Sloppy Slalom to be held on Sunday, March 26, beginning at 1:00 p.m., at Smuggler's Notch Skiways in Jeffersonville. An easily negotiated giant slalom will be set up on the practice slope. The race is open to all amateur skiers, and to keep things even, all skiers who have ever won freshman or varsity numerals in skiing, or represented the University this year in an Alpine event are ineligible.

Entries may be left in the Outing Club box in the COSA office any time before Friday, March 14, at 3:00 P.M. Starting positions will be drawn by the Race Committee that evening. Late entries will be accepted until noon Sunday but will be placed last in the starting order.

There are no entrance fees required for the race. The Outing Club reserves the right to rule on matters of eligibility. For more information or late entries phone Fred Hadley, Race Chairman, Un 4 7662

NEW GROUP COMMANDER

The Department of Air Science at the University of Vermont has announced the selection of Roland J. Allen, '61, as the new Cadet Group Commander. Cadet Allen presently holds the rank of Cadet Lieutenant Colonel.

Also announced were cadet appointments to Allen's Group Staff: Cadet Major Charles H. Eldred, '61, Operations Officer; Cadet Major John H. Martel, Jr., '61, Administrative Officer, Cadet Major Joseph R. Buley, '61, Personnel Officer; Cadet Major Vernon P. Fowler, '61, Inspector; Cadet Major Stanley E. Van Horn, Jr., '61; Material Officer; Cadet Captain William R. Benner, Jr., '61, Information Officer.

Appointed to command positions in Squadron 1 were Cadet

and Maine. In this competition UVM placed three men within the first six places for individual honors. Steve B. Cohen took first place with a 287, Dave Haurilick was third with 280 and Chris Klink sixth with 278. Also in this meet, Cohen and Haurilick received special mention for outstanding performances in the standing position of firing with a 92 and 90 respectively. The fresh high team total to date is 1414. This mark was achieved in the Worchester Poly meet and came as a result of the excellent shooting of Bob Fellon, Dave Mallory, Dick Meirowitz as well as Cohen and Klink.

The fine records of all three teams indicate the high caliber of proficiency reached by these boys after long hours of practice and are a tribute to their skill.

Thanks

(continued from page ten)

team, set up the tackling dummies for football practice or bring out the relay stick for the trackmen.

One can see that the "unsung heros" are very valuable to the success of any team. This year Vermont is very fortunate in having the caliber of men who are on its managerial staff. The head man is Steve Moore. Steve, a junior, and a brother of Kappa Sigma fraternity, is in charge of the rest of the staff. His assistant is Tom Lang, a sophomore. Tom, is also a dormitory counselor in Chittenden Hall. The rest of the managers are freshmen. They are Carl Hils, Jim Howell, Doug Price, Frank O'Brien and Dick Rappaport.

These men are very popular with the school athletes. Whenever a player is thirsty, a manager is nearby with the water bucket; if ever a perspiring player needs a stick of gum or a towel, whom do you think simultaneously becomes a gum dispenser and a towel rack? - That's right *The Managers.*

The players, coaching staff, trainers, and I am sure, the rest of the school would like to join with me in order to salute our managerial staff for the grand work they're turning out such wonderful products.

THANK YOU MANAGERS.

Second Annual Greek Week Features Races, Sing, And Jazz Concert

Agents use ancient means of transportation in the true Greek spirit. (Credit: Photo by R. Hazelton)

On Monday, April 17th, the second annual IFC Greek Week began. The IFC sponsored week will continue until this Sunday. The week, this year, especially, is highlighted by the chariot race tomorrow afternoon at 4:30 on Redstone Campus, the jazz concert tomorrow night, and the IFC sing at 8:00 Saturday night. This is the first year for the first time, the IFC and Panhellenic councils are both participating in Greek Week.

The essential purpose of Greek week is to improve the fraternity system in general and to attempt to bring the three fraternities and seven sororities on this campus into closer harmony. The IFC can work as a more effective organization if the separate organizations can enter into a closer state of "togetherness". It is the belief of the interfraternity council that through discussion and cooperation, the mutual exclusiveness of fraternities can be further reduced.

The concept of Greek Week has changed since it was originated last year. This year is a more essentially social week. Members of the IFC are taking part in all competition and, although the Greek activity will be the center of conversation, much of what is discussed will be of interest to the sorority representatives.

On Wednesday, Mr. George Rogers, director of the Fraternity Managers Association, University of Massachusetts, spoke on the organization and operation of a cooperative buying system. Cooperative buying program will extend to such things as the purchasing of food and fuel and securing of repairs. On the same night, a member of the Alumni Interfraternity Council of UVM spoke about the rushing system. An evaluation was made and plans for the future were discussed. In the Student Lounge, a panel of four faculty members, moderated by Mr. Mahoney, COSA, discussed the role of the chaperone at fraternity social events.

Tonight the Student Lounge will be the scene of the talk on fraternity-administration relationships given by Robert S. Hopkins, Dean of Men at the University of Massachusetts. Following this talk, there will be discussion and Greeks and non-Greeks who are interested are invited.

Jerry Emery, recently elected president of the IFC, readily commented on this year's Greek Week. "This is the second annual Greek Week and we want to develop this week as the only pure fraternity week on the school calendar. The plans for the week enable us to look forward to a more progressive and expansive fraternity system."

Donald Woodward Nason

On Monday, April 9, Donald Woodward Nason, a graduate student at the University, died of injuries incurred in an automobile accident.

Donald was a graduate of Boston University, where he was an honor student and was preparing for his masters degree in English. He attended UVM regularly since 1961 and planned to teach English at the college level.

Donald was 24 years old and was born in Montreal, Canada. He lived for the past years in Derby Line, Vermont and was the son of Mr. and Mrs. Ernest C. Nason.

The CYNIC and the University Family express their heartfelt sympathy to family and friends.

Eichmann And Peace Corps Symbols Of Different Decades

Peace Corps Demands Excellence Of Volunteers

What is the Peace Corps looking for in a Volunteer? A specific "needed skill" is the *first* requirement. The Peace Corps was established to respond to requests from host nations.

The range of needed skills is great. Most nations requesting Volunteers will be industrially less developed than the U.S.A. They will want engineers, technicians, teachers, craftsmen and administrators. Other countries will seek to improve their agricultural system, creating a need for farmers who understand the land and the use of modern implements and for agricultural specialists with college degrees. Government and political science majors may be in demand by a newly formed nation anxious to establish an effective administration. Teachers are in short supply in South Asia, Latin America and Africa. Some will be called upon to teach English, others to work in secondary schools. Some nations will want college-level teachers in a wide variety of subjects. Those with laboratory or sanitation skills will be needed in tropical areas where the threat of disease and pestilence is great. Construction talents, electrical abilities, civil engineering skills and the like are also in extremely short supply.

Second, the Volunteer must understand that he is not trying to remake the world in our image. He must sincerely appreciate the values, mores and traditions of the society in which he works.

Third, the Volunteer must be "adaptable" enough to undertake a difficult and sometimes frustrating assignment. A Volunteer's individual contribution will be small and may go unappreciated or unrecognized. Inner stamina and security are essentials if frustration and disillusionment are to be avoided. The Volunteer must not go abroad seeking to solve personal problems he cannot solve at home.

Fourth, the Volunteer should appreciate that the Peace Corps is a "two way street," that the Volunteer will learn as much as he teaches. His own horizons will be expanded and broadened while he works in harmony with his host nation counterpart.

Fifth, the Volunteer must understand the strengths of democracy and how our system functions. He must be able to answer both the questions put to him by the sincere doubter and the professional agitator.

Sixth, the Volunteer must have a grasp of the host nation's language. Intensive

Hilberg Speaks On Eichmann

When Adolf Eichmann was spirited to Israel from Argentina last May, his capture made headlines. Yet to many people, the name of this former SS Lieutenant Colonel was new, and they must have wondered about his sudden prominence.

Tuesday evening, Dr. Raul Hilberg discussed the Eichmann trial, its background, and significance at a public lecture sponsored by the International Relations Club. Dr. Hilberg discussed Eichmann's position in the German chain of command, pointing out that it was considerably below Hitler. Eichmann's area of competence was confined to the deportation of the Jews from one country to another and the importance of his work lies in the fact that more than one million Jews were transported to their death across such frontiers. By the same token, Eichmann had nothing to say with respect to the shootings of Jews by roving SS and army units. Nor did he have anything to do with the movements of two million Jews from ghettos to death camps in the central Polish area. Peripherally, Eichmann did participate in the establishment of gassing installations, and lent his influence to local killings by the military and the SS in Serbia, but that was the limit of his power.

Dozens of agencies participated in this operation. The destruction of the Jews involved the entire German bureaucracy. In 1941 the Security Police crossed into Russia with orders to kill all Jews on the spot. Soon after the launching of operations in Russia, the signal was given for a "final solution" on a European-wide scale.

Eichmann's position was that of an ordinary bureaucrat who found himself in a crucial spot at a decisive moment in history. Neither the spot nor the history was his creation. He did not establish the destruction machine; it established him. Today, Eichmann stands on trial as a symbol of that entire bureaucracy which established him. But today, Eichmann's trial also seeks to rectify an omission. In Axis Europe, ten million people were killed and about half were Jews. No provision was included in the Nurenburg Tribunal charter which would have made criminal the whole range of anti-Jewish acts committed between 1933 and 1945.

Israel is trying Eichmann for "crimes against the Jewish people" and "crimes against humanity."

Frost To Revisit UVM As Guest Of Lane Series

Robert Frost

On January of this year Robert Frost set a precedent by being the first poet in the history of the United States to take part in the inauguration of a President, when he recited his own composition on, "The Gift Outright." This is only characteristic of the man who is so representative of contemporary culture. At 87 years of age his poetry is known and loved by America, witnessed by the awards Frost has received, including the Pulitzer Prize for four years, membership in the American Academy, and the office of Consultant in Poetry to the Library of Congress.

Next Tuesday, April 25 at 8:30 P.M. Mr. Frost will speak in the Ira Allen Chapel under the auspices of the Lane Chamber Arts Series. A resident of Vermont, he has spoken twice before at the University. His other recent activities include a series of readings and lectures at the Hebrew University of Jerusalem in March, and a forthcoming "Evening with Robert Frost" to be presented

PRESIDENT EDGECOMB OUTLINES SA PROGRAM FOR THE COMING YEAR

by BETTY BIRNAM

Ted Edgecomb, new president of the student association. (Credit: Photo by Robert Coleman, SPS)

[illegible] SA [illegible] "Here," through these committees, "we hope to start to make a more effective start on [illegible] Edgecomb pointed out that SA should not be taking away any of the authority of other campus organizations. That would be just receiving opposition from SA. SA in fact, would be a more strengthened body [illegible] more effective student program.

"The area of communication is a large area, which we hope to develop during the coming year," said Edgecomb. "More means several and better communications between faculty, administration, and student organizations are needed. SA would like to see monthly meetings instituted to discuss areas of mutual interest and subjects, so that we all may be directing our efforts for the best of the students and the university as a whole.

Edgecomb, a member of Sigma Phi fraternity, was SA Vice-President last year, was co-chairman of the King and Queen committee for Homecoming, is Vice-President of Key and Serpent, and is Production manager of Lane Series.

A junior in the college of Arts and Sciences, Edgecomb is married and has spent four years of active duty in the Navy.

After completing undergraduate work, "I hope to study for a Ph.D. and go into teaching on a college level. I like the atmosphere of college life," he smiled, as he suggested that perhaps he is a "perpetual sophomore."

"Janus" To Be This Weekend; Players Workshop Production

Directed By Ralf Bode

A pleasant interlude during [illegible] and hustle of Greek Week will be the humorous play "Janus" This University Players Workshop production will be presented in the Arena Theatre tomorrow evening and again Saturday.

The play, which was written by Ingmar Bergman, has a rather [illegible] which concerns one author named Janus who is really ten people, one of whom is married and supposedly in New York studying during the summer. Her husband, who has just arrived from the Midwest, decides to stay in on his wife and arrives just in time to find her co-worker coming out of a dust waiter. This, combined with the fact that his wife has now [illegible] half of America's [illegible] novelist, and one fa[illegible] ter who wants to retire forms a really bizar[illegible]

The play is dir[illegible] Ralf Bode, a junior [illegible] cast is Susan Wicke[illegible] Jessica, the decep[illegible] and novelist. Lewis [illegible] playing Denny, the [illegible] of Janus. Sheila [illegible] Miss Addy, an agen[illegible] Tarro is cast as G[illegible] husband from the Mid[illegible] Truman Grandy is pl[illegible] burper, the "gener[illegible] collector.

Tickets for Janus [illegible] sold at the door, or purchased at the box [illegible] in Waterman anytime [illegible]

Lambda Iota Celebrates 125th Anniversy At UVM

Jamie Jacobs presents picture to Lambda Iota from Class of '61. (Credit: Photo by R.H. Reibert, SPS)

Lambda Iota, oldest local fraternal society at any university in the United States, celebrated its 125th anniversary Friday and Saturday, April 14-15. The UVM fraternity has been observing its 125th year during the 1960-61 academic year.

Festivities began Friday evening with a ball at the "Owl" house. On Saturday afternoon, a coffee hour was held at the house at which time a three by five foot oil painting of the house was dedicated. The painting, done by James Geaudreau of Northfield, was given by the seniors of the house.

SPEAKERS

A banquet was held in the President's Dining Room in Waterman at 7:30. Dr. D.C. Jarvis, a graduate of the UVM College of Medicine and author of the best sellers, "Folk Medicine and Arthritis" and "Folk Medicine", was the main speaker. Other speakers were Earle Clifford, Dean of Men, and Harris Thurber, chairman of political science at Middlebury College, and also president of the Lambda Iota Society, the alumni organization of the "Owls."

Representatives from many other local fraternities at New England colleges and universities were present at the anniversary celebration. In addition, representatives from all UVM fraternities and sororities attended as did many "Owl" alumni.

HISTORY OF MYSTERY

Lambda Iota was secretly formed by 13 students in 1836 in protest of a no smoking edict and has had a continuous existence since its inception. It is the fifth oldest Greek letter society in the United States, Phi Beta Kappa (1776) being the oldest.

Nicknamed the "Owls" by its members since the society remained shrouded in secret and the owl is "a type bird that lays low and operates under the cloak of darkness," Lambda Iota has given three governors to the state of Vermont--- John Gregory Smith, Roswell Farnam and Edward C. Smith. Other former "Owls" include John Converse, a president of the Baldwin Locomotive Works, Edward H. Bennett, founder of the Boston University Law School and Paul Harris, founder of Rotary International. Harris was expelled from the University for rolling a 50-pound brass ball down Church St. and breaking a horse's leg.

Through the late 1930s, more than 25 per cent of Lambda Iota members became lawyers. During the Civil War, 52 members saw action.

The society remained a secret organization until 1842, when the University demanded the group make its existence officially known.

After having several homes, the "Owls" settled permanently in 1913 in the brick, white-pillared house at the northwest end of the UVM campus at 440 Pearl St.

Approximately 900 members of the chapter have graduated from UVM and the current membership is around 50.

SA, Class Officers Recently Elected

Levin To Head Court

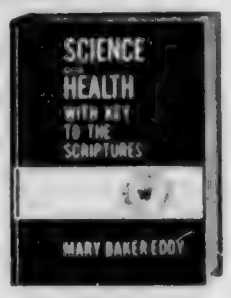
Shortly before Spring vacation, on March 28, the elections for class officers and Student Association officers and representatives were held. That night the results were posted. The new SA officers are: Ted Edgecomb, President, Joe Yenger, Vice-President, Sharon Comey, Secretary; and Mike Collins, Treasurer.

The Student Court also changed hands in March, serving with Joe Levin, Chief Justice, will be Jon Kaplan, Jim Allen, George Adler, Betsy Ilsman, Bill Cullen, Frank Pagliaro, Paul Harris, and George Pettit.

The Class of 1962 election results were as follows: Scott Johnson, President, Jay Kromfold, Vice-President, Roxanne Hocker, Secretary, Ralph Mathes, Treasurer; and Brenda Burgess and Bennett Black, SA Representatives.

The Class of 1963 elected Joel Bauer as President; Frank Amato, Vice-President; Joan Powell, Secretary; John Stabler, Treasurer; and Grace Waters and John Chaimbers, SA Representatives.

Joe Levin to preside as new Chief Justice of Student Court. (Credit: Photo by Robert Coleman, SPS)



The officers elected by the Class of 1964: Brian Little, President; Yvon Bergevin, Vice-President; Eileen Mango, Secretary; Larry Benner, Treasurer; and Janice Cole and James Frankman, SA Representatives.

UVM Debaters To Enter National Tournament

Tierney represents ... Regional Debate. ... to by Barcomb, SPS)

Marilyn VanGraber to help defend title at Regional Debate. (Credit: Photo by Barcomb, SPS)

... the UVM Debate Team ... National College ... of the United ... this month the chance ... a title will be ... the 1960-61 team of ... VanGraber and Charles ..., who will compete at ... Point, New York on April ... and 29. Along with ... teams will be repre- ... of four other ... in this district and ... each of the other ... Mr. John Travis ... the Speech Department, who ... the debate coaches, ... accompany Miss VanGraber and Tierney.

The topic of the championship tournament is the same one that has been argued throughout the past school year: Should the United States adopt a compulsory health insurance program? UVM will debate both the negative and the affirmative.

If the Vermont team should win, it will only be the third time that any college has been victorious twice in this competition, so hopes hang high for the opportunity to become the National College Champion of the United States.

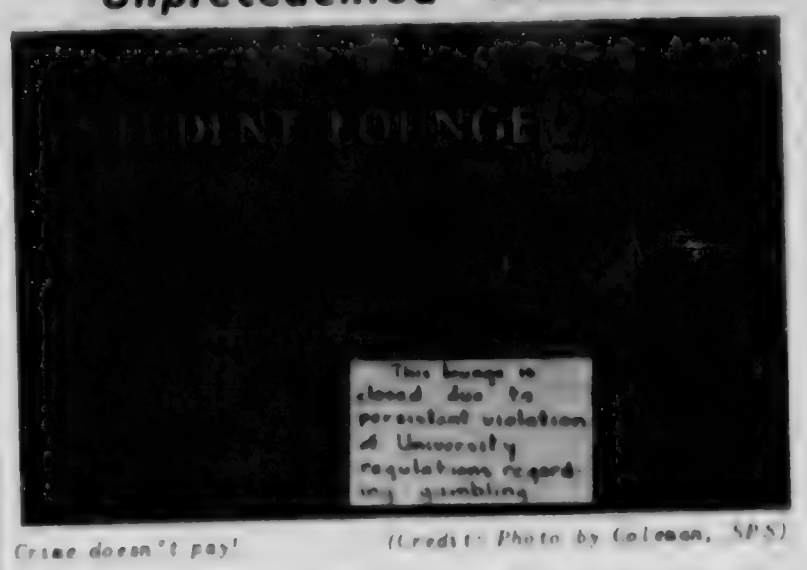
Dean Moser Accepts Professional Challenge

BY DAVID SILBERMANN

... Moser, the assistant ... of men at the University of Vermont, will resign ... effective August 31, 1961. On September 1, he will assume new duties as Acting Dean of Students at New York State University of ... at Oswego. Dean Moser has held his position at UVM since July of 1957.

During his four years in Vermont, Dean Moser has been in charge of men's housing, residence hall counselling, veterans' affairs and senior ... placement. In addition to this, he has taught Evening Division and Summer Courses.

Dean Moser, a native of Lockport, New York, is a graduate of the University of Buffalo, where he also received his Master of Education Degree. He holds the M. S. from Buffalo State Teachers College, and has completed course work toward the Ph. D. at Syracuse University.



The assistant dean of men stated that he enjoyed working at UVM, but the new position offers more responsibility, and since Oswego is planning to double its present enrollment of 23,000 in the next few years, the new post offers a professional challenge.

The biggest change on the UVM campus, that Dean Moser has noticed during his term here, was the start of much needed building projects. He feels that he is leaving this school with a greater understanding of the Vermont philosophy than he had when he entered.

Dean Moser is married to the former Emmajean Wilson, and they are the parents of two daughters, Sandra, 13, and Carol, 10.

Announcement of his appointment at the New York State institution was made March 31, by Oswego President Foster S. Brown.

SA Council Takes Unprecedented Action

Crime doesn't pay' (Credit: Photo by Coleman, SPS)

At its meeting in Thursday, April 13, the Student Association Council voted to close the Student Lounge for the week of April 17 through 23. The action was taken, according to Ted Edgecomb, SA President, because of "flagrant violation of the no gambling rule concerning the student lounge."

Edgecomb said that the SA Council had passed a rule prohibiting gambling in the Student Lounge several weeks ago. This rule, he said, was in accordance with University regulations concerning gambling. Edgecomb pointed out that gambling in the Lounge is "not only illegal, but makes a bad impression on visitors to the University, especially those who are considering attending the University."

Edgecomb announced that the Lounge would be closed from the 17th through the 23rd in the hope that this would be sufficient warning to those who "persist in ignoring the rules of the Lounge." He said that it was regrettable that many who do not misuse the Student Lounge were inconvenienced by those who persist in gambling, and that he hoped that the SA Council's action "would improve" the situation.

The Student Lounge will be reopened on Monday, April 24. Edgecomb, however, pointed out that "if gambling still persists in the Student Lounge, it would be closed again, perhaps this time for a longer period of time."

Professor Bogorad Named English Department Head

Dr. Pope To Do Research

Professor Samuel N. Bogorad was today named to succeed Professor Willard B. Pope as chairman of the department of English at the University of Vermont, effective July 1, 1961.

The appointment was made by the UVM Board of Trustees, which accepted Dr. Pope's resignation as chairman of the department in which he has taught since 1934.

Dr. Pope will be on leave of absence in the next academic year to continue work on a five-volume "Dairy of Benjamin Robert Haydon," and he plans to continue work on the project after his return from leave. The first two volumes of the project have been published by the Harvard University Press. He will continue as a faculty member in the English department, with more time free for research.

Dr. Bogorad joined the UVM faculty in 1946, and has served as acting chairman of the department of English, as acting Dean of the Graduate College, and is currently chairman of the Final Editing Committee of the University's Self Study. He is chairman of the University's Athletic Council, and president of UVM's chapter of Phi Beta Kappa.

He was the lecturer in the University's first televised series of lectures over WCAX-TV, and is the co-author of two books.

A graduate of Brown University, where he received the A.B. summa cum laude, and the A.M., he holds the Ph.D. from Northwestern University.

Dr. Bogorad commented, "My greatest hope is that the department will operate with the same effectiveness that it has under Prof. Pope's chairmanship, and that I will have the same loyalty of the staff that he enjoyed."

He expressed the thought that he wished to continue the Honors Program that his predecessor initiated.

Dr. Bogorad will continue as a teacher as well as an administrator.

Iranian Visitor Expert In Several Fields

Cyrus Kermanj (Credit: Photo by Carr Studios)

by JO ANN BREGSTEIN

Cyrus Kermanj is one of many Iranian students who has traveled across continents in order to study at a university in the United States of America.

Graduating first in his class from the University of Teheran in 1957 with a B.S. Degree in Industrial Management, he came to the U.S. to receive a Masters Degree. After studying English at St. Michael's College, he entered UVM four years ago to pursue the study of Civil Engineering.

Unknown to many at UVM, Cyrus was a member of the Iranian Olympic Swimming Team

Editorial:
We Disagree . . .

One of our correspondents, Mr. Martin of the Psychology department, has informed us in a letter to the editor that he disagrees the value of this year's Vermont Conference. We disagree.

True, at worst, the Conference degenerated into pre-conceived accusations, personal attacks, and obscenity. We confess, we closed it.

These little human failings were not educational in themselves although they did give some insight into the private nature -- public myth controversy. However, we freely confess that we did rather enjoy them.

They were a part of the spirit of the symposium. It was a highly personal conflict, ignited by three men speaking their minds on their very different philosophies. The result was a great deal of honesty: more than we've seen in quite a while. If a by-product was some raised voices, no harm done.

Student Center

The Billings Student Center should provide a base around which UVM students can operate. If the building and its mode of operation are properly planned, the Student Center will kindle a spark for organizations that are now merely smouldering.

The Center can provide a regular meeting place for groups that now meet sporadically and irregularly because of the lack of existing facilities. In an all student atmosphere the meetings may take on new importance and as a result, may actually be more important.

The inspiring circular council room may uplift the Student Association to new heights of vitality and liveliness. The established meeting rooms should give the clubs a familiar home in which their meetings can transcend the stiffness and formality that goes with a strange place. Organizations should be able to swiftly do away with these inhibiting factors and should be able to fulfill their purpose more rapidly and more effectively.

If the Student Center is properly run, there will always be room for non-scheduled meetings, protest meetings, debates, discussions, and the like. The students will know that they can meet for these purposes, and as a result, they will. The new dynamic concept, *student*, may start at the UVM Center just as it has begun at student unions all over the country.

There is something that every person at this school can do to make sure that this dream will be as good as it now looks. Suggestions are being accepted by the SA on how to furnish, construct, and maintain the Student Center. Through these suggestions, the student dream can come true. If student ideas are expressed, they will come true.

At last Thursday's meeting of the Student Association Council, the new SA administration's revision of policies concerning the use of the Student Association station wagon was approved by the Council. The major changes in the policy are as follows:

1.) Requests for use of the wagon will be accepted no more than two weeks in advance of the date on which the wagon is to be used. This, says SA Vice-President Jon Tenzer, will result in "more efficient use of the wagon in terms of the needs of each organization."

2.) An annual check of the list of authorized drivers will be instituted in order that only those who are currently associated with "wagon-using" organizations will be able to use the wagon.

3.) The last organization using the wagon each day will be responsible for returning the wagon to the garage. The wagon will be returned to the garage by 11:00 P.M. when on local trips.

4.) The charge for use of the SA wagon will be increased from 8¢ to 10¢ per mile. This charge, says Tenzer is "more in line with current auto rental charges, and more realistic than the old charge when one considers the hard use the wagon receives." If the using organization does not pay mileage bills promptly, the use of the wagon may be denied it.

5.) Drivers of the SA wagon will be personably responsible for the payment of fines incurred while the car is in their charge.

6.) After long trips, the organization using the car must either clean the car or notify the COSA office so that COSA may arrange for the car to be cleaned.

Quickie

Dear Sue,

Is nothing sacred? Isn't ever again try to set fire to East House (but alert administrators will tear it down in good time. Sue, all in good time.

Your friend,
Ike

Letters To The Editor

Who Is Kerr?

To the Editor:

Who is Jean Kerr? This is the question posed by Mr. M...ig's letter in the March 22 issue of the Vermont Cynic.

Mr. Kerr has been an unselfish contributer to the CYNIC as a music reviewer, as a poem writer and even, on occasion, as a rewriter for the past two years. As a writer, Mr. Kerr's articles have attained a degree of sophistication seldom obtained by CYNIC personnel in any capacity.

Mr. Kerr's "lack of musical ability," is worthy of discussion. Mr. Kerr is a music major at UVM. He is an accomplished organist, who gives recitals at various places throughout the state from time to time. His "lack of musical knowledge" covers perhaps, the field of popular music and rock and roll. Mr. Kerr, however, knows and knows well all facets of classical music. His particular specialty in this field happens to be chamber music.

Mr. Kerr is aware that the majority of his readers are not as well versed in the arts as he is. Mr. Kerr takes this into consideration in his articles. Therefore, instead of announcing that the lead violin was, say, a quarter tone (whatever that may be) flat, Mr. Kerr says that the violin made "queer noises". This is true. And only a few persons are really interested in a scientific discussion of the "queer" noise, its cause and its cure.

Mr. Kerr is afflicted with an incurable disease -- a sense of humor. A statement referring to the "traditionally neurotic" state of musicians is not meant literally. I now explain it as a bit of humor. Those who have the ability to appreciate humor; read and laugh. The rest of you are hereby warned to skip Mr. Kerr's articles from here on in.

Mr. Kerr has discussed the impoliteness of the audience to the extent of (count 'em) 172 words. This, I assert, is necessary. Lane audiences are notorious late comers. And for some reason the ushers and the Lane Committee never seem to realize that this annoys not only those who arrive on time, but the performers as well. The Chamber Arts Series, I feel, require an extra amount of attention to the artist. What could be more disturbing than the clomping of some flat-footed cow (or bull) in the middle of a piece? If Mr. Kerr's 172 words forces recognition and cure of the latecomers problem, 172 words is none too much to spend on the question.

Only one question remains. Who is Mr. Billig?

Sincerely,
David H. Steele

Speakers Petty

To the Editor:

A few comments on the recent Vermont Conference, particularly in connection with the Thursday evening session, seem to be in order. This can be discussed in terms of the messages, men, and persuasions presented. In terms of messages I learned that we are either progressing towards an ad-man's utopia or retreating to the womb and that in either case we had better do it with morality. About the men I learned that one is young and afraid, one an overgrown juvenile delinquent and the third appears to have read Aristotle, but very little else. I was persuaded that what the guest speakers lacked in profundity they more than made up for in name calling, evasion and just plain vulgarity. In an insane arrogant concrete-positive pragmatistic materialistic moral immoral [illegible] bogeyman.

Sincerely,
R M Martin
Psychology

Babysitters. A. ?

To the Editor:

Many thanks for Dean Kessell's assistance concerning chaperones.

The Faculty Handbook rather interestingly defines the role of the chaperone. Evidently he is a guest, and according to the handbook, "Should be neither policemen nor proctors, nor are they held responsible if laws and regulations are disregarded by students who are present." This is very nice, as it releases the chaperone from any responsibility for anything which may happen. In other words, all one must do is to find a chaperone who *himself* does not believe that, say, drinking or extramarital cohabitation are necessarily the wrong things to do at a party -- since the handbook explicitly states that chaperones "should call to the attention of the students in charge of the party, those conditions which *they feel* are unsatisfactory, or in poor taste." Now, obviously, the above-mentioned are, as far as the administration is concerned, grevious sins, and could subject both the individuals and the organizations concerned to dire penalties. Therefore, our group establishes a watch whose duty it is to warn the transgressors when "the dean and his boys" approach.

We are called upon, by the Faculty Handbook, to believe that forbidden pleasures, as the chaperone is concerned, are limited to those things which the *chaperone* feels are unsatisfactory or in poor taste. Theoretically, then, one has only to find a cooperative chaperone.

Now, the administration and WCTU can hardly be so intemperate as to let things rest on this amoral basis. This, you see, permits, if not encourages, all sorts of sins. So we read the Handbook a little further. The sentence states "Now, the chaperones are expected to obey the spirit and the letter of University regulations." this means that the can sin as long as the one approves. It also that the poor chaperone commit the same sins same time. This is an on the part of the administration to drive a wedge the student and his chaperone. Nasty business you ask me.

But let's not let a thing go. Back to that quote. What exactly are the 'University regulations' No one, I am sure, has all in mind. And I have to see a chaperone at a social function bearing volume entitled Complete versity Regulations. I that any chaperone ever heard of most of the regulations he is expected to Therefore, is it not for the administration "get" a "friendly" one who does not disapprove in something and then does not find it necessary to express disapproval.

Chaperones beware! The poorly worded Faculty Handbook a trap. If you don't play with the 'boys", they'll you for smoking in the or using bad language in presence of females (W does it matter that they female rats?), and lose all you've worked for your tenure and your right hold an immoral opinion.

Sincerely,
David H. Steele

Tighten Rules!

Dear Sir:

The Executive Committee the Extension of Parietal Authority of the University Vermont wishes to announce following revisions of rules for women students:

I. Increase in number functions of housemothers

A. Ratio of housemothers students will be 1:5

B. Functions will be

1. To see that each girl duly tucked into bed at allotted time for personal ablutions

... Suburban North ...anned blackface ...es by schools ...unts that they ... offensive to ...ents.

...es upon a subject which was a matter of some ... here at UVM in ...954 when The CYNIC conducted an editorial campaign against ... blackface by Kake Walkers. Judging from letters which appeared in The CYNIC ..., is a matter about which some people can get rather excited. A short-lived ... to The CYNIC was ... apparently be-... dissatisfaction with the CYNIC editor's viewpoint.

Mr. Maher, of the Sociology department, reopens a perennial UVM controversy.
(Credit: Robert Coleman, SPS)

...ly happens when people get excited the dis-...oved away from the question at issue toward ...ves of the participants. The net effect of the ... was, obviously, no change in the status ... It might be maintained that since the matter was ... and settled in 1954 there is nothing further ... now.

...decisions to the contrary notwithstanding, there ... a few faculty members who strongly object to the ...face and a few others who would just as soon see ...minated but do not have very strong feelings about ... The two groups combined would not come close to ...stituting a majority of the faculty in the opinion ... the writer.

To obtain some measure of student thinking four sociology classes were subjected to a brief poll. Responses were shrouded in anonymity as befits such undertakings. None of these students were Negroes. Sixty-two students were involved. Thirteen felt there was a justifiable reason for Negroes to be offended by the blackface. Thirty-seven felt there was not and the remainder (twelve) didn't know, were ambivalent or otherwise responded in a way which prevented their being classified in Yes-No terms. Forty-three felt that Kake Walk would lose an essential feature if blackface were eliminated. Twelve did not think so. Only four had reason to think that anyone outside the UVM "Family" reacted negatively to the blackface.

Interestingly enough, considering that thirteen felt that Negroes had a justifiable reason to object to the blackface, nine said that they would vote to eliminate blackface in a hypothetical referendum where the choice was between eliminating or retaining blackface, all else about Kake Walk remaining the same. Forty-nine would retain and four were undecided.

This was an available sample and not one which could be assumed to be representative of the student body as a whole. Therefore no generalizations are intended. It is clear that only a small minority of those polled have any quarrel with existing practices. The objections, judging from the explanations given by the students for their answers, seemed to be based on one or both of the following factors. Blackface is insulting and it perpetuates an unfortunate stereotype. Support for the blackfaces was based on the ideas that there is no offense intended, it is a traditional part of Kake Walk, and it helps conceal the identity of the walkers.

To take the last point first, informal discussions with a few students reveal varying estimates of how

(continued on page ten)

McArthur And Davison Newly Published

Two University of Vermont professors have recently had works published.

Herbert McArthur, associate professor of English, has a critique "Tragic and Comic Modes" appearing in the Winter issue of Criticism, a quarterly for literature and the arts published by Wayne State University. "Attic Geometric Workshops" is the title of the book that has been published in the Yale Classical Studies, Volume 16, by Jean M. Davidson, assistant professor of Classics.

In his essay, Dr. McArthur has not concerned himself with tragedy and comedy as merely literary forms, but has considered them as ways of looking at life as a whole and uses plays of Moliere, Synge and Shakespeare as examples.

He goes on to say that "comedy and tragedy refer to particular human values not directly, but indirectly, by taking up these values into the whole system of values of which they are a part. The essential job of comedy is to keep a given system of values in proportion; the comic spirit does not challenge the system, but rather calls attention to inconsistencies and lack of proportion within it. Tragedy, however, challenges one system of values in the name of another; it must break the circle of one order so that the presence of another more inclusive one will be felt."

Miss Davison describes a series of new workshops of Athenian figured vases of the eighth century B.C., closely associated in their decoration. She explores the possibility of stylistic connections, not only among the new groups themselves, but also with the Dipylon style and the late geometric vases designated by M.M. Cook as links in the progression toward the Orientalizing style. She also established a chronology for the development of the Geometric style.

Dr. Davison recently received a diploma in Etruscology and Italic Antiquities from the University for Foreigners in Perugia, Italy. She took a seminar there in 1959 and presented her paper on Italic Grave-Groups the following year. Miss Davison is currently working on this subject based on material in the Chicago Natural History Museum and plans to expand it for publication.

STUDENTES

David Price, a sophomore from Norwich, Vermont, speaks his mind on a subject of growing controversy.
(Credit: Robert Coleman, SPS)

"I do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; and that I take this obligation freely, without any mental reservation or purpose of evasion; SO HELP ME GOD."

This is the oath which every ROTC student must take. It is similar to the one required of all applicants for National Defense Loans. It is similar to the one which every service man must take on being discharged. In fact, it is almost impossible to go through life without meeting some form of this oath.

I am bothered by two questions. First, does the government have the right to ask any person to sign this oath; and second, can any person do so conscientiously?

With respect to the first question, let us consider the Fifth Amendment to the Constitution. This states that no person shall be made to testify against himself. But if a person refuses to sign the Loyalty Oath, is he not testifying against himself? I am sure that the government would assume that he is, for otherwise, he would not be asked to sign. It seems, then, that the government is invading the guarantees of the Bill of Rights whenever it asks an individual to take this oath.

The government has tried to duck this accusation by inserting the clause, "I take this obligation freely;" but the work "freely" is a mockery. When the individual is forced to acknowledge his freedom, what freedom can he have?

The government's position is even more untenable because of the concluding words, "SO HELP ME GOD." The First Amendment guarantees religious freedom. Thus, members of religious groups who are unwilling to "swear"

(continued on page eleven)

The Circular File

by MIKE GROSSMAN and DICK SNIDER

Ever hop on a New York subway and take a good look around? We did, and we haven't recovered yet. Like death row, automaton faces embalmed in a shell of apathy. Or maybe it was just a kind of grim courage they had, waiting for their oncoming slaughter at the hands of the mob crowding out the door.

This incident is of no earthshaking importance, except that their facial expressions, or lack of them, reminded us all too much of the faces in UVM's classrooms. Either there are a lot of stoic philosophers here or some students are sleeping. Something is missing, and it's not No-Doz. We seem to lack a sense of purpose; why can't we get interested, or angry, or take a stand for something, instead of stagnating passively?

The answer to this question lies in the effects wrought by a new cult which has been frequenting our campus: the cult of apathy. Its members embrace the doctrine of indifference, and for them, the second best is good enough. Their goals are leisure, security, and material success. Their influence is becoming more and more pronounced, not just at UVM, but throughout the country. These gu -- ys are syndicated! They are infecting UVM, causing what Claude M. Fuess calls our "retreat from excellence." We are proud of being citizens of a recognized leader among nations, but more and more we wonder how long we will retain this leadership. If we do lose it, our fall will not be administered by a barbaric nation as happened to Rome. No, our conquerers will win because they are a morally stronger and educationally superior people. Their "fifth column" will be our mediocrity.

It is our responsibility to knock out this "cult" before it gets any bigger; before it grows so far out of proportion that we are powerless against it. In order to knock it out, we've got to stop the joiners from ridiculing and discrediting anyone with whose views they disagree. We must be free of this ridicule for exploration and questioning at UVM. The cult's members are not interested in exploration. All they want is to get a paper that says "degree" as quickly as possible, and later to retire to a life of material complacency.

The University has a lot to offer and so much for us to gain, we we only can rid ourselves of the cult's apathy. Let's get a purpose: to rout this "retreat from excellence." We have to discourage attitudes which permit indifference to the second-rate, and encourage those which demand excellence. Our standards should be geared for those who pursue achievement for its own sake instead of for those who achieve for their own sake; for those who excel rather than for those who exist.

UVM Calendar

THURSDAY, APRIL 20
University Senate - Hills Auditorium - 4:30 P.M.
Music Dept. Lecture - Student Lounge, Waterman - 4 P.M.
IFC Lecture: *Fraternity-Administration Relationships.* 240 Waterman - 7:30 P.M.
Newman Club, Monthly Meeting. Discussion subject: Mixed Marriages. Newman Center. 7:15 P.M.

FRIDAY, APRIL 21
IFC Chariot Race - Redstone Campus - 4:30 P.M.
IFC Jazz Concert - Memorial Auditorium - 8 P.M.
SC Movie: *Kismet* - Southwick Gym - 8 P.M.
El Circulo Espanol Meeting: Panle, "Hands Across the Border" - Southwick, N. Lounge. 7:30 P.M.

SATURDAY, APRIL 22
Dancing - Memorial Auditorium - 8 P.M.
Varsity Tennis - New Hampshire - here - 2 P.M.

SUNDAY, APRIL 23
Mass - Ira Allen Chapel - 9 A.M. & 4:30 P.M.
Protestant Worship Service - Ira Allen Chapel - 11 A.M.
Varsity Brunch - Installation of Officers - Waterman Coffee Shop - 11 A.M.
Theatre - 8 P.M.

MONDAY, APRIL 24

TUESDAY, APRIL 25
Lane Series, Chamber Arts: Robert Frost - Ira Allen Chapel - 8 P.M.

WEDNESDAY, APRIL 26
Outing Club Meeting: Speaker. Student Lounge - 8 P.M.

Scholarship Awarded

Donald Harrison Steyert, a Junior at the University of Vermont, Burlington, Vermont has been selected to receive the Ralston Purina Scholarship Award for 1960-61, according to an announcement made in St. Louis by J.D. Sykes, Vice President of the Ralston Purina Company.

The Purina Scholarship amounts to $500. It is awarded each year to an outstanding Junior in each of the 50 land grant colleges in the United States and in one Puerto Rican and three Canadian agricultural colleges. Winners are selected at each college by a faculty Scholarship Committee on the basis of scholarship, leadership, character, ambition in agriculture, and a desire for financial assistance.

Donald Harrison Steyert is the son of Mr. and Mrs. Harrison Steyert of Orwell, Vermont.

Festival Of Fine Arts Launched By Orchestra

(continued on page nine)

Vermont Conference First Post Mortem

Professor Sibley reflected that it takes little effort to withdraw from the world, and assume a spiritual person-as Mr Delattre does, or to "play the professional gadfly" as Mr. Goodman. "The real difficulty is to live in the world and still be creative." Despite the diversion of speakers he acknowledged a tremendous consistency in this year's conference which had been lacking in past years.

In the audience participation, which followed this panel discussion, one student observed that the conference created a metamorphesis, in which most emerged from their state of apathy "very much alive, alert, and aware of the topics being discussed." But where were the members of the administration who comprise the backbone of the "University Family?"

Many worthwhile suggestions were generated in this Post-Mortem session. It was brought up that, perhaps the three days of the Vermont Conference might be class free in order to allow the students and faculty to reach the speakers and converse with them in a more lucrative way. As Mr. Schearn expressed it; "an intellectual Kake Walk." Someone proposed the idea of having a shadow panel of faculty members to "perform" on the same topic as the speakers. A proposal was made to have small Vermont Conferences throughout the year in order to create a better communication between student and faculty.

The Vermont Conference, as it represents the whole student body, is an important organization at UVM. This year's series was of particular significance because it dealt with values and ethics, a subject upon which both student and faculty can communicate.

UVM Band To Present Concert Tonight

The University [illegible] Band is presenting [illegible] concert tonight in [illegible] Allen Chapel.

The guest soloist [illegible] session will be Harry [illegible] a master of the bari[illegible] At the concert Mr. Bra[illegible] play several solos and [illegible] numbers, using Band [illegible] niment. This after[illegible] Brasch will hold a [illegible] 4 P.M. in the Chap[illegible] will be open to all [illegible] and students playing [illegible] brass instruments.

The University Band, [illegible] membership now tota[illegible] 70, has participated [illegible] in campus functions [illegible] year. It provided [illegible] entertainment during the [illegible] times of football game[illegible] fall, and played its [illegible] role in adding to the [illegible] spirit of Kake Walk [illegible] ter. In addition to s[illegible] this Concert, the Ban[illegible] to provide music this [illegible] for Military Review, [illegible] of 7 high schools [illegible] state, and Honors Day.

Selections that wil[illegible] played at the Concert t[illegible] under the direction [illegible] Herbert Schultz, [illegible] French Quarter by Joh[illegible] rissey, the Coronation [illegible] from "Boris Godounow" [illegible] Moussorgsky, Second Sy[illegible] for Band by Frank Er[illegible] US Steel Suite by B[illegible] Green, Midnight in Paris [illegible] Conrad and H. Magidson, A[illegible] letic Festival March by [illegible] Prokofieff, and Flower Dru[illegible] Song by Rodgers and Ha[illegible] stein.

Tickets are available a[illegible] Book Store, at any [illegible] music store, and from al[illegible] members. The price is $.[illegible] students and $1.00 fo[illegible] others.

Dance Group Lauded As Worthy "Contact With Art"

An art form of debatable aesthetic value was presented by Merce Cunningham and Dance Company on April 14 at Southwick Auditorium.

The performance, one of a number in the Lane Chamber Arts Series, provoked a variety of reactions from the audience. The drastically modern nature of the dance precluded artistic communication for many. Some professed a true enjoyment of the experience, while others laughingly mocked the weird movements of the dancers. Underlying these individual responses, however, was an element of interest, created by the contact with novelty.

SOUND AND COLOR

A description of the troupe's venture into the realm of the "way out" includes such oddities as movement accompanied by only an occasional plucked piano string, punctuated with a jangling slam of the top of the instrument. The solid colored leotards of the dancers represented the entire spectral range and were essential to the ostensible harmony created through line, movement, and pattern.

The classically-oriented members of the audience may have been disconcerted by such unconventional solo dance titles as "at random", "a meander", "transition", "willfulness", "extended moment", "excursion", and "meetings". These comprised the recital Suite For Five. "The events and sounds of [illegible] which) revolve around a [illegible] center, which, though [illegible] and unmoving, is the [illegible] from which they happen." [illegible] execution of this selec[illegible] was characterized by the [illegible] conformity of movement [illegible] rhythm suggested by the t[illegible]

EVALUATION

In an attempt to eva[illegible] such a performance, it [illegible] nature of the art form [illegible] must be emphasized, no[illegible] technical execution. As [illegible] been mentioned, the per[illegible]ance failed in artisti[illegible] emotional communicatio[illegible] some. This may be du[illegible] part, to the bizarrene[illegible] the dance and the conse[illegible] intellectual, rather [illegible] emotional, preoccupati[illegible] the viewer. When one [illegible] analyzing a phenomenon [illegible] its elements, he is no[illegible] ceiving the meaning wh[illegible] inherent in the synthe[illegible] the parts. For this s[illegible] of the audience, there[illegible] there was value in the[illegible] tact with a new f[illegible] artistic expression an[illegible] wonder and interest [illegible] such an experience evok[illegible]

Perhaps a more valid [illegible] for maintaining the wo[illegible] this performance is th[illegible] action of those who we[illegible] too overawed nor too q[illegible] their rejection. The aes[illegible] enjoyment of these [illegible] combined with the [illegible] amazement of others, [illegible] prised an audience re[illegible] which indicates a wor[illegible] contact with the art [illegible] dance.

What's it take to make the right connection?

Plants! Consider the problem Western Electric manufactures the switching systems which connect some 60 million Bell telephones throughout the U. S. The average call over today's electromechanical system requires 120 relay operations. All together, this interconnecting equipment makes up the heart of what is, in effect, the world's largest machine.

That's where Western Electric and you come in. The switching equipment for this "machine" involves an enormous manufacturing job carried on by our plants throughout the country. Because of the size and variety requirements involved, we engage closely in planning the overall flow of telephone manufacturing. The size of this job presents an unusual challenge to the engineer who can save the Bell System many thousands of dollars by even a small reduction in cost.

While today's switching calls for a practical engineering approach, it will be even more exciting for tomorrow's switching. For instance, Central Office is under Bell test and promises to simplify the world of telephone. Future Western Electric engineers, working closely with their counterparts at Bell Telephone Laboratories, will concentrate heavily on developing manufacturing methods for this ECO equipment.

Your Western Electric assignments may cover many of our other responsibilities as the world's leading communications manufacturer. Perhaps you'll work on advances in microwave transmission, or even on satellite communications.

Joining Western Electric may well be your right connection.

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers as well as physical science, liberal arts, and business majors. For more information, get your copy of "Western Electric and Your Career" from your Placement Officer. Or write College Relations Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. And be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

SCOPE, the Cultural Activities Committee of the Student Association presents: Dr. [illegible], Dr. Gregg, Dr. [illegible] and Dr. Torch, in a SYMPOSIUM ON EDUCATION AT UVM on Thursday, April 20, 1961 at [illegible] P.M. in the Student Lounge. A question and answer period will follow. This is the first of panel discussions to be presented by SCOPE.

STUDENT AID NOTICE

Applications for financial assistance for the 1961-62 school year must be filed by May 15.

Men should obtain the application material from the office of the Dean of Men and women from the Office of the Dean of Women. The completed forms should be returned to the respective offices.

To be eligible for aid, need must be shown. A minimum average of [illegible] for this semester is required for a scholarship and an average of 72 for a loan.

Harold C. Collins
Chairman

The Peace Corps has announced that questionnaires have been prepared for persons interested in applying for service. The questionnaires can be obtained at the local Post Office or by writing to the *Peace Corps, Washington 25, D.C.*

It has also been announced that a Peace Corps bulletin will be distributed to college newspapers periodically and will be included in the CYNIC.

Hear THE TOP

"Top 10" in Vermont
on WRUV's
"Boppin with Bobby" Show
on Monday 7-9 P.M.

HOTTEST TOP 10 AT 8:05

The Vermont Conference Committee is considering people for the 1961-62 committee and would like to urge anyone interested in being on next year's committee to come to a meeting on Thursday, April 20, from 4 to 5 in room 264 of the Waterman building. If you are interested, but cannot make the meeting, please contact Cristy Borgmann before Thursday night at 7:00.

ATTENTION ALL FRESHMEN

A Class meeting for all freshmen will be held Thursday, April 27, 1961 at 7:30 P.M. in room 239 Waterman Building.

Election of 2 boys and 2 girls to the class executive council will be held. Both the nominations and the voting will be at this meeting along with a discussion of the Freshmen Class Spring Party.

Peace Corps

(continued from page one)

Language training will be part of the Peace Corps training program.

Seventh, the Volunteer must be in excellent physical condition. Living for two or three years in an underdeveloped rural tropical condition will require Volunteers to be in tiptop physical shape.

Eighth, the Volunteer must understand what he is doing and why he is serving his country in the cause of world peace.

"Men and women over 18 meeting these standards will be welcomed into the Peace Corps," Sargent Shriver, the program's Director said. "At a critical point in history," Shriver said, "The President has placed an important and difficult task in the hands of our nation's young people. The success of the Peace Corps depends on how well they meet the standards set for them."

Agriculture Scholarships

A foundation to provide [illegible] and other benefits for students in agriculture has been established by Alpha Zeta, national honorary agricultural fraternity.

It will receive gifts and bequests from donors and will use the proceeds to promote the study and advancement of the many specialized fields of agriculture.

In announcing establishment of THE NATIONAL ALPHA ZETA FOUNDATION OF AMERICA, INC., Dr. [illegible] L. Madsen, High Chancellor of the Fraternity, said, "This is a most significant step forward for Alpha Zeta and the agricultural sciences. Rapid advancement of all phases of our agricultural industry has increased the need for young men, well trained in its scientific developments. This foundation will help to expand the training program." Dr. Madsen is Director of the Institute of Agricultural Sciences, Washington State University, Pullman, Washington.

Dr. Madsen and the four other members of the Alpha Zeta High Council met in Washington, D.D., in March to develop a program for the Foundation. Other members of the High Council, which serves also as the Board of Trustees of the foundation, are: High Censor Fred LeCrone of Oklahoma State University, High Scribe Bruce R. Taylor of the University of Arizona, High Chronicler Harry G. Cockrum of Montana State College, and High Treasurer C.B. Gilliland of the U.S. Department of Agriculture.

The National Alpha Zeta Foundation was established by representatives of the Fraternity's chapters during their 1960 Biennial Conclave at Oklahoma State University. It was incorporated in Washington, D.C., and its headquarters are in the Fraternity's national office there.

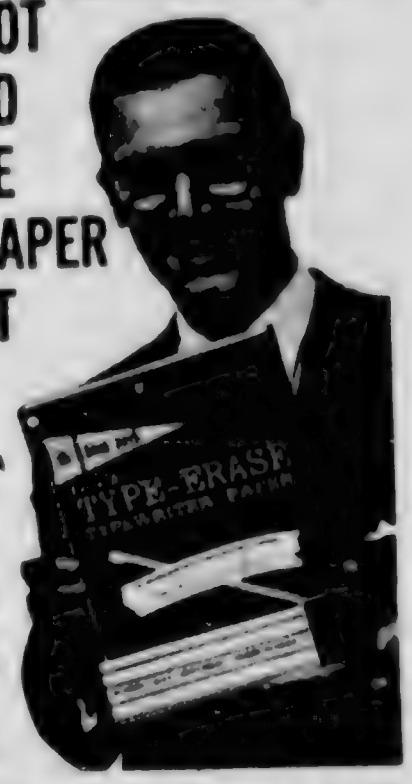
by the members of President Kennedy's cabinet.

The Lane Series Office has announced that because of the popularity of Mr. Frost at UVM there is only a limited number of tickets remaining. These can be obtained in Room 142, Waterman.



Poli Sci Majors Visit Canadian Parliament

On April 12, 13, and 14 the Political Science Department sponsored its annual trip to Ottawa, capital of Canada. The group, consisting of Professors Haugan, Thompson and fourteen students under the able direction of Professor R.J. Sickles made the trip by train, leaving on Wednesday afternoon and returning late Friday night. Accommodations were at the Chateau Laurier, conveniently situated opposite the Parliament Building.

Thursday, the group sat in on two committee hearings and attended the afternoon session of the House of Commons. A highlight of the day was viewing the parade of Commons officials to the Chamber in ceremonial hats and gowns, all preceeded by the massive golden mace, symbol of Parliament sovereignty. The afternoon concluded with a guided tour of the Parliament Building and Tower. A favorite for everyone was the colorful presence of the Canadian Royal Mounties in their scarlet jackets, guarding the government buildings. That evening Mr. Montgomery, Assistant Clerk of the House, entertained the entire group at his home. He explained and clarified the proceedings observed by the group that afternoon and pointed out many internal aspects of Canadian government.

On Friday, an early morning excursion was made by some of the professors and students to the Canadian Mint. Later, special lectures on the workings of Parliament were given to the group by Parliament officials. A special happening of this day was the arrival of the Prime Minister of Greece on an official visit to Canada. Some of the students watched his entrance to the House of Commons and the special welcoming address delivered by Prime Minister Diefenbaker. That afternoon the agenda included a visit to the Supreme Court of Canada and a final lecture before the return trip to UVM.

NOW! WE'VE GOT FAMOUS BRAND EASY-TO-ERASE TYPEWRITER PAPER AT THE LOWEST PRICE YET!

Now at a new, money-saving low price, we have fine quality Eagle-A Type-Erase — the paper that's famous for cleaner, faster typing and easy erasability. At the touch of a pencil eraser, typing errors "wipe" right off the surface of Type-Erase, leaving no mark. Saves time . . . makes your work neater. Comes in a budget-priced pack of 100 sheets, 8½" x 11", in medium or heavy weight, plain or 3-hole punched. Free with every pack — a Letter Placement Guide to help you type neater letters and reports.

EAGLE-A TYPE-ERASE

. . . the paper that erases perfectly with a pencil eraser

Made by American Writing Paper Corporation Holyoke, Mass., manufacturer of Eagle-A Bonded Typewriter Papers

UVM Dance Workshop Demonstrates Techniques

[illegible] introduction to the [illegible]unningham Dance Company performance, Orchesis [illegible] lecture and demonstration [illegible] the various dance techniques.

[illegible] Hirshland and Diana [illegible] who studied modern [illegible] last summer at Connecticut College, explained [illegible] different modern dance techniques first to Orchesis members later at the demonstration. This was simplified by the fact that Petie had studied with Cunningham him-[illegible].

[illegible] choreographed a dance showing the different techniques of Weidman, Limon, Graham, and Cunningham. The idea was to show how simple exercises, learned in even the most elementary dance classes, could be choreographed into a dance. The forms most similar and most dissimilar to Cunningham were emphasized. The lecture was written by Petie, who explained the value of exercise, and Miss Carol Schelper, who discussed modern dance in general.

Those who participated in the exhibition were Brian Reynolds, Dick Pearlstein, Phyllis Babbitt, Eve Solomon, Sally Buerman, Marsha Snyderman, Carol Mable, Diana Jordan, and Petie Hirshland.

OXFORD for
comfort . . . quality . . . appearance

The rich texture of fine oxford skillfully tailored gives the assurance of being well-dressed. Case in point: the Arrow University Fashion B.D. with the authentic roll of the classic button-down. Playtimers Tour North Country With "The Farmer And The Fox"

By HOWLEY [illegible], JR.

Playtimers take a break after a hard day's work. Left to right: [illegible], Marie [illegible], Fred Laberge, Joan Hirshfield and Mary Bergmann.

Staff Photo by P. Stein, Jr.

PREPARING FOR TOUR

[illegible] for the tour began [illegible] when Director Charlie Lemas, who was to be [illegible] announced upon returning a week before the last [illegible] that [illegible] were to be held and that [illegible] Farmer and the Fox. [illegible] Lemas himself was to play the [illegible] Playtimers and Fred LaBerge were cast as Lotus Blossom, a Chinese maiden, and her father Wing Ariden. Joan Hirshfield was given the part of Wanderlu, a [illegible] character and Marie Mahe was to play Mr. Ling, [illegible] servant. J. Bill Irwin had the part of the Property Man, a type of Chinese character. In addition to the cast, we were fortunate in having Robert Hatch among us technician for the tour.

Since this was to be a children's play, we still attempted to perform it with an air of authenticity, and this entailed building a Chinese costumes underwear. As this was the first Chinese play that the University Players has done there were absolutely no Chinese costumes already built, and this put quite a strain on our tiny budget.

The first nine rehearsals started, and by the middle of March we were ready to begin building our scenery and costumes. All of this was done by the tour members, with the invaluable help of a few very generous individuals.

Four members hurriedly make up for the show in Granby.

Credit Photo by P. Stein, Jr.

After one week of comparatively [illegible] work, and five hectic days and even nights the play, despite a very tired cast, was ready for the road. The sixth annual PLAYTIMERS tour was ready to go.

THE TOUR BEGINS

Thursday, March thirtieth was a bright cheerful day. We arrived at the Adams School in Burlington and were shown to a small kitchen, which was to be our dressing and [illegible] room. Despite all of our fears, from the moment that the curtain went up, we knew that the play was a success. This was proved to us by little girl who came up to us after the show and said "Was she really a real Goddess?"

The next day we all piled into the S.A. wagon and the Jensie car and headed for our first tryout performance at White River Junction. After the show we were invited for lunch in the school cafeteria.

Some pupils pose with members of the cast of the Adams School in Burlington. Standing in the back are John Hirshhomer and Paul Richardson.

GRANBY

Thursday afternoon we played a Granby, again. From the very start it seemed as if there were something different about this audience. They weren't as restless during the [illegible] parts of the show, and they laughed and clapped more than any previous audience. When the show was over [illegible] an extra curtain call, we were astounded to hear the principal make a short speech and then, with a warning, three rousing cheers for PLAYTIMERS swelled up from the audience. Before we could completely recover from this we were escorted back to the dressing room, where they had homemade bread and coffee waiting for us. They even gave us towels and soap for showers, something that we all really wanted after spending most of the day under heavy stage makeup.

From Granby, we went to Montreal to celebrate. To add an authentic touch to the tour, we had dinner in Chinatown, where we all got very little to eat because we had agreed to eat with nothing but chopsticks.

IT'S ALL OVER

The next day was Middlebury and Putney, and Saturday we had another show here in Burlington and one in Jericho and then, all too soon, it was all over. In a matter of a few hours the costumes and scenery were all put away, the cars were returned, and we all returned to our respective dwellings to reminisce about the Sixth annual PLAYTIMERS tour and, for those of us who will still be here, to plan for the seventh.

VERMONT LAWMAKERS SEE 4-H DEMONSTRATION

On March 22, 1961, 4-H members from all over Vermont met at the state's capital at Montpelier and demonstrated two farm practices on the floor of the House of Representatives.

Scene and Heard

by Sue Levinsohn

CLOUD NINE

Lucy Sellen, Alpha Chi, was recently pinned [illegible]. Ike Tatem, Sig Ep, visited the AEPi's on [illegible]. Jim Wadsworth also is pinned to Bob Gero [illegible], Sig Ep, has pinned Jeannie Cutler, [illegible]. Heller accepted the pin of Joel Goldstein[illegible] Kappa at Williams.

Three AGR's have pinned their girls: Bruce Hartford to Norma Martin, Ken Seltzer to Sandry Smith and Dale Burroughs to Ann Moros. Diane Landry, ADPi has announced her engagement to Bill Brigham, Phi Delt. Two Theta Chi's took the big step to the altar over vacation: Lance Meade was married to the former Joyce LaBelle and Frank Suitor to the former Betty Davis.

Mr. and Mrs. Dick Upson, Theta Chi, are the proud parents of a baby girl. Nancy Barber, Theta, has just become engaged. Joyce Fletcher, Theta, is sporting an Acacia pin -- John Mills'. Elise Mueller of Alpha Chi became the fiance of Pete Snyder, '60, over Easter. Carol Abbot, '60, is engaged to Court Spicer of the chemistry department.

Jackie Humphreys, Pi Phi, and John Simonds, Delt Psi, announced their engagement over the vacation. Lew Sherman of Theta Chi forfeited in a contest to see who could date the greatest number of girls when he forfeited his pin to Pat Boyce. The Owls have been busy lately. George Cronk is pinned to Ruth Nunamaker, '63, and Carl Buffum to Judy Antonovich, '62.

PARTY LINE

Theta is proud of the smashing success that the Theta-Delt Pledge Tea turned out to be. Sigma Nu's South Sea Island Party was a huge success. All came appropriately dressed to the beach scene and drank "Island Liquor" from the coconut drinking gourds. Theta Chi's pledge party on March 24 was well organized, particularly the skit which satirized the mannerisms of the brothers. In the shadows of obelisks and pyramids, Acacia held a party which is traditional to Acacia chapters all over the country - a Night on the Nile. Phi Sigma Delta visited AEPhi for a dessert hour on March 23. Bonnie Bixby and Doug Marks as Devil and Angel won first prize at AEPi's Suppressed Desire Party. The Owls want to thank Gamma Phi for the exchange dinner and dessert hour. The campus "beatniks" all gathered at Phi Sigma Delta Saturday night for a terrific pledge party.

POTPOURRI

Theta Chi won the intramural volleyball championship by defeating Delta Psi in the finals. Members of the victorious team were [illegible] dinger, Buzz Stone, [illegible] gey, Tom Sherman, [illegible] and Paul Choinere. [illegible] Edgecomb, president [illegible] gave an informal talk [illegible] on the functions of [illegible] government . . . The [illegible] celebrated their [illegible] niversary this past [illegible]. There was a Ball held [illegible] night. The open house [illegible] was climaxed with the [illegible] of the magnificent [illegible] ing of the Owl House. [illegible] program at the banquet [illegible] day night included Dean [illegible] ford, speaker, Harris [illegible] MC, and Doctor Jarvis, [illegible] of the 84 week best [illegible] Folk Medicine. At this time the annual rotating trophy given by the Owls to the outstanding sorority of the year, in commemoration of the 125 years of fraternity life was presented to Marge [illegible] man, President of Panhellenic Council

AGR's green and gold jackets have arrived and can be seen everywhere on campus . . . Phi's auction sale, with auctioneers Tom Eldridge and Joe Baker of Kappa Sig, was quite the success . . . AEPhi pledges are doing a terrific job in redecorating the study room. . . . The ADPi's are looking forward to a visit from their province president and also from their Grand First Vice President . . . Sigma Nu's ski team brought home top honors in the IFC Ski Meet . . .

Greek Week has been busy but successful so far. Monday night's Banquet, the sorority exchange dinners Wednesday and the discussions of fraternity problems combined the social and business aspects of the Greek organizations. Everyone is welcome to attend the Chariot Races Friday afternoon, the Jazz Concert that night, where the Greek Week Queen will be chosen, and the Annual Interfraternity Sing Saturday night. Greek Week will end Sunday with the Panhellenic Workshop.

Greek Week Jazz Concert To Feature Limeliters

In an age of standardization and trend following, the ...eliters, RCA Victor's new ... recording artists offer ...W Friday night, a refreshingly different blend of ... and instrumental folk ... combined with a rare ... of hilarity that they ...scribe as "institutional ...re". Praised by *Variety* ... "sharp and hip to the ...", their wide appeal is ... on the rousing enthusi... of their traditional ... material combined with ...phisticated, up-to-the ...'s humor. Their unique ...angements are belted out ... a hard-driving style ... has prompted one critic ...mment that "they make ... voices sound like six."

Fresh from a sparkling ... on the Ed Sullivan ..., The Limeliters are ... becoming one of the ...anding groups of their ... in the country. Although ... for only a little ... than a year they have ... on the Dinah Shore ... Show, in concerts with ... Tanner, George Shearing and Shelley Berman, on a national tour with comedian Mort Sahl, in the Hollywood Bowl with Eartha Kitt, in L.A.'s Greek Theater and San Francisco's Geary Theater with singer Johnny Mathis, and in such top night spots as San Francisco's hungry i and New York's Blue Angel, the Village Vanguard and Roundtable, and Chicago's Mister Kelley's.

Lou Gottlieb, the group's lofty comic spokesman, is truly unique in the annals of show business -- he is the only leader of a vocal trio and stand-up comic on record who has been awarded the degree Doctor of Philosophy. Dr. Gottlieb received his degree with a thesis composed of an edition of twenty-one hitherto unpublished cyclic masses of the fifteenth century. He is also the associate editor and frequent contributor to the magazine "Jazz --- a quarterly of American Music."

In addition to being a musicologist and an authority of note on folk music, Gottlieb has managed to crowd quite a career in show business into his thirty-six years. After a three year hitch with the Gateway Singers, he left the group to return to his academic pursuits. Once he had the Ph.D., however, Lou again found the lure of show business irresistable and was booked into San Francisco's Purple Onion as a single comic. "I'm a performer," says Lou, "and if I go three weeks without performing I get sick."

A top arranger, Gottlieb has scored such hit tunes for the Kingston Trio as "Miss Bailey" and "Good News."

When *Glenn Yarbrough* joined the Limeliters, he had already established himself as an outstanding single night club act at the Gate of Horn in Chicago, Cosmo Alley in Los Angeles and the Limelite in Aspen, Colorado.

On the stand, 29-year-old Glenn plays the classical guitar and is the main solo voice of the group.

Like those of his colleagues Glenn's career has been a checkered one. He attended St. John's College in Annopolis and studied philosophy at Mexico City College. In 1955, he was the bouncer in a New City hotel, while studying classical Greek by day.

Alex Hassilev, dark-haired, banjo-playing baritone is a combination musician, actor and linguist. Born in France of Russian parents, 27-year-old Alex speaks fluent French, Portugese, Spanish and Russian, and sings in over a dozen languages and dialects. His innumerable accents range from Smokey Mountain wail to Ural Mountain grunt, often -- as in the case of "Hard, Ain't it Hard," during the same song.

Although he considers himself to be the antithesis of the Ivy League folk singers, Alex admits spending one year at Harvard ("my parents considered it the status school") before transferring to the University of Chicago. After a tour of duty in the U.S. Army, Hassilev pursued an acting career.

...t point of this weekend's entertainment will be the ...ss performance at the Jazz Concert on Friday night.

ALPHA GAMMA CLUB ENTERS NATIONAL

AGR receives National Charter at a dinner in their honor. (Credit: Photo by Barcomb, SPS)

Alpha Gamma Rho dropped off the list of local fraternities, when it received national affiliation on March 25. It was installed as the 38th national chapter of Alpha Gamma Rho, agricultural social fraternity, Saturday, March 25, at the Hotel Vermont.

National Alpha Gamma Rho installing officials were Maynard Coe, extension agent, Arthur Hamilton, past grand president, and H.H. Brugman, New England province councilor.

UVM's Alpha Gamma Club, which became the Alpha Rho chapter, was founded in May of 1959 and officially recognized by the Interfraternity Council in February, 1960. Its house is located at 216 South Prospect Street across from Kappa Alpha Theta.

During the installation thirty-three new brothers were initiated into the fraternity. Because over sixty AGR men from other campuses came to UVM for the festivities, many area girls volunteered to serve as dates for the visitors. The girls were mainly recruited from UVM, and the Mary Fletcher School of Nursing.

The following are the current officers of AGR: President, Erwin C. Clark of Randolph; Vice President, Hall Thompson of Woodstock; Secretary, John Pratt of Chelsea, and Treasurer, Sherrill B. Nott of White River Junction.

Concert

(continued from page six)

by Adrianus Valerious. This was followed by the Andante movement from Haydn's Symphony No. 94 in G Major, the "Surprise Symphony."

Also on the program was a harp ensemble number, Preludes One and Two by Marcel Tournier. Featured were Jane Cantwell, Susan Davis and Penelope Humes.

Two more selections by the orchestra, Lento from the Carl Sandburg Suite by Alec Wilder and ballet music from Le Cid by Massenet, concluded the program.

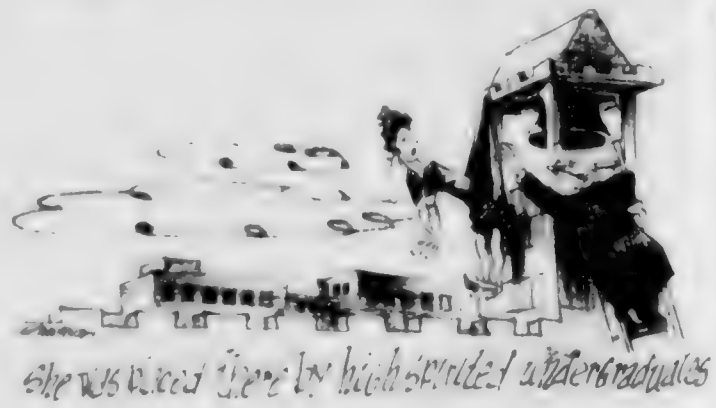
Frosh Week Committees

The first step toward [illegible] for next year's Freshman Week was made on March 26, when committee chairmen were chosen from the student body to handle the [illegible] activities.

Barbara Burgess was chosen as a co-ordinator of Student Association [illegible] as General Co-Chairmen, while A. MacLean was assigned to those attending the meetings as the other co-chairman with the exceptions of Finances and Freshman Rep. the committees consist of one boy and one girl, acting as co-chairmen. Those elected in the afternoon are: John Tenzer, Finance; [illegible] Parkhurst, and Steve [illegible] zian, Registration; [illegible] Coleman and Jim [illegible] Banquet; Pat Gill [illegible] Nalin, Mixer; Sandy [illegible] linger and Arnie Weiss [illegible] nic and Pep Rally; [illegible] Rockar and Frank [illegible] Varieties and Club Cabaret; Dave Selib, Freshman [illegible] Lucy Blau and Don Nelson [illegible] book; Caroline Barr and George Adler, Student-Faculty; Pat Conwit and Bill [illegible] Publicity; and Jan [illegible] and Mike Grossman, Greeting

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)



THE DEAN YOU SAVE MAY BE YOUR OWN

Now in the waning days of the school year when the hardest heart grows mellow and the very air is charged with memories, let us pause for a moment and pay tribute to that overworked and underappreciated campus figure, your friend and mine, the dean of students.

Policeman and confessor, shepherd and seer, warden and oracle, proconsul and pal, the dean of students is by far the most enigmatic of all academicians. How can we understand him? Well sir, perhaps the best way is to take an average day in the life of an average dean. Here, for example, is what happened last Thursday to Dean Killjoy N. Damper of Dubati A and M.

At 6 a.m. he woke, dressed, lit a Marlboro, and went up on the roof of his house to remove the statue of the Founder which had been placed there during the night by high-spirited undergraduates.

At 7 a.m. he lit a Marlboro and walked briskly to the campus. (The Dean had not been driving his car since it had been placed on the roof of the girls dormitory by high-spirited undergraduates.)

At 7.45 a.m. he arrived on campus, lit a Marlboro, and climbed the bell tower to remove his secretary who had been placed there during the night by high-spirited undergraduates.

At 8 a.m. he reached his office, lit a Marlboro, and met with Derther Sigafoos, editor of the student newspaper. Young Sigafoos had been writing a series of editorials urging the United States to annex Canada. When his editorials had evoked no response, he had taken matters into his own hands. Accompanied by his sports editor and two copy readers, he had gone over the border and conquered Manitoba. With great patience and several excellent Marlboro Cigarettes, the Dean persuaded young Sigafoos to give Manitoba back. Young Sigafoos, however, insisted on keeping Winnipeg.

At 9 a.m. the Dean lit a Marlboro and met with Erwin J. Bender, president of the local Sigma Chi chapter, who came to report that the Deke house had been put on top of the Sigma Chi house during the night by high-spirited undergraduates.

At 10 a.m. the Dean lit a Marlboro and went to umpire an intramural softball game on the roof of the law school where the campus baseball diamond had been placed during the night by high-spirited undergraduates.

At 12 noon the Dean had a luncheon meeting with the president of the university, the bursar, the registrar, and the chairman of the English department at the bottom of the campus swimming pool where the faculty dining room had been placed during the night by high-spirited undergraduates. Marlboros were passed after lunch, but not lit owing to the dampness.

At 2 p.m., back in his office, the Dean lit a Marlboro and received the Canadian minister of war who said that unless young Sigafoos gave back Winnipeg, Canada would marry Young Sigafoos was summoned and agreed to give back Winnipeg if he could have Saskatoon. The Canadian minister of war at first refused, but finally agreed after young Sigafoos placed [illegible] on the roof of the mining and metallurgy building.

At 3 p.m. the Dean lit a Marlboro and met with a delegation from the student council who came to present him with a set of matched luggage in honor of his fifty years' service as dean of students. The Dean promptly packed the luggage with his clothing and Marlboros and fled to Utica, New York, where he is now in the aluminum siding game.

Delta Psi Relay Racers steamed to a 2 minute 53.3 second triumph over second place team Sigma Alpha Epsilon. Robert Weiss, class of 61, wound up the track meet by winning the 30 yard high hurdles in 4.4 seconds.

Sportlite Southwick

By Charity Greenwood

The Catalina Club will present its annual water show the 25th and 26th of April at the Y.M.C.A. Pool from 7:00 to 8:00 p.m. "Water Windowland" is the theme of this year's show. A solo by Pat Bishop, a duet by Peggy Parker and Tam Miller, and a trio by Pat Bishop, Peggy Parker, and Gina Selmen will highlight the events of the evening. A special added attraction will be a number honoring the three members who will be graduating this June. Also featured this year will be a new underwater speaker. The club wishes to thank Miss Davenport for the time, energy and ideas she has given the club this year.

NATIONAL CONVENTION

Three members of the Women's Recreation Association and a faculty advisor traveled to Urbana, Illinois on March 28 to attend a national convention of the Athletic and Recreational Federation of College Women. "Sport, Womenhood, and You" was the topic of discussion at the convention held at the University of Illinois. Miss Dimitroff of the faculty and Louise Gallagher, Claudia Noyes, and Charity Greenwood were the UVM representatives at the convention. Schools from Washington to Maine and Texas to Dakotas were in attendance. The main purpose of the convention was to discuss the problems of W.R.A. and to get some suggestions from the other schools on a program for the betterment of the organization. Through the ideas gathered at this convention ours may become a stronger organization.

GIRL'S BASKETBALL

The basketball tournament drew to an exciting finish as Coolidge squeezed past a tall and talented Theta team by a single point just before vacation. Tri-Delta was the consolation tourney winner.

The five girls chosen as the most outstanding players of the season were: Judy Enright and Kay Gleason, Pi Phi; Anne Rowell of Theta; and Jo Nason and Charity Greenwood, Independents from Coolidge. These girls will receive awards at the annual awards picnic later this spring.

Tennis Team Faces Hard Season

Very few people realize that tennis is one of the most successful sports played here at UVM. The last four years have seen two Yankee Conference Championships and two second places for the varsity squad.

This year's team, described by Coach Fred Marston as enthusiastic and determined, faces two problems. The first may be attributed to a long hard Vermont winter which has kept the players indoors until just recently. As a result, most of the Yankee schools have quite a head start and our Varsity must develop quickly for the opening match. The other reason is the loss of Captain Frank Diller. Diller was undefeated last season and was a major reason why the Cats tied for the Yankee title last year.

Ray Kelsey will again be the team's number one player, a position he's held for the past two years. In the number two spot will be Ed Rutner, a steady and reliable player. The other four spots are wide open with Bob Katz, Joel Efrein, Steve Krintzman, Bernie Lamm, Pete Jellinek and Jerry McGee vying for the other starting roles. Our number one doubles team of Kelsey and Rutner should prove strong.

A dual match consists of six singles and three doubles matches for a total of nine points. In this season's dual match competition Coach Marston sees Middlebury, Rhode Island and Rensselaer as being real tough. Last season, for the first time in almost a decade UVM posted victories over both RPI and Middlebury.

The team's schedule, which includes eight dual matches and two tournaments is given below, with the opening match slated for next Saturday, April 22 at Centennial Field at 2 p.m.

Theta Chi Volleyball Champs

Delta Nu chapter of Theta Chi fraternity became the 1961 intramural volleyball champions by defeating Delta Psi three games to one in the final championship playoffs. Previously, in the semi-finals, Dick Aldinger, team captain, led Edward Blaise, Tom Sherman, Howard Stone, and Ray Tuggey to an exciting three to one victory over last year's champions, Phi Sigma Delta.

Theta Chi overcame rough league competition, just nosing out Sigma Phi in a league "C" playoff, to obtain a fine 9-1 win-loss record. Final volleyball league standings are as follows:

LEAGUE "A"

	WIN	LOSS
Delta Psi	7	1
Tau Epsilon Phi	7	1

Choose just the Jet-smooth Chevy you want in one stop at your Chevrolet dealer's

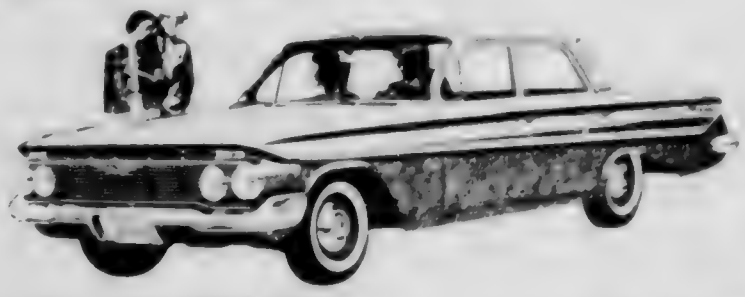
New Chevrolet IMPALA SPORT COUPE

All five Impala models combine Body by Fisher beauty with a new measure of practicality. Door openings of this Sport Coupe, for instance, are over a half-foot wider this year.

New Chevrolet IMPALA CONVERTIBLE

Here's one wide open for fun and a lot of the fun is in Chevy's Jet-smooth ride. Add Turboglide transmission (extra-cost option) to this or any Chevy V8 for tops in easy going.

New Chevy Corvair 500 LAKEWOOD STATION WAGON



Loads of space inside—and still more in the trunk up front. And with all their wagon-size versatility, these rear-engine Lakewoods handle like a charm.

WIDE CHOICE OF OK USED CARS, TOO!

More people are buying new Chevrolets than any other make. So your dealer's got a wide choice of OK Used Cars.

Here's the choice that makes choosing the new car that's right for you easier than ever. Thirty-one models in all—designed to suit almost any taste, priced to suit almost any budget. There's a whole crew of Chevy Corvairs, including thrifty sedans and coupes and four wonderful new wagons. Budget-wise Biscaynes—lowest priced full-sized Chevrolets. Beautiful Bel Airs, sumptuous Impalas and America's only true sports car—the Corvette. Drop by your Chevrolet dealer's and do your new car shopping the easy way in one convenient stop.

New Chevrolet BEL AIR 4-DOOR SEDAN

Priced just above the thriftiest full-sized Chevrolets, all four Bel Air models bring you a beauty that likes to make itself useful

Slimmer and trimmer on the outside, yet inside there's a full measure of Chevrolet's roomy comfort

See your Chevrolet dealer, Chevy Corvair and the new Corvette at your local authorized Chevrolet dealer's

Judo Growing In Popularity Requires Grace And Skill

by [illegible]

Judo is a sport, an art, a way of life. As a student I have a first-hand and comprehensive knowledge of the first part of this above statement. The art of judo is shown in the personal understandings, the humanistic significance, and the individual expressions of the sport. My grasp of the latter part of the statement is [illegible] than my understanding of judo as a sport. My teachers and [illegible] books have told me it is a way of life. Understand, [illegible] translates from the Japanese as "the gentle way" - [illegible], as the other name from the Japanese as "the gentle way" - [illegible], as the other name from the Japanese as "the gentle way" - [illegible], as the other name

The Vermont Cynic

Serving UVM For 78 Years 1883-1961

VOL. 79 UNIVERSITY OF VERMONT BURLINGTON, VERMONT APRIL 27, 1961

Students And Founders To Be Honored May 1

Students honored at Honors Day last year.
(Photo by: R. Lehrer, S.P.S.)

On Monday, May 1, the annual University of Vermont Honors Convocation will be held. At this time, students will be afforded the opportunity to pay honor to UVM's founders. The scholars and those students who have achieved distinction in scholarship, leadership and service will also be honored.

At 10:00 A.M. members of the faculty, guests, and seniors in caps and gowns will form in front of Billings Library for the procession to Ira Allen Chapel. In case of rain, the formation will take place in the chapel basement. Music will be provided by the Marshalls, the UVM band, and the chapel organ.

Edward Newcomb Brush, Ph.D., Dean of the graduate school of the University of Maine, will be the guest speaker. Dr. Brush is a member of Lambda Iota fraternity and will participate in their 125th anniversary. He received his Bachelor's degree from this university in 1925, and his Master's and Doctor's degrees from Harvard University. The topic of his talk will be "The Young Scholar and the Present Day World".

A feature of the program will be the inauguration of the Chief Justice of the Student Court and the recently elected president of the Student Association. New members of honorary societies will be announced, awards will be presented, and students having attained high scholastic achievement will be recognized.

All 10:00, 11:00, and 12:00 A.M. classes on Monday will be cancelled to facilitate student attendance at this event.

Coleman Now Head Of Pan Hel

On Tuesday, March 14, the Panhellenic Council elected a new slate of officers. President for the 1961-62 year is Marge Coleman, a 19-year old junior from Teaneck, N.J.

A member of Alpha Epsilon Phi sorority, Marge has been a Panhel representative since the middle of her sophomore year. She has been active on the Council as MERP Week chairman, and is presently working on Greek Week. Margie has worked on Freshman Orientation Week, is secretary of her class, and is now co-chairman of Junior Week.

In the College of Arts and Sciences, Marge is majoring in sociology and minoring in psychology. "I hope to go into the field of psychiatric social work," she said amiably. "I love to work with people."

As the new president of the Panhellenic Council, Marge said she feels "the main purpose of the Council is to foster good relationships between sororities and to promote high social standards on campus." While in office, "I hope to strengthen the Panhellenic Council in both of these aspects and to make Panhel a stronger organization on campus...and to have another MERP Week," she quickly added with a warm laugh.

Besides sponsoring MERP Week, Panhel supports a war child, and for the first time this year is joining IFC in sponsoring Greek Week.

Marge's outside interests include swimming, skiing (that is until she broke her skis), and a "long-range knitting program," too. "I've been knitting the same jagaer sweater since last fall," she explained.

With her experience, clever ideas, and enthusiasm, Marge seems admirably suited for her new position.

IFC Sing Successful

Theta, Phi Delt Triumph

Phi Delt, at their performance last Saturday night, are victorious at the IFC Sing. (Photo by: A. Djamen)

Listening to music is a wonderful way to relax, especially after a week of tedious studying, writing research papers, and taking seemingly impossible hour exams. Saturday night, April 22, proved to be a relaxing, as well as exciting evening, for those who attended the Interfraternity Sing at Memorial Auditorium. The Sing was presented by the Interfraternity Council with thirteen fraternities and seven sororities participating.

Festivities commenced at 8:30 with a short introduction by Bob Adler, the Activities Chairman of the IFC. The stage was then handed over to Roy Paris, Vice-President of the IFC, who acted as announcer for the Sing. Alpha Tau Omega Fraternity was the first to perform, with a fine rendition of "When You And I Were Young, Maggie." Lambda Iota followed with "Cramambuli," then Alpha Delta Pi Sorority sang "My Alpha Delt." Acacia was next with "St. James Infirmary," then Sigma Alpha Epsilon with "Violets," Kappa Alpha Theta with "Theta Medley," Theta Chi with "Old Brother Man," Alpha Epsilon Phi with "A. E. Phi," Phi Mu Delta with "Huntsman's Chorus," and Phi Delta Theta with "Little Liza Jane."

After a brief intermission, Pi Beta Phi presented "Pi Phi Leiberstraum," followed by Alpha Epsilon Pi with "Ride The Chariot." Phi Sigma Delta was next with "In The Evening By The Moonlight," then Alpha Chi Omega sang "Alpha Chi Medley," followed by Delta Psi with "Eight Bells," Kappa Sigma with the old favorite "Michael," Delta Delta Delta with "Delta Sound in the Wind," Sigma Nu with "Deep River," Sigma Phi Epsilon with a tune from "South Pacific" - "There's Nothing Like A Dame," and finally Gamma Phi Beta sang "Dreaming."

Tension mounted as the judges handed in their results, and after a short while, Jerry Emery, President of the IFC; Bob Goldman, Past-President, and Marge Coleman, representing the Panhellenic Council, made the presentation of trophies to the winners. For the sororities, first place went to Kappa Alpha Theta, second place to Alpha Chi Omega, and third place to Delta Delta Delta. First place to Delta Delta Delta. First place for the fraternities went to Phi Delta Theta, second place to Sigma Phi Epsilon, and third place to Sigma Nu.

Trustees Approve Several Resignations, Promotions

Twelve appointments and six resignations were approved by the Board of Trustees of the University of Vermont Saturday, (April 15.)

Appointments include Wilbur S. Angras, instructor in psychiatry; Harold S. Clarke, assistant registrar; Julian J. Jaffe, associate professor of pharmacology; George E. Fuller, manager of the University Store; Frida G. Surawicz, instructor in clinical psychiatry; James C. Starke, instructor in clinical dermatology, and John C. Twichell, instructor in clinical medicine, all effective as of July 1;

Asst. Don L. Bohmont, instructor in mathematics; Ted S. Eisman, assistant professor in chemistry; Roberto R. Hopkins, instructor in romance languages; Martin E. Rose, assistant professor of chemistry; and Stuart C. Sherman, instructor in chemistry.

Resignations were accepted from Donald H. Blount, assistant professor in physiology and biophysics and Betty Jean Withrow, medical librarian, both effective as of June 30; George A. Wolf, Jr., dean of the College of Medicine, effective as of July 1; Doris B. Boothby, instructor in mathematics and Richard S. Inskeep, associate professor in chemistry, both effective as of Aug. 31; and Bryan J. Mosher, assistant dean of men, effective as of Sept. 1.

Thirty-one academic promotions were approved by the Board of Trustees of the University of Vermont at the April meeting of the Board Saturday, (April 15).

Included were 14 faculty members from assistant professor to associate professor, 10 from instructor to assistant professor and seven from associate professor to professor.

Those promoted are:

To professor -- Virginia Trotter, College of Agriculture and Home Economics; Robert Babcock, Betty Bandel, Albert D. Crowell, Gregory A. Falls and Bennet B. Murdock, Jr., all of the College of Arts and Sciences; and Milton Nadworny, College of Technology.

To associate professor -- Albert M. Smith, College of Agriculture and Home Economics; Robert V. Daniels, Lyman J. Gould, Raul Hilberg, Roy G. Julow, Isabel Mills and Albert W. Sadler, all of the College of Arts and Sciences; Lubomir A.D. Dellin, David Lesourd and Malcolm Severance, all of the College of Technology; and Wilbert F. Chambers, Mary J. Gray, Martin W. Williams and Jerold Lucey, all of the College of Medicine.

To assistant professor -- Janet V. Wilson, College of Agriculture and Home Economics; Robert W. Cassell and Ralph H. Orth, both of the College of Arts and Sciences, Faith G. Emerson, College of Education and Nursing; Wil-

(continued on page seven)

Financial Assistance

All applications for financial assistance for men students for the 1961-1962 college year must be filed by May 15th in the Office of the Dean of Men. Application forms can now be obtained in the Office of the Dean of Men through Mr. Donald G. Leonard.

To be eligible for any aid a student must achieve a minimum average of 72 for the 1961 spring semester. A minimum average of 75 is essential for Vermont residents in order to be eligible and considered for general scholarships. In order to be considered for Wilbur Fund Scholarships, a Vermont resident must obtain the following averages for the current semester: Freshmen 81, Sophomores 83, Juniors 85.

Financial need is an essential criterion for all applicants.

Intellectual Coffee House Locates In Burlington

The institution that many students from metropolitan areas miss the most in Burlington is a meeting place with an atmosphere conducive to serious pursuits and intellectual discussion.

In recent years there has been a reasonably wide range of cultural opportunities in this city but no place to talk about them. The Barn, a place for jazz, talk, and coffee, has partially filled this gap. But the Barn is only a Sunday night institution and doesn't provide a place for rehashing a Lane Series or analyzing a movie. Burlington may have the potential for becoming a small cultural center, but there has been no spot at which they can gather.

But very soon this cultural gap will be filled. Reverend William Hollister, founder of the Barn, along with John Rider, William Awad, and John Inglis, all from the Burlington area, have undertaken the ambitious project of starting a cultural meeting place in town.

NON-PROFIT CORPORATION

They have created a European style coffee house named The Loft in the heart of Burlington. A non-profit corporation. The Loft is located behind the establishment standing at 68 Church Street.

In keeping with the coffee house theme, plans have been made to serve various Espresso coffees and teas as well as pastries and cold sandwiches. In order to stimulate discussion and to add to the atmosphere, prints will be sold. They will be taken from a list compiled by members and professors from UVM, St. Michael's, and the Fine Arts Council. Mr. Koichi Mera, and Mrs. Mosaka Mera have made many contributions to the project. Mr. Mera is associated with a local

(continued on page seven)

Profile Of A University

The University of Vermont is, in most ways, not unlike other American institutions of higher learning, engaged in the business of education.

Possibly business is not the precise word to choose to describe the enterprise, since the overwhelming majority of colleges and universities are non-profit institutions and, in fact, most of these lose money on each and every product they turn out.

HIGH COST OF EDUCATION

It can be roughly estimated - educational statistics are as rampant as any other kind - that it costs the University of Vermont an average of $1600 per year to educate each undergraduate student. The cost is greater in some of UVM's undergraduate colleges, less in others. It is well above the $1600 figure for graduate and medical students.

The same high cost situation prevails at most colleges and universities today, and it is one which has educators, government and private businesses and industry very much concerned.

Mr. Larry Van Benthuysen, author of this brief series, is the public relations director of the University. He is attempting to unscramble the complexities of the budget operations for CYNIC readers. He is a recent UVM graduate and an ex-CYNIC columnist.

But college costs - like costs for most human enterprises - continue to rise. The University's operating budget, for example, has risen from about $5,[illegible],000 five years ago to an estimated $8,[illegible],000 for the coming [illegible] fiscal year.

RULE OF THE BUDGET

An operating budget may be generalized as one which estimates the expenditures the institution may expect to have to make, and then seeks out the sources of income available to meet those expenses. The student who has to find the financial resources to meet his expenses will understand that the University, too, is often hard-pressed to find the funds to meet its annual operating costs. In fact, UVM - like its sister insti-

(continued on page seven)

Fall Enrollment

[illegible] for the fall semester will be held during the week of May 1-5. Students enrolling in the Colleges of Agriculture and Home Economics, Arts and Sciences, and Technology may pick up the necessary materials in the Registrar's office beginning Monday, May 1 at 8:30 A.M. Students in the College of Medicine and Nursing, who are taking the Education [illegible], may make appointments with their advisors through the dean's office, 141 Waterman, beginning April 29. The advisors will have the pre-enrollment materials. Nursing students can make appointments directly with their advisors and secure all the materials from the U. Dental Hygiene students can obtain the necessary materials from Miss Quibby.

Juniors in the College of Arts and Sciences must file a separate card showing courses planned for each semester of the senior year. Cards will be available through the appropriate department chairman. Students in the College of Arts and Sciences will return all cards to their dean's office, however all other students will leave their cards with their enrolling officers for return to the appropriate deans.

Students now in college, who fail to enroll during the enrollment period in May, will be charged the large enrollment fee of six dollars and will be limited in their selection of those courses which are available.

Extension Service Carries Information To Farmers

BY JEFF LAWENDA

Today 9 per cent of the United States' population is engaged in agriculture with the responsibility of supplying the other 91 per cent with food. The importance and dependence upon this 9 per cent is, obviously, a reason for government legislation.

In 1914, Congress passed the Smith-Lever Act which, put into effect cooperative agricultural extension work between land-grant agricultural colleges and the United States Department of Agriculture. Resulting from this act, the Extension Service came into being. This Service is one of the divisions in the Colleges of Agriculture in the U.S. The three other divisions in the UVM College of Agriculture and Home economics consist of Resident Teaching, the Experiment Station, and Related Services.

Resident Teaching trains men and women in agriculture and home economics; the Experiment station studies problems affecting farm and home life, and the Related Services provides diagnostic, inspection, and testing services and holds educational conferences and short courses.

The Extension Service carries scientific information to the people and helps them to apply it. The Service is carried out by three groups of county workers - agriculture agents, home demonstration agents, and 4-H Club agents. Every state in the [illegible] such an Extension [illegible] which is financed [illegible] federal, state, [illegible] governments.

A UNIVERSITY FUNCTION

The Service is [illegible] State University's [illegible] tion, with a Dir[illegible] Extension in charge. [illegible] each state there are [illegible] matter specialists, [illegible] the University staff [illegible] provide educational [illegible] ship and materials. [illegible] county has a staff of [illegible] sion agents to ser[illegible] people. The towns app[illegible] money to the Extens[illegible] vice; the amount dep[illegible] the number of agents [illegible] county and the grand [illegible].

The Extension Service [illegible] ally takes the Univers[illegible] the people of the state [illegible] uses numerous media t[illegible] plish its purpose - t[illegible] sion, radio, newspapers [illegible] zines, and publications. I[illegible] farmer or a homeowner has a problem, he just has to write to the University and the Service will answer his question by letter and send the [illegible] publication or even send an agent to confer with him. These agents are specialists in agriculture or home [illegible].

The publications issued by the Extension Service are [illegible] free and range from "Judging Dairy Cows" to "Cakemaking" and "Refinishing Furniture." These publications are available from the United States Department of Agriculture.

SERVICE IN VERMONT

Agriculture, being Vermont's main industry, is aided greatly by the Vermont Extension Service, which has its headquarters at the University of Vermont. Radio programs are taped at Morrill Hall, which is the administrative building of the Service. There is a daily television program presented by the Vermont Extension Service on WCAX-TV called "Across the Fence".

Masterpiece Presented To Fleming By Lipchitz

...ture is a drawing, "Lesson ... Disaster", donated to ...ming Museum by the renowned ...ptor, Jacques Lipchitz. ...to by Coleman, S.P.S.)

... the summers of 1959 ... elderly man came ... Fleming Museum ser... ... He showed more ... in the many objects ... display than does the ... visitor. In particular, he seemed entranced by the museum's collection of primitive art.

The man turned out to be Jacques Lipchitz, world renowned sculptor, who spent several weeks of his summer vacationing in Burlington. He was so impressed with the Fleming collection of primitive arts, that he presented several pieces for the museum's collection. But the most prized possession are yet to come. Now on display in the hallway of the main entrance is a pencil and wash drawing titled, "Lesson of Disaster."

The Art Journal, a national art magazine published by the College Art Association of America, has used the drawing on the front cover of its winter issue.

The drawing is of an unexecuted sculpture work to be done by Lipchitz and serves as his basic pattern of design.

Lipchitz was born in Poland in 1891 and had done his first sculpture by the time he was eight. He moved to Paris in 1909 and learned stonecutting, modeling and casting.

'61,'62 Lane Committee Announced

The Lane Committee recently announced the election of new student officers. The Chairman of the Committee is Jerry Jacobson of Forest Hills, New York. He succeeds Ann Dreier, last year's chairman.

Marion Force, a New Jersey sophomore, replaces Ted Edgecomb as Production Manager.

The committee is responsible for procuring talent for the Lane Series. Most of the meetings are spent on the weighty job of deciding which of the world's great artists will appear in the Series.

Other officers are Elizabeth Soule, House Manager; Lois Lorani, Publicity Director, and Edward Crane, Treasurer. Mary Jane Edwards is the newly appointed Secretary.

The Lane Series began less than ten years ago when the widow of George Bishop Lane, a UVM graduate, donated a generous sum to her husband's alma mater for the establishment of a cultural program.

The four assistants chosen by the outgoing committee are Stephen Burzon, Barbara Dutton, Barry Freeman, and Marion Gank.

The elections were held on April 18.

Constitution Revision Moves To Completion

The special committee of Student Association for Constitution Revision reported this week that a great deal has been accomplished and that the new Constitution is scheduled for ratification late this semester. The areas of representation, Student Court, Association responsibility, jurisdiction, and financial policy have been discussed in recent weeks, and the actual writing of the Constitution is expected to be accomplished in record time. The Committee meets regularly on Friday afternoons at 4:00 p.m. This week the meeting is scheduled to include interviews with the leaders of the four other major campus governing organizations, to discuss the problem of jurisdiction.

When questioned, the chairman of the Committee, Evelyn Pflug, replied that the Committee would enthusiastically welcome suggestions from the student body, asking that they be left with CORA's secretary, Mrs. Kulski.

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf," "The Many Loves of Dobie Gillis," etc.)

A ROBE BY ANY OTHER NAME

As Commencement Day draws near, the question on everyone's lips is: "How did the different disciplines come to be marked by academic robes with hoods of different colors?" Everybody—but *everybody*—is asking it. I mean I haven't been able to walk ten feet on any campus in America without somebody grabs my elbow and says, "How did the different disciplines come to be marked by academic robes with hoods of different colors, hey?"

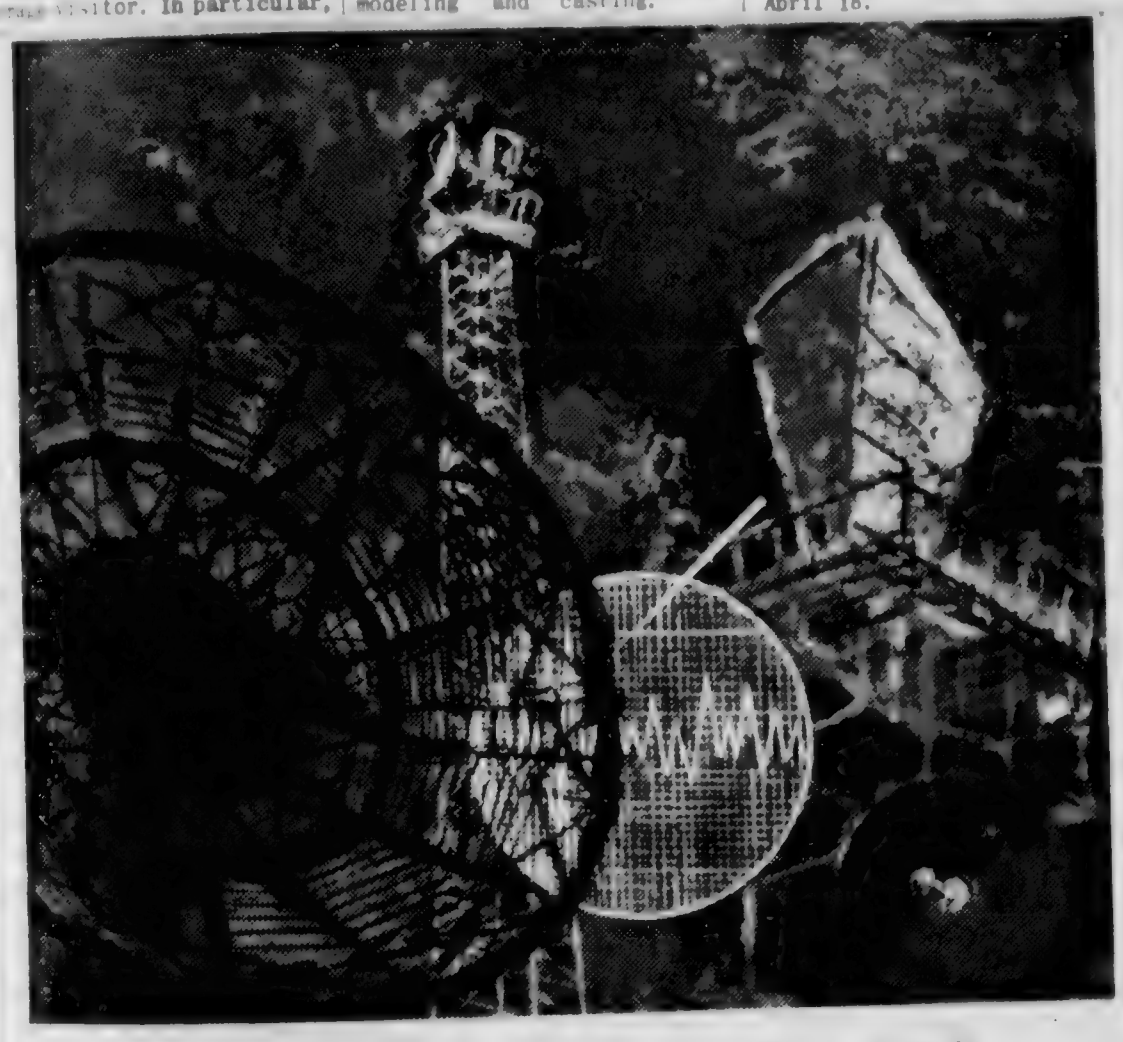
This, I must say, is not the usual question asked by collegians who grab my elbow. Usually they say, "Hey, Shorty, got a Marlboro?" And this is right and proper. After all, are they not collegians, and, therefore, the nation's leaders in intelligence and discernment? And do not intelligence and discernment demand the tastiest in tobacco flavor and smoking pleasure? And does not Marlboro deliver a flavor that is uniquely mellow, a selectrate filter that is easy drawing, a pack that is soft, a box that is hard? You know it!

But I digress. Back to the colored hoods of academic robes. A doctor of philosophy wears blue, a doctor of medicine wears green, a master of arts wears white, a doctor of humanities wears crimson, a master of library science wears lemon yellow. Why? Why, for example, should a master of library science wear lemon yellow?

Well sir, to answer this vexing question, we must go back to March 29, 1844. On that date the first public library in the United States was established by Ulric Sigafoos. All of Mr Sigafoos's neighbors were of course wildly grateful—all, that is, except Wrex Todhunter.

Mr. Todhunter had hated Mr. Sigafoos since 1822 when both men had wooed the beauteous Melanie Zitt and Melanie had chosen Mr. Sigafoos because she was mad for dancing and Mr Sigafoos knew all the latest steps, like the Missouri Compromise Mambo, the Shay's Rebellion Schottische, and the James K Polk Polka, while Mr. Todhunter, alas, could not dance at all owing to a wound he had received at the Battle of New Orleans. (He was struck by a falling praline.)

Consumed with jealousy at the success of Mr. Sigafoos's library, Mr. Todhunter resolved to open a competing library. This he did, but he lured not a single patron away from Mr Sigafoos. "What has Mr. Sigafoos got that I haven't got?" Mr Todhunter kept asking himself, and finally the answer came to him: books.



So Mr. Todhunter stocked his library with lots of dandy books and soon he was doing more business than his hated rival. But Mr. Sigafoos struck back. To regain his clientele, he began serving tea free of charge at his library every afternoon. Thereupon, Mr. Todhunter, not to be outdone, began serving tea *with sugar*. Thereupon, Mr. Sigafoos began serving tea with sugar *and cream*. Thereupon, Mr. Todhunter began serving tea with sugar and cream *and lemon*.

This, of course, clinched the victory for Mr. Todhunter because he had the only lemon tree in town—in fact, in the entire state of North Dakota—and since that day lemon yellow has of course been the color on the academic robes of library science.

(Incidentally, the defeated Mr. Sigafoos packed up his library and moved to California where, alas, he failed once more. There were, to be sure, plenty of lemons to serve with his tea, but, alas, there was no cream because the cow was not introduced to California until 1931 by John Wayne.) © 1961 Max Shulman

* * *

And today Californians, happy among their Guernseys and Holsteins, are discovering a great new cigarette—the unfiltered, king-size Philip Morris Commander—and so are Americans in all fifty states. Welcome aboard!

Is your future up in the air?

As the communications needs of our nation become steadily greater and more complex, the Bell Telephone System is continuing its pioneer work in microwave by "taking to the air" more and more to get the word across.

To this end, Western Electric—the manufacturing arm of the Bell System—has the monumental task of producing a large part of the microwave transmission equipment that knits our country together by shrinking thousands of miles into mere seconds.

In spite of its great technological strides, the science of radio relay is a rapidly-changing one. And new break-throughs and advances are common occurrences. A case in point: our Bell System "TH" Microwave Radio Relay. This newest development in long-distance telephone transmission will eventually triple the present message-carrying capacity of existing long-haul radio relay installations. A full-scale system of 6 working and 2 protection channels can handle 11,000 telephone messages at the same time.

To make microwave work takes a host of special equipment and components: relay towers, antennae, waveguides, traveling wave-tubes, transistors, etc. But just as important, it takes top-caliber *people* to help us broaden our horizons into such exciting new areas as communication by satellites!

And microwave is only part of Western Electric's opportunity story. We have—right now—hundreds of challenging and rewarding positions in virtually all areas of telephony, as well as in development and building of defense communications and missile guidance systems for the Government.

So, if your future is "up in the air," you owe it to your career to see "what's up" for you at Western Electric.

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of "Western Electric and Your Career" from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. And be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

Western Electric

Editorial:

A Time For Progress

It won't be long before the Dean of Men presents his residence plans to the University. The direction it takes will be of some significance not only to the men whom it will affect, but to the entire university of Vermont. It will either be a step towards intelligent living or a leap onto the back of galloping paternalism.

Either way, one thing is clear. There will be many more students living in dormitories than there ever have been at this university. This is good in that it provides an opportunity for students who wish to take advantage of conveniences of dorm life to do so. And the new halls appear to be well planned. They should be conducive to a comfortable life.

Of course these residences can serve another function too. They can be used as another device to sharpen the already eagle-like eye of the administrators watching their charges. This would certainly be a step in the wrong direction.

Dormitory living isn't the only facet of the residence policy. The Dean of Men must make decisions about who may live in fraternities, who may have private rooms, and who may rent apartments.

Some restrictions are necessary. Elimination of substandard housing, for one, is in the best interests of the students. But a super watchdog policy would benefit only the watchers.

The Dean of Men has an important, even a vital decision before him. It may indicate any progress or lack of progress our school has made in dealing with its students.

We hope his decision will be a progressive one.

Be Cynical

The news story that has stolen headlines from the Eichmann trial and the Soviet space man concerns the progress of a new revolution in Cuba.

This is more than understandable since that small land in recent months has been such a thorn in the side of our mighty nation. Fidel Castro has ranted longly and loudly against "Imperialist America", and in doing so, he has gained the ill will of the vast majority of U.S. citizens.

As a result of Castro's "Hate America" campaign and because of his alleged Communist leanings sympathies, most Americans feel a great deal of sympathy towards the anti-Castro Revolution. Many think that this revolt, if successful, will bring peace and democracy to the Western Hemisphere.

At a time like this it's usually a good idea to take a deep breath, step back, and try to see the whole picture. Generallythis means taking a good look at past history in order to find an analogous situation. But in this case, the situation to look at took place only a short time ago.

In late 1958, a young and idealistic Doctor of Law captured the hearts and blessings of the freedom loving peoples of the world by freeing his country from the bondage of a ruthless dictatorship. He promised elections, reform, and a people's government. The world hailed him as a dedicated fighter for freedom. His name was Fidel Castro.

Now the sweet dreams he inspired have soured. And now another revolutionary claims that he will resweeten them.

Perhaps he will. But this time we shall be a little cynical.

Quickie

Dear Sirs,

Just you take to criticize the dorm councilors. Say! They're here to help you. You must have some kind of complex or something.

Your friend,
Bull

Once Again, Cuba Revisited. . .

To the Editor:

It was earlier my intention to write for the CYNIC an article about the Cuban situation, to be based on information, which I would acquire through contacts with both refugees and Cuban residents who I intended to visit, in the course of a short trip to Cuba. Unfortunately, my trip was rendered impossible by government regulation, and I didn't get an opportunity to write the promised article for the CYNIC, partially because of my removal from Vermont.

I wanted to write this article mainly because I thought that CYNIC readers should have the opportunity to be exposed to some of the facts about the Cuban situation, rather than to have their judgements only on a series of articles written by one individual who had visited Cuba at the invitation of the Castro government, and who, perhaps unknowingly, was not given the opportunity to observe many things which, had he seen them, would have disillusioned his more ...

The reason I am writing this letter now -- and I'll be quite honest about it -- is because my emotions and my blood have reached the boiling point, upon hearing of the wholesale arrest and "executions" which Castro's henchmen are carrying out today. I remained, but without bitterness, Mr. Kritzler's articles,

Letters To The Editor

Answer To Ollie

Dear Ollie,

I read your letter to the CYNIC last week and am under the impression that you may misunderstand the function of your present Women's Student Government. You refer to it as a "new and better system." I think that this system just might be a little more than the wonderful new idea which I have. My misunderstanding lies in the things which you suggest. I go to bed when I please. We eat at all hours. I can never get used to that at home. Nor, can we be fined or punished when coming home a drinking age. We just have to make it in the state and into bed without bothering anyone. We also receive and supervise regular study and recreation times, as they are set up by our government. By the way, during the coming year all of the suggested at a Joint Conference Meeting, May third. All suggestions will be considered here. If girls are dissatisfied with something, they could most effectively petition a change at this time. We can leave our lights on all night and day if we choose, taking it into account that room rent will go up with the electric bill. Yes, and we can even leave our curtains up as we undress, but if tomorrow some girl is attacked on this campus the police will tell us that we have been asking for it, even encouraging it. We can "raid" the candy, milk, and soda machines anytime. Furthermore, she would want to stay up all night answering the telephone for some jerk who plans to get calls after 11? Also, nobody says a word about our hygienic practices and all girls are strongly encouraged to flush the toilets every time they use them.

WSGA realizes that you can't teach morals. Although the University would like to assume the responsibility for each girl's virginity, it realizes that this is impossible. Therefore, everyone is completely free to choose her own males. I can say nothing about rules concerning the rooms, because they are the concern of the people who own and administer the buildings. Last, but not least, WSGA has not set up their government with punishment as an objective. Our Inner's House Committee has tried hard in each case of an infraction this year, to prescribe a "penance" that will prevent the recurrence of the trouble.

In closing, Ollie, may I suggest that in future letters to the CYNIC, that you pick specific rules from the WSGA Handbook and criticize them as offering something better in their place? If you are complaining about something beyond the girl's control we can take it to the Dean of Women's Office or the Director of Dormitories, where it might do some good. I think that many wonderful ideals are embodied "in this best of all possible" student governments.

Sincerely,
Candide

To the Editor:

As an avowed fan of all [illegible] I was overjoyed to see Mike Grossman and Dick Meier, co-authors of "The Circular File," indeed, [illegible] recalled to the utmost [illegible], and I might add sorrowfully, [illegible] while reading [illegible] and irrelevantly nothing. I, therefore, as a student enrolled in the [illegible] studying to the exclusion of a few other activities, with my only announced desire being that of obtaining "a paper that says 'Degree'", as quickly as possible, "humbly beg your pardon, throw aside my evil ways and congratulate you on a point well-taken. (CYNIC, April 20, 1961)

You maintain that "we seem to lack a sense of purpose. Why can't we ... take a stand for something...?" Here, I applaud you for joining all "beatniks," whose only purpose is to rebel (against what is a mystery to many), and all college students who "have a purpose," such as pushing beds down 42nd St., crowding into phone booths in all sorts of weird contortions and holding scream-evoking "panty raids." I, for one, would much prefer to stand back and watch such "purposeful actions" and their immediate contributions to mankind.

Yes, gentlemen, there *are* occasions when my face takes on an expression of apparent pathy, unconcern and Stoicism,

and decided that, although I had not been able to write the article I had planned on writing, I would at least take this opportunity to write and, to the best of my ability, try and explain what has happened to lead to the present Cuban bloodbath.

Being a resident of Miami, I have been constantly exposed to very close and thorough news coverage of the Cuban developments. I recognize that newspapers are perhaps prone to exaggerate, and

The ...pression of the ...irties forced Tucker to ... a ... in his salary, but ... had little use for extra money. Although by that time he was managing the buying of all fruit for the northeastern division of his company, he retained a special affection for the apple department in which he had started. It seemed to him a good sign that the bankrupt millionaires in the cartoons of the day were pictures selling apples, rather than shoelaces or mechanical toys. Apples reminded him of his childhood on the farm, and he felt that perhaps for the men selling them, too, they represented an unconscious knowledge of the good things in life.

He didn't visit his bridge very often any more. He was getting old and heavy, and the trio from his Bronx apartment was a tiring one. Then, too, the elderly caretaker had died, and the young man who had replaced him wasn't interested in talking about the bridge. Tucker was still proud of his bridge, but now it was often easier to sit in the sunshine in front of the apartment when it was warm, or to rock in his chair and look at the pictures of the bridge on the walls on his room.

On the subway one winter evening he felt sharp pains in his chest, and that set him thinking about his bridge. It was the only one of his possessions that he valued; to whom could he leave it? His life, although happy, had been lonely. He had many acquaintances in the fruit business, but they struck him as too brisk and businesslike. They would make a good thing out of the bridge -- perhaps even collect tolls. Several evenings of wondering gave him no answer.

The next Sunday he took the long ride down to the bridge. The December day was clear and cold. The bridge stood out against the pale blue sky and the anonymous buildings of the city. Boats and automobiles moved noiselessly in the distance; the only sound Tucker could hear was the whistling of the young caretaker, who was perched on a catwalk above him. The bridge rested quietly between the two quiet boroughs.

The city had taken care of his bridge, Tucker thought. Not just because it had to, in return for permission to use it, but as if the city, too,

New Tests For Law School Candidates

Princeton, N.J., April 14 -- In the future, prospective law students will need to pay more attention to the development of their writing skill and their knowledge of their country's cultural background.

Beginning next November, the Law School Admission Test, now required by 85 of the nation's law schools, will include separate tests of writing ability and general background. This announcement was made today to the executive committee of the Law School Admission Test Policy Committee at the Conference of Western Law Schools, meeting at Stanford University, Palo Alto, California.

The 80-minute writing ability test is designed to measure the student's command of grammar and diction as well as his ability to recognize verbose or unclear writing. It will test his skill in organizing ideas and require him to demonstrate his competence by re-writing and editing prose passages. The main purpose of the test of general background is to measure the student's awareness of the intellectual and cultural context in which the law functions. The test is designed to indicate the candidate's understanding of important ideas, events and cultural developments of the past and present. It will include 90 questions -- 30 in each of the three fields of humanities, science and social science.

In its present form, the Law School Admission Test is administered in a single half-day session and is designed to measure aptitudes closely related to specific aspects of the study of law. With the addition of the two new tests, the scope of the test will be broadened to include the measurement of achievement in the areas of writing and knowledge of cultural background and it will occupy a full day. Separate scores will be reported on the aptitude test, the test, the writing test, and the test of general background.

The Law School Admission Test is administered four times a year in November, February, April, and August at test centers throughout the United States and abroad. Educational Testing Service of Princeton, New Jersey, constructs, administers, and scores the examination for the Policy Committee of the Law School Admission Test.

Nyborg Given Grant By NIH

A University of Vermont physics professor, now on leave of absence at Oxford University, has been awarded a $92,783 grant by the National Institute of Health for work on physical mechanisms for biological effects on sound.

The grant is for a three-year period beginning Sept. 1 of this year.

Dr. Wesley L. Nyborg is the recipient of the grant. Since last fall, Dr. Nyborg has been at Oxford, where he and Dr. David E. Hughes of England are conducting research of a nature similar to the above planned project.

Nyborg has carried out extensive research in the fields of acoustics, ultrasonics, bioacoustics, and molecular biophysics and is the author or co-author of about 20 pages on these subjects.

He joined the UVM staff last fall after spending 10 years at Brown University.

STUDENTES

Gordon Perlmutter

During the short existence of this editorial column, it seems that a considerable amount of time and effort has been devoted to editorializing some aspect of the campus life here at U.V.M. I should like to take advantage of this opportunity to deviate sharply from this established tradition of chronic grumbling and to reacquaint the reader with some of the praiseworthy assets of this university -- its location.

Whenever school commences, how many of us hesitantly depart from our respective hallelocks, grit our teeth, and prepare for another round of social isolation at U.V.M.?

To be sure there is no Metropolitan Opera House, Broadway stage, or Radio City here in Burlington, but must this discourage us the way it so often does? There are many other equally fascinating things to do if we would only get our minds momentarily off what the Burlington area lacks as a metropolis and begin to think more provincially.

Spring is just around the corner and with it comes the gnawing urge to do something else besides the old standby, going to the "flicks". Perhaps a few suggestions from this dyed-in-the-wool hick about some of the more unusual activities to be found around this area might therefore be in order.

Have you ever eaten at the Log Jean Tavern in Middlebury? The good food served in a typical Vermont atmosphere at a reasonable cost is well worth the forty minute drive, as those who have already been there will readily testify. Closer to home there are many places to visit if you like scenery, hiking, or just being alone for a while. A visit to the Ethan Allen Park and a climb to the top of the tower, a hike or a drive along Spear Street, and a picnic, campfire or party at one of the many beaches -- Shelburne Harbor, Shelburne Point, Red Rock, Rock Point, North Beach, and Mallett's Bay, to mention a few -- are samples of the many activities to be found in the immediate vicinity of the university. Other places a little further away are Lake Elmore, Sand Bar Beach, Lake Carmi, and the Stowe-Mount Mansfield area. Speaking of Mount Mansfield and forgetting for a moment the fabulous skiing opportunities it provides, have you ever gone for a hike along the ridge line of the mountain and climbed to the summit? Or, if you are the lazy type, how about a drive along the Toll Road or through Smuggler's Notch after the snow is gone?

I could go on and on but it is just as easy for you to pick up a tourist map of Vermont and find these places for yourselves as it is for me to list them here. The point of all this still remains it is entirely possible for everyone here at U.V.M. to be able to find some fascinating and unusual things to do if they would only try to exploit to the fullest, the limitless opportunities the unique location of U.V.M. affords them. It is from experiences such as these that fond memories of college days are made.

The Circular File

by MIKE GROSSMAN and DICK SNIDER

When I read the article about the abolishment of compulsory ROTC by the students of Lehigh University, I got excited, if they can do it, so can we, we enthusiastically thought. But I remembered too soon that this is not Lehigh but UVM, where everyone complains and too few act. My enthusiasm squelched, I thumbed back to page five, where there was an article criticizing the poor advisory system at UVM. Again I got excited, and remembered a friend who took a course at the advice of his advisor, only to discover at the end of the semester that his advisor had made a mistake - my friend could not get credit for the course. But once again I calmed down, remembering that at UVM everyone wishes things were different, but nobody does anything to change them. I kept asking myself: "What arouses the Lehigh students to demand action that is missing at UVM?" Two faced, but kindly my question was answered by Mr. Pierre Delattre, the "beat priest" who spoke at the Vermont Conference. At an after dinner discussion, Mr. Delattre criticized most universities for their failure to unite the faculty and students with the administration. Too many college administrations, said Mr. Delattre, create student indifference to their education and college by separating these two groups. The administration becomes a police force that treats the students like children, which suppresses the student's maturity. Certainly this is the case at UVM where the police force consists of two-faced floor counselors and kindly housemothers who censor the mail of their innocent charges.

Mr. Delattre also stated that at most of the colleges he has visited the students were more mature than the

UVM Calendar

April 27 through May 3, 1961

THURSDAY, APRIL 27
Cinema Arts: "The Roof", Italian film - Mills Auditorium - 6 & 8 PM

FRIDAY, APRIL 28

Wednesday's Lecture Series - Student Lounge - 8 PM
Varsity Baseball - St. Lawrence - 4 PM

WEDNESDAY, MAY 3
Holy Communion (Episcopal) - Ira Allen Chapel - 7 AM

The Circular File

(continued from page five)

administrations which dominate them. The great difference between colleges like the University of Chicago, Harvard, and Antioch and the average college is the union between students, teachers, and administration. The students at these colleges are treated like they are intelligent adults and have much to say in making the school policies which affect them. The result is the atmosphere of intellectual fervor, pursuit, and industry.

HANDS OFF THE BACK

Most colleges boast that they educate the student outside as well as inside the classroom. But at UVM any enthusiasm for outside education or concern for the University is stifled by an organized police force -- our administration. How can we care about UVM or feel an integral part of it if we are not treated as adults and given a significant say in determining our school policies. Sure we can make suggestions, but to whom? To an administration that puts us on the back and sends us on our merry way? That's to stem. For example, what happened to the signed petition pleading for the establishment of compulsory ROTC that was presented to the administration last year? It's no wonder we lack spirit!

We've just elected our Student Association representatives, but everyone knows that except for a license to organize a few social events, our reps have no real powers. They are no more than puppets of an administration which should, and could, be influenced by the student's wishes. If our administration wants something more important for the future of UVM than a new gym, then the student body must be given the consideration it has so long deserved. The students will continue to feel like subjects of their institution rather than members until they are granted a powerful voice through their representatives. To quote an expression often used by the Cynic's editor . . . WHY NOT

Fleet Chartrand wisked the discus through the air 125 feet 4 inches. However, Lynder's Sam Gee bettered Chartrand's distance by tossing the discus 137 feet 10 inches. Gee also took a first place for Lyndon in the Shotput by tossing the 16 pound shot 42 feet 6 inches.

The only other person who placed first for Lyndon was Heath, who won the 220 and 100 yard dashes, and tossed the javelin farther than anyone else.

Scene and Heard

by Sue Levinsohn

CLOUD NINE

Bonnie MacKay, ADPi, was recently pinned to Bill Bradford, an SAE alum. The SAE's serenaded her at the house last week. Kathy Pamiano, ADPi, was also pinned to Ced Parrow, Theta Chi. Barb Dillon, '62, was recently engaged to John Fidler of Phi Delt. Congratulations are in store for Steve Dyke, Sigma Phi, who has pinned Sue Mervin of Vermont College.

Potpourri

IFC and Panhel really did a terrific job with Greek Week this year . . . this past weekend several of the Thetas went to the national convention at Syracuse University . . . the ADPi pledges are planning a cookie sale for all you people who can't resist temptation . . . on Sunday the 23rd, seventeen Theta pledges were initiated into Lambda chapter . . . Ben Black, Ron Oliver, Harry Dickerson, Jack Williamson and Dick Lorusso were recently initiated into Sigma Phi . . . ADPhi would like to welcome the new sisters who were initiated on Wednesday . . . Acacia had their annual Parents Weekend last weekend. Parents enjoyed a banquet before IFC Sing and an Open House afterwards. Gamma Phi's Parents Weekend was also this past weekend.

Congratulations to

Elaine Wright of ADPi who reigned over Greek Week. She was presented by Sigma Chi.

Betsy Bashew, ADPi, who has recently been initiated into Alpha Lambda Delta, the Freshmen Women's Honorary Society.

Delta Psi, Acacia and Phi for their winning efforts in the Chariot races.

Theta, Alpha Chi, Tri-Sig, Phi Delt, Sig Ep and Sig Nu for their outstanding performances in IFC Sing.

Ivy Sloan who has pledged ADPhi.

Joyce Dewiga of Gamma Phi who has been chosen by St. Michael's to run for their Junior Weekend Queen.

Lynn Baier of Gamma Phi who has been chosen to represent UVM at the Intercollegiate Poetry Reading Day.

Phyllis Babbitt, AEPhi, who has directed the winning play in the state in the one-act play contest.

Cuba

(continued from page four)

for the benefit of those who charge distortion on the part of the press, I will not speak further of the news coverage. However, when the refugees began to pour into Miami, my father, who heads a local social service agency, was made responsible for the care, feeding and housing of several thousand of them. There were over 60,000 who came to Miami alone. Over the Christmas vacation, he arranged for me to interview one of the refugees. What he told me is fairly typical of what happened to most of these people.

The first thing this man said to me was that under no circumstances was I to repeat his name or any information about him which might lead to his identification. He was worried for the sake of his family as most of these refugees are. A number of the things he told me bear repeating.

1) Professional people were not being allowed to leave the country, as the government wanted their services to be available to it. Among these were his two sons.

2) Cuban workers attended the giant Havana rallies in groups representing either their work groups or militia units, and a person whose absence was noticed was more than likely to be under permanent suspicion.

3) The Communist Party was the only party allowed to function.

4) The Cuban peasants had received no benefits of any sort from the reorganization of land ownership, aside from small improvements in their housing. But only was their pay the same, but more of it went out in "voluntary" deductions for the support of the government militia. Moreover, food intake was curtailed -- such items as, for example, beans and pork were in many instances virtually unobtainable. Prices were up.

5) Castro's promise of allowing the peasants outright land ownership was never realized, not even to the smallest extent.

6) Inflation was rampant. The value of the new pesos was dropping constantly, yet the government continued to print more of them with no gold backing.

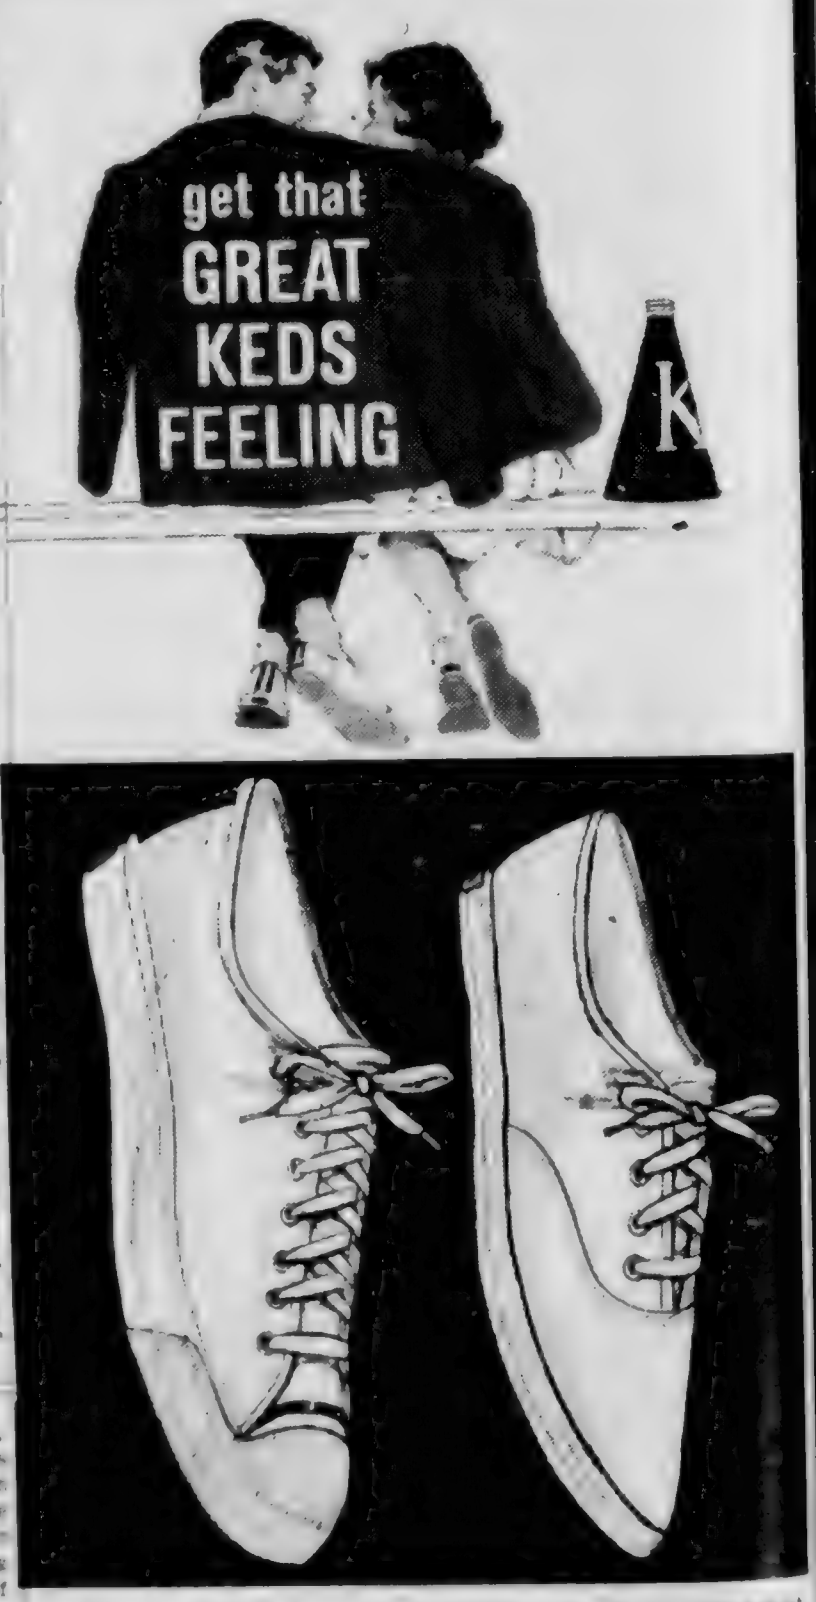
I could go further, but it is not necessary. Let it be sufficient to say that all these refugees tell Miamians of a terror and complete lack of freedom of expression prevailing under Castro. They profess their love for Cuba, and want to return. They all greeted Castro's rise to power as relief from the Batista dictatorship -- for they all hated Batista, and still do. And believe me, none of them were out to turn the revolution to serve their own selfish ends.

I can assure readers, in addition, that the charges echoing round the world of American intervention are groundless. There are recruiting centers here in Miami, which are now busily enlisting men to join the revolution. The people in charge will not allow any American citizen to join them. In order for an American to join this invasion, it is necessary for him to either lie his way through the recruiting drive, or to slip out of the country, evading the Border Patrol, and somehow make his own way to Cuba.

Let me say one thing about my opinions. I never followed international politics with much concern. I never harbored any feelings of extreme patriotism for the United States, and often questioned U.S. policy and government -- in fact, I am basically somewhat of a socialist as far as my outlook on government is concerned. I never spoke of Communism with the outright hate and prejudice that many Americans show about it although as far as present-day Communism is concerned, I am most definitely anti-Communist.

However, having had a good opportunity to know about what is going on and has been going on in Cuba, I am thoroughly revolted, disgusted, sickened at the tyranny that Castro instituted. Had Mr. Kritzler attempted in Cuba, to print a series of articles denouncing the Cuban foreign policy, he would, at the time of this writing, be lucky to be alive. I am not echoing the policy of the U.S. or of the conservative groups or any other groups or any business interests, but I am speaking for my own viewpoint. I was overjoyed to hear of this uprising. I hope it will be a lesson to Americans and everyone else on the rottenness and futility of tyranny. I hope it will be successful, and I hope that Cuba will not have to undergo again, should it succeed, any further tyranny.

Sincerely,



Dick Rosichan

Professores

(continued from page five)

took pride in the bridge. His eyes followed the neat white line in the road, painted to separate the lanes of traffic, and he saw that the line continued without a break down from the bridge and into the city. He rode back to the Bronx with his mind made up, and that night he wrote his will, carefully and clearly, and attached to it the bill of sale.

The renunciation of his earthly goods seemed to give Tucker a new hold on life. His heart gave him no trouble for several years, and he took a renewed pleasure in daily affairs. He felt that the bridge was now the city's not his, but he still visited it occasionally and took the same pleasure in its strength and beauty. When finally he felt the pains of attack which was to kill him, he had an impulse to ride down for one last look at the bridge, but he thought of the annoyance he would cause to other people if he died on the way, and he dismissed the idea as sentimentality. Instead, he called the doctor, set his will out on the table by the bed, and lay down, first taking off his coat and shoes. He died looking at a color photograph of the bridge which he had hung near the bed.

Other shoes may look like Keds, but only U.S. Keds® can give you "that great feeling." Because Keds have a patented shockproofed arch cushion and cushioned inner sole. And because Keds are built over tested, scientific lasts, to fit all feet perfectly, even narrow ones. Keds are right for class, gym, tennis court or dorm. Machine washable (and they even look good clean). His: Keds "Court King" Hers: Keds "Champion." Get your U.S. Keds at good shoe or department stores

many programs and activities it would like of improve, but must wait for availability funds.

pauses for a moment to consider per student comes readily apparent that the University must find funds in addition to tuition paid if it is to meet the cost of educating ts.

ives $1040 per year in base tuition from t. In the case of Vermonters, state funds difference between the $1040 per year paid ate students, and the $416 paid by Vermont

But UVM's average per-student cost in the undergrad- ions is about $1800. This means that UVM about $800 from other income sources for every ate student enrolled.

WHERE THE CASH IS

ts paid by students do not contribute to this come needed, because they go to pay off loans sity has received to finance construction of ence halls, and to operate and maintain the halls.

the additional income needed comes from tax - federal, state and other. Even private institutions receive some of their income from tax sources. Some comes from income from endowments; some from private philanthropy, including individuals, and the private foundations.

comes from Alumni giving; some from research and training grants; some from sales and services.

While educators, nationally if not necessarily intramurally, are fond of disagreement with one another, they possibly agree that they face inevitably rising costs; all also already face increasing difficulty in meeting those increased costs.

Tax dollars - as the tax payer will tell you - already in heavy demand not only from education, but from all of the agencies which the local, state and national governments support.

Private institutions express increasing interest in tax funds, public institutions increasingly approach private philanthropy.

As college costs rise, costs to students rise, and all colleges and universities endeavor to increase the scholarship and loan funds they may make available.

NO IMMEDIATE RISE

Some educators have suggested that the student should be charged the full cost of his education; others insist that education benefits all society and that it would be both unfair and potentially dangerous for our nation to charge the student the full cost.

The debate continues, and some of the problems which cause the debate may affect those who are presently college students, here at UVM, and on other campuses.

This might be the point at which to state that this series is *not* a buildup to an announcement of an immediate UVM tuition increase. Such an eventuality is probably inevitable two years from now, but the University's Trustees this year preferred to hold off the prospect, even though anticipated income does not appear to meet the anticipated expenses of the coming year.

Succeeding articles in this series will endeavor to give you some insight into the ways the University of Vermont spends its operating income, and the sources from which that income is derived.

Extension Service

(continued from page two)

deals with agriculture, homemaking, and youth in Vermont. There are 418 4-H Clubs and 379 Home Demonstration Clubs spread throughout the state.

The Extension Service in Vermont has been proven quite effective. Its present director is Robert P. Davison, whose office is at Morrill Hall at UVM. Mr. Davison has a paid staff of about 70 professional workers, assisted by several thousand men and women, including many UVM graduates.

LOST- [illegible] wallet belonging to [illegible] please return it to the WSGA office in lower Waterman.

Bowdoin Meet

(continued from page eight)

[illegible] seconds respectively. Ross also proved to be the best broad jumper by sailing 20 feet [illegible] inches. Ron Haviland tossed the hammer 167 feet, 4 inches to take first in that event. Bowdoin's pole vaulter, Roman, propelled himself to a height of [illegible] feet 4 inches for a victory over second place man, UVM's Richard Gomez. Gary Gray proved himself to be the fastest 100 yard dasher by flashing to a 10.5 second victory.

Showing as much determination and sportsmanship as Simpson and Perkins, the other Catamounts surged ahead to take five more first places. John Chesney, class of '61 paced the two mile run in 10 minutes, 17.9 seconds to take the event for Vermont.

John Bister placed second to Bowdoin's Gray in the 100 yard dash, but he then went on to defeat Gray in the 220 yard dash in 23.2 seconds. Peter Voytek, class of '63 tied with Ross of Bowdoin by high jumping 5 feet, 6 inches. David Sequist, class of 63 took third in the discus event, tossing the discus only ¼ of an inch shorter than Bowdoin's first place winner, Hall. Bill Mulhern, class of '63, captured first place in the 440 yard dash in 51.5 seconds.

UVM track coach, Archie Post, stated, "Our runners did very well, taking five out of eight possible first places. However, we only took two first places out of a possible seven in the field events. That is what stopped us. I am very disappointed in the fact that Steve Bernstein, one of our best boys in the field events, had to quit the team. With him I'm sure we could have won. We only had seven returning lettermen, so the boys didn't know quite what to expect. Next time we should win."

EVERY COLLEGE STUDENT needs this book

to increase his ability to learn

An understanding of the truth contained in Science and Health with Key to the Scriptures by Mary Baker Eddy can remove the pressure which concerns today's college student upon whom increasing demands are being made for academic excellence.

Christian Science calms fear and gives to the student the full assurance he needs in order to learn easily and to evaluate what he has learned. It teaches that God is man's Mind – his only Mind – from which emanates all the intelligence he needs, when and as he needs it.

Science and Health, the textbook of Christian Science, may be read or examined, together with the Bible, in an atmosphere of quiet and peace, at any Christian Science Reading Room. Information about Science and Health may also be obtained on campus through the

FOOTBALL PRACTICE ENDS EARLY

Spring football practice ended Tuesday, the 25th, instead of Saturday, the 29th, as was originally planned. Let's have a talk with Chuck Bonsell to find out why.

Question: Sir, why did practice end early?

Answer: "Your exams! Many of our men have a number of exams this week, so we thought that it would be better to let them start for them."

Question: What do you think of the practice that you did have?

Answer: "It was very good. We didn't get as much out of it as we planned, but we did accomplish quite a bit. We know which men want contact and which ones don't. We know who we intend to invite to camp."

Question: With the men that showed up for spring practice plus the returning members of last year's squad, we should have a good year?

Answer: "A very good season! Next year we will have depth. We have a number of good men at each position, so we're looking forward to a real fine season."

Line coach Dike Tenerotti supervises team drill.

Sportorial

by FRANK A. HOLDEN

One of the reasons why many students enter a small college or university is the opportunity to learn from personal contact with their professors outside of the classroom. This is one of the advantages that a small institution has over a large one.

Here at UVM the student – faculty relationship is not what it should be. Once the dismissal bell rings, both student and professors forget about each other until the next class meeting. This condition is partially responsible for the chaperone problem and the poor advisor system that we now have.

One way to solve this problem is to bring both parties together on an informal basis, and there is no better way to do this than through sports.

We have a very substantial intramural sports program, basketball, handball, volleyball, softball, etc. but we students have selfishly forgotten to invite our instructors and administrators to participate in them.

We have some very interesting and stimulating minds in our faculty. Who knows? Maybe while standing on first base concentrating on stealing second, the faculty first baseman may say some stimulating remark and even if it suggests nothing more than a better batting stance, it will have been useful.

Many times the friendships that develop on sports fields last forever, and believe it or not, some rewarding friendships may be started between a student and a professor.

Misinformed students may feel that faculty members are too old to offer any good competition. This is not true.

We have people in our faculty and administration who are still capable athletes. Dean Clifford is a good soft ball player, Professor Marston is one of the best tennis players in the area; and, Coach Donnelly has a "Hole-in-One" trophy on his desk. I am sure that these men and others like them are capable of providing some stiff competition.

Freshmen, can you name a better thrill than beating Captain Jones – that is at skiing – or robbing the old slugger, Professor Torch, of a base hit?

I think that we should take advantage of a good possibility by inviting our faculty and administrators to take part in our sports program. This could be a beginning for a better student-faculty relationship at UVM.

Spring Sports Underway

Three University of Vermont athletic teams opened their regular seasons with a flurry of action last weekend, most of it scheduled for away contests.

Ralph Lapointe's Varsity baseballers met Coast Guard at New London, Conn., Friday, and followed up with a game against Brandeis in Waltham, Mass., on Saturday. Sophomore righthander Dick Cassani got the nod against the Cadets while southpaw Bob Hobbie started the Brandeis game. Cassani, who has an earned run average of 0.50, is credited with two of the wins in Vermont's 3-4 record on the southern trip.

Archie Post's Varsity track team opened its season Saturday in a dual meet against Bowdoin at Brunswick, Me. Last year the thinclads topped Bowdoin, 76-59, and went on to win the State meet and place second in the Yankee Conference.

The frosh track squad met Lyndon Teachers College at Lyndonville Saturday. Freshman Coach Norm Strasstreiter reports that his crew is lacking in depth in the running events and is short of entries for the distance runs.

Cassani, a right handed hurler for the University of Vermont, won his third straight game and recorded his 6 foot, 180 pound athlete from Barre, Vermont pitched a 3 hitter against the cadets of Coast Guard for a 3-2 victory. His other two wins were against Bates, 3-0, and Upsala, 5-4, on the Southern swing during the spring recess.

Dick, who is enrolled in the College of Arts and Sciences, is a good student as well as a good athlete. He works hard at both. Dick works with rubber balls to build up his arms, and does other exercises to increase his effectiveness as a pitcher. When asked what style of batter is toughest to pitch to, Dick replied, "Every guy who stands up there."

Although he is only eighteen years old, Dick has had considerable baseball experience. A product of Little League, Babe Ruth, American Legion, and High School baseball; Dick has looked from the mound to face many a batter.

Dick was not given much attention by major league scouts at the end of his High School season because they were aware of his desire to continue his education; however, if he continues to pitch the way he has, he will become a prime prospect for major league baseball.

[illegible] first baseman gave [illegible] start as three hurlers [illegible] Hobbie, Harry Zingg, [illegible] DeNicola allowed Brandeis nine run scoring streak in the [illegible] innings. Coach Lapointe, [illegible] ing a daring move, [illegible] center fielder Levi Brown to hold the Judges in check for the remaining innings. Cassani's first college mound appearance proved to be flawless. In his [illegible] full innings, he held Brandeis scoreless, while [illegible] ing two hits and striking out eight.

After being down by a [illegible] to two score by the fifth inning, the Cats pushed four runs in the sixth and went on to even it up in the last half of the ninth, with two consecutive walks to [illegible] Jarrett, Dick Cassani, and Mike Pearo. Joe Pare immediately followed with a single that scored one run and Beg Godin wrapped out a two run scoring double that iced the game. Vermont scored three more runs in the tenth as the Brandeis nine fell completely apart.

Maynard Ducatte led the hitting department as he collected three hits in five times at bats, including a booming triple in the fifth inning. Bob Sheriff also added two hits to Vermont's total of [illegible] hits as he banged out two hits.

Coach Lapointe, although somewhat displeased by Brandeis's nine run effort was well satisfied with his team's drive and hustle. "They came in there when they had to and that's the way to win." The team came from behind to tie the game and went on to win it out in extra innings. Vermont's next games will be played on the 28th and 29th of April against the University of Rhode Island.

Pearo's sacrifice bunt. Nick Carmoli scored Silveira for the first run of the day when he reached second on a two base error. Beg Godin followed with a short single to right field and Carmoli streaked home with the second run of the inning.

Vermont picked up its winning run in the fourth inning as Levi Brown opened with a double to right center and came home on Silveira's single.

The big bat of the day was supplied by first baseman Joe Silveira as he picked up three

Outstanding UVM Students Annual Founders' Day

Above is a picture of the recent Founders' Day ceremony at which newly appointed officers were sworn in and class honoraries announced. (Photo by Coleman, S.P.S.)

New Honorary Members Declared

At 10:15 in the morning on Monday, May 1, the academic processional started, beginning the Founders' Day ceremonies. The purpose of this day is to honor the founders of the University by recognizing its outstanding students.

After the playing of the national anthem, the Invocation was given by the Reverend Donald E. Boyer. The Honors Day Address, on "The Young Scholar and the Present-Day World" was presented by Dean Edward Newcomb Brush, of the Graduate School at the University of Maine.

Recognition of students with the highest scholastic achievement in their respective colleges followed Dean Brush's address. Joseph Levin was then inaugurated as Chief Justice of the Student Court followed by Theodore Edgecomb as President of the Student Association. The oaths of office were administered by the outgoing Chief Justice, Sarah Weldon.

After the announcement of this year's prizes and awards, the new members of the honorary societies were introduced. The new members of the Class Honoraries are:

MORTAR BOARD: Patricia Bissette, Susanne Dane, Agnes Esposito, Deborah Hill, Peggy Hoke, Joanna Lull, Joan Manley, Anne Parker, Barbara Riffkin, and Elizabeth Soule.

BOULDER SOCIETY: Michael Collins, Maynard Ducatte, Theodore Edgecomb, Jerry Emery, Gabriel Jaffe, Joseph Levin, and Ralph Matthews.

STAFF AND SANDAL: Nora Barclay, Edith Candee, Lee Cauley, Janet Christenson, Virginia Clark, Nancy Davis, Barbara Driver, Barbara Hentz, Melissa Hetzel, Janet Hill, Toini Kalinen, Margaret Knandel, Anne Larrow, Phyllis Levine, Betsey Lisman, Drew Love, and Ann Maynes, Maryann O'Brien, Margaret Parker, Joan Powell, Lorraine Reilly, Ruth Roberts, Martha Russell, Betty Lou Sherry, Georgene Walter, and Grace Waters.

KEY AND SERPENT: Joel Bauer, Jeffrey Bennett, Paul Chervin, Stephen Clark, Jeffrey Falk, Frederick LaBelle, James Newman, Frank Pagliaro, Carl Sherter, and John Stahler.

SOPHOMORE AIDS: Carolyn J. Bard, Maryann Bartinoski, Mary Bean, Regina Cichy, Patricia Farrand, Brenda French, Brenda Hale, Linda Hardenburg, Suzanne Holt, Barbara Isham, Jean Lawson, Rosemary Leitner, Susan Lundvall, Bernadette Steen, Emalie Stoddard, Judith Strang, Carole Truitt, Betty Twitchell, Carol Watters, Susan Weatherby, Barbara Wool, and Elaine Zak.

Honored At Ceremonies

Brush States Youth Fortunate

"The young scholar of today is in an unusually fortunate position -- he is very much wanted and needed. His talents are more widely recognized than ever before by society in general; there is no question as to the existence of a significant place for him in that society. His situation justifies a good deal of self-confidence, Dr. Edward N. Brush told the Honors Day gathering in Ira Allen Chapel.

Dr. Brush, a 1925 UVM graduate and now Dean of Graduate Study at the University of Maine, was the featured speaker at the University of Vermont convocation.

"Achievements, such as those signified by your presence here as members of honor societies in an institution of the high quality of the University of Vermont, are sufficient reasons for facing the world with assurance that your intellectual talents will be valued and utilized," Dr. Brush added.

He went on to say that educated manpower is critically needed today, that training should not stop with the attainment of a baccalaureate degree. "A tremendous number of highly capable and well-trained people are needed to maintain and develop further the kind of society we have become."

Dr. Brush expressed a hope that further study would lead some of the students gathered in the Chapel to the college teaching field. In addition to a critical need for teachers, he said we also need more engineers and scientists, more physicians, more professional and technical men and more highly trained specialists of almost every conceivable kind. "Brainpower is, today, our most important resource. Our survival as a nation may well depend upon the use we make of our resources of brainpower."

Student Christian Assoc. Withdraws From SA Membership

On Thursday, April 26, the Student Christian Association of the University requested that it be dissolved by the UVM Student Association. The SCA presented the following request to the SA Council.

Those persons who are members of the Christian community on the campus of the University of Vermont--heretofore known as the Student Christian Association--find it expedient to discontinue their relationship in the University as a student organization.

This community of persons considers its primary purpose to be one of Christian ministry in the University of Vermont. This purpose is implemented through worship, study, and service. It is not an exclusive community which seeks members through the acceptance of a doctrine, creed, or constitution. Rather it is a gathered, voluntary community of persons who come together for the above mentioned purpose.

This community feels that as a "student" organization, being subject in its life and activity to the approval and jurisdiction of the "University Council," is contradictory to the community purpose and religious freedom. It also seems contradictory to the freedom and purpose of the University to be responsible for a religious body.

It seems, therefore, most honest to discontinue the Student Christian Association as a student organization for the above mentioned reasons and particularly as this community has not, nor can it in good conscience continue to meet the requirements necessary for recognition as a student organization.

1. There is no constitution for this community not any requirements for adherence to such. Participation in this community, furthermore, is voluntary and not limited only to students; hence, there is no method or provision for the securing of or cataloging members.

2. The strict requirements for organizational structure and procedure recommended by the University Council have not proven beneficial to the life of this community. Through experience this community has found that maintaining a highly organized structure has tended to develop a feeling of conformity and pressure, with a resultant loss of personal identity and initiative among the members of the community. Such a situation would appear to be inconsistent both from the point of view of a liberalizing higher education and from a Christian point of view.

To alter the relationship of this community in the University, therefore, the following proposals are made:

1. That the Student Christian Association be discontinued as an official student organization.

2. That no further financial aid will be requested or expected from the Student Association or University.

After several minutes of discussion, SA Council granted the request. Hillel and the Newman Club indicated that they have no plans to follow suit.

In other action the SA Council voted to continue financial support of other student religious organizations. The exact amount and the basis for distribution of the funds is yet to be decided.

Family Associates Plan Parents' Weekend

The Family Associates have planned the Parent's Spring Week End, which will be held May 12-13, 1961, for the parents of *all* UVM students. This is the first time that a week end has been designed to include all the classes of UVM. In the past, the week end has been for one class, as last year the class of '62' entertained their parents. This time, however, all the UVM parents have cordially been invited to attend the festivities, and to also take this opportunity to meet the parents of other UVM students, and to become more familiar with the university itself.

The schedule of activities is planned as follows:

Friday, May 12

4:00 p.m. Military Review
8:00 p.m. Baseball Game - UVM vs Mass. - or University Dance Workshop Concert

Saturday, May 13

8-10:00 a.m. Parent's Registration
9-10:00 a.m. Coffee Hour
10:00 a.m. Meetings of parents by classes
1:00 p.m. Baseball Game - UVM vs MASSA
4:30-6:00 p.m. Cocktail Hour
6:45 p.m. Banquet
9:00 p.m. Dance

There will also be a special preview of student paintings and arts and crafts on Saturday at Fleming Museum.

From the returns of the invitations sent out to the parents, over five hundred parents are expected. Four members of the Class of '64', Carol Lange, Helen Lott, Francis Leitner, and Margaret Mackay, have been working with the Family Associates in connection with this week end. They all hope that *everyone* will urge their parents to visit UVM.

Junior, Senior Honor Programs Criteria Given

Military Review To Be Held May 12

Profile Of A University

by Mr. L. Van Benthuysen

Perhaps the simplest way to humanize the [illegible] of the University is to suggest that it [illegible] like a student budget operation. That is [illegible] University never has as much income as it [illegible] all the things it would like. Indeed, it [illegible] hard-pressed to find the funds to do what it must.

It is true that the University probably has [illegible] sources of income than the average student has, [illegible] is also depressingly true that none of these sources is [illegible].

College presidents, in cynical moments, are [illegible] describe themselves as mere fund-raisers; though [illegible] be sure - the task of raising funds would [illegible] plausible use of the word, mere, as an adjective [illegible] remotely descriptive of the task.

The source of income is the student himself, who [illegible] for the privilege of going to college. No doubt [illegible] average student feels he pays handsomely for the [illegible] college, although - as the first article in this [illegible] pointed out - he does not pay what it costs the college or university to educate him. And if colleges did [illegible] students the actual cost of their education, there [illegible] some who feel that many worthy and qualified students would be priced out of the market.

Nevertheless, tuition is a substantial source of income to many colleges. Private colleges receive between 45 and 50 percent of their annual operating income from tuition. Public institutions generally receive less - about 8 percent. UVM receives about [illegible] percent of its annual operating income from tuition. The $1040 out of state tuition is the highest charged by any state university. The $416 resident tuition is third highest charged by any university.

The reason UVM's tuition is high? Simply stated, it is because UVM receives less tax support than most public institutions, and less philanthropic support than a great many private institutions.

The result is, though UVM was founded as a public institution - the second institution in this country to be founded by legislative action - its financial development has frequently been closer to that of private institutions than to public.

Private institutions receive about 15 percent of their operating income from tax sources; public institutions receive about 70 to 75 percent from tax sources.

Something of this shows up in the number of out of state students UVM accepts. While other New England state universities accept no or very few non resident students, the University of Vermont annually makes up about 45 percent of its student body from non residents although of course it gives admissions preference to qualified Vermonters, and the people of Vermont provide tax funds to make lower resident tuition possible.

On the other hand, the private institutions of Vermont give no admissions preference to Vermonters, and this shows up in their enrollment figures. Middlebury College, with a tuition charge of $1375, enrolls over 1100 out of state students and only about 100 Vermonters; Norwich, with a tuition of $900, enrolls over 700 out of state students and about 100 Vermonters. St. Michael's College enrolls about 700 out of state students and just over 100 Vermonters. All the other four-year private colleges of Vermont enroll, together, a total of over 800 out of state students, and just over 100 Vermonters.

Stated another way, the University of Vermont is the *only university anywhere* which gives admissions preference to qualified Vermonters and even so, it still

Newsletter

The current newsletter of the American Association of Land-Grant Colleges and State Universities devotes a full page to the University of Vermont and the "Report of the President 1960."

The newsletter makes note of the front and back covers of the UVM report featuring a reproduction of the Morrill Land-Grant Act and then carries the opening paragraphs of the report by UVM president John T. Fey.

Music Dept To Present Two Operas

... University of Vermont is presenting two operas by Gian-Carlo Menotti. "The Tele... ..., with the Mummers ... society, the charming rout of a tale based on a minute sophism, and "The Medium", with its Kafka-like sense of terror and its sense of impending horror, demonstrate very ... Menotti's literary ... and musical ... in the field of musical dramas. It should be and ... Theatre.

... opera ... will be May 18 and 19 ... Auditorium at 8:15. They are under the direction of Dr. Lidral, Chairman of the Music Department.

The Music Department of the University of Vermont is presenting an orchestra concert ... by the Burlington Friends of Music, Sunday, May 14th at 4 P.M. in the Ira Allen Chapel, under the direction of Iphocrates Papproutsakis.

The featured soloists are ... of winners chosen to perform with the UVM Orchestra. Gail Tyler of Monroe, N.H. ... Flute, Professor of Speech, and also ... Piccolist.

... of the Classical ... flute ... Audrey Sautter, ... of Rice Memorial in Burlington, will sing Musetta's Waltz; and Charles Anastasoff ... of Burlington High School, will play the Allegro Appassionata by Saint-Saens.

The concert will also ... works by Mendelssohn, Bizet and others. The introduction of high school talent as soloists with the UVM Orchestra promises to be something new and different.

Fraternity Reported For Violation

... Alpha Epsilon Pi Fraternity ... reported to the ... for ... at ... school prom.

... Willard Street Fraternity was ... involved ... drinking party.

... case will be before the Student Court, on Wednesday, April 26, the members of the court elected not to preside over the case. The action was placed in the hands of the ... Men, Earl Clifford.

The only source of information concerning the violation is ... Robert Adler, President of Alpha Epsilon Pi, had no comment to make about the alleged drinking party. But there is a conspicuous sign on the door of the stately, white fraternity house that cautions all members to give "no comment" to anyone.

Joseph Levin, Chief Justice of the Student Court had no comment other than advice against printing the story in the CYNIC.

Dean Clifford's position is that, "Problems involving groups or individuals unless they have a public dimension, are private as a matter of policy. We do not comment regarding details, but have no objections to comment from parties concerned."

The usual punishment for drinking violations is some of social probation.

Two approaches to the "man's deodorant" problem

If a man doesn't mind shaving under his arms, he will probably find a woman's roll-on satisfactory. Most men, however, find it simpler and surer to use Mennen Spray Deodorant. Mennen Spray was made to get through to the skin, where perspiration starts. And made to work all day. More men use Mennen Spray than any other deodorant. How about you? **$.45 and $1.00 plus tax**

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf," "The Many Loves of Dobie Gillis," etc.)

A ROBE BY ANY OTHER NAME

As Commencement Day draws near, the question on everyone's lips is: "How did the different disciplines come to be marked by academic robes with hoods of different colors?" Everybody—but *everybody*—is asking it. I mean I haven't been able to walk ten feet on any campus in America without somebody grabs my elbow and says, "How did the different disciplines come to be marked by academic robes with hoods of different colors, hey?"

This, I must say, is not the usual question asked by collegians who grab my elbow. Usually they say, "Hey, Shorty, got a Marlboro?" And this is right and proper. After all, are they not collegians, and, therefore, the nation's leaders in intelligence and discernment? And do not intelligence and discernment demand the tastiest in tobacco flavor and smoking pleasure? And does not Marlboro deliver a flavor that is uniquely mellow, a selectrate filter that is easy drawing, a pack that is soft, a box that is hard? You know it!

But I digress. Back to the colored hoods of academic robes. A doctor of philosophy wears blue, a doctor of medicine wears green, a master of arts wears white, a doctor of humanities wears crimson, a master of library science wears lemon yellow. Why? Why, for example, should a master of library science wear lemon yellow?

Well sir, to answer this vexing question, we must go back to March 29, 1811. On that date the first public library in the United States was established by Ulric Sigafoos. All of Mr. Sigafoos's neighbors were of course wildly grateful—all, that is, except Wrex Todhunter.

Mr. Todhunter had hated Mr. Sigafoos since 1822 when both men had wooed the beauteous Melanie Zitt and Melanie had chosen Mr. Sigafoos because she was mad for dancing and Mr. Sigafoos knew all the latest steps, like the Missouri Compromise Mambo, the Shay's Rebellion Schottische, and the James K. Polk Polka, while Mr. Todhunter, alas, could not dance at all owing to a wound he had received at the Battle of New Orleans. (He was struck by a falling praline.)

Consumed with jealousy at the success of Mr. Sigafoos's library, Mr. Todhunter resolved to open a competing library. This he did, but he lured not a single patron away from Mr. Sigafoos. "What has Mr. Sigafoos got that I haven't got?" Mr. Todhunter kept asking himself, and finally the answer came to him: books.

So Mr. Todhunter stocked his library with lots of dandy books and soon he was doing more business than his hated rival. But Mr. Sigafoos struck back. To regain his clientele, he began serving tea free of charge at his library every afternoon. Thereupon, Mr. Todhunter, not to be outdone, began serving tea *with sugar*. Thereupon, Mr. Sigafoos began serving tea with sugar *and cream*. Thereupon, Mr. Todhunter began serving tea with sugar and cream *and lemon*.

This, of course, clinched the victory for Mr. Todhunter because he had the only lemon tree in town—in fact, in the entire state of North Dakota—and since that day lemon yellow has of course been the color on the academic robes of library science.

(Incidentally, the defeated Mr. Sigafoos packed up his library and moved to California where, alas, he failed once more. There were, to be sure, plenty of lemons to serve with his tea, but, alas, there was no cream because the cow was not introduced to California until 1931 by John Wayne.) © 1961 Max Shulman

* * *

And today Californians, happy among their Guernseys and Holsteins, are discovering a great new cigarette—the unfiltered, king-size Philip Morris Commander—and so are Americans in all fifty states. Welcome aboard!

Editorial:

Meet The Press, JFK

[illegible] American Newspaper Publishers Association at the Waldorf-Astoria [illegible]

The President urged his audience of newspapermen to exercise self-censorship of any news that would be detrimental to the national interest if published. He [illegible] this stand by asserting that [illegible] was [illegible] a great threat to national security.

This is outrageous to a point, but what is unacceptable [illegible]

The President is right when he says that just as in wartime, items of military secrets in these days must be avoided. The press must not weaken national defense by giving away military secrets to potential enemies.

But this is the point at which censorship, even so [illegible] a small cause.

If the censorship will be used as a lever for power politics, then it is wrong.

If the censorship will be used to disguise aggressive acts [illegible] then it is wrong.

If the censorship will be used to distort the world situation, give a false impression of U.S. strength in the world, or protect the administration from public [illegible] then it is wrong, wrong, wrong.

We've got the protection ourselves from the Russians. Let us make very sure that we accept, in the process, make ourselves as guilty as they. We do not want [illegible] to replace [illegible]

[illegible]

Never On Saturday

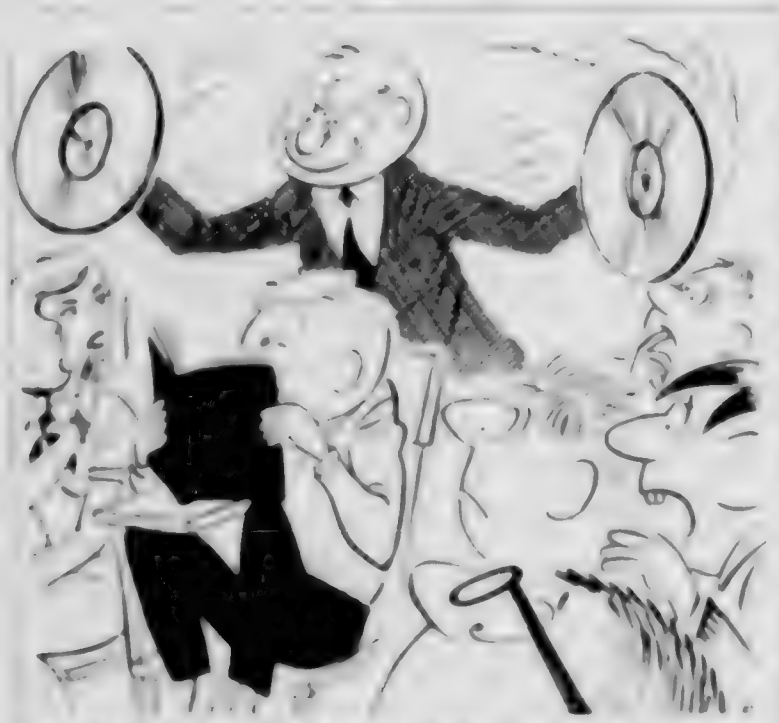
[illegible] there have been telling us for months now that we should stop worrying about the Reserves Officers Training Corps. Students also say our men are sick and tired of seeing their officers' good names and good intentions besmirched in print.

And so while others have been dutifully polishing shoes and cleaning unsalutated [illegible] we have retreated to a subway or cave.

But while we were sulking, others were skulking. And with a brilliant offensive maneuver, the ROTC Department, in the fine military tradition has captured Saturdays.

Yes, Saturday has fallen! Despair, woe, waffle, tear -- Saturday is theirs!

Beginning next semester there will be regularly scheduled Saturday drills for ROTC students. Not only is this a superb military movement, but an excellent step in the cold war. Think of the additional control that the administration can administer to freshmen who will be at school [illegible] week end. Joy to the just. Probation to traitors!



One final word of caution . . . Beware the ides of Sunday!

Quickie

[illegible]

[illegible]

Sincerely,
Paul

Letters To The Editor

More On WSGA

[illegible]

[illegible] was [illegible] personal and [illegible] which already [illegible] community [illegible] of government [illegible] Notre Dame [illegible] would [illegible] something like "Best of all [illegible] Campuses we find [illegible] setting aside [illegible] a haven, eating our [illegible] contrasted, of course, singing the Song which unites all in friendship: Lovely Lake Champlain. And [illegible] we are compelled to sing of a different nature. Once again we are kept from being a "Best of all possible" spectators.

So, my dear Candide, you did [illegible] these honorable sentiments of hearing evil from [illegible] us at that great main desk in the sky. Yes, Candide, this is really a "Best of all possible" student government, where I know you will [illegible] to be interested.

Pangloss

Save Kake Walk

To the Editor

I have read with interest the current Editorial appearing in The CYNIC regarding Kake Walk as being offensive to the negro students. May I call your attention to the fact, that throughout this great country of ours, The University of Vermont, is known chiefly for two things. First, its great medical school, and secondly, for its Kake Walk Festival. Who knows and who cares if the Marquis de la Fayette laid the corner [illegible] we could get [illegible] Kake Walk [illegible] pass with the girls to [illegible] the representatives. Then I thought I might get four votes, but that too seems almost impossible. As a matter of fact, it looked like I would have to offer a bribe to get even me.

But let me [illegible] That is something of a windfall. So you don't [illegible] ROTC as much as I do, but at least you have the courage of your convictions. So tell me next term, or semester, or whatever you call it, and make the three of us, by showing the rest that at least some of us have the nerve to stand up for our rights and convictions, can get the compulsory ROTC abolished. As I recall, it was something like that at Colorado.

So be it that you won't vote me. Then stop flapping your lower lip about the apathy and lack of action at UVM. As long as you expound so much, either help me or stop it. And if you don't help me, don't offer excuses, rationalizations, more words, but just turn to something where action won't be necessary, or will not be dangerous, at any rate. After all, which is worse, apathy or hypocrisy?!!!

But you two seem to have such courage and convictions that I trust you will join me in an almost single-handed attempt. AND I AM NOT KIDDING!!

Yours truly,
Comrades-in-arms,
Kim A. Borishkin, '64

Office Hours

Student Association President Ted Edgecomb has announced that he will be available for consultations with members of the student body in his office (Room 36, Billman at the following times:

Mondays	10:00-11:00 A.M.
	12:00- 1:00 P.M.
Tuesdays	9:00-10:00 A.M.
Wednesdays	10:00-11:00 A.M.
Thursdays	9:00-10:00 A.M.
Fridays	10:00-11:00 A.M.

Any student wishing to discuss SA and its activities is welcome to take advantage of these hours to talk to [illegible]

Hypokinesis- Topic Of Raab's Book

... W. Kraus, professor ysical medici... ... director of the of Vermont, [illegible] ... of Medicine, is also ing this week. ... Dr. Kraus is co-author with Dr. Hans Kraus, of a book ... "Hypokinetic Disease: Diseases from Lack of Exercise" being published this week. Dr. Kraus is associate professor of physical medicine and rehabilitation at New York University. This weekend, Dr. Raab will be in Thomas for a three-day forum and medical conference dealing with the detrimental effects of lack of exercise on the heart, and with the early mass prevention of heart disease through organized reconditioning programs.

In their book, published by the C.C. Thomas Publishing Co., Springfield, Ill., Drs. Raab and Kraus deal with all aspects of physical inactivity and its importance in the cessation of muscular deficiencies, low back pain, postural imbalance, general metabolic and digestive disturbances, and its basic contribution to the rampant degenerative diseases of the heart and the enormous increase of cardiac deaths in the "industrialized, motorized, physically and spiritually deteriorating institutions of the Western World."

A strong plea is made for the earliest possible establishment in this country of rural reconditioning centers for mass health preservation, similar to thousands of such centers which are operated by governments, industries and insurance companies in Western Europe and communist countries for millions of people. The co-authors go on to say that research attempts have yet been undertaken in the United States, and that in the field of organized medical health preservation, we are lagging much farther behind the Russians than in space travel.

The book is introduced by prefaces from Drs. Paul D. White, the famous heart expert, and Howard A. Rusk, a leading authority in rehabilitation medicine.

Dr. Kraus is widely known as the main initiator of the Youth Fitness Movement in this country and as the author of the Kraus-Weber test for physical fitness.

AFROTC Departs

On Tuesday, May 9, the last graduating class of Air Force ROTC cadets will present to the University of Vermont a new fifty-star U.S. flag. The flag has been flown over the Capitol Building in Washington, D.C., and was obtained by the cadet corps through the assistance of Vice-President Lyndon B. Johnson.

This year marks the tenth the last year in which the U.S. Air Force will maintain a Department of Air Science at the University. Throughout these ten years, the cadet corps has distinguished itself by outstanding achievements in public drill performances, AFROTC drill competitions, academics, and in the number of distinguished graduates. The cadet corps is justly proud of its record at UVM, and wants to be remembered as a group which added prestige and respect to the U.S. Air Force and to the University of Vermont.

The cadets will present the flag to President Fey at a public Retreat Ceremony to be held in front of Ira Allen Chapel at 4:00 P.M. on 9 May 1961.

PROFESSORES

Dr. Reuben Torch, Professor of Zoology at the University, discusses his views on the use of the machine for education. (Photo by R. Coleman, S.P.S.)

A while ago, Professor (Dr...) ...n expounded on the virtues ...f educational TV. I find myself in complete sympathy with his point of view, but it appears to me that the real break-through in education will have its origin in the further development and utilization of the teaching machine.

It is claimed that through the use of these machines, students learn foreign languages, mathematics, English, etc., in approximately half the time it ordinarily takes in a classroom situation. Moreover, the students proceed at their own rate of learning, and the superior student is not retarded by the slower student. While it is true that these machines are being developed for use in elementary and secondary schools, it is clearly just a matter of time before progressive administrators take full advantage of their potentialities by incorporating them into the college curriculum.

Consider the advantages that would accrue to the university employing these machines. Obviously, there would be significant monetary advantages, since there would be no need to hire a faculty. At the present time, the most expensive machine costs about $4,200, which approximates the salary of an instructor. Since there are many faculty members at the assistant professor, associate professor, and full professor levels, the extra funds tied up in their salaries could be diverted toward purchasing additional machines. This would change the present student-faculty ratio to a very respectable student-machine ratio. Moreover, the administration would not be faced with the sometimes difficult problems of faculty raises and promotions. Theoretically, at least, the machines would continue to function at the same salary as long as they received proper lubrication and an occasional dusting. These maintenance services would become the major responsibilities of the administration; and in council meetings, teaching efficiency would be related to quality of oil and nap of cloth. An indirect but nevertheless significant benefit to the facultyless university would be the additional parking spaces available for student

(continued on page nine)

The Circular File

by MIKE GROSSMAN and DICK SNIDER

Mr. Douglas Filler has said of The Circular File in his letter to the Editor (Cynic April 27, 1961), "Indeed you have excelled to the utmost in an art that is currently, and I might add sorrowfully, becoming extinct: namely, that of creating a masterpiece of journalism while saying absolutely and irrefutably nothing."

It must here be explained that Dick handles the writing, while Mike supplies the ideas. Therefore, Dick thanks you gratefully for your compliment; however Mike does not feel quite so flattered, as your letter does not treat his responsibility so kindly.

HOW MANY STUDENTS? HOW MUCH INSIGHT?

We question Mr. Filler's statement that this column says "absolutely and irrefutably nothing." Does it, Mr. Filler? How many UVM students are like you, "studying to the exclusion of a few other activities"? How many of us here, "by virtue of a genuine desire to improve himself, spends thousands of hard-earned dollars to gain additional insight into life in general"? Not very many. To those who do, with this purpose in mind, go our heartiest congratulations, for this is primarily the object of a college education. But they are a minority, a handful, unnoticed beside the rest of UVM's students. Perhaps you, Mr. Filler, may be one of those people who strive for excellence, but you certainly aren't crowded by students of similar interest.

ACTION WITH A PURPOSE

As for "pushing beds down 42nd Street" and joining the beats, that is hardly the aim of this column's writers. On the contrary, we advocate *action with a purpose*. We all complain about some of the new rulings, such as compulsory living in the dorms, but how often does do anything about it? Compulsory ROTC is an old and talked-out issue, yet the desire for change is still prevalent. It is talked-out because we talk too much and act too little. No, we don't go for "crowding into phone booths" either. But we do go for doing something, at least trying to improve the school to which we pay "thousands of hard-earned dollars."

We suggest, Mr. Filler, that on closer reading of the "Circular File", you will find more than a desire to push beds or "steal panties". Indeed, you will find a petition for meaningful acts which have some value to the student body, collectively and individually - quite the opposite of your own interpretation.

University Players Present "Janus"

Robert Frost Enchants Lane Series Audience

Robert Frost talks to UVM student, Ann Drexler, after presentation. (Photo by Coleman,

A standing-room-only crowd was on hand to hear poet Robert Frost Tuesday evening Apr. 25 when he returned to the University of Vermont for the third time.

His appearance in the Ira Allen Chapel was under the auspices of the Lane Chamber Arts Series. Frost's appearance was completely sold out, according to Lane Executive Secretary Jack Trevithick.

No stranger to Vermont audiences, Frost has just returned from Israel where he gave a series of readings and lectures at the Hebrew University of Jerusalem during March. Prior to that, he recited his poem, "The Gift Outright," at the inauguration of President Kennedy.

Born in San Francisco, Frost moved to Massachusetts at 11. His first published poem appeared in his high school newspaper when he was 16 studied briefly at Dartmouth then at Harvard, but left ing his education at either He returned, in later years however, to serve as poet residence at both institutions and at Amherst and Middlebury.

His public honors have been many: four Pulitzer Prizes for poetry, in 1924, 1931, 1937, 1943; innumerable honorary degrees, including awards from Oxford and Cambridge; membership in the National Institute of Arts and Letters, the American Academy the Mark Twain Medal, the office of Consultant in Poetry to the Library of Congress and formal felicitations from the U.S. Senate on his 75th and 85th birthdays.

His Tuesday appearance in the Lane Chamber Arts Series was the concluding presentation in the Series which was inaugurated this year.

Dance Workshop

Marsha Snyderman and Carol Shapiro rehearse for the Dance Workshop's Spring Concert to be held May 12th and 13th. (Photo by Coleman, S.P.)

Spanish Club Presentation

El Circulo Espanol presented a "Hands Across the Border" panel discussion on Latin American affairs Friday evening, April 21, at Southwick Memorial. Serving on the panel were Professors Morris Simon and John Hubbell; Miss Sheila Gepp of Uruguay, Mr. Raul Bravo of Chile, both graduate assistants at the University; and Mr. Frank Ponce, moderator.

Professor Hubbell opened the discussion with comments on the problems involved in communication between North Americans and Latin Americans as a result of differences in language, customs, and cultural backgrounds. He stressed the need for a greater understanding of these differences as a step toward improved relations among the peoples of the western hemisphere.

Professor Simon pointed similarities and differences in the political, social economic systems of the United States and the nations Latin America. Miss Gepp Mr. Bravo presented their pressions of customs attitudes observed since arrival in the United States.

Other subjects discussed were U.S. and Latin American attitudes towards the recent Cuban crisis; President Kennedy's "Alliance for Progress;" and the need for agrarian reform, industrial development, and improved transportation facilities in Latin America today.

Attending the discussion guests of El Circulo Espanol were students from Latin America, Mexico, Venezuela, Columbia and Ecuador.

STUDENTES

(continued from page five)

[illegible] seem though he might be an ardent Republican, the automother --- and every other member of that greater labor [illegible] --- has pledged to elect a whole slew of Democrats during recent years. In this case, a man accepts not only an economic "package" with his job but a [illegible] as well.

And via that it embraces [illegible] of the most acclaimed and highly paternal international Ladies Garment Workers Union through the recipient of government controlled "cradle to grave" benefits to the [illegible] Each, though on a distinct socio-economic plane, shares a common fate: the loss of much human responsibility, freedom, and dignity.

A Teasing Piece

But what has this to do with such things as [illegible] Association? By what twisted logic can one link the [illegible] with [illegible] will grant that they are [illegible] societies like ours? One answer is simple [illegible] and [illegible] would like to remember the [illegible] are effective training grounds for millions of future sheep --- and [illegible] all willingly, if not eagerly, be sacrificed --- and sacrifice --- to the big [illegible]

What better preparation for the meek acceptance of that which lies ahead is there than a situation like [illegible] found in most [illegible] today? A [illegible] accepts, or [illegible] easily to accept, and depend on, a neat package. What college students today are forceably treated to "benefits" ranging from [illegible] meals to -- for many -- a controlled living schedule and moral code. What better way to assure the type of [illegible] necessary to maintain our "way of life" than to shackle the society's young minds at a time when they should be freest and truest to the iconoclastic creed of the young intellectual? I can think of none.

"But," you say, sure that you are, "surely this is not so. Surely the young mind is not controlled merely because the body is."

The answer to this is two. First, I must point out that it is not mere physical control which is rampant here. It is a complete erasing of personal responsibility. And when one is rotted of responsibility, fit --- as it were --- into what appears like merely a physical mold, a docile mentality seems to follow. If all who are hailed as just -- parents, teachers, and finally university officials -- treat one as a spiritual child, child-like reactions will surely follow.

But my second answer -- a more pragmatic one -- seems more convincing. Look around, doubters! Do you see a free spirit breathing within the breasts of your fellow students? (and of yourself?) When they are rendered impotent by bureaucratic nonsense do they fight the system which breeds the nonsense? Do the Vermont women students, for instance, stay out all night in protest of rigid curfews? Do they boycott useless mass meetings? Or do they sign petitions, attend discussions, and in short go right along with the very system which suppresses them? With the answer to these questions comes the second answer to your doubts.

To Stem the Tide

Perhaps with this answer also comes a thought: "Aha!" you say, "If the University supplies the society with the material which in turn gives the University succeeding new generations of organizationalists perhaps the cycle can be broken."

"Right you are," is my enthusiastic answer to that. To stop the spread of mosquitoes, one simply eliminates one of the stages in the life cycle of the insects -- [illegible] is the solution here as well. We must break the chain.

"But", you ask, that old look of despair again creeping across your face, "where? At what stage do we check this evil growth?"

At the obvious stage, right here at The University. The University which has always been the haven for the free mind. The University which helped rekindle the spark of culture throughout Europe after the end of the Dark Ages. The University which has harbored such a wide variety of changers as Ghandi and Schlesinger, Oppenheimer and Castro, the Japanese opponent of the U.S. - Japan Mutual Security treaty and the Hungarian freedom fighter. The University which, in America, is killing rather than abetting the unfethered mentality; which is protecting rather than crushing the cult of the security minded.

HERE is the place and NOW is the time --- before we are too far gone.

AFROTC Posts Announced

[illegible] has announced the selection of [illegible] Cadet Colonel.

Also announced were cadet [illegible] Staff. The appointees are Cadet Majors Gordon H. Spragg, [illegible] E. McCarthy, Roland Fowler, Joseph R. Buley, and [illegible] Eldred, William R. Benner.

Appointed to command positions in Squadron 1 were, Cadet Major William A. Hill III and Cadet Captains Morton A. Lord, Richard T. Aldinger, and Frederick B. Harrington.

Appointed to Command positions in Squadron II were, Cadet Major Ronald F. Kilburn and Cadet Captains Vernon F. [illegible], Joseph R. Buley, and [illegible]

Peace Corps

(continued from page one)

[illegible] selected and [illegible] training started.

At a university [illegible] teer will learn about [illegible] ganyika, about its [illegible] mores, tradition and [illegible] He will study our [illegible] democratic institu[illegible] will begin a physical conditioning program [illegible] up on his skills [illegible] similar to Tanganyika's.

Next, according to [illegible] plans, the Volunteer [illegible] participate in an [illegible] haustive training period [illegible] camp site in a [illegible] forest abroad.

Physical and mental conditioning for the [illegible] Africa will be stressed. Lectures on tropical [illegible] will be given. Programs designed to develop [illegible] the stamina, self-reliance, adaptability and endurance [illegible] the Volunteers are [illegible]

In most Peace Corps projects, the local language must be taught in a stateside university. For this project, however, the Tanganyikan government asked that it be permitted to use its textbooks to teach Volunteers Swahili.

The first seven weeks in Tanganyika will be spent in a camp on the slopes of Mt. Kilimanjaro where the Volunteer will study Swahili and learn about his work there.

After this course, the Volunteers, in groups of two or three, will be assigned to provincial capitals, which will serve as home bases for the safaris into the bush to plan the needed roads to the isolated native villages to the main highways.

In Tanganyika, the Volunteer will receive enough money to live a simple existence but not exactly at the level of the local populace. The Volunteer will have all his needs -- food, housing, clothing and transportation -- provided for. The Volunteer will need no money of his own and need not fear that his subsistence will provoke hunger or poverty. Provision will be made for recreation, occasional travel during relief periods and medical care.

The work will be hard. It may be frustrating. It will be dangerous. It certainly will be lonely. But it will also be exciting and rewarding.

The Volunteer's work will test his patriotism, his courage, his endurance. He will learn from another culture, he will do a needed job, he will help his country in time of need and help the cause of world peace. The Volunteer will be answering the call of what he can do for his country, not what his country can do for him.

When he returns after two years service, the Volunteer will receive $75 for each month spent overseas. He will have the services of a Peace Planning Board to help continue his career.

During his Volunteer service, the Volunteer will be deferred from the draft. When he returns home to a satisfactory useful job, his deferment will continue.

Married couples without children are welcome. It is provided each does a needed job in the host nation.

Liberal arts graduates will be in great demand for a number of needed tasks. A liberal background, plus Peace Corps training, will qualify them for many jobs.

Teachers are in short supply everywhere, and many nations have already indicated they want teachers of English.

Anyone requesting further information about the Peace Corps should write to Peace Corps "Fact Book", Peace Corps, Washington, D.C.

Honors Program

(continued from page two)

interested. Three credit hours per semester may be gained, if this program is satisfactorily completed.

Applicants for Senior Honors must also have an 85 average and should excell in the field of their choice. Candidates must present a written report of the work that they have accomplished in their field. Grades will be based on the results of this paper. They must also demonstrate their proficiency in the particular subject by passing an oral examination given by one or more members of the specific department and one member from a department of an allied field. In view of these criteria and the recommendation of the department, the Committee on Honors may recommend to the Dean the awarding of Senior Honors, on completion of all requirements for graduation.

TEACHERS WANTED: $5000 and up. Vacancies in all western states. Inquire Columbine Teachers Agency, 1320 Pearl, Boulder, Colorado.

ATTENTION: Graduating Seniors

LIVE, WORK AND PLAY IN VERMONT

The accessory is equipped with a tiny ...phone into which the student relates the various ... why the machine is responsible for the student's ... to get beyond question 14. After a suitable ...erval, during which the student gets the definite ... impression that the machine is considering his problem, the machine dramatically punches a large hole in a small card which is retained by the student. Gratified and relieved, the student returns to his academic work with the renewed vigor that results from the knowledge that his problem has received personal attention.

Of course, all work and no play make Jack a dull boy, and Jill a dull girl. At UVM (*Universitas Viridium Machinarum*, the university of the green machines), there would be even greater opportunity for intellectual extracurricular activities than under the present system, simply because the students would learn the subject material at a faster rate. Entire months could be devoted to social activities, and Kake Walk could be accorded much greater significance than it now receives. Various kinds of king, queen, and popularity contests could be held, not the least of which could be "The Most Popular Machine on Campus" contest. Education would become a leisurely process, and more time would be available for the extended intellectual discussions that presently take place in the Coffee Shop and lounges.

Last but not least, in order to fulfill completely its obligation to society, the University would be required to award a symbol to the students who successfully completed the machine curriculum. Without doing away with present tradition, the University could award an appropriate degree such as a Bachelor of Machines, or simply a B.M.

Profile (from page two)

... educational opportunity for proportionally ... more non residents than is true for most public universities. What's more, UVM has traditionally done so, and President John L. Bev, as former President Carl ... has predicted that UVM will always keep room for its out of state sons and daughters.

To recap, then UVM receives about 35 percent of its income from tuition, about 48 percent from state, federal and county funds. The remaining income comes from sales and services which produce about 12 percent, and from endowments and gifts and grants which amount to about 5 percent of UVM's income.

The story of how UVM spends its money is, just like any budget story, far more fascinating than where the money came from, and the third article in this series will attempt to shed some light on this subject.

CLIFFORD DICTATES NEW HOUSING REGULATIONS; STUDENTS PROTEST EN MASSE

Editorial:

Fight It!

Now there *are* certain fine points about our fine new program that haven't been mentioned. While the Dean has expressed warm sentiments regarding "unity", "transition periods", and "student health"; there are some things he has just failed to mention.

For instance, there's the business about how no student shall have a private entrance to his room (the breathsmellers clause) and the gem about the landlord not being able to leave town (the Boost Burlington clause.) These two program points have nothing at all to do with student health, education or welfare.

What they do concern is whether or not a senior student, twenty-one years of age, has the right to live in the manner that he sees fit. Since the Dean of Men is having all landlords report all infractions to none other than himself, it is evident that he believes that the senior man still requires a guiding thumb from a local Dean or kindly householder.

The Dean claims to have the student welfare in mind, but we can just picture the kindly householder soaking the student for a few extra bucks with the threat of a nasty monthly report.

Another facet of the benevolent paternalism program that hasn't come to light is the Dormitory Councilors incident. Many of them have chosen not to return to the fold because of the Dean's new policy. It appears that he now wants the 100% Councilor -- one who will even turn in his fraternity brother! The cause comes first!

Now there *are* certain steps that can be taken to beat the hell out of our fine new program.

Take the dorm case for instance. Right now there are very few dorm counselors. Most of these that aren't graduating are unwilling to become 100% Rat. If nobody in the college applies for their jobs, our smiling friend is in a bit of a jam. Of course someone will apply to be a professional fink. But the guy who does won't be a person -- he'll be a "substitute acceptable to the University."

As for the rest of the odius policy: the only way to beat it is to apply direct pressure hard enough, often enough, and low enough. We must work fast and with determination through STOP!, the joint organization of SA, IFC, Men's Residence Hall Council, Panhel, WSGA, and the CYNIC.

More specifically, if one doesn't like the Dean's policy, all one has to do to let the school know it, is to walk (running violates a Blue Law) to your nearest alumni office (across the street from Waterman) and withdraw the Gym Fund donation that one undoubtedly made in a moment of weakness. How many thirty-five dollar losses can good ol' UVM take before panic sets in?

Two several seniors that have already taken this step tell us that they are met by cold stares and tear filled eyes from the alums. Tch. But one musn't forget to tell them that the money will be returned if the benevolent one grows up. This measure will be our last resort!

Let's beat this thing.

Why not?

by Robert J. Stein

The purpose of this article is to inform the student body as to why STOP! has been organized and just what STOP! is.

Tuesday afternoon a set of rules was presented to a meeting of the I.F.C. by the Dean's office. These rules, the reasons for the birth of STOP! are briefly this:

THE RULES, THE RULES

1. All Freshman, Junior, and Sophomore men will be required to live in either dorms or fraternity houses.

2. No Pledges will be permitted to live in fraternity houses unless it proves impossible to fill the whole house with brothers.

3. No seniors will be able to live in apartments, as we now picture apartments. Instead, seniors will be required to live in either dorms, fraternity houses, or University approved "apartments". These "apartments" are to have the following restrictions:

a. apartments must be no larger than one room with no private kitchen facilities.

b. a university approved resident (usually the owner of the house) must be present at all times. If a resident goes away for any reason, he must be replaced by a University approved substitute during his absence.

c. apartments are to have no private entrances.

d. the apartment owner must report all infractions of the rules to the dean's office at once.

e. these apartments must be open to inspection by the dean's office at all times.

In short, the "apartments" will be controlled in a way very wimilar to the dorms. Each apartment will have to have an amateur dorm counselor and chaperone.

4. All students of the University will be required to eat in either a SAGA cafeteria (with a contract) or in a fraternity house. Nobody will be permitted to cook in apartments or to eat any place except the abovementioned.

While there are many other smaller points in the rules, I have itemized the most objectionable of these.

Tuesday evening at 11:00 an emergency meeting of representatives from all the fraternities and dorms was called. After much debate it was decided to attempt to combine our two possible weapons, publicity and financial pressure. It was agreed to circulate petitions and to meet in front of Waterman at 9:00 Wednesday morning. The petition read:

"We, the undersigned, hereby protest the proposed housing regulations for senior men in the most emphatic terms. We, therefore, resolve not to make contributions of any kind to the University of Vermont upon graduation and for ten years after if these proposals are put into effect."

A small part of the 1200 students demonstrated on Thursday morning. *(Photo by Coleman, SP'1)*

LIST OF GRIEVANCES

After this meeting (Tuesday night) another meeting was held at one of the fraternity houses. This meeting was presided over by Jerry Emory, I.F.C. President. A list of grievances was drawn up which, while being concise and orderly, actually condemned the whole policy which the administration is planning to put into effect.

At 9:00 Wednesday morning the rally was held. While the attendance was not as great as had been anticipated, it definitely showed that the student body was uniting. The rally broke up about 10:00 when Jerry Emory, having just talked to Dean Clifford, convinced the group to return at 4:00 that afternoon for another meeting. During this rally (9:00) Dean Clifford was hung in effigy. This was not done by members of STOP! but was done by several students acting entirely independently.

At noon a meeting was held by the officers of the IFC, S.A., Men's Residence Hall Council, and the CYNIC. At this meeting STOP! was officially formed, and was to be supported by these four groups. STOP!'s official release is printed in this issue. Pan-Hel and W.S.G.A. soon joined the organization.

At 4:00 a meeting was held in Lower Waterman. At least 600 people attended and the lounge was filled to capacity. Officers of all four organizations involved spoke. Jerry Emory stated several objectives. Dr. Chaplin spoke at this meeting, wished STOP! luck, and told us that we had the support of much of the faculty. He stated that he "would rather teach people, not the mechanized sheep which this administration is attempting to shape all UVM students into."

The meeting ended with a plea for complete support of STOP! and with the decision to hold a rally outside Waterman at 11:00 the next morning.

The Thursday meeting was held after the CYNIC deadline and will be covered in the CYNIC next Thursday. Plans have been set for a rally and informative session on Monday, 12 noon, on the steps of Waterman sponsored by STOP!

FLASH -- Several hundred demonstrate at midnight rally Thursday night. Many courageous men spent the night at a "sleep-in" on the green in protest.

Support STOP!

RALLY - 12 noon, Monday, on steps of Watermen.

Editorial:
How To Fight It

A mass demonstration of the student body was held on Wednesday morning in front of Waterman Building. This was in direct opposition to the proposed housing regulations for male undergraduates which will go into effect in the fall of 1962. By that afternoon petitions, posters, and statements speaking out against this proposal were distributed over the campus. The major representative organizations of the University united into a STOP! (Society To Oppose Paternalism) Committee, and releases concerning the policy of this group were distributed. A meeting was held at 4:00 in the Student Lounge, at which a representative committee of STOP- members, along with Professor Chaplin of the Psychology Department, voiced disapproval of the new policy. Present were TV, Radio and Newspaper reporters.

Such a mass publicity movement proved its value by the fact that a portion of the housing regulations was changed. If we have some concessions, we can and will get more, especially if the entire student body will co-operate by peaceful and lawful means.

The rules which we are attempting to have revised before they can be effected are those which will in the future regard the male students of UVM as children. STOP! if fighting a proposal that fails to recognize any existing maturity in university students. Therefore, the means of combatting this proposal must be mature.

Rioting and vandalism will not favor the cause, but will give unfavorable publicity.

Mass demonstration and boycotting will further the cause. Don't stop STOP! If you are against the housing regulations you can let the administration know the immense disapproval by numerable peaceful methods.

Petitions started circulating on Wednesday afternoon. These, following the precedent of those started by the Men's Residence Halls, stated that there will be no financial aid by UVM students after graduation if the rules of housing proposed by the Dean of Men's Office go into effect. Show your disapporval by signing these.

At present the University is building a gym for our future, for which many undergraduates have pledged money. If we do not receive satisfaction, we can and will call for the students to receive these pledges.

May 12-14 is Parent's Week end. A demonstration on one of those days would certainly get across the idea of the distaste which exists for such proposals.

As insignificant as individual letters may be, if enough of them reached President Fey's Office the end result would be enormous.

These are a few of many ruly methods by which you, as a member of the student body in support of STOP! can make yourself heard by the administration. However you chose to join the campaign, though, any use of forceful or childish means would not be a display of your maturity, which is basically the point in question. The housing policy coming from the Office of the Dean of Men is in effect a challenge. How will can you handle this to prove that you are mature college student, and not merely a child who needs paternalism?

PRESS RELEASE ANNOUNCES STOP!

The following statement was issued to the press and a copy was sent to the Dean of Men, the Dean of Administration, and the President, following the organization of STOP!

We, the University of Vermont Student Association Council, Interfraternity Council, CYNIC, Men's Residence Hall Council, and Independent's have united in our opposition to the new proposals for men's housing regulations. We are now acting concurrently through STOP!- the Society To Oppose Paternalism.

We are of the firm opinion that senior university students are mature enough to decide for themselves, where they would like to live and eat. Furthermore, we believe that the University has no right to dictate where or under what conditions we are to live.

It is our belief, that the new policies will have an extremely detrimental effect on the student body as well as forcing a financial burden on Burlington householders. We feel that our organization is representative of the entire student body and therefore, we intend to oppose those regulations by all non-violent means.

As this is primarily intended as an announcement of the organization of STOP!, all further releases will be issued through the Vermont CYNIC at Waterman Building, UN 4-4511 ext. 344.

The Women's Student Government Association and the Panhellenic Council were added to the list of members of STOP! after this release was issued.

The Vermont Cynic

Published weekly, every Thursday, during the college year, by the students of the University of Vermont and State Agricultural College. Editorial and business offices in Waterman Building, Burlington, Vermont. Telephone 4-4511 Deadline for notices is Thursday, one week prior to date of publication. Founded in 1883. Subscription rate $4.00 per year, single copy, ten cents. Second Class Postage Paid at Burlington, Vermont.

Official UVM Policy Proposal For Single Men's Housing

May 3, 1961

TO: Undergraduate Students

SUBJECT: Undergraduate Housing Policy for Men

FROM: The Office of the Dean of Men

With the completion of the three new men's residence halls now under construction, the University will be able to move in February of 1962 in residence halls or in fraternities.

In effect, this will mean that the present 800 undergraduate students who cannot now be housed on campus will be reduced to about 400. It is estimated that 200 of these will be married students, and that about 200 will be unmarried senior men.

With completion of the new men's residence halls, the University also will be able to do what most colleges and universities feel is both necessary and desireable, provided on campus housing for most of its undergraduate students and supervised and approved off campus housing for those unmarried students who cannot be housed on campus. The long-range goal of the University is to house all undergraduate students on campus.

A copy of the housing policy proposed is attacned for the purpose of acquainting you with the intent and extent of the policy. The policy will be effected in two stages. The first will take place in February of 1962; the second in September of 1962.

Housing Policy to Take Effect with Completion of the Three New Men's Residence Halls:

1. All freshman or transfer students in their first year of residence will be required to live:
 A. With their parents or
 B. In University residence halls.
2. All sophomore and junior men students who are unmarried will be required, effective February, 1962, to live:
 A. With their parents or
 B. In University residence halls or
 C. In fraternity houses.
3. All unmarried men students in their senior year will be required, effective September, 1962, to live
 A. With their parents or
 B. In University residence halls or
 C. In fraternity houses or
 D. In approved off campus housing.
4. No unmarried undergraduate students will be permitted to live in or maintain appartments, effective September, 1962.
5. Meals: all students who live in University residence halls are required to have a meal contract with Saga Food Service with the exception of trainers and pledges of fraternities who are in their second semester of pledging and who may eat either at their own fraternity or in a University Dining Hall.
6. Fraternity Housing: a separate policy statement concerning development of those parts of the new housing policy affecting fraternity living and dining programs is attached. It is the plan to invite a representative of each fraternity to meet with the Dean of Men to discuss the development of this aspect of the new housing policy.
7. The following policy is being developed for unmarried senior men students who may expect to live off campus after September, 1962
 A. The University must approve the housing.
 B. The landlord, who may be either the property owner or an acceptable tenant, must live in and supervise any residence in which rooms are rented to unmarried men students of the University of Vermont.
 C. The landlord will be asked to accept the responsibility for seeing that University housing regulations are observed. The Dean of Men should be notified of violations. The University, in turn, will see that landlords are fully informed of University regulations.
 D. The University will not approve off campus housing where the entrance or exit to and from the student's room is separate from the entrance and exit used by the landlord.
 E. The University will ask landlords wishing to house unmarried UVM undergraduate men to agree not to rent rooms to tenants who are not UVM men students.
 F. The University will ask landlords to provide the University with a list of student residents of the house; and to notify when any student moves in or out of the House. In turn, the University will lend its assistance and co-operation to any landlord who finds that his student rental situation is not working out satisfactorily.
 G. The University will ask landlords wishing to house unmarried undergraduate men students to agree not to be absent for several days during the time when University classes are in session without arranging for an acceptable substitute to be present. The University understands that there may be emergencies where the landlord may be unable to provide substitute. In such situations notification of the Office of the Dean of Men and student residents is sufficient.
 H. Landlords wishing to house UVM students are asked to make their residences open to representatives of the Office of the Dean of Men in the same spirit as University residence halls and fraternity houses are open.
 I. University approval of off campus housing for unmarried men students is not automatically transferrable with change of property owner, who has been approved, sells or leases the property, or when an acceptable tenant, who has acted as landlord vacates the lease.
 J. The University will not endorse or assume no responsibility for the establishment of rental rates. All agreements relating to rental charges and services and provisions relating to rental charges shall be between the student and the landlord. Once an agreement has been made between the student and the landlord, however, the University will continue to assist in the resolution of any difficulties which may arise.

FRATERNITY HOUSING POLICY

Sophomores and juniors residing in fraternities shall be initiated members of the fraternity. Pledges may not reside in the fraternity house, except that a pledge who has lived in a University Residence Hall and is academically eligible for initiation by the June Commencement date, but unable to become a member because initiation occurs in the fall, will be permitted on written request to move into the fraternity in the fall.

All sophomores and juniors who reside in a fraternity house must eat their meals at their own fraternity's board table, unless they are working for their board. Sophomores and juniors who are members of fraternities without board tables will eat in a University dining room.

Sophomores, juniors and seniors residing in a Residence Hall who are initiated members or pledges of a fraternity may eat at their fraternity board table.

Changes in a class status during the academic year will not effect residence requirements.

Resident student contracts for room and board in the residence halls and fraternities will be for a full academic year.

PROCEDURE

1. Each fraternity must submit to the Office of the Dean of Men a list of the students planning to live in the house the next academic year. This list will be due in the fall before May 15.
2. If vacancies occur after May 15, they may be filled with students who have been assigned a room in a University Residence Hall. Both the house and the student must apply, in writing, prior to July 15, to the Office of the Dean of Men for a release from his dormitory contract. No requests will be honored after July 15.
3. Each fraternity must submit to the Office of the Dean of Men a list of the students living in their house and a list of those eating at the table. These lists are due October 1.

... students rallied on
... midnight rally. As
...ter dropped below
... brave men pro-
tested residing in the dormitories by spending the night on the green. Food and mattresses were transported from fraternity houses.

WARM WELCOME

President John T. Fey was surprised, to say the least, when he was greeted by hundreds of cheering students as he arrived from Washington at Burlington Airport on Sunday. The welcome was organized by STOP! and began as a car caravan from the men's dormitories. President Fey was welcomed with cheers of "Hi Fey!" and "Welcome Back, Jack". The students voiced their appeal to Fey and asked for his help. When Dean Clifford's name was mentioned, Fey remarked with a smile, "Where is our 'friend Clifford?'" Naturally, the president thanked the students for the "warm" welcome, but was otherwise noncommittal.

RALLY 'ROUND THE STEPS

Another rally was held at noon on Monday. Mr. William Jameson and Mr. Daniel Scheide briefly reiterated their support for the STOP! movement. Dr. Donald C. Gregg spoke and deplored this trend toward paternalism. He noted that perhaps UVM should not be called our "alma mater" but rather "our alma pater". In light of this, he suggested that STOP! change its name to STOMP! - the Society To Oppose Maternalism and Paternalism. He also suggested that in light of this trend toward paternalism, that students should all dress in Vermont green or, if they so wish, in "Clifford brown". Dr. Gregg's talk was greeted with resounding cheers. The rally was concluded with several other student speakers and a vote of confidence for STOP! Many of the present at the crowd were said to be wearing black in mourning in support of the pass/fail protest.

OFFICIAL COMPLAINT

On Thursday evening, the official protest from STOP! was delivered to the Dean of Men and copies sent to the press, newspapers, and our representatives in Congress. The full text of this statement is to be found in the issue of the [illegible]

...petitions signed by 700 undergraduate students were delivered to Dean Rowell. This was the result of preliminary efforts to obtain signatures and many more will follow.

The leaders of STOP! have expressed their appreciation of student support and the peaceful manner in which it has been expressed. There have been meetings with the administrative officials and a "short meeting" is scheduled to convey student sentiment and to get a final answer from the administration.

[illegible] today's proceedings will be continued at the rally at Waterman at noon today.

Comprehensive Coverage Of Campus News

Serving UVM For 78 Years 1883-1961

The Vermont Cynic

VOL. 79 UNIVERSITY OF VERMONT BURLINGTON, VERMONT MAY 11, 1961 NO. 8

New Directors Chosen by I F C in Preparation for Kake Walk Pageant

these are the new Kake Walk directors for the 65th Annual Kake Walk - left to right: Joe Levin, Gabe Jaffe and Ralph Matthews.

The Interfraternity Council has announced the appointment of Gabriel Jaffe from Hollis Hills, New York; Joseph Levin from Brandon, Vermont; and Ralph Matthews from Essex Junction, Vermont, as the directors of the 65th Annual Kake Walk.

Gabe Jaffe, president of Tau Epsilon Phi fraternity, has been elected to the position of publicity director. He is a Dean's List student majoring in zoology. He, recently elected to Boulder Club, is also treasurer of the Interfraternity Council.

Joe Levin, Kake Walk's new [illegible] director, is a member of Phi Sigma Delta fraternity. [illegible] major, and an excellent student previously in both [illegible] Serpent and Gold Key. [illegible] now a member of Boulder Society. He is also Chief [illegible] of the Student Court and a representative to the Interfraternity Council.

Ralph Matthews is the new financial director. He is a Dean's List student who participates in many extra-curricular activities. Matthews is an agricultural engineering major and is a member of Alpha Zeta agricultural honorary and Boulder Society. In keeping with his curriculum, he has taken an active interest in the American Society of Agricultural Engineers and is presently its Vice-President. Matthews is both the social chairman for Acacia and the treasurer for the Class of '62.

Jaffe, Levin, and Matthews have already begun their arduous tasks in preparation for the 65th Winter Carnival. They relieve Rolland Allen, William Carrigan, and Dave Howe, the directors of the 64th Annual Kake Walk.

Lane Series Brubeck, Odetta, Music Man, Janis In '61

The Dave Brubeck Quartet will appear for a second time in the 1961 - 1962 Lane Series.

Announcement has been made of the programs on the 1961-62 Blue and Red Lane Series. Although no mention has been made of the division of the two Series, a list of twelve concerts has been comprised, including a Broadway play to be announced and the musical comedy, THE MUSIC MAN.

As usual there will be something for every person. Those who are fans of Gilbert and Sullivan will be able to see the Stratford Festival Players in the PIRATES OF PENZANCE. Fans of folk singing will have the opportunity of hearing the well-known Odetta, who is also acquainted with a variety of spirituals. Those who go in for a more progressive type of music will no doubt want to see the Dave Brubeck Quartet in their second Lane Series appearance.

Another one of next year's presentation, the American Ballet Theatre, will feature the noted ballerina, Maria Tallchief.

Another classification is covered by the Pittsburgh Symphony and the Berlin Philharmonic Orchestra which will both appear next year in concerts of serious music. In the same vein, soloists Byron Janis, pianist, and Nathan Milstein, violin virtuoso, will appear.

During the 1960-61 season the New York City Opera gave two performances in Burlington. Next season they will present Mozart's MARRIAGE OF FIGARO. This will be a complete company production.

Another but smaller group of singers will be the Bach Aria Group, conducted by William H. Scheide. In the group will be Eileen Farrell and Jan Peerce

Maria Tallchief, noted ballerina of the America Theatre of Ballet, will perform for UVM students in the coming year.

of the New York Metropolitan Opera Company.

Tickets for the two Lane Series of the 1961-62 season will not go on sale until September when classes will have started.

In addition to the Blue and Red Series, there will once again be a Chamber Arts Series to be announced later. As usual the Summer Series will continue this summer. As of this date, no concert attractions have been announced.

New Housing Program Evaluated By SA Pres.

By way of introduction, I would like to say that the beliefs expressed in this article are entirely mine and not those of the Student Association Council. I do, however, feel that I have made an honest attempt to realistically measure student sentiment on this issue. It appears to me that we have a definite contradiction between the proposed policy for the housing of undergraduate students and the philosophy underlying the proposal.

I was informed that the existence of the policy was justified on the grounds that it would insure adequate accommodations and study facilities for male undergraduate students. Furthermore, it was to be an attempt, during the transition period, to make living conditions in apartments similar to those in the men's dormitories.

After having read the proposed policy I find the philosophy mentioned above and the proposal are not compatible. In an attempt to document my beliefs, it is necessary that we look briefly at the proposed policy:

1. The householder must live in and supervise any house in which rooms are rented to single UVM undergraduate male students. I can not in any way realize the connection between this statement and the philosophy of providing adequate accommodations and study facilities.

2. No single UVM undergraduate male can live in a house in which there is a private or separate entrance to his living quarters. Again I can not see the nebulous connection but rather I see this statement as an attempt to provide another means of control over male students. Again and again we see an attempt to

UVM PEACE CORPS

..., college students are ... great deal of enthu... toward President Ken... newly instituted Peace ... wever, the great ma... interested are un... the intensive training ... to make this program ...

... UVM there is a ... which provides this type ... in the field of agricul... last year, the for... ture Service is a four ... culum. Although not ... signed to prepare stu... the Peace Corps, the ... Department believes that this course of study will complement the President's program. In addition to the specific agricultural training required, the curriculum includes a broad background in the humanities.

According to Dr. Jack Little, Professor of Agricultural Biochemistry, the humanities branch of the curriculum will consist of courses in political science and in a foreign language through the intermediate level. Twelve credit hours will be required in sociology, anthropology, or psychology. The professional part of the curriculum emphasizes economics and statistics.

Dr. Little expressed the feeling that such a program as is now offered by the Department of Agriculture is a step toward providing better qualified people for the new Peace Corps, as well as for industry and agriculture both here and abroad. He also felt that this effort to provide better-trained and better-educated agricultural students will boost President Kennedy's Peace Corps by its creating the respect and world [illegible] the young people of the United

Official STOP Protest Presented To Fey

(continued on page eight)

Tau Beta Pi Honors Society

[illegible] Vermont [illegible] Tau Beta Pi, the national engineering honor society, on May 11 initiate Edward H. Williams, III, of Woodstock, Vt., son of the founder of Tau Beta Pi. Secretary-Treasurer Robert H. Nagel of the national organization will be present for the special occasion. Also to be initiated at the same time are Stanley Gregory C. [illegible], David L. Clough, David [illegible], Lawrence S. Bartlett, Jr., and Armand F. Soucy.

Tau Beta Pi was founded in [illegible] at Lehigh University by Dr. Edward H. Williams, Jr. The engineering honor society now has over a hundred undergraduate chapters [illegible] throughout the United States. The founder's father, Edward H. Williams, Sr., graduated from the University of Vermont and is remembered as the man who donated the money for the Williams Science Hall. The founder's son is a graduate civil engineer who has practiced his profession in Woodstock, Vt., Mr. Williams graduated from Lehigh University in 1915, having earned his Civil Engineering degree in two years time.

(continued on page three)

City Householders Oppose Dean's Policy

[illegible] Men

I am making this a public letter, so not [illegible] Clifford, but the whole faculty and student [illegible] UVM will know how I, and many others, feel about [illegible] now facing the faculty is hoping to put into [illegible] between Feb. 1962 and Sept. 1962.

Mr. Clifford is asking us landlords to take [illegible] college students with many restrictions on us and [illegible] students. Some of which are to have only college [illegible] desks, while we are renting to them and to supervise them at all times. In case of an emergency, or otherwise if we are away for a few days, to hire someone [illegible] to supervise the students.

If I am to have a baby-sitting job, then I'll [illegible] baby-sitting where I get paid for the hours put in and have the freedom to refuse at any time if I so desire. Also, he wants us the take them until Feb. 1962 as the dorms are supposed to be completed and UVM will be able to house the students.

What a wonderful time of year to have UVM take all your roomers and have a completely empty house, as we must sign an agreement to have only students at our rooming houses.

We can ill afford empty rooms if a student goes home sick or flunks out at mid-years.

Probably the college can afford it, as it is receiving grants, gifts or donations, and money appropriated by the state of Vermont. I have rules and regulations at my house which, for the most part, are honor and consideration for others.

I have had many wonderful young men students in the past from UVM, one of whom has roomed here this past year and is still here. Anyone would be proud to have them as roomers. They have told me they find the peace and quiet here which they need so desperately to concentrate on their studies, without the poise and commotion of larger places, namely the dorms.

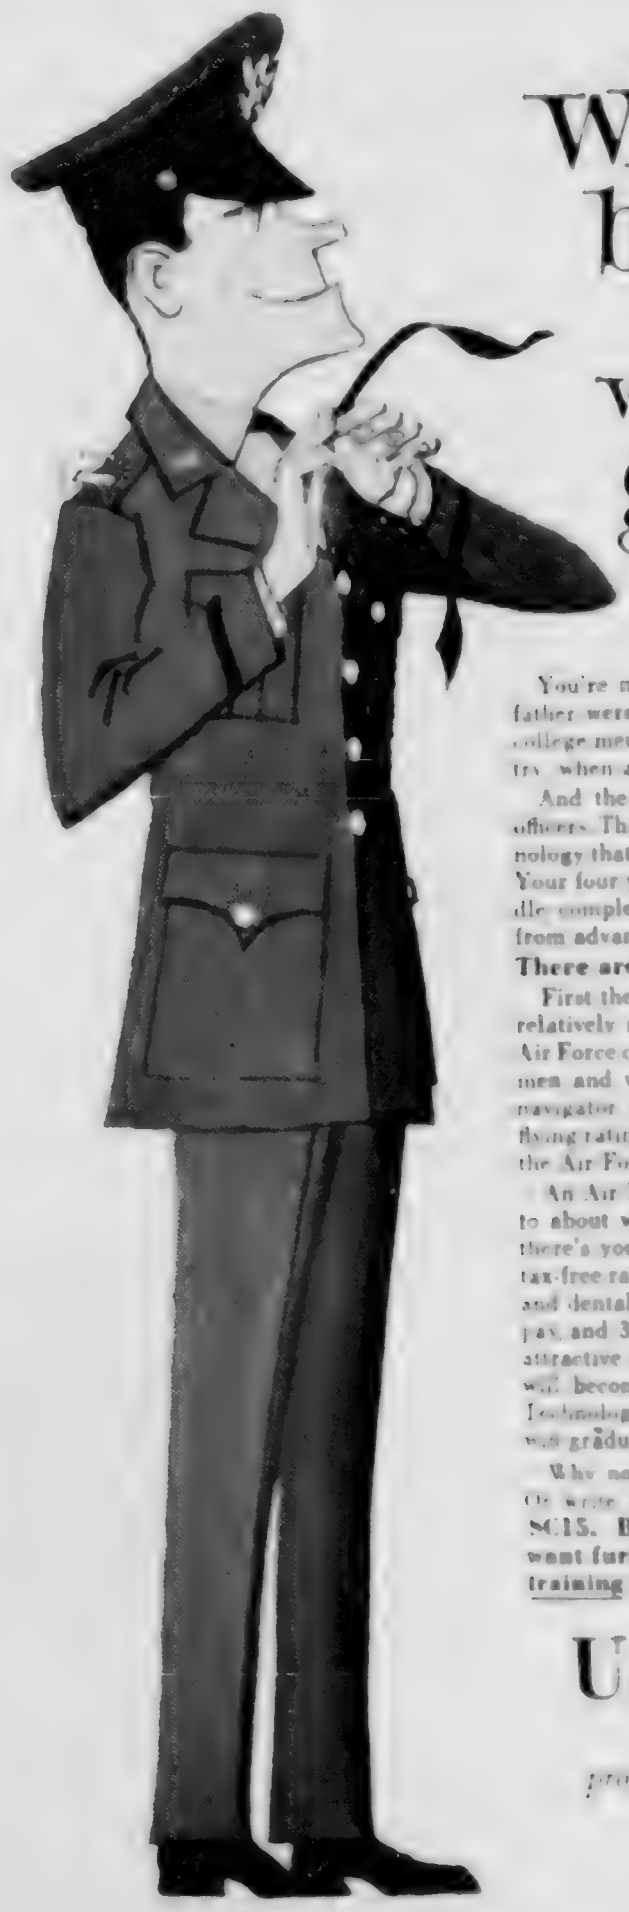
My place is registered and inspected, I hold a license to rent rooms issued by the state of Vermont, and I feel these should be qualifications enough to satisfy the college, without their inspection. Invariably the student's mother or father, or both, approve a room before it is accepted. I believe a survey would reveal the majority of the boys are over twenty-one and considered men for all legal purposes. If a boy is old enough to be in college, he is old enough to be responsible for his actions and be on his own. If there are those under twenty-one smart enough to fill the requirements for college they are smart enough to choose for themselves without any infringements on their rights as a citizen where they will room and for how long.

The boys are paying tuition for their education and if they feel they can study better in rooms where it is quiet, that should be their privilege.

Mr. Clifford shouldn't forget the college student has a choice of colleges he can attend. They may be signing up for the coming year at UVM, but what about future years?

Mrs. Isabelle King
61 South Union St.
Burlington, Vt.

There are many points I would like to discuss, but I must keep this short. I agree with Mrs. King's statement above.



We have an apparment-house and at present, we have nine UVM students who are all very happy living and eating when and what they want. This makes for a better student. They are very good tenents and they are clean and respectful.

I have talked with Mr. Clifford over the phone and he does not guarantee that I will have a full house even if I comply with his rules.

You may dictate to a young student (under 21 years) but you can't dictate to, or rule, the Burlington landholder or the Burlington area.

To conclude, I've enjoyed my men students and they are welcome at any time we can work out our problem.

Anatole Lacourse
Mrs. Bertha B. Lacourse
55 South Union &
39 Buell Streets
Burlington, Vt.

why the blue suit with the gold bars?

You're needed... just as your father and grandfather were. It's an obligation that a lot of qualified college men have to meet...that of serving your country when and where you are needed.

And the Air Force needs college-trained men as officers. This is caused by the rapidly expanding technology that goes with hypersonic air and space flight. Your four years of college have equipped you to handle complex jobs. You have the potential to profit from advanced training...then put it to work.

There are several ways to become an officer.

First there is Air Force ROTC. Another program, relatively new, is Officer Training School. Here the Air Force commissions certain college graduates, both men and women, after three months' training. The navigator training program enables you to win a flying rating and a commission. And, of course, there's the Air Force Academy.

An Air Force officer's starting salary averages out to about what you could expect as a civilian. First there's your base pay. Then add on such things as tax-free rations and quarters allowances, free medical and dental care, retirement provision, perhaps flight pay, and 30 days' vacation per year. It comes to an attractive figure. One thing more. As an officer, you will become eligible for the Air Force Institute of Technology. While on active duty many officers will win graduate degrees at Air Force expense.

Why not contact your local Air Force Recruiter. Or write to **Officer Career Information, Dept. SC15, Box 7608, Washington 4, D.C., if you want further information about the navigator training or Officer Training School programs.**

U.S. Air Force

Opinion:

Foster Homes For Senior Men ?

Margo Hathaway

[illegible] Dean of Men's [illegible] the "Proposed [illegible] who expect to [illegible] UVM undergraduate students." Protest [illegible] were organized [illegible] - Society To Oppose [illegible]ism. Many students [illegible] the cause. A great [illegible] these students knew or [illegible] of what was being [illegible] and why; however, [illegible] those who did not [illegible] opportunity to examine [illegible]ns. For the benefit [illegible] students I would like to [illegible] a few of the steps [illegible] the "proposed policy [illegible] who expect to rent to [illegible] graduate UVM male [illegible]."

First the office of the Dean of Men states that, "the owner [illegible] acceptable to the [illegible] must live in or supervise [illegible] house in which rooms [illegible] to single undergraduate UVM male students." This appears to be stating that any person with a room or an apartment to rent and wishing or desiring to rent to a single undergraduate UVM male student must submit himself to an inspection by the Office of the Dean of Men to determine whether or not he is acceptable to the University. And if in such case the owner does not live at the house he must ask someone first to live in the house as a supervisor and next submit himself (the substitute) to an inspection by the Office of the Dean of Men to determine whether or not the home owner has picked a supervisor acceptable to the University. I said "appears to be stating. . ." because in the next proposal we find the words, "no apartment can be rented to single UVM undergraduate students." Naturally this rules out those persons with apartments who might have expected to rent to students, unless of course they break up the apartments and make them single rooms. This is highly unlikely so the students are restricted to those persons acceptable to the University who have single rooms to rent and those persons who do not have private or separate entrances to their single rooms for rent.

Further examination of these proposals brings to light a restriction placed on the owner acceptable to the University concerning the kind of people to whom he may rent his apartments. This proposal I refer to, states that the "owner or substitutes may not house anyone but a full-time single UVM undergraduate male student, except members of the immediate family." This means that a person with several rooms to rent must, after renting to one UVM student, rent the entire store of rooms to UVM single undergraduate male students who are full-time students. If the home owner rents to a UVM student and wishes to rent to a friend who is seeking an apartment and needs a place to stay in the meantime the home owner cannot, he is forced to turn his friend away and anyone else seeking a room except full-time UVM students.

Another proposal states that the "owner or substitute who is acceptable to the University is expected not to leave the house for a period of days unless a substitute acceptable to the Dean of Men is appointed and present." This sounds like the regulations regarding this is what the regarding the foster parents plan of the Department of Social Welfare and if this is what the proposal means than may I remind the Office of the Dean of Men that foster homes must be licensed by the Department of Social Welfare. A further observation may be worth station: the Department of Social Welfare does not feel it necessary to license homes and regulate homes of foster parents taking in persons over the age of sixteen. The reason for this is the Department feel that both the person over sixteen and the parents or home owner will be able to discuss and agree on any regulations to be set up and therefore the Department need not feel responsible for them. It appears that the Office of the Dean of Men disagrees with the DSW in that if feels all persons after sixteen including the home owners need someone to set up the regulations to govern their activities and business dealings.

Also suggested by the Office of the Dean of Men is that "the owner or substitute acceptable to the University must agree to open the house to University inspection at any time." If my memory has not failed me there is such a thing as privacy and this is an outrageous invasion of the privacy of the owner as well as the student. The phrase "at any time" means that the University can take it upon itself to inspect these homes any time day or night. This takes on the appearance of a Secret Police action used in years past and present.

Implied in the above proposals are many things which I would like to discuss. First, the proposals imply that the people who rent apartments and rooms to UVM students are not to be trusted in the setting up of various regulations governing the conduct expected from their tenants. The Office of the Dean of Men feels called upon to dictate to these home owners what they can and cannot do in the line of rentals, under that conditions the home owner or a substitute can leave his abode for a period of a few days, and to whom the home owner is obligated to open his house for inspection. (Apparently, this inspection is to place without the legal paper commonly called a Search Warrant which to the best of my knowledge is the only legal way to force a home owner to let you search his home or inspect it.)

Secondly, the proposals imply that men of this campus twenty-one, twenty-three, and up even men eighteen and nineteen and twenty; are not old enough or mature enough to be able to conduct themselves in a manner befitting a UVM student or any student at any college. On this same vein these proposals imply that the parents and the teachers of these students have failed in some way to impress upon them the mode of behavior accepted as the "normal mode of behavior." The implication, of course, can also be devised as saying that the educational system has failed miserably and should be radically revised so that senior men will by that year be trained to the extent that they can be trusted to live in unsupervised rooms.

Awards To Be Given

The Inter-American Cultural Convention awards cover transportation, tuition and partial-to-full maintenance. Participating Latin-American countries are Bolivia, Brazil, Chile, Colombia, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru and Venezuela.

General eligibility requirements for all categories of awards are: 1) U.S. citizenship at time of application; 2) a bachelor's degree or its equivalent; 3) knowledge of the language of the host country sufficient to carry out the proposed study project; 4) desire to communicate with the people of the country; 5) good health. In addition, a good academic record and demonstrated ability for independent study are necessary. Preference is given to applicants under 35 years of age who have not previously lived or studied abroad.

Applications for scholarships for 1962-63 will be accepted until November 1, 1961. Requests for applications must be postmarked by October 15. Interested students who are enrolled at a college or university should consult their campus Fulbright Program advisers. Others may write to the Information and Counseling Division, Institute of International Education, 1 East 67th Street, New York 21, N.Y., or to one of IIE's regional offices.

SCHOLARSHIPS

Fulbright scholarships for graduate study or pre-doctoral research in 32 countries will be available to over 800 graduate students for the 1962-63 academic year, it was announced by the Institute of International Education which administers the program for the Department of State.

In addition to the Fulbright Scholarships, awards for graduate study in Latin America under the Inter-American Cultural Convention and for graduate study in Ireland under the Scholarship Exchange Program between the U.S. and Ireland will also be offered for 1962-1963. Applications for these programs will be available on May 15, 1961.

There are two types of grants for study abroad under the Fulbright program. Complete Fulbright grants provide maintenance, travel, tuition and books for one academic year. Countries participating in the program include Argentina, Australia, Austria, Belgium-Luxembourg, Brazil, Burma, Chile, China, (Republic of), Denmark, Ecuador, Finland, France, Germany (Federal Republic of), Greece, Iceland, India, Iran, Italy, Japan, Korea, Netherlands, New Zealand, Norway, Pakistan, Peru, Philippines, Portugal, Spain, Sweden, Turkey, United Arab Republic, United Kingdom (and overseas territories). Fulbright Travel Grants to supplement maintenance and tuition scholarships from other sources are also available to American students receiving awards for study and/or research in universities

TAU BETA PI

(continued from page two)

Tau Beta Pi's purpose is to mark those who have conferred honor upon their alma mater by distinguished scholarship and exemplary character as students, or by their professional attainments as alumni. It is also Tau Beta Pi's purpose to foster a spirit of liberal culture in engineering colleges. To be eligible to be elected, a civil, mechanical, or electrical engineering student must be of junior or senior standing and in the upper fifth of his class.

WANTED

Discarded Clothing, etc.

The BHS Debate Club is having a rummage sale May 20

Contact Mrs. Fred Webster UN 2-9483

ATTENTION: Graduating Seniors

LIVE, WORK AND PLAY IN VERMONT

"National Company" has an opening for sales trainee. Starting monthly income up to $450. Thorough office and field supervision with no travel. Aptitude tests will be used to measure potential without obligation. Write Box 609, Burlington, Vermont for interview. Give age, marital status and military obligation.

Dance Workshop Presents Program

Tomorrow and Saturday, in the Arena Theatre, Dance Workshop will present a program of modern dance, tap, ballet and interpretive dancing. Although most of the program has been prepared by students, the program will also feature a demonstration by Miss Schelper, the instructor of Dance Workshop.

One of the high spots of the concert will be an interpretation of James Thurber's "The Last Flower". Even for the newcomer to modern dance, this drama will prove a most enjoyable experience. The concert is not intended solely as something to appeal to dance minded individuals, but will appeal to almost anybody who is interested in having an enjoyable evening.

One high point of the show will be top hat and tails tap routine at the opening of the show. Another part of the show which will be enjoyed by all is a modern interpretation of the problem of dope addiction.

Tickets may be purchased at the University Store or at the door either evening.

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf," "The Many Loves of Dobie Gillis," etc.)

OLD GRADS NEVER DIE

In just a matter of weeks many of you will be graduating — especially seniors.

You are of course eager to go out in the great world where opportunities are limitless and deans nonexistent. At the same time your hearts are heavy at the thought of losing touch with so many classmates you have come to know and love.

It is my pleasant task today to assure you that graduation need not mean losing touch with classmates; all you have to do is join the Alumni Association and every year you will receive a bright, newsy, chatty bulletin, chock full of information about all your old buddies.

It was her second in four months.....

Oh, what a red-letter day it is at my house, the day the Alumni Bulletin arrives! I cancel all my engagements, take the phone off the hook, dismiss my chiropractor, put the oculist outside, and settle down for an evening of pure pleasure with the Bulletin and, (need I add?) a good supply of Marlboro Cigarettes.

Whenever I am having fun, a Marlboro makes the fun even more fun. That filter, that flavor, that pack or box never fails to heighten my pleasure whether I am watching the television or playing buck euchre or knitting an afghan or reading Mad or enjoying any other fun-filled pursuit you might name — except, of course, spearfishing. But then, how much spearfishing does one do in Clovis, New Mexico, where I live?

But I digress. Let us return to my Alumni Bulletin and let me quote for you the interesting tidings about all my old friends and classmates:

Well, fellow alums, it certainly has been a wing-dinger of a year for all us old grads! Remember Mildred Cheddar and Harry Camembert, those crazy kids who always held hands in Econ II? Well, they're married now and living in Clovis, New Mexico, where Harry rents spearfishing equipment and Mildred has just given birth to a lovely 28-pound daughter, her second in four months. Nice going, Mildred and Harry!

Remember Jethro Brie, the man we voted most likely to succeed? Well, old Jethro is still gathering laurels! Last week he was voted "Motorman of the Year" by his fellow workers in the Duluth streetcar system. "I owe it all to my brakeman," said Jethro in a characteristically modest acceptance speech. Same old Jethro!

Probably the most glamorous time of all us alums was had by Francis Macomber last year. He went on a big game hunting safari all the way to Africa! We received many interesting post cards from Francis until he was, alas, accidently shot and killed by his wife and white hunter. Tough luck, Francis!

Wilma "Deadeye" Macomber, widow of the late beloved Francis Macomber, was married yesterday to Fred "Bureshot" Quimby, white hunter, in a simple double-ring ceremony in Nairobi. Good luck, Wilma and Fred!

Well, alums, that just about wraps it up for this year. Keep 'em flying!

© 1961 Max Shulman

Old grads, new grads, undergrads, all agree: The best new nonfilter cigarette in many a long year is the king-size Philip Morris Commander. Welcome aboard!

Editorial:

Cross All Fingers

We are winning. By the time this paper reaches the [illegible] the fight may be over.

If we do win major concessions regarding men's housing policy, it will be the result of several factors.

One will be the peacefulness of our demonstrations. While each participant fingered his placard, and talked about the date of our rallies, sleep-outs, and such, the students have been careful to do it. All were held within the law. Many drew favorable comments from police officials.

Another factor that should contribute to the success of the student cause is the longetivity of the action. As each new day passes, it becomes harder and harder for officials to pass off the action as mere spring fever.

But the most important factor in the success (and we believe we shall be successful) is the unimity of the student body. Behind the STOP! organization stands virtually every man and woman enrolled at the University. Behind them stands a large portion of the faculty.

If we do win major concessions regarding men's housing policy, the fight is not over. The next step is to investigate the construction of more dormitories, and to take a stand on these. Perhaps the students can have some representation at the next major housing policy decision.

If not, there could be a repeat performance.

Tale of Dog Wagging

The CYNIC, this week, has published every letter concerning the housing regulations that has been received. If any were not printed, the fault lies in the chaos of the week past, not in editorial policy. There has been no attempt to bias public opinion by printing letters supporting one side of the issue or the other.

In reviewing the letters received, we find that in most cases -- in practically *all* cases -- the writers side with the student movement.

Some of the messages come from students. It is natural that the majority of these are opposed to the new regulations. After all, any attempt to take freedom of choice out of the hands of the individual is bound to be met with opposition by the individuals affected.

But a great many of the correspondences are from faculty members. Some are from instructors. Others are written by professors. Still others come from department chairmen. *Almost to a man, these faculty members express sympathy with the student cause.* Many imply dissatisfaction with the administration.

The job of an administration, or should be, to relieve the faculty of those jobs which interfere with the primary job of educating the students.

The next logical question that arises is: if the administration's policies are contrary to the sentiments of both the faculty and student body, is the administration fulfilling its responsibilities?

Professores...Professores...

To the Editor:

[illegible] one of the group of a well-known, radical author [illegible] decent gentlemen. I support any student [illegible] designed to help a young man [illegible] understanding to perceive how forcing a man of twenty-one to live in a single room (under the [illegible] or "substitute" who is in effect the agent of the Dean of Men) helps to promote the achievement of this goal. How can [illegible] be educated to make intelligent choices if they are denied the right to make choices at [illegible] (even the choices that are mistakes).

Yours sincerely,
[illegible] N. Bogoraed
Professor of English

(Photo by A. Otanen, SPS)

Norman J. Slamecka of the Psychology Department:

The students feel that the university is becoming an academic Auschwitz. To be sure, a university is, in some respects, a concentration camp; but the emphasis should be upon intellectual concentration. I have heard a rumor that a new administrative office is to be formed: the Office of General Policy for the University, or just OGPO. I think this rumor is unfounded.

The students regard the proposed housing regulations as another step in the dictatorial process of converting inalienable rights into alienable privileges. Many see the housing regulations as an attempt to obtain complete control over the students' sexual behavior and alcoholic intake. To the degree that this is so, I am in full sympathy with our students.

As a cynical countermeasure against intolerable regulations, some have suggested the forming of temporary marriages, whereby they could subvert the intent of the set of rules that is [illegible] about them. Upon Commencement Day they would then receive both a diploma and a divorce decree. I hope that this doesn't happen, since the commencement exercises take long enough as it is.

I sincerely wish the students success in their battle against "the Establishment", since they are engaged in the most honorable of activities --- the courageous assertion of individual human rights.

The Editor, the Cynic -

It seems to me that most faculty members go out of their way to preserve an image of the University that will bring credit to all those associated with it. Why then, must this image be repeatedly smeared by overzealous and poorly conceived moves on the part of the Administration? We refer here to the machinations of those whom we assume are acting in *loco parentis* on behalf of the student body. From what I read in the Free Press, and from what students tell me (take both sources [illegible] much that we teach and practice is made a mockery of by those committed to the idea of a smooth [illegible] business. Admittedly, these persons occupy complex positions, but the role they play is not, by definition, a fixed narrow one. Rather it can be played with great success if they understand what the aims of a liberal [illegible]

[illegible], Chairman of the Department of Psychology:

I [illegible] endorse the student [illegible] Dean Clifford's housing regulations. Dean Clifford is a symbol of the sickness of our society -- a culture dominated by the goals of welfarism, paternalism, and the pseudopsychology of "life adjustment." Allegedly, one of the aims of higher education is to develop maturity and independence of judgement. I fail to see how such attitudes can be inculcated at an institution where the Dean of Men's Office is a carbon copy of the Ministry of Love in George Orwell's 1984.

They want dormitory living? Fine. If this is a means of obtaining a sense of community and not another way of herding people together in order to police their lives mores closely.

They want seniors to live in supervised rooms? Why? Do these people need that much supervision? If they do we might as well admit that during their three years here they have learned nothing. This means, of course, that both we and their parents have failed and that they are soon to be graduated *Menschen Affen*. As it stands now most of us do not even know whether the controls advocated are needed, since we are not given any information concerning the general behavior patterns of our students by those who concern themselves with such spicy things. It is one thing to adequately demonstrate that a social problem exists, but another to just say this is so. Similarly it is a dubious practice for persons to gather their own intelligence, circulate it to kindred souls and then act on it. Neither the police, the F.B.I., nor the C.I.A. are supposed to make policy for these very reasons. If the Administration wants to do this they ought to come out and say so, rather than pulling off one *fait accompli* after another. This seems to be their intention at the present. Whether or not it will go unchallenged by the faculty is another question. If it does go unchallenged we might as well let them apply their silly rules to us as it will be apparent that our educations, like those of our students will have been wasted, and all that we stand for will have been swept aside to make way for the oh-so-smoothly running bureaucratic perpetual motion machine.

Daniel Scheans
Sociology

(Photo by R. Coleman, '[illegible]

William Jameson of the [illegible] Department:

One of the great frustrations of the neurotic teacher is that he often sees what a wide gulf there is between his four-walled [illegible]ry - the classroom - and the world. He talks of incest, rape, murder, love, law and hate. People in fiction and history drink, [illegible] and die. But, frustrating as it may be, "Good God! - [illegible] don't do such things!" The walls of the classroom are, therefore, never related to life.

But now, at last, comes hope. There is finally recognition, [illegible] the authoritative body which governs life, that horrid values [illegible] exist somewhere out there. There is hope for the teacher that at last the students will fully understand what he, at least, means about hypocrisy, deceit, and [illegible] in life: for now the legislators of their lives will see to it that hypocrisy and deceit become the basis of existence.

Now the classroom and [illegible] join in the bitter struggle to uphold the best in life. Let us pray that by so joining they do not cater to the worst in [illegible]

James O'Hara of the English Department:

The success of Athenian democracy was based on the concern of its citizens with public affairs. Scholars tell us that this concern was fostered by the Athenians' way of living outdoors, in public, whenever possible. UVM administrators are patriotically encouraging this communal life; by restricting living to dormitories, and by restricting dormitory life to mere existence, they are creating the conditions of Athenian democracy. Undemocratic misanthropes [illegible] always spend weekends in motels.

Because of the recent developments of the past few days regarding undergraduate housing, certain questions have arisen in my mind and the minds of many other students pertaining to the ulterior motives of Dean of Men, Earle W. Clifford, in proposing these rules. Therefore, I feel it best to present them openly to Dean Clifford with the hope that we will answer them in the same manner in which I have presented them.

Dean Clifford:

1. Do you feel that college seniors are too immature to select their own living facilities and eating places?

2. If you were a landlord, what would be your honest opinion on these new rules of supervision for your tenents, such as search of their living quarters?

3. Are these proposals a means toward the end of requiring all undergraduate single male students to live in "on campus" housing?

I ask these questions openly and with the hope that Dean Clifford will submit an open answer to the students.

To the Editor:

Today (Monday, May 8) we witnessed the premature death of STOP!, an organization formed to combat paternalism here at UVM. Today we gathered to hear the STOP! committee tell us of the progress they have made toward changing the tyrannical housing rules recently announced by Reichsfuhrer Clifford and his group. Today we gathered in the warm sun to hear our leaders tell us what the next step toward freedom would be. Today we were ready and willing to do what STOP! suggested to help the cause. And today we saw STOP! stop.

STOP! was stopped by one thing. This was that old weapon used so effectively so often by our esteemed administration. The stall, though used in every battle since the decision to include women in this institution, was used with devastating effect in this battle. STOP! was stopped by the stall. The Administration, by stalling STOP!, has done exactly what it sought to do. STOP!, in accepting the President's date of today (Thursday, May 11) to "discuss" the issue has played into the enemy's hands. In this meeting, STOP! will be stalled further and, I predict, STOP! will allow itself to be stalled until the students become totally discouraged and disorganized. The army then having been divided to ineffective individuals, the enemy will have no trouble disposing of these "splinters in the arm of progress" one at a time.

There is yet one chance. STOP! has called a rally for tomorrow noon. At this rally the STOP! committee must be prepared to either announce its victory to the student body and conduct a victory celebration, or STOP! must bring to the platform of that rally a list of positive actions each and every student can take to bring pressure against the Reich. STOP! has only this one chance to recover its purpose and prestige. It must bring either a plan of action or a message of victory to its supporters tomorrow noon. If STOP! fails to do this at this rally, we shall all know that all we have done has failed.

I urge each and every student, therefore, to attend the STOP! rally tomorrow noon outside Waterman. If STOP! comes through with either a victory message or a positive plan of action, we shall see that the movement can and will win. If STOP! fails to do either of these things, we shall each have the satisfaction that we have individually done all we can, and that we have attended the funeral of that for which we have fought.

Then we can, with peace of mind, return to our novels and await the completion of the Great Warren, to which we are all soon to be assigned.

Sincerely,
David Steele, '61

Editor's Note: STOP! has no intention of succumbing to the stall. Thursday is the day of decision - one way or the other. They can't stall STOP!

Robert Hobbie, '61:

All that graduating seniors have ever departed with from this university as the formal instruction for which they have paid, and a book of rules and regulations designed to mold student thought administrative ideal. Taking away everything that develops the mind, but giving us the responsibility to uphold the rules is not my interpretation of fairness. Must we be told where to eat and sleep, too? In my opinion, this is just adding to the ever growing number of obstacles which are aimed at inhibiting the development of the mature individual.

Photo by R. Coleman, S.P.S.

To the Editor:

Once again the students of University of Vermont demonstrated against the housing edict of Earl Clifford, Dean of Men. The students primarily objected to the clauses requiring juniors and seniors, who do not live in the university dorms, to live in "university approved" single room rooming houses. The stipulations for university approval for these rooming houses include "a single entrance . . . for students and the landlord" and that the university approved resident must be "present at all times and . . . if away for any length of time to provide a university approved substitute".

All students we have had enough of this mickey-mouse. Games are for tots, for recreation:

If, by their senior year, students are of such a maturity level to warrant the above housing rules, it is inconceivable that they would graduate, i.e., they don't belong in college. Sometimes one or two will get through because they have successfully temporarily compensated for their insecurities (which is due to immaturity) and will, however, the maladjustment, even after the age of 21, crops up in interpersonal relations with equals and other States.

2) The edict also is a slap in the face to the town people who presently house students in rooms and apartments independently of the university. It obviously implies that a majority of landlords are providing inadequate housing even in their own homes, and the university must defend the students against the evils the landlords are dealing them.

3) For students over the age of 21, the edict is a violation of the Constitution of the United States. Not even a state government has the right to tell an adult in good standing, where to live and enforce it (except the institution called the Armed Forces). And leaving the state because of the rule is no answer. The state may reply: "Well, if you don't like rule - leave." NO ANSWER NO SOLUTION! If the University told its students the same thing, what would happen if all other accredited institutions of higher learning had the same odious superfluous residence rules and underlying philosophy (whatever that may be) as the University of Vermont? The poor adult student would be denied an education (all other academic requirements acceptable) because of an unconstitutional rule, or unless he obeyed an illegal rule, i.e., broke the law.

Sincerely,
David Selib, '62

Steven Burzon, '62:

The university experience is both an intellectual and a social experience. The intellectual growth of a student does not take place when it is divorced from social growth. The current "suggestions" by Mr. Clifford are contrary and detrimental to this ideal. Maturity, social or intellectual, does not result from an increasing amount of external controls impinging upon the ribbits of the individual student. True growth can come only from within and is realized only when the interaction of the student with his college community is allowed to develop.

Dear Dr Pangloss,

It is a sad day when the wise doctor cannot recognize sarcasm from his own student in this "best of all possible worlds". For, having spoken with my contemporary, Candide, I, have learned that her article's only purpose was to present a criticism of Ollie's letter in regard to the fact that no better suggestions were offered to replace old rules which are obviously foolish. You in return have only offered criticism of Candide's article, not really recognizing what was being suggested. No group is infallible when the interests of many persons are concerned. Not everyone in a group can agree upon all rules. WSGA is no exception. At the present time many girls disagree with the rules. Some are inadequate now, although they might not have been at the time they were introduced. These rules, I agree, should be changed or destroyed. The time is now ripe to do this. It is a time of revolution and fighting for personal freedom. This is not a time to sit back and make criticisms of others. Do as Candide advised. Make suggestions and present them that we might have a better, more universally acceptable set of regulations. (It pleased us to see you at Joint Conference. We hope your efforts will continue.) Help make this really the "best of all possible" student governments.

Sincerely,
Mademoiselle Cunegonde

In the Editor:

Sunday evenings talk conference between the administration, represented by Deans R well and Clifford and the STOP! committee, it seems to me was a display of great arrogance on the part of the administration representatives. Do the deans think that they are fooling anyone but themselves, when they state that one of the reasons they want to check undergraduate rooms to see whether or not the lighting is adequate?!?)

The only truthful statement was the fact that they wanted all the undergraduates in an equal situation. Again, do they think that they are wise enough to devine whether or not conformity should be forced upon us? Men who have reached their senior year should, and will be able to decide who he is going to associate with and where he is going to live.

This leads us to another point The Deans smugly stated that they thought the dorms would create a University Family. Living in cell cubicles with bare walls does not make this family. There is only one way to create this desired situation and that is by closer student, faculty relations. If the student is placed in the position of a child, he can not and will not be able to form any sort of fruitful relationship with his professors.

The Deans have not revealed their underlying principles for these regulations because they either are not aware of their puritanical radicalism, or they know that, if these principles are stated, their policies will be immediately disregarded. When the situation gets tight they say that we don't have the right to speak. Well, we think differently!!! They are the ones who don't have the right - the right to rob students, many of whom are legally responsible for their actions, of freedoms guaranteed by the Constitution of the United States.

All that I can say is "Clifford go back to Syracuse!!"

Sincerely,
Robert Coleman, '61

Joanne Bregstein, '61:

The policy of dictators all over the world might be explained in the phrase "Revolution si, Evolution no." What does one accomplish by tightening a noose around the life of a community? What can Ed Senor Clifford hope to accomplish by his revolutionary reforms? Will UVM evolve into a united happy "family," or will the guerilla forces be forced to seek relief by fleeing to the mountains on weekends? When one is restrained from crossing the white line to take his meals at a capitalistic inn -- that is the time to act. When one is told he must live with Society A or Society B, or else he can't belong - that is the time to act. What happened to the ancient idea of the university as an institution where man was to grow both intellectually and socially? How can society B ever get to know what the population in A is like if he is forced to eat, sleep, and drink, with his "brother?" Is this the way to create the free thinking scholar of tomorrow that the universities are pleading for?

(continued on page six)

Photo by R. Coleman, S.P.S

PROFESSORES (continued from page four)

[illegible] Dean Brace of the English Department has worked on the new housing policy with the deans. Here are the comments of the professors.

[illegible] again. I am the Faculty Advisor to the [illegible]. I met with the IFC at 4:00 P.M. on [illegible] with the Dean of Men's staff at 11:00 A.M. on [illegible]. Then, I may [illegible] still appear that I have been [illegible]. I deplore [illegible] I have been rather. I have tried to [illegible] between the two groups, and I [illegible] I have not been entirely successful in [illegible] notwithstanding.

[illegible] of the Saturday meetings in recent weeks have been devoted to discussions of the proposed housing [illegible]. Those regulations were hardly of my design. On the other hand, I did not raise serious objections to them. Indeed, I participated in some discussions to make the proposals more consistent.

I did not predict that these proposed regulations would be favorably received by either the IFC or the student body as a whole. Nor did I recommend that the proposed regulations be shown to the IFC or any other student group. Rather, it is my opinion that such matters should simply be decided and the results announced. In this respect, Dean Clifford is far more lenient than others who meet with him. That is to say, he attributes all fundamental disagreements, all basic conflicts between himself and others to "a breakdown in communications." The assumption underlying this characteristic designation of the source of disagreement is, of course, that the Dean cannot be mistaken, and that anyone who disagrees with him simply misunderstands.

With respect to the proposed housing regulations, I believe that the Dean is right, in the main. Certainly the proposals are consistent within themselves, consistent with current University policy, and in general helpful to fraternities (however galling this may be to individual men). And certainly dormitories, once built, must be filled; just as fraternity houses, both those which presently exist and those which are to be operated without financial loss. Campus opposition to these proposals comes as a great surprise to me -- the violence of the reaction I simply did not anticipate.

On the other hand, this violent reaction is the first really overt[illegible] evidence I and others with whom I agree have had for use in arguing against Administration policy in general. The proposed housing regulations

(continued on page seven)

[illegible] I can't understand why you boys and girls are objecting so much to [illegible]. We all know that college is supposed to prepare you for life and I've argued that those students who are opposed to the prospect of living in a dormitory or belonging to a fraternity are going to find it difficult to adjust, in the future, to their companies, neighborhoods, and country clubs.

I lived in a private room with a separate entrance when I was an undergraduate; and when I graduated I knew that I was not fit for anything but an academic career particularly in a place with a lot of green and cows, and a tradition of individualism, like Vermont.

While my classmates were busy perfecting that skill of getting along with others, which is the mark of a successful life, I frittered away my time on books, quiet observation, reflection, and aimless talk with a small group of friends, some of whom are earning even $5,000, ten years after graduation.

(Photo by R. Coleman, SPS)

Greg Falls:

"I am not in favor of the solution to this problem which the administration has decided upon. However, I have talked to Dean Clifford at some length and know that there has been a lot of high-level discussion before any decisions were made, so this is not simply an edict. Before any definite regulations are made there should be much more, open-minded, discussion between the University and the students."

R.M. Martin of the Department of Psychology:

One of the main purposes of a university is to provide an environment in which the student can mature intellectually and socially. Maturity can be achieved only by placing an increasing amount of responsibility on the student for his actions. Policies which have the effect of curtailing the placement of responsibility on the student can interfere with the expressed aims of the university.

STUDENTES... (continued from page five)

Birute Vileisis '62:

WHY is there so much disapproval of Dean Clifford's statement? Fellow students, don't you realize that the administration is faced with a very grave and noble moral obligation, i.e., to see to it that you perform most effectively your primary function as students and do your homework every day. I trust you are all grateful that this is NOT YOUR RESPONSIBILITY!

The administration is merely taking into great consideration your best possible interest. They wish to spare you the torture of thinking too much about the necessities of life. After all, everyone knows we are all here to learn and NOT TO THINK.

Thus, let's all gratefully turn to our books and forget the menial, petty problem of facing the essentials of living, for the deans most willingly will do it for us.

Above all, don't worry about the future years, for if by some chance you are confronted with an insurmountable problem, the deans will surely be around for some good old-fashioned paternal advice.

Indeed, there will be lots of time to live after college, for as Prufrock once said, ". . . there will be time to wonder, 'Do I dare?' and, 'Do I dare?' . . . Disturb the universe?"

Noah Waterman was a good man. He was righteous. He was endowed with all the characteristic traits of a superior native Vermonter. He was a well-meaning parent to a horde of good children. His only desire in life was to see all his children grow up to be mature, intelligent men and women. He was not an uncultured, uninterested parent. No, Noah was smart; very smart. In fact, he knew almost everything. He knew all about Chemistry, Math, English, Political Science - everything! But with all this knowledge there was one problem which he could not solve.

Not too far from Noah's home (his estate was named after the great Greek philosopher, Our Campus, which showed his great interest in learning) was a lake. Life Lake was its name. It was a beautiful lake, and at the same time an ugly lake. The water was deep black, but clear as crystal. Anywhere you traveled on this lake you could not help but see it's dreadful black luster. But then too, if one looked upward, and most people did, he would see the sky. And what a sky! Nowhere in the world was the sky so beautiful. The sky was as pleasing as the water was displeasing. Rays of warm light streamed down like golden drops of Vermont maple syrup. The air gently moved about in such a way as to massage the body and soothe the mind. People from all over the world came to swim in this lake- Life Lake. They played and worked there. They had a good time, a wonderful time, a fulfilling time. It was considered very normal and useful to swim in this lake. But now and then someone would drown. This was Noah's problem.

He wanted his children to go to this lake, but felt that they were too young and might drown. He loved his children so much that he could not bear to lose them. One day he struck upon a great idea. "I know what do," he said, glowing with pride, "If none of my children can swim, they can't go to the lake. For they all know that if one cannot swim, it is not safe to go in the lake." So this [illegible] He forbade all of [illegible] from learning how [illegible]

But alas, this [illegible] At night some of [illegible] filled with an overwhelming desire for Life Lake [illegible] floating on logs [illegible] joyous of places. A[illegible] until one time when [illegible] ed and a child fell off [illegible] ed- because he did not [illegible] to swim.

"This will not do," [illegible] in despair, "I know what [illegible] he said, glowing with [illegible] I make them all sleep [illegible] building. I can watch [illegible] this too failed. Noah was [illegible] man. How could he hope to [illegible] all of his many, many [illegible] He then asked the more responsible children to watch [illegible] for him. But these [illegible] fell into the same pattern [illegible] and wishes for the [illegible] this failed he made a drastic decision; a smart, intelligent decision. He only let his [illegible] out at certain hours, and [illegible] he knew exactly where they [illegible] going. But the only place they could go was some place where they could learn how to [illegible] ture, intelligent men and women. This worked.

But one day it started to rain very hard. Harder than [illegible] before. It rained for four full semesters and four spring semesters. In June, on the last day of the last spring semester, Life Lake overflowed. It covered the entire estate of Our Campus, and all those who could not swim were drowned.

K.H. Shopste[illegible]

Cyrus Kermanj, '61, graduate of the University of Tehran:

If this country is to realize its claim to leadership of the free world, it must first produce individuals who are self-controlled, self-reliant and self-conscientious. UVM's administration is playing a vital role in defeating this goal. Control of all aspects of student life accustoms one to being told how to live. The result is a mass of people who respect only tyranny; not maturity, individualism, or leadership. This is the type of policy proposed by the UVM administration.

Written After Perusal of the April 27, 1961 Edition of The Vermont Cynic

They criticize the [illegible] tongues
For criticizing them;
They denigrate the Protestant
And consecrate the Zen.

Bewailing fate, for whining's sake,
And for the echo's noise,
They laud the mighty static [illegible]
Decry the lack of joys.

With childlike spats and quarrels drear,
They lose perspective's [illegible]
Of seeing selves for what they are
And seeing what they lack.

Equivocation's mighty s[illegible]
If raised, would clear the [illegible]
And show who these de[illegible] are:
"They" 's us (it's us, it's us)

Fiasco in Cuba

...promised many so-... but how many have ... since he has been in ... recent invasion ... attempt to invade, ... Cuban people rally ... support? On May ... Smith, former ... U.S. Embassy in ... used the Cuban fi... role of the U.S., ... sponsored by the ... Lecture Series.

Mr. ... mentioned that the ... economy is now sagging ... standard of living is ... decrease. But does this ... the Cuban people are ... with it? Mr. Smith holds ... that they will eventually ... Castro, but at the same ... out the lack of ... tion, which in Cuba, ... That many of the ... people were not aware of ... aims of the U.S. was also ... by Mr. Smith.

The U.S. is accused of interest because of the expropriations of its interests in Cuba. However, Smith stated that there was no direct intervention on the part of the U.S. in the invasion attempt. "But, let's not lose heart, let's go ahead and help to cultivate the social revolution ... as in Latin America." In the future, the U.S. is expected to work closer with the OAS in channelling aid to Latin American countries and thus work as a unit in relation to other situations comparable to that of Cuba. "If the U.S. is unable to help the people of Latin America achieve social reform, they may turn to Castro," stated Smith, however, he declined to speculate on steps that the U.S. might take in the future.

Sternberg Will Open Student Art Festival

"Student Art 1961," a great festival of Fine Arts exhibit, opens officially with a spectacular at the Fleming Museum, Tuesday evening, May 16 at 8 pm. The featured speaker is the noted painter and teacher, Harry Sternberg, who will show his new film "The Many Worlds of Art." A Festival reception will follow in the exhibition galleries. On view will be some 60 paintings and pieces of sculpture and a large collection of silver, glass, and other craft work from the classes of Professors Francis Colburn, Isabelle Mills and Paul Aschenbach. The exhibit, one of the best ever put on by students at UVM, will be open for preview during Parents' Weekend, Saturday and Sunday, May 13 and 14. It will continue through June 4.

Professor Sternberg who is widely known as a lecturer on art, has been painting and graphics at the Art Students' League in New York City and, during the summer, at the Idlewild School of Art in California. One of the youngest Guggenheim fellows ever in 1946, he has exhibited throughout the United States. His work is represented not only in the Museum of Modern Art, the Metropolitan, and the Library of Congress, but also in the Victoria and Albert in London and Bibliotequa Nationale in Paris.

His new film, "The Many Worlds of Art," began with the idea that words are an inadequate means of explaining visual art. Music, to Sternberg's mind, offers a better means. Accompanying the streams of images in his films is a carefully assembled musical sound track. One listens to the pictures as much as one sees them.

PICNIC

With the blessing of a lot of warm sunshine, some 200 coeds ate their Monday evening meal picnic-style. The occasion for the innovation was the annual Panhellenic Council sorority picnic.

Sisters and pledges of UVM's seven sororities gathered on the back lawn of Southwick for food and friendship. Festivities included a songfest led by Sue Wichterman on the guitar.

Many people have commented on the reduction of society space in the cynic. Only what is turned into the Cynic is printed — society coverage is as much your responsibility as it is the Cynic's.

Correction! Last week in this column it stated that Gabe Jaffe, Joe Levin and Roy Farran are next year's Kake Walk directors. This should have read Gabe Jaffe, Joe Levin and Ralph Matthews.

About the most contemporary thing in campus society is the new campus society, SUPPORT. Only with continued and complete support as we, as students, hope to combat paternalism. SUPPORT ...

L&M UNLOCKS CAMPUS OPINION

#6 in a series of polls conducted by L&M student representatives in over 100 colleges throughout the nation.

Pack or Box

Light up an L&M, and answer these questions. Then compare your answers with those of 1,383 other college students (at bottom of page)

Question #1: As a college student, do you believe that you are taking the best advantage of your educational opportunities?
Answer: Yes_____ No_____

Question #2: Some college men are wearing trimmed beards. Do you think most girls will be attracted to men with trimmed beards?
Answer: Yes_____ No_____

Question #3: Do you think that American colleges tend to overemphasize football and other sports to the detriment of the status of academic accomplishments?
Answer: Yes_____ No_____

Question #4: How many cigarettes do you smoke a day, on the average?
Answer: Less than 8_____ 8-12_____ 13-17_____ 18-22_____ Over 22_____

UNLOCK A NEW WORLD OF FRESH SMOKING PLEASURE

Start Fresh with L&M ...Stay Fresh with L&M ...

L&M Campus Opinion Answers:

Answer, Question #1: Yes 36% – No 64%
Answer, Question #2: Yes 10% – No 90%
Answer, Question #3: Yes 34% – No 66%
Answer, Question #4: Less than 8, 20% – 8-12, 18% – 13-17, 19% – 18-22, 28% – Over 22, 15%

The more you smoke, the more you appreciate today's L&M. You start fresh with L&M, and you stay fresh with L&M. Do more with developed taste for good. The secret? Flavor Seal . . . L&M's special way of moisturizing tobacco to seal in natural tobacco freshness . . . natural tobacco goodness. Get fresh-tasting – best-tasting L&M.

The L&M Campus Opinion Poll was taken of over 100 colleges where L&M has student representatives ... and is believed to be a statistically random selection of all undergraduate schools.

PROFESSORES

(continued from page seven)

have touched off the powder keg of resentment which has been filling for some time but which the Administration has not until now deigned to recognize. I expected an explosion at the time of Winter Formals; I expected an explosion at the time of Kake Walk. An explosion at such a moment would have exposed the issue which is fundamental: the drinking policy and all of the problems which appertain thereunto. Most of the student apartments I have seen are not particularly attractive diggings. The tables in most would not support Volume One of *Major British Writers* for a full semester. But they would and have supported a beer stein or a bottle, I am sure. Thus the reluctance to give up apartment parties.

I would hope that the basic protest can be salvaged from the present outburst -- an outburst which has taken the form of personal vilification and bitter mistrust unworthy of a university community. I must say that I believe Dean Clifford to be a sincere man, a man of principles, I cannot agree with some of those principles, and I cannot agree with the policy pattern he has adopted. Still, I feel that the policy has been honestly conceived, and I know that it has been logically pursued.

Unfortunately, this superbly consistent policy, designed to prevent trouble, has in fact consistently invited trouble -- not simply last week, but from the very beginning. I was disappointed when no demonstrations materialized against earlier restrictions placed upon the student body. And now, ironically, I find myself in something far short of full agreement with the students on the particular issue at hand. However, in the long view, I must announce my support of the student position.

American society at large may well expect colleges to practice paternalism. It is also just possible, however, that "society" at large and the "Legislature" in particular are not quite so alert for sin as it is frequently suggested they are. Perhaps such specters of stern disapproval are conjured up to serve administrative convenience. In any case, although a university cannot behave as a law unto itself, it is nevertheless a proper function of a university to lead rather than to follow. It would seem to me that the University of Vermont is presently in a splendid position to provide enlightened leadership in the area of granting adult responsibilities and placing adult demands on the young men and women whose education it is reasonably expected to foster.

Under the present circumstances, it may even be necessary for the University to choose between adhering correctly to society's laws and remaining true to the obligations placed upon it by society.

Robert B. Cochran

ROTC Voluntary At Wisconsin

the fall semester, recently [illegible] Army ROTC [illegible] of the [illegible] during [illegible] year.

[illegible] that the number of students who entered the advanced Army ROTC programs on both the Madison and Milwaukee campuses in the fall of 1961 was 250--300 at Madison and 80 at Milwaukee. He also stated that to meet the ROTC [illegible] a total of 188 advanced program men will be needed in the fall of 1961 and 1962.

Army ROTC enrollment figures for the fall term, presented in the report, show a total of 811 freshmen enrolled in basic Army ROTC courses--388 on the Madison campus and 423 on the Milwaukee campus, and a total of 447 sophomores enrolled in basic Army ROTC second year courses--226 at Madison and 221 at Milwaukee. These are the two groups from which the 188 advanced program men will be needed in the fall of 1961 and 1962 to continue the program on a voluntary basis.

Kuntsche's figures also show a total of 321 freshmen enrolled in Air Force ROTC basic courses on the Madison campus for the fall term, and 107 sophomores enrolled in the second year AFROTC courses.

The Circular File

by MIKE GOODMAN and DICK SNIDER

[illegible] we're changing UVM into a university. Instead of the prep school it has been for the last four years. And what's more, we're going to win. We are going to win, because we know that [illegible] policies just are not going to be allowed. We know very well that we haven't "misinterpreted" the word of Pope's new plans for UVM. We know what he's planning to do, to make the few concessions he has planned to make all along, so he can martyr himself saying "I've made concessions, now it's your turn." But Pope is in for a surprise--we're not going to compromise. If we do, on even one point, then it will be just a matter of time before we're pinned in diapers after all. We're going to win this fight, because we know that Pope had a lot more in mind when he released the new "suggested rulings" than he told the papers "just to get student opinion on them". Well, he got student opinion, and if we keep it up, we'll win.

We've got the townspeople on our side, the alumni, the faculty, even the kind ladies in the UVM bookstore. through STOP, and through STUPID (Society To Undermine Pope Idiotic Demands), and through our unity, we can't be stopped.

Step by step, the longest march,
Can be won, can be won.
Many stones can form an arch,
Singly none, singly none.
And by union what we will,
Can be accomplished still.
Drops of water turn a mill,
Singly none, singly none."

Housing Program

(continued from page one)

made to increase control and guidance over the male undergraduate students. For example, the statements saying that householders must enforce University regulations or that householders can't leave for a period of time without having an University acceptable substitute.

Therefore, it is my contention that the proposed policy is not justified by the suggested philosophy of insuring adequate accommodations and study facilities. The proposal, however, can be justified on the grounds, that it would insure adequate control over UVM male students. But is this control necessary? I can honestly say no. It is my belief that a University has a two-fold purpose; one is to foster intellectual development and the other is to develop a sense of responsibility in a student to himself and others. This responsibility can not be realized if there is a system of controls which does not allow it to grow. Responsibility is not, or ever will be, fostered in an atmosphere such as would be created by the proposed policy. It is my sincerest hope that the entire student body will make constructive and realistic attempts to deter the acceptance of the proposed policy on housing for UVM undergraduate males.

PEACE CORPS

(continued from page one)

States. Our agricultural development is the greatest in the world, and is a field in which most other nations are in great need of help. Therefore, Dr. Little feels that we should emphasize our agricultural progress when dealing with foreign countries, and that the Peace Corps is an excellent opportunity to do so.

Protest to Fey

(continued from page two)

in a residence of their own choosing, in their [illegible] year. We submit the following in our argument

1. We believe that a senior university student has sufficient maturity to decide for himself where and under what conditions he shall live and take his board. At the age of 21, (and older in the case of veterans) a man is old enough to vote, serve in the armed forces, make legal contracts, and take a wife. Yet under the proposed housing policy, he is not even permitted some of the most basic freedoms of choice.

2. It has been stated that dormitory conditions are more conducive to study than other forms of housing. We believe, from extensive personal experience, that the quiet and privacy of private housing is the best environment for students who desire to study. A man of twenty-one years of age is certainly mature enough to realize his academic obligations and use the privacy of an apartment for studying.

3. The new policy pertaining to unmarried senior men students states, "Landlords. . .will be asked to open their residences to representatives of the office of the Dean of Men"; that "the university must approve the housing"; that "the university will not approve off-campus housing where the entrance or exit to and from the student's room is separated from the entrance or exit used by the landlord"-etc. These regulations do not attempt to realize the student as a responsible member of an institution; a man who will be expected to act in a responsible manner in the community he chooses to live in. Responsibility can not be nurtured in a climate that is stifled by unnecessary regulations. We ask no more for a twenty-one year old student than society asks for its twenty-one year old citizens. We ask that the university consider us as responsible citizens in dealing with matters and act in good faith with us.

4. There are as many different views on education as there are educators. Some contend that the obligation of a university is simply and solely to offer the finest curriculum possible. Others believe that it should help to "shape" a well-rounded, educated citizen. We believe that these proposed restrictions on senior men would be unsatisfactory whichever philosophy to which one adheres.

If one believed in the former, then it is neither the university's duty nor right to invoke these proposals. If it is the latter which one supports, then they would oppose it on the grounds that a senior university student who has to assume all the aforementioned responsibilities of manhood and who must prepare himself for leaving school, would not be given the opportunity for sufficient preparation. Surely, they would argue, that a senior student, who had lived for four years in the paternalistic, restrictive, strictly regulated environment of a dormitory or "acceptable university substitute" would not have received an education, and would fully "prepare" him for later life.

5. We feel that the proposed policy would have an extremely detrimental effect on Burlington household [illegible]. If our proposal to allow senior men to live in houses of their own choosing was accepted, this unfortunate ramification could be minimized.

In conclusion, we, the members of STOP- (The Society To Oppose Paternalism) do respectfully request the consideration of our proposal: that single undergraduate male senior students be permitted to live and take board at a residence of their own choosing. We cannot, in conscience, and in light of our obligations to the students whom we represent, deny their inalienable right to peaceful protest. We must and will continue our endeavors to direct this protest by strictly peaceful means, until suitable satisfaction is obtained.

Hillel Elections

Sunday, March 26, the members of Hillel elected their new officers at a brunch held in the coffee shop. The new officers, installed by Professor Kahn on Sunday, April 23; are President, George Adler; Vice-President in charge of culture, Vic Hoffman; Vice-President in charge of membership, Ted Splaver; Corresponding Secretaries, Linda Leffel and Sue Rosenthal; Recording Secretary, Sue Oshlag; Treasurer, Stan Doher; Class Representatives: '64, Sandy Ilkosky, Chuck Grufman, Micky Sternberg. '63, Joan Powell and Larry Yarkin; '62, Harriet Katz and David Solib.

NOTA BENE

This appeared in the "Campus Quotes" of the newspaper at Brooklyn College.

VERMONT CYNIC (University of Vermont) explains its cynicism: "The Sixties Student has the idealism of the Thirties in his veins well mixed with the realism of the G.I.'s. To this combination is added a touch of the cynicism of the Lost Decade. The cynicism serves chiefly as a reminder of those far and fallow years, from which the new student emerged as a reaction. His substance of proof will presumably come with age."

LITTLE MAN ON CAMPUS

Two approaches to the "man's deodorant" problem

If a man doesn't mind shaving under his arms, he will probably find a woman's roll-on satisfactory. Most men, however, find it simpler and surer to use Mennen Spray Deodorant. Mennen Spray was made to get through to the skin, where perspiration starts. And made to work all day. More men use Mennen Spray than any other deodorant. How about you?

by CHARITY GREENWOOD

Varsity Victors Over Union

Wednesday, May 3, UVM's and [illegible]'s cindermen battled each other for victory on UVM's Centennial Field. The Catamounts, displaying more speed and ability, managed to rake first place in all but one of the fifteen events to beat Union with a score of 90-35. The one event that they lost was the 220-yard low hurdles which was won by Cherkin of Union.

All other events fell into the hands of the UVM track team as if they were pre-destined to do so. Tim Simpson helped to lead the Catamounts to victory by winning three events. He zipped 880 yards in 2 minutes and 2.1 seconds, broad jumped 19 feet [illegible] inches, and tossed the javelin 184 feet 9 inches. John Bister gained two firsts for UVM by winning the 100-yard dash in 10.2 seconds and the 220-yard dash in 22.4 seconds. Peter Vinton tied Holland of Union by high jumping 5 feet 8 inches.

A little later he threw the discus 119 feet 8 inches to out-distance all others in that event. B. Billings won the two-mile event in 10 minutes 18.5 seconds. Bill Green won the 120 high hurdles in 16.2 seconds. Bill Mulhern dashed the 440 in 51.4 seconds. Eric Perkins ran the mile in 4 minutes 27.6 seconds.

Finishing up the meet in a blaze of glory, Dick Gomez pole vaulted 10 feet to take first place in that event; and Dave Sequist tossed the shot 43 feet ½ inches to take first in shot putting.

TRACK TEAM TROUNCES TRINITY

Saturday, May 7, proved to be another glorious day for UVM's varsity track team as they beat trinity College of Connecticut.

Tim Simpson and Bill Perkins were the double scorers for UVM. Simpson with his usual ability and sportsmanship, broad jumped 20 feet and ½ inches and then threw the javelin 184 feet 10 and 1 inches. Perkins, won the mile event in 4 minutes and 28.6 seconds and took the [illegible] yard dash in 2 minutes .2 seconds.

The [illegible] results were as follows:

Event	1st	2nd	3rd	time
Shot put	Whittaker (T)	[illegible] (V)	Brown T	43' 10"
[illegible]	[illegible] V	[illegible] T		10'
		[illegible] T

UVM Grid Captain In Agriculture

[illegible] at [illegible] UVM who have a great football potential. The other half [illegible] to have an exact [illegible] are becoming [illegible] UVM football scene that is [illegible] to gridiron into a [illegible] with the New England [illegible].

The [illegible] upon [illegible] by coaching to [illegible] the UVM football missile [illegible] is Captain Elect, Bob [illegible].

Football coach Ed Donnelly, in a letter to the members of the [illegible], "is the team, "your captain will lead you and we have complete confidence in him."

Bob Stone

Stone, a rugged 6'1", 210 pound tackle from Merdan, is in the College of Agriculture. Football and Agriculture is an unusual combination. Our College of Agriculture is so rough that only 131 enrolled in it. Playing football and maintaining good grades in this College is a tremendous task, but Stone is a dedicated person and works hard at both.

Last year injuries sidelined "Stoney" for most of the season, but he still played well enough to make the Vermont All-Star team. This was an exceptional display of courage and determination.

Coach Donnelly says, "Bob Stone has demonstrated that he is one of the finest leaders I've had in my ten years here. He is dedicated and has the respect of the entire squad."

Good luck to Captain and the 1961 UVM football team.

BASEBALL TEAM LOOSES 3-2

Monday afternoon, [illegible] baseball team lost its [illegible] to the Larries of St. [illegible] University by a score [illegible].

The loss was a heart-[illegible] for UVM as the game [illegible] innings - four hours and [illegible] minutes.

St. Lawrence scored [illegible] ning run in the last [illegible] a daring squeeze play. [illegible] outs and men on [illegible] third, their second base[illegible] Sullivan dropped a bunt [illegible] the pitcher's mound and [illegible] base line. Dick DeNicola, [illegible] relief pitcher, realized [illegible] was no possible play at the [illegible] and threw the ball past the [illegible] baseman in a vain attempt [illegible] Sullivan.

Vermont got some ex[illegible] pitching from. Harry Zingg, [illegible] Hobbie, and Dick DeNi[illegible] in six innings, Zingg gave up [illegible] and 2 runs. He struck [illegible].

Bob Hobbie replaced [illegible] the 7th and pitched 2 [illegible] scoreless ball. DeNicola was [illegible] third UVM hurler of the [illegible] replaced Hobbie in the 9[illegible] also pitched scoreless ball [illegible] St. Lawrence scored the [illegible] run in the 14th.

Maynard Ducatte was the [illegible] gun for UVM. He tied the [illegible] in the 7th by hitting a [illegible] loaded double down the [illegible] field line which scored Hobbie and Vito Federici. Duke [illegible] hits in 5 trips to the [illegible].

Vermont left 15 [illegible] stranded on base. They left [illegible] ners on in all, but the 4th [illegible] In the 9th, they left the [illegible] loaded when Reg Godin popped out to end the inning.

The Cats turned in a better than average defensive [illegible] with 2 errors in 14 [illegible] Sophomore shortstop, Joe [illegible] was the defensive standout.

The loss give Vermont [illegible] record of 7-8 for the [illegible].

STOP! Victorious! Senior Men's Housing Regulations Revised By Administration

Fey Makes It Official

STOP! Leaders address students at a rally.
(Photo by: A. Ojaman, SP'61)

When President Fey returned to Campus last weekend he was greeted by several hundred students at the airport. The following Monday, May 8, STOP! presented its proposals for the housing plan for UVM students. Thereafter the members of leaders of STOP! discussed their proposals for senior housing with President Fey and announced tentative results to the rally of students held Friday, May 12, in front of Waterman. At that rally the student leaders told the audience that President Fey was going to approve the revised housing proposals and the trustees early in the following week.

Tuesday, May 9, the leaders of STOP! met with President Fey and gave them the following comments and proposals for housing.

A proposed housing policy was issued on May 1 to undergraduate students and several student organizations. This proposal was submitted to invite discussion so that students might participate in the process of decision making. In the ensuing period there has been some publicity which has resulted in the inclusion of many relevant issues. The proposal concerning off campus housing was the only policy at issue.

This University proposal has been refined in the light of discussion with students, faculty, administrative officers and trustees, and the attached policy will be placed into effect at the date stated. Until that time the present policy will govern the housing operation.

The Dean of Women and the Dean of Men have the support and that of the Trustees in their administration of the housing regulations for male and female students.

The governing bodies of the fraternities will have the support of the University in respect to the policies they have agreed upon in accordance with the University policy.

It is the primary aim of all of the housing policies to provide good housing for University students to the end that they may give major attention to their academic responsibilities.

UNIVERSITY HOUSING POLICY
Effective February, 1962

THIS POLICY IS FOR ALL UNDERGRADUATE MALE STUDENTS NOT LIVING WITH THEIR IMMEDIATE FAMILIES.

1. Those in their first year of residence at the University are required to live in a University-controlled unit.

2. Sophomores and juniors are required to live in a University residence hall or in a fraternity house.

3. Senior men live in University residence halls, fraternity houses or in off-campus houses. Effective September, 1962, all off-campus housing will be University approved.

4. All students who live in residence halls must have University meal contracts with the exception of brothers and members of fraternities who are in their second semester of pledging. They must eat either at their own fraternity table or in a University dining hall.

5. All contracts for rooms and for meals and for the full academic year unless the student is not enrolled at the University for the second semester.

sixth annual summer lane series to open with josh white

Josh White
(Photo by: Moss Photo Service)

[illegible], world-famous folk [illegible] the singing guitar, [illegible] '62 open the sixth [illegible] Summer Series. Mr. [illegible] present one of the [illegible] programs for summer view-

[illegible] Quartet, to per- [illegible] 9, will bring cham- [illegible], with standard and [illegible] to the Series. The [illegible] includes Peter Marsh, [illegible] Isadora Mantz, violin; [illegible], viola; and Donald [illegible], cello.

[illegible] their first appearance [illegible]ston on July 27 will be [illegible] Danes of the Royal [illegible] Ballet. The ten dancers [illegible] group are led by Inge [illegible], ballerina with the Royal [illegible] Ballet.

The final attraction of the Sum- [illegible] Series is John Browning, pianist. He has appeared as soloist with several major orchestras and was solo performer for the United States at the Brussels World Fair in 1958. Browning has also received several awards, such as the Sherwin Centennial Award and the Gold Medal Award by Queen Elizabeth of Belgium, for [illegible] talent.

[illegible] concert, with the exception of the Royal Danish Ballet to be held in Memorial Auditorium, will be seen in the Ira Allen Chapel. Tickets will go on sale in June.

Mr. Jack Trevithick of the Lane Series sums up this year's Summer Series, "Once again the Lane Committee believes that it is offering a Summer Series that is comparable to many regular major series at some colleges and universities. Names like Josh White, John Browning, the Royal Danish Ballet, and the Lenox Quartet are big names at New York's Carnegie Hall, Town Hall, and the Metropolitan Opera House."

New Committee Requested By A & S Faculty

On Thursday, May 11, the [illegible] of the College of Arts [illegible] passed a strongly [illegible] resolution requesting that the President appoint a special [illegible] whose purpose would [illegible] administrative regulations pertaining to students. The committee would be composed of students, faculty members, and representatives of the administration.

The committee would have the power to recommend revisions in rules found to be in conflict with the educational goals of UVM.

[illegible] faculty members signed the resolution, which was passed by the faculty by a large majority. The vote was more than five to one in favor of the resolution.

Members of the college seemed optimistic at the conclusion of the [illegible] meeting. One felt that the administration would "recommend" [illegible] for acting as [illegible] to the proposal.

[illegible] MUST report to CARR Photo Studios if they expect to appear in next year's ARIEL. Portraits are now being taken, and the deadline is fast approaching.

Family Associates Opposes Vt. Highway Plan

The parents of University of Vermont students have gone on record as opposing State Highway Department plans calling for construction of a four-lane Interstate access road through the UVM campus.

Meeting at the University on Saturday, the parents unanimously adopted a resolution expressing concern with the highway proposal, and urged local, state and Federal highway officials to reconsider plans for such a highway, working with University President John T. Fey in resolving this problem.

Leaders of the Family Associates, organization of parents at the University, flatly opposed underpasses and overpasses for pedestrian traffic, as proposed by state highway officials. The parents cited the grim record of such crossings in other communities," noting the increased number of student molestations on campuses where pedestrian passage-ways were constructed.

Discussing the proposed expressway at class meetings held Saturday morning, the parents endorsed efforts being made by President Fey to work out a solution acceptable to the state, the city and the University. They termed an access road completely unconventional, but the most sensible solution, but called a grassed-over vehicular tunnel an acceptable alternative if no other site for the access road could be found.

At their dinner meeting, Saturday night, the parents signed a petition urging reconsideration of access road plans.

Three classes of Family Associates voted new slates of officers for the coming year. Those elected were as follows:

Class of 1962 Presidents, Mr. and Mrs. Reuben Hallett,

Sportlight Southwick

by CHARITY GREENWOOD

Varsity Victors Over Union

Wednesday, May 3, UVM's and Union's Cindermen battled each other for victory on UVM's Centennial Field. The Catamounts, displaying more speed and ability, managed to rake first place in all but one of the fifteen events to beat Union with a score of 90-35. The one event that they lost was the 220-yard low hurdles which was won by Gherkin of Union.

All other events fell into the hands of the UVM track team as if they were pre-destined to do so. Tim Simpson helped to lead the Catamounts to victory by winning three events. He zipped 880 yards in 2 minutes and 2.1 seconds, broad jumped 19 feet 11¼ inches, and tossed the javelin 184 feet 9 inches. John Buster gained two firsts for UVM by winning the 100-yard dash in 10.2 seconds and the 220-yard first in 22.4 seconds. Peter Vovtek tied Holland of Union by high jumping 5 feet 8 inches.

A little later he threw the discus 119 feet 8 inches to out-distance all others in that event. B. Billings won the two-mile event in 10 minutes 18.5 seconds. Bill Green won the 120 high hurdles in 16.2 seconds. Bill Mulhern dashed the 440 in 51.4 seconds. Eric Perkins ran the mile in 4 minutes 27.6 seconds.

Finishing up the meet in a blaze of glory, Dick Gomez pole vaulted 10 feet to take first place in that event; and Dave Sequist tossed the shot 43 feet ¼ inches to take first in shot putting.

TRACK TEAM TROUNCES TRINITY

Saturday, May [illegible], proved to be another glorious day for UVM's varsity track team as they beat trinity College of Connecticut.

Tim Simpson and Bill Perkins were the double scorers for UVM. Simpson, with his usual ability and sportsmanship, tossed [illegible] feet and ½ inches and then threw the [illegible] feet 11 and ½ inches. Perkins, won the mile event in 4 minutes and 25.9 seconds and took the [illegible] yard dash in 2 minutes .6 seconds.

The total results were as follows:

Event	1st	2nd	3rd	time
[illegible]	[illegible]	[illegible]	Brown (T)	[illegible]
[illegible]	[illegible]	[illegible]		[illegible]

UVM Grid Captain In Agriculture

[illegible] at UVM and have a great football season. The added [illegible] will help, when any game can start [illegible] are the beginning of a UVM football player that is going to represent "typical farm boy" from New England [illegible].

Last [illegible] sports writers in preparing to pick the UVM football captain for next year picked Captain Elect, Bob Stone.

Football coach, Jack Donnelly, in a letter to the members of the team, called Stone, "your captain and I look you and we have complete confidence in him."

Bob Stone

Stone, a rugged 6'1", 210 pound tackle from Merdan, is in the College of Agriculture. Football and Agriculture is an unusual combination. Our College of Agriculture is so rough that only 131 enrolled in it. Playing football and maintaining good grades in this College is a tremendous task, but Stone is a dedicated person and works hard at both.

Last year injuries sidelined "Stoney" for most of the season, but he still played well enough to make the Vermont All-Star team. This was an exceptional display of courage and determination.

Coach Donnelly says, "Bob Stone has demonstrated that he is one of the finest leaders I've had in my ten years here. He is dedicated and has the respect of the entire squad."

Good luck to Captain and the 1961 UVM football team.

BASEBALL TEAM LOOSES 3-2

Monday afternoon, [illegible] baseball team lost its [illegible] to the Larries of St. [illegible] University by a score [illegible].

The loss was a heart-[illegible] for UVM as the game [illegible] innings - four hours a[illegible] minutes.

St. Lawrence scored [illegible] ning run in the last [illegible] a daring squeeze play. [illegible] outs and men on s[illegible] and third, their second bas[illegible] Sullivan dropped a bun[illegible] the pitcher's mound a[illegible] base line. Dick DeNicola, [illegible] relief pitcher, realized [illegible] was no possible play at [illegible] and threw the ball past [illegible] baseman in a vain attempt [illegible] Sullivan.

Vermont got some ex[illegible] pitching from Harry Zingg, [illegible] Hobbie, and Dick DeNi[illegible]. In six innings, Zingg gave up [illegible] and 2 runs. He struck [illegible].

Bob Hobbie replaced Zingg [illegible] the 7th and pitched 2 [illegible] scoreless ball. DeNicola w[illegible] third UVM hurler of the d[illegible]. He replaced Hobbie in the 9th [illegible] also pitched scoreless ball [illegible] St. Lawrence scored the w[illegible] run in the 14th.

Maynard Ducatte was the [illegible] gun for UVM. He tied the [illegible] in the 7th by hitting a [illegible]-loaded double down the [illegible] field line which scored [illegible] and Vito Federici. Duke [illegible] hits in 5 trips to the [illegible].

Vermont left 15 [illegible] stranded on base. They left [illegible] ners on in all, but the 4th [illegible]. In the 9th, they left the [illegible] loaded when Reg Godin popped out to end the inning.

The Cats turned in a [illegible] than average defensive [illegible] with 2 errors in 14 [illegible]. Sophomore shortstop, Joe [illegible] was the defensive standout.

The loss give Vermont [illegible] record of 7-8 for the season.

Fey Makes It Official

STOP! leaders address students at a rally
(Photo by: A. Ojaman, SP'61)

When President Fey returned to Campus last weekend he was greeted by several hundred students at the airport. The following Monday, May 8, STOP! presented its proposals for the housing plan for UVM students. Thursday the president or leaders of STOP! discussed these proposals for further hearing with President Fey and announced tentative results to the call of students to Friday, May 12, in front of Waterman. At that rally the student leaders told the audience that President Fey was going to discuss the revised housing proposals with the trustees early in the following week.

Tuesday, May 16, the leaders of STOP! met with President Fey and gave them the following comments and proposals on housing.

A proposed housing policy was issued on May ... to undergraduate students and several student organizations. This proposal was submitted to invite discussion so that students might participate in the process of decision making. In the ensuing period there has been some confusion which has resulted in the inclusion of non-relevant issues. The proposal concerning off-campus housing was the only policy at issue.

This University proposal has been rejected in the light of discussion with students, faculty, administrative officers and trustees, and the attached policy will be placed in effect at the date stated. Until that date the current policy will govern the housing operations.

The Dean of Women and the Dean of Men have the complete support not that of the Trustees in their administration of the housing regulations for undergraduate students.

The governing bodies of the fraternities will have the support of the University in respect to the policies they have agreed upon in conjunction with the University policy.

It is the primary aim of all of the housing policies to provide good housing for University students to the end that they may give major attention to their academic responsibilities.

UNIVERSITY HOUSING POLICY
Effective September ..., 1962

THIS POLICY IS FOR ALL UNDERGRADUATE MALE STUDENTS NOT LIVING WITH THEIR IMMEDIATE FAMILIES.

1. Those in their first year of residence at the University are required to live in a University residence hall.

2. Sophomores and juniors are required to live in a University residence hall or in a fraternity house.

3. Seniors may live in University residence halls, fraternity houses or in off-campus housing. Effective September, 1962, all off-campus housing must be University approved.

4. All students who live in residence halls must have University meal privileges with the exception of brothers and pledges of fraternities who are in their second semester of pledging. They may eat either at their own fraternity table or at the University dining hall.

5. All contracts for rooms and for meals are for the full academic year unless the student is not enrolled at the University for the second semester.

[illegible] in connection with the theme of [illegible] growth in industry [illegible] major areas of the State of Ver[illegible] Display information pertaining [illegible] Industry will be [illegible] at the annual [illegible] Engineering.

TILL WE MEET AGAIN

Seven years now I have been writing this column for the makers of Marlboro Cigarettes, and each year when I come to the last column of the year, my heart is gripped by the same bittersweet feeling. I shall miss you sorely, dear readers, in the long summer days ahead. I shall miss all you freckle-faced boys with frogs in your pockets. I shall miss all you pig-tailed girls with your gap-toothed giggles. I shall miss you one and all, your shining morning faces, your spiders, your marbles, your jokes, your little rubber sketches.

But I shall not be entirely sad, for you have given me many happy moments to sustain me. It has been a rare pleasure writing this column for you all year, and I would ask every one of you to hound your pa during the summer except there is no income tax then. The makers of Marlboro Cigarettes, after I turned several headlines, mailed me in. All I have to do is drop my columns and through which they supply me with Marlboro Cigarettes and such food as will slip through a mail slot. (For six months now I have been living on alfalfa-stamped mucilage.)

I am only having my little joke. The makers of Marlboros do not want me in. They would never do such a cruel thing. Mostly they are men of great heart and sweet, compassionate disposition, and I wish to take this opportunity to state publicly that I will always have the highest regard for the makers of Marlboro Cigarettes, no matter how my lawsuit for back wages comes out.

I am only having my little joke. I am not suing the makers of Marlboros for back wages. These honorable gentlemen have always paid me promptly and in full. To be sure, they have not paid me in cash, but they have given me something far more precious. You would go far to find one so covered with tattoos as I.

I am only having my little joke. The makers of Marlboros have not covered me with tattoos. In fact, they have engraved no commercial advertising whatsoever on my person. My suit, of course, is another matter, but even here they have exercised taste and restraint. On the back of my suit, in unobtrusive script, they have put this tantalizing little jingle:

Are your pants built out of fudge?
Are you bored with sagging, grudge?
Then try that splendid Marlboro flavor.
Try that convenient Marlboro flip-top box.

On the front of my suit, in modest pictographs, are pictures of the members of the Marlboro board kick their heroines. On his hat is a small cigarette girl crying "Wait! I want my Marlboros!"

I am only having my little joke. The makers of Marlboros have been perfect boys to work for, and if their readers have any kind response to my nonsense [illegible] about this old thing, and I trust you will not find me soggy if in this final column of the year I express my sincere gratitude.

Have a good summer. Stay healthy. Stay happy. Stay home.

© 1961 Max Shulman

* * *

The makers of Marlboros and the new unfiltered king-size Philip Morris Commander have been happy to bring you this uncensored, free-wheeling column all year long. Now, if we may echo old Max: Stay healthy. Stay happy. Stay loose.

Lane Series Announces Concert Dates

Lane Series subscribers, [illegible] most of the same seats, have announced the dates of this year's presentations. The series runs from early October, '61, to early April, 1962.

The pairing of the events into the Red and Blue series will be made later.

The [illegible] events:

Oct. 1 - pianist Byron Janis who recently returned from a tour of the Soviet Union where he was acclaimed a success.

Oct. 9 - The Music Man

Oct. 20 - American Ballet Theatre. This was the first American ballet company to visit the Soviet Union. This will be the second appearance of the troupe under Lane auspices.

Nov. 6 - New York City Opera in Mozart's "The Marriage of Figaro." This will be the sixth Lane appearance.

Nov. 13 - Pittsburgh Symphony.

Nov. 15 - Berlin Philharmonic Orchestra.

Dec. 5 - Dave Brubeck Quartet. This will be the second presentation of the famed jazz pianist.

Dec. 15 - Straford (Ontario) Festival Players in Tyrone Guthrie's production of Gilbert and Sullivan's "Pirates of Penzance."

Jan. 9 - Odetta, the folk singer who also excels in spiritual songs. She co-starred in the screen version of Faulkner's "Sanctuary."

March 13 - Bach Aria Group, conducted by William H. Scheide, and featuring Metropolitan Opera soprano Eileen Farrell and tenor Jan Peerce.

April 3 - Nathan Milstein, violin virtuoso.

SPS Elects New Officers

New photography staff gathers to propose budget for [illegible] year. From left to right: Orlando Romero, Vice-President, Richard Reiber, Treasurer, Andres Ojamen, President. [illegible] from picture, Joseph Barcomb. (Photo by: R. Coleman [illegible])

The Student Photography Staff of the University of Vermont elected officers for the 1961-1962 year recently. The SPS was set up in 1957 to function as a service organization. The primary function is to supply the Cynic with pertinent news photos. Subsequent activities include pictures for the Ariel, Student Association portraits, and private work for various campus organizations such as fraternities and rotc.

SPS has expanded its activities this year to include publicity photos and box office displays for the University Players, Dance Workshop, and Music Department productions at the Arena Theater.

All the work done under the auspices of the SPS is that of the students. SPS has at its disposal a fully equipped darkroom which includes an Omega D-2 enlarger, Speed Graphic camera, a Mamyaflex camera, and facilities for the development of pictures.

The newly elected officers are students who have worked at least one year on the staff. President of SPS is Andrew [illegible], a junior in the College of [illegible]ology from Chester, Vt. [illegible] who is majoring in Electrical Engineering, succeeds Richard Coleman.

Vice-President, Orlando Romero, is a junior in the College of Technology. Orlando is majoring in economics and has been active in many extra-curricular activities on campus.

Treasurer of the newly elected staff is Richard H. Reiber, Jr. Richard, a freshman from Needham, Mass., is also in the College of Technology. Dick was quite active in sports until a shoulder injury prevented him from continuing frosh football.

Joe Barcomb, SPS' new secretary, is a junior from Hartford, Vermont. Joe is majoring in Civil Engineering. Joe has been active in SPS for two years.

The new staff became effective officers immediately after their election.

MALOLO® CORSAIR nautical print zip jacket with oversized pocket and British notched collar. Shown with medium Hawaiian trunks. Both of 100% fine cotton in color combinations of gold and blue. Jacket $6.95. Trunks $6.95

RUGBY 100% cotton fleece deck shirt pull over in trimmed colors of white, gold, olive or navy. $5.95. TOP SIDERS deck pants and the newest British SEA KNICKERS with regimental belt. Both of 100% cotton in white, gold, natural, olive or black. $5.95 and $6.95

Our agricultural development is the greatest in the world, and is a field in which most other nations are in great need of help. Therefore, Dr. Little feels that we should emphasize our agricultural progress when dealing with foreign countries, and that the Peace Corps is an excellent opportunity to do so.

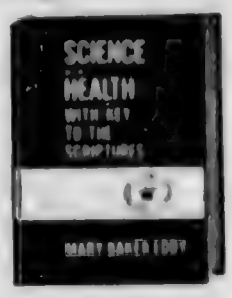
Liedberg Will Speak At University Players Banquet

"New Talent Uncovered In Players"

Thos Sunday evening ... the Executive Dining Room, Kevin S. Liedberg will address the assembly and ... the University Players. Kevin Liedberg, himself a member of National Collegiate Players, will be the ... speaker at the gala ... Players banquet.

Prior to the banquet there will be a final meeting of the Players, at which time ... productions will be reviewed and next year's officers will be elected. President Bill Bodi will preside over this meeting.

When interviewed recently, Mr. Bodi said that to say about the 1960-1961 season. "It has been a very successful year. There has been a lot of interest shown in the players, especially by newcomers. Attendance has been good, and we have been helped tremendously by the Student Association in every which realized the cultural contribution which it is our goal to make to the University and the city of Burlington."



This year's productions: VERMONT VARIETIES, WHERE'S CHARLEY, ANTIGONE, PLAYTIMERS tour, JANUS, AN EVENING OF DANCE, and two operas being presented this week end, have all had a great deal of interest shown in them. All of these productions, with the exception of WHERE'S CHARLEY, had a number of newcomers in leading roles.

In every undertaking the Players has had the invaluable guidance of Greg Falls and Ed Lindner, who are constantly giving freely of their own time in order to benefit the Players.

There has also been a lot of interest shown by people who do not desire to act, but are interested in working with lights, scenery, sound, props, or any of the backstage aspect of any ... production. The ... Players have been able to accomplish some spectacular effects through the use of a very ... sound system which has installed in the Music Department this season. Many of these effects are evident in the Janus concert which was presented last week end.

In summary Mr. Bodi says, "This year there has been a lot of new talent uncovered in Players and productions. People who thought they could not act, found that they could. In the future we expect great things from some of these newcomers to our group."

EVERY COLLEGE STUDENT needs this book

to increase his ability to learn

An understanding of the truth contained in Science and Health with Key to the Scriptures by Mary Baker Eddy can remove the pressure which concerns today's college student upon whom increasing demands are being made for academic excellence.

Christian Science calms fear and gives to the student the full assurance he needs in order to learn easily and to evaluate what he has learned. It teaches that God is man's Mind—his only Mind—from which emanates all the intelligence he needs, when and as he needs it.

Science and Health, the textbook of Christian Science, may be read or examined, together with the Bible, in an atmosphere of quiet and peace, at any Christian Science Reading Room. Information about Science and Health may also be obtained on campus through the

Christian Science Organization at

UNIVERSITY OF VERMONT

Letters To The Editor

Ag Information

[illegible]

As usually I agree with the long statements of Lord Jeffrey regarding the Ag Hill. But on a matter concerning the progressive [illegible] of the University, we [illegible] a meeting of several [illegible] of this campus. The [illegible] was [illegible] Ag Hill [illegible] and [illegible] Ag [illegible] Science and Home [illegible]. I am [illegible] to [illegible] the [illegible]. We [illegible] there at 2:30, which was [illegible] a pleasant hour at [illegible] happily [illegible].

Dear Sir, there might be a few who would question over-emphasis on academic standards per se, but it is [illegible] the [illegible] of the [illegible]. But it is [illegible], and also wants to [illegible]. I'd just say, with great respect, a heartfelt "Good luck to Captain Stone and the [illegible] football team" both athletically and academically.

Sincerely,
Jack F. Little
Director of Resident Instruction
College of Agriculture and Home Economics

Now Drinking?

To the Editor:

Perhaps I am too progressive or too liberal, but the University drinking [illegible] seems ridiculous in its statement that "regardless of age" a student is not permitted the use of alcoholic beverages. It implies that drinking is a terrible vice and that maturing students shouldn't be exposed to the complexities and decisions they have to make in life. If a person is legally permitted to drink at the age of twenty-one in every state, then the University must feel that the state laws are not sufficient. I imagine the University feels that it is a far better judge of adulthood and maturity than an entire country.

That is a minor point in the complete policy. The rest is acceptable and understandable, even though a bit over-protective. I feel that the University means to further education and develop character in the student. Yet, character will evidently lack the acid test of responsibility and self discipline if reality is continually choked off or hidden from the student's life. For example, it's much more difficult and much less successful to teach a child to speak by allowing him only to listen to the spoken word rather than letting the child help himself by trying to speak. This is similar basically, to the plight of UVM students. We can not always be dependent on the University to establish the rules for our personal lives, our moral codes, and our responsibilities. The University can argue that our academic life will be hindered by such liberalism, but can they honestly expect us to act like adults when they treat us like children?

I feel that if this question remains unanswered, the University and the students will suffer accordingly.

Sincerely,
Paul Singer

Appreciation Of Music Festival

To the Editor:

There has been a lot of talk about maturity around the campus lately. Accordingly, a few high spirited "undergraduates" had occasion last Saturday to exhibit their own private brand.

About a dozen noble brethren of one of our Main Street fraternities gathered, cup in hand, on the porch roof of their establishment to enjoy the spring weather and to watch the parade of high school bands that had come to Burlington for the Vermont Music Conference. These individuals were quite audibly demonstrative in their appreciation, not only of the high school bands' musical efforts, but most particularly of the physical attributes of the hapless majorettes and sundry feminine passers-by who were unfortunate enough to have to pass beneath their relentless scrutiny. Nor did their zeal diminish throughout the hour-and-a-half that the parade lasted or, on the contrary, the harassment increased in pitch and intensity as each new group passed by the "reviewing stand" where these young gentlemen were so freely dispensing their vociferous approbation.

I suggest that we all offer a resounding vote of thanks to these students for the way in which they exemplified to the general public and to Vermont youngsters just how far along the path toward maturity that SOME University men can advance. It is to individuals such as these that our underclassmen must look for leadership in their fight for greater freedom and responsibility in future years. Isn't it?

Reid E. Baker
Romance Language Department

Voices From Washington

To the Editor:

Please use the enclosing me a copy of the statement which was delivered on [illegible] W. Clifford, [illegible] at Meeting of the Legislature of Vermont.

This, together with the special edition of The CYNIC, gives a clear picture of student reaction to the proposed housing policy for men.

Sincerely,
[illegible]
United States Senator

To the Editor:

This is to ask [illegible] of the statement [illegible] concerning the [illegible] dents living on the [illegible] Vermont campus.

I am always very [illegible] affairs at our State [illegible] and appreciate being [illegible] on this matter.

Sincerely,
Robert T. [illegible]
Member of [illegible]

Neglected Arts

To the Editor:

Since the columns of the CYNIC are bursting with letters to the Editor these days I guess I might as well write one, too. Maybe I have Spring Fever. My position and age prohibit my organizing a panty raid, and the question of where single Senior men are going to live I leave to more informed powers. (But I DO hope they use their power with some sense of perspective.)

However, like everyone else in this burgeoning Spring, I am moved to pick on Authority. In my current book the Authority consists of questionable scapegraces, badmashers, caitiffs and occasional nudniks. Not that I don't love them individually. They just puzzle the bejasus out of me, every now and then.

For example:-- The University is in the midst of a Fine Arts Festival, to which a lot of students and a lot of faculty have given loving thought and uncounted hours of work. Those of us involved look upon the events of this annual Spring wing-ding as an opportunity to show the campus(including Authority) what we have been up to and to make tangible and visible and audible the reasons why we faculty members go around all the time boasting about how good our students are, and how proud we are of their achievements.

I attended the final performance of the Dance Workshop production Saturday night last. I was happy to see TWO faculty members there. Authorities? Not ONE! Like I say, nudniks. And they robbed themselves, because the performance was of very high calibre. The orchestra concert on Sunday? Same story.

This year the Art Department has mounted an exhibition of student painting, sculpture and crafts in the Fleming Museum which I will stack up against any college show I've seen anywhere. I am not only proud, I am astonished.

So what is the official reaction? Last year when we had a show good enough to get written up in the CHRISTIAN SCIENCE MONITOR, one of the key administrators (so far as my department goes) didn't have time to see it -- and it was in the Museum for three weeks!

Last year UVM won first prize in the New England Intercollegiate Exhibition of painting at the Springfield Museum of Fine Arts. We exhibited there three [illegible] won the first award (from fourteen other competing New England colleges) two [illegible] bad batting average. And no art major! But not [illegible] CYNIC had room in its [illegible] for this news. Authorities it was interesting.

Well, what am I griping about. After the Senior men are settled in their private apartments with private entrances [illegible] in dancing girls, and [illegible] comes again, we might [illegible] other series of gentlemanly [illegible] aimed at making our [illegible] aware of the arts, interested enough at least to go see [illegible] what's happening, and [illegible] to wean them away from the idea that the arts at UVM [illegible] essentially the undertaking [illegible] mal-adjusted bead-stringers.

If the leaders want to [illegible] sooner than next Spring, they might go see what we [illegible] and sculptors and painters [illegible] actors and musicians have been up to THIS year.

Francis Colburn
Chairman
Department of Art

Losing Customers

To the Editor:

I am appalled at the way the University of Vermont mistreats its students. I certainly am interested in going to a [illegible] nursery rather than a college to develop mature citizens. I hope the students are given responsibilities, they will never mature. What will they do when they graduate without their mothers, the university? You read articles about how the army is worried about the lack of responsibility, character, and morals in the recruits that they are getting. The University of Vermont certainly is not helping to build better citizens by taking away their rights. If a person is old enough to vote and fight, he ought to be able to drink and eat where he wants.

If this condition persists, I know a number of other future college students will not be interested in going to the University of Vermont.

Sincerely,
Eino Ojanen

Outside Information

Palmer School of Chiropractic
Box 170
Davenport, Iowa
May 13, 1961

Dear Sir:

I have just received information concerning the University housing program. I must say that it is a startling proposition.

I believe that it is a good plan to have the Freshmen and Sophomores required to live in the dormitories so they can familiarize themselves with their fellow classmates and the community. However, to require dormitory or fraternity housing for all Juniors is in my opinion an impossible situation.

It would seem apparent after reading the regulations that the crux of the matter would be to prevent drinking by the University students. If men over twenty-one aren't adult enough to drink, then who is? Those students who want to drink will drink regardless of what the University will try to do to prevent it. Prohibition didn't work for the U.S.

Questionnaire Results

... a questionnaire ... the ... Women's Student Government ... with a view toward ... Meeting ... the Student Council on Women ... at 9:00, May 5. ... announced the ... Miss Parker, ... Personnel Director, ... of W.S.G.A. activities.

... the ... meeting was brought up, Pat announced that W.S.G.A. was ... Miss Parker. ... Director of Student ... Council, then asked ... group's support of the ... organization.

... followed a ... by Anne Parker of the general results of the student questionnaire. The women students ... were present added their ... and topic was the ... The first of these questions concerned the house committees as disciplinary groups. ... girls felt that ... served no actual purpose as a guiding force, but agreed on a positive ... Several suggestions from the floor included cutting down the number of girls on house committee, rotating the duties of house committee among the girls in a particular living unit, and combining the house committees of the larger units into one committee.

Along with this topic was brought up the question of what to do if a girl refuses to report herself to house committee, after breaking a WSGA rule. Many felt that it was none of their business, while the majority of girls there said they would tell the house president for the good of the girl in question; if she would not report herself, then she probably would need some guidance.

An important issue was then discussed: the fact that girls have no choice concerning the honor code. They must sign pledges as Freshmen stating that they will abide by the honor system while they are at UVM. It was noted that since WSGA doesn't notify girls of the existence of an honor code until the early fall when they have refused other schools already, they are forced to either sign the pledge hypocritically, or not attend UVM. Perhaps, stated some, if the women students of the University took more pride in their honor system, there would be no problem. Incoming Freshmen would deem it a privilege to live under such a system.

Two "Desk-Fax" Received From Western Union

The college of Technology at the University of Vermont has received two facsimile telegraph machines called "Desk-Fax" as gifts from Western Union.

The machines, which occupy only a small portion of a desk or table, can transmit written, typed or printed matter, and pictures for a distance of five miles. Either machine can transmit or receive a message approximately three by six inches in about 2½ minutes.

Presentation of the machines was made to Edd R. McKee, Dean of the College of Technology, by Frank O. Brewer, district manager of Western Union for Vermont and New Hampshire, and by John Donears, manager of the Burlington office of Western Union. The local office will supervise the maintenance of the machines.

Western Union, which has approximately 27,000 "Desk-Fax" in customer service throughout the United States, has presented these machines to ... and colleges ... the ... are receiving the machines. But the two received by UVM are the first given to any colleges in Vermont or New Hampshire.

STUDENTES

... of our UVM ... student, when the occasion justifies it. I am now a senior at UVM ... I agree with the opportunity ... first of the housing regulations ... (C)NC, May 1, 2, 3, while I was attending the ... would not abide by those which ... have been ...

As Thoreau said in his essay CIVIL DISOBEDIENCE. We ... should be more frugal, and seldom prosperous. As far as I am ... concerned, I would be content to sleep on the ... around, since I am prepared for and accustomed to sleeping in ... all weather conditions in connection with ... activities. But I would not live in a dormitory, nor have a meal ... contract, in any case. ... might cause me to be expelled from ... the University, but the amount I would learn from the experience ... would fully make up for any lack of formal education that might ... occur. And furthermore, I would see that the incident was so ... widely publicized that at least every person in Vermont would ... have had a chance to hear of it and to view the freedom allowed ... their university students.

This is a suggestion which I am sure will not be followed by ... mass, since a better means exists to them than to educate ... But if 10%, perhaps even 5%, of the student body COLLECTIVELY ... REFUSED to abide by the regulations, necessitating either their ... dismissal or a change in the housing policy, the administration ... would be forced into the latter, IF PUBLIC OPINION WERE SUF... FICIENTLY AROUSED ON THE STUDENTS' SIDE.

Probably this issue is not serious enough to make even an ideal ... faculty walk out, but it is up to us, the students, to use all ... violent means to show our disapproval and non-compliance. Each ... man must decide how much freedom he needs to live.

Let's put our hearts and our heads into STUFF now, and heed ... Clifford's rules, not mentioning our "last resort" until we have ... come to it. Do not pawn your ... in gaining your education, but use your conscience to further it.

Quickie

Dear Sam,
Don't know what you're going to do, m boy. Earle tells me ... that your parents aren't University Approved.
Your friend,
Ralf

The Circular File

by MIKE GROSSMAN and DICK SNIDER

When a student prepares to leave high school, he is told that at college he will not have the ... he has had in high school. The student learns that there will be no one to tell him to study and fewer people to tell him how he must behave. At college he is on his own. As high school prepares the student for college, college is supposed to prepare him for life. It does so because the student is forced to accept responsibilities. He must develop his own study habits and force himself to study. He must leave the paternalism his high school offered him and strive for self reliance.

A university is founded on the same principle as a gym. You can't build up your muscles unless you exercise them. Likewise, a student can not develop into a mature adult unless he gets to exercise by assuming responsibilities. He must be allowed to learn from his failures without being injured as severely as he would be if he had no previous experience with them, and he has to meet them in the outside world. Therefore, the worst policy a university can adopt is one of paternalism, because it defeats the very purpose of the institution. The paternalistic university is like the man who sends his boxer into the ring without first giving him the chance to train the boxer won't finish the 'first round'.

What we're trying to say is that our administration is defeating their own purpose. We agree with it 100% - that is, for a high school, but UVM isn't a high school - theoretically. The administration doesn't plan to become paternalistic because they want to be a brother ... or to be ... and sadists. They are sincere in their belief that they are working for UVM's best interests. The only trouble is that they are blindly defeating their purpose because they are throwing fences across our ... ground and locking up what must be our 'gym'. The administration ... of how that it is their duty to supervise our growth and morals by keeping a close watch over us i.e. - no apartments in town, ... and rules. A ... guide the students as a parent guides his boys, but there is a limit and ... to which they can go. Paternalism ... is harmful because it robs the ... of their outside the classroom education. ... belongs in high ... and if our boys want to act as parents to the students, let them go back to high school. We want a college ... students, then let them tighten UVM's academic standards, and ... was not responsible. This is the system the better ... going on because they have the ... Let's ... to be more ... students, ... their students by demanding more from the ..., and let's ... what we have ... and before they ... both our education and our college. Let's be what we could call ... *A Guiding Light to a Misguided Institution.*

Menotti Operas To Be Given Tonight And Tomorrow

Tonight and [illegible] curtain on Ira Allen Chapel, the Music Department will present two Gian-Carlo Menotti operas. The Medium and The Telephone. The cast of The Medium includes Joanne Cheney as Baba, Carolyn [illegible] as Monica, Ruth Rudy as Toby, Barbara Lyon as Mrs. Gobineau, Jim Shepard as Mr. Gobineau, and Jane Christmas as Mrs. Nolan. The remainder of the cast of The Telephone are Anne Lucas as the maid, Lucy and Ben Kelley as Ben. Accompanists for both operas are Linda Landsverk and Cathy Cook.

Although born in Italy, Menotti emigrated to America as a young boy, and it is on that country that he has written both comic and operatic [illegible] such works as Amahl and the Night Visitors, The Consul, and many others.

The Medium describes the tragedy of a woman caught between two worlds, a world of reality which she cannot wholly comprehend and a supernatural world in which she cannot believe. The Telephone, on the other hand, spins out a gay little tale centered around that modern device which goes by the same name. Together these pieces with their distinctly different moods, provide for an evening of cultural benefits as well as assured entertainment.

Military Review was held Friday at 4 P.M. at Centennial Field. Many freshmen and sophomores attended.

Williams Honored

The great-grandson of an early University of Vermont graduate who is also the son of the founder of Tau Beta Pi, national engineering honor society, was initiated into the society by the UVM chapter at ceremonies Thursday.

Edward H. Williams III of Woodstock, became a member of Tau Beta Pi in festivities that took place in the President's Dining Room in the Waterman Building at 6 p.m.

Williams is the great grandson of Norman Williams, a member of the seventh class to graduate from UVM, and is the grandson of Edward H. Williams who gave the University the money for the science building that bears his name.

Edward H. Williams, Jr. founded Tau Beta Pi at Lehigh University in 1885. The society now has more than 100 undergraduate chapters at colleges and universities throughout the United States.

The Williams honored Thursday evening was graduated from Lehigh in 1915, earning his civil engineering degree in just two years. He is a resident of Woodstock.

R.C. Matthews, secretary emeritus, and Robert H. Nay, secretary-treasurer of the national organization were present for the occasion.

UVM students who will also be initiated into the chapter are Gregory G. Playotes of Bennington; David L. Clough of Northfield; David H. Kellogg of East Junction; and Laurence S. Bartlett, Jr. and Armand E. Sicard, both of Williamstown.

To be eligible for membership in Tau Beta Pi, a civil, mechanical or electrical engineering student must be a junior or senior and in the upper fifth of his class. The purpose of the society is to mark those who have conferred honor upon the alma mater by distinguished scholarship and exemplary character as students or by their professional attainments as alumni. Because he completed his requirements at Lehigh in two years, Williams was never eligible for membership as an undergraduate as much as he did not attain junior or senior status.

It's what's up front that counts

Dance Concert Called "Fine Despite Some Minor Flaws"

Above is a scene from the Dance Concert held on Friday. (Photo by: R. Coleman, SPS)

[illegible] Stein

[illegible] and Saturday even- [illegible] Arena Theatre, Dance [illegible] presented a truly fas- [illegible] evening of modern dance. [illegible] flaws it was, from [illegible] of one who knows [illegible] modern dance, a real [illegible] program.

EXODUS

[illegible] opened with the [illegible] sound of the theme from [illegible] As the lights went up [illegible] [illegible]es, in blouses and full [illegible] were revealed standing in a [illegible] Despite a slightly sloppy [illegible], breaking from that circle [illegible] these four: Marilyn [illegible], Eve Solomen, Carol Sha- [illegible], and Marsha Snyderman, [illegible] captured the attention [illegible] member of the audience. [illegible] four exited, two girls [illegible] hats and canes entered [illegible] the opposite side of the [illegible]. Except for one moment, [illegible] she dropped her cane, Lor- [illegible] Kugell and Carol Mable [illegible] excellent job in keeping to- [illegible] in this fast moving tap [illegible].

The third number was entitled [illegible]. It was danced by Mau- [illegible] Sexton and Dick Pearlstein. [illegible] the first note Maureen was completely alive, vivacious, and a mass of constant, flowing, [illegible], and throughout the [illegible] all eyes were focused on [illegible]. However, it seemed as if [illegible] was either unable to dance [illegible] than a few steps or had [illegible] added to the number as some [illegible] prop. He walked most of the time that he was on stage and always seemed to be there when Maureen needed someone to lean [illegible] to hold her.

ZENITH NUMBER ONE

[illegible] number was followed by the first real high point of the [illegible]. Phyllis Babbitt portray- [illegible] a girl who knew that the moment she stopped dancing she would be killed by two [illegible]. During this number she watched by the two gunmen, she [illegible] sent a very [illegible] picture, from the edge of the stage. One slightly disagreeable note in this number was the [illegible]. It was focused too far back in the stage and, at several points when she approached the audience, she was out of the light almost completely. There are very few easier ways for an audience to break concentration than to lose sight of the performer.

When the applause finally subsided the lights came up on Diana Jordan, looking every bit like a goddess. This light, fast moving number was accompanied by Cyrus Kermanj, a UVM engineering student, doing his own composition. The next number was a solo dance by Eve Salomon. Somehow she was able to combine a remarkable grace and fluid movement with jerkey, nervous-seeming, movements and the result was quite effective. Eve was followed by Carol Mable and Marsha Snyderman doing a doll-like duet. Although, at the start, they were slightly out of time with each other, they exhibited remarkable control throughout the number.

SECOND HIGH POINT

The second high point of the show came with Carol Schelper, the instructor of Dance Workshop, did a solo in foreign costume. She exhibited unbelievable grace and control, and was not strained, but seemed relaxed and natural throughout the number the obvious result of years of experience.

After a short intermission Carol Shapiro and Marsha Snyderm did a portrayal of dope addiction. Carol was the addict and actually managed to convey a feeling of pain, anguish, and wanting to the audience. In a particularly desperate moment

(continued on page nine)

Linnell To Do Research For Scott Labs

Robert H. Linnell, associate [illegible] of chemistry at the University of Vermont [illegible], will become senior research scientist for the Scott Research Laboratories in Perkasie, Pa., effective July 1.

Prof. Linnell, who has worked [illegible] special chemical research [illegible] at UVM, will continue to be active in basic research at the new post, which will also permit him to continue teaching on a part-time basis.

Prof. Linnell, whose resignation was accepted by UVM's Trustees at their December meeting, is a graduate of the University of New Hampshire and holds the Ph.D. from the University of Rochester, where he served as chairman of the department of chemistry.

Prior to joining the UVM faculty, he served as chairman of the department of chemistry at the University of Beirut in Lebanon, and in industry as chemistry group leader for the Reynolds Research Laboratory, and as vice president and technical director of the Titanium Zirconium Company of Flemington, N.J.

CLOUD NINE

Mike Johns, Theta Chi, became [illegible] recently to Nurse Intern at Mary Fletcher Hospital. ATO [illegible] three pinnings over Spring Formals: Bob Brown to Jan Waterman, 64 Buddy Sears to Judy Bridge of Skidmore College and Warren Ellis to Judy Clark, also at Mary Fletcher.

POTPOURRI

AEPi pledges held a successful cookie sale last week ... Theta's "Where the Girls Are" was a big success. Those who were absent missed a delicious picnic. . . Recently initiated into Sigma Nu were Bill Bedford, Pete Sparks, Lou Sage, Jim Flashman, Jim Maynes, Dick Lawson, Dick Paye, Brian Little, Bob Davidson, Ivan Bergevin and Carl Andersen . At the banquet following Theta's initiation several special spins were awarded. Receiving them were Fran Leitner for the highest average in the pledge class, Carol Truitt as the most outstanding pledge and Gracie Waters as the sophomore who most typifies Theta . . . The AEPi's gave a surprise (?) brunch Sunday for those sisters who will be graduating or leaving this year. . . A Senior Picnic was held at the AEPi house Monday evening to bid farewell to these girls . . . AEPi week end consisted of a houseparty Friday night with a "Moonlight Serenade" theme, a steak barbecue Saturday afternoon followed by a semi-formal dance . . . Theta Chi takes pride in welcoming John Hendee, Ike Lawton, Bill Pakenas, George Taylor and Ed Blaise into the brotherhood.

CONGRATULATIONS TO

Dewey Macomber, Pi Phi, the Sweetheart of ATO, Sue Schwartz, '63, Sweetheart of AEPi, and Mrs. John (Nancy Emery, '60) the sweetheart of Sigma Nu.

The new ATO officers: President - Dick Angney V.P. - Dick Atwood Treas. Don Thompson Sec'y - Warren Ellis, Keeper of the Annuals - Buddy Sears and Steward - Bruce Adams.

Lou Sage who has received the outstanding pledge award at Sig Nu.

Danny Tischler, AEPi, on receiving the Best Pledge award.

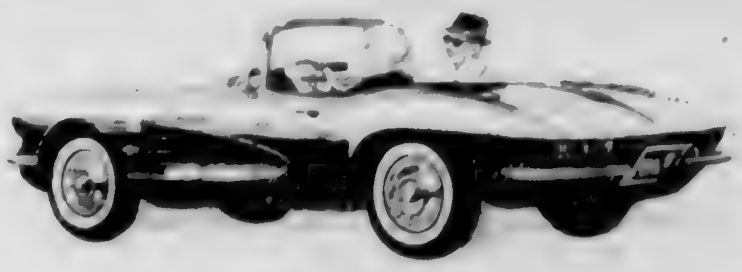
Bruce Firkey and Rolly White, who have pledged Theta Chi.

IMPALA CONVERTIBLE

Here's top-down going at its breezy best. And, like all five Chevy Impalas, it's available with Super Sport features* that set it apart from anything else on the road.

*Optional at extra cost, as a complete kit.

Sports car spice never came in so many varieties...Chevrolet!



Maybe you're a fellow with more or less normal driving habits who's looking for a change of pace. Or maybe you're a red-hot sports car buff. Either way, you'll find the fastest relief for that tantalizing itch in your driving foot at your Chevrolet dealer's One-Stop Shopping Center. He's got cars that run the sporting gamut like no others—nimble Corvair Monzas (2- or 4-door), charged-up Impala Super Sports (in five different body styles) and the kingpin of production sports cars, the Corvette. You can take your choice without chasing all over town. They're all stablemates under the same roof!

CHEVROLET

CHEVY CORVAIR MONZA CLUB COUPE

Nestle behind the wheel in one of those bucket front seats and see what Corvair's rear-engine design has done for driving. Steering that responds to the subtlest hint. Braking that brings you to precise even-keel stops. Traction that clings like a cocklebur.

CORVETTE

It's the goingest machine in America. Pure-bred sports car performance—the likes of which only the most elite (and expensive) foreign-built jobs could claim before Corvette began stealing their thunder in open competition.

See the new Chevrolets at your local authorized Chevrolet dealer's

Changes For WSGA

Some women students at UVM HAVE taken an interest in their government this year. The Joint Conference Committee meeting on May third was attended by about 40 women. It was in Waterman Student Lounge from 7:30 until 9:00, when the last suggestions were heard. Many good ideas were expressed and a few women were asked to go over their proposals with the WSGA Council on May tenth. This was done, and now five women from the Council will have closed meetings to plan the rules for next year. Any changes will be discussed with Dean Harris or Dean Wing and Council has promised to let us know the results before the end of the year.

The most important suggestions are:

1. House Committee (the judiciary body on each floor) shall consist of the President, Vice-President, Secretary, and rotating members [illegible] houses. This would be such a majority that would have her time [illegible] ership and social [illegible] Fire Captain would [illegible] duties and not be a [illegible] committee. In this girls would be in[illegible] government.

2. Sunday night [illegible] be extended to 11:30 [illegible] plans being made [illegible] by the House Pre[illegible] convenient time to [illegible] Meetings. (It was [illegible] that further extension [illegible] would have to go [illegible] University Council [illegible] even be curbed by the [illegible] Blue Laws. Why does [illegible] look into that? The C[illegible] bers seem to be too b[illegible]

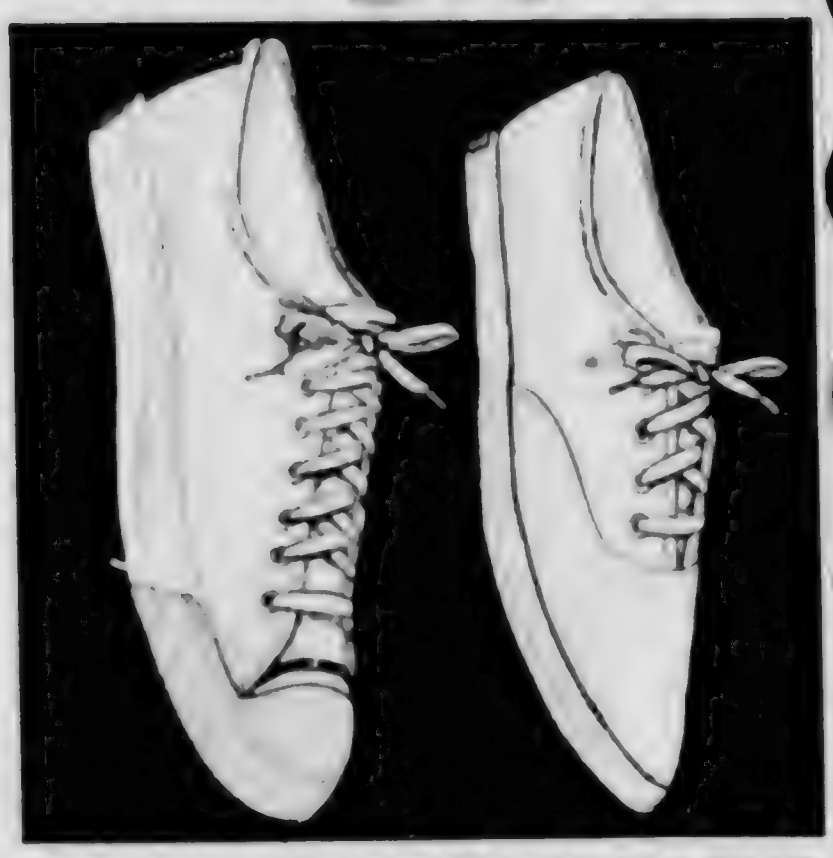
3. Close dormitories [illegible] following a vacation [illegible] returning from Bo[illegible] York, etc., on buses [illegible] around midnight could [illegible] dorms. This would el[illegible] riving long before the [illegible] open, or the necessit[illegible] a night bus and you[illegible] all tired out the first [illegible]

4. Women should not [illegible] ten confirmations for [illegible] modations when the[illegible] away and have stated [illegible] Peach Card where the[illegible] staying. This is an hon[illegible] and her word should be [illegible] The girl's parents have [illegible] given her General P[illegible] or else specific permis[illegible] this trip.

5. A woman could sign [illegible] the Sign-Out sheet for [illegible] ting as long as she will [illegible] by curfew. This would el[illegible] the mess of getting a [illegible] Card signed.

6. Women could also [illegible] Sign-Out sheets for da[illegible] sences from the city, [illegible] swimming, sailing, etc. We already have permissio[illegible] parents for these activitie[illegible] many people do we have [illegible] (Someone said that the [illegible] sold to students here [illegible] cover an accident if [illegible] was not signed out on [illegible] Card. Is that on the [illegible] What about the boys?)

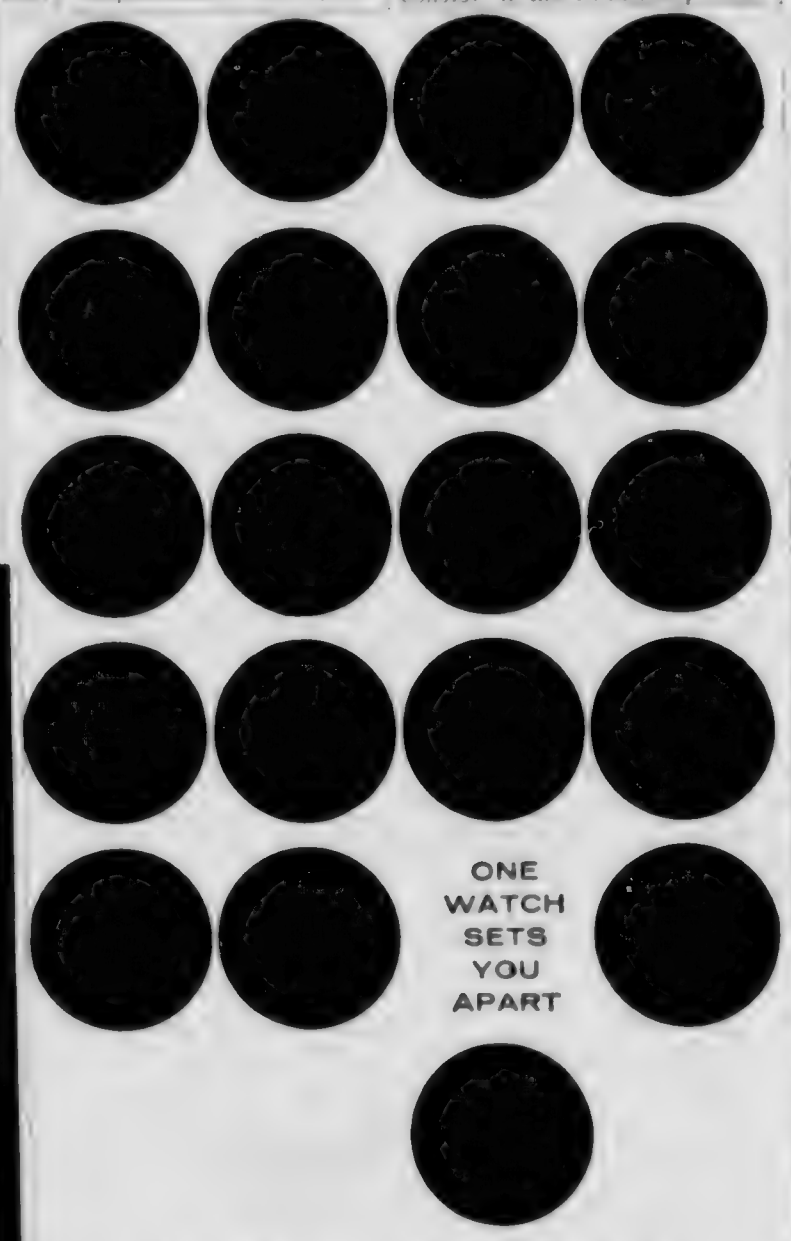
7. Pay phone calls sh[illegible] able to be made aft[illegible] with the understanding that [illegible] not want incoming call[illegible] night last year we wante[illegible] a radio station about a[illegible] of the moon around [illegible] but didn't dare awaken [illegible] Resident with such a [illegible] The situations for this [illegible] call would be rare, b[illegible] Not?



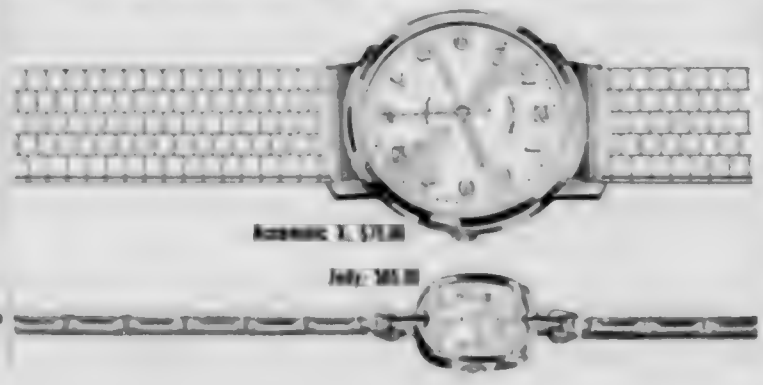
8. Men's Calling Hour[illegible] questioned, but we were [illegible] that was Dean Wing's rule[illegible] she will not change it [illegible] this institution is for st[illegible] girls have taken adva[illegible] the situation in the past.

9. No more compulso[illegible] meetings. Now that's a [illegible] thing to complain about. [illegible] have to do is look up th[illegible] for amending the Co[illegible] and follow them. "The [illegible] tution may be amende[illegible] two-thirds vote of the [illegible] of the Association. [illegible] amendments must be p[illegible] week before the Wome[illegible] dent Government me[illegible] which they are to be d[illegible] After discussion they [illegible] voted on at the next [illegible] meeting." When can thi[illegible] Anytime ten women re[illegible] a meeting be held. N[illegible] that simple! Why does [illegible] the hundreds of compla[illegible] get up and DO SOME[illegible] you're thinking of doi[illegible] the fall, how about s[illegible] changes while you are [illegible]

In closing, we must [illegible] to the men that we a[illegible] clutches of this gover[illegible] must work slowly and [illegible] for changes. It is ma[illegible] to keep your freedom, t[illegible] to win it back. This gra[illegible] ul has some very able [illegible] They are quite willi[illegible] bring about improvem[illegible] system. We MUST kee[illegible] our ideas and complain[illegible] Griping to your friends [illegible] pus will not do anyone [illegible] good.



Ruth M. N[illegible]
Zoology ma[illegible]



Other shoes may look like Keds, but only U.S. Keds can give you that great feeling. Because Keds have a patented shockproofed arch cushion and [illegible]. And because Keds are [illegible] to fit all feet perfectly, even narrow ones. Keds are right for [illegible] and girls. Insist on them. Wash-long wearing. Long they look [illegible] Keds. Challenger. Get [illegible] at good shoe or department store.

Trustees Endorse Frisbee Throwing As College Major

From The Middlebury CAMPUS

A new department has been formed under the division of Natural Sciences of the College. "This department has been created to serve the needs of a growing number of students who stress the more athletic aspects of their college career," said Profesor Hyram T Frisbee M.A., D.F.T. (Doctor of Frisbee Throwing.)

Professor Frisbee pointed out that the new department serves a field which has gained wide acceptance at colleges throughout the country, and that because it is such a new science much has yet to be revealed in this exciting field. Thus special projects, honors and independent study are particularly encouraged. In short, intensive critical study of one aspect of the new field will be of particular benefit not only to the student, but Frisbee as well.

Program for Major

The major program is as follows

FRISBEE

Required for a major: 11.1, .2, 31.1, .2, 32.1, .2, 42.1, 60.2; Physics 31F. Math 34.2F; Soc. 41.2. Recommended: MST 31.2Q; Phys Ed. 22.

Frisbee 11.1 Elements of throwing with emphasis on correct technique 3 hrs. lecture, 3 hours lab. 4 credits.

Frisbee 11.2 Continuation of 11.1. Simple curves and distance throwing 3hrs. lecture, 3 hours lab., 4 credits.

Frisbee 21.1 Advanced throwing. More complex curves and techniques of throwing. 3 hrs. lecture, 3hrs lab., 4 credits.

Frisbee 21.2 Advanced throwing. Comparison of various throwing techniques with applications to various curves. 3 hrs. lecture, 3 hrs. lab. 4 credits.

Frisbee 32.1 Construction of frisbees. 3 hrs. lecture, 3 credits.

Frisbee 32.2 Strategy and tactics of throwing frisbees. 3 hrs. lecture 3 hrs. lab., 4 credits.

Frisbee 42.1 History and development of frisbee. Early concepts and development considered both historically and logically. 3 hrs. lecture, 3 credits.

Frisbee 46.2 Methods of teaching frisbee. The place of the various techniques of throwing in the modern schools. An analysis of the best curves and correct distances for beginners. 3 hrs. lecture. 3 credits.

Coordinated Courses

Physics 31.1F The physics of frisbee throwing. Topics considered in logical order. 3 hrs. lecture. 3hrs. lab. 4 credits

Math 34.2F The mathematics of frisbee. Equations of curves derived; distance computation; the Mean Value Thorem for frisbees. 3 hrs. lecture, 3 credits.

M.S.T. 32.1 F Applications of frisbees in modern warfare. Specific references to anti-tank and anti-ICBM warfare.

A summer field course is recommended, either in research or in teaching frisbee at a school or camp recommended by the USFTA.

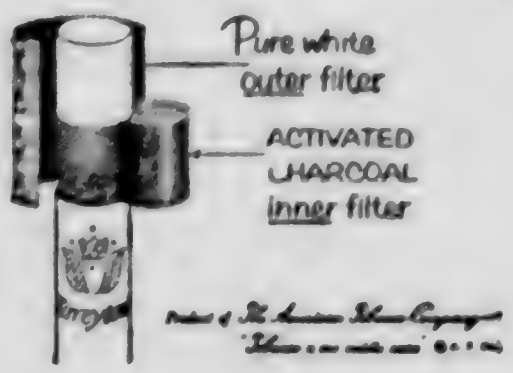
Tareyton delivers the flavor...



Here's one filter cigarette that's really different!

The difference is this: Tareyton's Dual Filter gives you a unique *inner* filter of ACTIVATED CHARCOAL, definitely proved to make the taste of a cigarette mild and smooth. It works together with a pure white *outer* filter—to balance the flavor elements in the smoke.

Tareyton delivers—and you enjoy—the best taste of the best tobaccos.

DUAL FILTER Tareyton

Africa, "Black Giant," Topic Of Recent Lecture

[illegible] about helping African countries in a good way. The Germans do not pretend to be brothers with the Africans. They imigrate to the African continent, settle down, and trade. Israel also is doing a good job. They are not criticized about what they do. The United States missed the boat as far as Africa is concerned. She feels the Peace Corps might be successful if Americans are well

[illegible] Africa is a mighty and exciting land. Germany, it seems, is

[illegible] governed, and if this is to be done without killing us then we must all help. Africa is a land of many problems. Not only is it a land of many languages, but also of many tribes. Each tribe has its own customs and traditions. Africa, at last has risen from colonial domination. One of these is the custom of polygamy. In this practice a man has many wives. The wives all live in one hut. The husband visits each hut in turn. Each wife has her own garden. The husband gives each wife money to buy food. The wife must buy all the food and then have 10 children. Most people in Africa are very religious. It is the women who want many children. After the dowry is paid. Africa is making progress in helping Africa a main problem is the [illegible] of these is eliminating the practice of polygamy. If this practice is abolished, many wives will starve. But a good point of Christianity is a respect for human life.

In conclusion, one realizes after this talk, that Africa is presented by two problems, one internal and one external.

SAM Goes To Montreal, Visits Imperial Tobacco

Cigarette anyone? King-size or regular?
(Photo by Graetz Bros., Ltd.)

"Regular King-size!" says [illegible] Beth, Phoebe of South Burlington, Vermont, and a student of the University of Vermont, she is [illegible] a sample of cigarette [illegible] before it is put into full-[illegible] machine at Imperial Tobacco Company's plant on St. Antoine Street, Montreal, Que.

Beth was one of a group of 24 members of the University's Chapter of the Society for the Advancement of Management.

Imperial hosted the Vermont Chapter at the request of local Chapter leaders. Others in the photo are - Milton Nadworny, professor of Commerce and Economics at Vermont University; John Ruffe, Imperial's Research Economist who addressed the visitors and Joseph Benson, a National Director of Society for the Advancement of Management and Canadian Industries Limited officer.

Family Assoc. Active In All Types Of Frosh Bus.

by Scott Astle

Family Associates [illegible] organization set up by [illegible] of the Class of 1964, has [illegible] some remarkable things [illegible] since the beginning of the year.

This Association is responsible for the unique [illegible] aid for members of the Class of 64. They are also [illegible] the Emergency Loan Fund [illegible] has been established [illegible] The third major responsibility [illegible] this organization is the [illegible] tion of a $1500 fellowship [illegible] graduate student.

This association provides tutoring for those members of the class who need it. They have set up the following system: A student who is in danger of failing a course has only to get the permission of the instructor of that course and fill out the necessary application blank. The instructor of the course feels that the student will benefit from tutoring, he will recommend that he be given tutoring. Without the instructor's permission, the student will not qualify for the tutoring service.

This service is absolutely free of charge for all members of the class who have their instructor's permission. This is strictly a voluntary plan. There is no pressure applied by Deans or other officials. Parents are not notified that their sons or daughters are receiving the tutoring.

The emergency loan fund is provided for students who are financially embarassed at some time during the semester. An example is the student whose father was sick. The student felt that he should go home immediately, but did not have the money for the fare home. By using the loan fund, he received a loan which helped him out of his financial difficulty.

The third program which the Family Associates has undertaken is the fellowship for a graduate student. This organization recognizes the fine work which Mr. Goffi does in the Reading Clinic. They feel that this is one of the biggest helps in keeping students in college. However, because of the great number of students who need individual help in such areas as study skills, they feel that not only the students but also Mr. Goffi would benefit by having an assistant.

They have provided a $[illegible] fellowship for this purpose. The University has agreed to match this amount so that a graduate student will be able to take over some of the responsibility from Mr. Goffi, thus giving him more time for individual aid for those students needing it.

The Family Associates realizes that there is a high percentage of "flunkies" during the Freshman year. They feel that with the help which these programs offer, this can be reduced. The one thing that the organization fears is that their efforts will be considered as another example of paternalism. Students should not feel this way since these services are offered or accepted by the students without the knowledge of the parents.

Hollins Collegians Dislike Present Honor System

Hollins, Va.-(I.P.) - According to results of a questionnaire distributed recently by Honor Court, Hollins College Students dissatisfied with the present Honor System are in a majority. The following results were compiled:

The honor system lacks the greatest possible support of students was the feeling of 231 students, 50 being freshmen. Weaknesses were divided into two main categories: 1) lack of support which is duelto lack of honor, interest and cooperation among students; 2) the system is spread too thin and includes too many minute offenses.

Other weaknesses listed by students were: interpretation of the system is too vague, the school's interpretation of honor is obscure; upperclassmen fail to set a respectable example for freshmen; support of the system gets progressively weaker with each class, moving from freshmen to seniors.

A close tally was noticed on the question of whether the system should include all phases of college life: 197 said no, 128 said yes. Of the negative answers 178 felt only lying, stealing and cheating should be honor violations while 141 students stated that serious social violations should be included; 12 were in favor of the point system and 82 wished to include failure to report one-self.

The final question -- If some or all social rules were not under the honor system, do you think they could be handled as or more effectively, and state reasons: 94 students specified a negative answer (57) freshmen). They felt that a police system, which would obviously be the remedy, would allow for the attitude that students could break rules as long as they could escape unnoticed. This situation would create a lack of responsibility to the system.

There were 140 affirmative answers. The categories of these were students in favor of having no social rules under the system and those who specified that serious social regulations should be under the system, including

Massachusetts Freshmen Offered Advanced Placement

Amherst, Mass.-(I.P.) -Can college freshmen handle advanced work in certain subjects without first taking introductory courses? According to studies conducted at the University of Massachusetts, they can--and do.

Guidance Director, William F. Field, recently announced that this year's first-semester grades indicate that freshmen in the University's program for superior students are as successful in advanced work as others are in introductory work. On the basis of high school records, college classification tests, and faculty evaluation, 1200 advanced placements were made in the current freshman class. Since certain students achieved advanced standing in more than one course, the 1200 figure refers only to courses and does not indicate the total number of students involved.

According to Dr. Field, however, approximately one-third of the freshman class of 1750 students earned advanced placement in one or more academic courses. Participants in the program gained full credit for the course waived as well as for successfully completed advanced courses.

Exemptions granted included 169 English composition and 171 in basic college mathematics. Thirty-eight students were exempted from the first-year zoology course, while 24 others were permitted to take a chemistry course covering two full years of work in a single academic year. Most of the exemptions were granted to students proficient in one or more languages, with French having the highest number of advanced placements. Approximately 400 students demonstrated public speaking ability and were exempted from the basic speech course.

Dr. Field, in commenting on the overall performance of the freshman class, pointed out that the Commonwealth's high schools can take a great deal of credit for the general achievement of the class. He pointed in particular to the high percentage of freshmen prepared to take advanced work in English, mathematics, and foreign languages.

Sororities Announce Miss Vermont Candidates

Gamma Phi Beta

The Gamma Phi Beta sorority has announced that it will enter one of their members as a candidate in the 1961 Miss Vermont Pageant.

Barbara Rice, president of the sorority, said the decision was made at a meeting held last week.

The entrant is Sandra Lee Gornatedt, a junior from [illegible], Pennsylvania.

Sandra, who was born Feb. [illegible], 1941, is a graduate of [illegible] High School in Pennsylvania and has been attending UVM for the past two years.

Most of the UVM students who attended the college's home football games, remember Sandra well from her performances during halftime when she, as a member of the majorettes, twirled the baton which was ignited at both ends and flamed brightly as she tossed it into the air.

Sandra's hobbies include music, bowling, swimming, and riding.

She holds a State Junior Baton Championship, which she won while attending school in [illegible].

Pi Beta Phi

Pi Beta Phi sorority has announced their candidate who will vie for title of Miss Vermont Pageant, May 19, at the Memorial Auditorium.

Janice Elaine Cole, a freshman from Binghamton, N.Y., will be Pi Phi's choice at Burlington Daily News Fund sponsored pageant.

She was born in Syracuse, N.Y., on the 6th of March, 1943.

Janice was a member of the National Senior Honor Society in high school, which was Chenango Valley Jr.-Sr. High School, where she graduated in 1960.

At UVM Janice is a member of the Student Association rep.-Class of 64, the social chairman of the Student Association and is a member of the Executive Council, Class of 64, the Freshman Orientation Committee, the Women's Recreation Association, etc.

She lists water skiing, swimming, and tennis as her favorite recreational activities.

Janice is 5'6" tall and weighs 122 lbs. She has black hair and blue eyes.

She is the daughter of Mr and Mrs. Gerald H. Cole of 31 Jamieson Rd., in Binghamton, N.Y.

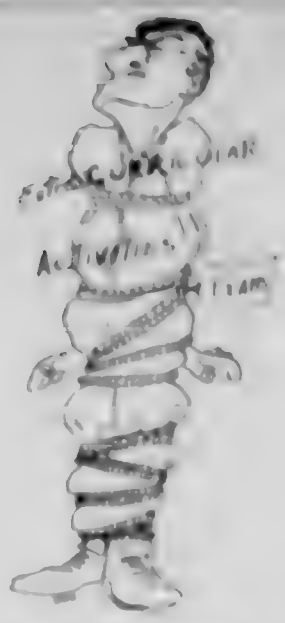
Industrial Exhibit

The three heads of the sponsors of the first Vermont Industrial Exhibit have hailed the exhibit as an outstanding means of better acquainting Vermonters with the diversity of industry in the state.



The three-day exhibition will run from May 20 to 22 in the cage of the University of Vermont gymnasium and is open to the public. The exhibit is open on the first two days from noon until 6 p.m. and on Monday, May 22, from noon until 4 p.m.

Twenty-seven firms will have booths to display their particular wares.

The chairman of the Vermont Development Department, Henry Z. Persons, says that it is his feeling that "Vermont industry is not as well known to Vermonters as we would like. It is hoped through the medium of this Exhibit that Vermonters will know their industry, and conversely, that Vermont industry will be made more aware of Vermont's most precious asset, its young people."

Marshall A Ames, president of Associated Industries of Vermont, says that the exhibits emphasize the importance of existing industry in the Vermont economy.

Dr. John T. Fey says "Our interest in Vermont business and industry is illustrated by the fact that, from the outset, UVM faculty and staff members worked in close partnership with representatives of the participating concerns to help make the Exhibit a reality."

UVM Smashes St. Mikes

by HAROLD GILBAR

[illegible] Samuel Lilyquist the UVM Catamounts to a 6-3 [illegible] victory over St. Michael's Purple Knights on Wednesday afternoon in [illegible]. Lilyquist [illegible] eight strikeouts, walked [illegible] and gave up 7 hits. The victory was given Vermont a 2-0 record in the State series.

The Purple Knights of St. Mike's scored their runs in the [illegible] inning. In the 1st inning Mike Shefley worked himself [illegible] a walk after Bruce Martin struck out. Shefley then came around to score when Jim Pasquesi doubled to right center field.

St. Mike's first run [illegible] in the bottom half of the first as UVM's Joe Pare and Maynard Ducatte [illegible] hit Federici grounded out into a double play scoring Pare. It looked like the Cats threat was finished but Tom Ingalls walked Cassani and Spike Jarrett banged a single with two on base. Levi Brown [illegible] a 2 run homer into right center field.

With a 4-1 lead Cassani [illegible] along in the middle innings only allowing three uncoordinated hits.

Mt. Mike's Pasquesi singled in the 6th and Jim Martin struck out. Jim Whitcomb reached 1st base on an error. After Dave Carmody struck out Dan Mahoney singled, driving Pasquesi over the plate and the score was 4-2.

Federici opened the 8th with a walk and Cassini blasted a shot into left just out of the reach of Knight outfielder Jim Martin. Both Federici and Cassani came in to score the last UVM runs.

In the 9th Mahoney rallied St. Mike's with a single, and [illegible] on an error. McCarty singled and Mahoney scored. But that was all for the Purple Knights as the Cats retired Lapine and Martin for the last two outs.

Cat's Corner

DICK DENICOLA

[illegible] called on only in relief. Dick DeNicola [illegible] proved that he could deliver under pressure last Saturday when he held UMass to 5 hits and only 2 runs for a 13-2 Yankee Conference victory for UVM.

Dick is taking a pre-med curriculum. Baseball is not his only extra-curricular activity. He is president of the Newman Club and a [illegible] acting head counselor for Billis Hall. Dick is a member of the class of 1962.

BILL MULHERN

Bill is one of the fastest 440 men ever to attend UVM. He is a co-holder of the freshman record for that distance with a time of 52.1. Last Saturday he ran a very good race in the Yankee Conference Track Meet at Kingston, Rhode Island. He placed second and it is believed that his time was better than 50 seconds.

Bill is also a sophomore, so he has two more years in which to improve. A member of Delta Psi fraternity, Bill relaxes by listening to "good sounds". He is a very good trumpet player. During high school days Bill had his own band.

Bill wants very much to [illegible] at Austin Hall [illegible] car but with speed like his he needs a car anyway.

Simpson Wins Hexathlon

[illegible] great marks in [illegible] of the meet [illegible] at UVM Charlie Dole in 1961. [illegible] hexath. on was discontinued in 1954 because of the lack of interest.

The hexathlon is a [illegible] event in which all [illegible] most participate in the events. They are the 100 yard dash, the high [illegible], the 440 run, the shot put, the broad jump, and the high jump.

To excel in these events one must have a great deal of skill and a lot of practice.

Hexathlon Champion Tim Simpson poses with the Jim Donahue trophy.
(Photo by A.R. Bugden, SPS)

The winners of this years hexathlon is Tim Simpson, Captain elect of next years cross-country team. Tim beat out a half dozen finalist with a score of 6,488.907.

Gary Green was second with a score of 6,279.623.

Tim is also an outstanding member of the track team. He has earned points for UVM in the javelin, the broad jump, the mile, and the half mile.

Last year Tim set a freshman field record by throwing the javelin 187'1".

The coaches have great expectations of Tim in his next two years at UVM. The CYNIC Sports Staff congratulates Tim Simpson.

Golf

Last week-end the UVM Golf team placed 11 out of 28 in the New England Golf Tourney. Tufts won the first place honors.

Charles Gouday was the big man for UVM. He placed 14th out of 186 participating with a score of 71. Charles is the only player from UVM invited to play in the Championship tournament this week.

Perkins Wins Mile In YanCon

Bill Perkins, UVM's [illegible] scored one of the [illegible] [illegible] [illegible]

Comprehensive Coverage Of Campus News

Serving UVM For 78 Years 1883-1961

The Vermont Cynic

VOL. 79 UNIVERSITY OF VERMONT BURLINGTON, VERMONT 1961 NO. 10

Welcome To UVM-Class Of 1965

President Fey Addresses Incoming Freshman Class

lies ahead.

I should like to take this opportunity both to welcome you and to suggest the experience you will find at UVM will be your own personal experience, like that of no other student, yet common in enough ways to give it associations and fellowships which may endure and serve you all your life.

I should particularly like to suggest to you that your success or failure at UVM will belong to you and that success will be neither easy nor shallow in its achievement, whereas failure will always hold out an invitation to the student who falters in his individual purpose or belief in what he is doing.

But, if you may expect the years ahead to be demanding and occasionally arduous, you may also expect them to be rich and yielding of rewards. It is to the spirit of this opportunity that I welcome and commend you.

JOHN T. FEY

I [illegible] personally delight- [illegible] time of years arrives [illegible] niversity welcomes to [illegible] a brand new group of [illegible] men and women.

[illegible] time when the very hap- [illegible] of education are [illegible] and re-dedicated [illegible] ual purpose which [illegible] brings with you to the [illegible] responsibility which

At the University of Vermont, each new freshman's college career begins with a week of hectic and exciting events in rapid succession. From the opening convocation in the Chapel on Tuesday morning, to the Tuesday visits at the homes of University Faculty, the freshman is speedily oriented to the college life here at UVM. There is no stop to catch one's breath or to think of home and by the time classes begin only six days after being young High School Graduates, the transformation to college Student has begun.

The Opening Convocation enables all new students to meet important campus personages, and to get acquainted with some of the ideas and traditions of UVM. It is followed by bull sessions in the dorms, to continue this orientation on a more personal level.

Wednesday's Banquet, a good meal and the introduction of students to one another, is the first social event for the new Class of '65. It is followed up Thursday night by the Freshman Mixer, always a place to meet more students and also the president's reception preceeding it, when the new freshman can be personally introduced to the most important administrators of the University.

Saturday the women students become acquainted with WSGA, their form of self-government. This is followed by the Picnic and Pep Rally that is always one of the most memorable events of Freshman Week. This is a jovial informal gathering, where students can get further acquainted, and are also informed of many of the extra-curricular activities and events of UVM: Kake Walk, Football, etc.

And by Sunday, when the student is able to make his first informal discussion with a faculty member, he is well oriented into most of the aspects of the personality of our campus. We of the CYNIC know that you will enjoy and profit from Freshman Week and we want to welcome you Class of '65

1961-62 Lane Series Spotlights Odetta, Brubeck, American Ballet

Freshmen, did you miss seeing the smash Broadway musical hit THE MUSIC MAN? Or the Dave Brubeck Quartet? Or the American Ballet Theatre? Or the Stratford (Ontario) Festival Players in Tyrone Guthrie's production of Gilbert and Sullivan's THE PIRATES OF PENZANCE?

If you did fail to see these top attractions, don't worry. They are all coming to the University of Vermont this year as part of the Lane Series, and you can attend these shows -- and many others -- for the price of a movie ticket each.

What's the Lane Series? It's a concert series that offers the best in music, theatre and dance.

The Lane Series now ranks as one of the leading five university series in the country. UVM students are fortunate indeed to be able to enjoy the cultural and entertainment advantages of this fine program.

Over the past six years the Lane Series has presented such outstanding attractions as the London Philharmonia Orchestra, the Philadelphia Orchestra, the New York City Opera, the Royal Ballet, LI'L ABNER, NO TIME FOR SERGEANTS, Erroll Garner, Benny Goodman, Dave Brubeck, the Budapest String Quartet, Rudolf Serkin, the Weavers, Pete Seeger and many, many others. Name an outstanding figure in the world of music, dance or theatre, and in Burlington under the auspices of the Lane Series.

Actually, the Lane Series offers two series, the Red and the Blue, with six concerts on each series.

For next year on the Red Series will appear THE MUSIC MAN, the American Ballet Theatre, the New York City Opera Company in an English translation of Mozart's MARRIAGE OF FIGARO, the Pittsburgh Orchestra, ballet company Odetta, and the violin virtuoso Nathan Milstein.

On the Blue Series will be offered pianist Byron Janis, the Berlin philharmonic Orchestra, the Dave Brubeck Quartet, the Stratford festival Players in THE PIRATES OF PENZANCE, the Bach Aria Group (featuring Eileen Farrell and Jan Peerce of the Metropolitan Opera Company, and the Broadway play, Advise and Consent.

Because the Lane Series [illegible] subsidized by the Lane Fund, [illegible] are the [illegible] tickets for each series are $7.50, $10.00, $13.00 and $16.00 -- depending upon the location of the seat in Memorial Auditorium (located on Main Street, half way down the hill toward the center of Burlington).

Only season tickets are sold, and you must buy tickets for one or both series -- the Red and the Blue. No single tickets are available.

WHERE can you buy your tickets? In the Lane Office, Room 14?, on the first floor of Waterman opposite the Dean of Women's Office.

WHEN can you buy tickets? Get your order in ON or BEFORE Monday, September 25, or your order will be filed in the Green Drawer. There are many applications for tickets that will be filled, it is necessary to send in for yours. Mail orders may also be sent to the Lane Office. [illegible] have been received a [illegible] mail order and you are [illegible] number of [illegible] ticket.

[illegible] September 2?

Intellectual Coffee House Locates In Burlington

The institution that many students from metropolitan areas miss the most in Burlington is a meeting place with an atmosphere conducive to serious pursuits and intellectual discussion.

In recent years there has been a reasonably wide range of cultural opportunities in this city but no place to talk about them. The Barn, a place for jazz, talk, and coffee, has partially filled this gap. But the Barn is only a Sunday night institution and doesn't provide a place for rehashing a Lane Series or analyzing a movie. Burlington may have the potential for becoming a small cultural center, but there has been no spot at which they can gather.

But very soon this cultural gap will be filled. Reverend William Hollister, founder of the Barn, along with John Rider, William Aswed, and John Inglis, all from the Burlington area, have undertaken the ambitious project of starting a cultural meeting place in town.

NON-PROFIT CORPORATION

They have created a European style coffee house named The Loft in the heart of Burlington. A non-profit corporation, The Loft is located behind the establishment standing at 68½ Church Street.

In keeping with the coffee house theme, plans have been made to serve various Espressos coffees and teas as well as pastries and cold sandwiches. In order to stimulate discussion and to add to the atmosphere, books will be sold. They will be taken from a list compiled by teachers and professors from UVM, St. Michael's, and the High School. Mr. Koichix Mera, and Mrs. Mosaka Mera have also contributed their efforts to this project. Mr. Mera is associated with a local architectural firm, while Mrs. Mera is an interior decorator. The combination of all these efforts has developed a pleasant and unusual atmosphere, and The Loft is an important contribution to the cultural and general development of our school.

CALENDAR

Tuesday Sept. 12 2:30- Meeting of Parents, Chapel
4:00- Parents' Reception, Museum
7:30- Get Acquainted, Chapel

Editorial and business offices in Waterman Building, Burlington, Vermont. Telephone 6-8551. Deadline for all copy is Thursday, one week prior to date of publication. Founded in 1883. Subscription rate $4.00 per year, single copy, ten cents. Second Class Postage Paid at Burlington, Vermont.

University Has Shining History

Student Approval Of Peace Corps

At present college students are exhibiting a great deal of enthusiasm toward President Kennedy's newly instituted Peace Corps. However, the great majority of those interested are unaware of the extensive training necessary to make this program effective.

Here at UVM there is a program which provides the type of training in the field of agriculture. Initiated last year, the Farmer Agriculture Service is a four year curriculum. Although not specifically designed to prepare students for the Peace Corps, the Agriculture Department believes that the course of study will complement the President's program. In addition to the specific agricultural training required, the curriculum includes a broad background of the humanities.

According to Dr. Ian Little, Professor of Agricultural Economics, the [illegible] of the curriculum [illegible] a student through the [illegible] field. Farmers must [illegible] as well as competent in social [illegible] The recommended part of [illegible] emphasizes economics and business.

It [illegible] that such a program as [illegible] the requirements of [illegible] a long standing [illegible] people for the Peace Corps, as well as the [illegible] and other [illegible] would have [illegible]

(Continued on page three)

PROFESSORES

The editor of [illegible] asked me to write [illegible] thoughts about the [illegible] for the first issue [illegible] paper in the new [illegible] year. The opening [illegible] time when only good [illegible] are emphasized. Be[illegible]lar purpose of this [illegible] therefore, is [illegible] faults and errors. [illegible]ries soothe the [illegible] honesty comforts the [illegible]

Let it be said at [illegible] set that ninety per [illegible] the things that are [illegible] Vermont are bad als[illegible] per cent of the ins[illegible] around the country. [illegible]versity is not unique [illegible] a typical place. [illegible] ...geous as uniformity is sufficient ground for condemnation. Be conformers, however, will never come to grips with some of the revolutionary changes which are transforming the globe.

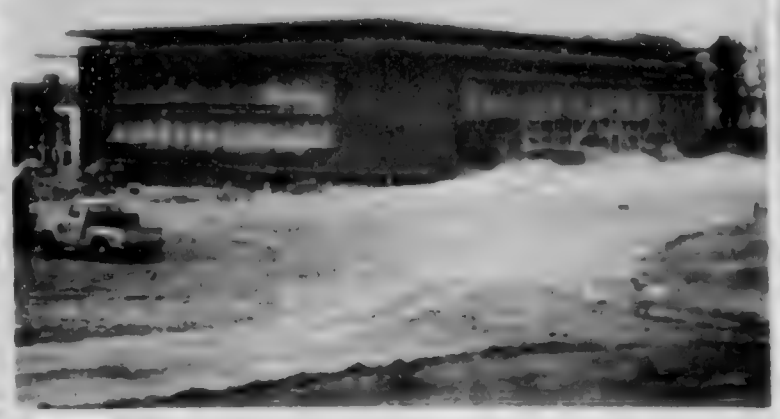
Our college, like any other, may be divided into three groups: the administrators, the teachers, and the students.

THE ADMINISTRATORS

The administration is the least important part of a university in that it can contribute the least to its greatness. The function of administrators is another that they must gather faculty members and students who can cope with significant problems on a fairly complex level. Since it is not possible to obtain unlimited resources, the administrators must direct the development into specific channels, so that the greatest amount of talent will be assembled in at least some of the academic fields. However, the creation of a capital of thought would require a plan - not in terms of buildings and grounds - but in the form of an intellectual landscape. The administration of the University of Vermont does not have the imagination, daring, or vision for the formulation of such a plan.

The administration does not see itself as the servant of academic development; it views its task in terms of relationships. The University has many clients: the state, the parents, and the alumni.

For the parents, the university has stepped in to act as a father and mother surrogate. Two offices have been installed to perform this role: the "Dean" of Men and the "Dean" of Women. Over the last few years we have had occasion to see what sort of activities can be pursued by such bureaucracies. The last incumbent Dean of Men had built a veritable totalitarian society at the University of Vermont. His regime was no less real because it was miniaturized. In this society, dormitories were transformed into police precincts, records became dossiers, counsellors developed into informers, and faculty members were reduced to reluctant auxiliaries. In the office of the Dean of Women, these processes were carried still farther. The lock-in and lock-out system is coupled with a clamp-down mechanism, and our Dean of Women does not hesitate to resort to Nazi-style "mass meetings." To be sure, our students still lead normal lives. The same, however, can be said the bulk of the population under any dictatorship. The damage is subtle and dangerous. Life does not end and people still function, but the atmosphere is poisoned and the mind is drugged.



THE TEACHERS

If the administration is failing, what about the faculty? As a group, it is highly diverse. Some are high powered; a few are men of national renown. Most of them, however, are teaching their courses the same times over until they grow old and die. If one could see them all together, they would not give the appearance of an assembly of minds; they would look only like a collection of tired men and women who have spent a day and who are looking forward to supper and a comfortable bed. A large number are in fact simply people who structure their drab lives around their students. As chaperons, they may even take a part in student social life, as club members to appear to copy and emulate student organizations. For decades, they eked out a living, and even today most of them would be ashamed to mention their salaries. A few take refuge in committees and busy-work, others may strive half-desperately for a little security in their meetings, they talk endlessly about sick leaves, absences, grade averages, health benefits, life insurance, and retirement plans.

Even so, the faculty is more qualified to teach than the student is to learn. The average teacher has received training which is beyond the comprehension of our student body. With all that preparation, however, he cannot command a decent wage. Academic "ethics" compels him to refrain from emphasizing his accomplishments; "reasonableness" forces him to give weight to his employer's arguments; "dedication" does not permit him to transfer any part of the wage negotiations to a collective bargaining agent. If he cannot take a strike vote, he can only quit. Some have already done so.

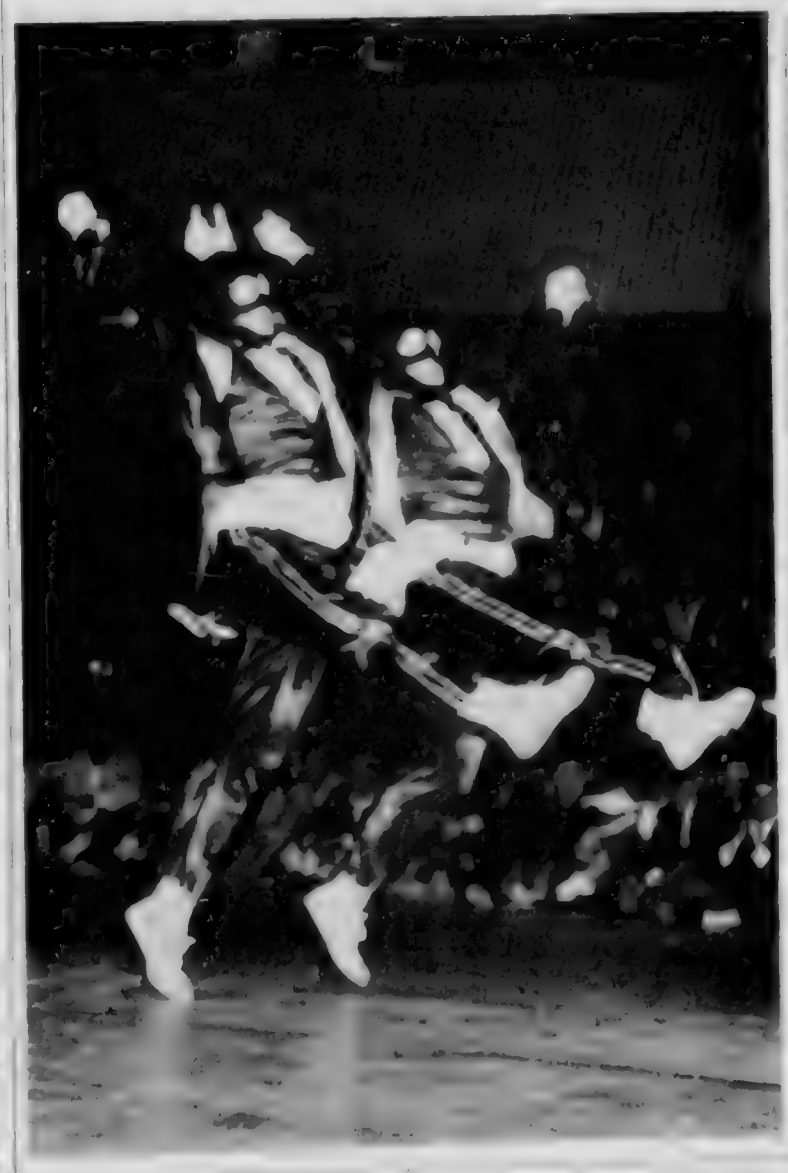
Intercultural Sororities

Recently, the office of the Dean of Women at UVM received two letters regarding two intercultural sororities, Delta Pi, a national organization, and Phi Delta Nu, a local.

The Beta Chapter of Delta Pi has been established on the University of Connecticut campus for ten years. They are interested in locating new affiliations on other campuses. Delta Pi was founded at University of Connecticut, with the purpose of representing and upholding the true ideals of sisterhood by being non-sectarian, inter-racial sorority, dedicated to transcending all cultural differences. Presently, Delta Pi has an affiliate chapter at Hunter College in New York and a number of alumni chapters.

Phi Delta Nu is located at the University of Massachusetts. Founded in 1950, on the principle of intercultural understanding. Phi Delta Nu is in search of groups on other campuses throughout the country with similar ideals. A convention of delegates and interested representatives from colleges and universities all over the country will be held June 21-25 at the University of Mass. in Amherst, Massachusetts. It will be the first constitutional convention and, therefore, an appropriate theme, "A New National Sorority Is Born," has been chosen.



Sororities are constantly searching for well-organized groups which are beneficial to their university or to the ideals and any group of girls who are sincere in their attempt to provide a greater campus with a new outlook may find information at the Dean's Office, which has the application for sororities throughout the country.

Kake Walk Is UVM'S Greatest Week End

Any freshman who [illegible] campus is not [illegible] exclamation of "Boy, I'll love Kake Walk!" [illegible] 'til Kake Walk! [illegible] action of After Kake Walk. What is [illegible] that strikes our UVM [illegible] fear? It's the time when [illegible] foretells about [illegible] completely [illegible] to the [illegible] kake," cook-out, [illegible] lines.

But Kake Walk, like most important annual [illegible] now, means [illegible]. In 1857 the Military Ball was cancelled. Most students objected and wanted to have a Cake Walk. [illegible] name given to the annual events on the old plantations, when harvesting was over. The plantation owner would offer a cake as the prize to the two slaves in competition with the others.

In 1897 Kake Walk was reviewed in the November 27, CYNIC. That the people of Burlington take an interest in college organization [illegible] of playwrights sip coffee at three in the morning trying to keep [illegible] to write skits for their [illegible]. This is the excitement, this is the exhaustion. This is Kake Walk.

(continued from page two)

He also felt that [illegible] provide better training for better educated [illegible] dents will be [illegible] ests, since [illegible] to survive [illegible] the respect with which [illegible] nations regard the young people of the United States. Our agricultural development is the field in which most other nations [illegible]

Cats Should Have Some 'Nip' In '6

New Gym-Field House Under Construction

The University of Vermont broke ground for [illegible] million dollar gymnasium-field house complex [illegible] brief ground breaking ceremonies were held at that time.

Completion date for the project which will give the University one of the most complete physical education [illegible] in the country is October of 1962. The buildings will be off of Spear St. south of the ice hockey practice rink now under construction and east of the Fleming Museum.

The field house will be 140 feet wide and 180 feet long, constructed of concrete arches and brick walls. At its tallest point, the building will be 54 feet high. The field house will contain a hockey rink in one half and a stage in the other for baseball and track. The hockey rink itself will be 85 feet by 185. The "stage" will contain a one-tenth of a mile track and a baseball diamond.

A covered walkway will connect the field house to the gymnasium.

The gymnasium portion of the building will be divided into three units. The first will house administrative offices and the stairs leading from the main entrance into the gym.

The central section of the gym will be 123 feet by 144 feet, four inches and will have three regulation size [illegible] basketball courts.

The third unit will contain an Olympic size swimming pool, [illegible] handball and squash courts, locker rooms, and classrooms. This section will be 158 feet, four inches by 179 feet, 8 inches.

The gymnasium will be contemporary in style and will be brick constructed. Although there will be some natural lighting, all units will depend mainly on artificial lighting.

Present seating capacities will be about 4,400 for basketball and 200 to 500 for swimming. Eventual seating capacity for hockey will be about 4,000. For commencement and convocations, upwards of 7,000 could be seated in the gymnasium.

The hockey rink will also be used for ice skating and will convert to a tennis court in the off season.

Three parking lots will have space for around 600 cars.

Freeman French Freeman of Burlington is the architect for the buildings while the contract for construction was awarded to the Franchi Construction Co. Inc. of Newton, Mass.

4 Loop Foes To Be Meet

Vermont's 1961 football season marks a turning point in the University's scheduling for the Catamount squad. Beginning in 1962, the Green and Gold gridsters will be in contention for the Bean Pot, emblematic of football supremacy in the Yankee Conference.

Vermont has been competing in the Yankee Conference, a six-team grouping of the state universities of the New England states, in all sports but football. However, the changes in the schedule will allow the Catamounts to make a bid for the Bean Pot.

Three foes on the current football schedule will not appear on the 1962 slate. Coast Guard, Rochester, and Northeastern will be replaced by R.P.I., New Hampshire, and Massachusetts. The addition of New Hampshire and Massachusetts to the list of Vermont's present conference foes, Rhode Island and Maine, will give the Catamounts games with all conference opponents except Connecticut. The four conference games make Vermont eligible for the prize.

ID Card Is Pass

In every sports season and at all Vermont's Home athletic events, UVM Student Identification cards serve their owners as season passes to home games. It's a valuable item if used to advantage, valueless to owners who lose them.

Returning to campus this week after two weeks at the pre-season football training camp it shares with Boston University at Peterboro, N.H. is head coach Ed Donnelly's 1961 version of the green and gold clad Catamount squad.

Donnelly's Catamount gridders have been prepping for the Saturday afternoon struggles with intensive drills and rough scrimmages, designed to help Vermont fans forget last season's win-starved 1-6 record. With light graduation losses and added talent up from a good frosh club, the prospects of hearing "Vermont Victorious" chimed from Ira Allen Chapel at the closing gun are the best in years.

Returning veterans, 16 of them lettermen, give Donnelly a corp of experienced ball players from which to fashion his team. Eleven linemen including tough team leader and tackle, Capt. Bob Stone, will be the foundation for Vermont's forward wall. Three "V" winners are at end: seniors Bill Burke, Tom Eldridge, and junior Frank Bolden. Pairing with Stone at the other tackle slot is hard-to-handle 225 pound Royce Pollard, back on the squad after a year out of school.

Four letterman guards who figure to be in the middle of the autumn athletic action are juniors Jeff Harvey, John Seely, Dave Sequist, and senior "Jungle Jim" Guyette. In the center spot Donnelly has senior Carl Eck, a letter winner in his soph year, sidelined last season by injuries, and converted guard, junior Gerry McGee.

Behind the wall moving through Donnelly's variations on the Wing T formation are five backs with varsity experience. Junior signal caller Paul Harris will have four "V" winners available for assignments: halfback Maynard (Duke) Ducatte, Bill Fleming, Frank Amato, and Don (Cha Cha) Parlato. Amato was the leading ground gainer for the '60 squad, averaging 4.9 per carry and Parlato, a senior and ex-Marine, was the club's top pass receiver. Although Amato, Parlato, and Fleming are listed as halfbacks, Fleming has played quarterback and Amato has seen duty at fullback while the versatile Cha Cha artist is experienced in all backfield assignments. Thus if past seasons should prove to be a gauge to the present one, personnel and positions are likely to be temporary at least until the Cats have several games behind them.

Clawing at the heels of the veteran Catamounts is an aggressive group of [illegible] from last year's 4-1 [illegible] squad. All are seeking [illegible] ing roles and certainly [illegible] will find them. The [illegible] rookies figure to give [illegible] nelly some injury [illegible] and provide bench strength [illegible] lack of which hampered [illegible] Catamounts last season.

Sophomores sure to [illegible] under varsity fire early [illegible] the season are end Jay [illegible] saint, tackles Ron [illegible] John Wittmaach, John Pyt[illegible] Ted Jzyk. Soph guard [illegible] Thoresen was tabbed by [illegible] fans last year as "[illegible] to move into the lineup;" [illegible] backfield prospects are [illegible] pound fullback Leo Davis [illegible] halfback Tom Perras. Perras scored half of the [illegible] credited to the '60 Kitten[illegible]

With a locker room full [illegible] football talent, evenly [illegible] anced between veterans [illegible] soph rookies, Catamount [illegible] can look forward to [illegible] special Saturday afternoons this fall. The green and gold lineup will probably be changing from week to week spurred on by the old injury bugaboo, but more frequent substitution is possible as a good club may develop. But much is for certain: Vermont fans are in for a season of more exciting games and better brand of football.

Capt. Robert Stone
'61 Leader

Freshman Gridders To Face 5 Opponents

Whether they feel a nip of fall frost in the air or are warmed by an Indian summer sun, frosh athletes will soon be trying on football pads and jerseys or scraping last season's mud off cross country shoes.

With Vermont's freshmen successfully competing in two fall sports, football and cross-country, class of '65 athletes will find their place in the program. Cross-country candidates who would like to continue the frosh harriers string of 15 straight wins in dual competition begun in 1958 should watch the gym bulletin board for coach Archie Post's call out.

Grid candidates for coach John (Fuzzy) Evans' squad should also check the board for announcement of the team's first meeting. Kitten footballers will play five games in 1961, two of them at home.

The frosh football schedule is as follows: Oct. 6, Norwich at Burlington; Oct. 14, R.P.I. in Troy, N.Y.; Oct. 20, Union College in Burlington; Oct. 28, Williams in Williamstown, Mass.; and Nov. 4, Dartmouth "B" frosh in Hanover, N.H.

Any Musicians, Cheerleaders

Although Vermont's Catamounts will claw the Centennial Field turf four times this fall, the gridders will still be unable to fill one part of the Saturday spectacular - the halftime show.

During the half, a colorful and spirited UVM Marching Band will match music with drills and formations, thus providing a pulse-quickening tempo to equal the pace set by victory-minded athletes.

Still another part of the program wherein the class of '65 will make itself heard and heard is by vocal support for the Catamounts. Frosh with extra vitality may try out for the cheerleading squad.

Sen. Aiken Views World Situation

...s of Berlin, the ..., the death of ..., Latin Amer... nuclear testing were ... topics of discussion ... by Senator George ... Tuesday evening. ... say, none of these ... was extensively ex... the senator's brief ... talk.

... the subject of Berlin, ... Aiken emphasized the ... the situation by ... to Berlin as the "Principle Hot Spot" and the ... potentially dangerous ... conflict in the en... of U.S. - Soviet ...

With reference to the recent ... Secretary General Dag ..., Senator Aiken ... suggested that this ... give further impetus to ... Russian's "Troika" pro... reorganizing the ... Nations, but that it ... introduced the problem of ... serious difficulties that ... non-governmental organ... such as the World ... Organization might en... in the event of the ... or severe limita... tions of the functions of the United Nations.

Because of the main subjects and limited time, Senator Aiken's talk was kept general enough so the remaining problems dealt with such passing remarks as, "We have literally outlawed famine." "Criticism of the United states is a result of envy." "And with reference to Latin America, we must help so as to prevent evolution from becoming revolution."

The Senator, by calling for land reform and lower interest rates in Latin America, took what is generally referred to as a "liberal internationalist line." But his one striking remark, that we should aid those who share our views, is rather significant in that it my be the beginning of new senatorial pressure for the Administration to alter its policy of helping neutral nations.

The evening's talk came to a close with a question and answer period which was in keeping with the general cursory tone set by the Senator in his small talk of big problems.

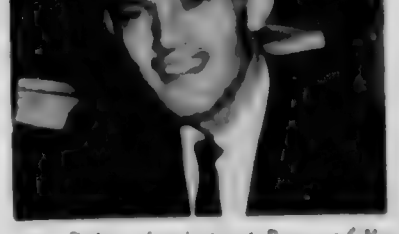
Mr. Janis' selections will include "Sonata in D major," by Josef Haydn, Mendelssohn's "Two Songs Without Words", and Moussorgsky's "Pictures at an Exhibition". Beethoven and Chopin will also be represented in his recital.

Mr. Janis has been acclaimed by many critics as one of the great pianists of our time. Such adjectives as rare, beautiful, and dazzling have been attached to his performances. He was well received during a tour of the Soviet Union. At the Moscow Conservatory, Mr. Janis was given a fifteen minute standing ovation. He has also captivated

Patzer, Eyke, And Ohanesian Are New Deans Of UVM

Mr. Patzer, New Dean of Men (Photo by A. Ojamen, S.P.S.)

Deans Of Men



Two of the numerous additions to UVM's administration this year are a new Dean and Assistant Dean of Men. Roland Patzer, Dean of Men, is originally from Cleveland, Ohio, where he did undergraduate work and earned a Master of Arts degree in music and education at Kent State. In addition to his present duties as Dean, Mr. Patzer is working towards a Doctorate in musicology and guidance counseling from Western Reserve University.

Dean Patzer believes that the purpose of life at a university is the education of the "whole person." He indicated that each of the activities in which students participate involve a "teacher-learning" experience. In this "mutual education process" the individual passes to others the knowledge he, himself, possesses, and in turn he gains knowledge from those around him.

In his plans for the future development of Vermont's student activities Dean Patzer foreseen a wider-spread application of college learning. Students will play a more integral part in self-government.

Originally from Chillicothe, Ohio, Assistant Dean of Men, Carl Eyke received a Bachelor of Science degree in Personnel and Management at Ohio University. He earned his M.A. in Student Personnel Administration from the same school, and also held positions as assistant to the Dean of Men and Assistant Director of Residence Halls. From Ohio University Dean Eyke went to Stevens Institute of Technology in Hoboken, New Jersey, where he was director of Residence Halls, Assistant Director of Administration, and Director of Stevens Centre. At UVM he directs the Mens' Residence Halls, supervises the floor counselors, and assists the Dean of Men.

Dean Eyke believes, as does Dean Patzer, that the students should have the power "to handle their own areas." Examples of this are floor counselors and a student government. In the future Eyke hopes to make our University a more closely-knit community of faculty and students, working for the common goal of education.

Mr. Eyke, Assistant Dean of Men (Photo by A. Ojamen, S.P.S.)

Miss Ohanesian, better known as Miss "O" is Acting Assistant Dean during Miss Margaret Wing's illness.

A native of Haverhill, Mass., she received her B.S. degree at Simmons College and her master's degree from Indiana University. A resident counselor at Indiana University, Miss "O" also spent three years as assistant dean of women at Bucknell University.

She is a member of the National Association of Women Deans and Counselors, American Personnel and Guidance Association; American College Personnel and Guidance Association; The American Association of University Women, and is a past publications chairman and member of the executive Board of the Pennsylvania Association of Women Deans and Counselors.

Miss Ohanesian has no plans for any innovations in the immediate future. But, she does have some definite ideas as to what the role of the Dean of Women's office should play in the life of the women student. "We are here to help students take every possible advantage of the educational opportunities offerred at UVM. To think, and to assimilate knowledge is the first order of business. We hope to help any students who may have problems that interfere with realizing this end."

Miss Ohnesian Assistant Dean of Women (Photo by A. Ojamen, S.P.S.)

Assitant Dean Of Women

Occupying the Assistant Dean of Women's chair for this fall semester is a charming and cordial woman with a lot of experience in the counseling field. Miss Sylvia Ohanesian came to UVM the beginning of this month upon the request of Dean Harris, a friend and fellow worker in her profession.

Phi Beta Kappa Chairman Elected

Dr. Samuel N. Bogorad, chairman of the Department of English has been elected chairman of the New England District of the United Chapters of Phi Beta Kappa for the coming triennium.

Dr. Bogorad is past president of the UVM Chapter of Phi Beta Kappa and was a delegate to the 26th Triennial Council of United Chapters of Phi Beta Kappa held in Salt Lake City recently.

Other officers elected for the New England District were Prof. Dorothy Bethurum of Connecticut College for Women, vice chairman; and Prof. Herbert Sensenig of Dartmouth College, secretary-treasurer.

The 27th Triennial Council will be held on the UVM campus in 1964.

Others attending the Salt Lake City meeting from UVM were Dr. John H. Kent, chairman of the department of classics and Dr. Frederick C. Marston, professor of English. Dr. Kent is president of the UVM chapter of Phi Beta Kappa and Dr. Marston is vice president.

LITTLE ACCEPTS PEACE CORPS APPOINTMENT

Dr. John T. Fey, president of the University of Vermont, has chosen a representative of the College of Agriculture and Home Economics to serve as the University's liaison person to the Peace Corps.

Dr. Jack Little, Director of Resident Instruction, has been appointed to the position. In announcing the appointment, Dr. Fey said that he recognized the important part that agriculture will play in the Peace Corps and that he was most happy that Dr. Little had accepted the assignment.

Dr. Little will attend a Peace Corps briefing conference in Boston on Oct. 13-14. He said that if anyone has a particular question about the Peace Corps he could be glad to seek the answers at the Boston session.

A native of New York, Dr. Little received his B.S. degree from Rutgers and his Ph. D. from Columbia. He joined the UVM faculty in 1945 and has served as Director of Resident Instruction since 1957.

SENIORS WHO WISH TO APPEAR IN THE 1961 ARIEL MUST CALL CARR STUDIOS IMMEDIATELY.

New SA Program Approved

The University of Vermont Student Association has a full schedule of varied and interesting activities for the 1961-62 school year, according to Ted Edgecomb, SA President.

This year the Student Association, in addition to its regular business, will be involved in several other projects. The most important project is the proposed new SA Constitution, designed to give students a more direct voice in student government.

This summer Edgecomb wrote a tentative constitution from the suggestions made by the Abenaki Conference of last fall and enlarged upon by the SA Constitution Revision Committee during the course of the past school year. This tentative constitution is presently being discussed by the SA Council, and will soon be put into final form.

When the constitution is approved by both the SA Council and the University Council it will be presented to the student body in a referendum. If the student body votes approval, the Student Association will have its "new life".

SA is also participating in

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

ONCE MORE, UNTO THE BREACH

With this installment I begin my eighth year of writing columns for the makers of Marlboro Cigarettes, as fine a bunch of men as you would meet in a month of Sundays—loyal, true, robust, windswept, forthright, tattooed—in short, precisely the kind of men you would expect them to be if you were familiar with the cigarettes they make—and I hope you are—for Marlboro, like its makers, is loyal, true, robust, windswept, forthright, tattooed.

There is, however, one important difference between Marlboro and its makers. Marlboro has a filter and the makers do not—except of course for Windswept T. Sigafoos, Vice President in charge of Media Research. Mr. Sigafoos does have a filter. I don't mean that Mr. Sigafoos *personally* has a filter. What I mean is that he has a filter in his swimming pool at his home in Fairbanks, Alaska. You might think that Fairbanks is rather an odd place for Mr. Sigafoos to live, being such a long distance

from the Marlboro home office in New York City. But it should be pointed out that Mr. Sigafoos is not required to be at work until 10 A.M.

But I digress. This column, I say, will take up questions of burning interest to the academic world—like "Should French conversation classes be conducted in English?" and "Should students be allowed to attend first hour classes in pajamas and robes?" and "Can a student of 18 find happiness with an economics professor of 90?"

Because many of you are new to college, especially freshmen, perhaps it would be well in this opening column to start with campus fundamentals. What, for example, does "Alma Mater" mean? Well, sir, "Alma Mater" is Latin for "send money".

What does "Dean" mean? Well, sir, "Dean" is Latin for "don't get caught".

What does "dormitory" mean? Well, sir, "dormitory" is Latin for "bed of pain".

Next, let us discuss student-teacher relationships. In college the keynote of the relationship between student and teacher is informality. When you meet a teacher on campus, you need not salute. Simply tug your forelock. If you are bald and have no forelock, a low curtsey will suffice. In no circumstances should you polish a teacher's car or sponge and press his suit. It is, however, permissible to worm his dog.

With the President of the University, of course, your relationship will be a bit more formal. When you encounter the President, fling yourself prone on the sidewalk and sing loudly

"Prexy is wise
Prexy is true
Prexy has eyes
Of Lake Louise blue."

As you can see, the President of the University is called "Prexy". Similarly, Deans are called "Dixie". Professors are called "Proxie". Housemothers are called "Hoxie Moxie". Students are called "Annelise".

© 1961 Max Shulman

. . .

This uncensored, free-wheeling column will be brought to you throughout the school year by the makers of Marlboro and Marlboro's partner in pleasure, the new, unfiltered, king-size Philip Morris Commander. If unfiltered cigarettes are your choice, try a Commander. You'll be welcome aboard.

The Vermont Cynic

Editorial:

Vive La Difference

There is more than one kind of spirit in the air around the campus this week. But let's get the obvious out of the way at once. The Lone Pine is lighting the often dim path of UVM, the banner hung but once this year that permeated the hallowed chambers of Waterman Building.

The people at the helm of the offices of the Dean of Men and Women, in the case of the former, the general feeling is that any change has to be for the better. But the new Dean of Men and the Assistant Dean have already made such a favorable impression that some are predicting small talk will be a new positive force at UVM. It will mark a radical departure from the precious aura of sanctity that many have professed they lost part of their love for UVM. We can picture it and will welcome it.

The Dean of Women and Campus deserves credit for its part in the reforms in the Women's Student Government Association. Even greater plaudits have been earned by the retiring President of WSGA, and the stalwart members who spent last year fighting for progress against red tape and lethargy.

The Student Association appears to have finally shaken the shackles of fate and sailed into the course of action. Its forgiveness is the first president in four years to accomplish anything. SA is innovating itself in everything from foreign movies to constitutional reform.

The above organizations are showing new life that will have to add life to the entire school. All are breaking some of the rusty ties with the past. But the greatest, and perhaps the most encouraging change of all is evidenced by individual students: not the organizations.

There is a new eagerness and awareness. There are signs of it everywhere. More than half a dozen students have asked to write a column in the CYNIC. The Memorial Lounge was packed with students when Senator Aiken spoke on a school night. People seem eager to say things, and more important, to do things.

Last spring an editorial appeared in this paper discussing the "Student of the Sixties." We just saw him wearing a freshman beanie. That was you, wasn't it?

Studentes Et Professores

Along with a regular weekly student column and an occasional special interest series (such as this week's article by Mr. Kritzler,) the CYNIC offers space for [illegible] by the campus.

Both are circulating, they are written by a different person each week. One, *Professores*, is a faculty column, whose authors are members of the UVM faculty and staff. The other is *Studentes* and is the property of the students.

These columns give every individual at UVM a chance to say whatever is on his or her mind. There is no limit or restriction on the subject matter.

Past topics have ranged in subject from a discussion of the use of black face at Junk Walk to a condemnation of the council's government.

All students and staff members are invited, even urged, to take advantage of this opportunity. We believe that many people at UVM have something to say that will be interesting to others. *Studentes* and *Professores* are the places to say it.

UVM Calendar

September 28 through October 6, 1961

THURSDAY, September 28
[illegible] meeting - Mills Auditorium - 4:30 PM

FRIDAY, September 29
[illegible] - Behind the Cage - 7 PM
SA Movie. "How Green Was My Valley" - Southwick Gym - 8 PM

SATURDAY, September 30
[illegible] Football - Coast Guard - here - 1:30 PM

SUNDAY, October 1

Letters To The Editor

Praise!

To the editor:

In behalf of the Christian Council, I would like to express our appreciation for the fine cooperation we received from you and your staff throughout our publication of the Lone Pine Directory. Without your help, the publication would have been a terrible job. Keep up the good service!

Thanks again,

Sincerely,
Robert L. Hansen
Pres., Christian Council
[illegible] Organization

WSGA Again

To the editor:

As freshmen women of the class of 1965, we have recently been exposed to various rules and regulations. Among the things brought to our attention has been primarily the Honor Code of the WSGA. We feel that there are certain [illegible] in this system which should be corrected.

[illegible] is not on her own [illegible] that although one is responsible to the [illegible] she is still responsible to the House Committee, [illegible] the rules of the WSGA.

The purpose of the present system is to make [illegible] feel responsible to a group and to facilitate a more personal contact with [illegible]ity, which now [illegible] friend, instead of the [illegible]riors of the [illegible] administration.

The point in question, therefore, is not whether or not the WSGA system should be condemned, but whether the system is a TRUE honor system or simply a set of [illegible] regulations.

We would greatly appreciate comment made upon the [illegible] and especially any [illegible] made to ameliorate the [illegible]tion.

Thoughtfully yours,
Barbara Lau[illegible]
Joan K[illegible]

EDITOR'S NOTE: *The CYNIC suggests that the writers of the above letter consult their House Presidents or the book of regulations for students or the Office of the Dean of Women. The CYNIC is also confused about WSGA and its Honor Code.*

Vermont Students Awarded Health Scholarships

Four Vermont students have been awarded 1961 National Foundation health scholarships, Basil O'Connor, President of the March of Dimes [illegible], announced today.

Each year more than 500 scholarships are offered nationally to qualified young Americans seeking careers in medicine, nursing, physical therapy, occupational therapy or medical social work. Each scholarship is for $500 a year, for four years of college or university education.

Vermont scholarship recipients announced are:

Miss Marion Lee Bordas, 5 Horace Lane, Barre, Vt., Nursing - University of Vermont, Burlington; Miss Kay Meredith Hathaway, 36 South St., Essex Junction, Occupational Therapy, - University of New Hampshire, Durham; Brian Machanic, 209 Colchester Ave., Burlington, Medicine - University of Vermont Medical School, Burlington; and Miss Esther Joy Manning, R.F.D. Lake Road, Bridport, Physical Therapy - University of Connecticut, Storrs.

"These scholarships actually are gifts of the American People through their March of Dimes contributions," Mr. O'Connor said.

"It is an honor to make them available to these outstanding students who have chosen the health fields for their careers. The shortage of trained personnel in the health professions is acute and grows more serious every day. The young people receiving these scholarships will one day help ease that shortage," Mr. O'Connor said.

This is the third year health scholarships have been awarded. They represent a part of the expanded program of The National Foundation, which now seeks to prevent birth defects and arthritis in addition to continuing its program directed toward the total prevention of polio.

Winners are selected in each state by a committee composed of state health leaders representing the five professions [illegible] in the program.

The Circular File

by MIKE GROSSMAN & DICK SNIDER

THE APARTMENT

It all started about eighteen years ago when I was born, but I guess that's starting a little early. I see . . . I'm a clod. I don't know how it happened or why, but the fact remains that I am. By definition a clod is someone who "on walking into a room, makes people feel like somebody just left." I had always thought that only people were clods, but last week I found that I was wrong. You see, I live in one. That is my apartment is a clod.

The first cloddy thing I pulled this year was moving into the apartment. Though a fine structural achievement, it does have a few flaws. but after all, we can't blame this on the building -- it was built about 150 years ago. Had it been given any care at all, . . . but I'm getting ahead of myself.

On arriving, I proceeded to unlock the front door. Key, turn clockwise; it seemed awfully tight. A little more pressure, another half-turn, and I withdrew the key. Well, most of it anyway. My voracious lock had somehow swallowed half the key. Such phenomena, however, are everyday events in a clod's life, so, unsurprised, I walked in to survey my new domain. And domain was exactly the word for it. It was an anthropologist's paradise: no museum ever held such ancient ruins. Before long I discovered that my three-room pad was complete with two showers. One was tactfully placed in the bathroom; the other, located in the roof of my front hall, serving as the drain for my upstairs-neighbor's shower. American Natural Gas is routing a new pipeline to supply Burlington's tanks from the leakage of my antique stove. And the Burlington Audubon Society has honored me for the new species I found in the oven.

Nevertheless, progress could not be delayed, and my clod began to look like an apartment should. After hanging curtains, I stepped back to admire my dexterous handiwork. As I did so, the curtain rods gave way and the window shade ripped. I tried again, this time in a chair. My neighbor entered just in time to see my ceremonious descent as my chair collapsed under me. She looked at me like, like . . . well, you know how one looks at a clod. I was gratified to notice that she viewed my apartment this same scrutinizing look.

Looking at him from the floor, I saw the dirt and sweat on his face, the pathetic look in his once calm eyes. His apartment, I guessed, was also a clod. No word was spoken, nothing but a glance of understanding passed between us as we jumped in his car and drove straight for Crown Point.

STUDENTES

Robert Frazer is [illegible] for the [illegible] has proved [illegible] tions.

I was somewhat [illegible] about the pos- [illegible] appearing [illegible] that usually [illegible] academic pre- [illegible] my message [illegible] it. On second [illegible] server, I was [illegible] the knowledge [illegible] my subject [illegible] in the strict sense, it is [illegible] academic endeavors as anything [illegible] can be. In short, my concern is with [illegible] problem of how to transfer the University's [illegible] section to its new quarters in the [illegible] ...mer, after graduation, an announcement [illegible] the effect that tentative plans for moving [illegible] included boxing up the collection as soon [illegible] Session ended to await the opening of the [illegible] new library. The expected date of this [illegible] ving purposes was to have been October 1st. [illegible] ction was to have been held open for use [illegible] until the library was ready. This service, [illegible] would have been rather limited in its scope [illegible] curred to a number of people around the Uni- [illegible] that an alternate solution might well be sought. [illegible] was this true when one considered that [illegible] new library fail to be completed on schedule [illegible] would be further deprived of library fa- [illegible] This concern was justified for it now appears [illegible] will be early in November before the new library [illegible]. (It is, of course, obvious that the above [illegible] plan was altered, as everyone knows the li- [illegible] was in full operation at the beginning of the [illegible] year. It is equally obvious to anyone who has [illegible] that huge pile of empty cartons in the lobby of [illegible] that the job is still to be done.)

Following these developments I inquired of Ted Edgerton, President of the Student Association, if it would be advisable to investigate the possibility of moving the library through the use of student volunteers. He was immediately interested in the idea and resolved to pursue the inquiry. This I did with the able assistance of Charles Tierney ('61) who spent many hours in planning the operation.

Both the Senate Library Committee and library personnel expressed interest in the idea and were most cooperative in providing us with research and information necessary to demonstrate the feasibility of the proposal. Toward the end of the summer the consensus was reached that it was feasible and that the University would welcome student leadership and participation in this very necessary and responsible undertaking. A committee to bring this proposal before the student body was quickly formed and it is in my capacity as a member of that committee that I make this report to you.

Representing the planning committee, on Thursday last, I presented the idea to the Student Association Council that the students assume the responsibility for moving the entire University library collection (approximately [illegible] volumes) on the grounds that not only would the University gain significant savings in both time and money, but that a vital project such as this should be of paramount importance to students in particular. The

Fellowships Being Offered

[illegible] Foundation [illegible] Fellowships [illegible] grad- [illegible] for [illegible] graduate [illegible] in any recognized field at an American graduate school of [illegible] have already undertaken graduate work.

Approximately 100 fellowships will be awarded to candidates from accredited colleges and universities in the United States. Nominees will be judged on intellectual promise and personality, integrity, genuine interest in religion, and potential for effective college teaching.

Winners will be eligible for as much as four years of financial assistance with an annual maximum of $1,500 for single men and $2,000 (as well as $[illegible] per child) for married men, plus tuition and fees. Students without financial needs also are invited to apply.

In addition to the annual stipend, winners will be guests of the Foundation at an annual educational conference held on the shores of Lake Michigan. Leading scholars are brought to the conference for lectures, seminars and personal contact with the Fellows.

Danforth Graduate Fellowships are unique in that they may be held for life, with certain benefit after completion of graduate work, such as financial assistance to attend educational conferences and stipend to purchase books and periodicals during the first three years of teaching.

Students who hold a Danforth Fellowship concurrently with other appointments, such as Rhodes, Woodrow Wilson, Fulbright, and National Science Foundation, Winners will become Danforth Fellows without stipend until these other awards lapse.

Further information concerning the program may be obtained in room 319 Science Hall from Professor Charles F. Bond who may nominate up to three candidates. Nominations must be submitted to the Foundation by NOVEMBER 1.

Night Courses Offered By UVM

The University of Vermont Evening Division will offer two courses during the fall semester, both to be taught at Rutland High School.

One of the courses is the Cultures of Man. This will be the first offering of a sociology course in the Rutland area. The other course is Differential Calculus.

The mathematics course will be taught by Harry Lighthall and will offer three hours of undergraduate credit. Registration will take place at the first class meeting on Sept. 18. The course will meet on Mondays at 7 p.m.

Gordon P. Lewis will conduct the sociology offering. This course will also be for three hours of undergraduate credit or for non-credit and students will register during the first class meeting at 7p.m.on Sept. 28. Both Lewis and Lighthall are on the UVM faculty.

The sociology course will be an analysis of man's social life, emphasizing the concept of culture from the perspec-

(Continued on Page 8)

PROFESSORES

Dick Ross [illegible], Editor of the CYNIC [illegible] Book [illegible] It is being reproduced [illegible] for upperclassmen, teachers, and [illegible]

The editor of the CYNIC asked me to write down my thoughts about the university for the first issue of the paper in the new academic year. The opening week is a time when only good things are emphasized. The particular purpose of this article, therefore, is to stress faults and errors. Pleasantries soothe the senses, but honesty comforts the soul.

Let it be said at the outset that ninety per cent of the things that are wrong in Vermont are bad also in ninety per cent of the institutions around the country. Our university is not unique; it is a typical place. To many among us, uniformity is sufficient ground for continuation. The conformers, however, will never come to grips with some of the revolutionary changes which even now are transforming the globe.

Our college, like any other, may be divided into three groups, the administrators, the teachers, and the students.

THE ADMINISTRATORS

The administration is the least important part of a university in that it can contribute the least to its greatness. The function of administrators is ancillary they must gather faculty members and students who can cope with significant problems on a fairly complicated level. Since it is not possible to obtain unlimited resources, the administrators must direct the development into specific channels, so that the greatest array of talent will be assembled in at least some of the academic fields. However, the creation of a capital of thought would require a plan -- not in terms of buildings and grounds - but in the form of an intellectual landscape. The administration of the University of Vermont does not have the imagination, daring, or vision for the formulation of such a plan.

The administration does not see itself as the molder of academic development, it views its task in client relationships. The University has many clients: the state, the parents, and the alumni.

For the parents, the university has stepped in to act as a father and mother surrogate. Two offices have been installed to perform this role: the "Dean" of Men and the "Dean" of Women. Over the last few years, we have had occasion to see what sort of activities can be pursued by such bureaucracies. The last incumbent Dean of Men had built a veritable totalitarian society at the University of Vermont. His regime was no less real because it was miniaturized. In this society, dormitories were transformed into police precincts, records became dossiers, counsellors developed into informers, and faculty members were reduced to reluctant auxiliaries. In the office of the Dean of Women, these processes were carried still farther. A lock-in and lock-out system is coupled with a track-down mechanism, and our Dean of Women does not hesitate to resort to Nazi-style "mass meetings." To be sure, our students still lead normal lives. The same, however, can be said the bulk of the population under any dictatorship. The damage is subtle and dangerous. Life does not end and people still function, but the atmosphere is poisoned and the mind is drugged.

THE TEACHERS

If the administration is failing, what about the faculty? As a group, it is highly diverse. Some are high powered; a few are men of national renown. Most of them, however, are teaching their course thirty times over until they grow old and die. If one should see them all together, they would not give the appearance of an assembly of minds; they would look only like a collection of tired men and women who have had an empty day and who are looking forward to supper and a comfortable bed. A large number are in fact pitiful people who structure their drab lives around the students. As chaperons, they may even take a parasitic part in student social life; as club members they appear to copy and emulate student organizations. For decades, they eked out a living, and even today some of them would be ashamed to mention their salary. A few take refuge in committees and busy-work; a great many strive half-desperately for a little security. In their meetings, they talk endlessly about student absences, grade averages, health benefits, life insurance, and retirement plans.

Even so, the faculty is more qualified to teach than the student is to learn. The average teacher has received training which is beyond the comprehension of our student body. With all that preparation, however, he cannot command a decent wage. Academic "modesty" compels him to refrain from emphasizing his accomplishments; "reasonableness" forces him to give weight to the employer's arguments; "dedication" does not allow him to transfer any part of the wage negotiations to a collective bargaining agent. If he cannot take it anymore, he can only quit. Some have already done so.

National College Poetry Contest To Be Held

[illegible] INTERCOLLEGIATE POETRY ASSOCIATION announces its ANNUAL COMPETITION.

[illegible] undergraduate [illegible] SEVENTEEN POEMS.

[illegible] attending a [illegible] college [illegible] Each [illegible] poems are [illegible] members of [illegible] tutions.

Each poem must be TYPED or PRINTED on a separate sheet, and must bear the NAME and HOME ADDRESS of the student, as well as the name of the college attended.

COLLEGE TEACHERS' NATIONAL ANTHOLOGY

Teachers and Librarians are [illegible] for possible inclusion in the ANNUAL NATIONAL TEACHERS' ANTHOLOGY.

The closing date for the [illegible] by College Teachers and Librarians is JANUARY FIRST.

There are NO FEES OR CHARGES [illegible] All work will be judged on merit alone.

MANUSCRIPTS should be sent to the OFFICES OF THE ASSOCIATION.

NATIONAL POETRY ASSOCIATION
5[illegible]0 Sorby Avenue
Los Angeles 34, Calif.

Round Table

The ROUND TABLE [illegible] organization designed to stimulate thought and personal development of the individual through group discussion. It is in the process of re-establishing itself on the University campus. The Round Table was once an active group at UVM. Faculty and students participated in provocative discussions designed to increase mutual understandings.

The new Round Table offers any member of the University community the chance to voice his opinions in an atmosphere conducive to the betterment of faculty-student understanding. The Round Table has been reorganized in such a way that the scope of the imagination is the only limitation of the club's activities.

Those interested, please contact Sandy Becker, Tel. [illegible].

UConn Student Newspaper Faces Possible Censorship

by STEVE TAYLOR

(From The New Hampshire)

The student newspaper at the University of Co[illegible] is presently being threatened with administrat[illegible] trol by the University's Board of Trustees. [illegible] necticut Daily Campus has heretofore been op[illegible] an all-student editorial board while its finan[illegible] been controlled by the University's Student S[illegible]

A lengthy report filed by the University Board of Trustees' Daily Campus Study Committee during the summer and printed in the September 18 issue of the Daily Campus suggests that the student newspaper be placed under supervision of an 'advisory committee'. Reports in the Daily Campus indicate that the paper was subsequently placed under control of the 'advisory committee' and that control of the paper's budget and finances was taken out of student hands.

An editorial in the Daily Campus states: 'During the summer we (the editors) received notice that the Board of Trustees decided to make . . . the Daily Campus . . . independent of the Student Senate and responsible to an advisory committee. We have reliable information that it is the opinion of the Board of Trustees that the students have too much control over themselves. They believe that the students have too much chance to learn by making mistakes. Under the new system they hope to have someone able to step in and [illegible] the situation at the [illegible] indication something unusu[illegible] is about to happen.

"As a matter of fact [illegible] administration has [illegible] established a posit[illegible] could easily perfo[illegible] tasks. Further, it [illegible] as far as the Trust[illegible] concerned, if we don't [illegible] of their plans for us, [illegible] should simply go to [illegible] University . . .

"The Daily Campus has [illegible] been, nor never was [illegible] or coerced by the [illegible] Senate . . . The potential censorship that the Daily Campus faces is greater under this new system," the editorial concludes.

The UConn paper has been a five day-a-week daily [illegible] 1953, and is supported large[illegible] by student tax funds. The paper utilizes some wire service news, a practice criticized by the Trustee subcommittee.

The paper in the past has been critical of various elements within the state and at various times of the University, and its administrat[illegible]

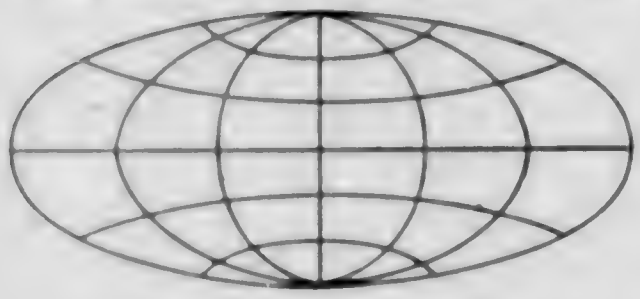
The Circular File

(continued from page four)

So much for the first day -- it was the worse. Since then, my troubles have been minor. Two new leaks, a blown electrical system, a gapping hole in the furnace downstairs, and a door handle which came off "with the greatest of ease," all managed to fill my second happy day.

Right now, I'm busy raising twelve bucks for my broken bay window, so I'd better end this tale of woe. It is at times like these that I wonder if S.T.O.P. was worth it . . . but I always think back to the days of our dearly-departed dean, who had so much in common with my apartment, and I realize that it was indeed worth it!

STUDENTES



(continued from page five)

Council responded to this appeal with a unanimous vote of approval and adopted a motion to set up a committee to take charge of all publicity and recruitment. (In so doing the Student Association has assumed a great amount of responsibility though, of course, ultimate responsibility rests with the library staff and Senate Library Committee.) The Student Association is going to ask ALL STUDENTS to participate. Look for their information bulletins and keep abreast of the progress they are developing. Don't let such a sterling display of enthusiasm for a STUDENT solution to a pressing problem go unsupported by the very body that these leaders represent.

If the students are willing to participate in sufficient numbers, the entire move (which incidentally will be one of the largest ever completed through the use of volunteers) will be in their hands. The President of the University, the Senate Library Committee, the Library Staff, and the Administration are behind the students. A University holiday will be declared if enough cooperation is evidenced to warrant going ahead with the project. The Student Association will release all of the details of the plan and what part they want each person to play in it, but the initial decision that the plan is supported can be made NOW.

The idea of moving college libraries through the use of student volunteers is not new. It has been done many times in the past, and always with complete success. I can assure you that the student body of our University is fully as competent as any of these other institutions that have conducted moves in this manner. We will succeed beyond all expectations if we support this project wholeheartedly. If everyone helps, the task will not be an arduous one -- although it will be a responsible, tangible display of what UVM'ers are really made of.

Almost every scientifically trained man can find stimulating and rewarding career opportunities within the broad spectrum of Pratt & Whitney Aircraft activities.

From the solid foundation of 36 years as a world leader in flight propulsion systems, P&WA development activities and research investigations today are far ranging. In addition to continuing and concentrated development effort on air breathing and rocket engines, new and exciting avenues are being explored in every field of advanced aerospace, marine, and industrial power applications.

The reach of the future ahead is indicated by current programs. Presently, Pratt & Whitney Aircraft is exploring the fringe areas of technical knowledge in *magneto-hydrodynamics . . . thermionics* and *thermo-electric conversions . . . hypersonic propulsion . . . fuel cells* and *nuclear power.*

To help move tomorrow closer to today, we continually seek ambitious young engineers and scientists. Your degree? It can be in: MECHANICAL ■ AERONAUTICAL ■ ELECTRICAL ■ CHEMICAL and NUCLEAR ENGINEERING ■ PHYSICS ■ CHEMISTRY ■ METALLURGY ■ CERAMICS ■ MATHEMATICS ■ ENGINEERING SCIENCE or APPLIED MECHANICS

The field will broadens. The challenge grows greater. And a future of recognition and advancement may be here for you.

For further information regarding an engineering career at Pratt & Whitney Aircraft, consult your college placement officer or write to Mr. R. P. Azinger, Engineering Department, Pratt & Whitney Aircraft, East Hartford 8, Conn.

Welcome back to Gale Morgan and Jan Woods just returning to UVM from nursing affiliations last semester. The ADPi's are glad to have Ann Garrison returning from a year at Michigan State University. ADPi President Peggy Link traveled to the 110th annual ADPi convention which was held in Pasadena, California this summer.

The Freshmen are not the only newcomers to Burlington. I would also like to welcome the Loft to Burlington and to UVM. The Loft offers us a more cultural atmosphere where students can go to play a quiet game of chess, or browse around the bookshelves, or just listen to some folk singing while sipping espresso. A place such as this has been long anticipated and I sincerely hope that it doesn't acquire the social atmosphere of the Waterman Coffee Shop. I think that it is an important contribution to the cultural and general development of our school.

Thurs. Feb. 1	Graduate Study in Business	E.T.S.	8:30 am - 5 pm	216 Waterman	Jan. 15

A.D.A.- American Dental Association Division of Educational Measurements
222 East Superior Street, Chicago 11, Illinois
Results reported to dental schools about five weeks from testing date.
See Booklet.

E.T.S.- Educational Testing Service, 20 Nassau Street, Princeton, New Jersey
No firm information on test results announcements at present (Sept. 21, 1961) other than in booklets of information available in Room 234 Waterman. Generally speaking E.T.S. does send reports to examinees.

P.C. - Psychological Corporation, 304 East 45th Street, New York 17, New York
Scores released only to medical colleges, never to students.

Homecoming Poster Contest

Again there will be a contest for the best poster advertising HOMECOMING! Anyone may enter, and each entrant may submit one or more posters conforming with the following regulations:

1. Information on poster be: Homecoming 1961... Oct. 19, 20, 21. A minimum of 4" x 5" must be left blank for the printing of a schedule of events.

2. Posters may be on white cardboard with two colors or on colored cardboard with one color.

3. All posters submitted must be 14" x 22".

4. Posters for the contest must be turned in at the Student Association office between the hours of 10:00 and 12:00 Wednesday morning, Oct. 4.

Copies of the winning poster and all other posters entered become the property of the Homecoming Committee.

A trophy will be presented to the winning entrant during the Homecoming week-end.

SA Progam

will follow. By 1964, the influx of the post-war baby crop into the nation's colleges will create a new situation. Colleges will bid frantically for faculty personnel, and those which will not be able to pay will go under.

THE LEARNERS

What then about the students? At any given time, the undergraduate student population may be classified into three groups: the academically oriented segment which is interested in knowledge, the vocational element which seeks training, and the tourists who want to stay out of the labor market for a while or who are looking for a mate or who are trying to "find" themselves. All of them are confronted with an impossible demand: to be good at everything, as early as possible without delay. Let it therefore be said: Only success is final, failure is not. In the last analysis, a single accomplishment outways a myriad of breakdowns. Moreover, on the highest levels, it is no longer possible to excel in every field. The days of Liebnitz are over. A man who claims that he has learned everything is just a dilettante. He who knows a little may at least be useful. Finally, there is a place for failure, too. Not all of our problems are soluble. Even time and effort cannot buy all things and one may consider oneself lucky if one can say upon leaving: I have not regretted my years in this place.

Cats Boast Big Line

[illegible] was [illegible] the [illegible] of Vermont [illegible] this fall [illegible] coaching staff [illegible] more.

In fact [illegible] Head Coach [illegible] is having [illegible] of two [illegible] squads [illegible] of which [illegible] all [illegible] for a period [illegible] prior to the [illegible] scrimmage last week there were [illegible] who were [illegible] Vermont [illegible] season has [illegible] the Catamounts [illegible] the forward [illegible] Among other [illegible] the Catamounts [illegible] a formidable group of guards and centers eager [illegible] starting [illegible].

"We'll have at least two [illegible] to work with [illegible]," commented Dunsmore, "and this adds that all [illegible] of this year [illegible] the game [illegible] minutes."

Dunsmore went [illegible] that the outfield [illegible] is heavier [illegible] other Vermont [illegible] the past decade. Both ends [illegible] pounds, while the starting tackle will [illegible] average about 205 pounds. The Catamounts [illegible] a unit averaging 215 pounds per man. Of the interior linemen, only four weigh [illegible] pounds. Jeff Mather, a junior letterman at guard from St. Albans, and Duane Barber, a junior guard from Bradford, R.I., are the lightest interior linemen. Both weigh 190.

YANKONPREVIEW

The University of Vermont's football team will open its 1961 campaign when they face Rhode Island's Coast Guard eleven at Centennial Field. A much improved Catamount squad seems ready to avenge its 25-0 loss of last year.

The University of Maine's Black Bears and the University of Rhode Island Rams will meet in an important conference clash at Kingston. Last year, the Black Bears edged the Rams 7-0 at Orono.

Meanwhile, the defending champions from Connecticut, will make another attempt to score its first victory over Yale when the two teams meet at New Haven. The Elis, now recognized as a major team, feel confident that the 19th meeting between the two teams will be a lucky one and result in their initial triumph. Last year, Yale rallied to win 17-8.

New Hampshire's Wildcats are in a similar position as they tangle with Dartmouth at Hanover. In eight previous meetings, the Hanover Indians have prevailed although on a couple of occasions it appeared that the Wildcats might be victorious.

In other action, Massachusetts entertains American International at Amherst.

Sportlight Southwick

by CHARITY GREENWOOD

KLUB KARNIVAL WAS A GREAT SUCCESS FOR W.R.A WE ACQUIRED A LARGE MEMBERSHIP FOR THE COMING YEAR. ANOTHER OPPORTUNITY TO JOIN WILL BE ON OCTOBER 1 AT THE ANNUAL PICNIC

W. R. A. has scheduled a Planning Conference for October 7. This will include all the schools in the area with whom we will be exchanging sports days. The Conference will be an "all day affair" held at Southwick. At the termination of the Conference a calendar will be published announcing the schedule of events for the year.

Carol Mabe, a member of Dance Workshop, spent the summer at Connecticut College for Women, studying modern dance. Her study was sponsored by a scholarship fund awarded by Dance Workshop. She will teach the first class of workshop on October 3.

Co-Ed. *Extracurricular* archery is offered on Tuesdays and Thursdays from 4:30-5:30.

W. R. A. will hold a Hen House Hockey Tournament in the near future. The tournament will be run on a one day practice - then play basis. This tournament will be for inexperienced as well as experienced players.

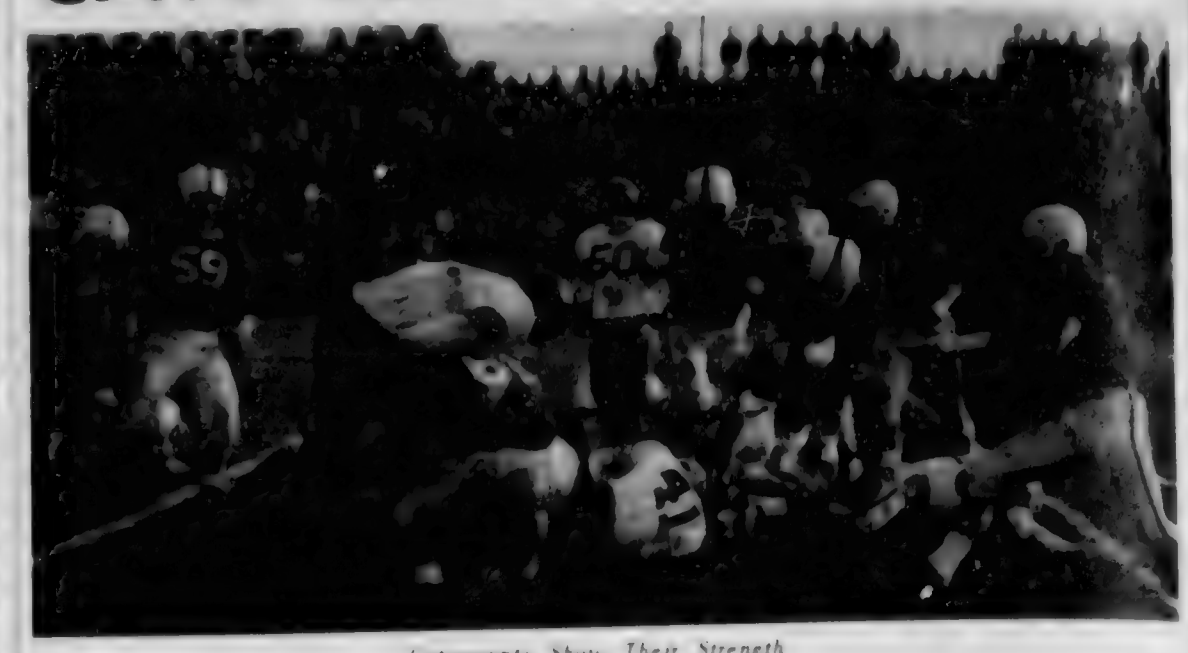
Miss White, Chairman of the Women's Physical Education Department, announced that camping will be offered this semester. They plan to take one overnight trip. All other trips will be planned by the classes.

Catalina Club announces that tryouts will be held on October 3 and 10. The first date will be reserved for instructional tryouts for anyone who wants to learn the stunts. The second date will be the actual tryouts.

MAJORETTES TO TWIRL

Fall is once again upon us, and as in the past a young man's fancy lightly turns to thoughts of football. While UVM's hopefuls are in training each day for the big games, another squad is also practicing. These are the majorettes. In preparing for the half-time performance, the majorettes from last year, Elaine Wright, captain; Pat Conait, Sandy Fryzell, JoAnn Juel, and Carol Waters have increased their number to seven regulars and three alternates.

Try-outs for the 1961-62 squad were held at the Chapel on September 21. From the girls there Judy Guether and Kit Lund, both of the Class of '65, were chosen as regulars. Sara Jackson, '63; Ella Snead, '65; and Eileen Stapleton, '65 were chosen to complete the squad.



Within the week these new members began practice and are now anticipating their first opportunity to twirl at the pep rally opening the football season. Thereafter the girls will appear at each home game, as well as at the Middlebury game which is played away.

X-C SEES ?

Archie Post, coach of UVM's Cross Country team, sees many "question marks" in the coming season. "As far as opponents are concerned," says Mr. Post, "Maine is still very good. And, of course, it's always tough sledding in the Yankee and New England meets."

Mr. Post's problems arise from the questionable availability of of certain past stars. He foresees some creditable performances from Tim Simpson, however. Bill Ellison, a fine cross-country man last year, may have to withdraw from the squad due to academic reasons. Moreover, Bill Perkins, whom Post describes as "the best miler in UVM's history," holds an outside job and it may prevent him from running for the Huskies. Perkins won the mile at the Yankee Conference meet last spring with a highly respectable 4:19. On the other hand, Mr. Post sees a ray of hope in Gary Karch, the tireless soph miler who consistently broke the tape for the frosh last year. In short, Mr. Post contends that it is hard to predict a season, good or bad, with such a short practice period and so many questionable starters.

CATS SET FOR CADETS

Catamounts Show Their Strength

CG Takes To Air

With the time table of pre-season preparations rapidly drawing to a close, coach Ed Donnelly and the Catamounts are pointing their practice sessions toward Vermont's Sept. 30 opener against Coast Guard.

The Centennial Field clash will open the season for both the Cadets and the Catamounts unlike the last two years when Otto Graham's crew opened against Geneva. "We don't know too much about them yet," said Donnelly, "but judging from the past we have a good idea of what to expect. Otto likes the passing game and his quarterback Larry Dallaire is a good tosser." Dallaire is one of a group of 18 junior and senior lettermen whom Graham has been grooming in a rebuilding program begun in 1959 and culminating this season. The Cadets also have five sophomore lettermen which makes them two-letterman deep at every position except end and center.

Anticipating an aerial offensive by the Cadets, the Catamounts are striving to perfect their pass defense while sharpening their own high altitude game. Using zones, man to man, and overloading, the Catamount pass defenses are clicking in scrimmage. Donnelly has two units working out in the secondary.

Teaming up in one unit are Wayne Van Ham of East Falmouth, Mass., Frank Amato of Oceanside, N.Y., Paul Harris of Mt. Kisco, N.Y., and Maynard Ducatte of Cadyville, N.Y. Working together in the other unit are Tom Perras of Burlington, Dom Parlato of Rochester, N.Y., Leo Davin of Hamden, Conn., and Pete Weiss of Deerfield, Mass. By utilizing the Wild Card substitute, Donnelly will be able to shift a man from one unit to another and keep the defensive backfield flexible.

GRID PROSPECTS GOOD

University of Vermont grid coach Ed Donnelly has a player personnel problem; but its the sort of problem which brings a twinkle to the Irishman's eyes.

Last season when he was suffering from an acute manpower shortage, the Catamount depth charts were barely larger than the starting line-up. However with 18 sophomores up from a frosh football team which won four and lost only one bolstering a nucleus of 16 returning lettermen, the depth charts are headed for a much-needed expansion and Donnelly is faced with a pleasant problem in sorting out talent.

Although the 36-man Vermont squad may be thin in some positions this fall, it probably won't be at halfback. The Catamounts can count on seven halfbacks if they are all healthy including senior letterman Maynard Ducatte.

A speedster from Cadyville, N.Y., Ducatte broke into the line-up in his sophomore year. His performances in pre-season drills this fall prompted praise from Donnelly who says that "Ducatte is looking better now than at any previous time in his collegiate career."

The one-time Boston University backfield coach also singled out sophomore halfbacks Tom Perras of Burlington and Wayne Van Ham of East Falmouth, Mass. for special mention as possible starters. Both were standouts as frosh footballers last fall.

Over the season Perras scored more than half of the freshman team's total points. Against Norwich he caught passes and galloped for his single game high of 26 points. An end in high school at Rice Memorial of So. Burlington, Perras was named to the All Northern Conference team in his junior and senior years and won All State and honorable mention All American honors in his senior year.

Van Ham was also selected to scholastic all star teams in his junior and senior years in high school.

Sportorial

by FRANK BOLDEN

The members of the class of '65 are very fortunate to be entering UVM this semester. This year should be the beginning of a long period of consistant winning for Vermont's athletic teams.

Starting with football this fall and ending with baseball next spring, Vermont should field some of the strongest teams in its history. This year's football team is a literal powerhouse containing a nucleus of 16 returning lettermen. The '61 Catamounts are supposed to be UVM's best team since 1954 when the Cats won 5, lost 1, and tied 1. With a few breaks and a lot of support, the football team could go all the way.

Last Saturday at Troy, N. Y. the Cats showed some of their strength when they defeated R.P.I. in a controlled scrimmage by a score of 14-0. The second team played most of the game. Vermont's halfbacks, behind the solid blocking of a powerful front wall, which averages over 200 lbs., picked up yardage at a clip of 4 to 5 yds. per carry.

Near the end of the first period, Ken Burton who looked as if he was in top form, scored the first touchdown on a power play up the middle. The attempt for the point after touchdown failed.

The score remained 6-0 in favor of Vermont until the third quarter when quarterback Don Parlato threw a twenty-five yard touchdown pass to left end Paul Goussanit who was standing alone in the end zone. Parlato then threw to right end Frank Bolden for the conversion and the score was 14-RPI 0.

Every man on the team saw action, and the team as a whole did very well. As I said before, with a little bit of support, this team can and will go all the way.

See you at Centennial Field Saturday.

One of the toughest tasks that faced producer Bloomgarden during the run of "The Music Man" was finding replacements for the lisping boy who sings "Gary, Indiana, My Home Town." Every few months the young child actor got too big to play a six-year-old part, and tiny red haired actors were constantly parading into the producer's office.

For the tour which will include the local engagement, Mr. Bloomgarden will put together an entirely new company, with a nucleus of veterans from the Broadway engagement, as well as fresh scenery and costumes.

The company, in addition to sixty actors, singers and dancers, will also carry a dozen musicians, half-a-dozen wardrobe mistresses, a teacher to provide the children in the troupe with school

(continued on page seven)

Tuition Is Increased; New Scholastic Regulations Passed

New Rules

by Anne Clark

With the advent of another school year, returning students have no doubt noted changes in the green pages of the UVM Data Book. The changes which have taken place concern scholastic standings and the use of the automobile on campus by resident students.

Last spring the University Senate voted on a new grading system which applies only to freshman students enrolled at the university this fall. According to the Dean of Administration Dean Rowell, this new policy has been in the making for the past two or three years. The administration hopes that these changes will improve the scholastic work of the student body.

The main change is that all grades earned by a student will be included in his average. This will include such courses as ROTC and physical education. Failing grades will also be included. Averages will be calculated from the total of all grades on the student's record weighted by credit hours.

Dean Rowell stated that the purpose of this new policy is not to increase the university's drop-out rating. The student will realize that all courses are going to be averaged in, and will take his work more seriously. This new policy is also intended to cut down the number of dropped courses which have not to date been included in the student's average.

The other major change in the scholastic system which will become effective this year concerns the grades of transfer students. No grade less than 70 will be accepted in any course for transfer credit, and no grades from other institutions will be included in University academic averages.

The new automobile regulations have been the subject of much talk and complaints around the campus green. Perhaps the new regulations have been misunderstood by upperclassmen because of an error made during the printing of the new rules.

The rule which states that "resident sophomores with an average of 75 or more for the previous semester may register an automobile," only becomes effective with the class of 1965. Thus, all present sophomore men who have been hiding their cars in downtown garages may now take them out.

According to Dean Rowell, this rule is supposed to help prevent the so-called "sophomore slump" to which many sophomores become prey.

The other new policy states that freshmen with an average of 75 or more for the first semester may register an automobile for the second semester. The administration hopes that this policy will provide an incentive for the freshmen to raise their academic average.

Tuition

The University of Vermont Board of Trustees announced on August 19, 1961 an increase in tuition for non-Vermont students. Effective in September of 1962, the tuition for out-of-state students will be $1,200.00 per year. This figure represents an increase of $160.00 per year over the present $1040.00. There has been no increase for Vermont students.

Such an increase in tuition had been considered previously, and was recently made necessary by the rising costs of operating the University and of meeting faculty salary commitments.

As a result of this tuition increase, the University of Vermont is now among the most costly of the Land-Grant institutions in the United States.

According to University President, John T. Fey, the per capita cost of educating a student at UVM is $1810.00. This cost is met by student tuitions, state appropriations, and endowment income of approximately $400,000.00 per year, and various other income and grants.

The State of Vermont has already increased its appropriation for UVM in anticipation of a rise of tuition. An increase of $750,000.00 in appropriations was approved by the state. At the last session of the legislature some $2,000,000.00 was granted by the state for an engineering building and renovation of Billings Library for use as a student center. For the current biennium the state has appropriated an additional $6,230,000.00 for the operating expenses of the University. This figure is about 10% of all Vermont state expenditures. According to Dr. Fey, "The State is doing a good job.

Dr. Fey emphasized that the average tuition of New England educational institutions is approximately $1300-1400 per year. "The University of Vermont is attempting to keep its tuition below the New England average," said Fey.

Enrollment Reaches Peak

The largest total and undergraduate enrollment in history, and the largest senior class since 19--that's the enrollment picture at the University of Vermont for the fall semester of the 1961-... academic year.

Billy May Featured At Homecoming Ball

Staff and Sandal, and Key and Serpent announce that the Homecoming Ball will feature the Billy May Band and Frankie Lester, vocalist. The dance, to be held at Memorial Auditorium, will begin at 9:00 P.M., and extend to 1:00 A.M. on Friday, October 20.

Frankie Lester began his career in the days of the big bands. He appeared with such notables as Ted Lewis, Tommy Dorsey, Hal McIntyre, and Buddy Morrow. It was with the latter that Frankie turned to recording, but he soon returned to the band business. Recently he joined forces with the Billy May Band to provide the entertainment that will be seen over the Homecoming Week-end.

Vocalist, Frankie Lester will entertain at the Homecoming Ball. (Credit: James J. Kriegsmann)

Before reaching their present status in the entertainment world, the group now known as the Billy May Band has little experience in the dance music they now play. In 1951 Capitol records planned an album containing the music of four different bands. After doing this recording job, the band contacted by Billy May decided to continue in the style of the modern dance band and the "rockin' Jimmy Lunceford two-beat style." This caught on and today the arrangements of Billy May are heard throughout the United States in places where college crowds gather.

Edward L. Rutner

..., September 29, Ed... Rutner, a senior student at the University, died of injuries incurred in an automobile accident.

Edward was a pre-medical student, a Dean's List scholar, captain of the tennis team, and a Kate Walker for his fraternity, Tau Epsilon Phi.

Edward was twenty years old and lived with his parents, Mr. and Morris Rutner, of Brooklyn, N.Y.

The *Cynic* and the entire University Family express their heartfelt sympathy to family and friends.

Peace Corps Examination To Be Held On Oct. 7

An American who wants to [illegible] will have another opportunity to participate by taking examinations on October 7th.

The third round of Peace Corps examinations will be held at that time, covering content throughout the country.

The examinations will begin at 8:30 A.M. and will last for one hour, with an additional hour out for lunch.

Each person will be given his own personal testing of examinations.

One examination is designed for men and women who would like to be considered for positions as secondary-school or college teachers. To take one of these tests, one needs a bachelor's degree but need not be an honor student to do so.

The other examination is for every one else who wants to serve in the Peace Corps. There is no rigid passing grade for this test. Results are considered along with such other elements as background, special skills, and character.

[illegible] information.

[illegible] the Peace Corps hopes to attract a large number of Americans in the agricultural and industrial fields.

"We are receiving an increasing number of requests for such skills from prospective host countries, according to Dr. Nicholas Hobbs, Director of Selection for the Peace Corps. "We will have to turn down these requests if we are unable to meet their needs.

Many of those who will take examinations on October 7th will be men and women who have sent in a Peace Corps questionnaire since the last testing in July. Applications are welcomed as well.

If you have not yet filled in a questionnaire, but are interested in Peace Corps service, you can still take one of the examinations on October 7th.

See the person in charge of the Civil Service Commission testing center on the morning of that day. The examiner will do his best to accommodate you.

Examinations will be given at the Federal Building in Burlington, Vermont.

The Dominican Republic A Nation In Transition

By Ed Kritzler

Editor's Note: Due to a production [illegible] Kritzler's article which appeared in last week's [illegible] was incorrectly titled. We apologize to the author for any embarrassment our mistake may have caused him.

THE SLOW ROAD

On July 24, after one week in Puerto Rico, I landed in the Dominican Republic. As I rode in a bus along the road taking me from the airport to the capitol, I was deceived - deceived by one of Trujillo's subtle tricks to impress the typical tourist. Not only is this highway modern and in excellent condition, but also both sides are lined with numerous government housing projects. For most tourists this is practically the only road they see outside of the capitol. The Dominican Republic's tourist attractions are all centered around the city -- thus there is little to motivate the visitor to wander far from the capitol. To bring this about, General Trujillo made the airport road a showplace. THE ROAD WAS NOT THE BEST, AND THE HOUSING PROJECTS WERE PRACTICALLY THE ONLY ONES I OBSERVED WHILE TOURING THE COUNTRY.

THE FEAR OF THE PEOPLE

The road was only one of Trujillo's numerous plays used to deceive the foreign observer. His reign of terror -- its effect on the people, was far more rewarding in this respect. Yet there is a vast difference! The road is permanent, the attitudes and fears of the people are not. During my five weeks there, these attitudes and fears underwent a slight but noticeable change.

Since the death of Trujillo, the government claims to be undergoing a transition to a democracy with free elections, etc. This is what the government-controlled press proclaims. The people however, are extremely skeptical about this. When I first arrived in Santo Domingo, nearly everyone I met was afraid to tell me anything except the most general information about their country. Pictures of Trujillo adorned every wall. The only people I encountered who would speak out were the students and even then only in complete privacy and after making sure that I could be trusted. (While writing this a humorous experience involving the leading student opposition group comes to mind. I will relate it is a brief account of this incident.)

On my third day in the city I fell in with a member of this student group (the MPD). That night, after much prodding on my part, he took me to a house on the outskirts of the city. Here, I was introduced to some of the higher ups in the movement. After a few minutes of informal conversation I began firing the questions I had prepared; there was only one drawback -- they weren't answering. They just stared coldly. Their leader then asked in a cool but deadly - serious manner, questions to which I had already provided the answers: "Who are you? What do you want? Who are you working for?"

I repeated that I was simply a student who liked to travel when history is being made in a rapid and exciting fashion. This they refused to buy, that is, until I had shown them my identification. Handing what I had over to the leader he asked if this was all the proof I possessed. I nodded affirmatively. He then started laughing and said I couldn't be a spy if this was the extent of my identification -- my drivers license and UVM student ID card.

Looking back on it now, I believe what happened that night was more to impress me than to test me. Still, it did implant in me the gravity of the situation facing the people in the Dominican Republic.

By the time I left the country the people had lost some of their abject fear of speaking out. Not that they believe the government was sincere about a transition to democracy, but, it was evident the government was allowing a limited amount of freedom and dissention. For the first time in thirty-two years certain recognized opposition groups have been receiving permission from the government to stage rallies. (However, any demonstration which has not received the government's OK in advance is efficiently and many times brutally smashed.) Still after living under a tyranical rule for thirty-one years, a person's fears and mistrust do not evaporate overnight. It is a slow process -- especially since the family of the tyrant has many years power. I say it is a slow process, but it can be observed. Many times I would enter a home or a store where Trujillo's picture had graced the walls, only to find the walls now bare. No longer did everyone cheer when someone would shout "Down with tyranny?" No, the topic was the subject quickly changed when I'd ask questions about the government. Though most of the older middle class people still remained silent, they at least smiled in agreement, when some student would denounce the government. Perhaps the best indication of the lessening of the people's fears was witnessed at the opposition rallies. Each succeeding demonstration was larger and generated more enthusiasm than the previous one. At the last rally I attended, the emotional fervor of the people was overwhelming. It was here that I had the most unique experience of my trip.

Independence Park, Santo Domingo, was the scene of the rally. Approximately 8000 people were in attendance. To get a better view of the scene, I had climbed out on the roof of the tallest building overlooking the park. The scene below reminded me of the rallies I had attended in Cuba. To remain immune to the emotions generated at these demonstrations is an impossibility. All afternoon different men mounted the raised platform in the center of the park to speak, only to be interrupted every few minutes by cries of Libertad', Basta ya!, and other spontaneous cries from the people.

While all this was going on, a few Dominican youths climbed onto the roof where I was standing. One young man came over and began talking while I snapped pictures right and left. After about five minutes of general conversation, he asked if I would mind if he pinned an emblem of the opposition on me. Not being sure of what he meant I just smiled. A few minutes later a brief silence fell over the crowd. My new found friend taking advantage of this moment, sprang to his feet with arms outstretched, began yelling to the 8000 people below. Immediately they looked up -- not at him but at me. He then came over to where I stood, and with an exaggerated gesture pinned the opposition's emblem on my shirt. I was bewildered. Everybody was yelling

Class Of 1964 To Hold Street Dance

The Sophomore Class will hold a Street Dance on October 7, 1961. It will be held in the parking area between the Men's Gym and the Home Economics building. In case of inclement weather the dance will be held in the Men's Gym. Rick Nalin and his popular band will provide the music for the affair which is to begin at 8:00 P.M. Admission is .25 per person.

The dance is the first of its kind at the University of Vermont. Street Dances have been held on other college campuses and in many local communities. Street Dances are an excellent means of bringing together a large group of people in a relaxed and informal atmosphere.

SCOPE Wants New Members

SCOPE, the Cultural Activities Committee of the Student Association [illegible] meetings for new members. SCOPE is unique on the UVM campus for it brings a wide variety of enlightening, educational, and generally stimulating programs to the University of Vermont.

Some of our recent programs have included a panel discussion including professors Gregg and Chaplin, and the chairman of Harvard's Department of Modern Modern Languages leading a discussion on Shakespeare and a folk sing.

Pan-Hel President Discusses Need For New Sorority

[illegible] been called to the attention of the Panhellenic Council, [illegible] is some evidence of interest in the formation of a new sorority at the University of Vermont. The Panhellenic Council has several times considered this matter. Statistically, we find a need for an eighth sorority at UVM does not exist, but statistics do not necessarily tell the whole story. We are trying neither to discourage nor encourage any group which may feel there is a need for an additional sorority on campus, but we do feel that if such a group exists they should be familiar with the procedure for organizing a sorority.

A group of girls desiring to begin a sorority must have a purpose. This cannot be merely the desire to wear a sorority pin, or because of a purely negative attitude towards the existing sororities on campus. They must have a purpose or set of ideals, which they will be constantly striving to live up to as a sorority and as individual sorority members. As an example, one national organization sets forth the ideals of "... enduring friendship, loyalty to college and fraternity, high scholarship, and service to others." A sorority's first responsibility is to contribute something to the University as a whole and to the education and betterment of the students.

If a group with a purpose, or set of ideals, desires the formation of a sorority, there are three ways in which they can accomplish this. A group may become a local organization and after it has become established on campus, it may apply to one of the national organizations for membership. This is not an immediate process. The group will probably have to maintain a local organization for several years, and must be well established on campus before it can expect to be accepted by a national organization. The second way a sorority may begin is by developing a colony of a particular national organization with national assistance. Or if this group prefers, they may first become a social club and then think in terms of sorority.

There is a fourth way in which a sorority may begin on a campus. The national organization may send initiates of their sorority to a

(continued on page nine)

New School Calendar Proposed

The question of a new school calendar in an attempt to tighten the college year, has come up again this semester.

The main purpose of the proposed calendar is to effect better utilization of time. School would begin early in September and proceed to the Christmas vacation, with only one day off at Thanksgiving. This would entail a full [illegible] days of classes and an exam period before the Christmas vacation.

Christmas vacation would be extended to three weeks under the new proposal. Spring vacation would be retained as it is now, but classes would end late in May.

The proposed calendar has recently been discussed by the University Senate and various other student groups. Objections to the plan centered mainly around the idea of beginning school before Labor Day. It was suggested by the Senate that classes begin after Labor Day, time could be made up by not having a formal exam period. Under this proposal, exams would be held during the last week of classes.

Student opinion runs high on the subject of the new calendar. The principal objection of most of the students concerns the loss of the Thanksgiving vacation. Dean Rowell, Dean of Administration, expressed the opinion that if the proposal is put into effect this year it will be accepted.

As a result of the previous discussions, the University Senate appointed a committee to look into the proposed calendar. The members of this committee are Alan F. Lodge, Fred Gallagher, Howard Glade, Roy Julow, Ralph Widbank, Lyman S. Rowell, Frank Steeves, Raymond Tuttle, Wendell Whitcher, and Mr. Taylor.

The Dominican Republic

(continued from page two)

Viva Americano! and I had no idea what the hell was coming off. I was by no means going to remove the emblem as 8000 people would have probably "stormed the Bastille" if I had done so. So not knowing what else to do I just smiled and waved. (Later I found out my friend had proclaimed that I was a reporter who would write the truth and present it before the Organization of American States.)

The rally ended a few minutes later. My part in it however had just begun. Upon my descent from the roof I was surrounded by a crowd of students, many of whom I had previously met. They were starting a march down the main street of the capitol, their destination being a park in front of the main opposition party's headquarters. Sweeping me along with them, we headed the procession with thousands of people following behind. I couldn't have walked away if I had wanted to. All along the way people were running up to me, shaking my hand, screaming the *Americans are with us* and other similar remarks. The abruptness of all this had caught me off guard. Here I was a guest of a foreign country, with a big smile on my face, heading a protest march against the government of that country.

Career Cues

"Cure for job boredom: I made my favorite pastime my career!"

Richard Bertram, President
Bertram Yacht Co., Division of Nautec Corp.

"When you stop to think what percent of our total waking hours is spent bread-winning, you realize how tragic it is for any man to work at an occupation he doesn't enjoy. Besides frittering away life, it reduces chances of success to just about zero. I know . . . because it almost happened to me!

After college, I did what I thought was expected of me and joined a solid, Manhattan-based insurance firm. I soon found office routine wasn't for me. I lived only for lunch hour when I could walk to the Battery and mentally sail with the ships that stood out in the Narrows . . . and for the summer weekends when I could go sailing. Fortunately, the company I worked for is one of the leading insurers of yachts and after two years I was transferred to their Yacht Underwriting Department. Enjoyment and interest in my work improved immediately 100%.

After World War II, I started my own yacht brokerage firm and yacht insurance agency in Miami, combining my marine insurance background with an even closer relationship with boats.

My only problem ever since has been a feeling of guilt that my work was too easy. I love boats and boating people. That affection has paid me rewards way beyond the financial security it has also provided.

The moral's obvious. You have an odds-on chance for success and happiness working at what you enjoy most — what comes naturally! And if it's not just frivolous, your life's work could well be what you now consider just a pastime. It's certainly worth thinking about, anyway!"

Richard Bertram, while still in his early thirties, became one of the country's leading yacht brokers. Today he heads up eight companies covering yacht manufacturing, insurance, repair, storage, finance and brokerage. A resident of Coconut Grove, Florida, Dick became a Camel fan while still in college.

And to make any time pass more enjoyably...

Have a real cigarette—Camel

THE BEST TOBACCO MAKES THE BEST SMOKE.

The Vermont Cynic

Editorial:

High Price Of Learning

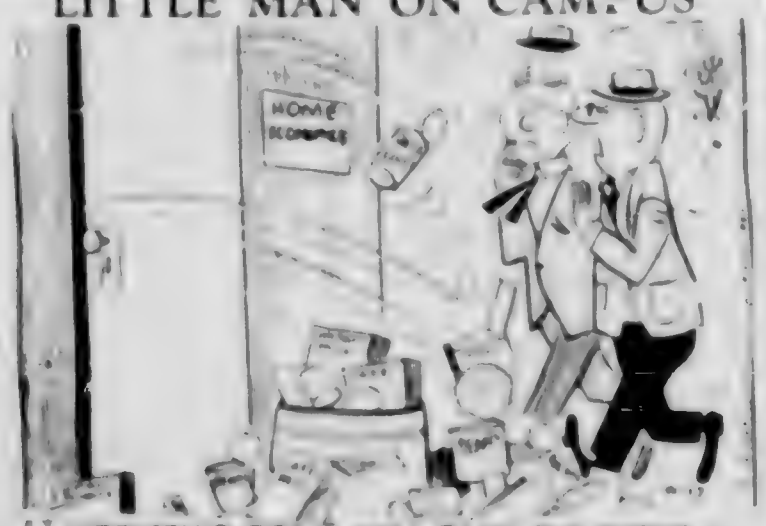
The central problem of higher learning in America is sharply indicated in the statement of a former faculty member that "Harvard is rapidly becoming a college serving only upper-middle-income families." Wilbur J. Bender studied the question as Dean of Admissions and Financial Aids and has continued to study it as Director of the Permanent Charity Fund of Boston. With present trends, he reluctantly calculates, "the annual price tag for a Harvard education will be four to five thousand dollars by 1970, and less than 5 per cent of American families will be able to pay for it from their own resources."

Nobody questions the right of "upper-middle-income families" to send their children to Harvard or to any other institution of higher learning provided the prospective students can meet the scholastic and other requirements. Nor need we give our sole attention to the financial situation of Harvard, which is only one great university and not the only one which can minister superbly to the human mind and spirit. Nor is it only tuition which is increasing. Mr. Bender indicated that even a scholarship holder at Harvard needs at least $3,000 a year to get along.

Manifestly the whole structure of our higher education is an economic log-jam. The nature of our society requires that more and more of our young people be given the opportunity for as much education as they can take. We need higher education not only for technological reasons but for humanistic reasons. Only a broadly educated nation can meet the difficulties that certainly lie ahead of us.

Nearly a century and a half ago Thomas Jefferson, whose interest in education never wearied, outlined for Virginia a plan whose object, he said, was, "to bring into action that mass of talents which lie buried in poverty in every country." Genius has nothing to do with worldly position. We must make use of it where we find it. We cannot, for the safety of the nation, restrict high-quality education to high-quantity incomes.

New Regulations



The new scholastic regulations approved by the University Senate are intelligent ones.

Perhaps most important of the rules is that concerned with recording of failures. Previously, failed subjects were not recorded in the graduating average. Thus, a student who received a forty-five in a course was actually better off than one who had passed with a low mark. This peculiar injustice is remedied by the new regulation which rightfully insures that flunks be counted.

The transfer student clause makes sense too. In the future, no grade under seventy will be accepted for credit. This is not of major consequence since only a small percentage of UVM students are from other schools, but the spirit of the rule is such that it will benefit this institution.

Finally, the change in automobile permissions appeals to us. Freshmen with high averages have more business driving than sophomore with low ones. Our only criticism is that the rule does not go far enough. The qualifying seventy-five average for sophomores is all right, but the freshman should maintain an eighty before getting car privilege.

LITTLE MAN ON CAMPUS

"I UNDERSTAND THERE HAD A TOUGH TIME FINDING A QUALIFIED HOME EC TEACHER

Letters To The Editor

Dry Bones

To the Editor:

As the result of [illegible] I feel I can [illegible] new students [illegible] that from people of [illegible] minds.

To new students:

The faculty and colleges I met [illegible] commented on "the" but the [illegible]. That is perfectly true. Sometimes in the [illegible] of [illegible] Watchman whose [illegible] from [illegible] and protagonist of [illegible] cannot [illegible] without being persecuted but [illegible] thing as studies [illegible] will have trouble.

It was just [illegible] inquiring of the [illegible] students whether they would prefer [illegible] private accommodations, that the administration selected and constructed two new [illegible]. This unquestionable piece of [illegible] was followed by a [illegible] piece of foresight, a [illegible] regulation, a mandatory order to [illegible] freshmen irrespective of personal preference or ability to pay. Off-campus living as the poor student's passport to education is now lost at the University of Vermont.

Rumors flew that certain unmentionables or [illegible] were the reef [illegible] at the heart of the matter. I cannot elaborate but my curiosity [illegible] any fearful [illegible]. I refer to Genesis, Chapter 34. Most particularly, verses 5, 13, and 25.

Another travesty of the Constitution's Bill of Rights each student must suffer as the result of [illegible] search without writ or warrant every time he or she uses the library. Yet another of the library's fool's rules concerns overdue books. It seems there is no fine for keeping overdue books and quitting the University. However, a fine of $20 per book will be extracted from anyone who has the honesty to return said book and the courage to stay on. I'll forego the mention of the locking of the barn after the stealing of the horse but this does seem to me the apogee of administrative [illegible]. If not that, then at least an argument "post hoc, ergo propter hoc," but perhaps the administration can only understand an argument "a posteriori".

One might have guessed by now that this writer has been stung by one of these rules - and one would be right - to the tune of $20. It seems the rules change with winter to summer and a book to be taken out a month in winter proves but a week in summer. And I, not noting the warnings posted by the mild Librarian, had two books three weeks overdue - $20. In the frustration of having to pay this foolish fine, at first I swore to steal everything at the University that wasn't screwed down. Immediately I saw that this was [illegible] completely inconsonantic. So this year, along with my other school supplies, I will bring a screwdriver. Then all we will have a new library, a much needed new library. However, provisions the books are let out, we will be grateful for them.

Members and militant proponents have advocated [illegible] physical education and ROTC. Illogical as entertaining as [illegible] have administered in all its many [illegible], in spite of it all the University is still a worthwhile place to go. This speaks all the more highly of our colleges and faculty who [illegible] the arms of the University. Students of fellow humanists. But it is true remember that whatever the ultimate cause there can be interest evil in books well confined on the shelf but there is nothing inherently evil in books being out

"Don't Think!"

To the Editor:

During one of the first few lectures of the semester, a course of higher mathematics, a student raised a pertinent question as to the origin and mathematical justification of a very important and fundamental equation upon which the greater part of the course is based. In other words, the student asked, "Why does the equation work?" The professor's reply was truly remarkable: "Don't ask why. You don't need to know that. It's there. Just use it - perform the mechanical operations. Don't think about it. Thinking will only get you into trouble." Although there may conceivably have been an element of facetiousness in the professor's prognosis of the effects of thinking, his attitude was painfully clear. The fact that the course is attended primarily by engineering students, that anomalous subspecies of the human race which is so averse to "knowledge-for-it's-own-sake," does not palliate the offense here committed.

For a professor deliberately to discourage a student from questioning the nature of things must surely be the cardinal sin of the teaching profession, for it strikes at the very root of educational philosophy, the promotion of knowledge and understanding. My answer to the professor is that I would rather be flailing in the quagmire of "thinking trouble" than be floating in an unperturbed vacuum of ignorance. Let us hope that this incident may remain unique in the annals of education. Since I still retain a disgruntled interest in passing the course, I am

Ansbacher Authors New Book

A University of Vermont psy... is represented in the ... of a new book, "The ... ing Image," which brings eight ... psychological points of view to bear on the problem of

CASE STUDIES

Prof. Heinz L. Ansbacher repre... the Adlerian point of view in ... book which discusses a select... "serious suicide attempt." ... representing the orthodox ... Freudian schools, the ... Jungian, Sullivanian and Royer-up ... and the Personal Con... are also represent...

In considering the selected case ... young man who attempted suicide ... an overdose of barbiturates - ... Ansbacher notes that Adler ... suicide as one of the extreme ... symptoms of mental disorder.

EXPERT ON ADLER

The UVM professor, considered ... authority on Alfred Adler and ... work, acknowledges that Adler ... believes that suicide is sometimes the action of the well-adjusted, but that such cases are "conspicuously rare." Rather Adler sees the per... most likely to commit or at... suicide as falling into the fol... "commonly recognized ... categories."

CAUSES OF SUICIDE

Pampered life style: suicidal ... develop in individuals ... "method of living, from ... childhood, has been depend... upon achievements and support ... others." They have a pseudo-... of their value to ... expect always favorable ... are poor losers, and are ... play the game as equal ...

2. Inferiority feelings and self-centered goal: Prof. Ansbacher ... Adler as saying persons in ... category have shown low self ... and describes the suicidal ... as "ambitious and vain," ... thinking is self-centered ... problem-centered. ... contemplation of suicide ... him the feeling of mastery ... life and death."

3. Degree of activity: the suicidal ... is apt to be a person of ... activity, Prof. Ansbacher ... in contrast to persons with ... neurosis or schizophrenia.

4. Veiled aggression: "The life style of the potential suicide is characterized by the fact that he hurts others by dreaming himself into injuries, or by administering them to himself," according to Adler, and occasionally suicide is combined with open aggression as in cases where it is preceeded by murder. Suicide, Prof. Ansbacher continues, can be taken as an act of reproach or revenge. In this respect, he says, it is similar to depression, alcoholism and drug addiction, all ... forms of veiled attacks on others who will have the sorrow or care. In suicide as in depression, the life-style employs complaints, mourning, and suffering to influence others by creating sympathy. "Thus we also find self-accusation and begging for forgiveness, which are often included in the notes left behind.

Applying the Adlerian view in the selected case in the book, "The Cry for Help," Prof. Ansbacher attained the highest consensus with the other writers. Specifically, the Adlerian view of the case found a high correlation with the viewpoints of Jung, Sullivan and Keller. The Freudian viewpoint received the lowest correlation.

The volume, published by McGraw-Hill, is edited by Dr. Norman L. Farberow and Dr. Edwin S. Shneidman, co-directors of the Suicide Prevention Center in Los Angeles, Cal. Work of the Center is described in the opening section of the 398-page book.

Prof. L. S. Ansbacher of the Sociology Dept. is shown here as an authority and consultant on the U.S.

PROFESSORES

I do not know whether the recently published comments in the "Avenging Angel of the Faculty" exterminated (A-extricated) the parasitic chaperones or not. I do know that the reason for resuming this symbiotic relationship is open as and that the best animals are restless. To relieve excessive anxiety I would like to offer a plan to the faculty for solving the chaperone problem in terms not quite so reminiscent of the fanatic utterances made in the Reichstag during the latter years of the 19th century.

This plan is based on the assumption that those involved in perpetuating the chaperonic system are people who do not want others to grow up, or who do not want to grow up themselves. In other words, all of the reasons for keeping up the system -- the provision of formidable role models, the wishes of the apocryphal "parents" the need to externalize and personify the undergraduate super-ego sample are inadequate, given what little evidence we now have.

I am the first to admit that mat-pherrnall a little hypocrisy does serve as the grease for the social machine. As far as chaperoning is concerned the lubricant has taken the form of a large vat of rancid chocolate fat, which may burst and drown us all. Consequently I propose that the suppliers of said lubricant, the chaperones, stop chaperoning in order that this infernal machine might come to a screeching halt. When this happens it just might be replaced with a better one.

Those interested in joining this movement may call or visit the headquarters of the non-violent anti-chaperone movement, Room 203, Old Mill. If enough members sign up we may just have our own little social affairs. (unchaperoned, of course.)

The Circular File

by MIKE GROSSMAN and DICK SNIDER

THE HUMANITARIANS

Once there was a great philosopher named Thoreau, who spent much of his time walking in the woods. One day while out walking, he came across a coal mining operation. Men were hard at work ... coal was coming up rapidly, and on the whole, it was an industrious scene. Thoreau walked over to speak to the mine's owner, who was instructing one of the miners.

"Why do you run this mine?" asked Thoreau.

"To make money, of course."

"To make money!", cried Thoreau contemptuously. "What a selfish, base creature you are. Have you no concern for your fellow man? Don't you ever think of working for the good of humanity?"

The owner remembered the teachings of the Bible, and of the world's great philosophers, and he was ashamed. "You are right," he said, "I have been selfish. But from now on, I will devote myself to helping mankind."

And so the conscientious owner closed his mine and sent his workers home. But now there was no place for them to work, and they became objects of the government's charity, having no source of income. But the virtuous man never thought of the problem he had created, and he set out to help the needy. He was quite successful, and became famous as a humanitarian philosopher. He was quoted as saying "Money is the root of all evil."

In fact, his influence is still with us, growing stronger every day. Quite often nowadays we hear of "the rich bastard", or the "rotten materialists." It is evident when our professors teach us to scorn the materialists, the capitalists; evident in the many students whose goals are undefined, but who speak of a "more meaningful existance through the hatred of the material and a love of the spiritual." And his influence is especially evident in the ideology of our great rebels, the beatniks.

The "beats" rebel against wealth, industry, and aggressiveness, for they are on the track of "something deeper." This something is in their dress, perhaps, or in their strict moral standards. But the beatniks do have an important value to us; they can serve as a horrible example of the decay which befalls a society of ambitious builders who are taught to scorn wealth and love the spiritual. They become parasites, living off the very wealth which they condemn as evil.

The dollar is a material symbol of man's capability. He acquires wealth in exchange for his services and/or knowledge. As the number of his dollars grows, so grows the amount of useful work he has done. Yet man is made to feel ashamed of his dollars. He must feel like a beady-eyed little man who cheats his way through life in order to own more money. And why? Because the humanitarians, who do little or no useful work, say this man is to be condemned. He should be scorned because he works for himself, they say, and therefore contributes nothing to the common good. But he has contributed much more than they, and is deprived of his rightful pride by those parasites who live solely on the efforts of his kind of men.

Far from being evil and something of which to be ashamed, the desire to make money is man's greatest virtue. For by earning this money, he does infinitely more good than any "do-gooder." He is the lifeblood of the country, sustaining both it and the humanitarians who slander him. It is this man who should revel, to be given credit for his achievements, rather than the beatnik. The man who advocates social legislation, to limit the profits of any one man, and thereby to spread that extra money among the needy, is to be looked out for: for that extra money will never come into existance. Moreover, fewer workers would have a livelihood under this so-called beneficial system.

If you are schooling to learn how to make money, not to "get an education," as the saying goes, don't be ashamed of it. So long as every dollar you earn represents one dollar's worth of your *honest* labor, that money will symbolize the greatest service you can render, your productivity.

AROUND THE COLLEGE CAMPI

Sportsmanship In Vermont

Special to The Cynic

Students of Vermont's three traditional football rivals [illegible] and Norwich - have once again drawn up a [illegible] code for good sportsmanship at the football weekends [illegible] ahead.

The agreement, signed by [illegible] Executive Board, the [illegible] at Norwich, President of [illegible] and Norwich are for Middlebury College Assistant Dean S. Stanton Sutton.

We are agreed that pride in alma mater, college spirit and friendly rivalry between colleges are healthy and desirable, and should be encouraged; however, we are also agreed that the image of proper conduct of a true campus or classmate, as well as proper manifestation of college spirit, do not include [illegible] and any student who is apprehended [illegible] subject to [illegible] action.

We also wish to emphasize at this time that the possession of consumption of alcoholic beverages is not permitted at football games held under the auspices of the colleges we represent.

U. Of Redlands

Redlands, Calif. - (I.P.) - Mid-term grades will be [illegible] part of the [illegible] at Redlands to all [illegible] this [illegible] part [illegible] "We feel that [illegible] that perhaps an [illegible] a few more [illegible] part of the [illegible] Mary Beth Smith.

Miss Smith added that the [illegible] at Redlands [illegible] all students [illegible] progress reports. An [illegible] reports, [illegible] with all of [illegible] "The [illegible] to [illegible] the [illegible] faculty members have given the [illegible] reports a [illegible] it will give the [illegible] grades to students who are failing. A number of faculty members are [illegible] that the reports are not as effective as they might be.

"The theory of the progress grades," said Dr. Smith, "is to give all students an evaluation of their class work. They will give a more positive approach to the old deficiency reports. A student who is working for an "A" will know his standing as well as the student who is failing."

Skidmore

Saratoga Springs, N.Y. - (I.P.) - The revision of the Honor System at [illegible] Honor Legislature. The [illegible] suggestions and [illegible] permanent [illegible] as a result of a [illegible] and [illegible] Legislature.

The Honor Constitutional Council, which was set up to [illegible] the rights of students, state the responsibilities of each girl to report herself to the Honor Board for any violation of the Constitution. Furthermore, she is responsible for reporting to a girl any violation she witnesses and encouraged to report a violation if [illegible] is involved or if she feels that Honor Board can give the most student help.

All violations of the Honor Contract are listed in the Handbook under Honor Board. These violations include basic college regulations such as unauthorized absence from college, smoking in areas other than designated, cars on campus without permission, abuse of library facilities, possession or use of alcoholic beverages on campus. Further violations are included under academic dishonesty and social responsibilities.

University Of Texas

Austin, Texas - (I.P.) - The Board of Regents of the University of Texas has adopted a Ten-Year Development Plan, which gives first priority to [illegible] needs for improvements in the instructional program will take precedence over everything else, President Harry Ransom said.

Essentially, the Ten Year plan is a strategy. It selects immediate points of attack to raise quality. It allocates anticipated financial resources and focuses the energies of staff members. It calls for a greater volume of work devoted to higher attainments.

Instead of a blueprint with rigid details and fixed time schedules, the Regents chose a flexible strategy allowing the University to seize opportunities sure to arise in fast-changing Texas.

"Selective expenditures coupled with intensive human effort" is the way University officials describe the plan's essence. Key to the entire plan is the use of non-tax funds (endowment income, private and governmental gifts and grants) to supplement basic operating appropriations from the Texas Legislature.

While money [illegible] suit of eminence eminence itself [illegible] by people -- and element is central Year Plan. The [illegible] ed deliberately more brains to the to create an atmosphere ductive to eminence can hand out on platter," the administration "All it can do springboard."

Of course, the could spend great profit during the years in its determination toward excellence. realism acknowledges that strict financial tions are necessary strategy of delay comes a strategy without.

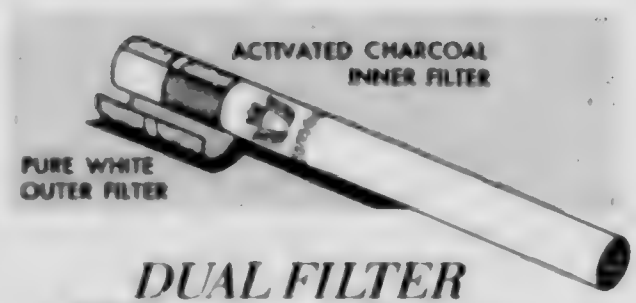
How the University intends to go about its opment program can be trated by using the University as a case Main University indicate how serious Regents were when that brains, not should be the University primary concern.

Between 1961 and Main University expects spend about $65,000,000 proving its instructional grams beyond normal support. Of that figure, some $55,000,000 will come the Available Fund income from the University Permanent Fund endowment.

By contrast, a $52,500,000 building at the Main University consume only $24,000,000 the Available Fund. The crucial role will be played by the Available Fund. Now estimates that the Available Fund will meet more than fraction of the [illegible] needs for the [illegible] System in the next 10 years but that fraction is [illegible]

Dartmouth

Hanover, N.H. - (I.P.) - Discussing some of the outstanding features of Dartmouth's unique three [illegible] three term plan, Dr. John Sloan Dickey, president of Dartmouth College, emphasized that "three courses are to courses less than five. your arithmetic is just faulty if you think for this reason the three-three plan means less work."



"Whether good or bad," observed, "the three old plan has unquestionably stepped up the academic of the campus. The has accepted the [illegible] in the number of courses an invitation -- indeed command -- to increase out-of-class demands on student.

"Under the old five two semester system," Dickey continued, "a professor with any memory makes allowances when dent tells him, 'but am taking four other besides yours!' But when professor knows the has only two other he rightly increases demands."

He sees the three plan's greatest potential the increased out performance of the student. "It offers students the portunity to realize goal of a college education experience, that is, a gressive disengagement the student from the with an increasing assumption by the student of the sibility for his own tion."

"Tareyton's Dual Filter in duas partes divisa est!" says turf king **Virgilius** *(Big Wheel)* **Plutarch.** "Try the Appian Way to fine tobacco taste – Dual Filter Tareytons," says *Big Wheel.* "From the Alps to the Aqueduct, we smoke them summo cum gaudio. Try Tareyton, one filter cigarette that really delivers de gustibus!"

It was a success.

Sigma Phi's favorite campus tag-a-long, Prince Rupert III, has decided to spend the winter semester in the Village.

All are welcome to AE Phi Fall Party, Saturday, October 7th, from 8:30 P.M. to 11:30 P.M. Band and refreshments are in store.

Sigma Nu welcomes back Dick Diefenbach from the Marines and Nils Andersen from the Army.

Sigma Nu's plans for a new addition are well underway, and are expected to be completed shortly. The addition will consist of sleeping and study quarters, a larger

In order to raise money for Eta Chapter's philanthropy, a scholarship fund, sisters and pledges of Tri-Delta sold apples at the Coast Guard game last week. Much fun was had hurling the big red apples into the stands from our little sales carts.

Lambda Iota Society commenced its 126th year of existence with the election of a new slate of officers, consisting of: President, Michael Klyszejki; Secretary, John Robinchaude; Treasurer, William Osborne; Assistant Treasurer, Dan Monte; House Manager, Ed Nadeau; Social Chairman, George Cronk; Publicity Director, Carl Buffum; Steward, Morris Leno; Assistant Steward, Paul Hazard; Athletic Chairman, Don Crandall; Champlain Master, W. Otto Heise.

Thanks from all the ADPi's to the Phi Delts for the great time we had at their recent exchange dinner.

An ADPi tea last Sunday was given in honor of Mrs. Elizabeth Grow, who has been the ADPi's housemother for the past two years.

Several vacancies left by senior ADPi's have resulted in some new officers: Activities-Education, Jan Woods; Panhellenic junior class representative, Marge Edwards; Guard, Nancy Thorn; Executive Committee members, Sue Firth and Marion Force. Returned to the Theta Chi fold after absences are: John King, Larry Dugan, Don Steele, Charles Church and Jan Jennett.

Outing Club To Sponsor Mountain Day

... October 8, ... Mountain Day, the traditional all-University outing whose origin has long since been obscured. As usual, the site of Mountain Day activity will be Mt. Mansfield, Vermont's highest peak. Well-known to skiers as one of the best eastern skiing areas and to thousands of visitors who use the toll road or lifts to ... the breath-taking view from the summit, Mt. Mansfield also has many other attractions which can be discovered only by hiking on its many trails.

Mountain Day this year will be held to the west side of the mountain, the side seen from campus. Starting from the Underhill Camping Area almost half-way up the mountain, the route will pass by the abandoned UVM ski jump, the site of the old Half-Way House Hotel, and a brief section of the old, and never completed, CCC Road planned to circle around the mountain. Then it will follow Sunset Ridge, with a short detour to Cantilever Rock, to the Long Trail a short distance below the clan. The route is quite open for the most part and offers many opportunities for photography. Slow, medium, and fast groups will be organized so that everyone, regardless of experience, can enjoy the trip. More ambitious hikers will have opportunities for a loot trip over the chin or two alternate return routes to the buses.

Operated for the Student Association by the Outing Club, Mountain Day is open to everyone at UVM free of charge. It is necessary to bring only a lunch. Cider and donuts will be provided on the mountain. Buses will leave Waterman at 9:00 Sunday morning and return to campus by 5:30. Mountain Day offers UVM students an opportunity to visit the top of Vermont.

Spirit Arrives At UVM

With the advent of the new football season, the first pep rally took place behind the cage Friday night.

... the cheers and shouts of the student body as they paid tribute to the men who would carry the green and gold to victory.

... the word was out to the UVM marching band and cheerleaders, as they led the cadets in the singing of "Vermont Victorious." With the arrival of Charlie Caramount and the stocking of the band, the students exploded with a spontaneous call to arms.

... was present to bestow his blessing upon the team. He also asked for student support of the team, since a team draws most of its strength from the cheers of its followers. Without this little boost, the job is made harder to accomplish.

The highlight of the rally was the introduction of the 1962 Cats, mounts by Polly Stone, who ... speech by coach Ed Donnelly, in ... he announced that the team ... win. To ... the students gave their support.

At the ... rally ... followed the Kappa Sig Jazz Band in a ... to victory. ... cadets ... and the ... Band ... and danced ... to let the town know that our team is the best. From Waterman to ... Main St. to ... St., they marched until the whole of Burlington was awakened to the spirit of UVM. Then dance finally came to a halt in front of Hotel Huntington, where they stood singing and cheering until the Cadets were brought to their feet by the might of the UVM student body.

Enrollment

(continued from page one)

He stressed that all qualified Vermonters who applied had been granted admission. This included 75 per cent of all Vermont male applicants and 85 per cent of all Vermont women applicants. However, while 71 per cent of all out-of-state men who applied were qualified, admission was offered to only 54 per cent. While 82 per cent of all out-of-state women who applied were qualified, only 59 per cent were offered admission, he said.

All who were admitted had applied prior to May 1, 1961, he said, "again indicating the kind of pressures facing young men and women seeking entrance to college."

This year's senior class has 589 an increase of 108 over last year's. The other classes are as follows: juniors, 643; sophomores, 850; freshmen 1,087.

The largest single increase of students is in the College of Arts and Sciences which totals 1,552. Other undergraduate totals show 735 in Technology; 541 in Education and Nursing; and 341 in Agriculture and Home Economics.

The College of Medicine has 192, a figure comparable to 1960.

The Graduate College continues to reflect a steady growth with 174 enrolled for 1961-62, 20 higher than last year.

Rounding out the enrollment picture are 93 as unclassified students; 44 in the two-year School of Dental Hygiene; and 51 as pre-clinic nurses.

Lane Series

(continued from page one)

lessons, plus a sprinkling of anxious mothers.

"The Music Man" will also bring its Lahoisse reputation, won in the hard competition of Broadway.

The Red Series is completely sold out. However, there are still good $13.00 and $16.00 available for the ... Series, which includes Dave Brubeck and the Broadway hit, "The Miracle Worker."

... sororities and fraternities ... hand in their society ... Thursday at 3:00 P.M. I ... that I were a mind reader, ... I'm not and I need your ... Thanx.

WRUV Is On The Air

This fall marks the seventh consecutive year that WRUV has served the students at UVM with programming designed for college students. Programs will vary from rock n' roll to classical with an emphasis on popular and mood music. Quiet music has been programmed at hours when students will be busy with studies.

Special programs are also on the schedule. For example: WRUV will carry Round-Table discussions, campus news, Spotlight UVM, weather services and Boris Karloff in TALES FROM THE READER'S DIGEST. These are just a few of the many special services offered by WRUV to each student.

Program schedules will be appearing each week in the *Cynic*.

WRUV will begin a full ... broadcasting this Monday at 7:00 P.M. On opening night there will be a special program including appearances by last year's d.j.'s. WRUV is located at 570kc on the dial.

Fine Arts At The Fleming Museum This Year.

The new ten months of the Fleming Museum's program of extensive enrichment, new exhibitions and events, as well as an expansion [illegible] for Museum members.

The exhibition schedule opens [illegible] with a stunning exhibit on the Champlain Basin called "Lands and Peoples." [illegible] the new Vermont Interstate [illegible] in the Lake Champlain Basin, the display is on loan from the Portland Society of Natural History. The program of [illegible] a memorable homecoming [illegible] Robert Frost, [illegible] to produce three recently unearthed [illegible] Frost's [illegible] on a lovely campus of the country's smallest and prettiest [illegible] seen in the State of Vermont.

[illegible] Curator and Exhibit Secretary will [illegible] a large assortment of African [illegible] from the Museum's [illegible] The exhibit has been [illegible] to arrange for the gallery [illegible] prior to [illegible] be presented [illegible]

The program opening Sunday, November 5, will feature a [illegible] by the Martha Graham [illegible] Museum of Contemporary Dance [illegible] will present a program of [illegible] dance.

A [illegible] retrospective of paintings and drawings by the contemporary American artist, Karl Schrag, is scheduled for January. This is a [illegible] exhibition [illegible] by the American Federation of Arts.

Further [illegible] to be announced in the spring bulletin, will include a large display of Civil War Drawings in a show originally assembled by the National Gallery in Washington.

The new film series is exclusively a membership program with no single admissions for individual programs. The change in policy, said Director Janson, has enabled the Museum to expand the series to eight programs and to broaden its content. The series will [illegible] famous films in the history of movie making, as well as art films, and recent foreign or unusual feature films that might otherwise be shown in Burlington. Two of the programs, one in [illegible] one spring, have been set aside as [illegible] programs. All programs [illegible] in the Museum's Arena Theater at 8 P.M. unless otherwise notified.

The first in the new series is "Vitelloni," an early prize-winning feature film by Frederico Fellini, director of "La Dolce Vita" and "La Strada." This film was originally scheduled for October 4 and has been moved up to Wednesday, October [illegible].

November 8, Mexican Director Luis Bunuel's version of Defoe's classic, "The Adventures of Robinson Crusoe," will be shown. A family program, it will be shown early, at 7:15 for the convenience of members who wish to bring children.

Four art films on Fragonard, Watteau, Goya, and Blake, are offered December 13 in connection with the Rococo exhibit.

Rene Clair's classic French comedy "A Nous, La Liberte," appears January 10.

The spring programs include "M," with Peter Lorre, as well as the original German film version of Kurt Weill's and Bertold Brecht's "Threepenny Opera." Produced in 1931 and starring Lotte Lenya, this film is often cited as one of the great landmarks in movie history.

Director Janson also reports visitors can expect to find some new things in the permanent exhibits. Several galleries were renovated during the summer. The Museum's American Room is also slated for renovation and a complete rearrangement of exhibits to make room for new acquisitions and to allow display of material that up to now has been in storage for lack of exhibition facilities.

La Dolce Vita: A Review

by Sheldon Rothberg

It is understood that when critically dealing with a work of art, the critic, be he a novice or a neophyte, is apt to encounter certain difficulties which may give rise to discrepencies in his judgment. Such is the case, I believe, with the critical attitudes concerning Fellini's film *La Dolce Vita* and the reason why professional and laymen alike have acclaimed this film to be an unqualified success. It is not. This is an impressive film. A film that because of its controversial nature and its complex structure leaves one with a sense of admiration, saturation, and bewilderment. But only in its impressiveness may we label it worthy of attention.

All too often critics make the mistake of not discerning between an enthusiasm and enjoyment of the analysis of an object and a true critical insight to the object itself. For instance, at a panel discussion given in conjunction with a series of foreign films shown at UVM this past summer the panel members were not at all concerned with the film they had recently seen as an artistic, unified whole. Rather the discussion proceeded along the lines of a bantering analysis of second rate symbolism and everyone was apparently overwhelmed with the myriad of symbolic samples they dredged up from the murky bottoms of this third rate film. In their enthusiasm, the excitement they found in performing this cinematic labotomy obscured their creative-intuitive opinion of the film and their judgment was fallaciously based upon a pre-occupation with the game of "who's got the symbols".

One might well ask how it is possible to ignore a type of analysis in obtaining better understanding of any art work. The answer is that one can't, but since for the sake of your readers [illegible] you are obliged to [illegible] objective about that which you are criticizing as is humanly possible. [illegible] discriminating [illegible] know whether or not he enjoyed the process [illegible] and this has [illegible] focus on or, whether [illegible] seen some artistic [illegible] ment, a unique and [illegible] tribution to the world [illegible] being responsible for [illegible]

This latter choice [illegible] sible for "Vita's [illegible] praise. The three [illegible] orgy of symbolism [illegible] did not accomplish [illegible] what Fellini set out [illegible] is, he has stated, to [illegible] western society and [illegible] the decadence of that [illegible] Fellini's two other [illegible] films, *La Strada* and *Cabiria*, he shows how [illegible] occupation with innocence [illegible] tion and decadence [illegible] element which with he [illegible] in "Vita") can be found [illegible] jected upon an empathetic [illegible] by the vivid creation [illegible] characters, (a comperative [illegible] vice since he does not [illegible] agility when dealing with [illegible] cinematic techniques), [illegible] this was Fellini's mistake [illegible] that using his fine craftsmanship [illegible] for creating characters [illegible] which in "Strade" and "[illegible] enabled the films to [illegible] their intention, he went [illegible] directing his not too capable [illegible] to the other techniques [illegible] cinema, ergo, confusion [illegible] security of his original [illegible] other words, because the [illegible] demonstrated an orgiastic [illegible] nique this does not necessarily [illegible] contribute to Fellini's [illegible] make his viewers sympathetic [illegible] his philosophy – this takes greater control than he was obviously able to muster.

An analysis of the [illegible] structure of *La Dolce Vita* reveals that Fellini utilizes two universally accepted symbols, the landscape of sea, as a foundation to [illegible] decadence. The sea, representative of primitivism and nature, is sharply contrasted with [illegible] images representing intellectual society, and the decadence of man. The film opens with a sequence in which a helicopter follows [illegible] another helicopter which [illegible] statue of Christ slung beneath it flying to St. Peter's Square. Impressively looming in the [illegible] diate background is a crumbling aquaduct that two thousand years ago supplied the city of Rome with water–the sumbol for [illegible] cence. Now that structure [illegible] state of disrepair. Fellini [illegible] continues in an episodic fashion corroborated by the [illegible] images and the aid of the protagonists, Marcello and entourage, to exploit his theme, ending [illegible] ly back at the water with a monsterous fish that has been [illegible] on the beach and lost [illegible] (the young girl) shouting [illegible] the impassable water to Marcello.

This reviewer has not, because of limited space, been able [illegible] tematically exploit the [illegible] imagery which are so [illegible] essential to the understanding of *La Dolce Vita*. For [illegible] review of the film must necessarily be incomplete and deficient on this account.

It appears that Fellini has used three stereotypes of people that exist in all western society, [illegible] innocence (young girl, Steiner), innocence corrupted (Paparazzo Marcello; Iris the poet and her three oblivians–nymphomaniac and bed; Emma, and Maddalena the nymphomaniac) and [illegible] educated (Steiner). Fellini's failure is his cynical inability to recognize any socially [illegible] constructive human trait [illegible] naive innocence and antiseptic perception. Steiner seems to represent Fellini's conception of an intermediate stage, but [illegible] cially dormant and in the end of little use to society, [illegible] refuge form the harsh reality of existence first in the form of absorption in art and [illegible]

THE GIRL I LEFT BEHIND ME

It happens every day. A young man goes off to college, meeting his future lovely sweetheart with bonds of eternal love, and then he finds that he has outgrown her. What, in such cases, is the honorable thing to do?

Well sir, you can do what Rock Sugafoos did.

When Rock left Cut and Shoot, Pa., he said to his sweetheart, a simple country lass named Tess d' Urbervilles, "My dear, though I am far away in courage, I will love you always. I will never look at another girl. If I do, may my eyeballs parch and wither, may my viscera writhe like adders, may the moths get my new tweed jacket."

Then he plucked Tess to his bosom and planted a final kiss upon her fragrant young throat and went away, meaning with all his heart to be faithful.

But on the very first day of college he met a coed named Fata Morgana, a girl of such sophistication, such poise, such sheer fuzz as Rock had never beheld. She spoke knowingly of Franz Kafka, she hummed Mozart, she smoked Marlboros.

"You can hit me in the stomach if you like."

Now, Rock didn't know Franz Kafka from Pancho Villa, or Mozart from James K. Polk, but Marlboros he knew full well. He knew that anyone who smoked Marlboros was modern and advanced and as studded with brains as a ham with cloves. Good sense tells you that you can't beat Marlboro's exclusive crocetate filter, and you never could beat Marlboro's fine flavor. This Rock knew.

So all day he followed Fata around campus and listened to her talk about Franz Kafka, and then in the evening he went back to the dormitory and found this letter from his home town sweetheart Tess.

Dear Rock,

I a kids had a keen time yesterday. We went down to the pond and caught some frogs. I caught the most of anybody. Then we hitched rides on trucks and did lots of nutsy stuff like that. Well, I must close now because I got to whitewash the fence.

Your friend,
Tess

P.S.—I can do my Hula Hoop 3,000 times.

Well sir, Rock thought about Tess and then he thought about Fata and then a great sadness fell upon him. Suddenly he knew he had outgrown young, innocent Tess; his heart now belonged to smart, sophisticated Fata.

Rock, being above all things honorable, returned forthwith to his home town and walked up to Tess and looked her in the eye and said manfully, "I do not love you any more. I love a girl named Fata Morgana. You can hit me in the stomach with anything you like."

"That's okay, hey," said Tess amiably. "I don't love you neither. I found a new boy."

"What is his name?" asked Rock.

"Franz Kafka," said Tess.

"A splendid fellow," said Rock and shook Tess's hand, and they have remained good friends to this day. In fact, Rock and Fata—they don't live state with Franz and Tess and have heaps of fun. Franz can do the Hula Hoop 6,000 times.

GRE's To Be Held

Princeton, N.J., September 8: The Graduate Record Examinations, required of applicants for admission to a number of graduate schools and by an increasing number of donors of graduate fellowships, will be offered in the National Program for Graduate School Selection to be conducted at examination centers throughout the country five times during the coming year, Educational Testing Service has announced. In the five administrations conducted during 1961-62, more than 32,000 candidates took Graduate Record Examinations in connection with admission requirements to graduate schools which prescribed them.

The fall candidates may take the GRE on Saturday, November 4. In 1962, the dates are January 20, March 3, April 28, and July 7. ETS advises each applicant to inquire of the graduate school of his choice which of the administrations he should take and on which dates. Applicants for graduate school fellowships are often asked to take the designated examinations in the fall administration.

The GRE tests offered in these nation-wide programs include a measure of general scholastic ability and advance level tests of achievement in sixteen different subject matter fields. According to ETS, candidates are permitted to take the Aptitude Test and/or one of the Advanced Tests.

A Bulletin of Information (in which an application is inserted) gives details of registration and administration as well as sample questions, and may be obtained from college advisers or directly from Educational Testing Service, Princeton, New Jersey, or P.O. Box 27896, Los Angeles 27, California. A completed application should reach the ETS office at least three weeks before the date of the administration for which the candidate is applying.

New Sorority

particular campus to organize such a group. This would not be helpful to any group presently desiring the formation of a new sorority.

It should also be noted that no sorority may remain on campus if its constitution contains any clause which restricts its membership by some requirement as to race, religion, or national origin.

If there are any such interested groups we suggest they contact the Panhellenic Council or the Dean of Women's Office. Please address any correspondence to:

Marge Coleman,
Panhellenic President
COSA Office --- Waterman Building

or if you wish to reach the Council by phone call Marge at 2-2928.

Floating University To Be Readied In 1962

The University of the Seven Seas, a new concept in education, is being readied for its first round-the-world voyage, and will depart from an East Coast Port in October of 1962 with 500 students and thirty-five faculty members.

The brainchild of William T. Hughes, California industrialist, the University was originally sponsored by the Rotary Club of Whittier, California. Since then it has become a not-for-profit corporation devoted to education and chartered in the State of California.

Home of the University will be the S.S. Jerusalem, of the Zim-Israeli Company, a recently constructed ship which is completely air-conditioned and equipped with stabilizers. Comfortable accomodations, ample space for classrooms and study areas, plus the elimination of roll make the ship an ideal educational headquarters.

The first semester trip, October 1962, will be from an East Coast Port around the world to a West Coast Port. It will include stops in many countries including: Liberia, Ghana, Nigeria, Union of South Africa, Mozambique, Kenya, India, Ceylon, Malaya, Formosa, Japan, Hawaii, and, finally, a port on the West Coast of the United States. Here the students will leave the floating campus, and return to their various colleges and universities throughout the world.

At the end of each semester, the work of the student body will be evaluated by an impartial committee of educators selected from the faculty of colleges and universities throughout the United States and Canada.

Because of the tremendous response to the initial announcement, it is obvious that competition for admission to the University of the Seven Seas will be keen. Each applicant, therefore, will be carefully screened, and will be expected to have high academic standing, and to demonstrate seriousness of purpose, good character, and reasonably mature conduct.

Cost of the one semester trip, lasting 122 days, will range from $2,500.00 to $3,500.00, depending on the kind of accomodations selected. This includes room, board, and tuition, as well as all trips arranged in foreign ports by the faculty.

Although no scholarships are available at this time, it is planned to establish a Scholarship Endowment so that in the future deserving and capable students may not be deprived of the opportunity to enroll.

Briefly, the mission of the University of the Seven Seas is to present an educational challenge to the problem of man in his world using the insights of his nation and cultures.

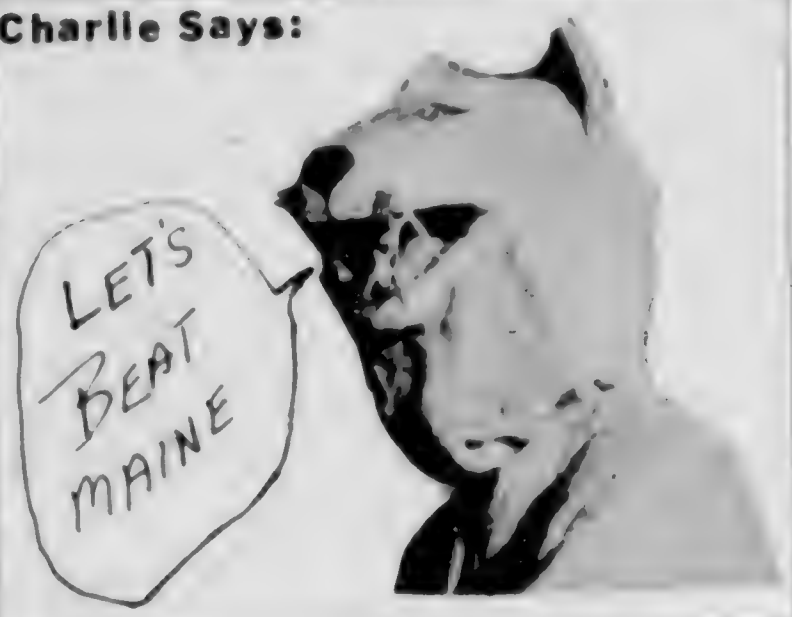
Golf Team Plays Today

We Did It!

Cats Tromp Cadets

Ed Donnelly's gridsters, looking like a brand new ball club, began the 1961 campaign with a 28-8 trouncing of the Coast Guard Academy. The sophomore-laden Cats played on even terms with the Sailors for the first seven minutes, then broke the game wide open. Tom Perras took a handoff from quarterback Chris Greer and galloped off tackle for 63 yards to the Coast Guard 17. On the next play, fullback Leo Davin snatched a pitchout and dashed around left end for UVM's first score of the season. The Cats then attempted a two point conversion, but it failed when Greer was dropped behind the line of scrimmage.

The Green and Gold [illegible] again in the second [illegible] marching sixty yards in [illegible] plays. Paul Toussaint [illegible] Maynard Ducatte loose [illegible] right end with a block that [illegible] moved two would-be tacklers out [illegible] permitted the Duke to make [illegible] the Cadet's 33. Davin then [illegible] vanced to the six on the same pitchout play that had [illegible] earlier. Captain Bob Stone [illegible] a key block to send Davin [illegible] way. Three plays later, Greer took the pigskin over from the one on a keeper for UVM's [illegible] ond TD. Davin swept around end for the two point conversion.



Coast Guard picked up its lone score in the waning moments of the first half. The Sailors, receiving a Vermont punt on the 50, marched deep into Catamount territory in only three plays. Due to the bull's-eye aim of quarterback Larry Dellaire, who chucked for better than a 75% completion average. Then Bob Haldeman, substituting for Dellaire, shook off a horde of UVM tacklers and threw to end Jim McCarm for the touchdown. Haldeman proved himself an able player when he attempted the conversion. Going for two points, he dropped back to pass, but couldn't find a receiver. He then dodged Green and Gold forms to reach paydirt as the half ended. The score read Vermont 14, Coast Guard 8.

The second-half play was dominated by the Cats, although the third score saw no [illegible] UVM's third tally came on a [illegible] yard pass play from quarterback Greer to halfback Bill [illegible] On the third down, with [illegible] yards to go, Greer rolled out and threw a twenty yard pass to Fleming. Bill snatched the ball from CG's safety man and raced the remaining 43 yards to the end zone. Vermont again failed the two point conversion [illegible] failed.

The Cats added a final touch late in the last [illegible] Don Parlato, running the [illegible] in place of Greer, connected with end Bill Burke for the last score of the afternoon. Parlato scooted around end for the [illegible] This completed the scoring, Vermont on top, 28-8.

Credit must be given [illegible] members of the squad [illegible] class of '63. On the [illegible] UVM's future Yankee Conference grid hopes. The fine [illegible] ship of Chris Greer, Leo [illegible] and Tom Perras in the [illegible] John Fyfe, Olie Thorell [illegible] Paul Toussaint on the [illegible] foretell great seasons [illegible] Donnelly. Credit is also [illegible] other members of the [illegible] squad for their fine performance on Saturday afternoon.

Charlie Says:

Tim Simpson X-C Captain

[illegible] collegians gather on the UVM campus and discuss [illegible] the name Tim Simpson is bound to be the prime subject of discussion. Tim is captain of UVM's 1961 cross-country team. [illegible] Vermont, where he established a reputation [illegible] record.

[illegible] Tim first came at UVM he set a freshman cross-country record [illegible] pace.

[illegible] the end of [illegible] Tim competed in the NAIC cross country finals, the most [illegible] the [illegible] gang, and the [illegible] finals. Tim is considered [illegible] cross-country standout [illegible] at St. Lawrence and was picked [illegible] was chosen captain of next spring's track team.

Tim's favorite sport is track, and [illegible] a good [illegible] he also enjoys skiing and can be found off [illegible] on the [illegible] mountain.

[illegible] anticipating the coming [illegible] track season [illegible].

[illegible] "We have three [illegible] year and I think we can [illegible] it again this year. All [illegible] have gone [illegible] year. We should [illegible] the way, even [illegible] Maine will probably be at least [illegible] we will have it next [illegible] Maine.

"With the [illegible] I have on the team we should [illegible] the Yankee Conference [illegible] New England Championships."

Post Says:

[illegible] October 7, 1961, the UVM cross-country team journeys to Rensselaer Polytechnic Institute in Troy, New York, for the first meet of the 1961 season. Last year UVM defeated RPI in a score of 15-44. According to coach Archie Post, "We lost it last year and I think we can do it again."

Participating in this first varsity [illegible] meet are: returning lettermen Harold Billings, 63, Steve Russell, 63, Tim Simpson, 63, William Stellmon, 63, William Perkins, 62 and Hugh Spellacy, 62. Also participating are: Harvey Lewis, 62, Dave Hubbard, 64, Gary Marsh, 64 Ian Morrison 64, and William Mulberry, 65.

"The varsity team looks very good this year," says Coach Post, "as of now we have had no [illegible] but I'm sure we have a good [illegible] team.

We also have a very promising freshman squad. At the present time of the year is beginning [illegible] speed and stamina. The team consists of [illegible] Mike Nash, Steve Mayhew, Bill Jackson, Steve Lagoni, [illegible] Bruce Bentley, [illegible] Edward Hooper, Bob [illegible], Phil Parker, Dave Eastman, A. Lowe, Fred Trigg and Fred Bunn.

There are three more things that I would like to say. Namely that Maine will be our toughest opponent, and I hope we can beat them. The second [illegible] meet is Saturday. The team with the most points on the winner, because each team [illegible] the results [illegible] the meet as the places. The first and second places [illegible] and 3, and 5th and 6th [illegible] 7, 8 [illegible].

I would also like to mention the fine [illegible] that [illegible] Dave Sargent, '64, Bob Lawson, '63 and Peter Taylor, '63.

Sportorial

BY BOB BERNARD

At the beginning of each semester all freshman and sophomore male students are subjected to the Couzen's Test. The fairness of this test as a basis for exempting students from the physical education program has been questioned by many.

The individual is subjected to four tests. The "obstacle course" is used as a relative index of coordination and agility. The broad jump gives an indication of body coordination and leg power. Both the bar snap and the dip shows arm and shoulder power. The student is given three attempts and his best mark in each event is recorded. Grades are determined in a relative basis. The individual's height and weight are also recorded.

This series of tests has been determined over a period of many years to be the most efficient way of exempting students from the physical education program. At present, men must be eliminated from the program for two reasons: lack of facilities and minimum staff power. This test also gives the various physical education instructors an opportunity to measure an individual's performance through a period of four semesters. It also affords an additional facet for grading. Those students who fail to take the Couzen's Test are penalized five points on their final grade.

After the new gym is built, the situation will change. Tentative plans have been made to use the grades obtained on this test as a basis of electing a course. In other words, a high score will indicate a high physical proficiency, and hence the student will be given more leeway in choosing a physical education course that is to his liking. A lower score might indicate the necessity for the further development of certain skills, and hence less of a choice would be possible. No male student, unless physically unfit, will be exempt from taking four semesters of physical education.

Swimming will play an important role once the new gym is built. All male students will be required to pass a swimming test before fulfilling his physical education requirements. Corrective classes in physical education are also planned if both the facilities and staff become available.

Records from the Couzen's Test have been compiled from before and after World War II and are going to be used in a doctoral study.

Grad School Tests Given

Seven "big" examinations will be given at the University of Vermont between Saturday (Oct. 7) and Feb. 1.

Exams and the dates given are: Dental Admissions, Oct. 7; Medical Admissions, Oct. 21; Graduate Record, and Law Admissions, both Nov. 18; Dental Admissions, Jan. 6; Graduate Record, Jan. 29; and Graudate Study in Business, Feb. 1.

All are day-long examinations.

CORRECTION: The news release of September 8 regarding the Law School Admission Test stated that the test is administered in a single morning session and that it is exclusively a test of aptitude. Beginning with the administration of November 18, 1961, the TEST WILL REQUIRE A FULL DAY, MORNING AND AFTERNOON. The afternoon session will include a test of writing ability and a test of general background both of which are achievement tests. Full details are available in the Bulletin of Information which can be obtained by writing to Educational Testing Service, Princeton, N.J.

SA Representation To Be Revised

At a recent meeting the University of Vermont Student Association Council discussed proposals for student representation under the proposed new SA Constitution. The aims of the Council in determining this representation are: to base the student representation on meaningful living units; to improve communication by an efficient operating Council.

The proposal which was accepted by the Council and which will be presented to the student body with proportionate votes by population. According to this plan, there will be 39 members on the Council -- each member representing a living unit. Each living unit, including dormitories, fraternity and sorority houses and down-town apartments, will be represented, with votes proportioned to the number of students living in each unit. The officers -- a president, vice-president, secretary, treasurer, assistant secretary, and assistant treasurer -- would be elected campus-wide.

On the suggestion of the Library Committee, the SA Council decided to sponsor group discussions in the various living areas to inform the students about the moving of books from the Billings Library to the Bailey Library later this fall. The Library Committee hopes to get maximum student support for this undertaking.

Atomic Energy Exhibit To Visit

A U.S. Atomic Energy Commission mobile exhibit already viewed by millions of Americans will travel through Vermont during November and part December under the auspices of the Vermont Jaycees and the University.

The four Town and Atom exhibit features a wide variety of displays of atomic energy with emphasis on peacetime uses of the atom.

State chairman of the Jaycee project is Edward J. Comolli of Barre, who announced that the mobile exhibit will make its Vermont bow in Barre on Nov. 7 and 8, and swing through 15 Vermont communities before leaving the Green Mountain State Dec. 10.

Comolli said the exhibit, prepared by the Museum Division of the Oak Ridge Institute of Nuclear Studies, would be manned by a representative of the AEC and by local Jaycees in each of the communities visited by the unit.

The Jaycees will welcome hearing from groups and individuals interested in arranging special showings of the exhibit as well as from groups who would like to arrange speaking engagements for the exhibit's manager.

The exhibit will be in Burlington from November 28 through November 21.

Guy W. Bailey Memorial Library To Be Dedicated

Symposium To Follow

Above is the library under construction.

The dedication of the new library will take place Saturday, October 21, at 9 a.m. President John T. Fey will be the principle speaker at the dedication of W. Bailey Memorial Library, named after the former president of UVM who served here from 1920 until his death on October 22, 1940. A Symposium in the Ira Allen Chapel at 10 a.m. will follow the dedication.

The theme of the Symposium is "The Challenge to Scholarship." This is an academically oriented program whose purpose is to indicate that the library is a tool of scholarship for both students and faculty. It is also a means of showing the students of UVM that we have our own campus scholars right here. The speakers at the Symposium are representative of three general areas of study and these people are all on the UVM faculty. The Sciences will be discussed by Dr. Paul A. Moody, Professor of Zoology, and Chairman of the Department of Zoology; Professor Paul Evans of the History Department will speak on the Social Sciences, and the Humanities will be represented by Professor Herbert McArthur of the English Department, who is also chairman of the Library Senate Committee. In addition to these three speakers, there will also be an outside scholar, Roland H. Bainton, Professor of Ecclesiastical History and specialist in Reformation History at Yale University. The University Council has excused all students from 10 to 11 a.m. classes in order that they might attend this symposium. It is open to all students and faculty, and to any parents who will be here for Homecoming.

When Billings Library was built in 1885, there was a total enrollment of 354 students and the facilities were more than adequate to meet the needs of them at that time. However, the enrollment has grown to 3,250 this year, and although the student body is not [illegible] seat approximately 20-25 per cent of its undergraduate enrollment (now, 3,169). Billings, with its seating capacity of 175, is hardly enough. The Bailey Library, a four story, brick, marble and trimmed building, will have seating for approximately 500 students, including many individual reading tables for study.

In 1885, Billings Library housed 30-35,000 volumes with shelf space for twice that many. At present the library has approximately 220,000 volumes, exclusive of the Medical College Library, scattered in different places over the campus. Bailey Library has the capacity to shelve 500,000 books, and this figure can be expanded to 800,000 with no new additions to the building. The present acquisition rate of new books is over 12,000 volumes per year. A Faculty Committee has been formed for the purpose of establishing a long range planning program for improving the library in quality and quantity.

There will be both open and closed stacks in the new library. All regular books which are now open, will continue to be open. Those open stacks will be arranged in groups so that the user will study areas in between. However, the periodicals, now located in the basement of Billings, will be placed in a closed stack to prevent [illegible] from carrying periodicals home, but the latest issues of periodicals will be open and no permission will be needed to use them.

There will also be a special collection area in the new library. This will include the Wilbur Library, the Marsh Library, which is the personal library of George P. Marsh, a pioneer interested in the physical sciences especially geology, and language, literature, and also the first American edition to date in 1871 of Tennyson's Idyls, a collection of

FACULTY SEMINAR

[redacted] for a specific period. The topic of study this fall is Buddhism in China and Japan. Dr. McArthur's most recent purchase is a library from the Institute of Pacific Relations in New York.

N.W.S.P. BENEFITS STUDENTS

The knowledge from the political, religious, economical, historical and moral backgrounds obtained from the books Dr. McArthur has selected, are benefiting the students two-fold. The faculty, through their extensive study and utilization of these accumulating books, are able to offer this knowledge, each in their respective fields to the student.

The influence of this program is already evident in many courses. English 25 World Literature, has substituted for their standard Latin classic, an Indian Masterpiece, *The Bhagavad-Gita*. These books are also available to the students after the faculty has completed their study.

EDUCATION

In addition to his participation in the N.W.S.P. Dr McArthur is himself a very interesting man. Originally a native of the South, he attended school first at Chattanooga Tenn. and later completed his education at Harvard University. In 1953 he received his PhD. Entering now the twelfth year of teaching at UVM, Dr. McArthur has never known an unchallenging nor an unstimulating year. The courses under his direction are: Advanced Creative Writing, Creative Criticism Old English, and Modern English.

The Dominican Republic A Nation In Transition

By Ed Kritzler

[illegible] throwing the weapons of the opposition onto the [illegible]

All would be quiet and tense for a few days, [illegible] suddenly, something would errupt -- a riot, [illegible] brutality, a spontaneous demonstration. At [illegible] it would happen; there was no way of telling [illegible] after day I would spend at the different [illegible] the opposition, just waiting. The time would [illegible] and generally when something did occur it [illegible] where I wasn't. A few times, however, I was [illegible]

THE KID AND THE PROFESSOR

It was a Friday, the second week in August. [illegible] past five days nothing had happened. The days [illegible] dragging, and I was hot and bored. At 10:00 I [illegible] boarding house to go for a swim at The Ambassador [illegible] of three resort hotels - all of which are now [illegible] tically deserted)' Usually I had been able to [illegible] way just the manager and into the pool. That day, [illegible] ever, he was adamant-- either pay a dollar or [illegible] Nothing I said swayed his decision so after ten [illegible] I left.

It was nearly 11:00 when I got back to the [illegible] stopped in at the open cafe I frequented often. [illegible] place is a big hangout for students and is located [illegible] rectly opposite the headquarters of *Union* [illegible] leading opposition group).

I ordered my orange juice (it's amazing how [illegible] better the fresh stuff is), and sat down with [illegible] I had met earlier. The place, as always, was alive [illegible] talk. Fifteen minutes later all conversation had [illegible] ly ceased. The police had surrounded the cafe: [illegible] half of them were cradling sub-machine guns [illegible] arms. Immediately, their leader stepped forward [illegible] shouted in a tough voice something like, "Come [illegible] so we can kill you!" In answer, a young student [illegible] next table sprang up yelling -- "It's easy with [illegible] -- Put them down, and then let's see how big you [illegible]

Before he had finished eight *policas*' were [illegible] him with their clubs. A man (whom I later found [illegible] one of the student's professors at the University [illegible] to the boy's defense. It was useless. The police [illegible] beat him also.

In the meantime, the rest of the police had [illegible] forming a circle around the brutal scene. They [illegible] there with their sub-machine guns holding everyone [illegible] at bay. Everything happened so fast, that [illegible] could fully comprehend what was taking place, [illegible] over. As the police left, an ambulance came to [illegible] boy and the professor away. While this was going [illegible] two other similar scenes were taking place in [illegible] parts of the city. The police were on the loose [illegible] ing whomever they wished. That night, what I [illegible] in my opening article took place. Five hundred [illegible] gathered to condemn the police brutality. It was [illegible] ess. Within a minute after the first cry of [illegible] the police and cabinets (government spies) decended [illegible] the crowd Undgeconing everyone they could get [illegible] hands on.

THE RAID

The next morning I awoke early, grabbed my [illegible] set out. Further repercussions of yesterday's [illegible] were bound to take place, and if possible, I [illegible] get them on film. I decided the best place to [illegible] the cafe where it all started. I soon found out, I [illegible] the only one who figured along these lines. The [illegible] surrounding the cafe was jammed with people. [illegible] was waiting for something to blow. You just knew [illegible] things had to happen - but when? When? The [illegible]

Pros And Cons Of Rise In Tuition

[illegible] arising from last week's article concerning the tuition raise has developed into a [illegible] sides. This is the first time many students have become aware of the recent financial change in the University. To most, the slight rise was unnoticed; to some, it is a very important change; but to all, it seems to have raised a much [illegible] question . . . Is Vermont supporting its students, or are the students supporting Vermont? The differing opinions concerning this problem have been frankly, and even belligerently, voiced by the student body.

WHO PAYS MORE?

The most recurring questions [illegible] was "Why isn't there a [illegible] in the Vermonters' tuition [illegible] the out-of-staters?" The [illegible] student pays practically [illegible] and is offered scholarships and loans, while the New York [illegible] student pays a higher price with little [illegible] for financial aid from the [illegible].

The out-staters fire back, "It must be kept in mind that this [illegible] is first of the people, by the people, and for the people of Vermont." The out-of-staters [illegible] with, "Why should WE send the Vermonters to school?"

BOTH PAY MORE

If the financial statistics in last week's Cynic article had received proper attention, this question might be absolved. In accordance with the out-of-state rise . . . the state of Vermont has matched it with an increase in appropriations to its University, and additional endowments for current construction projects. En totum, it becomes apparent that the State of Vermont does contribute sufficiently in ratio to the support of its students.

MORE THAN MOST

One more important question was voiced by the students, and once more it was the students themselves who sought to answer it. "Doesn't Vermont have the highest out-of-state tuition of any New England State University?" statistics do seem to bear it out as one of the highest. Yet, one out-of-stater (a turncoat) brought to light that the Vermonters themselves now pay anywhere from $200 to $300 more than other in-staters do at their respective Universities. The U. of Mass. sets $100 as its [illegible] standard, U. of Maine demands only $200 for its in-staters.

There can be no victory then, [illegible] these warring 'staters.' [illegible] from BOTH groups are [illegible] the highest of New England [illegible].

AN OUT-OF-STATER

[illegible] Freedman, contributes [illegible] financial drawback to Vermont's taxable population. "Considering the tuition of UVM to [illegible]-grant institutions loses [illegible] the fact that Vermont does [illegible] the taxable population, as [illegible] Universities of Mass. and [illegible] to support a growing [illegible]. This, shouldn't it equally [illegible] to compare the student cost [illegible] University to that of others? [illegible] must draw from its students, both in and out-of-staters, the [illegible] necessary to maintain its [illegible]."

TONIGHT - 8:00

The Dominican Republic

(continued from page two)

boiling over. Everywhere you looked groups of people were talking in low whispers. After arriving at the park for a couple of hours, I left to see the Palace area going further down Avenue. Before I had gone half a block, a voice from above called out to me. Looking up, I recognized one of the leaders of the *Catorce de Junio Partido* (14th of June Party) standing on a patio overlooking the street. He asked me to come on up. As this would enable me to get a composite picture of what was happening below, I raced up the stairway to what I thought was his apartment. It was not. It was the new headquarters of the *Catorce de Junio* and covered the whole third floor. The sight that greeted me at the top of the stairway threw me for a second. More then one hundred men were standing around with knives, [illegible] tire irons, crowbars and various other gentle items. Somehow, I ingeniously deducted that something was up -- brilliant huh? Anyhow, the man who had called came over and said to me' -- "Today, if anything happens it's not going to be onesided." He was wrong. Five minutes later the police raided the place.

Twenty-three *policas* raced up the stairs toting their, now familiar, sub-machine guns. All of the opposition was herded into one large room. Here, one by one, they were thoroughly searched. Nineteen *policas* blocked off the street and six more were stationed at the entrance to the building. No one was allowed near the place, and no one, including me, was allowed out. I was searched along with the rest, but when it was explained to them I had nothing to do with this, they permitted me to do as I wished. I went out onto the patio and saw the man from *A.P.* trying to get through the police line. He was not successful. I called to him, explained to him what had happened, and told him I'd act as an intermediary if he had any questions he wanted answered. For the next twenty minutes I was conveying messages back and forth and going through three rolls of film (I'm still amazed as to why they did not confiscate my film, or or at least stop me from taking any pictures).

[illegible] the weapons arsenal [illegible]

After all the men had been searched and their weapons loaded into a police van they were hauled off to jail.

THE REPORTING OF THESE INCIDENTS

The next day the government-controlled press gloatingly recounted what had occurred and announced the government was generously releasing the members of the *Catorce de Junio* with nothing more than a severe warning. It sounded pretty good - that is - until you read the other articles describing Friday's incidents. Of these, the press proclaimed something to the effect that the Dominican people owe a debt of thanks to their speedy and efficient police force for bringing to a halt all the trouble instigated by the opposition. It went on to describe the police's heroic public service. As for the boy, the professor, and the 500 students - they were the troublemakers, the enemies of every decent law-abiding citizen.

The editorial of the day expressed the idea that the events of the past two days cannot be allowed to continue. If they do, it will be obvious that the government will have to clamp down on the unruly opposition. The Dominican Republic can ill afford democracy of this type.

The Vermont Cynic

Editorial:

Book Store

The University is fortunate in having its bookstore under new management this year in that Mr. George Piper is gone. Now mind you, Mr. Piper has already had lodged several charges that have been needed for years. He has increased the book display area, opened a mailing counter, and streamlined the check-out counter system for faster service.

These charges are in order, and Mr. Piper deserves credit for initiating them. There are, however, improvements which are badly needed, and which have not yet been attended to. Some are in Piper's domain, and others must be attended to by those "higher up" in the administration.

As in any store, the first considerations of the consumer are price, quality, and variety.

In price, the store is not good-- neither is it awfully bad. Notions are generally slightly higher than in the large Burlington stores. Mr. Piper has indicated his desire not to be undersold on any product. Perhaps he will be successful in realizing his wish. But in books, the store is, or was, undersold. New books are sold at the manufacturers' suggested prices, and used books are sold for 75% of that price. Last year the Student Christian Association was selling used books for 66% of list price. This year SCA was informed that the University Store would handle the used book sale. The 9% student loss is the store's gain. We would like it back.

It is claimed both in the store and in administrative circles, that the primary function is to serve the students, not to make a profit. Yet in 1960, the University Store earned a net profit of $5,300. Lower book prices start here.

In variety of products, the UVM Store must be ranked as poor, and it will remain so until larger space is found for it. A good book store has a title for every student enrolled in the school. Ours has half that many. Few more can be added until the present inadequate space is expanded.

In service, the store presents a complex problem. On one hand, the present service is courteous and efficient. On the other, it is run almost entirely with outside help. There is only one student employed by the store. With increased tuition and rising living expenses, a job in the store could help many struggling students stay in school. The argument used against this is that student help is not reliable. Yet most students manage to hold down jobs at Saga foods, and in stores and gas stations in Burlington. Consider also that there are colleges and universities in the country where the entire store is run by students, from the manager on down. UVM offers business courses where students are trained for just such work. Why should they not be able to get practical experience and at the same time pay for part of the expenses of education by such work.

The Cynic submits to the directors of the University Store these suggestions:

1. Lower the prices of new and used books. If this this means cutting into the profit, then that must be done.

(Continued in this page Col. 1 and 2)

Letters To The Editor

New Calendar

I would welcome the opportunity to serve on a faculty committee that would study the proposed calendar. This committee ought to be nothing more than a committee of the whole. I have some ideas that I would like to contribute to the discussion.

I have gone on the record on this question at various times in the past, but I now feel it necessary to raise my voice again.

Personally, I don't give a damn about Thanksgiving vacation, but that is because, because I have to endure the University for a solid nine-week session, a constant wail of faculty and administration alike as the amount of time that students lose because they take off a day early for Thanksgiving (or other) think that students are going to improve their attendance records if they have a solid session from the first of September through to Christmas? I foresee a great many students taking an extra two days during this miserably long stretch to go home for an unscheduled vacation. At least, under the present system, the instructors know what weekend their students are going to be absent.

One wonders who is supposed to benefit from a revised calendar. Is it the students? Then what of the students who find that more jobs are available during the months of July, August and September than during the months of June, July and August? Someone should do some statistical analysis on this point. I, for one would hate to try to find a summer job lasting from the first of June to the first of September. Construction and tourist-based jobs are most plentiful in the former than the latter period.

Is it the faculty who benefits? Some say it is, but no one explains how they benefit. If they teach in the summer, and if the summer sessions begin after the regular sessions end (the usual practice in most areas), how does rearranging the calendar help them?

We won't even discuss the proper destination of the plan if it is designed for the benefit of the administration.

What good is a three week inter-semester-Christmas vacation? I get bored in two, without a job or enough money to keep me occupied. Who benefits from THIS gem? Santa Claus?

What good does the entire proposed calendar do? Does it really "lighten" the school year, or does it merely rearrange the present system into an even more unpractical and unworkable plan? Are we playing a new game or just changing courts? Are we saving time and money or face? And if the latter, whose face?

Taking the selfish angle: What would I, as a student, benefit from a revised calendar? The answer is simple. I would lose far more than I could hope to gain. If I work for my education, I could easily lose the opportunity to get a job that might pay for it. Would I gain in the quality or quantity of my education? I doubt it very much.

Even looking at the unselfish (the university's) viewpoint, I reach a blank wall. Who benefits from this? Someone must. But who? Who? Are we to have to change for its own sake?

The only argument I have heard in favor of this so far stressed the fact that first semester exams would come before Christmas, and that the person always comes back to UVM in good condition after his Christmas vacation that he forgets everything he has learned all semester and consequently flunks his exams. Shall we enter parenthesis [illegible] for this person's benefit? Is the reason for existence? I hope not. But then again I

Datebook

A system of alignment ought to be put into practice for the design of this year's Date book. I recommend that the Dean Assistant Dean Assistant to the Dean Coordinator, Director Assistant Director, Etc., or Etc. who perpetrated this ghastly atrocity be purged forthwith upon recommendation of the Sub-Committee of the Evaluation Committee of the Self-Study Committee under whose jurisdiction he falls. Specifically, I propose that he be sentenced to transportation to Syracuse University.

This week, while attempting to find my way around in October, I was in September. Most of September I was in October, right side up. Now in rechecking an appointment in November, I found my self in October, upside down. Clearly, my inclination to go forward must be suppressed in favor of going backward and right side up is obviously upside down -- or is it? One cannot be sure. As yet I have not looked beyond to December. I fear the very seasons may be reversed and that if spring comes, winter may not be far behind.

Please Mr. Dean, Assistant Dean Assistant to the Dean, Etc. or Etc., can we not go back to the old design?

J.P. Chaplin,
Psychology Dept.

Disappointment!

To the Editor:

When Mr. Byron Janis walked onto the stage, in Memorial Auditorium Thursday, October 5th he was welcomed by a warm and long applause. At that point, I do not think Mr. Janis knew he was going to be disappointed only a few minutes later by the same audience, who cheered him even before hearing him play.

The INTERMISSION was VERY CLEARLY marked on the program, but the audience - a good number of them - started to walk out after the end of the first portion of the concert. The fact that the lights did not come on did not [illegible] mination to pr[illegible] The efforts of [illegible] to stay them were [illegible].

When Mr. Janis [illegible] the second portion [illegible] half the audience [illegible] were still in the [illegible] He just did not know [illegible] sat there and waited [illegible] be seated. Then [illegible] that must be recognized.

Also, there was [illegible] appropriate places; [illegible] of a movement. It [illegible] the audience were [illegible] cause of music appr[illegible] be some went just be[illegible] already paid for th[illegible] and did not want to [illegible] Perhaps, if single [illegible] sold the problem [illegible] partially.

There were 13 ... workshops, dealing ...ievable student is... ...aims of education, ...nternational aware... ...shops were small ...ilating discussion and ...ated by student ex... ... subject. The three ... at this time in order ... knowledge on every possible ... this point, we began to ... how beneficial N.S.A. could ... school represented. For ..., we attended workshops on ns, campus communi... ..., advice and counseling, so... ... cultural programming. ... found that UVM's problems ... not at all unique; but rather, ... colleges across the country ... very similar difficulties. An ...mable wealth of knowledge was ...ained by the discussions both in ... of workshops. For example, ... have dozens of ideas for college ..., and facts and statistics ... 400 schools to substantiate ..., What could be more perti... to the students at UVM who ... anxiously anticipating the open... of their first union? We spoke ... the founders of Sigma Tau ..., an honorary tutorial society ... charges no fee for services ...dered. They are a marvelous ...anifestation of devoted students. ...dn't a chapter be started at ...M!

After our two exciting days of ...rkshops, we moved into commit... and sub-committees, whose ...pose it was to draft bills to ...sent before the plenary session. ... committees were concerned with national and international affairs as well as campus ... The important national issues ... cussed included the Peace ... civil rights, the House ... on Un-American Activities and ... restrictive clauses. These issues obviously concern, or should concern, every student on campus. We learned about the pros and cons of the Peace Corps, the effects of HUAC after publication of the movie "Operation Abolition," and the importance of student participation in anti-segregation demonstrations.

The more important international issues discussed were the Berlin crisis, Cuba, the African dilemma and the foreign student's plight in an American college. In attending the national and international committee hearings, we realized two major things: 1. the importance of political awareness and participation, not only on campus, but on a worldwide level; and 2. the practical significance of N.S.A. in acting as a pressure group by expressing student sentiment. We, as students at UVM, can transmit our stand on an issue through the effective channels of N.S.A. Also, by working effectively with organizations such as the International Relations Club, N.S.A. can promote a sound program of speakers, panelists, and discussion groups to make each student aware of these worldwide issues.

Besides workshops, committees, and plenaries, we managed to meet almost daily with the delegates of the New England State Universities. We have planned a tentative meeting with the school president, the president of the student body, and one delegate from each school to discuss common problems. The proposed agenda for this meeting, and the last few days of the Congress will be discussed in the concluding article next week.

Columbia

Dr. Daniels Returns From U. Of Oslo

...s guest columnist this week ast month the student ference in Washington, D.C. ty of Vermont professor who ttended the meeting as a guest of

Dr. Elbert V. Daniels of the ...partment of History, participated ... a program on "Trends of ... Soviet History" in Oslo and also gave a series of lectures at the University of Oslo. Dr. Daniels was in Norway at the time of that country's national election and has written an article about the issues and results.

Dr. Daniels was in Oslo at the time of Dag Hammarskjold's death and says that Norwegians "were left aghast by the terrible shock of the death of their greatly respected regional figure." Editorial comment in local papers raised immediate question of the future of the U.N. and whether there was sabotage or foul play involved in the cause of the plane crashing.

While Norwegians are solidly behind the UN, they have certain reservations about NATO and this, along with the European Common Market, were two of the main issues in the national election which saw no party gain majority control.

This week's guest column is by the President of Antioch College, James P. Dixon.

Daniels says that many Norwegians question whether the country should get more involved in NATO, already feeling somewhat uncomfortable in being a member but feeling the necessity for joining because of world conditions. Though most accept the country's membership in NATO, practically no one wants troops armed with nuclear weapons on Norwegian soil in times of peace.

The Labor party lost its majority rule of the Storting but still is the major party although it will need some sort of coalition for a working majority. The anti-NATO Socialist People's Party holds the balance of power between Labor and the Conservative parties. The Communists lost their seat and gained only 2.9 per cent of the total vote, a drop from the last national election.

Communism isn't a great threat in Norway. The Labor party belonged to the Communist International in the early 1920s but quit because the party itself couldn't retain the dictatorial policies of the communist movement.

Daniels said that there is a great fear in Norway of the Western dragging the Western Alliance into a war over the reunification of Germany.

Commenting on the University of ... Daniels said he found it a "very stimulating and intellectual place." It has a student body of about 6,000, most all residing in non-University regulated housing. Students speak fluent English and have a reading knowledge of French and German, ... in addition to their own ... There is no tuition students receive stipends from the government to attend college, making for a most competitive situation.

At the University, Daniels gave a special series of lectures on Communism.

PROFESSORES

...Last week [illegible] ... the student Union ent issues ers to demonstrations ol. ed students to attend State House ent American the current

Many people have asked the questions about the picketing of the State Capitol by students from Antioch College who were jailed there by students from [illegible] State University, and I am very happy to answer some of the questions and to explain the importance of this enterprise as far as the Antioch community is concerned.

One question that people have asked is "Why did you permit students to do this?" The answer to this question is very simple. At Antioch we believe that it is very important in the process of education for students to involve themselves in matters of social action, that the experiences of involvement produces [illegible] can get in no other way—that they cannot get in the classroom that they cannot get from reading books. For one thing the experience of involvement requires that a person identify his position and the process of identifying a position is an important process in putting his knowledge to work in social activities.

At Antioch the community knew all about the plans for this picketing. We have certain ground rules that we have set up on the campus for such activities. One ground rule is that there shall be no secret organizations and every organization that wants to form for an independent purpose must declare its existence and identify its membership and must say what its leadership is.

GROUND RULES

In addition, we have certain other agreements as to how we will conduct ourselves when we are involved in demonstrations or activities away from the campus. One of the things we agree upon is that we will undertake to advise the people who will be concerned in the community where a demonstration or picketing is going to take place. In accordance with this the students themselves called the police in Columbus, Ohio, before they left the campus, to tell them they were coming and to check out with them the regulations in Columbus concerning picketing and how they should handle themselves.

They had also advised the College administration of their plans and asked the advice of the administration. They had prepared their press materials in advance and were prepared to answer questions of the press and to identify themselves to the press and to stand for the issues in which they believed.

So it is important to know that this is not a matter of keeping the students from undertaking these activities — this is a matter of knowing and believing that these activities are important to the kind of liberal education with which we are concerned.

EDUCATIONAL VALUES

I talked with the students after the demonstration and asked them how they felt the enterprise had gone and they thought it had gone very well. They had discovered some of the problems that arise from taking an unpopular point of view. They discovered some of the problems involved in organizing an orderly demonstration. They discovered some of the problems involved in keeping your patience and abstaining from violence in a situation in which you are heckled. They learned a great many things that could not have been learned from any other kind of experience.

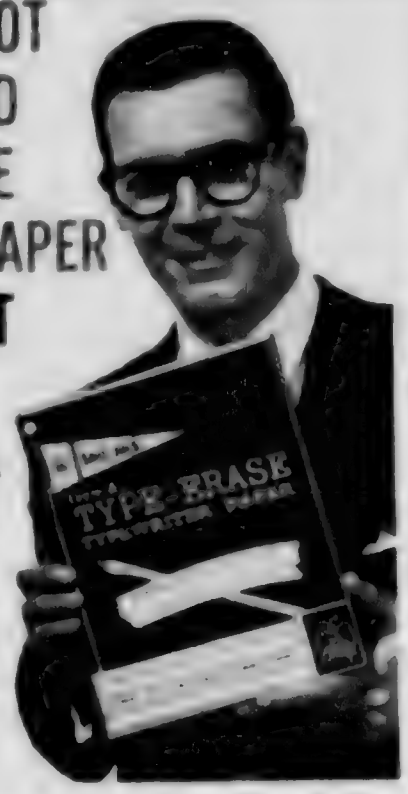
I think it is important also to realize that the College as a total community does not take positions on political matters that are local or international. Our business is education, not politics. But this does not mean that we restrict the positions that members of the faculty or members of the student body may take on social and political concerns.

As a matter of fact we believe that academic freedom is as important to the student as it is for the faculty member. We recognize that these kinds of activities by students are widely interpreted and we believe, sometimes misinterpreted in the community. They are misinterpreted because they are not understood to be part of an educational process. They are misinterpreted because not understood as part of an educational process they are regarded as irresponsible kinds of actions.

DEVELOPING LEADERSHIP

But I think it is important to recognize that these activities are part of the total educational process that we have in our colleges, and that these are the young people who are going to be deeply involved in the political and social affairs of the next decade that we believe that the problems of the next decade require us to develop leadership with sufficient courage to take positions that one of the ways in which one learns how to do this is by doing it, and that there should be an opportunity in the educational situation to do this in a fashion that is shall I say somewhat experimental.

So it is important I think that at Antioch College at least, we recognize that these things are true and it is important that the community understand that these kinds of enterprises do have a sanction for their existence at the College but that the sanction for their existence bears no relationship to how I the President, or the Board of Trustees of the College or the Antioch community itself would feel about any particular issue that is involved.



James P. Dixon
President

Nota Bene

The Liter is accepting applications for writers and production assistants. PHOTOGRAPHS and STUDENTS columns are also wanted. Please call [illegible] or mail box to Liter office, Jones Waterman.

[illegible] Thein, the visiting professor from Burma, will discuss "Buddhist Ethics" at the first meeting of the John Dewey Club. This meeting will be held at 7:30, Thursday, Oct. 19 in the Fleming Museum Lounge. All are invited to attend and participate in the open discussion.

NOW! WE'VE GOT FAMOUS BRAND EASY-TO-ERASE TYPEWRITER PAPER AT THE LOWEST PRICE YET!

Now at a new money-saving price, we have the world's finest Eagle-A Type-Erase the paper that's famous for super-faster typing and easy erasability. At the touch of a pencil eraser, typing errors wipe right off the surface of Type-Erase leaving no mark. Saves time ... makes copies with neater appearance. A budget-priced pack of 100 sheets 8½" x 11" medium or heavy weight plain or ruled. Now packaged Free with every pack — a Letter Placement Guide to help you type neater letters and reports.

CLOUD NINE

Congratulations to Al Heffler, Phi Mu Delta, who pinned Pat [illegible].

Norman Wright, Kappa Alpha Theta, is engaged to Jim Carr of Phi Delt.

John Lazarus, Phi Sigma Delta, '62, was recently pinned to Barbara Greenebaum, '[illegible] at Syracuse University.

CONGRATULATIONS TO:

Lisa Hansen and Pete Oppenheim who were inducted as pledges of AEPi.

Mike Asher, Steve Frankel, Bob Hoffman, Les Levy, Steve Latzer, Lees Shrage, Dave Silberman, and Bob Summerfield who were all initiated as brothers of AEPi Fraternity.

Jay Gloetzner who is pledging Sigma Nu Fraternity.

Sue Tinsley who was initiated into Gamma Phi Beta. Also congrats are in store for Jean Luck, Barbara Allison, Barbara Laurie, Vivian Collins and Winifred Tubbs who are all pledging Gamma Phi.

Bill Brauer, Bobbie Crouch, Danny George, Carol Suhr, and Judy Moorse for their wedding bells. They are all Thetas.

Lenny Reed, Phi Mu Delta who returned to college a married man. He was married September 1 to Miss Sumner of St. Albans.

Wendell Button, Phi Mu Delta, who is engaged to be married Nov. 25.

Judy Bley, Barbara Isham and Diane Milligan who are now pledging Alpha Delta Pi.

POTPOURRI

Theta enjoyed an exchange dinner with Sigma Nu this past week. The Gamma Phi's enjoyed Phi Delt's serenade for Anne Parker. Even Anne liked it.

On Thursday, Sept. 28, Dean and Mrs. Patzer, and Prof. and Mrs. Wolotkin came to AEPi for dinner. Afterwards everyone joined in on an informal discussion with our guests of honor.

On Wednesday afternoon, Oct. 3, AEPi beat SAE in a football game 23-0. A Limbo Party was the reason for a good time had by all the Theta Chi's last weekend.

Azna Calkins, Tauriaenan of ADPi is now living [illegible] Michigan where she [illegible] as a speech therapist.

Dr. Virginia Trout, [illegible] the Home Economics [illegible] as a dinner guest of the [illegible] week.

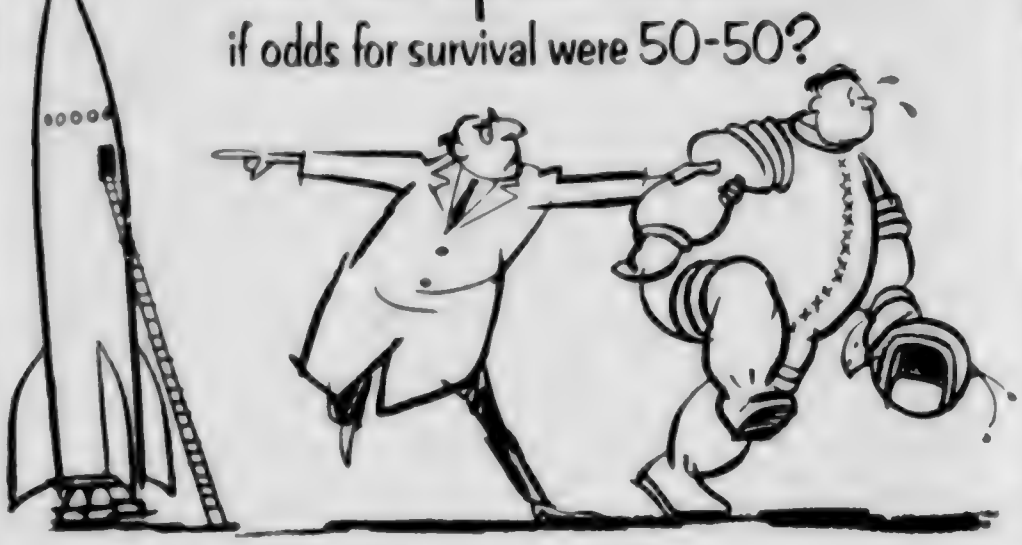
Julie Lawler, '62 was [illegible] elected Vice-President of the Home Economics Club.

Betty Bashew, '64, [illegible] newly elected scholarship chairman.

The Phi Mu Delt's recently purchased kitchen equipment from a defunct Norwich fraternity house. Among the equipment was [illegible] possession --- a pool table. Construction on a new kitchen and dining room starts in early October.

Phi Sigma Delta and Pi Beta Phi had a wonderful time at their picnic last Saturday afternoon.

Sigma Nu won their first football game this year by drowning Sig Ep. They are looking forward to their 6th straight IFC championship this year.



Phi Sigma Delta had a very successful Open House on Oct. 8.

Nils Andersen, and Dick Oppenheim on their pledging Sigma Nu. Bob and Sue Schell on the birth of a baby girl.

Music Man In Review

...and Harry Hickok ... swings performance, 'Music Man'".

... about it, *The Music* ... of a fine show. And ... two ways about it, ... performance was ... week.

... BOOK, AUTHOR!

... show itself is pure laughter, ... and most of all pure ... Meredith Willson's tunes, books, and ... all the creation of a ... Iowan Meredith Willson. ... production is obviously aimed ... at the hearts of the senti... the sensitive and the san... At least a third of Monday ... audience fit at least one ... categories and they loved ... Mr. Willson, who is the ... Man himself.

... story is about a swindler, ... named Professor Har... who sells band instru... small town Americans. ... off with their cash ... good people learn that ... music teacher after all. ... finally manages to make ... heart of the local piano ... as well since she is gener... person in town who ... about music to ex... a fraud, if she is not ... line. But in River City ... runs into Marian Paroo ... his heart just as a ... Marian's have done ... other fairy tales. ... knows that there will be ... and almost every... glad.

The first scene and song, on a rocking railway car, was the best in the show.

The music had been ... opened slowly, worked its way ... towards the middle of the last act, and slowed down ... by the finale. At best he was zestful; at worst, he was lethargic. Marian the Librarian, the teacher sought but not good as a librarian; however, and was alternately often ... by Elizabeth Kerr looked more like a matronly best Mom, and talked her way ... most of her numbers.

One bright spot was stopped by The Easternaires, a barber shop quartet. They were wonderfully melodious and harmonious and may well have surpassed the original Broadway group, The Buffalo Bills.

LITTLE GIRLS AND GREASE PAINT

Two not so bright notes were the child actors and the make-up. Child actors rarely portray anything except child actors, and these were no exceptions. Every director should know that the only really competent child actors are all midgets pushing forty. Monday's make-up and lighting effects made the kids, and everyone else on stage, look like midgets pushing the Old Actor's Home. Not everyone could have been as old as they looked. The one exception was Mrs. Paroo a woman of supposedly advanced age who looked like a matronly thirty-five.

But despite the weaknesses and flaws, The Music Man is too good a show to keep down. Its humor and love glimmered through the light voices and heavy make-up like the sun breaking through clouds. Mr. Willson has created a delight.

Byron Janis

by Don E. Kerr

The Lane Series of the current season opened Thursday night, October 5, with a piano recital by Byron Janis. Perhaps Janis was ill, or perhaps he was having one of those bad nights to which every performer is entitled once in a while. I sincerely hope that this was the case, because there is no other legitimate excuse for the kind of show that Janis put on. Good money was spent to present a supposedly top-flight artist, but no top-flight performance was heard, by any stretch of the imagination. Several new piano sonatas could have been written with the notes that Janis dropped under the piano during the first movement of the Beethoven Sonata and throughout Moussorgsky's PICTURES AT AN EXHIBITION.

This is not to say that Janis ... a terrible, ... was the ... of the audience. The music had to pound to be heard at all ... Janis dropped far too many notes for a man of his reputation. He can ... better than he did, and he ... obligated to do his best. Certain respects for what ... have to go ... or ... by people

That Janis is a fine artist who ... with a great ... of sensitivity cannot be questioned, but ... professional integrity ... questioned if he plays ... the way he did because he thought that no one would know the difference here in the wilds of Vermont. Whether or not anyone knows the difference, whether the audience behaves well or poorly, is hardly a valid excuse. If Janis is where he is today because of performances like the one in Burlington,

Maine Game

(continued from page eight)

with some brilliant broken field running, scampered 75 yards for the winning touchdown, and Maine led 20-8 at the end of the first quarter.

Vermont could not get rolling after this fine run, and consistently had to punt to Maine. The Bears closed the scoring in the first half with Cloutier on the receiving end of another Wheeler touchdown area. Boucher again was successful in his placement and at halftime, Maine had a 27-8 lead, which was too much for the Cats to overcome.

Second half was hard fought, but Vermont could not penetrate the forward wall of the Bears. Parlato was repeatedly caught back for large losses by the hard rushing Maine linemen.

Injuries played a big part in the Maine victory as well as in Vermont's misery. Key players that were lost from the Catamount lineup included Maynard Ducatte and Ted Jzyk.

The final Vermont scoring threat came early in the last period. Dom Parlato, who passed superbly under the conditions, threw to end Billy Burke for a touchdown. This cut the Maine lead 13 points. But with four minutes left to play, Maine reciprocated. Using the same "up the middle play," with which Cloutier had had so much success, Maine scored again. Jim Beaulieu was the halfback who executed it for 38 yards and 6 points. Boucher's place kick set the final score at 34-14.

The Catamounts now turn to the Rams of Rhode Island who were successful last week vs. UNH 20-0. The Rhodies lost to Maine by only 2 points, so the opposition will be very hard. Coach Ed Donnelly knows that a lot of work is needed in order to be successful against the powerful Rams.

On Campus with Max Shulman
(Author of "I Was a Teenage Dwarf", "The Many Loves of Dobie Gillis", etc.)

SAIL ON, SAIL ON!

I suppose October 12 is just another day to you. You get up in the ordinary way and do all the ordinary things you ordinarily do. You have your breakfast, you walk your ocelot, you go to classes, you write home for money, you burn the dean in effigy, you watch Howdy-Doody, and you go to bed. And do you give one little thought to the fact that October 12 is Columbus Day? No, you do not.

Nobody thinks about Columbus these days. Let us, therefore, pause for a moment and retell his ever-glorious, endlessly stirring saga.

Christopher Columbus was born in Genoa on August 25, 1451. His father, Ralph T. Columbus, was in the three-minute auto wash game. His mother, Eleanor (Swifty) Columbus, was a sprinter. Christopher was an only child, except for his four brothers and eight sisters. With his father busy all day at the auto wash and his mother constantly away at track meets, young Columbus was left pretty much to his own devices. However, the lad did not sulk or brood. He was an avid reader and spent all his waking hours immersed in a book. Unfortunately, there was only one book in Genoa at the time—*Care of the Horse* by Aristotle—and after several years of reading *Care of the Horse*, Columbus grew restless. So when rumor reached him that there was another book in Barcelona, off he ran as fast as his fat little legs would carry him.

The rumor, alas, proved false. The only book in Barcelona was *Cuidar un Caballo* by Aristotle, which proved to be nothing more than a Spanish translation of *Care of the Horse*.

Bitterly disappointed, Columbus began to dream of going to India where, according to legend, there were thousands of books. But the only way to go to India was on horseback, and after so many years of reading *Care of the Horse*, Columbus never wanted to clap eyes on a horse again. Then a new thought struck him: perhaps it was possible to get to India by sea!

Fired with his revolutionary new idea, Columbus raced to the court of Ferdinand and Isabella on his little fat legs. (Columbus, though six feet tall, was plagued with little fat legs all his life) and pleaded his case with such fervor that the rulers were persuaded.

On October 12, 1492, Columbus set foot on the New World. The following year he returned to Spain with a cargo of wonders never before seen in Europe—spices and metals and plants and flowers and—most wondrous of all—tobacco! Oh, what a sensation tobacco caused in Europe! The filter had long since been invented (by Aristotle, curiously enough) but nobody knew what to do with it. Now Columbus, the Great Discoverer, made still another great discovery: he took a filter, put tobacco in front of it, and invented the world's first filter cigarette!

Through the centuries filters have been steadily improved and so has tobacco, until today we have achieved the ultimate in the filter cigarette—Marlboro, of course! Oh, what a piece of work is Marlboro! Great tobacco, great filter, great smoke! And so, good friends, when next you enjoy a fine Marlboro Cigarette, give a thought to the plucky Genoese, Christopher Columbus, whose vision and perseverance made the whole lovely thing possible.

© 1961 Max Shulman

• • •

And thank Columbus too for the king-size Philip Morris Commander. If unfiltered cigarettes are your choice, you'll find Commander the choice of the unfiltered. Welcome aboard.

Harriers Victorious

The UVM varsity cross-country team opened the season with a 15-50 victory over RPI at Troy-born Park.

UVM harriers stroll to victory, capturing the first seven places. The UVM runners took command from the start and were never seriously threatened.

Steve Russell, Carl Parish, Tim Girard, and Tim Simpson (Bunker) have to rank as an impressive four place tie with a time of 28:08 over the 4.4 mile course. They were closely followed by sophomore Tim Morris, the only experienced man on the team who made an excellent showing in capturing fifth place. Bill Stillson and Harold Hodges finished sixth and seventh respectively, about one minute behind Morris. If past performances are any indication of ability, Stillson and Hodges can be expected to finish higher in the future.

Although battered by long trudging, Vermont's other runners Spafford managed to finish thirteenth.

The overall team performance pleased Coach Hyde and with the expected addition of Bill Perkins the future of the Harriers looks promising. I predict a grand slam at Union on Friday, the 13th.

In a meeting this week between the UVM Freshman Cross-country squad and the UVM Freshman team, the UVM Freshmen [illegible] Williamstown high 15-50 and downed Watertown high 16-47.

Cannon balling to an early lead, freshman Chris Morrish paced the 2.7 mile course in 14.13 minutes. Morrish walked away with an easy win a 1:01 40.5 seconds ahead of a second place finish by Jackson of UVM.

Richard Carpenter, placing first for Williamstown, crossed the finish line in ninth place followed closely by Fred Tripp of Vermont.

Chris Morrish seemed to be the key that opened the door to the freshmen success. Level, speed and stamina are characteristics of one of UVM's most refined and polished cross-country runners.

Sweeping across the finish line in 14.57 and 14.58 minutes, UVM's Dennis Bender and Edward Bennet placed third and fourth respectively. Whizzing across the final foot of the gruelling course in fifth and sixth places were Dick Finn of Waterbury and Dick Ashton of Vermont.

Sportorial

BY BOB BERNARD

This Saturday afternoon "We're gonna roll right over Rhode Island." But it won't be with the help of the student body. That is, not if we see another expression of school spirit like that exhibited at our first home game.

Does it take a ration of bourbon to loosen this school up? How about drinking deep of that old university approved beverage, School Spirit, and coming out with the same effect?

There are ten hard-working cheerleaders doing their utmost to liven up the stands. It is a sad case indeed, when nine or ten freshmen have to form their own "cheering section" to try to start to get things rolling. While some of their cheers were a bit "high schoolish" they were all in good taste, and they were entertaining. The only thing they did not have was force, and this was due to a lack of numbers, not a lack of enthusiasm.

Many upperclassmen smile and say, "Well, they'll loose their enthusiasm. Let's wait one or two more games." I hope they don't loose this spirit. I hope that the rest of the student body will latch on to some of it and cooperate with the cheerleaders in letting our team know we're with them.

This year we have the team, and the team has the spirit. But that's only half the story. Our team has to feel it's fighting for more than just their coaches or "their team." There is nothing more demoralizing to a team than to see the cheerleaders rush to the fifty yard line, get set to lead a cheer, and then hear only a dozen voices float across the crisp autumn air. And mind you, this is while the stands are fairly well packed.

There is nothing that pleases a quarterback more than to have to call his signals a little louder because the cheers from his side of the stands are so loud. Our team has got to feel the forceful spirit of a school behind them. They have got to know the school is with them. They have got to hear the loud, clear voice of a school in unison.

Now, this Saturday afternoon the Catamounts are going to win, and we are going to help them. This weekend let's see some spirit that'll make old Charlie's heart swell with pride. Let's *really* fight for Vermont!

Intramural Football

Last week all sixteen fraternities on campus took to the football field in quest of the interfraternity football championship. This marked the thirtieth consecutive season for interfraternity football at UVM.

This year the fraternities are broken down into four leagues. Each league consists of four teams. The fraternities play against the other fraternities in their league to determine a division champion. The winners of the league divisions then play in the semi-finals to determine which teams will play in the finals. The two remaining teams then have a playoff game to decide the winner of the interfraternity football league.

Last year's winner was Sigma Nu. The boys of Sigma Nu have won the championship for the last four years, so you can be sure that the other fraternities will be out for revenge this year.

The four leagues are:

A	B	C	D
SN	KS	PSD	A
SAE	TEP	PDT	LI
AEP	ATO	DP	PMD
SPE	TC	SP	AGR

Not only are the fraternities playing intramural football, but so are those living in the dorms. The dorms have been divided into eight teams, in two leagues. The eventual winner of the dorm teams will play the fraternity champion for the campus championship.

Some of the scores from the past week were: KS42 - TC8; SN 43 - SPE 12; LI 6 - PMD 20; SAE 23 - AEP 0; SN 24 - AEP 18. Wills 25 - Buckham 0; N. Converse 6 - Buckham 18.

Sports Honorary

The national honorary athletic fraternity Sigma Delta Psi was founded at Indiana University in 1912.

"The object of the society hall be to promote physical, mental, and moral development of college students." All men of superior athletic ability that desire to become a member of the fraternity must pass several test events. They are as follows:

1. 100-yd. dash	11.6 sec.
2. 120-yd. low hurdles	16 sec.
3. Running high jump Ht.-	Ft. Formula
4. Running broad jump	17 ft.
5. 16-lb shot put	30 ft.
6. 20-ft. rope climb	12 sec.
7. Baseball throw	250 ft.
or javelin	130 ft.
8. Football punt	120 ft.
9. 100-yd. swim	1 min. 45 sec.
10. 1-mile run	6 min.
11. Front hand spring, landing on feet	
12. Head stand	10 sec.
13. Fence vault	Chin high
14. Good posture, Standard B (H.B.M.)	
15. Scholarship	Eligible for varsity competition

The UVM chapter of Sigma Delta Psi was founded on May 12, 1930. Throughout the years there have never been more than one or two members in the UVM chapter at the same time. Douglas Greene and his son Gary have been the only father-son combination to wear the "gold key". Greene completed all the requirements back in 1936. He was then a hurdler on Archie Post's track team. When the younger Greene, Gary, arrived at UVM in 1958 he completed the tests in less than a year.

At this time, sophomore trackman Lee Pantas has only the 120 yd-swim to complete. He as well as all the other members had to put in many extra hours of practice throughout the year.

"Paul Rutkowski '63 had the most tenacity of all the members." These are the words of Sigma Delta Psi's faculty advisor, Archie Post. Rutkowski is now in medical school. He was the only non-trackman to become a member of the UVM chapter.

Kittens Win

Vermont's future on the gridiron became a little brighter with the news of a winning debut by the class of 1965 over Norwich last Friday, 14-0. Fuzzy Evans' Kittens played well on offense and better on defense to subdue a determined squad of freshmen from Northfield. Quarterback Al Foster from North Andover, Mass. figured in all the scoring, manipulating his 170 pounds into the end zone twice and flipping to end Gino Giardi for a conversion. Foster's first score came after thirteen minutes had elapsed in the opening quarter when he swept around right end from the two yard line. It was a fourth down TD after UVM had attempted three unsuccessful line-plunges from inside the five. Foster's try for a two-point pass play failed.

The score remained 6-0 until the final play of the third period. It was Foster again stealing the show as he intercepted a Norwich pass on the Cadets' 25 and, getting a key block from Giardi, jaunted to pay dirt. This time the attempt for two points was good. Foster feigned a place kick and fired to Giardi who was standing all alone in the end zone. The Kittens held their ground in the fourth quarter, staving off repeated Norwich threats to shut out the Cadets' Frosh, 14-0.

In addition to Foster, Vermont had many other standouts. Dave Baker, a tackle from Longmeadow, Mass., who weights in at 238, shone on defense as did linemen Denis Blanck, Tom Mongeon, and Gino Giardi.

Maine Bears Beat Cats 34-14

The Bears from the [illegible] Maine, led by halfback [illegible] tier, capitalized on two [illegible] fumbles early in the [illegible] and then rolled on to [illegible] victory.

The game was less [illegible] old when Maine was [illegible] Bill Fleming fumbled [illegible] in his own territor[illegible] lineman recovered. [illegible] for scrimmage saw Dave [illegible] carry 19 yards to pa[illegible] extra point was kicke[illegible] fully, and Vermont was down points.

Maine then kicked off [illegible] Catamount fumble [illegible] seven more points [illegible] Cloutier scored on the same play, and Larry Boucher [illegible] kicked the extra point. Thus, [illegible] three minutes of play the score read Maine 14, Vermont 0.

However the Cats were not to be denied. After receiving the Maine kickoff, Dom Parlato replaced Chris Greer at the quarterback position and got the Cats moving. Two quick handoffs resulted in a first down on the Vermont 29 [illegible] line. Parlato then faded back and hit sophomore Ken Burton with a perfect pass. Burton caught the ball on his own 45, eluded many Maine tacklers, and broke into the clear for a touchdown. Parlato passed to Bolden for two points, and the Cats were back in the ball game.

The complexion of the contest seemed to have changed with the spirited Catamount drive. But Cloutier again struck a mighty blow in the hopes of the Cats. Maine [illegible] received the kickoff, and a third down quarterback Manch Wheeler faking beautifully, faded back looking for a receiver. He found Cloutier in the clear, and threw a strike to him. The speedy halfback

Homecoming Attracts UVM Sons And Daughters

[illegible] expected to be the [illegible] of Alumni and [illegible] Homecoming hits [illegible] on hand for three [illegible] of events beginning tonight, when a 7 [illegible] kicks off weekend [illegible] the old UVM Gym.

[illegible] the traditional Homecoming dance, the ball featuring [illegible] and Bus Orchestra, [illegible] in Burlington's [illegible] entertain for the last [illegible] University's new [illegible] house is due for [illegible] next year's Homecoming festivities. The ball will [illegible] 9 p.m. and tickets will [illegible] at the door.

[illegible] usually the case, however, [illegible] morning events don't [illegible] into high gear until [illegible] when parents and [illegible] registration will open [illegible] early (8 a.m. until [illegible] in the Waterman Building. [illegible] will be served throughout the morning at the Student [illegible].

[illegible] the most significant [illegible] of the weekend, the dedication of the Bailey Memorial [illegible] as a special symposium [illegible] "The Challenge to Scholarship" [illegible] are expected to attract [illegible] alumni, parents and [illegible]. The dedication, beginning at 9 a.m., will be staged [illegible] audience to the library [illegible] the building in the [illegible] inclement weather). The [illegible], which will begin at [illegible] p.m., will be held in the [illegible] Chapel. Members of [illegible] University family and [illegible] public are invited to [illegible] events.

[illegible] a colorful note to the [illegible] schedule, for those [illegible] parents given to tourists [illegible], will be the Homecoming [illegible] floats on display in [illegible] various living units and [illegible] and sorority houses. [illegible] judging will be held Saturday morning.

The women's spirit will get [illegible] biggest action at [illegible] when the University of Vermont football team hosts [illegible] gridders of Lowell Tech in the traditional Homecoming Football Game. The Homecoming and Vermont Letter will [illegible] for a colorful [illegible] and a raft of half-time [illegible] awards will [illegible] hand.

After the game, parents and Alumni are invited to special cocktail hours [illegible] at the Hi-Hat Restaurant, which will serve as Alumni Headquarters [illegible]. The Hi-Hat is located on Main Street across from the famous Strong Theatre.

Another option for [illegible] attending the weekend will be the famous beef barbecue sponsored annually by the Alumni Interfraternity Club. The barbecuing will be [illegible] immediately after the game in the UVM Cage, with [illegible] available at the door.

There are two new Alumni and Parents [illegible] on the calendar this year. A [illegible] tonight at [illegible] tickets are available for a [illegible] and winter fashion show and dinner at the Hi-Hat Restaurant, starting at 7 p.m. At 9 p.m., parents and Alumni are invited to gather at the Hi-Hat for an open House which will run through midnight.

One of the most [illegible] of the weekend, Vermont Varieties will [illegible] campus entertainment [illegible] Memorial Auditorium [illegible] 7:30 p.m. Tickets for this event will also be available at the door.

On Sunday, President John [illegible] Fey will [illegible] at a 9 a.m. [illegible] and parents [illegible] Bowling Hall. [illegible] to [illegible] the future. The weekend will be [illegible] a cafeteria style [illegible].

G. Mennen Williams To Keynote African Parley Next Week

Under Secretary Of State Just Returned From Dark Continent

G. Mennen Williams, Assistant Secretary of State for African Affairs will discuss "Africa Towards Freedom."

[illegible] reaction to [illegible] announcement, two people of the [illegible] comment [illegible] that of a [illegible] guest at [illegible] being [illegible]. Prominent [illegible] has entered the [illegible] social scene with an [illegible] and capacity accumulated in the course of nations, but this [illegible] has been [illegible] by a number of [illegible] of equal import. What is the effect of [illegible] organization on the African and will the resulting [illegible] happen [illegible] apparent? What will affect the acceptance or rejection of the [illegible] ideological superpowers on African bases? What type of economic [illegible] political organization will evolve? What is the absence of [illegible] Africa? Does they [illegible] and hamper the [illegible] of Europe?

PURPOSE AND THEME

The [illegible] of these problems will be explored at a two-day conference at UVM sponsored by the [illegible] Friends Committee [illegible] in cooperation with UVM's International Relations Club. The conference will be [illegible] October 27 and 28 with a [illegible] of being [illegible] sponsored who will call attention to the complexities of these problems.

SPEAKERS

The theme "Africa Towards Freedom" will be discussed by [illegible] G. Mennen Williams, Assistant Secretary of State for African Affairs and Special Assistant to the President; Dr. Ralph Bunche, Undersecretary of the United Nations; Dr. Mason Sears, Chairman of the Board of Trustees of the Fund for the Republic; Dr. Kenneth Kaunda, President of the United National Independence Party of Northern Rhodesia; Dr. Hastings Banda, Prime Minister of Nyasaland; Dr. Julius Nyerere, Prime Minister of Tanganyika; Dr. Nnamdi Azikiwe, Governor General of Nigeria; Dr. Kwame Nkrumah, Prime Minister of Ghana; Dr. Milton Obote, Prime Minister of Uganda; Dr. Abubakar Tafawa Balewa, Prime Minister of Nigeria

UVM Enters Into A New Era. .

State Of The University

[illegible]

Philosophy Of Expansion Explained

[illegible]

Billings Library To Become Center Of Student Activity

[illegible] will be enlarged on the campus soon. The [illegible] the connection into a Student Center, a gigantic multi-[illegible] and Gym.

The long-felt need for a student center at last, to be filled by the conversion of the Billings Library to the Billings Student Center. This building, undoubtedly the finest on the campus, was designed by Henry Hobson Richardson, leading American architect of his period. The building needs a[illegible] adaptability to its new purposes. No significant changes are contemplated on its exterior. While interior alterations will be necessary to properly accommodate the new functions the distinctive atmosphere, which Richardson created some eighty years ago and which has been enjoyed by so many generations of UVM students, will be preserved.

The accompanying sketch shows the existing entrance to the building. The ramp will be changed and a new entrance vestibule will be provided to eliminate the present unsightly wooden structure which mars the winter appearance of the building. A secondary entrance will be provided at the lower level on the east side of the building. We propose to restore the fireplace in the main lobby so that, particularly in the winter, a roaring fire will greet students as they enter this lofty space.

The Billings Student Center will have a profound effect upon the student life. It will provide space and facilities for social activities and for the many student organizations. The former will be served by several types of rooms. The present Main Room, with virtually no change, will be the main lounge. The fireplace will be put back into operating condition and the room will be appropriately [illegible]. The atmosphere will be quiet and dignified.

The large room at the [illegible] wing on the main floor will be a more informal lounge. It will have a raised platform at the north end which may be used for music recitals, [illegible] and other similar activities. Under the gallery [illegible] music listening booths, [illegible] playing, a television room, alcoves [illegible] movable partitions for gatherings for coffee, card playing and other purposes in addition to general lounge space. A small pantry with a dumbwaiter from the kitchen shop below will make it possible to serve coffee or refreshments for functions or on other special occasions. From the gallery, students will be able to look down into the room for various activities. The lounge will be so large that it is difficult to anticipate all the uses to which the [illegible] functions of this and future generations of students may well be put. This, it seems to us, is a distinct asset.

On the lower level at the [illegible] wing, there will be a cafeteria seating some 260 persons. The space lends itself very well to the creation of a coffee shop which will be a warm relaxing [illegible] room. The relatively low ceiling with its massive exposed wooden beams, and the limited amount of natural light supplemented by soft artificial lighting will give the friendly, relaxing atmosphere associated with a Bavarian Rathskeller. There will be a room very similar to that great American institution, the "bull session".

The circular room at the north end of the lower level will be a multi-purpose room. By means of folding partitions it will be possible to have two meeting rooms each capable of accommodating as many as 50 or 60 persons. When thrown open, the room will be used on special occasions, such as overflow space for the cafeteria, for larger group meetings of student organizations, and for almost any kind of [illegible].

The circular room at the [illegible] above on the main floor will be directly [illegible]. It will be [illegible] at the level of the present balcony which now [illegible] all the way around the room. The room thus created on the balcony floor will be a reading lounge. The alcoves on the present balcony will be [illegible] carrells with a good reading surface and shelves for books. The open floor space will be furnished with comfortable [illegible] suitable for reading. There will be racks for [illegible] current periodicals. The Student Association [illegible] provide. The room [illegible] quiet [illegible] for studying and at the [illegible]

Yes, there is a new gym....

[illegible] a view of the new gym which is now under construction.

The present gym, built around the turn of the century, is entirely inadequate to the needs of UVM's student body. Several hundred men are each year turned away from any participation in physical education because the old Gym cannot accommodate them. These students who are enrolled in physical education classes can be offered only a partial program.

The University's varsity basketball team must play its home games in the Burlington Memorial Auditorium. This is unsatisfactory in many ways. It means that UVM teams must play away from their own campus. It means that UVM must pay rental for the use of the Auditorium. It means that UVM must play its games in a building which is poorly suited for basketball.

The state has also lent help to UVM's building program by guaranteeing bond issues for several of the dormitories already constructed, and by providing a bond issue for the new chemistry building now under construction. State guarantee of the dormitory bond issues has enabled UVM to obtain favorable interest rates for the construction.

The present Gym, built around the turn of the century, is entirely inadequate to the needs of UVM's student body. Several hundred men are each year turned away from any participation in physical education because the old Gym cannot accommodate them. These students who are enrolled in physical education classes can be offered only a partial program.

The University's varsity basketball team must play its home games in the Burlington Memorial Auditorium. This is unsatisfactory in many ways. It means that UVM teams must play away from their own campus. It means that UVM must pay rental for the use of the Auditorium. It means that UVM must play its games in a building which is poorly suited for basketball.

The state has also lent help to UVM's building program by guaranteeing bond issues for several of the dormitories already constructed, and by providing a bond issue for the new chemistry building now under construction. State guarantee of the dormitory bond issues has enabled UVM to obtain favorable interest rates for the construction.

The new Gym will offer a fine up to date physical education and recreation program for all UVM students. It will also make possible a second education opportunity for young men and women who wish to specialize in physical education. The need for qualified physical education instructors in Vermont's high schools makes UVM's part plans of significance to the entire state.

The Gym will offer not only three complete playing floors for physical education, but also a swimming pool, handball courts, [illegible] squash courts, [illegible] rooms, rifle ranges and [illegible] seating and locker [illegible]

elsewhere when they see or hear about the present UVM Gym.

. . Future Holds Great Promise

UVM Hotel Ready In February

UVM women to be housed in February.

Psy- ..., these new units will ... tremendous influence on ... student body. The acute ... situation will be eased. ... male student body will have ... In finding living quar-

ters. Another aspect brought out by our new Dean of Men, Dean Patzer, is the fact that there will be a greater solidarity and independence among the students living there. This point is not too hard to understand. In the past as well as in the present, upperclassmen have been living in rented apartments. Their overall contact with one another was, from a practical standpoint, superficial. In the future, UVM hopes that the new dorms will create a greater incentive for association among the male student body. The installation of new facilities for reducing sound bring out another psychological aspect. Better soundproofing facilities for reducing sound will undoubtedly create an atmosphere more conducive to studying. The noisy detractions encountered in the old dorms will be obliterated in the new dormitories.

In just a few months, the realization of on-campus living will be fulfilled. This realization is a step forward in progress for our University, and it goes without saying nowadays, "that progress is our most important product."

New Engineering Plant To Be Built

Vermont Searches For Qualified Educators

Two years ago UVM reported, in a similar brochure prepared for the Legislature, that President Eisenhower's Commission on Education Beyond the High School had urged an immediate 33 and one-third per cent increase in faculty salaries with the aim of doubling them in 10 years.

Two years ago UVM lagged behind in terms of median faculty salaries on the national level. While UVM has made subsequent faculty salary progress, so have other American colleges and universities who are, with UVM, concerned about the gap which exists between teaching salaries and salaries in business, industry and in the professions.

Few colleges have been able to make the progress urged by President Eisenhower's Commission, but all worthy institutions have made and are continuing to make progress in this area.

Their concern is two-fold. It is the concern for the inequity which asks that the college teacher spend more time and money in preparation for his career than most careers require and yet receive less financial reward than many careers promise.

But it is also the practical concern for finding the numbers of qualified teachers who will be needed. For the search for good teachers is a national search. National projections of college enrollments like the Vermont projection make it clear that there will not be enough good teachers to go around. Compounding the situation is the fact that education continues to lose teachers to better paying jobs in business and industry. Many promising students by-pass teaching as a career when they see that other careers often require less education and pay more both at beginning levels and in terms of future opportunity.

A study by the National Education Association lists 464 institutions of higher learning which reported 1276 teaching positions they could not fill in 1958-59. Further, 762 or 83.4 per cent of institutions sampled indicated they are now experiencing a shortage of qualified candidates in a wide range of fields; 53 per cent report they believe the situation will become more difficult in the years ahead.

The study projects a need for nearly 350,000 new college teachers in the 1959-60 decade, but concludes: "It seems clear that the institutions of higher education will not be staffed with the needed number of competent teachers unless their financial resources are vastly expanded. With a continuance of the present level of support, the employing officer has no alternative but to choose between an insufficient number and an inferior quality of teachers."

Your state university is not willing to commit itself to an educational program of compromise, and it is therefore committed to a program which will continue to be attractive to the teachers already here and to new teachers.

Faculty salaries are only part of this program. There are other factors which contribute significantly toward making UVM an institution of higher education which is attractive to the good teacher.

'YOUTH SPECIAL'

Raymond Dilley, UVM '62, son of W.G. Dilley of St. Johnsbury, took part in 'Youth Special" last Saturday, a television program seen weekly over CBMT. Pictures of UVM were shown and its activities outlined. Dilley is producer of the radio program "Spotlight UVM."

Private Philanthropy Aids In Construction Of Phase 2 Of Medical School

The orange girders rising skyward beyond the grey stonework of Converse Hall represent the Phase 2 link in a medical building program which will carry the University of Vermont College of Medicine forward into the new frontiers of medical education and research.

The Medical College building story sends its roots back into the 19th century when Pomeroy Hall - still used by the Speech Department - was the first home of the College, which traces its history to 1804 when lectures in chirurgery and anatomy were offered.

The "old" medical building at the north end of the College Green dates to 1900. As late as 1940, this building housed the office of the University's President and business manager, the University Store and Alumni Office.

With the gift of the Waterman Building, the "old" Medical Building became the exlusive and roomy province of medicine, but the roominess remained not long.

By the 1950's, new education and research programs had made necessary the conversion of coal bins and closets to offices and laboratories, and an ambitious building program - Phase 2 of which is now in progress - was undertaken.

The Medical Alumni Building - Phase 1 of the program - was dedicated in 1959, made possible largely by UVM Medical Alumni who, with friends of the University, provided more than $700,000 of the cost of the $1,200,000 building. A federal grant provided the rest. Alumni giving for the building was such that UVM's medical alumni in 1958 stood first in the nation in terms of total dollar giving to their alma mater. In 1959 and 1960, the second and third years of the building fund drive, they ranked third and fifth nationally.

It was principally this outstanding record of alumni loyalty which led to a significant "breakthrough" when UVM sought to match a second federal grant to permit construction of a $1,500,000 phase 2.

The breakthrough came with a $150,000 gift from Charles Dana of New York City on condition the University match the entire amount of the federal grant available for the project.

The Avalon Foundation was approached and provided a $350,000 grant.

The remainder needed to match the $750,000 federal grant again came from alumni and friends, and the result is the work visible in progress.

Plans are already under consideration for Phase 3.

Academic Changes Seen Here

One of the major news notes of this semester is the enlargement of the College of Arts & Sciences. This year, the entering freshman class totals a record 545 students compared with 338 admitted last year. The recent figure includes those premed students that formerly were part of the College of Technology. This new high was made possible only through the University's court action to nullify a provision in the Wilbur Trust Fund. This trust provided scholarships for UVM students, but also stipulated that the College of Arts could not exceed total enrollment of more than 1100. Now that this clause is made void, Dean Kidder is free to expand his college to its full potential. Also new in A & S is a course on Buddhism, instructed by a professor from the University of Rangoon, Burma.

Dean King, of the College of Education and Nursing, announces that total enrollment in the teacher education curriculum at UVM is up 15% from last year to approximately 400 students. The greatest increase coming in the fields of secondary education, whose membership is one third higher than last year. The Dean also notes that 60% of the students were Vermonters.

New events in the College of Agriculture include stepped-up activities in regard to the foreign service service program and liberalization of curriculum. By getting a head start on the Peace Corps, UVM's Foreign Agricultural Service Program is one of the finest in the nation, including such courses as Agricultural Economics, sociology, anthropology, psychology and political science, the college hopes to equip the future "Corpsman" with basic knowledge in human relations. Also being stressed this year is the "Common Freshman Program." Through this, the department is trying to liberalize the curriculum in order to meet the demands of business and government. For it is a fact that only 15% agricultural graduates actually take up farming.

Dean McKee of the College of Technology also stressed liberalization of the engineering program. By giving a greater emphasis on the humanities than before, the Dean hopes to turn out a more intellectually mature student.

Land-Grant Association Formed

Formation of a single association of major public colleges and universities is a step nearer as a result of action by the presidents of the American Association of Land-Grant Colleges and State Universities. The revised by-laws of the 75 year-old association now makes possible increased recognition of activities which they conduct in common with other public universities.

Revision of the constitution will come up for action at next month's convention in Kansas City, Mo. "So that higher education in America may have a more united voice," explained President C. Clement French of Washington State University, "we have been looking towards such coordination for several years."

Major changes in the by-laws would enlarge the Association's executive committee and give it more flexibility in operation, and would re-align the internal structure of the organization. The council of presidents would be returned, but the councils on graduate work and general extension would be converted to divisions. Thus, the current five divisions on subject matter would be expanded to make a total of seven.

Matters such as name, purpose, membership, and officers are contained in the proposed constitutional revision. New name for the organization is "Association of State Universities and Land Grant Colleges."

The Vermont Cynic

[illegible] Student Newspaper of the [illegible]

VOL. [illegible] OCTOBER [illegible] 1961 NO. 14

This Year's ...

This year's Homecoming is little different than any other--there are buildings to be dedicated, old friends to be met and new friends to meet. The traditional festivities which surround Homecoming are still with us. Despite this yearly routine, alumni continue to return to their Alma Mater.

Is it tradition that compels UVM's Alumni to return? Do they return in order that they might re-live for a night or so their college years? These are personal reasons-- more fully alumni return because UVM encourages them to do so.

UVM does not ask her alumni back in order to persuade them to donate large sums of money. We are well aware that although our alumni have achieved success, they are not millionaires. UVM does ask its alumni to take an active interest in this university. If this is done finances will take care of themselves.

Alumni are able to perform greater services to this university than give money. Alumni have at many times, contributed valuable professional advice. It is only fitting that UVM should utilize the product which it has produced and more fitting that the product should respond.

Another area of responsibility which is the alumni's is that of promoting interest in The University of Vermont among capable high school students. The Cynic hopes that interest in education has not ceased among alumni, and we hope that they continue to be instrumental in interesting young people in UVM. Furthermore, we believe that alumni must continue to educate themselves if they are to be effective and productive citizens.

In conclusion, the reputation of The University of Vermont, or of any other educational institution, is not only dependent upon its faculty and undergraduates but also upon its alumni. If the reputation of the University is to be preserved, The Alumni of The University of Vermont must uphold, cherish and further these ideals of an educated citizenry which are basic to a democratic society.

Floats Go Floating

For the first time in many years no floats will grace the University of Vermont Campus for any week-end. The Inter-fraternity Council believes that the time and labor expended by the various fraternities far outweigh any benefits.

The logic of IFC is admirable. Now alumni may view fraternity and sorority offerings by merely visiting each house. Now fraternities will also construct posters on their front lawns. How convenient!

This plan, somehow, is supposed to save the fraternities the time and expense of gigantic floats, and to save the City of Burlington the trouble of watching the students of UVM express their spirit, in non-destructive fashion. We feel that any "poster" worth the name will cost more any fraternity either time or money.

Homecoming should be for the Alumni! The alumni have enough feeling for UVM to travel many miles and incur some expense to visit their alma mater. Evidently The Inter-Fraternity Council does not care about tradition and its importance to alumni, or even about the University as a whole to do its share toward Homecoming.

The Cynic finds the logic of IFC dubious.

Letters To The Editor

flugle...

Dear Flugle

This year I got involved in [illegible] and about all I [illegible] with [illegible] hours. At last I [illegible] warfare and battle [illegible] and [illegible] are trying to pull the rug out. I [illegible] can't [illegible].

Get back for me - just before [illegible] come to call [illegible] the Dominicans. I [illegible] the sweaters stowed [illegible] your pop's still -- the same old [illegible] it is not [illegible] string with [illegible]

! [illegible]

P.S. Is [illegible] w sez wen you [illegible] our lawn and [illegible] home to play? [illegible] and [illegible] them crabgrass [illegible] from [illegible] peanuts.

Dear F.U.D.

After reading your series of articles on the Dominican Republic, I struck upon a great idea. I think we should sell this series of articles, along with [illegible] for the next [illegible] growing to a TV [illegible] of any [illegible] newspaper. I can [illegible] the TV producers could [illegible] a wonderful western [illegible] program [illegible] them. I can see it now - the [illegible] American in all the Dominican Republic [illegible] about to get killed [illegible] of his pistol. The next week [illegible] could show yourself [illegible] down the main street when all of a sudden the cops arrive and there is a mass brawl. If you don't like this idea, I am sure the Sunday paper could [illegible] these adventures into a comic strip. Your hero would be represented by an ass because that is what you sound like.

If you have something to say, forget the sensationalism, and write something a college crowd could digest.

Larry Koff

LIBRARY

To the Editor:

One evening last week, while studying in our library, I overheard a learned gentleman from St. Michael's decrying the poor facilities of the library, and the fact that most of the books he wanted were presumed stolen.

The added [illegible] is already growing [illegible] towards the [illegible] by outsiders.

We at the University [illegible] aware of the fact that [illegible] is a "taxed" [illegible] semester for the [illegible] looking for lost [illegible] and of searching for [illegible] smallest bit of [illegible] what to study. Sure [illegible] pay, why can't others [illegible] side the "University" [illegible] likewise? I am well aware [illegible] fact that UVM, being [illegible] school, must open to [illegible] to those who wish to [illegible] but is there no way [illegible] outsiders might help to [illegible] the library as we do?

I suggest that since [illegible] the library cannot be restricted to UVM students and faculty [illegible] that a library card or [illegible] means of identification [illegible] to those not at UVM on a [illegible] cost basis. Since we are already paying someone to sit [illegible] to check our texts when [illegible] them to scan the "[illegible] hoardes of peasants" [illegible] coming in. Let's get [illegible] our money since we are losing at this situation with typical Vermont practicality.

Richard [illegible]

Peace Corps

The intensive training for Peace Corps service in East Pakistan which 31 volunteers have been undergoing at The Experiment in International Living, Putney, Vermont since August 20 came to a close on Saturday, October 14 with brief graduation ceremonies. His Excellency Aziz Ahmed, the Ambassador from Pakistan and U.S. Senator George D. Aiken addressed the group, and Governor Raymond Kevser presented individual certificates to the volunteers. Gordon Boyce, Experiment president and a deputy director of the Peace Corps, introduced the guests.

Following ten days leave at their homes, the volunteers will report in New York City on October 25 and embark by plane for East Pakistan the next day. Upon arrival in Dacca, each volunteer will spend three weeks living in a Pakistani home, and three additional weeks undergoing an orientation program at the Academy for Village Development in Comilla. They are expected to be assigned to their duty stations about December 14.

The first multi-purpose project undertaken by the Peace Corps, the first unit to be trained off a college campus, and the first to be assigned to Asia, the volunteers who have been in training for it represent engineers, bricklayers, teachers, carpenters, nurses, youth workers, and audio-visual specialists. They will be working for two years at four separate sites within East Pakistan, a nation the size of Louisiana with a population of fifty million persons.

New WSGA Representation

To make WSGA "more representative than it has been in the past," the WSGA Council passed a motion at its weekly meeting, October 13, to bring the women students of UVM and the Council closer together.

After discussion, a motion was made that each council member act as a representative to two house committees, including those from dorms and sororities. These members would report any questions or problems from the house committees to Agnes Jaspers, head of the group, who would then carry the information to the Council.

This motion was passed. The group is to be set up in the very near future, according to Ann Parker, secretary of WSGA.

Syracuse Welcomes Dean Clifford

Reprinted from the Syracuse Daily Orange.

The Daily Orange would like to take this opportunity to welcome back to Syracuse University a person who will be of special importance to all Hill students. This is, of course, our new Dean of Men, Earle Clifford. Dean Clifford comes to a campus that is expanding and growing more complex everyday and the importance of his position grows along with it. At the University of Vermont Dean Clifford was known as a man who "could look you straight in the eyes" and who "always had his door open to every student at anytime". The calibre and sincerity of his remarks in today's Daily Orange convinces us that the man has not changed. It should also be noted that his concern and interest in the fraternity system is greatly appreciated and we [illegible] all look forward to a fresh approach and outlook on that subject.

Besides his experience as Dean of Men at the University of Vermont, Dean Clifford has a long acquaintanceship with the problems of Syracuse University. A graduate of Syracuse [illegible] a resident advisor, an administrative assistant in the Dean of Men's office and Assistant Dean of Men. We wish him success at his job.

We would also like to extend our best wishes to Dean Clifford's predecessor, Carleton Krathwohl who has decided to leave the storms of administrative life in order to enter the field of educational research.

EDITOR'S NOTE: We eagerly await the second thought of Syracuse Daily Orange!

STUDENTES

This week's author is a native Connecticut Yankee and a junior at the University of Vermont. He is majoring in the Liberal Arts College and is a member of Kappa Sigma fraternity. He is also a member of the Cynic staff.

[illegible] that on [illegible] morning in the [illegible] American Cafeteria [illegible] entered KOTC [illegible] and at a signal [illegible] sang in an [illegible] Spangled Banner. [illegible] understood [illegible] man-uniformed [illegible] and in this skew [illegible] The exhilaration is [illegible] ing an unbelievable

[illegible] dege. We are here as students, [illegible] selves. It is, I hope, not all students [illegible] selves for being here to [illegible] that we are [illegible] to better ourselves and perhaps to eventually [illegible] in which we will be living. How [illegible] we are indeed, abet such existence [illegible] expression that is quite obvious, [illegible] the situation in which we find ourselves in the world [illegible]?

[illegible] s in turmoil. We are, if our newspapers [illegible] with the imminent destruction [illegible] to ruin - not simply the various [illegible] innumerable cliques and countries, but of the [illegible] and spirit as well. We are led to believe that [illegible] America are in the right that we can and will see [illegible] becomes as right as we are. We will expel the [illegible] that would turn the world against itself to liberate [illegible].

[illegible] to be done? Oh, we hear from the advertisers, by [illegible] enforcing our system of ideas by replacing [illegible] principles to the settlement of differences between [illegible] at last, by the nuclear bomb if necessary. We should [illegible] to church, join the Army, [illegible] and now [illegible] so far as to stand upon [illegible] and sing the Star Spangled Banner.'

[illegible] Americans stand up on Friday mornings and sing the Star Spangled Banner'? Do the British? Do the French? Do the Russians? Of course not, you say. Don't be ridiculous. No, they sing "God Save the Queen," "Marseillaise" and "God Save Russia," respectively. And the Europeans have their songs of patriotism too, you say. Allowing this, there is one (horrors here!) that the French marching soldier sings - as indeed they were - to sing the "Star Spangled Banner" is by accident than by Divine revelation. I maintain that even if it is a bit jolting.

[illegible] a contradiction in this last assumption that is [illegible] well. In what conceivable way can thought and creativity [illegible] be brought to the question of dealing with the [illegible] problems if the essence of each problem is a conflict [illegible] two diametrically opposed and mutually exclusive [illegible] of right and wrong? Taking residence in either of the [illegible] "absolutes" simply increases the schism and complicates [illegible] problem instead of resolving or diminishing it.

[illegible] told that America is in the right, as I have pointed out. [illegible] America? America is freedom and tolerance. America [illegible] life, the democratic way, the endowment of all that [illegible] man. It is the path to a kind of heaven on earth. America [illegible] itself. And all mankind will be blessed with that heaven - [illegible] that is, as the bleakly existing victims of [illegible] Frenchism and, yes, Utopianism can [illegible] of belief and behavior that exists on [illegible] Iron Line.

NSF Offers Grants For Advanced Study

[illegible] will be given on January 20, 1962, at [illegible] centers throughout the United States and certain foreign countries.

The annual stipends for graduate Fellows are as follows: $1800 for the first year, $2000 for the intermediate year and $2200 for the terminal year. The annual stipend for post-doctoral Fellows is $8000. Limited allowances will also be provided to apply toward tuition, [illegible] fees and travel.

Further information and application materials may be obtained from the Fellowship Office, National Academy of Sciences-National Research Council, 2101 Constitution Avenue, N.W., Washington 25, D.C. The deadline for the receipt of applications for graduate Fellowships is December 15, 1961, and for graduate Fellowships, January 5, 1962.

UVM Awarded Research Grant For Computer

[illegible] University of Vermont has been awarded a $17,000 grant in support of the construction of its computing center.

[illegible] will be made by the National Science Foundation, Howard M. [illegible] director, announced recently.

[illegible] of the computing center.

[illegible] a three-year, two-phase program [illegible] undergraduate Engineering Program [illegible] of the International Business Machines Corp., under which UVM will get the computing center at no cost to the University. The donor will receive [illegible] for [illegible] the system will have [illegible] a replacement.

[illegible] per cent of the computer usage is for [illegible] use will be made of it by [illegible] being planned to give the [illegible] it. In one [illegible] of computer and programming [illegible] at the University of Vermont [illegible] a computer [illegible] the University [illegible] the computing center [illegible] the [illegible] the computer will [illegible] [illegible] a replacement.

PROFESSORES

[illegible] Assistant Professor of History [illegible] and Political Science, [illegible] Vermont, is a native of Burlington.

[illegible] years ago a group of [illegible] were gathered [illegible] Germany, [illegible] the issues, the [illegible] they [illegible] young men, [illegible] for protest, the [illegible] the [illegible], the [illegible] knows, now, that [illegible] these fronts [illegible] and that the [illegible] could all afford to [illegible] on any of them.

As students of [illegible] we should be participants [illegible] what is happening on the [illegible] front in the [illegible] with [illegible] conflicting philosophies. If [illegible] contending with [illegible] trying to [illegible] [illegible] front can [illegible] [illegible] people like a [illegible] about them can [illegible] [illegible] mutual action.

[illegible] of evidence to suggest that the [illegible] the [illegible] [illegible] a communist [illegible] a communist [illegible] stands for. Rather [illegible] [illegible] factory instructors in the [illegible] about providing [illegible] communist doctrine in the [illegible] and [illegible] [illegible] the average [illegible] what communism stands for and what it [illegible] goals. But [illegible] all. The average [illegible] committed to the cause of [illegible] [illegible] a reasonably [illegible] communist stands have taken [illegible] of the values for which [illegible] and hatred have traditionally [illegible] the religion of the devoted [illegible] Marx and Lenin are [illegible] Das Kapital as its Bible; Moscow [illegible] tomb of Lenin as its shrine; and the members [illegible] scattered throughout the world and its [illegible] these [illegible] the world [illegible] pretty well agree as to what [illegible] communism stands for and what it must do to save the world. The differences which separate them are trivial compared to the [illegible] which unite them.

[illegible] situation in democratic countries, especially in the United States, contrasts sharply with all this. For the most part we [illegible] that because an individual has been brought up and [illegible] in the United States he has an [illegible] group of [illegible] ideas and knows how to interpret them in terms of the [illegible] and opportunities of the twentieth century. Like [illegible] he [illegible] The average citizen speaks glibly of the values and aims of the universal, of liberty, equality, prosperity, the pursuit of happiness, [illegible] these are matters more [illegible] to him. Often [illegible] translate these ideals in terms of the problems of the present, [illegible] be hopelessly [illegible]. He is not sure [illegible] ought to mean in an [illegible] [illegible] [illegible] not certain whether equality should be [illegible] to medical care; [illegible] is in doubt whether the right to property [illegible] a civil or natural right. There are those [illegible] [illegible] the posts who invite us to [illegible] these [illegible] terms of the problems of a bygone age. They would be funny were it not [illegible] with such [illegible] tragic consequences.

[illegible] have an absence of American confusion and compromise, clarity and confidence we need only recall the people of [illegible] in Korea when they were asked by their [illegible] to explain and defend the cause of democracy. If the reports which appeared in the press at the time were true, the soldiers were most puzzled as to why while the [illegible] made a most [illegible] [illegible] were. Time and again, after [illegible] [illegible] of the [illegible] society, a [illegible] [illegible] [illegible] were of the [illegible], [illegible] [illegible] [illegible]

University Self-Study Nears Close

[illegible] report of the University Self-Study [illegible] January 1, 1962, according to [illegible] chairman of the Final Evaluation [illegible] following information.

[illegible] plan and objectives of the UVM self-study were set [illegible] President John I. Dey in the fall of 1958, and for [illegible] years studies have been conducted aimed at determining the present status, 2) projecting [illegible] to achieve the desired steps at all units within the University, and [illegible] needs of the University given the above. [illegible] all aspects of University life were investigated [illegible] been made by departments, colleges and administrative units, and by special committees. The Final Evaluation Committee had been assigned the task of compiling, consolidating, editing, and publishing [illegible] as a Final Report.

A self study provides a formal framework for [illegible] planning. Indeed, evaluation of the past is necessary [illegible] planning must be built. A university faculty and [illegible] the insights required in full measure should [illegible] alone create the pattern of future development [illegible] such a study furnishes in the most comprehensive way [illegible] of determining 1) the status of the university [illegible] its goals; 2) the direction the university should take [illegible] to responsibilities in the future; and 3) the methods [illegible] the objectives of the university can be most effectively [illegible] A university self study is, in short, a formal organized [illegible] introspection which helps a university [illegible] of the institution. A self study is not solely [illegible] designed to collect facts and [illegible] at a point [illegible] in time. Though it must begin with [illegible], it must proceed to analysis, evaluation, and [illegible]. To be effective, a self study should be an [illegible] of operations.

[illegible] for a self study of the University of Vermont [illegible] requires justification. UVM is confronted [illegible] of education generally associated with [illegible] changing order, but it has the additional [illegible] of a newly created state university. [illegible] other institutions it has the problem of [illegible] academic structure to a student body which [illegible]. These factors have produced changes in the University [illegible] of coping with these changes and keeping them [illegible] self study and planning.

The basic decisions which need to be made [illegible] institutional levels of concern are represented in the following table:

Level of Concern	Basic Decisions to be Made at That Level
[illegible] PHY	What are the educational needs of a free society? Who should be educated, to what extent, and by whom? What new knowledge and skills are required?
[illegible] TIVES	Which of these general educational needs should UVM seek to meet? What student groups should it serve and what competence in their knowledge, skills, and attitudes should it try to bring about?
[illegible] GRAMS	What instructional programs, research programs, and service activities will best serve the needs selected?
[illegible] NIZATION	How can the abilities, knowledge and skill required to carry out the selected programs and activities best be translated into assignments for specific faculty, research, administrative and non-academic positions? What functions, responsibilities, and authority should be associated with each position? What interrelationships should exist among these various positions in order best to achieve the institution's objectives?
[illegible] ING	What numbers, kinds, and qualifications of people are required to fill the positions and assume the responsibilities necessary to carry out the selected programs and activities?
[illegible] ITIES	What numbers, kinds, quality, and locations of facilities are required next to enable the staff to carry out the learning programs and activities?
[illegible] NCING	What operating and capital funds are required to provide the necessary staffing and facilities, and where and how can these funds best be obtained?

The questions raised here will be answered in varying degrees in the Final Report. In the Annual Report [illegible] President John I. Dey wrote:

"The Self Study is an investigation of current [illegible] It has made a comprehensive analysis of the [illegible] achievements, needs, and aspirations [illegible] activity - curriculum, teaching, [illegible] organization, athletic programs, [illegible] and student, public, and [illegible] a total.

"The self study will provide UVM with a sound [illegible] of anticipating needs and changes in [illegible] budget funds, of having views at [illegible] the University through the channels [illegible] created above, a self study [illegible] ongoing operation. Though [illegible] not be undertaken [illegible] a decision [illegible] the materials produced by the present study will become [illegible] for a continuing program of self evaluation [illegible] view of University concerns and problems."

Peace Corps To Train

State Day View

Nearly 1,000 Vermont high school juniors and seniors were guests of the University Saturday for the sixth annual State Day.

The students, representing 31 high schools, viewed the UVM vs. University of Rhode Island football game. Many of the schools arrived in the morning to tour the campus at which time members of the Gold Key sophomore honor society, acted as guides.

High schools taking part in State Day were

Rochester North Troy, Middlebury Springfield Poultney, Petersburg St. Mary's of St. Albans, Albany Danville, Woodstock Shelburne Williamstown, Hartford, Lyndon, Brigham Academy Enosburg Bridgade High School of Highgate Center, Bradford Junior Union School for Girls of Burlington and Marian of Essex.

Also Vermont Junior from Academy of New Haven, Essex Junction Twinfield Fairfax, Hardwick Bristol, Jericho, Black River High School of Ludlow Bellows Free Academy of St. Albans Shoreham, Johnson, Swanton, and Cambridge High School at Jeffersonville.

Knowledge of a foreign language is not required since all instruction in Sierra Leone is in English. However Volunteers will receive training in Krio, the lingua franca of the Sierra Leone hinterland. Training in the U.S. will not be with a view towards instruction in teaching methods, but rather, culture, economy and government of Sierra Leone, schools in which the Volunteers will be assigned, and instruction in preventive medicine and hygiene, Peace Corps functions and pertinent fundamentals.

State Of University

(continued from page four)

For the best demonstration of the University's intent to provide for its faculty and students the best climate possible for the primary responsibility they share, will come when the University-wide self-evaluation is available in January.

It is our expectation that the recommendations which will result if the self-study will provide the basis for the sound growth and change which the University will need to provide in the formative years of the 1960's.

I might add that almost everything the University has accomplished has been accomplished in the face of tenacious financial problems. Much of what needs to be done has been delayed because of the lack of financial means.

The University of Vermont has never been a rich institution materially, and we reluctantly confides there is little reason to suppose it ever will be.

But we must not be discouraged by those who would accent the negative generally, ignoring all that is positive. The University of Vermont has a rich educational tradition. The number of its able students who has attested the number of her achievements in education the quality of our service to State, region and nation deserve special emphasis.

In closing

It is now and has long been fashionable in our time, we suppose, to speak of nothing more than any other to become so involved with our failures that we deny ourselves the satisfaction of what some of our experiences have proven sound and healthy.

So, in this occasion when we dedicate our most important physical asset -- the new Library -- I believe the time is appropriate for faculty, staff, students and alumni to accept that obligation as their own; a dedication we inevitably must share with those who have come before us at this University, and with those who will follow.

The remarks of President Buckham, in 1904, sum up, I believe, the quality for which we called

"We are one of the seventy American institutions which are pioneers in the Experiment Center. We have had a part in a wrong, a fine in 1824 brought the institution near to extinction, we have known a bitter religious controversy in which were involved all the Christian bodies. We have been assailed for teaching a philosophy which now all call God. We have had our full share of hard times from short purses enough so we have fought a good fight and kept the faith."

Vermont's Sen. Morrill - His Legacy Lives On

Sen. [illegible] Morrill

[illegible] Land-Grant College and [illegible] is not [illegible] a success. One out of every five college students attends a land-grant institution. Forty per cent of all non-rated [illegible] from land-grant institutions. Of the living Nobel Prize winners who went to college in this country, 60 per cent earned degrees from Land-Grant colleges.

Figures on veterans, including [illegible] recognize the Vermonter's monumental work by naming a building on his honor.

In September [illegible] secular [illegible] the centennial gathered to [illegible] Morrill's memory, to study the origins of the great [illegible]

In another [illegible] a group of prominent [illegible] on Justin Smith Morrill [illegible] Foundation to [illegible] on Mar. 1. [illegible] time to [illegible] the [illegible] centennial of the [illegible] act.

A fund drive [illegible] Junior Achievement [illegible] the faculty and [illegible] Sens, the students [illegible] will be asked to be [illegible] the manner of the [illegible] their education possible.

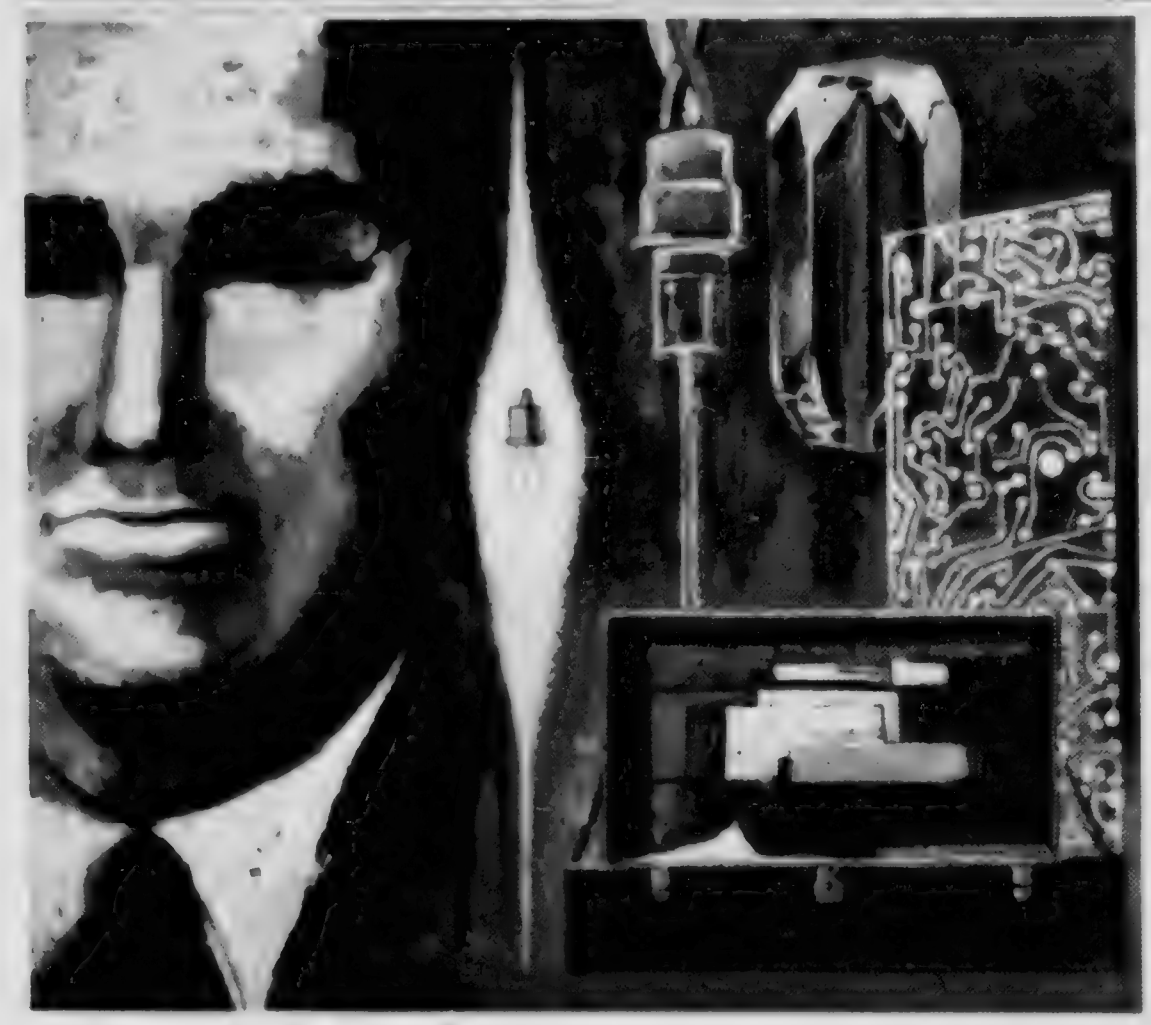
In a way, it is fitting [illegible] students should be [illegible] tribute, despite [illegible] faults. Morrill after [illegible] no stranger to long [illegible] and limited [illegible] son of a blacksmith, [illegible] training stopped at [illegible] that, he clerked in a [illegible] studied by himself at night, [illegible] rowing every book he [illegible]

In the middle of the [illegible] tors, the country store [illegible] center of all activity [illegible] was only natural Morrill [illegible] into politics.

(continued on page [illegible])

The Circular File

(continued from page seven)



[illegible] information to students who memorize late [illegible] week, cram for [illegible]. And these exams don't even correctly [illegible] the student's ability to store facts because "the student [illegible] reflect his general ability to use language to organize [illegible] papers [illegible] at least as much as they show what he has [illegible] the course."

SOLUTION?

Glazer's solution to this examination farce is as follows: [illegible] the examination, there could be substituted the demanding [illegible] which would encourage the students to do some original [illegible] and which would minimize the importance of the almighty [illegible]. The hours wasted by the professors correcting [illegible] papers could be spent "going over a student's research [illegible] with him -- something that is seldom done." If traditional [illegible] exams at all the few which must be given should [illegible] a set of challenging essay questions which demand that "the [illegible] world of reading and experience and perception" of the [illegible] will be utilized. "In effect they would be tested not on the [illegible] course, but on the sum of their work and the broad areas [illegible] judge in question.

Glazer's program would rid students of the injustices [illegible] the examination farce, but only an administration willing [illegible] to try something new and with an intense concern for the [illegible] tion of its students would give it a try. Antioch and Goddard [illegible] be such Universities; UVM is not. I'm too pessimistic [illegible] for a trial of Glazer's plan at UVM, for our administrative [illegible] cracy is too entangled with more pressing problems [illegible] education.

So, thanks to the examination farce, students who [illegible] cover an exciting new world of learning, find only stumbling [illegible] hoops, and students who came to college for an education [illegible] only with a grade.

Quality is the key to success at Western Electric

A healthy one. Our standards are high at Western Electric. But engineering graduates who can meet them, and who decide to join us, will be starting careers at one of the best times in the history of the company. For plentiful opportunities exist there in both engineering and management.

As we enter a new era of communications, Western Electric engineers are carrying forward assignments that affect the whole art of telephone transmission—from electronic devices to high-speed sound transmission. And in the management area, plans [illegible] several thousand supervisory jobs will be available to W E people within the next 10 years. Many of these jobs [illegible] will come from the Class of '62.

Now's the time for you to start thinking seriously about the general work area that interests you at Western Electric, the manufacturing and supply unit of the Bell Telephone System. Those who our representatives contact on your campus you'll be prepared to discuss career directions that will help make the interview profitable.

After 3 years with Western Electric, he will find many programs that will aid him in exploring the evolving course of his career – while advancing just as fast as his abilities allow. And he'll be secure in the knowledge that he is growing with a company dedicated to helping America set the pace in improving communications for a rapidly growing world.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial and chemical engineers, as well as physical science, liberal arts, and business majors. All qualified applicants will receive careful consideration for employment without regard to race, creed, color or national origin. For more information about Western Electric, write College Relations, Western Electric Company, Room 6106, 222 Broadway, New York 38, New York. And be sure to arrange for a Western Electric interview when our college representatives visit your campus.

HOMECOMING PROGRAM

FRIDAY, OCTOBER 20

9:00 a.m. – 5:00 p.m. Registration of Alumni and Parents – Alumni House.
2:00 p.m. Football – Freshmen vs Union.
6:30 p.m. Dinner Meeting of Commencement 1962 Class Reunion Chairmen, Cupola Motel.
9:00 p.m. Homecoming Ball – Memorial Auditorium.

SATURDAY, OCTOBER 21

8:30 a.m. – 11:30 a.m. Registration of Alumni and Parents – Waterman Building.
8:30 a.m. – 9:00 a.m. Family Associates Class Meetings – Waterman Building.
9:00 a.m. – 10:30 a.m. Coffee Hour for Alumni and Parents – Student Lounge, Waterman.
9:00 a.m. Dedication of Bailey Library.
10:00 a.m. Library Symposium – Ira Allen Chapel
12:00 noon Peerade of Floats.
1:30 p.m. Football – UVM vs Rochester. Centennial Field

AFTER GAME

Cocktail Hour for Parents – Zodiac Room, Hi Hat Restaurant
Cocktail Hour for UVM Alumni – Siesta Room, Hi Hat Restaurant
Roast Beef Barbecue – UVM Cage.
7:00 p.m. Ski and Winter Fashions Show Dinner Zodiac Room, Hi Hat Restaurant
7:30 p.m. Vermont Varieties – Memorial Auditorium
9:00 p.m. OPEN HOUSE for Parents and Alumni Hi Hat Restaurant

SUNDAY, OCTOBER 22

9:00 a.m. President's Breakfast for Alumni and Parents – Waterman Building

Morrill Act Allows For An Educated Citizenry

The Morrill Act is significant in having at least one state controlled [illegible] being to life [illegible] of equality of opportunity. An [illegible] college for all who [illegible] ability to learn [illegible] in world history years ago one [illegible] in 1,500 went to [illegible] with one in [illegible]. The land-grant system became the nation's [illegible] source of trained [illegible] manpower. The [illegible] was described in the [illegible] National Manpower [illegible] "the most important [illegible] government step . . . in [illegible] of scientific and [illegible] personnel."

[illegible] reason for the fundamental significance of the Morrill Act is that for the first time [illegible] were brought to the [illegible] learning and research [illegible] not limited to the confines [illegible]. Throughout the [illegible] they serve, land-grant [illegible] conduct special classes, [illegible] factories and farms to [illegible] results, they contribute to the cultural life of the [illegible], and they seek solutions to economic, social, and [illegible] ills that beset their fellow citizens.

Land-grant universities and [illegible] today enroll 20% of the nation's college population and [illegible] of all doctorate degrees. Under approximately 50% [illegible] graduates in sciences, engineering, and the health professions, and of those in agriculture, and 25% in arts and languages, business and commerce, and education itself.

Further testifying to the quality of teaching, research, and service of these institutions is the fact that 20 of 38 living American Nobel prize winners who went to college in this country have earned degrees from land-grant institutions.

They train almost half of all officers and reserve officers serving the armed forces through military training programs of civilian institutions.

The service to the American people of land-grant research alone is alone exceeds by many times the total amont expended at these colleges since they came into being. The following are but a few of hundreds of outstanding research achievements of these institutions:

- Discovery of steptomycin for treatment and control of tuberculosis.
- Development of anti-coagulant discumarol for use against blood clots; open heart surgery, and new methods of repairing defects of heart; use of radio isotopes for medical therapy and diagnosis.
- Development of the television tube, the transistor, the first cyclotron, and production of pure uranium.
- Research in space, satellite tracking, rockets and rocket fuels, special foods for spacemen.
- Basic work on fatigue of metals, isolation of helium and separation of helium from natural gas.
- Control of botulism for the canning industry, a process for making acetylene gas from textile waste, findings responsible for the beginnings and growth of the ceramics, wood pulp, and soybean processing industries.
- Development of hybrid corn, disease resistant bread wheats, controlled storage of fruits, and a butterfat test for milk.

Land-grant colleges form the heart of the country's amazing

(continued on page twelve)

Homecoming Committees

Homecoming Committee's: General Co-Chairman, Nancy Davis, Paul Chervin; Publicity, Georgene Walters, Phyllis Levine, Foster, Ann Maynes, Fred LaBelle; Ticket, Carl Sherter, Grace Waters; Mom & Pops, Toini Kalinen, Jeff Fank; King & Queen, Frank Pagitaro, Marti Russell, Bail, Melissa Herzel, Steve Clark, Half Time, Barb Hentz, Jeff Bennett; and Treasurer, Jim Neuman.

STUDENTES

(continued from page seven)

will sing the "Star Spangled Banner." So we will believe [illegible] the right in America. We will vow to reject as wrong [illegible] not America. And we will dutifully forget that in living [illegible] the definition of the most un-right, un-American [illegible] for that even the most radical right-wing "Star Spangled [illegible] singer could conceive; dogmatic, intolerant, hate breeding totalitarian fascism.

[illegible] the queen indeed – even if man must destroy himself.

PROFESSORES

(continued from page seven)

defense of the democratic way of life and refute Plato, [illegible] without exception they are unable to do this.

However, the ideals of democracy seem to be losing their hold [illegible] the feelings and affections of the average citizen. He takes [illegible] for granted and is emotionally detached from them. [illegible] national holidays like the Fourth of July and Memorial Day, [illegible] being, as they were intended to be, days of thoughtful [illegible] of our great heritage and occasions for a rededication [illegible] cause for which men in the past have suffered and died, [illegible] mere days of recreation and pleasure, bereft of all [illegible] significance.

The need today is for each citizen to rethink democracy in terms [illegible] the opportunities, the realities of the twentieth century. [illegible] of us must become persuaded in his own mind, and on [illegible] ethical and moral grounds, that democracy is superior to [illegible] and worth whatever sacrifices are called for. A student [illegible] not allow himself to be graduated and become a leader [illegible] democratic social order till he has done this. The stakes are [illegible]

WSGA

(continued from page six)

[illegible] expression of the idea of better representation was caused by a questionnaire, which was sent out last spring to all women students. Among other things, it asked, "Do you feel that your house committee acts as a representative or disciplinary group?"

The majority of those polled felt that house committees acted as disciplinary groups. There was also a lot of talk of the wide gap between Council and students.

Also, at the meeting, a committee was formed to "look into making WSGA's mass meetings more worthwhile," and to "form a purpose for having the meetings rather than just having them."

The committee will be formed of two members of Council and five non-Council members. The five non-Council members will be from the joint conference, which is held in spring and fall to discuss policies, rules, and problems, and is open to all students.

Plans are being made to make the next mass meeting, which will probably be in November, "more worthwhile."

THE TRUE AND HARROWING FACTS ABOUT RUSHING

It is well enough to sit around in Morris chairs and [illegible] sated by nothing. But it can easily make you forget the facts of life. You must leave your Morris chair and go out into the world. My Morris-chair president, who gives lectures for the Philip Morris Company, makers of Marlboro Cigarettes, [illegible] every [illegible] quarter-hour, the makers of Marlboro Cigarettes [illegible] as you know, most [illegible] in a moment cigarettes. Other [illegible] beautiful soul would [illegible] pack flavor, [illegible] such pleasure, as you will find in Marlboro. For [illegible] those who prefer crushproof boxes, Marlboro is available in crushproof boxes. For those who prefer soft packs, Marlboro is available in soft packs. For those who prefer to [illegible] cigarettes in bulk, please contact Emmett R. Sigafoos, friendly manager of our factory in Richmond, Virginia.

But I digress. I was saying that in order to know the true facts about college rushing one must go into the field and investigate. Consequently I went last week to the Indiana College of Spot Weeding and Belles Lettres and interviewed several million coeds, among them a local lad named Gerund McKeever. (It is incidentally quite an interesting little story about how she came to be named Gerund. It seems that her father, Ralph T. McKeever, loved grammar better than anything in the world and so he named all his children after parts of speech. In addition to Gerund there were three girl named Preposition, Adverb, and Pronoun and one boy named Dative Case. The girls seemed not to be unduly depressed by their names, but Dative Case, alas, grew steadily more morose and was finally found one night dangling from a pentagon. After this tragic event, the father abandoned his practice of grammatical nomenclature and white-collar children were subsequently born to him—eight in all—were named Everett.

They pledged more girls than they had rooms for...

But I digress. I was interviewing a lovely coed named Gerund McKeever. "Gerund," I said, "were you rushed by a sorority?"

"Yes, mister," she said. "I was rushed by a sorority."

"Did they give you a high pressure pitch?" I asked. "Did they use the hard sell?"

"No, mister," she replied. "It was all done in the most refined manner. They simply talked to me about the chapter and let me go for about three months and then I pledged."

"My goodness!" I said. "Three months is not very long for a sales talk."

"It is when they are looking you under water," explained Gerund.

"Well, Gerund," I said, "how do you like the house?"

"I like the house fine, mister," she replied. "But I don't live there. I mortuntery, they pledged more girls than they had room for, so they are sleeping some of us in the bell tower."

"Isn't that rather dank?" I said.

"Only on the quarter-hour," said Gerund.

"Well, Gerund," I said, "it has certainly been a pleasure talking to you," I said.

"Likewise, mister," she said, and with many a curtsy and bow we went our separate ways—she to the campanile, I to the Morris chair.

The Philip Morris Company makes, in addition to Marlboro the new unfiltered, king size Philip Morris Commander choice tobacco, gently vacuum cleaned by a new process to assure you the finest in smoking pleasure.

Mr. Carr To Lecture

Billing Student Center In Progress

Plans for the new Billings Student Center are well under way. The center, which will be housed in the present Billings Library, is to be in completion, Stan Dent, of A Shaw-Lawrence Lyman Kowell, pointed out last semester.

A temporary governing board, drawn up last spring and including members of the student body, has been considering the utilization of space in the renovated building. It has met periodically with the representatives of various organizations to establish their respective needs.

The architectural firm of Harkness, Lyon, and Hubbard is presently completing the detailed plans. Highlights of the new student center include an all-purpose lounge, offices for student organizations, and a downstairs coffee shop. A new office, that of Student Center Director, will be created to replace the now vacant CCSA office.

Plans began to take form last May, when the University trustees approved of the student center. A full week legislation and one thousand dollars was appropriated for the construction of the new Billings Library.

Subsequently, a committee consisting of Dean Anna Harkness, former Director Mer Earle Clifford, Dean Rector Mahoney, Assistant Master, Assistant Dean Boller, S.A. President Bill Bissonnette, S.A. Treasurer Bill Billings, Pan Hellenic President Warner, President of Men's Jerry Emer, President of Men's Dormitory Council Pat Bishop, and Director of Men's Dormitory Council Bill Cohn, began to map out definite plans for the use of space.

Some items of interest included in the student center are a reading and study lounge, a traffic controlled room, and areas for both TV and card-playing. Meeting conference rooms and additional filing space will be provided.

MORRILL ACT

(continued from page eleven)

a staff of farm research and extension education which put the results of experiments to use. One American farm worker produces enough food for himself and 23 other persons – an efficiency ratio without parallel throughout the world.

Public investment in agricultural research and education, and in industry, have joined with farmers to bring their total capacity to bear on problems of food and fiber production, handling, processing, and distribution. The result is ever-mounting quantities of food and clothing for a growing population at low cost to consumers. For example, it takes an American factory worker only 15 minutes of labor to earn a dozen eggs today, whereas it took an hour and a half years ago. The amount of working time required to earn a quart of milk has been cut in half. The same is the case with bread, corn, and potatoes.

Sen. Morrill

(continued from page ten)

After doing organizational work for first the Whig and then the Republican parties, he was the logical candidate to represent Congress when a vacancy occurred in 1855.

It was in the House that he won enduring fame as the author of the Land-Grant Act. He soon moved into the Senate, remaining there until his death.

A life-long student and world traveler in his maturity, Senator Morrill became an authority on finances, a scholar of English literature and an amateur architect of considerable talent.

Morrill became deeply involved in plans for the Smithsonian Institute, the Library of Congress, the Washington Monument, as well as the landscaping of the Capitol groundw.

Historians generally agree that his was the hand that shaped many of the major landmarks of Washington.

All these services, and more, earned him the title of "Father of the Senate" in the last years of his career.

Slipping into the grey mists of security of history, he was soon rediscovered by contemporary scholars and by his native Vermont.

The last Legislature righted an ancient oversight by placing his portrait in the State House. It also appropriated $15,000 for centennial activities. These activities were helped by a UVM student presentation in the House of Representatives of "The Trial of the Case." This one-act play by Prof. Betty Randel dramatized the Land-Grant debate in Congress.

Many other centennial activities are coming up. For the present now, however, the big thing is the drive to purchase the Morrill Homestead. Some day a permanent record of Morrill and his vision.

Casually yours . . .

'62 CORVAIR MONZA

NEW FACE, SAME SPORTING HEART

We might as well tell you straight off. Corvair's the car for the driving enthusiast. Think that lets you out? Maybe. Maybe not.

Until you've driven one, you really can't say for sure, because Corvair's kind of driving is like no other in the land. The amazing air-cooled rear engine sees to that. You swing around curves flat as you please, in complete control. You whip through the sticky spots other cars should keep out of in the first place. Especially this year, now that you can get Posi-traction as an extra-cost option. You stop smoothly, levelly with Corvair's beautifully balanced, bigger brakes.

And Corvair's found other new ways to please you this year. A forced-air heater and defroster are standard equipment on all coupes, sedans and both Monza and 700 Station Wagons. So are dual sunshades and front-door armrests and some other goodies. You'll note some new styling, inside and out. Nice. And safety-belt installation is easier, too, and cheaper. Another extra-cost option well worth considering is the heavy-duty front and rear suspension. It turns a Corvair into a real tiger.

So you can see we haven't really done much to Corvair this year. Why of earth should we? If this car, just as she is, can't make a driving enthusiast out of you, better take a cab.

CHEVROLET

A New World of Worth

And here's America's only thoroughbred sports car, the '62 CORVETTE. We warn you: If you drive a Corvette after your last outing of a Corvair, you may well end up a two-car man. And who can't blame you?

See the '62 Corvair and Corvette at your local authorized Chevrolet dealer's

Football Player Denies Lack Of Spirit

by Frank Bruno

Lack of spirit [illegible] the game [illegible] Vermont [illegible] Rhode Island [illegible] Saturday [illegible] Coach [illegible] Vermont [illegible] Rhode Island [illegible] Coach [illegible] Vermont [illegible] Rhode Island [illegible] Vermont [illegible] Rhode Island [illegible] Vermont [illegible] Rhode Island

Rams Win State Day Game
Cats Fight All The Way

[illegible] Little [illegible] of the [illegible] that watched [illegible] at an 18-6 de- [illegible] ground [illegible] the stal- [illegible] Cats.

[illegible] starting backs, [illegible] Greer, [illegible] UVM lacked [illegible] with Rhode [illegible] defensive line.

[illegible] one score [illegible] minutes had [illegible] period, Dom [illegible] attacked the [illegible] for the better [illegible] rolled out to [illegible] the Vermont 49 [illegible] into the arms [illegible] Weiss. Weiss [illegible] in the 30 and had [illegible] it over the [illegible]. The Cats went for two, [illegible] when Parlato passed [illegible] Bill Burke.

[illegible] the tide minutes [illegible] safety man Jim Falkner [illegible] the mid-field stripe, [illegible] from the toe of Leo [illegible] picked up a few key blocks [illegible] three would-be [illegible] on his way to paydirt. [illegible] for one point, but [illegible] net-legged through the [illegible] knocked down the at- [illegible] conversion. This knot- [illegible] score at six apiece.

The second quarter saw URI's [illegible] two scores. Early in the [illegible] the Rams marched 62 yards in 9 plays to make the score 12-6. [illegible] ning the Blue and White off to his left halfback [illegible] Tatro, who [illegible] from the one yard stripe for the tally. Rhody failed to [illegible] for two points.

Towards the end of first and Rhode Island [illegible] of the game. Defensive [illegible] Roder broke through the [illegible] forward wall, battled [illegible] attempted punt, picked up the [illegible] ball, and scooted 38 yards for a TD. Again Johnny [illegible] for the point but the kick was wide. From this point on, Vermont found itself on the short end of an 18-6 count.

The Catamounts' attempts to get back in the ball game were continually thwarted by a determined Rhode Island eleven. In the third period, Parlato led the Cats' on a 67 yard march which terminated on the Rams' 6 when Rhody held its ground.

UVM made a last effort in the waning moments of the game. Paul Harris, replacing Parlato, quarterbacked the Green and Gold to URI's ten, but lost the ball on downs. URI then ran out the clock to end the contest.

The credit-where-credit-is-due department cites messrs. Pete Weiss, Paul Toussaint, Dom Parlato, and Captain Bob Stone. All fought valiantly in a losing effort.

Coaches In Review

(Continued from Page Sixteen)

[illegible] he said, "I like molding [illegible] sportsmen. Besides, it [illegible] me young."

[illegible] C. Evans, coach of Fresh- [illegible] football, head coach of bas- [illegible] ball, and coach of freshman [illegible] ball, is a graduate of Ill- [illegible]. He started as a big ten [illegible] back. He graduated from Es- [illegible] High in Dayton, Ohio, and [illegible] Physical Education at Me- [illegible] High in Medina, New York, [illegible] 932 to 1937.

[illegible] joined the UVM coaching [illegible] in 37 and has establish- [illegible] respected reputation with [illegible] lar success in basketball. [illegible] the distinction of having [illegible] two present members [illegible] UVM coaching staff, Ralph [illegible] and Norm Strassburg. [illegible] has his work cut out [illegible] this year, with a small [illegible] of frosh gridders out for [illegible] positions.

[illegible] to become a coach [illegible] it is such interesting [illegible] challenging work. I have [illegible] associated with sports all [illegible], so it seemed natural to [illegible] a coach. I enjoy working [illegible] men. In 12 years I'm [illegible] to retire right here in [illegible]. It's a great place to [illegible] but not a place to get [illegible].

[illegible] L. Lapointe, backfield [illegible] basketball coach, [illegible] coach of baseball. A [illegible] graduate and former star [illegible] athlete, Mr. Lapointe [illegible] tenth year as Vermont [illegible] to coming to UVM he played major league baseball with the Phillies and the Cardinals.

When asked why he went into coaching he replied, "Mr. Kids needed food and I wasn't hitting the curve ball well enough for the Cardinals. But more important, I enjoy it."

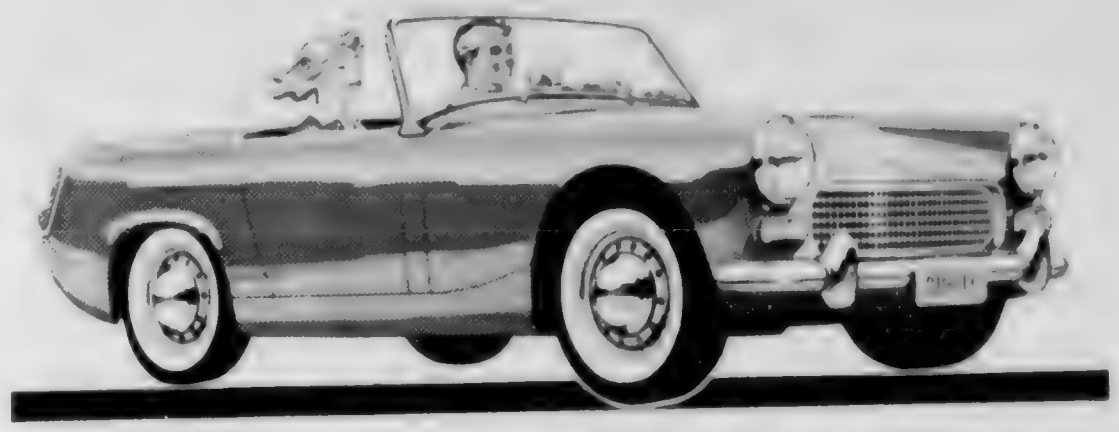
Michael J. Vendetti, line coach, and special assistant Director of Athletics. Vendetti is the newest addition to Vermont coaching. He graduated from Boston University in 1954, where he played three spectacular years of varsity football. From 1954 to 1956 he was an athletic and recreations officer in the Army, serving as a player-coach in Germany. Prior to joining the Vermont staff in 1959, he was freshman football coach at Boston University in '56 and a varsity tackle coach in '58.

Mr Vendetti says, "We have one of the best teams that we have had in many years. We should do well although we have been plagued by many injuries which have slowed our progress."

"Why did I go into coaching?" "I love sports. They are in my blood. My second sport is hockey because it is a speedy scientific contact sport." "I like it here at UVM, and I'm sure I'll like it more when we have our new gym. The prospect of a new gym also brings many more good sportsmen that will build the strength of our teams."

SIDELINE CYNIC

(Continued from Page Sixteen)



[illegible] players become more than just impersonal "passes com- [illegible]" or "yards gained." They are transformed from num- [illegible] to familiar personalities. This in itself helps to make [illegible] an exciting and pleasurable spectator sport.

[illegible] hotdogs and popcorn, pennants and peanuts, the cowbell and [illegible] band they're all part of the game. Football is a great [illegible] and the American college has helped develop it into [illegible] it is today.

Like Free!

It's sporty, it's speedy, it's a **SPRITE** ...and it's yours!

All you have to do is like win!

PACK OR BOX

Grand Prix CONTEST

FOR NEW ENGLAND COLLEGE STUDENTS

REGULAR OR KING

8 PRIZES 8
NEW ENGLAND WINNERS
'62 SPRITES

Here's the story, man. Eight, count 'em, eight of these swinging Sprites will go to eight guys or gals in New England Colleges. The other 41 states strictly don't count. Get the picture, get the odds? This is one deal you've got to get in on.

First thing to do, get your hand on a Registration Envelope, which gives you the easy Contest Rules. You'll find Registration Envelopes *everywhere* — all around campus and in your local smoke shops. Our Liggett & Myers Campus Rep has stacks of them, too — so track him down.

Next, you take a little quiz. It's printed right on the envelope, see, it's about sports cars and you can do it in like 47 seconds. Then smoke 5 wonderful packs of Chesterfields or L&M's (or, if you're a menthol man, Oasis), tear the bottom panels off all 5 packs, tuck them in the envelope, sign your name and mail it.

Now comes the brain work. If you pass the quiz you'll receive a limerick in the mail with the last line missing. So finish it! Send in the best rhyme you can think of. If the judges (an independent, impartial lot) think your line is the cleverest, you're like behind the wheel of your Sprite already.

Enter incessantly! Because there are 8 Sprites up for grabs, dad! The 4 winners of the Fall Contest will be announced at the end of the Fall Semester. Then the whole jazz goes into high gear again — and toward the end of the Spring Semester the other 4 Sprites go on the block. So stay with it all year — keep smoking those wonderful Chesterfield, L&M or Oasis cigarettes — keep trying! Win, man!

Buy 5 packs and get started. There will be 8 new '62 Sprites on the campuses of little old New England by next May, and you might as well jingle the keys to one of them in *your* jeans... right?

GET WITH THE GRAND PRIX ... ENTER TODAY, ENTER INCESSANTLY!

"Make Judgements Based Upon Values" ...Fey Speaks At Bailey Parley

Guy W. Bailey Memorial Library dedicated last Saturday. (Credit: M. Friedman, SPS)

Citing "almost instant communication which today brings us face to face with both bad and good news wherever and almost whenever it happens," President John T. Fey told a library dedication audience here that the great responsibility facing free men and women is the responsibility for making judgments based on values which dignify and promote the welfare of mankind.

Dr. Fey, Vermont Governor F. Ray Keyser, Jr., and alumni and student representatives spoke as the University dedicated its new $2,.00,000 library in honor of its 3rd president, the late Guy W. Bailey.

Speaking of the responsibility of free men, President Fey told his homecoming weekend audience that "the great joy of association with an institution of education is the joy of knowing one labors at the foundation of this responsibility, in an atmosphere where judgments must every day be weighed and tested against the total sum of what is known and what is discovered."

"Buildings," he said, "are but tools in this educational process, but at the cornerstone of the educational plant is the library, for it the mind of humanity -- both its wisdom and its folly; and the communication process slows in a library, permits of more deliberation, reminds that urgency is relative and that it is not really as late as the teletype machines would have us think."

"A great virtue of libraries," the Vermont president said, "is that they do not -- at any rate, should not -- have any axe to grind. The student -- whether he be freshman or faculty -- finds in them only such prejudices as he brings there, and the best opportunity he has anywhere to be unburdened of his errors."

African Conference Begins This Weekend At UVM

On Friday night and Saturday, an opportunity to learn about the various aspects of Africa will be offered. The Burlington-Friends-[illegible] in cooperation with UVM's International Relations Club will present an African Conference. The theme of the conference is "Africa Towards Freedom."

Africa today is a "new Africa" ---a continent undergoing rapid and often violent transition. After centuries of European domination, peoples of Africa have at last gained control of their own destinies. The forces of nationalism have erupted in Africa. People hear the names Angola, the Congo, the Union of South Africa, again and again, and always they are connected with the bitter struggle being waged for self-determination by the peoples of Africa.

Why a conference on Africa? Why is Africa of such concern to the entire world? In the past several years more than twenty nations have gained their independence. At present we and the Soviet Union are engaged in a fierce struggle for the allegiance of these non-aligned nations. But our concern must extend beyond the narrow confines of the cold war. The people of Africa are striving for those very same ideals which America has championed since she gained her own independence. Africa needs our help if she is to achieve true independence. Independence made possible by adequate living conditions and political stability. In order to aid Africa in the achievements of these goals we must understand their aspira-

(continued on page six)

Connecticut And Rhode Island Students In Fight Against Paternalism

Rhode Island

The University of Rhode Island BEACON reported in the issue of October 18 that their Student Senate had passed a resolution denouncing the paternal instincts of the administration. It appears that the administration had over stepped its boundaries by interferring in certain instances with "moral, intellectual, and social activities." They include university control over social functions, influence in the running of the Interfraternity Council and the women students' association, and an arbitrary expulsion of students.

The resolution drawn up by the Senate had this to say about Paternalism: "Paternalism in any form induces or re-inforces immaturity, conformity and disinterest among those whose imagination, critical talent and capacities for integrity and growth should be encouraged and given opportunity for development."

University Of Connecticut

Right of petition is being tested this week at the University of Connecticut, where students are fighting the "encroachment of their rights in the only way they know how." The goal of the students is to show that the majority have the courage to show their dissatisfaction with the lack of rights allowed them.

A major issue of drinking has been brought out, but the DAILY CAMPUS wants it know that "It is most necessary that our fight be clarified, that people get rid of the notion that we are fighting to drink. We are fighting for rights more basic than getting drunk. Don't let the people of the state sell us short! The drinking problem is divorced from our fight to handle student activities as they should be handled."

Their fight includes the rights to govern themselves, control their own finances, organize cultural and social events, have effective communications, and be able to pursue whatever activities they feel will benefit the student body as a whole.

A petition including the above-mentioned rights is to be circulated for signatures, and copies will be sent to newspapers and legislators, as well as the Governor of the State of Connecticut.

In answer to this recent disturbance, John Budds, chairman of the Board of Trustees stated that if they don't like the present regulations the students are "free to switch schools." He added that the trustees shall "vigorously defend the students against any threat to "their freedom of speech or petition." But, he felt that the trustees would continue to support the so-called paternal rules, which were "recommended to us by the persons whose devotion to a free press is also beyond dispute." He added that although the extracurricular activities in question are important, still, students must not lose sight of the major purpose of a college.

Peter And The Wolf To Battle

"Peter and the Wolf" will have a go at each other for the benefit of Vermont youngsters later this week when the George Bishop Lane Artists Series presents its first children's matinee of the current season.

The American Ballet Theatre in Burlington Oct. 26 for a performance on Red Lane Series, has agreed to present a special Lane children's matinee at 4 p.m. that day in the Memorial Auditorium.

The concert, fifth children's matinee to be offered by the Lane Series with cooperating artists booked on the regular series, is open to pupils and students of elementary and high school age.

The sponsoring Lane Committee is once again receiving the cooperation of area schools superintendents and principals, music teachers and supervisors, and the Friends of Music, a local group interested in making good music available to youth.

For its children's matinee, the American Ballet Theatre will present the second act of "Swan Lake" and "Peter and the Wolf" set to the famous score of Prokofieff. The program will last about an hour with an intermission between the two ballets. Featured will be the full American Ballet Theatre orchestra, scenery and costumes. Cast will be announced later.

The last ballet offered as a Lane children's matinee attracted 2200 youngsters when the National Ballet of Canada presented a two-act version of "Coppelia."

Cynic In Cornerstone Of New Library

"Freedom of Knowledge" is the theme of documents that were deposited in a sealed box which in turn will be sealed in the cornerstone of the new Guy W. Bailey Memorial Library.

Documents supporting the "Freedom" theme include the Constitution of the United States, the Library Bill of Rights, essays by John Milton, a University catalogue, and to represent the freedom of the press, the committee will include a copy of the Burlington Free Press and The Vermont CYNIC.

The Library Bill of Rights and a statement, "The Freedom to Read," are documents adopted and endorsed by the national organization, the American Library Association.

Milton's essays to be included are "Of Education" and "Areopagitica." The former states Milton's philosophy of education during the Renaissance period while the latter is his essay which later became the classic literary defense of freedom of the press.

From "Areopagitica" comes the quotation: "...as good as almost to kill a man as kill a good book; who kills a man kills a reasonable creature, God's image; but he who destroys a good book, kills reason itself, kills the image of God, as it were, in the eye."

Law Preview

A unique opportunity to learn of the nature of the new aftermath session of the Law School Admission Test will be offered at the Boston College Law School Brighton, Massachusetts on Saturday, November 4.

Those big experts in the matter of the nature and purpose of the newly added aftermath examination of the Law School Admission Test will address college upperclassmen and pre-law advisers on November 4. They are Assistant Dean Marvin A. Jaffett, Rutgers University Law School and Chairman Law School Admission Test Committee, Mr. John A. Winterbottom, Director Law School Admission Test and Vice Dean Louis A. Toepfer, Harvard Law School.

In addition to a full explanation of the newly emerged Law School Admission Test, there will be the opportunity to listen to Mr. William A. Geoghegan, Assistant Deputy Attorney General of the United States, who will discuss the availability of positions in government for young attorneys.

Pre-legal students will also have the opportunity to observe a mock trial sponsored by the seniors of the Boston College Law School. A supplementary advantage can be obtained in that pre-law advisers and deans of admission of colleges and law schools in the Northeast will also be present at this institute on November 4.

All upperclassmen interested in the study of law are invited to come at 9:45 to the Boston College Law School. No reservations or previous invitation is required.

The Sixty-Third Annual Military Ball

Front Row: J. Hoffman, S. Hutchinson, P. Masterton, C. Baird, S. Benton, Row 2 - M. Gardner, S. Holt, M. Hamilton, P. [illegible], S. W. Brown, S. Coutre, J. Beckley, J. LaBelle, D. Germaine, J. Rommel.
Credit Audio Visual Service, Lord

The Sixty-Third Annual Military Ball to be sponsored jointly by the two Military Honor Societies, Ethan Allen Rifles and Pershing Rifles will be held in the Waterman Building on Friday, November 10th. Price of admission is $2.50 per couple, with dancing from nine to one o'clock. The dress is formal and all are invited.

The following girls, whose names have been submitted by the Sororities and other women's residences, are candidates for Queen of the Military Ball: Susan Wachterman, Alpha Chi Omega; Jill Rommel, Simpson 2nd; Jane Arthur, Allen House; Brenda Hale, Alpha Delta Pi; Jean Beckley, Patterson 4th; Diane Germaine, Robinson Hall; Pam Middleton, Hamilton 2nd; Suzanne Holt, Mason 5th; Martha Gardner, Redstone Hall, Cat Sanderson, Mason 3rd; Ivy Sloan, Alpha Epsilon Phi; Mary Bean, Patterson 3rd; Patricia Goldsborough, Gamma Phi Beta; Barbara Wool, Simpson 4th; Kay King, Kappa Alpha Theta; Susan Clair, Delta Delta Delta; Mary Isanting, Mason 2nd; Susan Benton, Grassmount; Martha Russell, Coolidge; Joan LaBelle, Pi Beta Phi; Carol an Bard, Hamilton 4th.

The Corps of Cadets will vote on October 30 and 31 for five finalists from among these candidates.

At 2 P.M. on November 4th in the Memorial Lounge of Waterman Building, there will be an Informal Tea sponsored by the ladies of the Military Department. At this time, the five finalists, escorted by Advanced ROTC Cadets will be judged by a board of five judges. The judges from the University will be Professor Francis P. Colburn, Art. and Professor Virginia Y. Trotter, Home Ec. The judges from Burlington will be: Miss Anna Dela Chiesa, Fashion Editor, Free Press; Mr. E. J. Kirk, Kirk Photo Studios; Mrs. G. Norman Herberg, WCAX (Patricia). The girls will be judged on beauty, poise, and personality. The decision of the judges will be given, in a sealed envelope to Cadet Paul R. Higgins, Chairman of the Queen Committee, and the contents will not be made public until the evening of November 10th. At the Military Ball, four of the finalists will be named to the Queen's Court and one will be crowned Queen of the Military Ball.

Young GOP's

The American co[illegible] usually indifferent t[illegible] their effects upon [illegible] are of grades or the [illegible] weekend. But, man[illegible] reach voting age wi[illegible] and start to develop[illegible] ests for the future. T[illegible] Republican's Club tak[illegible] of this by providing [illegible] which the young adult [illegible] many of the facts of [illegible] develop preferences.

At the present time [illegible] about seventy-five stude[illegible] who are interested in th[illegible] they have only a gene[illegible] what the Republican Part[illegible] Three Wings are, let [illegible] they, themselves, prefer th[illegible] publican Party. After j[illegible] Club they can listen t[illegible] by noted Republicans, ra[illegible] liberalists to conservat[illegible] ories of government an[illegible] will be discussed in connec[illegible] basic issues, as federal a[illegible] cation, medical aid to the a[illegible] foreign policy. The speeches [illegible] new members get more of an [illegible] of why they joined the Cl[illegible] just what the Republican Part[illegible]

Besides informing students [illegible] politics, the Club aids the cam[illegible] as a whole. Often it works in co[illegible] junction with the Young Democrat[illegible] Club to sponsor debates, discus[illegible] sions, and films. They also work [illegible] the community to introduce the[illegible] ories of politics and the basic [illegible] tenets of the parties.

For those who would like to learn more about the club or intend to join, the first organizational meeting will be held Tuesday, October 31.

Israeli Art Exhibit

by Vic Hoffman

On Tuesday, October 24, an exhibition of Israeli art opened at the Hillel House. The exhibition consists of twenty original works of graphic art, representing three well known Israeli artists; Jacob Pins, Fredy Re'em, and Moshe Gat. The exhibition was arranged by Beizer Fine Arts Company of New York City.

To many people Israel has become synonomous with vitality, energy, and an ever changing, contrasting cultural scene. Its many fine artists who represent wide age differences, different personal backgrounds and trainings are a tribute to the growing traditions of their country.

Jacob Pins, who is the leading Israeli artist, was born in 1917 in Germany and has, since 1945, exhibited in One Man Shows in Tel Aviv, Jerusalem, Haifa, Boston Public Library, The Smithsonian in Washington, London, Paris, and various leading capitols around the world. He is represented in the Metropolitan Museum of Art, The Museum of Modern Art, Museum of Fine Arts in Boston, and other important art centers in this country.

Moshe Gat, the youngest [illegible] three artists, was born in [illegible] in Haifa. He was the Norm[illegible] Foundation Fellowship for Art [illegible] 1957. His works have hung [illegible] galleries in Tel Aviv, Mexico [illegible] and New Orleans.

Fredy Re'em, born on 19[illegible] Germany, has studied in Flor[illegible] and in Paris. His first One M[illegible] Show was hung in Jerusalem [illegible] 1957 at the Israel Artists a[illegible] Sculptors Association. Other e[illegible] hibits include Westmoreland M[illegible] seum in Pennsylvania, an[illegible] son, Arizona in 1960. In 1957 M[illegible] Re'em won the Florence Fl[illegible] Medal. The Library of Congr[illegible] purchased one of his works [illegible] 1960.

All of the artists represented [illegible] the exhibit have also st[illegible] Bezalel School of Art in Jer[illegible]

Visitors are welcome to [illegible] this interesting show at the Hillel House, 389 College St. Monday through Thurs[illegible] are from 1:30 P.M. to 5 [illegible] and on Fridays between [illegible] 4:00 P.M. The house will [illegible] on Saturdays but will be [illegible] Sundays from 1 P.M. on. The exhibit will close on Sunday, November 6 at 6 P.M. All works [illegible] sale. Price list on request.

Fey Predicts Expansion

[illegible] T. Fey, president of [illegible] of Vermont, outlined [illegible] of UVM and the [illegible] schools of the state in [illegible] student expansion in the [illegible].

Speaking before about 70 members of the Vermont Headmasters [illegible] who were the guest of [illegible] at a luncheon last [illegible]day. Fey said that by [illegible] it was expected that about [illegible] Vermont high school students [illegible] enrolled at UVM as opposed to about 1800 currently. Looking toward the mid-sixties, he said that this would mean about a [illegible] ratio of in-state to out-of-state students.

Fey also discussed the various building projects underway or soon to be started and said that this construction involves a cost of about $[illegible],000,000.

The headmasters were a part of the 3,000 teachers from the state who met in Burlington for the 129th annual convention of Vermont Education Association.

Hilberg To Speak

Prof. Raul Hilberg will give a presentation on a theme which he dealt with in the first issue of the *Cynic* and with which he opened last year's season of the Barn: "Dis-Orientation.

Prof. Hilberg to be special guest this Sunday evening, October 29th at 8 P.M. The Barn will begin its third year of providing thought-provoking discussion on topics current at UVM, in the community and the world.

The atmosphere at the Barn is relaxed and informal with ample opportunity for the free exchange of ideas and opinions. Faculty members and administrative personnel are frequently in attendance at the Barn adding to the quality and spirit of the discussions.

The Barn meets at 43 S. Prospect St., just north of Waterman Building at 8 P.M. every Sunday evening during the school year.

Kake Walk Secretary

Elaine Wright will act as the new secretary of Kake Walk for 1962. (Credit: Corr Studios)

Elaine Wright, a senior from [illegible] Brook, New Jersey, was chosen last spring as the secretary for Kake Walk 1962. She was picked from among several names submitted to the Kake Walk Directors by different living units. In her new position Elaine will handle all correspondence, and in addition will be in charge of the annual Kake Walk scrapbook.

A member of Alpha Delta Pi sorority, Elaine is presently stewardess of her house. As a home economics major she is interested in clothing textiles and is an assistant in the Annual Home Economics Fashion Show.

Besides these activities, Elaine can be seen leading the majorettes squad during the half-time performances at football games. But, all this doesn't detract from her 82 average.

Clarkson College

Potsdam, N.Y.-(I.P.)-Following an extensive evaluation of its mathematics curriculum, Clarkson College of Technology has organized a program leading to a bachelor of science degree with a major in mathematics. The new program supplements the present major curricula in engineering, physics, chemistry, business administration and industrial distribution.

Dr. John Parry, chairman of the Mathematics Department, pointed out that a unique feature of the program is a sequence of elective courses from the sophomore through the senior year, selected to fit the student's desires in fields of application.

"For example," he said, "A student may take an elective sequence in physics which will give him 28 credit hours of physics in addition to his major in mathematics; similar elective programs may be chosen in electrical engineering, general engineering, economics and actuarial science or in other fields designed to meet the students objectives."

The requirements for entrance to the mathematics program are the same as for the other science and engineering fields. The first year is identical in these fields, and the second year similar enough so that a student need not make a final decision as to his major until the completion of his sophomore year.

The requirements for graduation with a bachelor of science degree with a major in mathematics are 128 credit hours, as in the other programs. This includes at least 42 hours of mathematics and 32 hours of liberal studies, including a year of German or Russian.

The Vermont Cynic

VOL. 79 OCTOBER 26, 1961 NO. 15

O You Vermont Girls

"Behind every successful man there is a good man."

"Behind every successful dean there is a good secretary. In fact, a slew of secretaries surrounds most of the deans and administrators we know.

Pick a dean -- any dean. Stroll into his office. Saunter up to the first secretary. Talk to her. Say, "Mark! The Charles Winfield Waterman and Anna R. Waterman Memorial Building is burning. The Philosophy Department is on fire -- both of them!"

The secretary will smile, and politely direct you to the second secretary, who is busy filling out her boss's self evaluation report. Grab her by the lapels and shout, "There's an axe-murderer chopping his way through the crowds in the book store! He's already half-way through Greeting Cards, and he's heading for the pink sweatshirts!"

The second secretary will hand you a form to be filled out in triplicate and direct you to a chair. You are waiting to see the chief secretary..."The dean is in con-fer-ence just now and cannot be disturbed."

While waiting to tell the chief secretary about the deadly pythons that escaped from a wild animal show into the ladies' room in the library, pause, and reflect for a moment. Have you ever seen the dean? Have you ever broken through the cordon of women that shields him? Or, have, like so many others, been aided by the ladies without ever needing to see the boss.

The reason behind this frequent occurrence is explained by a well-known department chairman. It is his theory that the secretaries actually run the administrative offices of UVM. The bosses confer, convene, and confuse: while the secretaries quietly do all the work that must be done.

If this sounds remote, take a case in point. Last year's Coordinator of Student Activities, Mr. Arthur Mahoney, performed his important duties with the aid of a secretary, Mrs. Foster Kulski. This year Mr. Mahoney has gone to his just reward at that happy hunting ground of administrators, Syracuse University. It came as no surprise that his secretary now does his work and hers, and does them efficiently, quietly, and with less red tape than ever before.

The only distressing aspect is that Mrs. Kulski is still getting paid a secretarial wage -- roughly one-third that of the COSA.

All the example shows is that it can be done. That secretaries manage the administrative offices is merely a theory. Actually, most of them probably lack the education necessary to skillfully perform the difficult art of deanmanship.

UVM Calendar

October 26 through November 1, 1961

THURSDAY, OCTOBER 26

Lyle Lectures. American Ballet Theatre. Memorial Auditorium. 8:15 PM

FRIDAY, OCTOBER 27

International Relations Club and Society of Friends Conference on Africa, speaker, G. Mennen Williams, Ira Allen Chapel, 8 PM

SA Movie: *Dead Set*, Southwick Gym, 8:00 PM.

Shabbush Hillel House, 7:30 PM

Friday Evening Service, Synagogue Center, 8:30 PM.

SATURDAY, OCTOBER 28

Varsity Football - Norwich - 1:30 PM.

Frosh Football - Williams - Away.

Saturday Service - Synagogue Center - 8:30 AM

International Relations Club and Society of Friends Conference on Africa, speakers and discussion, 9:30 AM to 4:00 PM.

Reception and Opening of African Art Exhibit, Fleming Museum, 7:30 PM

Dance, Hillel House, Open to all, 8 PM.

SUNDAY, OCTOBER 29

Mass - Ira Allen Chapel - 9 AM & 4:30 PM.

Protestant Worship Service - Ira Allen Chapel - 10:30 AM.

Reception for African Students - Hillel House - 2-4 PM everyone welcome.

MONDAY, OCTOBER 30

TUESDAY, OCTOBER 31

WEDNESDAY, NOVEMBER 1

Holy Communion (Episcopal) -Little Chapel, Ira Allen - 7 AM Breakfast following.

Letters To The Editor

Billings To Bailey

To the Editor:

On Monday night, October 16, the members of Student Association Council canvassed every living unit on campus to determine student sentiment for operation B.B. For those of you who were not reached, B.B. constitutes the Billings to Bailey Library move. Council briefed the students on the background of the move, and asked their support. As we see it, the student-faculty move has three distinct advantages: 1. as students, this is our golden opportunity to show the administration that we are responsible members of the college community, 2. our library fee won't be increased to handle the extra financial burden of moving, and 3. the sooner the library is moved, the sooner we get into Bailey and get the Billings Student Center.

Enthusiasm has been overwhelming to date, and only about half the petitions circulated by Council members have been returned. We already have approximately 1200 signatures from students who are willing to work in and support the move.

As the date of completion draws nearer, it is at this time safe to assume that the move will take place the third week in November. Students will be called by living units to meet at the Cage. From there they will be dispatched to Billings, Bailey, Wilbur, and Waterman. In the next few weeks, more specific details will be announced.

Anyone who wasn't reached can sign a petition in lower Waterman on the S.A. bulletin board.

Sincerely,
Suzie Chagnon,
Chairman S.A. Library Committee

Splendid Symposia

21 October 1961

To the Editor:

It seems fitting on this Saturday when surely every scholarly spirit on campus has received a lift from the splendid symposium, "The Challenge to Scholarship," which has served to dedicate our new library, to say a word of special appreciation to the members of the library staff and of the Senate library committee.

One of the difficulties of any great forward step is the obvious and often overlooked one of getting the work actually done. The kind of work which Professor Herbert McArthur, chairman of the library committee, and his group have been doing quietly and untiringly and effectively was indicated to us all by the calibre of men who took part in the symposium today. It must be a matter of pride to every member of the university that we can supply three men from our own faculty -- Professors Evans, Mooney, and McArthur -- who can add to the delights of a symposium which includes among its speakers Professor Roland Herbert Bainton of the Yale University School of Divinity. Those of us who were present will not soon forget the love of books and the love of the human spirit manifested by Professor Bainton as surely as by his medieval predecessor, Richard de Bury, whom he quoted so charmingly.

To the library staff we owe much for working cheerfully (so far as we can see) and efficiently to make library materials available to us during the difficult transition period. It is particularly hard to carry on work during an interregnum when one chief administrator has left and the new head has not yet arrived, and to have to perform this task while carrying out a delicate and complicated move to new headquarters must be especially trying. Under the direction of Mrs. Helen [illegible], assistant director and current acting director of the library, the staff of librarians and assistants, including student assistants, are doing what seems to me to be a splendid job.

That job is in the tradition of the remarkable piece of good planning and effective action which was carried out in the 1840's when UVM's library made its first great expansion. The five teacher-administrator-librarians who were the entire faculty bought nearly seven thousand volumes for ten thousand dollars by the simple process of sending one of their number, Professor Torrey, to London to spend a year getting the best bargains in essential books that he could find. The five had first determined what were "essential books" by having each man "draw up a list of desired volumes in his own field, working on a principle described as follows by President John Wheeler: "It was then determined that only those books should be selected, so far as possible, on these various subjects, which marked eras in the progress of knowledge in them, and which therefore, must be mainly the productions of original minds."

Sincerely,
Betty Bandel
Professor of English

Ed Talks Back

Dear Mr. Koff,

In last week's *Cynic*, you offered me some brilliant suggestions -- thank you. Now, if you'd only consent to manage me we might be able to put some of your ideas into effect. Seriously though, I apologize if I have created the impression you so vividly brought out in your letter. My purpose in writing these articles was not to appear as a pseudo-Errol Flynn. It's just that by relating my experience there, I feel I can best convey what is actually happening in the Dominican Republic.

A person who has never been further south than Brooklyn may argue as to the validity of my experiences. All I can say is what I have written is true, and if one goes today to the Dominican Republic, a country brewing on revolution, he will find himself involved in similar experiences. This past week riots have broken out in Santo Domingo, Santiago and San Francisco de Marcoris. The support for the opposition is rapidly spreading. The government in response has been carrying out mass arrests and has labeled the largest and most conservative opposition group (Union Civica) Communist. The Dominican Republic is simmering, any day it can boil over.

Next week I will write of my interviews with the various opposition leaders -- what their aims, difficulties, etc. Mr. Koff, you will [illegible] my last article.

Sincerely,
Ed Kretzu

Empty Seats

To the Editor:

Last Saturday all to[illegible] o'clock classes were [illegible] maternal administrat[illegible] concerned that Jon[illegible] his sleep after the [illegible] Ball on Friday night, [illegible] Sister snatch fort[illegible] order to appear glam[illegible] afternoon's football [illegible] classes were cancell[illegible] students might hear [illegible] guished scholars join[illegible] sium on "The Challeng[illegible] arship", honoring the [illegible] ficant contribution to the [illegible] tual life of the univers[illegible] a decade.

The empty seats in the [illegible] were embarrassing. A[illegible] of one hundred student[illegible] would be a generous one.

We are grateful for st[illegible] thusiasm in moving [illegible] the old to the new libra[illegible] wish there had been [illegible] thusiasm over the chall[illegible] scholarship which the [illegible] Bailey Memorial Librar[illegible] sents.

Sincerely,
Mrs. Helen [illegible]
Acting Director, UVM Li[illegible]

193 Pints

To the Editor:

The entire Center staff [illegible] in extending thanks to the [illegible] versity of Vermont stud[illegible] for their generous resp[illegible] the October 23 blood draw[illegible] you know, the goal was [illegible] so the final total of 193 [illegible] that day exceeded our expecta[illegible]

This was the best blood [illegible] at UVM in the past two [illegible] continued the outstanding [illegible] compiled by University of Ver[illegible] students in support of the [illegible] Cross blood program. As [illegible] of the drawing, the Ethan A[illegible] Rifles deserves every comme[illegible] tion. Maurille Fournier and [illegible] committee handled the man[illegible] tails in excellent fashion [illegible] the drawing went off smoothl[illegible] efficiently.

Thanks to these unself[illegible] donors, we are able to [illegible] providing all the blood req[illegible] every patient in the 62 Ver[illegible] and New Hampshire hospitals. [illegible] know these patients and the[illegible] milies join us in thanking all [illegible] helped to make this drawing [illegible] an outstanding success.

Sincerely,
Edward R. Stear[illegible]
Administrat[illegible]

STUDENTES

Arnold Bendich, [illegible] major from [illegible] is [illegible] outspoken columnist.

Credit: Parke, S.P.S.

[illegible] presented by an im- [illegible] psychological war-orientation pro- [illegible] of government, [illegible] and labor, is slowly [illegible] to a national way [illegible] is totally alien [illegible] common sense. The [illegible] of this statement [illegible] rather be dead than [illegible] are, of course, many [illegible] and ramifications [illegible] ation; but succinctly [illegible] decadent of dogmas [illegible].

This war-conditioning embraces a myriad of modes. On the level [illegible] we see it, manifested in the everyday vernacular of the [illegible] student body.

"Shot down." Ah ha!, you say, the quoted has just been refused [illegible]. What else could this mean?

[illegible] it. The obvious meaning here is that an exam has been [illegible] a high grade.

[illegible] gas. Of course, someone has just failed an exam.

"Let's go troops," shout the sideliners at an inter-fraternity foot- [illegible] game expressing their desire for the crusaders of one team to [illegible] the standards of their chosen brotherhood.

"It was a blast." No paraphrasing is needed here.

These exclamations are seemingly innocuous. But what is the et- [illegible] of these cliches? For a start, they all elude to some aspect of war; and here is where we must stop.

To look into their etomology, we must observe the means by whic[illegible] war propaganda is disseminated to our most receptive public. How [illegible] you are not as yet indoctrinated with the concept of the "Free World" and the "Slave World"? Because we have been incessantly exposed to these terms, it is nigh impossible for one not to equate Russians with slaves, and their Communist leaders with diabolic monsters. Does this diminish the probability of war? Not as I see it.

[illegible] of the thousands of recruiting posters that grace the sides [illegible] buildings, billboards, and barns. No longer do they simply say, "Join [illegible]." Instead, they are depictions psychologically designed to create, in the public, a mind set that tolerates the production of additional death and destruction. The Marines build "men" -- but they build men who destroy.

[illegible] doubt that we are deluged by fall-out shelter propaganda? Nearly every national institution has been permeated by this phase of the propaganda effort. Ironically, even the ecclesiastics perpetrate war-mongering. Rabbis have advocated that shelters should be built in all new synagogues and, in some circles, guns are to be kept beside the pigeon tanks and the high nutrition concentrates. Also, schools are now to be built with shelters. To add the crowning atrocity, a new motel is now being built with accompanying shelter space for all its guests.

In some deranged reasoning, big business leaders think that it is worth the risk of total annihilation in order to fatten their purses. In weapons production money is made; the more bombs built, the more profit gained. But, in the process, more people are led to become increasingly obsessed with the idea that war may be worth it. The Birch Society is headed by a well-off candy magnate, and is staffed with other [illegible] personages. Coincidence?

Due to the unremitting deluge of warisms, people have come to regard [illegible] their imminent death with complacency. Statistics are everywhere available on how many people will be lost in the first nuclear attack. But the statistic N-million doesn't adequately convey the ugliness of such a concept. Think not of N-million casualties; do think of N-million individual, discrete tragedies, each of which is likened to an Oedipus: N-million passionate loves brought to an abrupt and violent vaporization. And this is but an infinitesimally small glimpse of what war will mean; but just a column in the paper saying N-million will die in the first attack.

War propaganda permeates the very air we breath--and so does its [illegible] radiation.

[illegible] proof of the origins of these war-mongering exclamations is their [illegible]. "Shoot down," indeed!

Tales Of The Sea Reborn

[illegible] Thomas Philbrick and the Development of American Sea Fiction," put out by Harvard University Press, is a new book by Dr. Thomas Philbrick of the English Department. In this book, the first to [illegible] subject, the book covers the growth of the sea novel during the first half of the nineteenth century, and goes up to the period immediately preceding the writing of Melville's "Moby Dick."

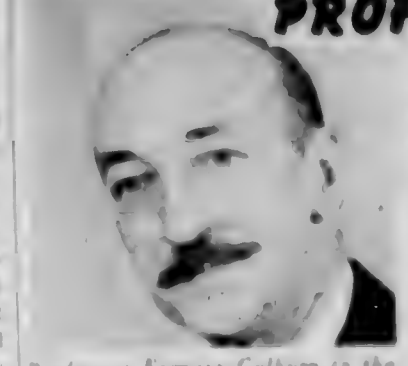
Dr. Philbrick, in establishing a context for "Moby Dick," has compiled a literary history of the background from which this book emerged. Stories of pirates, packet ships, sealing, sea exploration, trading and whaling strongly established a trend in the direction of sea fiction.

Here is Dr. Thomas Philbrick of the English Department as he peruses his new book.

Credit: A. Rush, S.P.S.

But, events of the latter part of the century minimized the importance of such literature. The naval power of the United States dwindled as the nation looked landward; writers turned to the events of the Westward movement; interest switched from the sea to inland topics; Cooper's maritime novels gave way to his tales of the forest. As the sea novel had appeared on the American scene and had rapidly grown popular, so did its popularity suddenly wane.

By searching the range of American fiction of the nineteenth century, Philbrick has produced a book which rediscovers this early period which dealt with sea lore. It is clearly a specialized study for the student of American Literature.



Former Student Receives Scholarship

William E. Adams, who was awarded the Bachelor of Arts degree by the University of Vermont in June, 1960, as the recipient of a scholarship to the Graduate School of Education, University of Chicago, according to Herman G. Hartley, Dean of Students. A member of the second group of students to enter the new Master of Arts in Teaching program, Mr. Adams will become a candidate for the Master of Arts in Teaching English degree.

Developed with assistance from the Ford Foundation, the Master of Arts in Teaching program is designed to produce high school teachers who will be outstanding [illegible] competence and [illegible] effectiveness. Unlike most of the new two-year programs [illegible] graduate study in education and in one of twelve teaching fields (biology, chemistry, English, French, geography, [illegible], mathematics, [illegible], physics, Russian, social studies or Spanish), during the second year, the Master of Arts in Teaching participants will complete part-time teaching in a selected high school at an appropriate salary.

While attending the University of Vermont, Mr. Adams was active in the [illegible] and was [illegible] Fraternity. His present address is 475 Fawn Avenue, Glen Ellyn, Illinois.

PROFESSORES

Professor Francis Colburn is the [illegible] artist in residence. He is [illegible] his style of teaching, and his [illegible] humor.

Credit: Picard

Archibald MacLeish, speaking of his poetry class at Harvard, once said, "I [illegible] have some ears that are young but some ears." The [illegible] of God and a proper attunement of genes will produce a poet and, by extension, a painter, sculptor, composer, dancer or actor).

I'm afraid MacLeish was right. A teaching career which began shortly after the Second Battle of Bull Run and shows every sign of going on forever as student recently guessed my age at thirty-eight) has convinced me of his wisdom.

One of the reasons for art courses in college is setting the stage for an accident, just in case. If the rare individual with the unaccountable itch discovers that when he is painting or sculpting, acting or playing a fiddle he knows exactly where to scratch, we probably have an artist on our hands.

But this individual is indeed rare. No art teacher with his marbles intact expects to produce many artists. No English teacher expects to produce many writers, after the first few misanthropic years. As a matter of fact it is somewhat frightening to recognize, and in some way bear responsibility for, the exceptional purse amongst the hundreds of annually flapping sows' ears. It's a little like playing toss and catch, bare-handed, with a tennis ball and having the ball arrive in your hands, on one throw, an extremely hot potato.

So in Heaven's name why teach art? Most art teachers (all of ours, by the way) are pretty excited about the undertaking because they really believe the old saw about man's not living by bread alone. They are sure that art is one of man's crowning glories, quite as worthy as the discovery and use of antibiotics or the achievement of the hydrogen bomb. They want to pass the good word along because they are convinced that potent all, good engineers and doctors and diplomats and inventors of super-effective bombs will be better ones if somewhere along the line, preferably early, they are exposed to the humanizing influence of the arts.

Allowing for understandable biases, they are not overly concerned with whether the exposure comes through studio courses in painting, sculpture or crafts, art history courses, a drama or dance workshop, or indoctrination into the structure and sound of a Mozart quartet. It surely can come about through wisely guided efforts in creative writing.

One of my biases is toward the studio arts. Studio courses have virtue even for the vast majority not afflicted with the true call. Such courses offer--indeed demand--the creative act. And the veriest dolt becomes a better dolt when he discovers the rewards of the creative act. Studio courses by their nature needle the imagination into functioning. A well-oiled imagination is a blessing in any profession, including that of housewife.

History of art courses always point up man's never ending attempt to give shape and meaning to his environment and his life. We hope history of art students will be tempted to join the struggle as they shape their own environments.

I suspect MacLeish, had he been cornered, would have admitted that the students attending his poetry writing workshop came out of the experience wiser and more delighted readers of poetry, even if not producers of it.

Art teachers hope their charges will emerge with an understanding of the difference in purpose between a Saturday Evening Post cover and Picasso's Guernico mural. I suspect that good music teachers hope their students will approach, genuflect before and pass through Tschaikowsky, and on to Mozart, Bach and even Carl Orff. Surely good English teachers know that Thomas Wolfe has to be tasted in one's youth, but hope to proselyte in the direction of a more mature taste.

No university should let its product loose upon the world without having had a good hard brush with one or more of the arts. The institution whose graduate once asked Toscanini, "Tell me, sir, just what are Brahms?" is to be condemned. Very true, we can't expect a purse every time. But some sows' ears are handsomer than others.

Malcolm Cowley once expounded to me the theory of the three convolutions. On the first convolution one is enamored of Strauss waltzes, cover illustrations by Norman Rockwell, mystery novels by Agatha Christie and sometimes (God forbid) verse by Edgar Guest.

On the second convolution one spurns these seemingly too popular expressions and turns one's allegiance exclusively to Bach and/or Orff, to Paul Klee, to Franz Kafka. (This is the stage at which one often takes up the playing of the recorder, in exclusive little groups.)

But on the third convolution a mellow wisdom sets in. One loves the glories of Bach and also the winy charm of Strauss. One laughs or weeps unabashed at the truth of Rockwell's cover illustrations and comprehends as well the wonder of Paul Klee's work. One reads Agatha Christie because it's fun and also Kafka (which is not always fun).

The point is that one has learned not be a snob, but rather a wise gourmet whose sensibilities appreciate things for what they aim to be. A [illegible] egg is not the same as galantine de veau en gelee. Both are edifying to the hungry man, according to his gastronomic mood. In the arts only the limited mind can afford to be snobbish. Otherwise another function of college art courses is to help [illegible] from [illegible] the [illegible] that conviction.

Not long ago many scientists prided themselves on their lack of patience with the "frivolities" of the arts and most emphatically contempt for the arts in college curricula. But also not long ago The Massachusetts Institute of Technology, that great breeder-house for scientists, saw its lack of vision in not offering its students experience in the arts, and forthwith established courses to remedy the situation. [illegible] doctor who is also a good cellist is doubly exciting and doubly [illegible]. I [illegible] a good second violin. It is an interesting fact that [illegible] physicists who command world-wide respect, have done it long ago. It is interesting that nowadays one can go to any medical center in the country (including ours) and find amongst the younger resident doctors the makings of an enthusiastic string quartet.

[illegible] above, Carlyle called the arts a [illegible] in America, but it is [illegible] more than [illegible]. Caught in the [illegible] of an expensive

[illegible] on page [illegible]

The Circular File

by MIKE BROWN

[illegible] at seven the alarm rang. As I scrambled out of bed to [illegible] it off, I realized that in an hour I was due in back of the gym for the first period of ROTC. I managed to find the bathroom and to wash, then got on my new green ROTC suit and I was off to Waterman for [illegible] special.

I found me in back of the gym just as this guy in a green ROTC suit like mine started screaming, "Fall in, fall." This, I later found out, means to get in line but ROTC says "Fall in," instead. I guess that's how they do it in the movies. So we all lined up in rows, as the kid I was telling you about came strutting out in front of us [illegible] the field yelling, "Dress right, dress right." Most of my friends say I'm a pretty easy going guy, but when a complete stranger starts telling me how to dress, you can imagine it rubbed me the wrong way. Then this guy next to me start shoving and he's also yelling, "Dress right." Well, that was just about my limit. I wound up and was about to end his shoving days for ever when that kid in front of us yelled, "attention," which made the kid next to me stop shoving. Everyone became real quiet and stiff-like so I swallowed my pride and got real quiet too. So this fellow I was telling you about, [illegible] strutting about in inspection and everyone started looking straight ahead. Then from the side these guys come up, look over each kid, [illegible] something to 'em, and move to the next kid, before they came to me. As in front of me and even out of the corner of my eye I saw that I must blushed. He asked me my name which really startled me for a second, but I figured it wouldn't do any harm to tell him so I told him, "Orvel Wealers, sir."

"Orvel Wealers, kid."

"Yes, sir," I said. "just Orvel."

He looked at me awful funny-like for about a second then he pointed to my shoes, "Spit shine those," he said. I'm not positive, to this day, know what that means? He told me, in some code, to spit shine my shoes and then to go rub my hand in it. Just one more thing I'm not about to take that insult from anyone so I told him that if he ever made another crack like that he'd never [illegible] to [illegible]. This [illegible] and [illegible]

Scene and Heard

by Roanne Bockar

Cupid's

Janet Tinker, ADPi, '61, was recently engaged to Roger Robinson.

Patti Farone, ADPi '61, will marry Sal Farone, Theta Chi, on Saturday, October 28.

Brent White, Phi Mu Delta, was married recently to Patricia [illegible] a student at Keene Teachers College.

Two Alpha Epsilon Pi men were pinned over Homecoming Weekend. Burt Levy pinned Merette Kessler of Queens College, and Bob Kase pinned Mary Weinstein of New York University.

Bill Amsden, Theta Chi, '61 married Pam Haven, Alpha Chi, on last weekend.

CONGRATULATIONS:

Dave Sell is a new brother in AEPi.

Carol Day, Phyllis Gutowski, Diane Milliken and Nancy Palmer have been initiated into the sisterhood of ADPi.

Big Up bestowed up the following: Jeffrey Graham, Ronald Rosato, Tom Neopolitano, Lee Pantas, Richard Smith, and Gerald Turek.

Mary Mouton has been initiated into Alpha Chi.

HOMECOMING!

ADPi and AEPi will hold an open house after the Norwich game Saturday at the AEPhi's house. Tom Neopolitano's band will provide entertainment.

Theta Chi had a very successful homecoming. Many alumni returned and a hell of a good time was had by all at the party Saturday night.

The Theta Chi's entertained Dean Roland Patzer and his wife last night at the Theta Chi house.

Gamma Phi's annual "Pie Party" will be held Saturday, October 28 at the house from 8-12. The Sig Ep Jazz Band will be on hand.

Alpha Chi and SAE are having an open house after the Norwich game. The theme is "Graveyard Gambol" (gambol means frolic).

Dean and Mrs. Roland Patzer were guests at Sig Ep for dinner. After dinner the Dean participated in an informal question and answer period.

ADPi's Cindy Bellig, Linda Kinaman, and Bonnie McKay were welcomed back to UVM for Homecoming.

ADPi and Acacia are also having an open house at ADPi after the game Saturday.

Sigma Nu won its league championship by a victory over SAE.

For Homecoming, Sigma Nu held an open house for all alumni after the game where the plans for the new addition were unveiled. Later the entire house and alumni guests went to the Sombrero for dinner and dancing to the music of the Catamounts and the beautiful singing of Melissa Hetzel.

Professor Babcock of the Political Science Department was a dinner guest of AEPi. An informal and stimulating discussion followed.

AEPi played and beat TEP in a football game last week.

Nota Bene

Any student who is interested in information about the Peace Corps is invited to attend a meeting on Monday, [illegible] at 4:15 p.m. in the [illegible] of the Hills Building. This time you will have an opportunity to hear Mr. [illegible] Banks, Regional Representative of the Peace Corps, explain the Peace Corps program. Questions will be welcome.

BULLETIN BOARDS - [illegible] may be posted only on the bulletin board assigned to [illegible] organization. Organizations having assigned space may request from the COSA office permission to use its board. ALL POSTERS MUST BE CLEARED WITH THE COSA OFFICE before posting.

Round Table Committee announced anyone with [illegible] regarding programs suitable for Round Table please leave notes in Round Table mail box in the COSA office or contact Sandy Becker, Tel. 27381.

MEETING: Thursday, November 2, 1961

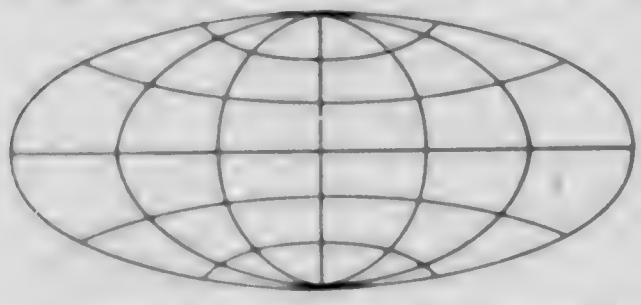
PLACE: Home Economics Auditorium

LECTURE: Development of Patterns in Salamander Limb Regeneration.
Dr. R.W. Glade of the UVM Zoology

Refreshments will be served following the meeting.

As part of its work scholarship program, Philip Morris Incorporated has announced that Joel Sweden has been selected campus business representative here. The appointment is for the full school year.

African Conference



(continued from page one)

tions and ambitions. We must realize their fears and appreciate their position in world affairs. We must make clear that we are genuinely interested and sympathetic to the peoples of Africa.

Formulation of intelligent, perceptive American policies, [illegible] economic and political can [illegible] be the result of a broad understanding of Africa. This understanding must be shared [illegible] groups in American society.

It is to be hoped that the entire University body will avail themselves of the opportunity to attend the forthcoming African conference to be held this Friday and Saturday, October 27 and 28.

THERE'S CHALLENGE TODAY FOR VIRTUALLY EVERY TECHNICAL TALENT AT PRATT & WHITNEY AIRCRAFT

Almost every scientifically trained man can find stimulating and rewarding career opportunities within the broad spectrum of Pratt & Whitney Aircraft activities.

From the solid foundation of 36 years as a world leader in flight propulsion systems, P&WA development activities and research investigations today are far ranging. In addition to continuing and concentrated development effort on air breathing and rocket engines, new and exciting avenues are being explored in every field of advanced aerospace, marine and industrial power applications.

The reach of the future ahead is indicated by current programs. Presently, Pratt & Whitney Aircraft is exploring the fringe areas of technical knowledge in *magnetohydrodynamics* [illegible] and *thermoelectric conversions* . . . *hypersonic propulsion* [illegible] and *nuclear power*.

To help move tomorrow closer to today, we continually seek ambitious young engineers and scientists [illegible] degree. It can be in: MECHANICAL ■ AERONAUTICAL ■ ELECTRICAL ■ CHEMICAL and NUCLEAR ENGINEERING ■ PHYSICS ■ CHEMISTRY ■ METALLURGY ■ CERAMICS ■ MATHEMATICS ■ ENGINEERING SCIENCE or APPLIED MECHANICS.

The field still broadens. The challenge grows greater. And a future of recognition and advancement [illegible] be here for you.

For further information regarding an engineering career at Pratt & Whitney Aircraft, consult your college placement officer or write to Mr. R. P. Azinger, Engineering Department, Pratt & Whitney Aircraft, East Hartford 8, Conn.

AROUND THE COLLEGES

Princeton

Princeton, N.J.-(I.P.)-Since the [illegible] of the first ten Bicentennial Preceptorships at Princeton University a decade ago to [illegible] junior members of the faculty to pursue and advance in their profession of teaching and scholarship, fifty men, excluding present appointees, have been appointed. Of these only [illegible] are no longer associated with the university.

Commenting on the results, President Robert F. Goheen describes the program's impact both for Princeton and for a considerable number of other institutions. The program was established as a distinct innovation to give recognition to men at the assistant professor level at a critical phase in their development and to aid in enhancing the effectiveness of their teaching and scholarship.

Awards are for three years. Each Preceptorship carries a salary [illegible] above the average for the rank of assistant professor, a[illegible]500 a year for expenses in connection with a self-chosen program of professional advancement, and provides one year's leave for scholarship. They are comparable in stature to endowed professorships at higher levels.

Among the fifty past recipients of Preceptorship awards, exclusive of present appointees, thirty-one are members of the present Princeton faculty, President Goheen reports. Of these, four are full professors, twenty are associate professors, one is a department chairman and three are academic deans. President Goheen, himself, held a preceptorship.

Most heartening of all are the low attrition and the number who are making equally significant contributions in other educational institutions," the report continues. Only three of the fifty are no longer actively associated with a college or university; and of these, one is teaching in a top-grade New England secondary school while another holds the near equivalent of a faculty position as Associate Curator of Painting and Sculpture in the Museum of Modern Art.

"The nearly two-fifths of the group whom we have helped prepare for the faculties of other institutions include the present [illegible] of Swarthmore, the Dean of the Faculty of Wells College, departmental chairmen of Dartmouth, Rice Institute and Syracuse, a full professor at Harvard, and rising teachers at Boston College, Brandeis, Goucher, Kenyon, New York University, Northwestern, University of California and University of Illinois."

"I want to call attention to two distinct but mutually complementary lines of development," President Goheen reports. "The first of these is the provision of enhanced opportunities for professional development for men in the early stages of academic careers, a matter which can often prove decisive not only to an individual's subsequent performance as a teacher-scholar but to whether or not he will stay in the profession. The second development is the program to improve the economic position of our faculty which we have been pressing in recent years and must continue to press."

Iowa State

Ames, Ia.-(I.P.)-Electronic devices will be used at Iowa State University in a "direct attack" on the problem of poorly spoken English, Dr. Albert Walker stated. He said the electronics approach will start in 1962. It will allow students to correct errors in their spoken English through repetition of the right forms and through reading aloud.

Iowa State has tried out "non-collegiate," or high school level corrective courses in Freshman English, and has discarded them as "ineffective." It also has abolished the practice of putting students who were poor in English into "low" sections, and finds they do better when they try the regular course in the company of classmates who are better prepared.

However, there is evidence that [illegible] entering students [illegible] and appear to have the aptitude for English courses, "have a long-run potential not reflected in [illegible] tests. The [illegible] a positively small number of [illegible] assigned to [illegible] will not improve [illegible] are assigned if and when new ways of motivating and teaching the slower pupil be [illegible]."

Michigan College

Houghton, Mich-(I.P.)-The Michigan College of Mining and Technology has initiated a uniform freshman year in its engineering departments with a unique sequence in methods of learning and professional orientation. According to Dean of Faculty Frank Kerekes, this experiment should benefit the freshman by providing better motivation during his succeeding years in college.

All engineering freshmen will [illegible] central courses in mathematics, chemistry, English and engineering graphics. The freshmen will be expected to register in the department of their choice for administrative purposes and for professional orientation.

The unique feature of the fall quarter is a course in systems of learning. This course is common to all curricula and is planned to develop learning principles, procedures, and applications with practice in the presentation of ideas by written, oral, mathematical, and graphic means. A two-quarter sequence during the winter and spring quarters is designed to provide the engineering freshmen with information and experiences in their chosen profession and its various aspects of practice.

An introduction will be made to project types of professional problems with emphasis on the classification of useful data and the analysis of a problem. The data are then interpreted and integrated to produce a solution within the limits imposed by the level of the work. The systems of learning and professional orientation courses will be taught by the faculty of each engineering department.

NOW! WE'VE GOT FAMOUS BRAND EASY-TO-ERASE TYPEWRITER PAPER AT THE LOWEST PRICE YET!

Now at a new, money saving low price, we have fine quality Eagle A Type-Erase — the paper that's famous for cleaner, faster typing and easy erasability. At the touch of a pencil eraser, typing errors wipe right off the surface of Type-Erase, leaving no mark. Saves time, makes your work neater. Comes in a budget priced pack of 100 sheets, 8½" x 11", in medium or heavy weight, plain or 3-hole punched. Free with every pack a Letter Placement Guide to help you type neater letters and reports.

EAGLE-A TYPE-ERASE

... the paper that erases perfectly with a pencil eraser

Made by American Writing Paper Corporation, Holyoke, Mass., manufacturer of Eagle A Boxed Typewriter Papers

What makes Artcarved Diamonds the favorite of America's College Queens?

Actually there are many reasons. Artcarved diamond rings must meet traditionally high standards for color, cut, clarity and carat weight. Their award winning styles are a delight to the eye. And, they take all of the guesswork out of buying a diamond. Every Artcarved ring carries a written guarantee for quality and permanent value that's recognized and respected by fine jewelers from coast to coast. We think you'll agree with America's lovely College Queens.

Stop in at your jeweler and be sure to see all the exquisite Artcarved diamond rings — the rings you buy with confidence and wear with pride.

NATIONALLY ADVERTISED IN AMERICA'S LEADING MAGAZINES

and frightening world, a reaching out for something with which to bolster the spirit? Could it be a recognition that America's Madison Avenue version of success has some specious aspects?

Maybe college art courses will increasingly guide the reaching out, help identify the overlooked ingredient. We know the cows' ears will always vastly outnumber the purses. This is true in professional art schools and under conservatories. No training yet conceived by man will make the basically inept anything but more complicatedly inept.

The real purses are what they are. The genes are right and (if you want to look at it that way) God has smiled upon them. God spared them, but the hundreds of others? They are the ones doing the groping, having the curiosity, searching for the missing ingredient. They usually have the will to know that success in college or anywhere else will magically make them artists. They are also wise in knowing that art courses have other aims and compensations. And they are not really even sure at all. I just say that.

The Circular File

(continued from page five)

time he gave me an even funnier look and turned to whisper something to the kid who'd been following him. This kid also comes up to me and asks me name. By now I was getting pretty fed up so I said, "What business is it of yours?" "You have five demerits coming kid," he said. Then I realized that what ever the game was all about - I'd just won. I thanked the kid a real lot for the demerits, but I told him that I didn't really have any use for them and that he could have them if he wanted. He also gave me one of those looks then walked away.

Things went on like this for about an hour with people pushing each other, insulting each other, and pacing up and down the field till finally they told us we could go. I never went back to ROTC after that. I guess it was cause I never got the point to what they were trying to do out there. Besides, there wasn't really much sense to all that roughness. I had always said if you can't play a game without fighting, then don't play it at all. Anyway I gave up playing games long ago.

Africa. . . . New Light To Shine

In April of this year the Peace and Social Concerns Committee of the Religious Society of Friends (Quakers) discussed the possibility of bringing a conference on the question of African freedom to Burlington. This kind of project is a usual practice for the Quakers as they profess an interest and concern in non-violent solutions to world problems. The meeting felt that to give the conference the widest possible influence it should be held at the University of Vermont. This would enable both students and townspeople to attend.

The planning meetings of the Conference were held for the most part during the summer. The International Relations Club was contacted by Dr. Alfred Haynes, Director of the Family Care Unit of the Medical College, prior to the end of last semester regarding the likelihood of their participation. When the Club professed an interest it was invited to attend the planning meetings. By the beginning of the fall semester the planning stage was complete. Key speakers were to be invited from the UNESCO delegates attending the Conference in Boston from 22 to 26 October. G. Mennen Williams would be the keynote speaker on the Conference theme, "Africa towards Freedom," and interested students from the New England area colleges, both Africans and others, were to be invited as guests of the IRC.

After classes had reconvened at the University, invitations were sent to B.U., M.I.T., Harvard, Dartmouth, McGill, Norwich, Colby, Goddard and St. Michael's Colleges. The response to the invitations was favorable, and many students from the above colleges plan to attend. IFC and Pan Hell are taking care of the housing for these students. The keynote address, "Africa Towards Freedom" will be given on Friday evening at 8:00 P.M. and will open the Conference.

After the official closing of the conference on Saturday, there will be a buffet at the Faculty Dining Room in Waterman from 5:30-7:00 with the IRC hosting their African guests. Interested students are welcome to attend.

The program has been brought to the campus by the IRC for the information of the student body.

Hillel will hold [illegible] groups Friday evening at the house at 389 College. [illegible] ested are invited to [illegible] participate. Three [illegible] been arranged with the [illegible] to continue these discussions on Africa not only on Friday [illegible] but Saturday afternoon as well as the formal closing of the conference. Hillel will also hold a reception Sunday from 2-4 p.m. for African students and all are welcome to attend.

The Conference program for Friday and Saturday are as follows:

FRIDAY, OCTOBER 27

Registration in the Lobby of the Fleming Museum at 7:00 p.m.

8:00 - G. Mennen Williams "Africa Toward Freedom" in the Ira Allen Chapel.

SATURDAY, OCTOBER 28

9:30 a.m. Margaret Peters, Wilam Aminu Kano and UNESCO delegates in a panel discussion on "After Independence, What" and "African Imperatives".

11:15 Round Table Discussion with African students as resource leaders.

12:30 Lunch in Waterman Cafeteria.

1:45 Symposium "Africa's Place in the World with Bayard Rustin, and George H[illegible]

A bibliography and background data prepared by the IRC, with Mr. Hilberg and Mr. Scheans is available to students in the Political Science Department.

Harriers

(continued from page 9)

for the tireless Giersburg.

The Kitten's, Bill Jackson, Steve Lorinski, Denny Bender, and Dick Ashton rounded out the scoring for Vermont by placing 3rd, 5th, 6th, and 9th respectively.

Other Frosh who finished were Frank Harvey, Fred Tripp, Dick Lutman, Al Lyon, and Ed Bennett who was slowed down by a cramp.

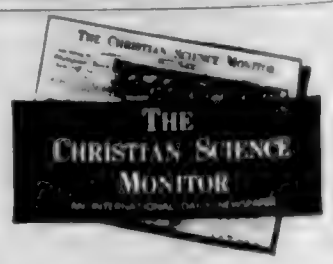
Over the Homecoming Weekend the Kitten Harriers maintained their string of victories by defeating Paul Smith Jr. College and Williamstown High School by a perfect score of 15-50.

Chris Myrick of UVM set a sizzling pace in capturing first place. Chris' time of 13:47 is a record for the new Frosh course.

Denny Bender, Bill Jackson, Steve Lozinski, Dick Ashton, Skip Bennett, and Bill Harvey completed the perfect score for Vermont by placing second through seventh respectively.

Every 24 hours, the world's largest distillation unit separates crude oil into ten different categories which end up as six million gallons of finished products.

This involves continual monitoring of 250 instruments, followed by precise balancing of controls. To operate at peak efficiency control directions are changed many times daily to compensate for a multitude of variables.



The IBM computer that took over this job now reads the instruments, makes the calculations, and issues the orders for the control changes. It is guided in its work by over 75,000 instructions stored in its electronic memory.

Just a few years ago electronic control of such a complex industrial process would have been impossible. But such is the progress in computer systems that in the sixties it will become commonplace.

This dramatic progress means exciting and important jobs at IBM for the college graduate, whether in research, development, manufacturing, or programming.

If you want to find out about opportunities in any one of these areas, you are invited to talk with the IBM representative. He will be interviewing on your campus this year. Your placement office can make an appointment. All qualified applicants will receive consideration for employment without regard to race, creed, color or national origin. Write, outlining your background and interests, to **Mgr. of Technical Employment, Dept. 898, IBM Corporation, 590 Madison Avenue, N.Y. 22, N.Y.**

You naturally have a better chance to grow with a growth company. **IBM**

Harriers

Varsity Defeated

On Saturday, October 21, the UVM cross-country Harriers inflicted their first defeat of the 1961 season on Maine. The University of Maine cross-country team handed a 21-36 victory over the Harriers in an exciting 4.7 mile race.

Maine's Mike Kimball established a new four mile course record by touring the course in 20 minutes, 38 seconds. Gerry Ellis and Kirk Hansen of Maine placed second and third respectively. Vermont's team captain Tim Simpson captured fourth in 21.52 minutes. Maine took fifth place as Wentworth, then came teammates Steve Russell, Gary Carter and Bill Stillson. Tim Carter of Maine was ninth and Hal Billings of UVM tenth to round out the scoring.

UVM will be at home for a run against Wesleyan at 3:30 Tuesday, October 24. Expectations for a win are high. UVM's record has been a good one so far this year, and it is expected that Archie Post's Harriers will do well in the New England finals.

Frosh Record Set

In two dual meets, on October 14th and the 21st, the Freshman harriers beat four opposing teams across the wire for four straight wins in two dual meets.

The Frosh conquered their toughest opposition of the season in a 20-38 victory over Vergennes right on the UVM course on Wednesday the 18th. In addition, Vermont easily topped Castleton Teacher's 20-43.

Former Vermont State Cross-Country Champion Bob Giersburg of Castleton captured first place in 23:53. He was followed by Vermont's Chris Myrick who ran a beautiful race, but proved no match

(continued from page eight)

Sportlight Southwick

J. Alice Hofler

On Saturday, October 13, six members of the women's tennis team traveled to Forest Hills to compete against girls from 24 other colleges in the regional finals. Joanne Beckley and Debby Mathews played exceptionally well. In the semi-finals they finally lost to the team from Vassar.

The tennis team also attended a clinic conducted by Mercer Beasley, a well known tennis coach. They returned happy, but exhausted, late Sunday night.

On Sunday, October 15, W.R.A. held a delicious picnic in the Southwick gym. The girls came hungry, but left well-fed and well-informed.

The hockey team had a wonderful time playing against Middlebury College on the Southwick field on Monday, October 23. Cider and doughnuts were provided for the weary players after the game. A re-match is planned for Saturday at a playday being held at Middlebury.

After two rigorous tryouts, Canterbury has eight new members. They are all looking forward to presenting a wonderful show in the near future.

"Keep Secret" In order to participate in many W.R.A. activities, you must be a paid member. Get your membership at Greenwood in Room 1 any evening after dinner.

Frosh Grid Mauls Union

The UVM Freshman football team decisively defeated a visiting Union Freshman football team 40-0 on October 11, before a small gathering of supporters at Centennial Field. This was the kitten's third victory against no defeats. They have shown outstanding defensive work in holding their opponents scoreless thus far this year.

The Green and Gold stuck fast in the opening moments. The first play from scrimmage saw quarterback Jim Brennan roll out around end for 30 yards. Two plays later Richie Reynolds went across from the 15 yard line.

Vermont tackle Jim Meredith recovered a Union fumble on the 38. After one series of downs Al Foster pitched out to Dean Kent on the 2 and Kent scored the first of his three touchdowns.

The second period saw Al Foster toss a 17 yard aeriel to Dean Kent for the third touchdown of the afternoon. Fred Boese caught Foster's pass for the point after and UVM now had a commanding lead of 20-0. Coach Fuzzy Evans gave his second and third teams much valuable game experience and they handled themselves well.

The outstanding play of the game was Kent's final t-d of the day. Taking the ball on the Union 22 the Rutland halfback eluded a charging lineman, picked up two key blocks from Oelze and Reynolds swept to the center of the field and the end zone.

A Kitten pass to Joe Andreas from Foster set up the next score. After this 33 yard play, Foster bootlegged around end for the touchdown. The extra point was scored by Adreas on a plunge.

Quarterback Al Foster also starred in the kicking department. He got off boots of 37,44,46, and 48 yards for a 43.7 average.

Late in the game a Union drive was stopped with Jim Brennan's interception. The final gun went off with the score 40-0 in favor of Vermont.

This Saturday the Frosh travel to Williams for one of the toughest encounters of the year.

Kent runs ball down field as unidentified UVM player blocks onto Union man. (Credit: SFS, A. Ojanen

Team Managers-Tops

UVM football has four student managers. These managers are responsible for every piece of equipment owned by the University. They are at the field and part of every football practice and game.

An hour before each game they prepare the field for combat. During the game they run the scoreboard, take records of the game, and stand ready with a stretcher, when the boys there will never have to use.

The head manager has an even more detailed and complex job. He is responsible for seeing that all of the other managers do their jobs. He handles all traveling matters, obtains all necessities for each player and manager, and reports each game result to TV and Radio stations. He also handles all of the office and paper work, which obtains many of weekly work.

A special salute must be paid to these head men.

Frank P. Brien, '64, head manager of football and baseball. Frank hails from Newport, Rhode Island where he attended La Salle Academy for three years. He moved to Fairlee, Vermont during his senior year and there he managed baseball. During his Freshman year at UVM he managed football, basketball, and baseball for the Freshmen.

William Cleveland, '65, managed track at Bellows Free Academy in St. Albans, Vermont before he came to UVM. He was also columnist for his school paper and was a sports coordinator for WeMoLay. Bill is majoring in history.

Bob Barrett, '64, attended Hoosac Valley Central at Valley Falls, N.Y. where he was a three letterman in sports. He then managed football at Cathedral Ag. and Tech. A sophomore at UVM, he plans to become a veterinarian.

Bob Eaton graduated from Rutland High, Vt. where he managed football. Bart said the distinction of managing the Vermont Stone game in 1961. Here at UVM he is majoring in Commerce and Economics, but has no definite plans about his future. Bart is also a member of WeMoLay.

Mark Iverson attended Huntington School for boys in Boston where he managed track for three years, and wrote feature articles for the "Journal." At UVM he is a premed student majoring in zoology.

Douglas Lamade hails from Cappaqua, N.Y. where he attended Chappaqua High and managed football and baseball. Doug is not sure of his major but he plans to do graduate work in electronics.

Scott Bailey came to UVM from Scituate, Mass. where he played football, basketball, and baseball. Scott is not sure of his major.

Sideline Cynic

BY BOB BERNARD

The Department of Physical Education for Men closed its 32nd year of intramural touch football this last Tuesday. The Winter Sports schedule will now slowly unfold as the individual sports events "come into season." These sports include badminton, basketball, bowling, skiing, indoor track, indoor relays, handball, volleyball, hexathlon championship, and the "free throw tournament." The only spring sport scheduled is softball.

There is, however, one sport which is not included in this otherwise thorough sports calendar; swimming. A somewhat obvious, but nevertheless shallow retort to any queries involving the absence of this sport on our intramural calendar is "lack of facilities." The Physical Education Department and the IFC committee governing inter-fraternity sports have made arrangements for both skiing, bowling, and golf facilities to be available for intramural competition. It can also be done with swimming. At present, there is a YMCA which is being used for swimming classes. The same pool can be used for competitive meets.

The season does not have to correspond to the accepted swim season. It can, if necessary, be fitted in so that it will be convenient for both the YMCA and the Athletic Department. Admittedly, there will be fees charged for the use of the pool, but these would be nominal. The duration of our schedule can also correspond to one that would be acceptable to the "Y" and one which would fit our purse.

Of course, when the new gym is built, these problems will not arise, since it will contain a pool. However, I am getting a little tired of hearing someone say, "Wait until the new gym is built, then....." We must not let ourselves go into a period of hibernation until this gym is built. Rather, this should be a period of transition. Now is the time to initiate such a program, to overcome the necessary difficulties, and to have a swimming program in full swing by the time the new gym is built. Now is the time to begin laying the groundwork. Now is the time for action.

Ed. Note: In a sports article in The Burlington Free Press dated Monday, October 24, Mr. Walt Hickey makes several severe statements concerning the sportsmanship displayed by the University of Vermont. Some of the comments Mr. Hickey makes are: "Then came an unrelated-for announcement of a Friday soccer result over the loud speaking system....Extreme bad taste on the part of Vermont." This is a rather serious charge, and certainly requires further elucidation if the writer is to give a fair, informative, and unbiased account of the occurrences in question. This obviously was not done. More surprising than this, however, is the fact that Mr. Hickey takes the opportunity to introduce this entirely extraneous matter in a sports column. He is definitely taking advantage of the situation.

Mr. Hickey is invited to reply to this note. His answer will be printed in the Cynic.

A full first half gave way to a thrilling second half in which the University of Vermont tallied three times to whip the Yellow-Jackets from Rochester, 18-0.

Strong defensive play was the keynote in the first portion of the contest as neither side could muster a sustained drive. Both defensive lines terminated this part of the game, repeatedly setting up scoring opportunities on which their offensive squads failed to capitalize. Led by Captain Bob Stone, the Catamounts' forward wall executed jolting tackles and recovered numerous fumbles. Nevertheless, their alert play was to no avail as Rochester Captain Walt Strangos had an equal influence on UR's defensive squad.

However, the pep-talk given the Catamounts by Coach Ed Donnelly during the halftime break had a profound effect on the offensive unit for they came to life in the third period. Early in the quarter, Paul Harris replaced Dom Parlato at the quarterback slot and got the Green and Gold moving. A quick opener to Maynard Ducatte moved the ball from the Rochester 42 to the 15. On the next play, Harris sent Ducatte off-tackle, and the senior halfback bulled his way into the end zone. Harris' attempted pass to Frank Bolden for two points was wide to the big end and the score remained 6-0.

The fourth quarter saw the rest of the scoring. After exchanging a series of down, UR was forced to punt from its own 17. Vince Caravaglio boomed out a 45 yard kick which Harris gathered in at the Catamount 35. Receiving many key blocks, he streaked to the sidelines and galloped unmolested 65 yards to pay dirt. Once again the conversion failed, leaving the score at 12-0.

Rochester's last effort was stifled when Dom Parlato intercepted a stray aerial on his own 48. This set up the Catamounts' final score. Two plays later, Harris, again in for Parlato, faked to Davin, and on a belated cross-buck, gave the ball to Wayne VanHam and the little speedster was off on a 45 yard jaunt to the end zone. A third attempt at two points failed and the final outcome was sealed at 18-0, Vermont on top.

It is interesting to note that both of the Cats' victories this season were a direct result of their overpowering their opponents. This comes, naturally enough, from teamwork, and, needless to say, last Saturday's win was truly a team effort as was the season's inaugural, the defeat of Coast Guard.

IFC Scores

This week the inter-fraternity football program moved into the third and final week of competition. Three of the four division titles have already been decided and the last title will be decided on October 20. The winner in Division A is Sigma Nu; in B, Kappa Sigma; and in C, Delta Psi. The winner of the game between Acacia and Phi Mu Delta will gain the title in Division D.

Semi-finals for the inter-fraternity championship will be played October 25. Finals will then take place on the 25th.

In addition to the fraternity games, a championship all-campus football will be sought on October 26.

Some scores of the past week were: Phi Sig 31, Phi Delt 14; Kappa Sig 21; TEP 2; ATO 32; Theta Chi 20; Delt Psi 25; Sig Phi 12.

Serving UVM For 78 Years 1883-1961

The Vermont Cynic

VOL. 79 UNIVERSITY OF VERMONT BURLINGTON, VERMONT NOVEMBER 2, 1961 NO. 16

"Marriage Of Figaro" Slated For Lane Series

Walter Suskind, orchestra conductor.

Lane Series will present the New rk City Opera Company on November 6, in their sixth consecuve performance for UVM. The ogram, on the Red Series, will "The Marriage of Figaro" in English translation by Ruth and omas Martin. This appearance part of a tour which began Oc- per 18 in New York City.

Julius Rudel, the general direc- r is quite instrumental in the vancement of contemporary merican operas. Since his start th the New York City Opera he as been given several awards for s "distinguished service to Ame- ican Music." UVM last year warded Rudel an honorary degree music.

The leads in the opera will be Donald Gramm as Figaro, Judith Raskin as Susanna, and Frances ible as Cherubino. Miss Bible as appeared at least twice before Burlington with this group.

Walter Suskind will direct the orchestra. Born in Prague, he is now a British subject, and is conductor of the Toronto Symphony Orchestra. In Canada his name is known in radio, TV, and among the listeners of the many orchestras, for Susskind has conducted a great deal throughout Canada. His other appearances include conducting at the Festivals of Edinburgh, Berlin, Hastings, Stratford, and Vancouver. In his enthusiasm for the spread of music, Susskind has founded the National Youth Orchestra of Canada. At present he is their director.

The New York City Opera Company is now in its thirty-fifth year. It has stood for the encouragement of contemporary American composers. Within the last three seasons, twenty new operas have been performed. This year two new ones are to be featured: "Wings of the Dove" by Douglas Moore, and "The Crucicle" by Robert Ward.

A Child Is Born...

New SA Constitution Ready For Student Ratification

By Lawrence Dugan

President Ted Edgecomb called the signals and Parliamentarian Paul Chervin ran the plays at the Student Association Council meeting of October 26. In only fifteen minutes the proposed constitution for Student Government was unanimously approved by the council after many months of discussion.

Decision to write a new constitution was reached last year at the Camp Abnaki Conference. A Student Reorganization Committee was formed to prepare a working draft. Thus, when the new constitution is presented to the student body for ratification many months of preparation will end. Implementation of the proposals stated in the constitution await the future.

If the constitution is ratified by the student body and approved by Dr. John T. Fey and the Board of Trustees, Student Government at the University of Vermont will have a scope and direction never before known on this campus.

The preface to the constitution, written by Dr. Fey, states that Student Government should: 1. promote student interest in academic excellence and stimulate awareness and support for the educational purposes of the institution, 2. sponsor, develop, approve and evaluate student organizations which contribute to the educational experience of the students; 3. support an all-university social and cultural program which will provide for the interests and needs of the student body.

Furthermore, the Student Government will serve the student body as its communication link in the expressing student opinion. In meeting this responsibility the Student Government organization may inquire into any aspect of University life.

MAJOR CHANGE

The manner of student representation has been drastically changed. There will be one senator, formerly called a representative, from each living unit, e.g. fraternities, sororities and dormitories. Each senator will have one vote for every mean number of students represented in a segment of population. The mean number is derived by adding the sum of all living units having no more than fifty students and dividing by the number of living units. Senators for the larger units will have one vote per mean number within the population segment.

Non-resident students will have three senators at large.

Honor Code And Mass Meetings- WSGA Reforms

The first Mass Meeting of the men Students' Government Association has been scheduled for vember 8, 1961 at 7:00 p.m. in e Chapel. Its program will center out a panel discussion on Honor - s role in the life of a University tudent (with special emphasis on e honor system present on our ampus.) Professor Hall of the hilosophy and Religion Department will moderate the panel consisting of Dr. Gregg of the Chemistry Department; Mr. Eyck, Assistant Dean of Men; student leaders; and representatives of the tudent Body. It is hoped that much will be gained from this informal question and answer period, and that the students present will have a greater understanding of the topic under discussion.

The meeting originally scheduled for October was indefinitely postponed for lack of a worthwhile program to present to the women students. That there is great objection to mass meetings is known; but what can mass meetings really had to offer? W.S.G.A. would like to show by this meeting the type of program it considers worthy of occupying students' time.

Joint Conference will be held the following Tuesday, November 14, 1961, its main purpose being a full discussion of the Mass Meeting. We only ask that women students come to this first meeting ready to impartially judge the program, and then that they bring their good or bad opinions, ideas and suggestions to Joint Conference.

NEW ASSISTANT DIRECTORS CHOSEN FOR KAKE WALK

The Directors of the Sixty-fifth Annual Kake Walk have announced the names of the four assistants. They are Neal Adams, Frank Amato, William Cullen, and James Newman, all of the Class of 1963.

Neal, a resident of Union, New Jersey, is an English major in the College of Education, and has had an outstanding average of 87. He is a brother in Sigma Phi Epsilon Fraternity, and is a second lieutenant in advanced ROTC. As Assistant Director of Publicity his duties include helping with the Kake Walk program, window displays, and the poster contest.

Frank comes from Oceanside, Long Island. He is in Sigma Alpha Epsilon Fraternity and is majoring in Industrial Management. Besides being vice-president of the Class of '63, he has been on the football team for three years, is a second lieutenant in advanced ROTC, and is on the track team. As the Assistant Director of Finance, Frank will distribute tickets and help plan the seating, as well as keeping records of all expenditures.

The Assistant Director of Skit Production, Bill Cullen is an Economics major from Hamden, Connecticut. His activities include the Student Court, the Freshman tennis team, being floor counselor, and the Sophomore Activities Committee. Bill is in Delta Psi Fraternity. His job for Kake Walk will concern the schedules for the skits, and the decorations of the Kake Walk Ball.

Kake Walk directors, left to right: Frank Amato, James Newman, William Cullen, and Neil Adams.

Jim Newman is a native of Burlington, majoring in Management Engineering. He is a member of Sigma Phi Fraternity. Other activities are Pershing Rifles, Executive Committee of the Class of '63, S.A., and two honoraries, Gold Key and Key and Serpent. His duties will be to attend to the Walking and the campaigns, and to arrange for the rehearsals.

Unification Of Students

On Sat. Mr. Tim Zagat, Program Vice-President of the United States National Student Association, visits campus to meet with members of the student government and other student leaders.

The primary purpose of his visit was to familiarize himself with the programs and problems of student government and to assist its members to achieve the goals set for this year. Since Mr. Zagat served for three years in student government himself, he knows the kind of problems student governments must face. He also has the accumulated knowledge of all USNSA member schools to draw on to make his trip profitable for all concerned.

While on campus, Mr. Zagat will meet as many members of the student body, faculty, and administration as possible to explain USNSA and answer questions about it, and to encourage students to address themselves to the educational and political issues which the Association works on. He hopes to be able to establish better communications between campuses on the issues facing students today, and to develop national patterns of dealing with them.

Mr. Zagat's personal interests are specifically aimed at encouraging students to work on strengthening and broadening their student governments. He is particularly interested in promoting the values and motives which can make student government valuable and exciting for students.

More generally, Mr. Zagat will be trying to discover and represent accurately the interests, problems, and aspirations of American students, and to further the ideal of a genuine community among students based on common problems, common commitments, and common goals.

Fleming Reception

The Fleming Museum's reception last Saturday night for the participants in the African Conference included a preview of an exciting new exhibit, "The Arts of Africa." Arranged especially for the Conference, the show surveys the traditional arts of the Sudan, the Guinea Coast, and the Congo.

Included are examples of figure sculpture, ritual masks, ceremonial weapons, musical instruments, ivory carvings, and a variety of visually interesting useful objects. The pieces date from the 17th to the 20th century. Some are on special loan, but most, including the best, are from UVM's own collection.

A number of tribes are represented by characteristic work. On loan from the Olsen Foundation of New Haven, Conn., is an Ashanti chieftain's fly whisk with a handle encased in figured gold foil; two large Dogon pieces, one a tall horse and rider, the other a "warrie board" in the shape of a long, low animal. Warrie is a game in which marbles are placed in the pockets of a board, in this case formed by the corrugated back of the animal.

Two rare objects are a 17th century head of a princess in cast bronze and a slender, decorative 18th century wrought iron finial or standard embellished with monkeys, serpent and birds. Both are from the ancient African kingdom of Benin. Its art, whose history covers the 15th-19th century is one of the great cultural traditions of Africa.

From Dartmouth are several ceremonial Baluba swords with chiseled blades of elaborately curved outline. From the Fleming Museum comes a colorful, expressive "circumcision mask." So does a group of 22 small figures, a complete procession of hammock borne Dahomey chieftain and parading retinue, including musicians, dancers, and parasol bearer, all case and tooled in brass. A carved ivory tusk from the Luango tribe in contrast offers rising tiers of French soldiers in colonial uniforms.

Students in Paul Aschenbach's Sculpture class should find themselves right at home with the show. The objects, even the oldest, look strikingly modern -- although the resemblance is, in fact, the other way around. The "discovery" of African art by Picasso, Lipschitz, and other rearly moderns helped shape the direction of 20th century sculpture and painting. In the art world, Africa's place in the 20th century was solidly established in 1910. This is one reason, suggested Professor Janson, Director of the Fleming Museum, that we seem habitually to find it more enlightening to view the new Africa in the light of its traditional arts, rather than the more obviously western oriented modern concrete architecture, automobiles, and even abstract paintings, that are dramatically proclaiming the visual patterns of its future.

The *Cynic* failed to mention the Museum reception in covering the Conference program, but those who missed a final meeting with the African delegates and students will still have ample chance to study the traditional arts of their homelands. The show will be on view through November 26.

A bronze 'Head of a Prince' from the ancient Guinea Coast city of Benin -- now on view in the Fleming Museum's new African exhibit.

Possible New Sorority

Southwick was the scene on Monday, October 23, of the birth of a possible new sorority. Approximately twenty girls met there to decide if there was a need for a new sorority, and having decided to the affirmative, the group set about planning this goal. A committee of the whole was established with Toni Appel as the chairman, and Linda Bean as secretary. The girls then set Monday, October 30, as the date of their next meeting at which time an alumnus of Sigma Gamma spoke. Sigma Gamma was a local sorority which went inactive three years ago. Having heard the pros and cons of a local, the group then planned to have speakers from various national sororities in order to better decide which they would want. While this decision is still hanging in the air, meetings will continue, every Monday night in the North Lounge of Southwick. All interested girls (not Freshman) are invited to these weekly meetings.

NOW! WE CAN SAVE YOU MONEY ON FINE EASY-TO-ERASE TYPEWRITER PAPER!

Now we have a fine quality famous brand name typewriter paper at the lowest price ever! It's EAGLE-A Type-Erase. The famous paper for erasers. Makes typing and form corrections, all the cleaner. A pencil eraser helps erase most of the mistakes you make! Corrections stand up to many more erasures. Makes your work neater. Comes in a handy priced package of 100 sheets, plus a 10 sheet medium to heavy weight plain or 3 hole punched. Free with every pack a Letter Placement Guide to help you type neater letters and reports.

The Dominican Republic A Nation In Transition

By Ed Kritzler

We finally worked up the nerve to print Ed's picture. Now we can expect postal toting Batista and Trujillo fans - here we go!

[illegible] calls of the opposition [illegible] se va-an los Trujillo. This chant expresses the people's desire for [illegible] Trujillo to leave the [illegible] living point around which the opposition unites. [illegible] 1962 (the date of the proposed elections) the opposition will employ every *peaceful* means to accomplish this objective. If, by that time they do not succeed -- they will by any means.

Though some leaders of the opposition refused me such a definitive statement, most of them confided this to me. Over and over I heard the reason for this being -- "Our country can not advance or have democracy as long as the family of Trujillo remains here. They must leave and their holdings (nearly all the nation's wealth) nationalized."

Many of the fateline, but there are many who believe the country will erupt before then. Among those who share this opinion is a former political exile and now the leader of one of the opposition groups. Upon asking him why, he said, "The situation cannot continue as it is. The government is only playing the game of democracy. They will continue this game until they feel they are really threatened or believe they can effectively smash the opposition and re-establish the era of Trujillo. Although they will try this, they will not succeed. There will be a revolution."

He then expounded on what he meant by the government's "playing the game of democracy". In doing so he related numerous incidents of which occurred two weeks prior to my arrival.

Radio CARIBE

On the night of July 7, an unauthorized demonstration took place in the capital. Beginning at Plaza Colon, the demonstrators marched through the streets to the nearby Radio Caribe building. (Radio Caribe is one of the government controlled radio and TV stations). In front of that organ of the government they yelled their defiance. As the fervor of the people mounted, a few men ran forward and proceeded to drench the sides of, and the area immediately surrounding the building. Someone then ignited it and Radio Caribe went up in flames. Minutes later the police descended upon the scene and the crowd hurriedly dispersed. Twenty people, however, were injured as the police belted everyone in sight. A short time later, the fire department arrived. They were too late; Radio Caribe was a total loss.

The followind day the government controlled radio, TV, and press proclaimed that there was much evidence that one of the more leftist opposition groups, the Popular Dominican Movement (MPD) had been responsible for last night's happenings. The *New York Times* reporting on the incident stated in part:

"The pro-government radio station La Voz Dominicann (owned by Trujillo) quoted the National Police as saying the Popular Dominican Movement (MPD) had been trying to cause disturbances.

President Balague pledged to eradicate the movement if the police found the violence was instigated by Communist agents instructed from Cuba and infiltrated in the so-called Popular Dominican Movement."

The outcome of all this, was that many members of the organization were arrested and the remainder were forced to take their movement underground. (The students I wrote of in my second article were members of this movement)

All this sounds just, that is, until the true facts are disclosed:

1. Radio Caribe had conviently moved out all its equipment that day, transferring it at another building.

2. Through a large and excellently co-ordinated spy system the police have been and are smashing all unauthorized demonstrations *seconds* after they commence. This one was allowed to continue for over an hour. Not until after the building had already been set on fire did the police move in.

3. Two of the men who had thrown the gasoline were later identified as members of the Dominican Party (Trujillo's own).

In short, the government instigated the trouble, placing the blame on the MPD, in order to justify their smashing of one of the more treatening opposition groups.

This incident just related, while not personally witnessed by me is similar to many I did see -- e.g. The account of the student and the professor in my last article. All of them wind up in the next day's editorials which proclaim something the effect that -- restraints must be placed on the opposition the Dominican Republic can not afford democracy as long as the opposition remains unruly.

Whether or not the instigation of these acts of official government violence is beyond my knowledge. If it is, however, and these incidents continue then the chances of a revolution increase daily. Revolution, though, is just one road the Dominican Republic may take. At present, the future of this country can only be speculative. As stated previously, the date for the proposed elections. Though there are more than a half-dozen opposition groups, only one, Revolucionari Partido is putting forth candidates for the tentative elections. The reason is simple -- it alone gives the opposition a chance of success. The opposition is now centered in and around the cities, among the more educated people. In outlying areas the Dominican Party is strong. For 32 years Trujillo maintained absolute power and the people there know only him. The Dominican Republic is exceedingly fertile and rich in natural resources. The peole do not have to starve, and yet they do. Touring the countryside, it is a very rare sight to see a child under 12 who is not bloated or whose stomach isn't swollen because of malnutrition. More than anything else is needed by the opposition to convince these people a new government is both possible and desireable. It is for the reason that most of the opposition, led by Union Civica National (UCN0 opposes the elections. UCN is the largest and most respected opposition group. Organized only a week prior to my arrival by members of the professional class and professors at the university, this organization does not term itself a political party. Their objectives at present coincide with the other opposition groups (staging rallies, distributing pamphlets, opposing the election, etc.) but other than that they have no political

(continued on page seven)

Men--Merp Week Is Here

Merp Week King candidates, from left to right, Tony Russo, Tom Kipp, Mike Collins, Joe Baker, and Bob Stone.

Dear Diary,

Well, I finally did it! Yes, can you believe it? - I went out with "Joe College" tonight! Well, it was just a dance. Oh heavens, it was not "just a dance," it was the MERP DANCE. We had such fun, and it was a scream to see old Silent Sam crowned King. Everyone was there and the novelty of the whole affair was that each couple - boy and girl - were dressed alike. I wore my black pleated skirt and green sweater, and Joe wore his dark continentals with his varsity sweater. Some of the kids really went guny-bo; absolutely exotic outfits. I never thought that some of those guys had it in them or could be such good sports. For that matter, I didn't know some of the girls had it in them either. Kids you'd least expect to be together were there.

What's MERP WEEK? Oh, I forgot to tell you the most important part. MERP stands for MENS ECONOMIC RECOVERY PROGRAM. The whole idea's to give the guys the same thrill that they think they give the girls when they call for a coffee date or drive-in-the country type thing. It started on November 6 and ended with the dance tonight. Last year was the first year for it, and I must admit that some of the girls had absolutely no courage when it came right down to asking a fellow out. But this year!!! Wow, it was a tremendous success! You can probably understand their hesitation at first, I mean, imagine yourself standing knocking at Sigma Kappa Nu door calling for your date . . . And what's worse, picture yourself sitting in their living room waiting for a tardy date - getting a taste of your own medicine. None of the original consternation (check these big words - I picked them up from Joe) lasted long though, especially since lots of the dates turned out to be double dates or triples. Some of the fellows, I know, never thought there could be such generous girls on campus. No, we didn't all take

What makes Artcarved Diamonds the favorite of America's College Queens?

Actually there are many reasons. Artcarved diamond rings must meet traditionally high standards for color, cut, clarity and carat weight. Their award-winning styles are a delight to the eye. And, they take all of the guesswork out of buying a diamond. Every Artcarved ring carries a written guarantee for quality and permanent value that's recognized and respected by fine jewelers from coast to coast. We think you'll agree with America's lovely College Queens.

Stop in at your jeweler and be sure to see all the exquisite Artcarved diamond rings—the rings you buy with confidence and wear with pride.

The Vermont Cynic

The Official Student Newspaper of the University of Vermont.

VOL. 79 NOVEMBER 2, 1961 NO. 16

The Golden Key

According to the Constitution of the Gold Key Honor Society, those eligible for membership consideration are "male members of the Sophomore Class . . . whose scholarship, character, and leadership qualities . . . and loyalty to the ideals of the University, have earned them the high regard of their fellow students."

What is not stated in the Constitution is that no-one is considered for membership unless he belongs to one of a few, select fraternities or is an independent. It is these fraternities which control the membership of Gold Key. Occasional independents are permitted to join only because of their traditional lack of organization. In all probability they will not try to draw other non-Greeks in after them.

Specifically, there are four fraternities which rule Gold Key. These are Phi Sigma Delta, Sigma Phi, Delta Psi, and Sigma Alpha Epsilon. In the past four years only two other houses have been represented in the "honor" society. Sigma Nu has put up one member, and Acacia, two.

Except for these three and five independents, every member of Gold Key for the past four years has also been a member of one of these four fraternities.

The membership statistics speak for themselves. Below is a break-down of the fraternal affiliation of Gold Key members for this year and the three years preceding it.

Phi Sigma Delta	16 members
Sigma Phi	14 members
Delta Psi	9 members
Sigma Alpha Epsilon	7 members
Independents	5 members
Acacia	2 members
Sigma Nu	1 member

The evidence cannot be misinterpreted. No-one can believe that no fraternity save these four has produced a man worthy of membership in an honor society. It is hardly possible that these four have a monopoly on scholarship, character, leadership, and loyalty. Instead, they simply have a monopoly on votes.

What is to be done to end the fourfold hammer lock on this organization? Should the administration step in? Should membership election be taken out of the hands of the students?

No, this is not an administrative problem. The students have let themselves be sucked into a hole, and they must extricate themselves, by themselves. As a first step, the student body must become aware of the ugly situation, both in Gold Key and in the other organizations which are similarly dominated by special interest groups. Then they must become angered enough to step in and clean up the corruption if the organization is unwilling or unable to do its own disinfecting. This can be done by investigation, referendum, monitoring of the society, or by any one of several other available means.

None of these methods will be necessary if the group takes the responsibility upon itself. The Gold Key Honor Society elects its membership at least two weeks before Founder's Day, May 1. That meeting will determine whether this organization is capable of managing its own affairs without interference from the students at large.

The Cynic will be watching that meeting with interest, and so will the rest of the University.

". . . And last week they lost a librarian in there."

Letters To The Editor

New Sorority

To the Editor:

There has been much discussion on campus recently concerning the establishment of a new sorority. Panhellenic council has studied the matter and said that a need does not exist for a new house, but yet they are willing to let a group try to establish a new sorority if the group feels that there is a need.

Such a group does exist and has met and decided to try to organize a new sorority at UVM. We are in total agreement with Panhel when they say that such a house must be non-sectarian and that the members of a new sorority must realize that their first responsibility is to the University.

Our purposes are clear. We feel that more girls ought to be given the opportunity to belong to a sorority and benefit from the beneficial aspects of sorority life. We've discussed the matter among ourselves, with Dean Harris, and with the President of Panhel, Marge Coleman. These people have been most helpful, and for this we are grateful.

The question which we face at this point is whether to attempt to reactivate the local which existed at UVM for many years or whether to approach one of the national groups which have indicated an interest in UVM for establishment of a chapter. As of now, this question is not answered. The pros of going local are simply that 1) it's financially less difficult, and 2) it means that the girls in the sorority can choose their members without any approval from alumni. The advantages of becoming a chapter of a national are found in the forms of help a national organization can and does give to its chapters. This help is both in personnel and finances.

As for the question of a negative attitude of such a group, let us make it clear and final that such an attitude does not now, and has not in the past, existed without this group. If we were against sororities, we would not be working for the establishment of another such organization. We hope instead that we will be adding another worthwhile organization to the sphere of student activities at the University.

It is our sincere hope that anyone who is interested in the establishment of a new sorority at UVM will find time to attend the meetings of the organizational committee. These meetings are held in Southwick and their dates are posted on the club bulletin board one week in advance.

The views expressed here are expressed because of personal conviction and because it is my elected responsibility to bring the news of the existence of such a group to the student body.

Sincerely,
Toni R. Appel
Chairman, Organizational Comm. for the establishment of a new sorority at UVM.

Exam Schedule

To the Editor:

I would like to see something done to improve the midterm exam schedule. The following is a schedule for the week of October 23rd.

Mon. - English words hour exam
Tues. - Panic
Wed. - English quiz
Thurs. - Psycholog[illegible] exam
French Lit. Hour exam
Parliamentary Procedure Observation
Fri. - Speech hour exam
English paper
Speech meeting with Professor
Sat. - DROP DEAD

With such a schedule how can one do her best? Can something be done?

Sincerely,
Toby Wagmeister

Problems Of Increased College Costs

Increasing college costs are preventing some of the nations's most talented young women from attending college, says a report just issued by the Joint Office of Institutional Research in Washington, D.C. on behalf of the 94 state universities and land grant colleges it represents.

Citing recent findings that, between 1952 and 1960, tuition and fees to state residents at major public universities rose more than 71%, the report concludes that the continued upward trend of college expense is stopping talented girls -- including many among the upper 10% of high-school graduates -- from entering college. Between one-third and half of those dropping out after high school asserted that finances are a major stumbling block to further study, in one recent survey of high school graduates.

Factors discouraging higher education of women include the inability of low-income parents to save adequately to meet college costs, coupled with reluctance to borrow against the future for a daughter's education; the lingering, although inaccurate, feeling of many parents that education of a son is more important than that of a daughter, if a choice must be made; and high tuition rates, in addition, boys more often than girls can earn enough funds from summer employment and part-time work during the academic

(continued on page 6)

Regulations Concerning Student Business

Agents and representatives of business establish[illegible] are prohibited from soliciting members of the faculty, staff and students for business of a personal nature within the University buildings, fraternity houses or sorority houses.

In the case of faculty, the restriction should be interpreted to include salesmen or equipment salesmen representing companies normally doing business with departments. In the case of students it is not intended to restrict the normal operation of fraternity and sorority in their dealings with grocers and other merchants servicing their organizations' needs.

All special requests shall be handled as suggested below.

1. Requests to sell tickets be referred to the University Store. Requests from organizations outside the University or from student organizations wishing to sell tickets in the lower hall of Waterman be referred to Student Association. The inquirer would also be reminded that the University Store would handle tickets.

2. Requests by students to sell articles or take orders at tables in the lower hall in Waterman be referred to Student Association Council.

3. All requests to sell or take orders in Men's Dormitories would be referred to the Dean of Men and for Women's Dormitories to the Dean of Women's office.

4. All requests for installation of vending machines and other devices in University buildings should also be cleared with Buildings and Grounds.

5. Special requests to visit fraternity houses would be referred to the President of the Interfraternity Council.

6. Special requests to visit sorority houses would be referred to the President of Pan Hellenic Council.

7. The services of the University Store should be mentioned to those making requests to sell commodities so that students would know of the store's policy of selling at commission of 10%.

8. All other requests should be considered by at least three members of the following group depending on the area involved by the request.

Dean of Administration
Treasurer
Dean of Men
Dean of Women
Representative of Student Assoc.

STUDENTES

... reader, are able to ... ing factor in the fol... should immediately ... impressions. Make ... dging your ideas to ... tration, then sit back ... chaos reign. The fol... ments are mine alone, ... mockery are unin... and I will walk away ... babbles about subject... sions. My scope is ... UVM is wide as the ... spawns our breed.

Sally Kessler is a graduate student at UVM and was a high ranking undergraduate here. Barry is a mountain climber and camping guide.

- Townsend or Brooklyn, Newburg or Newton? How ... years here have I seen friendly freshman form closed ... What intolerance causes the ethnic and geographic gravitation ... students to always seek their own so fiercely? You Brooklynite -- ... often, from years in Burlington, learned that all Vermont... provincial plow plodders - no, I guess you haven't. You ... because Manny Blatz lives in the Bronx, is he automatically ... ? Are you sure that his friendly overtones are sinister? ... we never discard, any of us here, our incredible stereotypes?

... culture hounds who berate Vermont for its boorish Lane Series ... you who have seen four Lane Series in the last two years. ... who did condescend to see poor senile Robert Frost last spring. ... hear the man? I am not asking if you listened to him read ... etry, I asked, did you hear THAT MAN? "I know there is no culture ... Vermont," you tell me. Yet where were you on any one of a multi... of nights when lectures and artists have revealed themselves ... their lives to any who would partake? Why fraternities, why do ... even occasionally rival a Lane Series presentation with some paltry ... or do you revel in your anti-intellectualism? Fraternity ... member, when will you decide what you think is of value or valueless? ... will your brothers dictate taste? Let me not exclude our girls ... after years of liberal training still giggle or severely smirk at ... a mite different from themselves. You who are afraid to know ... mately a Negro, Jew, Indian, Persian, South American, you're ... ing to college to learn, to broaden, to expand. Great God, cliquish ... meet these people, they are alive.

... yet, how many clear voices have I heard rise above the drone ... the coffee shops, juke boxes and endless cigarette smoke? In my ... ars here, I have met innumerable minds of brilliance belonging to ... ple of great worth. Usually you bury them in a cubbyhole. They've ... ver gained recognition. Why? Must we again return to our provin... isms, our lack of tolerance? You faculty-you're at fault. You've ... te no attempt to spiritually aid those who seek the meaning of ... wledge. Yes, you impart facts, at times, personality, but seldom ... you accept intellectual challenge (the sign of your students to ... interest in your field).

... ve spent four years in undergraduate work, two years teaching and ... nowemployedin graduate work. My real connection with campus ... tivities are slight, yet I cannot lose sight of UVM's gift to me -- its ... cation. My worldly knowledge might perhaps be summed by the sun's ... erglow on a wintery Mansfield; or the progression from rain to ... w as we move inland from Champlain on a late fall's day. You who ... rr through the snow, you who say "this lousy cold state", look ... ve you at the pines and the spruces bending under the weight of ... snow. When will you bend UVMers? When will you look around you? ... the land, the people, the culture, (yes, it's here).

Understand, live, experience new avenues of life. I'm pleading - ... ease don't follow the path that most follow just because it's the most ... worn. Liberal arts students realize that the engineering student ... t a dope. He's attempting to understand the universe from his frame ... reference -- the specific inductive-leaping understanding that belongs ... math and science! And you engineer, don't frown upon the names ... rman Melville and Henry Thoreau -- really those men envisioned ... totality of mass aims.

Many paths lead from the Waterman Building. Take the one that ... best, but try them all before you choose "the best".

Macmillan Speaks At Med School

A "specialists' specialist" spent last week at the University as Visiting Lecturer in Radiology.

Dr. Alexander S. Macmillan, recently retired radiologist at the Massachusetts Eye and Ear infirmary and associate in radiology at Harvard Medical School, is conducting conferences, seminars and teaching sessions, and lectures under the sponsorship of the UVM department of radiology.

Wednesday, Oct. 25, Dr. Macmillan gave two lectures for x-ray technicians in the Austin Auditorium of Mary Fletcher Hospital. About 125 graduate and student technicians from Vermont, New Hampshire, and northeastern New York attended the lectures and a dinner in the Faculty Dining Room of Waterman, sponsored by the Vermont Radiological Society and Associates in Radiology.

On Thursday, Dr. Macmillan attended an otolaryngology-radiology seminar at the Rehabilitation Center of the DeGoesbriand Hospital, and on Friday and Saturday gave three lectures for radiologists, otolaryngologist, and medical students.

Guided tours of the new radiology department of Mary Fletcher were conducted throughout the week for guests attending the sessions.

Dr. A. Bradley Soule, chairman of the UVM department of radiology, hails Dr. Macmillan "as the outstanding authority in the field of x-ray studies of mastoid and sinus disease and related fields... a man who has devoted his entire professional life to radiologic studies in the fields of eye, nose and throat."

Dr. Macmillan was graduated from the Tufts College Medical School and served as medical officer in the Army during World War I. In addition to his major appointment at the Mass. Eye and Ear Infirmary, he has served as consultant in radiology to the Mass. General Hospital, the Boston City Hospital, the Newton Wellesley Hospital, and a number of other institutions.

His wife, daughter and one son are all physicians, the son having succeeded his father as attending radiologist at the Eye and Ear Infirmary while another son, Dr. William H. Macmillan, is associate professor of pharmacology in the UVM College of Medicine.

"The privilege of having a visiting scientist in our teaching hospitals for a week or so at a time," said Dr. Soule, "affords us the opportunity of deriving much that cannot be obtained from a single lecture. Not the least valuable results of an experience of this type are the intangible stimuli that come from association with a scientist and scholar such as Dr. Macmillan."

UVM Recieves Grants

Help for research projects in areas where financial support has not been readily available is in the offing for University of Vermont faculty members.

UVM's Board of Trustees Saturday endorsed a $25,000 fund in the University's 1962-63 budget for this purpose.

Vermont President John T. Fey said the new fund would be an important boost to faculty members carrying out research projects in areas where little or no financial support is available.

He cited the phenomenal technical and scientific acceleration which has followed "a major investment of support by the federal government and business and industry."

Professor Irwin Greenleaf is a well known member of the Classical Department.

PROFESSORES

It seems to be fashionable these days, not only in the pages of the Cynic but also in informal speeches and conversation, to condemn the University of Vermont. The two column classically titled "Studentes" and "Professores" and the editorial page have in almost every issue of this paper contained attacks, complaints, and diatribes against students, professors, and administrators. Even that old, dead horse, the ex-Dean Clifford, still receives a bitter kick now and then.

One begins to wonder just what is the trouble. Who or what is responsible for this purgatory in which we live? Are freshmen really "inherently inferior"? Are administrators muddle-headed and sadistic? Are "most" of our faculty members time-servers who teach their courses for thirty years and then die?

These charges have been made by more or less responsible people, and I think they deserve an answer. I would be the last to say that the University of Vermont is perfect, but on the other hand one is apt to get the impression that it is completely bad, and it is not. In my opinion, and in the opinion of most of my colleagues, UVM is a very good place to be; otherwise we would not be here.

There does exist, as in all universities, a trichotomy made up of students, faculty members, and administrators. I suspect that each group considers itself to be the most important part of the whole, but which is the body, which the soul, and which the spirit will never be determined. Probably the new library will supersede all of us. There is a tendency, however, to feel that each of these parts is at war with the other parts, but this is not the case. Generalizations of this type cut into three pieces, and it is important to remember that the terms "administration", "faculty", and "student body" are merely words which hazily define certain functions; that there is no stone wall marking off the boundaries of each division. A student or a dean may perform faculty functions, and it's a rare dean who has not spent years teaching in the classroom before he was elevated to the peerage.

Every organization must be staffed by human beings, and so it cannot be completely successful, because human beings are people and people have faults. People sometimes lack patience, lose tempers, get foolish ideas, make stupid mistakes, feel prejudice, etc., etc. These faults, and many more, can be found among all levels at UVM, but they are found to a lesser extent in the academic life than elsewhere, and of the five colleges where I have taught, I find at UVM the most harmonious relationship existing among the students, faculty members, and administrators. Although indignation at human nature may be justified, it accomplishes very little without constructive ideas to go along with it.

It might be a nice thing if UVM were a place where the administration, the faculty, and the students were all patient, kind, and wise; where the administrator and the teacher always said the right thing to the right student at the right time, and where the student was completely independent and mature, but not to such an extent that he would refuse to accept a little paternalism from an instructor who was willing to raise his grade from a fifty-nine to a sixty. This situation might be nice, but it would also be very dull, and if I were a college student I would go elsewhere.

As it is, I think that the student at UVM has made a wise choice. He is probably more fortunate than his counterpart in the other state universities. His classes are usually small enough so that the instructor learns his name and face and treats him as an individual.

(continued on page 7)

The Circular File

by Mike Grossman

When the IFC sent our Homecoming floats floating, as the Cynic so appropriately expressed it, the deed was done on the assumption that floats are impractical. The fact that Homecoming floats are a meaningful part of UVM's tradition and that the students, their parents and the alumni, were looking forward to the parade of floats didn't stop the IFC.

Many students don't think the IFC's move was an intelligent one. They feel that floats express school and fraternity spirit. In fact, many students believe that the only really practical thing the IFC needs to do is to stop tripping over itself long enough to consider all the consequences of their so-called practical innovation.

But far more serious than the mess the IFC has made of the floats is the mess they're making of deferred rushing. In the old days, before deferred rushing, students were rushed even before they arrived at UVM. Rushing started at the bus terminals and few freshmen ever made it to Burlington without being stuck with something called a pledge pin. The consequences of such a system are obvious. Students never had the opportunity to see and to judge the fraternities or even to decide if they wanted a fraternity in the first place. Thus their choices were often unhappy ones.

When properly run, the system of deferred rushing will do away with these problems. Ideally, deferred rushing gives Joe Freshman (and the transfer student) an entire semester to decide which fraternity members and to decide which group he fits into the best. It also provides an opportunity for him to see the fraternities with their hair let down, and not when they're all dolled up for formal rushing.

The deferred rushing plan offered the perfect solution to rushing problems until our IFC decided that the plan needed a few "practical" changes. First, so that freshmen can have a chance to see the fraternities before formal rushing, the IFC made the houses off limits to all freshmen. The fraternity gets fined if a freshman is caught visiting its house. Secondly, to give the freshman a chance to meet the fraternity members, the IFC made it illegal for a fraternity man to talk to a freshman or to enter the freshmen dorms. It doesn't take a philosophy major to see how illogical these "practical" changes are. The IFC has managed to botch deferred rushing so badly that it's become a game of interfraternity spying in which nobody can win, but the loser has to pay a fine. Besides managing to send floats floating, the IFC has managed to defer the point of deferred rushing.

I think it's about time for the IFC to evaluate its effectiveness. If it does, at least, Homecoming floats may be saved, and if it does, it may realize that a week of formal rushing is not enough time for the freshman to make a decision which will effect him throughout and even after their days at UVM. Isn't it about time the IFC took some *truly practical action?*

Increased College Costs

(continued from page four)

bear a heavy, significant portions of their college expenses. Or they may receive scholarships not presently available to girls.

The report points out that, at a time when the U.S. needs increasing numbers of adequately trained people . . . to perform the [illegible] duties of a rapid, complex and sophisticated society, and community, it cannot afford to waste talented womanpower. There are already too many unutilized workers. Furthermore, most young women today can look forward to about 25 years of work outside of home, principally after child-rearing days are over.

The special values in educating women, even those few who may never be gainfully employed -- lie in the improved cultural and civic heritage they pass on to their children and the lower ratio of broken homes among the better educated. Yet in the fall of 1958, only 39% of recent girl high-school graduates entered college, compared with 54% of the boys.

As a solution to the problem, the report advocated that tuition and other costs be kept low, in keeping with "the great American tradition of public education which runs -- through college and graduate schools. It is essential that "Attendance . . . make it possible for increasing numbers of low-income people to continue their education as far as their capabilities permit. Reasonable tuition and fees in public institutions are vital in allowing such students, men and women, to get the necessary education to contribute importantly to themselves, their families, communities and the nation.

To maintain moderate-cost education as an investment in the future, says the report, all colleges must have better financial support. State universities and land-grant institutions, in particular, must receive this from state legislatures, business and industry, alumni, and the general public.

Bainton Pleads For Proper Balance Of Human Endeavor

BURLINGTON, Vt., Oct. 21 – A University of Vermont symposium audience was warned recently of a "tendency to preserve our lives at the risk of so impoverishing them that they may not be worth saving."

Prof. Roland H. Bainton, Yale's Reformation scholar, joined three University of Vermont faculty members in a Symposium on The Challenge to Scholarship which marked dedication of the University's new Bailey Memorial Library.

Prof. Bainton told a Homecoming Weekend audience that "I would enter a plea for the humanities and the spiritual disciplines," and he noted a falling off of candidates for medicine, nursing and the ministry which he said had been traced by many to Sputnik.

We have become so intent on pursuing the scientific and technological disciplines which may preserve our lives, he said, that we run the risk of so impoverishing them they may not be worth saving.

He joined Prof. Paul D. Evans, Prof. Herbert C. MacArthur and Prof. Paul Moody of the Vermont faculty in urging "selectivity" on those entrusted with stocking the University's new library.

Prof. Evans, speaking from the point of view of the social sciences, told the Symposium audience that there can be no promise of victory save that which the spirit of free human inquiry can offer.

He called "books the tools of scholarship, and the great obligation of those who use them."

"We must guard jealously our admissions requirements for the books we enroll upon our shelves if our successes at century's end are to be worthy of our pride," the Vermont historian said, charging the scholar with "bearing a heavy responsibility to serve as a guide in his area of knowledge."

Prof. Moody, a zoologist and author of a text on evolution, cited a "population explosion" in scientific publications, and noted that it has been observed that 20 percent of all the people who ever lived on earth are living today.

"Of more immediate significance, because of the rather tardy development of science in our social evolution, 90 percent of all the scientists who ever lived are living today," he said.

"The modern scientist, as well as the librarian, is in a sad dilemma," he said, in endeavoring to keep intelligently abreast of the daily advances occurring in science, and reported in an increasing number of scientific [illegible] and books.

He said he believes there will come a revision in our concept as to what consitutes true scholarship in science," to the extent that we will of necessity increase our regard for the scientist who performs his research in the library, giving him more equal rate with the scientist who performs in the laboratory.

"I forseee . . . with the publication explosion of scientific literature . . . that the research scientist in his laboratory will become more and more dependent upon other scientists who spend their time of their time in libraries.

Prof. McArthur, chairman of the University's library committee and a member of its English department, spoke from the point of view of the humanities, defining them as "cherishing what is distinctively human."

"But when you look at your newspaper, you discover that what is distinctively human is not always what you want to cherish."

The key, he said, is in [illegible] "the distinctively human characteristic which sets man apart from animals, makes him capable of doing anything he can imagine.

Is this the only reason for using Mennen Skin Bracer?

Skin Bracer's rugged, long-lasting aroma is an obvious attribute. But is it everything?

After all, Menthol-Iced Skin Bracer is the after-shave lotion that cools rather than burns. It helps heal shaving nicks and scrapes. Helps prevent blemishes. Conditions your skin

Aren't these sound, scientific virtues more important than the purely emotional effect Skin Bracer has on women? In that case, buy a bottle And – have fun

Poor Performance By American Ballet Company

[illegible] Noble

The [illegible]ished performance of the [illegible]n Ballet Theatre (Lane [illegible], November 26) caused even the [illegible]ated balletomane to [illegible] dismay. When a group of performers begins a season's tour, certain flaws are to be expected; if the company was not yet ready for performance; and it is not technically capable of performing many of the numbers in its present repertoire. This unexcusable inept-ness was in evidence throughout the evening's program.

The evening's torture opened with *Divertimento* with the music by Rossini. From the first move-ment, it was apparent that the company [illegible] smiled well, but could do little else. It is impossible to enjoy a precise art form when its pre-sentation, is not precise. The eye automatically begins to search [illegible] for errors; there were many of these. The disalignment and rag-gedness of the corps was distress-ing. One performer missed his partner twice. Yet, while the group worked as a unit (figuratively speaking) the effect was bright and fresh.

Eleanor D'Antuono, though as yet only a corps member, gave a much more creditable showing than did Ruth Ann Koesun, who is supposed-ly one of the company's headline dancers. Miss D'Antuono moved excellently with a velvet smooth-ness that complimented Rossini's melodies. But Miss Koesun's Spanish variation lacked any life, and at one point her legs shook so badly that it was noticeable, even in the balcony.

Mr. Ivan Allan, who attempted to assist the insecure Miss Koesun, should go back to New York for a refresher course. His basic form was poor, his movements slipshod. After ten years in the professional theatre Mr. Allan must have learn-ed that a boyish grin cannot com-pensage for inadept dancing.

The company's variation on the Adam and Eve theme, called Eden, was a glimmer in the darkness. Caj Selling and Mariane Orlando treat-ed the story with a comic lightness. But again, faulty movement marred what could have been more just a pleasant experience.

But the absolute depths of the evening was yet to come. George Balanchine's theme and Varia-tions was massacred by Sallie Wilson, who constantly clutched at her partner, Bruce Marks, for physical (and apparently moral) support. Her movements were strained, her arms awkward; and not even Mr. Marks' strong per-formance could compensate for these things. Marks was perhaps the strongest male showing. The male section of the company is terribly weak; the strength that a male dancer is capable of exuding was nowhere apparent.

Trustees Accept Grants

More than $300,000 worth of gifts, scholarships, and teaching and research grants were accepted by the Board of Trustees of the University of Vermont at today's (Oct. 21) meeting.

Teaching and research grants totaling $159,558 were accepted. Of this amount, $115,896 is for organ-ized research.

Gifts, including $100,000 from the Avalon Foundation for Phase Two of the Medical Science Build-ing totaled $152,942. Scholarships totaled $19,965.

Seven new faculty appointments were approved by the Board of Trustees Saturday at the Univer-sity of Vermont.

At the same time, the Trustees also confirmed the appointments of three persons in administrative positions. The three are: Robert J. Slater, Dean of the College of Medicine; Carl O. Eycke, assistant dean of men; and Sylvia Ohanesian, acting assistant dean of women.

Named to the faculty were: Kath-leen M. Collins, Reading Center, College of Education and Nursing; Sidney W. Eldridge, department of commerce and economics; Jane M. Keller, department of education; Peter P. Heller, department of romance languages; Bernard H. Levine, department of preventive medicine; Joyce K. Livak, depart-ment of home economics; Stanislaw J. Staron, department of political science.

Toshinori Ishikawa was named to a research associate in the department of biochemistry.

Leaves of absence were ap-proved for Philip N. Eldred, de-partment of civil engineering; Ar-thur B. Thompson, Jr., department of political science; and Margaret Wing, assistant dean of women.

The resignation of Donald G. Leonard as assistant to the dean of men was accepted.

The University of Vermont Board of Trustees Saturday com-missioned Paul Aschenbach to sculpture a bronze statue to stand at the entrance of the new Guy W. Bailey Memorial Library.

The Statue will be approximately 12 feet high, will be contemporary, and will be situated at the main entrance of the building. The work is expected to be ready in the fall of 1962.

Home Management House To Be Dedicated

The new Home Management House at the University of Vermont will be named in honor of a former UVM faculty member. The an-nouncement was made by Board of Trustees at Saturday's meeting.

The House will be named in honor of Miss Alice Emma Blundell who was on the UVM staff from 1918 until the time of her death in 1936. She was instrumental in acquiring the first Home Management House for the University and was a leader in the national movement for this type of instruction.

Miss Blundell received her B.S. from Iowa State College and Master of Science from Columbia. She was a member of Phi Kappa Phi, Theta Sigma Phi, and Omicron Nu hon-oraries.

The Dominican Republic A Nation In Transition

(continued from page three)

program or ideology of their own. When the government of Trujillo falls, either peacefully, or forcefully, most of the opposition is favoring UCN's plan to set up a procisional government until the time the nation is ready for a general election. By this manner, an orderly transition of power can be accomplished.

The political alignment of most of the opposition is to the left. But this is not to imply they are against the U.S. At present they are looking only to the United States for help. What our policy will be to the opposition and Trujillo will largely determine the political future of the Dominican Republic.

Scene and Heard

by Roanne Bockar

CLOUD NINE -

Tom Sullivan, Phi Sig, was recently pinned to Sandy Skinner.

Sophie Sirota, Tri-Delta, '61, has become engaged to Steve Appert, Phi Sig, '60.

Serafina Seigafoos, Eta Beta, '61, has become pinned to Dick Arbitter, Theta Chi, '61.

Crabe Jaffe, TEP, '62, became pinned to Kenny Reisner, Queens College over Homecoming Week-end.

Phyllis Wadsworth, ADPi, '62, and Bob Dente, Sigma Nu, '62, also made Homecoming Weekend the scene of their engagement.

Peter Franz, Acacia, was pin-ned to Polly Hemingway.

Dave Shiverick, Acacia, was pinned to Kathy Thomas.

CONGRATULATIONS -

Tau Epsilon Phi recently brothered up the following: El-liot Rahr, Neil Yeston, Wayne Mirsky, Joel Bauch, Peter Low, Gary Kaye, Billy Odin, Miles Tashman, Arnie Wexler, and Harvey Tauber. Also TEP pledged to it's brotherhood Bob Munzer and Stu Levinthal. Pi Beta Phi sistered-up Mary Bunt-ing and Ashley Miller on Tues-day, October 16.

John McTaggert, Alan Mon-tague, and Ed Connelly were initiated into the brotherhood of Acacia.

Sandy Kornstedt did a wonder-ful job twirling at the Home-coming game. She's a Gamma Phi.

Phi Sigma Delta has once again enlarged its brotherhood. Congratulations to James G. Labb, Barry Miller, Larry Tanen-baum, Richie Horowitz, Fred Gabbe, Peter Schwartz, Jerry Drescher, and Steve Fireman.

POTPOURRI -

After Homecoming Weekend the Theta Chi's decided to spend a quiet weekend at home. Unless the ADPi's get on the ball, Theta Chi will take possession of the table in the kitchen.

Congratulations to Elaine Wright, ADPi, '62, Pat Hoskie-wicz, ADPi, '62, and Mrs. Gary Hockk, '62, who were pledged last Tuesday to Omicron Nu, the National Home Economics Honorary.

During halftime of the football game on Homecoming weekend, Alpha Epsilon Pi collected al-most $100 for the Optimist Boys' Work which supports the Little League and other various boys' organizations.

November 4th is the date of the Alpha Chi Phi Delt Party to be held at the Phi Delt house. On that same date the Alpha Chi's will all be busy in downtown Burlington working on "Our Mile of Money" — the Alpha Chi project for cerebral palsy.

Congratulations to Kappa Sig who won the football league. Sigma Nu also did a great job taking second place.

Ward Bond Townsend escorted Wagon Train, Ticonderoga, N.Y. Friday evening in search of

On Saturday afternoon, Oct. 28, AEPi had a very successful open house after the game with AEPhi.

Alpha Chi hopes that everyone had a spooky time at their open house with SAE. Their combined effort seemed to have turned out well.

On Thursday, Oct. 19, AEPi played and beat Sigma Phi Epsilon in football.

TEP is planning to have a party on November 11th -- music by Rick Nalin.

Is it true what they're saying about Nick Carmolli?

The TEP band with Rick Nalin did a bang up job at the Hillel House Saturday evening, Oct. 28th.

Gamma Phi's Homecoming Weekend literally started with a big bang when their 15 foot weather balloon blew up before it ever got off the ground. It made Charlie Calamount look pretty lonely sitting in a basket sus-pended in mid-air with nothing holding him up but balloons bought in a last minute rush at Forest Hills. Better luck next year.

At times I really wish that I were a mind reader so that I could write this column by my-self. Unfortunately I need the assistance of the sororities and fraternities. Please hand your society news in by Thursday afternoon - - 3 P.M. Thanx!

On Campus with Max Shulman

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

THE DATING SEASON

I have recently returned from a tour of 950,000 American col-leges where I made a survey of undergraduate dating customs and sold mechanical dogs, and I have tabulated my findings and I am now prepared to tell you the simple secret of successful dating.

The simple secret is simply this: a date is successful when the man knows how to treat the girl.

And how does a girl like to be treated? If you want to know, read and remember these four cardinal rules of dating.

1. *A girl likes to be treated with respect.*

When you call for your girl, do not drive up in front of the sorority house and yell, "Hey, fat lady!" Get out of your car. Walk respectfully to the door. Knock respectfully. When your girl comes out, tug your forelock and say respectfully, "Good evening, your honor." Then offer her a Marlboro, for what greater respect can you show your girl than to offer Marlboro with its fine flavor and exclusive selectrate filter? It will in-dicate immediately that you respect her taste, respect her dis-cernment, respect her intelligence. So, good buddies, before going out on a date, always remember to buy some Marlboros, available in soft pack or flip-top box in all 50 of the United States and also Cleveland.

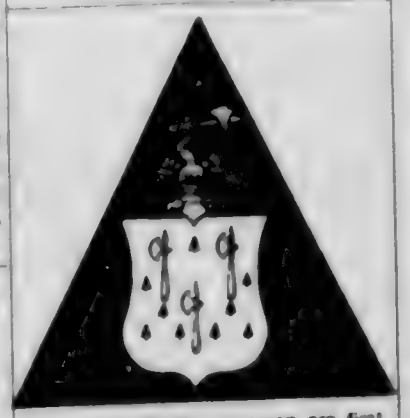
A girl likes to be taken to nice places.

2. *A girl likes a good listener.*

Do not monopolize the conversation. Let her talk while you listen attentively. Make sure, however, that she is not herself a good listener. I recollect a date I had once with a coed named Greensleeves Signfoos, a lovely girl, but unfortunately a listener, not a talker. I too was a listener so we just sat all night long, each with his hand cupped over his ear, straining to catch a word, not talking hour after hour until finally a policeman came by and arrested us both for vagrancy. I did a year and a day. She got by with a suspended sentence because she was the sole support of her aged housemother.

3. *A girl likes to be taken to nice places.*

By "nice" places I do not mean expensive places. A girl does not demand luxury. All she asks is a place that is pleasant and gracious. The Tomb of the Unknown Soldier, for example. Or Mount Rushmore. Or the Taj Mahal. Or the Bureau of Weights and Measures. Find places like these to take your girl. In no circumstances must you take her to an oil-cracking plant.



4. *A girl likes a man to be well-informed.*

Come prepared with a few interesting facts that you can drop casually into the conversation. Like this: "Did you know, Hrunkiepuss, that when cattle, sheep, camels, goats, antelopes, and other members of the cud-chewing family get up, they al-ways get up hind legs first?" Or this: "Are you aware, Hotlips, that corn grows faster at night?" Or this: "By the way, Lover-head, Oslo did not become the capital of Norway till July 11, 1814."

If you can slip enough of these nuggets into the conversation before dinner, your date will grow too torpid to eat. Some men save up to a half million dollars a year this way.

• • •

To the list of things girls like, add the king-size, unfiltered Philip Morris Commander. Girls, men—in fact everybody with a taste bud in his head—likes mild, natural Commander, co-sponsors with Marlboro of this column.

Horn To Speak On Zionism At Hillel

On Sunday, November 5, Hillel will present Mr. [illegible] as special guest speaker at the [illegible] Mr. Horn's topic will be "A Philosophy of Modern Living." This will be his second visit to the campus of philosopher and Mormon leader, the world famous founder of the Reconstructionist Movement of Judaism.

Mr. Horn's background includes many years of close association with Zionism and with the Zionist movement. He has been the field supervisor of Brooklyn Young Judea, director of leadership training institutes at Camps Tel Yehudah and Herzl, president of the Student Zionist organizations at [illegible] College, [illegible] and at [illegible] University during his graduate years. Mr. Horn also spent a year in Israel at the Leadership Training Institute, '55 - '56. He is a graduate of Brooklyn College, and received his M.A. in Sociology and Human Relations from the University. Presently, Mr. Horn is the New England Regional Director of the Youth Department of the American Zionist Council in Boston. All are welcome to attend the lecture. Admission is .50¢.

Correction

I neglected to mention that last week's PROFESSORES column first appeared in Centaur.

MERP!

(continued from page three)

In fact, you'd be surprised at how cheaply one can entertain when one has to. The fellow always seems to find a way - as for me, one girl merped a fellow in the Lane Series (unless her roommate got a ticket), another group went to the 5¢ movie (never one to say that there it was packed at Southwick). One girl merped an officer in ROTC and he took her to Military Ball, and Saturday afternoon, some of the girls took their dates to the Vermont-Middlebury game in Middlebury (imagine 8 kids in a VW - well, the fellows do it all the time anyway).

Well, must run now and wash my hair so it'll look O.K. for tomorrow night. Wally (a guy I merped on Tuesday) is taking me to the show.

Tau Beta Pi Smoker Friday

The annual "Engineering Smoker" will be held this Friday, November 3, at 7:30 p.m. in the Waterman Coffee Shop. Cider and donuts will be served during intermission.

There will be skits by the Electrical, Mechanical, Agricultural and Civil Engineering students.

This year the faculty skits will be produced by the Electrical and Mechanical Engineering Departments.

This annual Engineering Smoker is sponsored by Tau Beta Pi, the National Engineering Honor Society. The winning group will have their name and year etched on the Tau Beta Pi Award, which is located on 3rd floor Waterman.

Nota Bene

Vermont fare--for [illegible] for the menu--is [illegible] University Club [illegible] held November 18 at [illegible] faculty dining room, [illegible]

THERE'S CHALLENGE TODAY FOR VIRTUALLY EVERY TECHNICAL TALENT AT PRATT & WHITNEY AIRCRAFT

Almost every scientifically trained man can find stimulating and rewarding career opportunities within the broad spectrum of Pratt & Whitney Aircraft activities.

From the solid foundation of 36 years as a world leader in flight propulsion systems, P&WA development activities and research investigations today are far ranging. In addition to continuing and concentrated development effort on air breathing and rocket engines, new and exciting avenues are being explored in every field of advanced aerospace, marine and industrial power applications.

The reach of the future ahead is indicated by current programs. Presently, Pratt & Whitney Aircraft is exploring the fringe areas of technical knowledge in *magnetohydrodynamics, thermionics* and *thermoelectric conversions* to *supersonic propulsion* . . . *fuel cells* and *nuclear power*.

To help move tomorrow closer to today, we continually seek ambitious young engineers and scientists. Your degree? It can be in: MECHANICAL ■ AERONAUTICAL ■ ELECTRICAL ■ CHEMICAL and NUCLEAR ENGINEERING ■ PHYSICS ■ CHEMISTRY ■ METALLURGY ■ CERAMICS ■ MATHEMATICS ■ ENGINEERING SCIENCE or APPLIED MECHANICS.

The best still remains. The challenge grows greater. And a future of recognition and advancement may be here for you.

For further information regarding an engineering career at Pratt & Whitney Aircraft, consult your college placement officer or write to Mr. R. P. Azinger, Engineering Department, Pratt & Whitney Aircraft, East Hartford 8, Conn.

Professor John C. Huden Says State Neglected Archaeologically

...as long been the most ...rchaeologically) section ... despite a growing ...ence that its western ... past, has supported ...pulations since paleo... (circa 4000 B.C.)."

...n C. Huden, Director ... professor of educa... University of Vermont ..., presented at the an... of the Eastern States ... Federation in Wil..., Virginia, Saturday and ..., Oct. 28-29. His paper is ... Vermont Archeology." ... the author of numerous ar... Vermont history.

...paper, Dr. Huden says that ... is a rich field archeol... underground and under ...ater. He says that pre-historic ...rvings have been found in Brat... and Bellows Falls. Unmis...kable evidences of Pre-Algon... and Old Algonkian cultures ...ave come to light in many parts ... Vermont but have been scien...fically worked only in the Cham...lain Valley. Recent Algonkian ...aces, often mingled with Iro...uoian goods, can be found in mu...eums in New York, Ticonderoga, ...nd Burlington including the "Iro...uois Colchester Jar" in the UVM ...leming Museum.

...n old maps, Dr. Huden points ...t the Champlain Valley is label... as "Itocoisia." Champlain re...rted few inhabitants in the area ...hen he explored in 1609, Vermont ...pparently being a buffer strip ...om about 1550 until 1761 when ...nglish settlers began to colonize ...earnest.

Vermont is the site of pre-Revo...tionary and Revolutionary forts ...t little has been done at such ...tes as Isle La Motte (Fort St. ...nne, 1666), Newbury (1750-1781), ...r Hubbardton (1777), all of which ...re known to have been the homes, ...t least temporarily, of Indian groups and white pioneers.

Dr. Huden says that skin diving has resulted in the rediscovery of Revolutionary naval wrecks in Lake Champlain and that among finds are warships, cannon balls, uniform buttons, shoe buckles, and coins.

"Vermont is a rich field, it deserves professional attention," concludes Dr. Huden.

Summer Jobs In Europe

Summer jobs in Europe are now available to almost every American college student. The American Student Information Service, known as ASIS, has more than 5,000 summer jobs in their files awaiting applicants. In the past four years ASIS has successfully placed thousands of American college students in varied summer jobs throughout 11 European Countries. Jobs are mostly unskilled and many do not require a knowledge of a foreign language. Monthly wages range from room and board in Spain to $150 for the highest paid positions in West Germany.

This coming summer thousands of European employers will provide summer employment for American college students, in order to make it possible for young Americans on a limited budget not only to see Europe, but also to "live it".

Jobs include factory work, resort work, construction work farm work, hospital work, child care, camp counselling positions and many others. Students will receive the same wages as the Europeans with whom they are working.

In addition to an opportunity to personally get to know "the man behind the counter" in Europe, a summer job in Europe can defray the cost of the trip by as much as 50%.

The ASIS recently announced that it has launched an expansion program designed to provide better organization and service by its Placement Department. A new, large, and centrally located office has been opened on Luxembourg's busiest street, the Avenue de la Liberte. It was also announced that the ASIS Placement staff has been doubled and placed under new management.

For further information and complete details write ASIS, 22 Avenue de la Liberte, Luxembourg.

PROFESSORES

(continued from page five)

He certainly has more freedom in all respects that I did as an undergraduate. The faculty member who instructs him is highly trained in one or more fields and probably is a dedicated teacher who enjoys teaching his subject, who likes students, who may even be on friendly terms with an administrator or two, and who is willing to give help and advice any time a student asks for it. If, late in the day or at the end of a week, your professor looks tired and seems irritable, it's probably because he is tired and irritable, owing to the fact that he not only teaches and advises students, serves on Senate and Faculty Committees and does his research whenever he can grab a spare moment, but also is active in community programs such as the PTA, Community Chest, Red Cross, hospital work, etc., etc.

Please do not misunderstand me, I do not mean to imply that all is perfect in Eden. There are, of course, faculty members who do not do their share; there are administrators with whose policies I do not agree; there may even be students who cut an eight o'clock class occasionally. But the majority of students, faculty members, and administrators are sincere and conscientious people who are earnestly trying to do the best they can with the means they have. And until I see proof to the contrary, I shall go on believing this. One does not class all students as morons merely because a few have failed; not all professors as time-servers merely because a few have given up; nor all administrators as dictators merely because of a policy disagreement with one or two. It is this kind of reasoning which leads to discrimination and prjudice of the worst type. When it appears in print the harm may be incalculable.

Grants Accepted

(continued from page five)

Many educators have become increasingly concerned, he said, that little or no major support has been available to aid research in the social sciences and the humanities.

UVM's fund, which Dr. Fey said he considers an expansion of the former research grants the University has annually awarded to selected members of the UVM faculty, will be available to all members of the faculty for support of research, including travel, publication and secretarial assistance.

Dr. Fey said that the new fund, smaller in total than many individual grants from the federal government and business and industry, marks a beginning, and he said he was hopeful that government and private business will show an increasing interest in financing research in the social sciences and humanities.

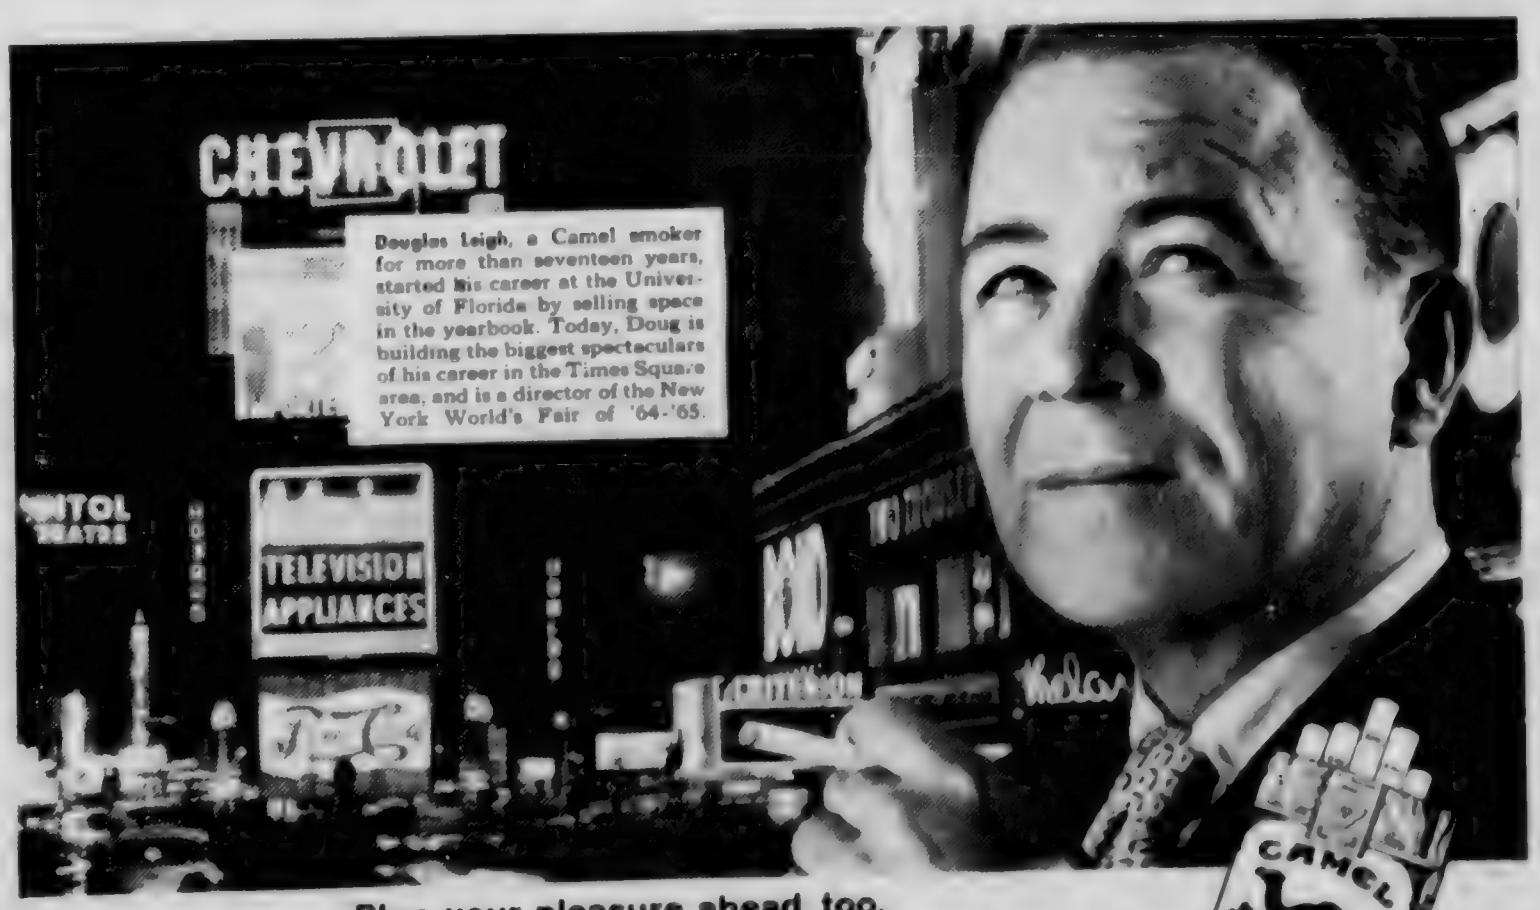
Career Cues



"Hitch your wagon to a 'growth' industry— and grow with it!"

Douglas Leigh, President
Douglas Leigh, Inc.

"A growth industry is a new industry that is on the way up — moving quickly, expanding fast. When you join a company in one of the growth fields you have something extra working for you . . . you grow up with it. To find out which industry is right for you, try this: Ask someone in a good investment office to give you a list of the industries he considers 'growth industries'. Data Processing, plastics, and electronics are a few examples. Then pick the one you have a leaning toward, and get the names of the most progressive companies in that field.

One thing I'd like to point out from my own career is . . . a growth industry may also be an *old* business that's on the verge of *new* development. Shortly after leaving college I found this situation in the Outdoor Advertising field. What my associates and I did was to employ color, action and motion to dramatically personify the product, brand or services being advertised. In doing so, we developed the modern type 'Spectaculars' that talked, blew smoke rings, soap bubbles, etc. . . . signs that changed the face of Broadway and the famous Times Square area.

This is just one example. The really important thing to remember is this: When you set your sights on a career, aim for an industry that is going to grow, so you can grow with it. It's the difference between a rocket that blasts off, and one that just sits there. Good luck!"

Douglas Leigh, a Camel smoker for more than seventeen years, started his career at the University of Florida by selling space in the yearbook. Today, Doug is building the biggest spectaculars of his career in the Times Square area, and is a director of the New York World's Fair of '64-'65.

Plan your pleasure ahead, too.

Have a real cigarette—Camel

THE BEST TOBACCO MAKES THE BEST SMOKE.

Hoopsters Practice Evans Optimistic

Coach Evans gives the boys a few words of advice. Will they be ready for the season? (Credit Reuben Jr. SPS.)

UVM basketball got underway last Tuesday as Coach Fuzzy Evans' 1950 squad began practice. This year's team faces a tough schedule of twenty-five games, including matches against Brandeis and the New York Athletic Club also. For the first year, the squad is participating in the Springfield College Christmas Tournament in which each team plays three games regardless of whether it wins or loses.

While the team has lost last year's captain, Harry Bing, Coach Evans has four aggressive juniors as starters. The returning Varsity includes Benny Becton, and All-New England Conference center who broke many school records last season; Jack Shabel and Richard Ader, two backcourt hustlers and John Stahler, an aggressive forward. The vacant spot on the team is expected to be filled by Dave Strausburg, a sophomore and leading scorer on the frosh team last year.

The varsity will be supported by a fine bench of sophomore talent, returning from their undefeated freshmen season. These sophs will keep the varsity on their toes to maintain their positions.

Coach Evans' strong bench includes All-New England Honorable Mention Frosh team guards Johnny Babcock and Chuck Glick. Others vying for top positions are: Dick "Farmer" Lawson, a rugged rebounder, pivotman Bob Morse who usually leads the fast break down court and Jerry Torch, a deft pass stealer and player.

Cats-Cadets Deadlock Upsets Odds

Thirteen fumbles and five interceptions spelled the difference between a moral victory for Norwich and an honest victory for Vermont last Saturday when these two teams battled to a 6-6 deadlock in the state series opener. The Cadets, disregarding their assigned role of underdogs, matched, scratched, and fought the 20-pounds-per-man-heavier Vermont line to sparkle on defense and hold the Cats to a mere 54 yards rushing and 130 yard through the air. On the other hand, Vermont, assuming the role of favorites, had a difficult time containing Norwich's fleet backfield to 79 yards on the ground and 68 yards passing.

A blanket-covered crowd of 8,000 watched long drives by both teams in the first half end in failure as the pigskin slipped from cold fingertips at crucial moments. UVM advanced to the Norwich 20 on its first series of downs before losing the ball on a fumble, the first of six on its part. Ten plays later, Norwich had the ball on its own 10 when they fumbled. UVM guard Jeff Harvey placed himself on the ball to set up the Cats' first scoring opportunity. A pass interference call against the Cadets gave Vermont a first and goal to go on the Norwich three. However, the Cadet line, sparked by the great red-dogging of George Valhouli, threw the Green and Gold back for three successive losses. Fourth down found the Catamounts back on the Norwich 18 where the Cadets took over after a Dom Parlato pass was incomplete in the end.

It was UVM's turn to red-dog the Cadets' midway in the second quarter. Starting on the Vermont 33, Norwich drove to the 19. But then, a miscued pass attempt brought an eight yard setback, and was compounded by a five yard penalty which sent the line of scrimmage back to the Vermont 48. The Cats blitzed another pass attempt for a 15 yard loss and Valhouli was forced to punt from his own 37.

The final set of downs in the half decided the outcome of the game. Vermont started a drive on its own 40, which n
40, which in seven plays carried them to a first down on the Norwhich 13. Three attempts to score failed. On fourth down, and with only five seconds to go, hit Bob Van Ham, but Bobby Mirabelle dragged him down one yard short of six points as the clock tolled the end of the first half.

The second portion was enlivened only by a socre for each team, for the same variety of sloppy football displayed in the first half prevailed in the second. The Cadets broke the ice after eleven minutes of the third quarter. Vermont, pushed back to its own eleven, was forced to punt. But, VanHam's high boot only reached the 28 where the Cadets put the ball in play. Two plays later, they scored. After an unsuccessful line plunge, Mirabelle executed a double fake to both Valhouli and Al Pettingill, bootlegged around right end, and fired to [illegible] Cleary on the five. Cleary in turn drove for the TD. Norwich, who has a place-kicker, went for one point, but Parlato broke through and blocked the conversion.

The Catamounts retaliated three minutes later. Starting at the 47 Parlato brought the Green and Gold to the Cadet 31 on a pass to [illegible] Bolden and runs by Maynard Ducatte and VanHam. A personal foul marked the ball on first down at the 16. Three failures at touchdowns were reconciled by a Parlato Ducatte aerial down the middle. There was no doubt about the play as the Duke found no one near him over the goal line. The Cats went for two, but Parlato was nailed down before he could pass. The sealed the score at 6-6.

Parlato tries the end, barely scampers by anxious Cadet. (Credit, Reuben SPS)

Halftime Highlights

[illegible] is sporting a cheerleading group composed of eleven girls and four men.

The girls are under the direction of three year veteran, Lynn Jacobson. Other three year vets are Brenda Woodard and Ann Maynes. Sue Weatherbie, Dale Warner, Hanna Crane and Pat Ransom have two years experience. Four new girls, Barbara Laurie, Norma Danis, Sue Grasenbech, and Lynn Godsill were selected from a group of twenty-five applicants. They were selected on performance, ability, appearance, jump and spirit.

Steve Singer leads Steve Lutzker, Chuck Grutner, and Tony Russo in the male section.

The cheerleaders practice twice weekly in preparation for Saturday's game. Their primary purpose is to combine the voices of the Vermont partisans into one effective unit.

This year new cheers were written. During the next rally these cheers will be conveyed to the student body. Some other new things to look for in the future are tumbling and cheering by sections.

The duties of the cheerleaders do not end with the football season. Throughout the winter during all the basketball games they will again lead the cheering.

Working hand in hand with the cheerleaders are the baton twirlers. Eleven girls tried out for this group that performs during halftime. They were judged on ability to twirl, attitude, appearance, and willingness to learn. The entire group consists of head majorette Elaine Wright, Judy Guether, Kit Lund, Pat Conwitt, Joan Joel, Carol Watters, Sandy Fryzell, and alternates Arlene Stepelton and Sarah Jackson.

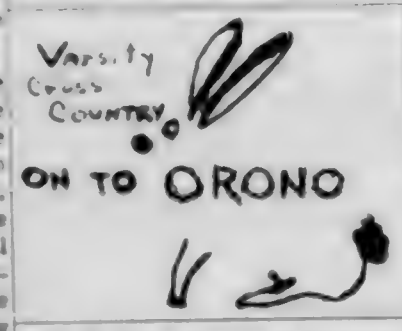
Since all of these girls have had high school twirling experience, they are familiar with basic movements. These young ladies practice thrice weekly with the band.

For the past two years the people at the Vermont home games have had the privilege of watching one of the finest baton twirlers ever to attend UVM, Miss Sandy Kornstedt.

She is a sophomore and a native of Bristol, Pa. While at Bristol High School she was drum majorette for four years. It was in the eighth grade that she began using her now famous fire batons.

Contrary to popular belief, kerosene is not used. The asbestos ends are soaked in white gasoline. This is washable, whereas the kerosene is not. Sandy has also used flags and double batons.

Many hours of practice are put into an act for Saturday's football game. She usually performs the same basic act with different variations.



Last May Sandy was chosen for the talent award in the Miss Vermont Contest for her baton twirling ability.

Sylvia Lewis, Pat Laurie, Brenda Woodard, Lee Grassie, Linda Jacobson, Ann Maynes, Sue Weatherbie, Pat Ransom, and Sue Grasenbech.

Ski-?

Skiers, attention. Interested in trying out for the ski team? There will be a meeting in the gym on Tuesday, October 31, at 7:30. Plan to attend.

Frosh Grid Takes Four

The undefeated and untied UVM freshman football team extended their string of victories to four by defeating the Williams Frosh 30-6.

It was another team effort as the Kittens offensive and defensive squads played brilliantly against a Williams eleven that was supposed to be their best team in many years. However, in gaining their fourth victory, the Evansmen gave up their first touchdown, a forty yard run by a Williams back against the Frosh reserves.

The Green and Gold wasted little time in entering the scoring column. Richie Reynolds scored two touchdowns in the first period. He was on the receiving end of two screen passes of 12 and 15 yards. Both pass attempts for extra points were successful, and at the end of the first period the score was 16-0 in favor of UVM.

Dean Kent scored midway through the second period on a twenty yard scamper off tackle. Once again a pass for the extra point was good, and at halftime the Kittens were on the top 24-0.

With such a commanding lead, Coach Evans used his bench in the second half. The boys gained valuable experience but were the victims of the only Williams TD.

Vermont's Charlie roster closed the scoring by returning a punt 73 yards showing a brilliant exhibition of broken field running.

The Kittens face their strongest test Saturday against the Dartmouth Freshmen in Hanover. If they are successful, Evans will have had his most successful season as the coach of the Frosh gridsters.

Grid Takes To Road

This Saturday the Catamounts will travel to Boston, Massachusetts to engage the Northeastern University Huskies. In this encounter UVM will be seeking revenge for last year's 22-8 defeat at the hands of the Huskies.

A comparison of the records of these two opposing teams indicates that Northeastern has a definite advantage over Vermont. Northeastern has compiled a record of 4-2 thus far this season while UVM has registered a pedger of 2-2 for their campaign.

Even though in their most recent outing they were soundly defeated by Massachusetts, Northeastern has still fared far better than Vermont among against common opponents. The Huskies triumphed over Rhode Island 26-13, and Norwich 24-2, while UVM lost to Rhode Island 18-6, and tied Norwich last week 6-6.

Thus it becomes clear [illegible] ent that Vermont will have a tough struggle on its hands in this game. However, if the Catamounts can prove themselves over last week's sluggish play, and regain their early season form, they have a good chance to defeat the Northeastern Huskies this week.

The Vermont Cynic

UNIVERSITY OF VERMONT BURLINGTON, VERMONT NOVEMBER 9, 1961 NO. 17

Symphonic Productions To Entertain Lane Series Monday And Wednesday Eves

William Steinberg, Director of the Pittsburgh Symphony Orchestra.

Photo by: Ben Stewart

Dr. Karl Boehm to be guest conductor with the Lane Series Berlin Philharmonic Orchestra.

Next week is music week at the Auditorium as the Lane Series presents the Pittsburgh Symphony Orchestra Monday night, November 13, on the Red Series, and the Berlin Philharmonic Orchestra Wednesday, November 15 on the Blue Series.

William Steinberg will conduct the Pittsburgh Orchestra in the music of Rene Leibowitz, Haydn's Symphony No.92 in G Major (Oxford), and Tschaikowsky's Symphony No. 5 in E Minor, Opus 64. Mr. Steinberg has served the orchestra as music director since 1952. Previous to that he had been the personal choice of Arturo Toscanini as associate conductor of the NBC Symphony. In 1936 he helped establish the Palestine Orchestra (now the Isreal Philharmonic) and was its first conductor. Steinberg's fame has been growing since the age of ten when he was recognized as an extraordinary violinist. At fifteen he was appearing as a piano recitalist of note and just before he turned thirty, Steinberg won the coveted Lewisohn prize for conducting.

The history of the orchestra dates back to the old Pittsburgh Orchestra founded in 1896 and conducted by Victor Herbert. Since that time the Pittsburgh Symphony Orchestra has established its unqualified right to be considered as one of the greatest orchestras of the United States. Appearances in Carnegie Hall in New York have been hailed by the Metropolitan critics as major musical events. The challenging programs and the brilliance of the ensemble under William Steinberg's direction have received praise on all sides.

The renowned Berlin Orchestra composed of some of Europe's finest musicians, Karl Boehm conducting, returns for its third North American tour, beginning in October, 1961. Wednesday night, for their Burlington appearance, the orchestra will present Johannes Brahms Variations on a theme by Hayden, Opus 56a, Symphony No. 4 in D minor, Opus 120 by Robert Schumann and "From the New World" by Antonin Dvorak, Symphony No. IX in E minor, Opus 95.

The Berlin Philharmonic, founded in 1882, has long been famed as one of the most eminent European Orchestras. This great symphonic organization has preformed under the batons of such celebrated Tchaikovsky, Grieg and Richard Strauss, and under such contemporaries as the late Wilhelm Furtwaengler and the great Bruno Walter.

The career of Dr. Boehm, the present conductor, is inseperably linked and heavily represented on records with the works of two composers: Richard Strauss, whose close friend he was, and to whom the Strauss opera "Daphne" is dedicated, and Mozart. Boehm's Mozart interpretations, devoid both of rococo playfulness and nineteenth century pathos, are widely credited with launching the Mozart renaissance which originated in the postwar years in Vienna and Salzburg and conquered the world.

The orchestra was hailed by Dan Thorpe of The Washington D.C. Star as "One of the most magnificent orchestras in the world." And Miles Kastendieck of the New York Journal-American commented, "Another memorable concert. They were received with tremendous enthusiasm. It was thoroughly deserved, for not only did the orchestra offer superior music-making, but the conductor exhibited an infectious brand of virtuosity."

Bailey Will Open Doors To Learning On Wednesday

The day for the transfer of books from Billings to Bailey Library has finally been set at Wednesday, November 15, on this day the estimated 2,000 students needed to make the move successfully will be called to Living units to work for four hour shifts. The three four hour shifts will be: 8:00 AM to 12:00, 1:00 PM to 4:00 PM, and 7:00 PM to 11:00 PM.

Girls, working in Billings, will take the books from the shelves and pack them in boxes. The boxes will then be carried, by boys, out to waiting trucks who will transport them over to Bailey. There the trucks will be unloaded by another group of boys, and the girls working in Bailey will unpack the boxes, filling the shelves of the new library. Faculty members and some students will act as captains of the various groups.

Coffee and donuts will be served to the participating students during the move by the Student Association. Moreover, tickets will be given to all the students who work on the move. These tickets will admit the students to a S.A. dance on Saturday night, and will entitle them to free refreshments.

Billings, as everyone knows, is to be made into a Student Center when it ceases to function as a library. Therefore, logically, the sooner the Library is moved, the sooner this Center will be established. And, also logically, the more students who help in the move, the quicker it will be completed.

Vermonters are noted for being, shall we say, careful with money. A student mover of the books will cost relatively little; certainly not enough to cause a rise in any fees. But if the student mover should not work, professional movers will be hired, and the Library Fee will soar.

These are two good reasons for helping with the library move, but, let's face it, a library is basically for the convenience of the students and should be a student responsibility. Let's prove by the turnout on the 15th, that the UVM students can take a little responsibility.

Military Ball To Be Held Friday

Hold those guns in position girls from left to right, Military Ball candidates are Kay Sanderson, Barbara Wool, Sally Russell, Sue Benton and Jill Rommel.

Last Friday, ROTC Company G was inspected by the corps five Military Ball queen finalists followed by a brief demonstration of the Manual of Arms. The five finalists competing for the crown are: Susan Benton, Grassmount; Martha Russell, College; Kay Sanderson, Mason 3rd; Barbara Wool, Simpson 4th; and Jill Rommel, Simpson 3rd.

Saturday afternoon the girls attended a tea in the Memorial Lounge, where they met Colonel and Mrs. Weston Blanchard. They were also judged for the one to be the Queen of the Ball and honorary cadet colonel for UVM's corps of cadets. They were judged by two representatives of the faculty, Mr. Colburn of the Art Department, and Mrs. Trotter, fashionist of the Home Economics Department. They were also judged by three Burlington area personalities: Mr. Kirk, portrait photographer; Miss Ann della Chiesa, fashion editor for the Burlington Free Press; and Mrs. Patricia Herberg, WCAX-TV "Patricia and the Weather", who, incidentally, was a former queen of the Military Ball.

At the crowning ceremony of the Ball, the queen will receive a loving cup as a token of the corps appreciation and later a scrapbook in which to record the highlights of her reign.

The corps is very pleased to be able to have "The Ambassadors" to play for them. The Ball will begin promptly at 9:00 pm. in Waterman. Tickets will be on sale at the door for those who were not able to purchase them earlier. A large turnout is expected.

Hilberg's New Book "Showered With Praise"

"The Destruction of the European Jews," tracing the circumstances and events that led to the violent death of more than 5,000,000 Jews, is the title of a documentary narrative history by a University of Vermont professor.

Dr. Raul Hilberg, associate professor of political science, is the author of a massive book that consumed 20 years of his time. The result is a 765-page book of the greatest process of human destruction that has yet occurred. Dr. Hilberg has gone into such infinite detail in a period that spans from 1933 to 1945 that the index itself takes up 18 double columned pages.

"A staggering and invaluable work . . . the most fully documented study of the Jewish fate under Hitler" is what the Harper's magazine reviewer had to say about the book. The Chicago Tribune said, "what William Shirer has done to document the rise and fall of Hitler's regime, Hilberg after 10 years of research, has done to set forth the machinery of annihilation. Reviews have showered nothing but praise on Prof. Hilberg's work. Within a generation ago, the incidents described in this book would have been considered improbable, infeasible, or even inconceivable, says Dr. Hilberg. "Now they have happened. The destruction of the Jews was a process of extremes. That, precisely, is why it is so important as a group phenomenon. That is why it can serve as a test of social and political theories. But to perform such tests, it is not enough to know that the Jews have been destroyed; one must also grasp how this deed was done. That is the story to be told in this book."

Dr. Raul Hilberg of the Political Science Department has just authored a new book.

Photo by: R. Coleman, C.P.S.

In his book, Dr. Hilberg has

Placement Meeting For Seniors Today

The University Placement Service will hold an orientation meeting on Thursday, November 16 at 4:15 P.M. in the Student Lounge. This meeting is for men and women in all curricula except education. Placement registration forms and career information books will be distributed, and the coming interview season will be outlined.

Ninety seven major industry representatives will be on campus between the twelfth of February and the thirtieth of March. Three hundred other industries correspond with the Placement Service and send information for students.

Mr. John White, Placement Director, will speak at the Thursday meeting. Information will also be distributed to students at that time.

Brothers Four To Make Second Appearance At UVM

The Brothers Four

The popular folk singing group, The Brothers Four, will be making their second appearance in Burlington on Thursday evening, November 16, at the Memorial Auditorium. The Brothers Four will be singing some of their well known songs, including the million seller "Greenfields," and many others such as "I am a Rovin' Gambler" "Mr. Tanner" "Frogg" "Green Leaves of Summer". They present a fast moving and varied program which appeals to all music lovers. The group has performed all across the country and are expert in presenting a "listenable", yet unique, [illegible] folk music favorites, [illegible] are their own special [illegible] ments. While here in [illegible] the Brothers Four will [illegible] guests of the Alpha Epsilon Pi fraternity before their [illegible] "Having fun with a song" is a motto, and that's exactly what [illegible] in store for the audience at [illegible] memorial auditorium on Thursday November 16. Tickets are [illegible] able on campus from the Alpha Epsilon Pi Fraternity and the [illegible] dent Association. Show time is 8:00 P.M.

had a one-man conference about your future lately?

You:
Why the gold bars?
Future You:
You're needed... just as your father and grandfather were. It's an obligation that a lot of qualified college men have to meet. If we don't...
You:
All right. But what can I do for the Air Force?
Future You:
The Air Force needs college trained men and women as officers. This is caused by the rapidly advancing technology that goes with hypersonic air and space flight. Your four years of college have equipped you to handle complex jobs.
You:
Say I was interested...how can I get to be an officer?
Future You:
You know about Air Force ROTC and the Air Force Academy. Then there's the navigator training program. You've probably heard about Officer Training School...where the Air Force takes certain college graduates, both men and women, and commissions them after three months of training.
You:
Starting salary is important. What about that?
Future You:
Add it up. Base pay, tax-free allowances, free medical and dental care, retirement provision, perhaps flight pay. You don't have to be an eco major to see it adds up to an attractive package.
You:
I've been thinking about getting my Master's.
Future You:
As an officer you can apply for the Air Force Institute of Technology. At no cost, and while on active duty some officers may even win their *PA.D.* degrees.
You:
Tell me more.

That's the job of your local Air Force Recruiter. Or write to **Officer Career Information, Dept. SC110, Box 7608, Washington 4, D.C., if you want further information about the navigator training or Officer Training School programs.**

There's a place for professional achievement in the
U.S. Air Force

Wedding To Be Held

On December seventh, eighth, and ninth the new University Theatre will present Thornton Wilder's rowdy farce-comedy *The Matchmaker*. The cast for this production has recently been announced by Mr. Edward J. Feidner, who will direct the production.

The cast is made [illegible] Lawson, Errol Selsby, Stan [illegible] well, Sue Houston, Ernest [illegible] nolds, Brenda Gardner, Jan [illegible] lier, Liz Soule, Bob Cal[illegible] Andrea Layman, Ellen Spe[illegible] Fred LaBelle, Stephen Lent[illegible] Sheila Rosen, Lane Stalbird[illegible] Harold Frost.

The Matchmaker is, per[illegible] the funniest play to come [illegible] the pen of Mr. Wilder, who [illegible] of the very few men to have [illegible] won Pulitzer Prizes in two [illegible] ferent fields. He first received [illegible] this coveted award for the [illegible] *The Bridge of San Luis Rey* [illegible] since won the award twice [illegible] dramatic works. *The Matchmaker* [illegible] is the uproarious fable of a [illegible] Yonkers merchant who goes [illegible] New York to seek a wife and [illegible] comes involved in a comedy [illegible] However, as Brooks Atkinson [illegible] served in "The New York Times" [illegible] "There is no point in describing [illegible] the plot. Nothing matters but [illegible] grotesque situations that are [illegible] vented and the boldness with [illegible] Mr. Wilder exploits them. [illegible] Put together like an insane [illegible] *The Matchmaker* is fast [illegible] boisterous."

The names of the various [illegible] people who will be connected [illegible] the production will be announced [illegible] next week.

A new faculty member, [illegible] Robert Ackley, will be [illegible] director of *The Matchmaker*.

VSEA To Conv[illegible] At UVM Nov[illegible]

The annual convention [illegible] Vermont Student Ass[illegible] be held at UVM on Satur[illegible] ember 11. The dominant [illegible] the program is "Rea[illegible] Horizons." Dr. Thom[illegible] Dean of the College of [illegible] and Nursing, will deliver [illegible] address to the delega[illegible] gram focusing on voc[illegible] teacher education has [illegible] ded.

Registration for the [illegible] will be from 9:30 A.M. [illegible] A.M. on November 11 [illegible] rial Lounge, Waterman. [illegible] tions for the noon lunc[illegible] Faculty Dining Room [illegible] made immediately, with [illegible] Smith, '63, SNEA Tre[illegible]

All SNEA members [illegible] dents interested in [illegible] are urged to attend the

Operation B-B

Library Day will be Wednesday, November 15, 1961.

Bailey will be closed November 15.

Both sections will be open for study, with Reserved and Reference collections available until Bailey opens.

Bailey Library will open for business on Monday, November 27.

OPERATION B-B

("Books to Bailey" -- or "Billings to Bailey")

Students will move the books -- wonderful!! The nerve center will be the Cage. Students will be called to the Cage in the following order:

	BOYS	GIRLS
8:00 - 12 noon	Chittenden Hall Students	Coolidge and Home Mgt.
	Buckham	Hamilton
	Delta Psi	Simpson
	Sigma Phi	Sanders
	Sigma Alpha Epsilon	
	Theta Chi	
	Phi Nu Delta	
	ATO	
	Sigma Phi Epsilon	
	Kappa Sigma	
1:00 - 5 p.m.	Wills Hall	Mason
	Converse	Patterson
	Acacia	Redston, Robin and Slade
	Alpha Epsilon Pi	Grassmount
	Alpha Gamma Rho	Allen House
	Tau Epsilon Phi	Claggett
7:00 - 11 p.m.	Independents	Independents
	Lambda Iota	Alpha Delta Pi
	Phi Delta Theta	Pi Beta Phi
	Phi Sigma Delta	Alpha Chi Omega
	Sigma Nu	Gamma Phi Beta
		Delta Delta Delta
		A E Phi
		Kappa Alpha Theta

Boys and girls will be dispatched to various locations in Billings, Waterman, and the Wilbur Library in Fleming Museum, as well as for work in the new Bailey Library. Books will be removed from the shelves, placed in boxes, carried to trucks, hauled to Bailey, unboxed and shelved in their correct locations. Each set of books is now marked with one label located on the shelf. At the time the books are removed the label will be removed and placed on the box containing the books. On arrival at Bailey this label will indicate the shelf on which the books belong. Various collections of books will be delivered to the specific entrances at Bailey.

UVM Debaters Among Best In Nation

University of Vermont debaters, annually among the best in the country, are off at a fast pace to defend past earned laurels.

Embarking upon the 51st year of debating at UVM that has seen a national champion produced in 1950 and a pair of third place finishes in 1949 and 1954, this year's varsity team is currently engaged in the annual round robin tournament that runs for five weeks with teams from UVM, Norwich, Middlebury, St. Michael's, and Dartmouth participating, each being host for one of the five matches. Thus far, Vermont has won nine of 12 debates with eight remaining.

Heading this year's varsity of the Lawrence Debate Club are six veteran Vermonters, led by Marilyn Van Graber, president of the club named in honor of Edwin W. Lawrence of Rutland who has given more than $75,000 to foster a debating program at the University.

Miss Van Graber and Charles Tierney (a June graduate), both of Burlington, earned ninth place in the nationals last year.

Other Vermonters on the varsity are Bill Germain of Winooski, Betsey Lisman, Elaine Zak, and Bill Likosky, all of Burlington, and Mike Cronin of Richmond. Rounding out the team are Gil Tavarone of Weston, Mass., Toni Appel of Elmont, N.Y., and Pete DeRose of North Hampton, Mass.

The team is entered in numerous tournaments during the first semester including its own invitational on Nov. 17-18 which is one of the largest in the United States, annually attracting from 40 to 50 colleges. Among those so fare entered this year are Army, Navy Harvard, Dartmouth, and College Militair Royal of Canada.

The tournament schedule:

Nov. 3-4 Rosemont College Philadelphia); Hamilton College Novice.

Nov. 10-11 St. Joseph's (Philadelphia).

Nov. 17-18 UVM tournament.

Dec. 1-2 University of Pittsburgh Cross Examination; Tufts College or New York University Hall of Fame Debate.

Dec. 8-9 Rensselaer Polytechnic Institute; St. Anselm's (N.H.) Novice.

Last year, UVM debaters talked their way to first place decisions in 163 our of 259 debates.

Robert Huber, chairman of the department of speech, and John Travis and Norman London, also of the speech department, are co-directors of the debate program.

This year's question is: Resolved: That Labor Organizations Should be Under the Jurisdiction of Anti-Trust Legislation.

Bode To Direct University Players Ibsen's "Ghosts"

Heidi Mocek and Phil Tarro as they are seen practicing for "Ghosts." (Photo by A. Ivers)

— I Guess Everyone —

Ibsen's Henrik Ibsen produced what was to become one of the most controversial plays, *Ghosts*. Ibsen has exposed himself as an initiator of social criticism, who is seldom reluctant to express what he sees as hypocritical or immoral in society. He is not cynical like Shaw, but regards humanity objectively. Ibsen realizes the faults of society, yet he but proceeds further to indicate that there is hope in life. He ends *Ghosts* with a line spoken by Oswald, "The sun - The sun," a man stricken with syphilis, but there is still the sun, which for Ibsen represents hope.

When the play was first produced it was widely denounced like the works of D.H. Lawrence and Tennessee Williams, as being immoral, lewd, sensuous, and unfit for public presentation.

> Clement Scott, an eminent London critic of the period, compared *Ghosts* to 'an open drain, a loathsome sore unbandaged, a dirth act done publicly, a lazar house with all its doors and windows open.'

If Ibsen so offended the Victorian morality, and his play represented such a radical deviation from the standard production, one might ask why has the University Theatre elected to produce it? The directors firmly believe that Ibsen represents a vital and refreshing force in the development of modern tragedy, and that he offers material that the average theater-going public has not experienced. *Ghosts* should prove to be not only an entertaining and intellectual experience, but also a play which should serve to broaden our knowledge of the drama as a representation of life.

The play is now in a near completion stage, and is under the direction of Mr. Ralf Bode. Mr. Bode has also directed *Janus* for the University Players. He directed *Gummer Gurten's Needle* for the Shakespeare Festival and participated in the 1961 Festival held during the summer at the University, and further he is the president of the local chapter of the National Collegiate Players.

The cast, in order of appearance, is as follows:

Regine - Heidi Mocek
Engstrand - Phillip Tarro
Manders - David Storti
Mrs. Alving -Nancy Streit
Osvald - Barry Beckerman

Ghosts will be the first play to be presented in full-arena. Mr. Bode believes that full-arena will add more dimension and reality which he feels is lacking in a procenium production

The play will be presented November 10 and 11 in the Arena Theater in Fleming Museum at 8:30 P.M. Tickets are $1.00 each.

On Campus with Max Shulman

(Author of "I Was a Teenage Dwarf", "The Many Loves of Dobie Gillis", etc.)

HUSBANDS, ANYONE?

It has been alleged that coeds go to college for the sole purpose of finding husbands. This is, of course, an infamous canard, and I give fair warning that, small and spongy as I am, anybody who says such a dastardly thing when I am around had better be prepared for a sound thrashing!

Girls go to college for precisely the same reasons as men do: to broaden their horizons, to lengthen their vistas, to drink at the fount of wisdom. But, if, by pure chance, while a girl is engaged in these meritorious pursuits, a likely looking husband should pop into view, why, what's wrong with that? Eh? What's wrong with that?

The question now arises, what should a girl look for in a husband. A great deal has been written on this subject. Some say character is most important, some say background, some say appearance, some say education. All are wrong.

The most important thing — bar none — in a husband is health. Though he be handsome as Apollo and rich as Midas, what good is he if he just lays around all day accumulating bedsores?

The very first thing to do upon meeting a man is to make sure he is sound of wind and limb. Before he has a chance to sweet-talk you, slap a thermometer in his mouth, roll back his eyelids, yank out his tongue, rap his patella, palpate his thorax, ask him to straighten out a horseshoe with his teeth. If he fails these simple tests, phone for an ambulance and go on to the next prospect.

If, however, he turns out to be physically fit, proceed to the second most important requirement in a husband. I refer to a sense of humor.

A man who can't take a joke is a man to be avoided. There are several simple tests to find out whether your prospect can take a joke or not. You can, for example, slash his tires. Or burn his "Mad" comics. Or steal his switchblade. Or turn loose his pet raccoon. Or shave his head.

After each of these good-natured pranks, laugh gaily and shout "April Fool!" If he replies, "But this is February nineteenth," or something equally churlish, erase him off your list and give thanks you found out in time.

But if he laughs silverly and calls you "Little Minx!" put him to the next test. Find out whether he is kindly.

What should a girl look for in a husband?

The quickest way to ascertain his kindliness is, of course, to look at the cigarette he smokes. Is it mild? Is it clement? Is it humane? Does it minister tenderly to the psyche? Does it cuddle the synapses? Is it a good companion? Is it genial? Is it bright and friendly and filtered and full of dulcet pleasure from cockcrow till the heart of darkness?

Is it, in short, Marlboro?

If Marlboro it be, then clasp the man to your bosom with hoops of steel, for you may be sure that he is kindly as a summer breeze, kindly as a mother's kiss, kindly to his very marrow.

And now, having found a man who is kindly and healthy and blessed with a sense of humor, the only thing that remains is to make sure he will always earn a handsome living. That, fortunately, is easy. Just enroll him in engineering.

• • •

Joining Marlboro in bringing you this column throughout the school year is another fine product from the same makers—the king-size, unfiltered Philip Morris Commander. Here is pure, clean smoking pleasure. Try a pack. You'll be welcome aboard!

The Vermont Cynic

The Official Student Newspaper of the University of Vermont.

VOL. 79 NOVEMBER 9, 1961 NO. 17

Editorial:

Aid To U-Conn

Reprinted from the Connecticut Daily

This is both a note of sympathy and congratulation. We at Vermont sympathize with the students and faculty of Connecticut, for having to deal with an administration as narrow and shortsighted as yours appears to be. From what we gather from the *Daily Campus*, the administration has taken two positions which are incompatible with higher education. These are indirect censorship of the newspaper and undue paternalism towards the student body.

Both actions are reprehensible in themselves, but both have a greater significance as well. They indicate a desire of the administration to regulate the thoughts of the students, and quite conceivably, the words of the faculty as well. Trustees, non-academic deans, and the like have no business in this field. They are presumably experts at administrating, not thinking. While the two are not wholly incompatible, this does not give them the ability or the right to interfere with learning.

We at Vermont also congratulate the students at Connecticut for the fight they have waged thus far. Vermont students waged a similar battle last year, and we know the time and difficulty involved. In our case, however; the administration was honest and reasonable. We reached a compromise that was satisfactory to both sides.

There is some advice we would give to you. There were three items that appeared effective in our fight against paternalism. One was demonstration. The administration must be told loudly and often how many students oppose them.

The second was faculty support. The Vermont faculty helped with planning, spoke at rallies and wrote letters to the paper. They formed a pressure group themselves.

The third force in our favor was economic. Many students here had pledged contributions to a fund for a new gymnasium. Over seven hundred of them signed a petition promising to withdraw their pledges unless the ruling in question were rescinded.

These ideas were effective in Vermont; they should be useful in Connecticut as well. We wish you skill and luck in your fight for student rights and editorial freedom. If the students of Vermont or the *Vermont Cynic* can be of any use of your cause, do not hesitate to call on us.

Daylight Study Time

Billings Library used to be open to 11 PM. This year it is open until 10 PM. This ain't good. Makes for ignorence

EDITOR'S NOTE: Regarding the letter by Mr. Emery, elsewhere on this page. Mr. Emery is incorrect, Alpha Epsilon Pi has never been represented in Gold Key. One 1959 member of Gold Key joined the fraternity after his election to the "honorary".

LITTLE MAN ON CAMPUS

Letters To The Editor

Gold Key

To the Editor:

Last week's editorial concerning Gold Key was a completely negative approach to a problem which has been under consideration for some time. Granted that the editor's statistics are about as accurate as his limited perspective and unlimited hindsight will allow. To my knowledge, however, the annual membership election is run with as much order and fairness as the present procedure will allow. Perhaps the procedure may be altered. If this is the case, why didn't the editor offer a few of his own ideas concerning the election procedure? But did the editorial offer anything constructive? No, it did not. Instead of completely analyzing the problem, the editor merely gave a slanted and personal version which offered only a scathing attack and a few threats as to the omnipotence of the official Student Newspaper of the University of Vermont.

Sincerely,
Harry Dickerson
President of Gold Key

More Gold Key

To the Editor:

As a past member of the Gold Key Honor Society, I vehemently protest your editorial of last week, in which you criticized Gold Key membership selection. You based your statements not on experience, but rather upon a compilation of raw data (which, incidentially, is not wholly accurate)*:

The membership statistics speak for themselves. Below is a breakdown of the fraternal affiliation of Gold Key members for this year and the three years preceding it.

Phi Sigma Delta	16 members
Sigma Phi	14 members
Delta Psi	9 members
Sigma Alpha Epsilon	7 members
Independents	5 members
Acacia	2 members
Sigma Nu	1 member

Apparently, upon viewing it (as an amateur statistican) your reason became clouded and you produced this noxious editorial. Your interpretation of the data was (as is the case with many amateur statisticans) wholly inaccurate and misleading.

You stated that ". . . no one is considered for membership unless he belongs to one of a few, select fraternities or is an independent." On the contrary, fraternity membership is considered only in the light of its being an extracurricular activity, and thus, every fraternityman has equal qualification in this respect.

Let us now retrogress and examine the method and criteria for membership selection. The method: candidates are named by academic and administrative deans, by the faculty, by fraternity presidents, and by student organization heads. The membership convenes and selects, from among the candidates, those who best fulfill the criteria of scholarship, leadership, character, and loyalty. Accurate scholarship records are obtained for the consideration of this criterion. Leadership is evaluated according to a student's demonstrated ability to fulfill responsible positions of leadership in extracurricular activities. Character and loyalty are generally felt to be inherent in a successful scholar and leader, but are considered in a subjective evaluation of the nominee.

Thus, we see that factors other than the laws of probability are involved in the selection of membership to the Gold Key Honor Society, and likewise with the other honoraries. Just as there is a variance in the scholarship standings among fraternities, so also is there a variance in the degree of extracurricular participation by individual member. The coincidence of these qualities occurs rarely in the individual, and less rarely in an even distribution among sixteen fraternities.

Yes, I also shall be watching that meeting on Founder's Day, May 1st. . . I also shall be watching to see who are the new members of the Gold Key Honor Society. I feel confident that they will be chosen, as in the past, not to represent individual fraternities, but rather to represent the qualities of scholarship, leadership, character, and loyalty.

Sincerely,
JerryM. Emery, Pres.
Boulder Society

*Alpha Epsilon Pi was represented in 1959-

Most Gold Key

To the Editor:

Your action against the Gold Key Society can be taken in only one way. It is an act of aggression, an act of treason, against your own University, your own fraternity, and even your own Gold Key Society. This in itself is enough to bar your membership in the Ain't Things Swell Chapter of the Status Quo Honorary Fraternity.

In barring you from membership, we feel it usefull to enumerate to you the names of several persons whose company you have been denied by your actions. First, we have General Dwight D. Eisenhower, who believes in the rightness of the American image as it stands. Then we have the personage of General Walton D. Walker and Mr. W.W. Welch and that heromartyr, John Birch, who firmly believe that Communism, not being the status quo, is wrong.

Mr. Older, things are swell. That is, things were swell until you came along and threw a monkey wrench into the works. Are we to believe that the members of Gold Key are selected on bases other than those mentioned in their constitution? Are we to believe that politics has reared its ugly head? Or that, if it has, that this is not good? It is good if it exists. Otherwise it would not be natural, and therefore can not exist. What is, is good. This is self evident. Therefore to critize the Status Quo, that which exists, is to yearn for what is not. This, being the opposite of what is, must be evil. Therefore you are evil. And evil cannot be tolerated. Therefore you must be eliminated. Your execution will be at midnight of the 23 of November in the meeting room of the Status Quo clubhous. You are hereby warned to attend. No excuses will be accepted, unless presented at least a week in advance.

Mr. Older, you have committed the unpardonable crime.

How many Presidents are going valiently for membership, [illegible] Gold Key Society will be [illegible] your paths of wrongfulness will be seen at rushing. [illegible] confused: Should they [illegible] "favored four" to insure [illegible] they ignore those houses and [illegible] others, reasoning that [illegible] will force a change in discriminatory Key practices? There is [illegible] confusion. You have removed the Status Quo, the sublime [illegible] happiness. You have destroyed the life ambition of 2000 freshmen. You have rotted the social righteousness. May you rot in hell. May you die in agony. May you be stripped of your Gold Key sweater and thrown out into the darkness beyond.

Our cry, "Yo-ho for the Status Quo!" will, must, resound victorious. Death to the traitors!

(A fearsome skull symbolizing our dead power)

WSGA

PROPOSED ADMENDMENTS TO THE WOMEN'S STUDENT GOVERNMENT CONSTITUTION

Article V - Association Meetings (p. 12). Omit sections 1 and 2 changing the others as follows:

Section 1. Meetings may be held at the discretion of the Council or may be called at the request of ten members of the Association.

Section 2. (Section 4 as is stated)

Section 3. One tenth of the membership shall constitute a quorum at a regular meeting of the Association.

Article VII - Amendments

Section 1. The Constitution may be amended by a two-thirds vote of the members of the Association who vote.

Section 2. Proposed amendments must be posted and discussed at House Meetings atleastone week before they are voted on by ballot the specified time and place to be decided on, and advertised in Council at least twenty-four hours in advance.

This is a proposal that there be no more compulsory Mass Meetings. It has finally come to a showdown. Are the girls really for or against them?

Sincerely,
Ruth Nunamaker

Cynic

To the Editor:

One of the first things that I noticed upon returning to the U campus this year was a change in the Cynic. Perhaps the biggest change has been that the paper now seems more erudite and far m

STUDENTES

A transfer student from [illegible], Conn., [illegible], as a psychology major, member of [illegible] fraternity, and [illegible] the I.B.C.

[illegible] a time, there lived [illegible], a community of [illegible]. They were neighborly and all got along quite well together. As bears do, they ate things that grew wild [illegible] berries, wild fruits, [illegible]. Things went quite well for a while. Then some of the bears got more and more suspicious [illegible] to complain. "What we must do," asked, "is to prevent other bears from eating [illegible] their share of the [illegible]."

"That's right," agreed several of the others. So, all the bears got together, and formed an organization, the Inter-bear Council, to regulate any problems a group of bears would normally encounter, and to promote the cause of bearism. One of the first problems they decided to act on was the food problem.

BEARS AND BERRIES

"In order to insure that there is an adequate food supply," came the council directive, "it is now against the rule for any bear to pick berries before they are ripe." "Good idea," said the other bears. "That way, we can be sure that no one will and hoard them [illegible] are ripe." Sometimes, however, there were years when the berry crop was less than had been expected. The bears began to get hungry. Someone must be taking them. The Inter-bear Council met again. It decided that from that time on, if any bear was caught eating the berries in advance, they would be punished by not being allowed to take their share when harvest time arrived. Then strange things began to happen. Each bear was afraid that he would not be able to gather enough berries at harvest time to sustain him over the long, cold winter. So, one at a time, in the darkness of the night, the bears stealthily (or as stealthily as a bear can) stole into the berry patch. Each very night, one of the bears stole a few berries to save, so he didn't get his share of the harvest.

The rest of the story can he quickly told. Each of the bears knew that each of the other bears was doing a little night raiding, but each was afraid to report it to the I.B.C., for fear that the bear they reported would, in turn, report them. So things moved to their inevitable climax. The bears were able to steal, during their night-missions to the berry patch, only a very few berries, for after all, unless one is highly skilled, one cannot act too effectively when one is being secretive. But the most tragic part of the whole story is that while the bears were stumbling through the berry patch in the darkness of the night, stealing a berry here, a berry there, they were stepping on all the other plants, killing all but a few of the berries that were left. When harvest time came around, there were very few berries left, and those were either the particularly resistant ones, or the remains of the mutilated, feeble ones. It was indeed, a long, hard, cold winter. Perhaps, if the bears were smart enough to leave the berries alone, there would have been a good crop.

A PERSONAL OPINION

There should be, by this time, no doubt as to what the above fable refers. Several weaknesses in the I.F.C.'s "No-Contact" policy are obvious to me. These weaknesses can be classified into three categories; those which are detrimental to the fraternity system as a whole, those which are detrimental to the fraternities individually, and those which are detrimental to the individual freshmen.

The no-contact policy is unenforcable. It necessitates having the I.F.C. air its dirty laundry before the whole campus, an actual admission that it cannot control the conduct of its own members. In addition to this, the maintainance of the no contact policy necessitates

(continued on page eleven)

Dr. Lohman Writes On Canadian Economy

The financial growth of the United States neighbor to the North, Canada, is the subject of an article by a UVM professor appearing in "World Affairs," a quarterly.

Dr. Philipp H. Lohman, chairman of the department of commerce and economics, has written an article titled, "In the Shadow of a Giant."

"Americans," says Dr. Lohman, "tend to forget that to the north of them there lies a huge, sprawling country which is fiercely struggling to assume the place among the world's major nations for which geography and resources have destined it. Growing up in the shadow of a giant is not easy."

He says that problems arise when there is a co-existence of a $36-billion and a $500-billion economy, but that Canada's economy is growing by leaps and bounds. Population has increased by nearly 50 per cent since World War II; Gross National Product has increased 197 per cent. Prior to World War I, agriculture was the prime industry of Canada. Today less than 5 per cent of national income is derived from farm production.

Dr. Lohman points out that on a per capita basis, Canada is the world's biggest trading country. Also, over the past 15 years, 90 per cent of all new capital investment has been provided by Canadians themselves. Much of the 10 per cent of foreign investment has been "risk capital" as many Canadians do not like to venture into untested ventures.

Dr. Lohman points out the various tax structures of Canada, some of which are extremely advantageous to American investors.

Some Canadians are saying that in 20 years they will have a per capita gross product in excess of that of the United States but, Prof. Lohman feels that 1980 would be a littleearly for such achievements.

"Canadian natural resources are unbelievably extensive, crude oil and natural gas in particular, much still untapped. Whatever economic development does take place, it will require new policies and greater understanding on both sides of the border," Dr. Lohman concludes.

There are irritating types on every college faculty, but none to compare with what might be called "the misplaced English teacher." It's not that one blames him for being the way that he is. Probably he can't help it. Nevertheless, something must be done about him sooner or later.

Typically, the misplaced English teacher is a member of some department requiring essays or term papers of its students. It makes no difference, however, in which of these departments he teaches; for he is so concerned with the formal shortcomings of the papers that are written for him that he seems hardly to notice their content. He simply teaches English, whatever the name of the course.

The misplaced English teacher has a single recipe for grading papers. He begins by filling all the margins with proofreader's marks. Next, he rewrites the even-numbered sentences in red. Finally, he sprinkles the odd-numbered sentences generously with additional punctuation marks, being careful all the while to say nothing about the content of the paper. If you try to make him comment on the content of a paper, of course, he becomes very evasive and attempts to turn the discussion back toward grammar as quickly as possible, but, if he is unsuccessful at that, he may settle for a chance to talk about spelling or the meanings of words.

Hard as it may be to understand this infuriating specimen, it is a greater mystery how so few students manage to encounter him at all. Stranger still, almost no one meets his fellow after, say, his second year at college. Even if one takes a course with some known members of the species then, he is likely to find that instructor completely reformed and altogether capable now of discussing any paper with him in terms of its content alone.

Now, my investigation of these matters is not yet completed, and I may discover something more exciting to report when the last batch of questionnaires I sent to Eritrea is returned; but the information available to me at present strongly supports two, simple hypotheses. The first is that, if a student never encounters the misplaced English teacher, it is because he has learned to write sound, English sentences before coming to college. The second is that few students encounter the misplaced English teacher after their first year or two at college because, by then, most students have learned to write sound, English sentences.

"Too simple," you say; but consider these hypotheses in the light of some additional information. Content is not something that a paper must have, despite its form. Rather, it something that some papers manage to have because of their form. Unless a paper has content, however, there is nothing to discuss about it save grammar, spelling, and the meanings of words. Thus, a paper may be unsatisfactory in point of content without containing a single false statement; and this is precisely the case whenever a paper contains no statements at all, only strings of words and perhaps some amphibolous sententences.

The Delphic Oracle would surely have had trouble with the misplaced English teacher. What passes for content in such a paper, I believe, would be better described as "what one wishes he had said."

It is possible, of course, to say one and the same thing either badly or well. If a paper has content, it may still be possible to criticize it on formal grounds. A paper without content, however, can be criticized only in terms of its form.

None of this makes the misplaced English teacher any less irritating, of course, nor has any suggestion been offered so far for removing him from our campuses. If you're currently having trouble with this character, then I think you're simply stuck with him for a while. As a first step toward improving the situation for those who will follow you, however, you might warn your high school about this unpleasant type. Someone there may be able to do something to force him to stick to his proper line of work.

The Circular File

Mike Grossman
Jack Snider

We feel like children waiting huddled at the edge of an endless deep abyss. At one end of the narrow plateau on which we wait, is a massive, insurmountable wall; at the other end, the earth is falling away, from the cliff's edge, little by little. We stand there, helplessly watching as the edge draws nearer and we look for something to cling to. But in the back of our minds, we know only too well that there is nothing to cling to, no help at all.

Melodramatic? Probably, but I think the occasion warrants it. Daily the situation becomes more critical in divided Berlin. Daily every air we breth is becoming polluted by an invisable poison. Although the scientists understand radiation and fallout, yet all of us have to suffer its horrors. I asked my crystal ball, "What does the future hold for us?" It answered, "Will there be a future?" We are up against a dictatorship which does not value human life as we do. To the Russians, human life is expendable to serve their purpose. Our purpose is to preserve human life. Our government serves the people; their people serve the government. They will enslave if it suits their purpose; our purpose is freedom from slavery.

The Berlin Wick waits to be lit. We see the match, we feel it, yet we still believe it will go out. Is there still time brother?

They say the Russians aren't fools, they won't start a war, certainly they want to live as much as we do. But the match is too near the wick; an accident will happen, like the one three years ago in Georgia. Accidentally, an atomic bomb fell from a plane landing in an urban area. Miraculously, the bomb did not explode. Yet you are sure there will be no such accident. Or how about the nervous man in Berlin who fires accidentally, thus triggering off a World War? Can you afford to be certain there will be no accident?

Some people will argue that we must "increase our armament, not [illegible] nuclear testing." Yet increased armament will only mean increased destruction. Nuclear arms are the problem, not the solution.

Stop for a minute. Turn away from the security of college life, from the senseless motions of the twist, from the endless drone of meaningless chatter. Stop, if only for a second; if only to consider the really important things in life; if only to glance at a clock and to realize that we are on the edge of a cliff, that we are [illegible] nearer

Gibbs School Offers Two Scholarships

Two national scholarships for college senior girls are offered for 1962-63 by the Katharine Gibbs School. These awards were established in 1935 as a memorial to Mrs. Katharine M. Gibbs, founder and first president of the School.

Each scholarship consists of full tuition ($935) for the secretarial training course, plus an additional cash award of $500, totaling $1,435. The winners may select any one of the four Gibbs schools for their training -- Boston, New York, Montclair, or Providence.

Winners are chosen by the Scholarship Committee on the basis of college academic record, personal and character qualifications, financial need, and potentialities for success in business.

Each college or university may recommend two candidates, and each candidate must have this official endorsement. Students who may be interested in competing for one of these Katharine Gibbs awards may obtain full information from the college placement bureau.

UVM Calendar

November 9 through November 18, 1961

THURSDAY NOVEMBER 9
MERP Week
University Orchestra Concert, cello soloist - Ira Allen Chapel - 8:30 PM - free

FRIDAY, NOVEMBER 10
MERP Week
Varsity Cross Country - Bowdoin - here - 2:30 PM
University Theater production: *Ghosts* - Arena Theater 8:30 PM ($1)
Kiddush - Hillel House - 7:30 PM
Friday Evening Service - Synagogue Center - 8:30 PM

SATURDAY, NOVEMBER 11
Saturday Service - Synagogue Center - 8:30 AM
Varsity Football - Middlebury - Middlebury
University Theater production: *Ghosts* - Arena Theater 8:30 PM ($1)

SUNDAY, NOVEMBER 12
Mass - Ira Allen Chapel - 9 AM & 4:30 PM
Protestant Worship Service - Ira Allen Chapel - 10:30 AM
Sunday Brunch - Hillel House - speakers: Dr. Morrow - 11 AM
Film - Hillel House - 7:30 PM
The Barn - 43 S. Prospect St. 8 PM

MONDAY, NOVEMBER 13
Cross Country - New Englands - away
Lane Series: Pittsburgh Symphony Orchestra - Memorial Auditorium - 8:30 PM

TUESDAY, NOVEMBER 14
Women's Student Government Association - Joint Conference Chapel - 7 PM

WEDNESDAY, NOVEMBER 15
Lane Series: Berlin Philharmonic - Memorial Auditorium 8:30 PM
Holy Communion (Episcopal) - Little Chapel - 7 AM - breakfast following.

The CYNIC Presents---
A Portrait Of The American Student ...

Reprinted from [illegible]

by Thomas Hayden

In the past year, almost recent articles have appeared in national liberal journals calling the new generation enthusiastic, bright, and liberal. Almost as many articles have sprung up in the conservative press calling us thrillingly conservative. If this is not evidence enough to demonstrate that men too often confuse what they see with what they wish to see, it is only necessary to note the doings of the House Un-American Activities Committee which believes that communists are responsible for much of the current youthful unrest and turmoil. (By espousing this "devil theory," H.U.A.C. makes the absurd claim that there is nothing in the American scene that might inspire the young to revolt.)

It is no accident that the H.U.A.C.-sponsored film, "Operation Abolition," has been of continuing interest to the American public. The film, which depicts youth as the pawns of an international Communist conspiracy, is significant not only because it has fired off heated debates in both the student and adult communities, and because it has distorted the threat of Communism and sent many adults off on frightened, reckless campaigns against the Red menace, but also because the film and the response to it illustrate the severe psychological effect that the long, long cold war has had on the American consciousness. Americans are not used to living in a world so full of enemies. Some, in their fear, are beginning to equate any radical action with Communism. No wonder that the rise of a militant younger generation is so disturbing to its elders.

Let us be clear, first of all, on this: The majority of American students are not active or even deeply interested in politics. Their concerns are more private than civic and, often, their revolts are nonpolitical -- riots at Fort Lauderdale, panty raids, mass partying. Unlike students nearly everywhere else in the world, they are products of an educational system that is disengaged from social and political action.

What is significant now is the rise of a strong political minority -- one that has restored action and political dialogue to the college campus. Action began first with the liberals. But lately a much publicized and overrated response has come from the conservative students.

Adults who point happily to "unmistakable signs" of a conservative revolution in the colleges -- the earmarks of a big switch to the Right -- seem to have forgotten that there have always been conservative students on the college campus. (In the decades that followed Roosevelt and his New Deal, they simply went underground. They were quiescent. "Conservative" was a pejorative label then and no one wanted to be stuck with it.)

What *can* be said, however, with some accuracy, is that during the past year, conservative students have come to life. The new conservatives are not disinterested kids who maintain the status quo by political immobility, nor are they politically concerned but completely inactive sideliners. They form a bloc. They are unashamed, bold, and articulately enamored of certain doctrines: the sovereignty of individual self-interest; extremely limited government; a free-market economy; victory over, rather than coexistence with, the Communists, and so forth. These ideas are not new; most of them hark back to the era before Roosevelt. What is new about the new conservatives is their militant mood, their appearance on picket lines.

Conservatives fear a concentration of power in the hands of politicians (even when they are our elected representatives), but they willingly cede it to vast organizations. Thoughts about our business oligarchy do not trouble them -- possibly because they hope to become part of it. (What will happen, I wonder, when conservatives who have been politically trained inherit the corporations? Conservatism may expand its influence considerably.)

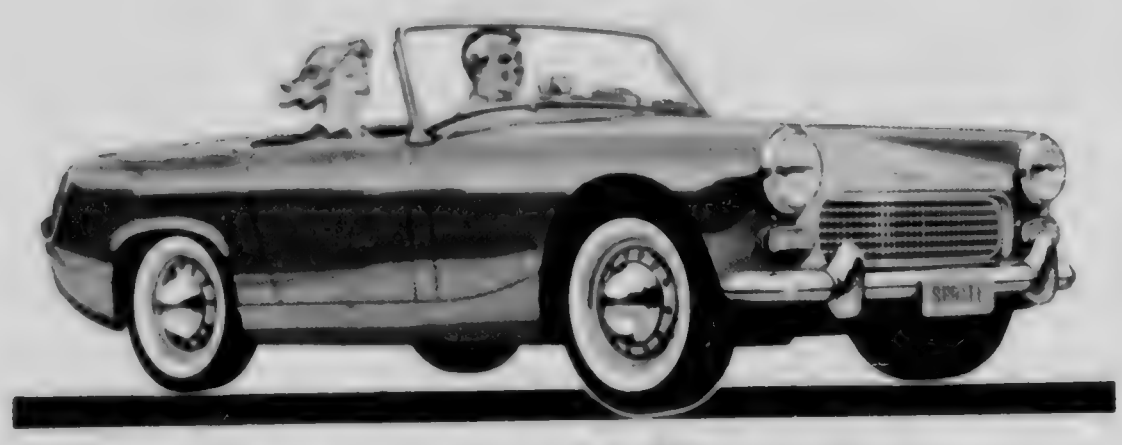
The first spark of a new conservative movement appeared at the Republican convention in 1952; a group of young adults were as unable to reconcile themselves to the defeat of their candidate, Robert A. Taft, as were certain young diehards ("Stevenson for Secretary of State") who saw their Presidential candidate voted down at the Democratic convention last summer. (Some members of the Taft group, now graduate students or young college teachers, are still influential on campus.)

There was a second spark in 1953, when a handful of students formed the Intercollegiate Society of Individualists, hoping to educate other students about the virtues of conservative philosophy. (The I.S.I. started with a mailing list of four hundred students. Now it boasts a list of thirteen thousand students and professors who have expressed interest in receiving *The Individualist*, a monthly newsletter.

Proof that there were actually a number of potentially conservative students ready to act did not turn up until two years ago when, to counter liberal students' protests against the loyalty oath required of students applying for funds made available by the National Defense Education Act, a pro-loyalty-oath petition was circulated in the East. Hundreds of signatures were gathered.

Shortly afterward, conservative students engaged in a more serious attempt to make their desires known: they organized the Youth for Goldwater movement, which upset so many of the Old Guard at the 1960 G.O.P. convention.

It is obvious however that [illegible] servatives are not [illegible] concerned about the [illegible] self-determination when it is applied to other people [illegible] selves. Talking about the Peace Corps, for example, [illegible] says: "There are two questions. First, what face do we put on as to get into these other countries? Clearly, humanitarian. Second, what is our real [illegible] the promotion of our national interest against that of the Sino-Soviet bloc." The approving manner in which Schuchmann presents the promotion of purely "national interest must, one feels, [illegible] many students who think the Peace Corps should not attempt to show the United States abroad.



But if ability to make news is a strength of the young conservative movement, it is also a weakness. The young conservative, one observer said, should stop trying to create an illusion, and instead, concentrate on giving their movement content. American conservatives, as *National Review* editor Buckley has pointed out, have yet to come up with a conservative program that "speaks to our time." At present the movement deserves the label "The New American Old," and wonders whether conservatism will continue to hold the interest of the young if it sticks to present guns. These make a small noise. But when the air clears and one reflects on what one has heard it sounds to me more and more like: Me first, America second, and let the rest of the world go.

Conservative students today are alienated from the mainstream of political and intellectual America, alienated in a way that only liberals have felt inthe past. The conservatives are weary of all that is liberal in our Establishment.

The extensive activity of liberal radical students--an even more incorrect cause of conservative irritation and action--also springs from a fear that all is not well for the West. "Liberal" is a convenient label for students left of center. Many wear it uneasily because they are conscious of the failure of older liberals--their debilitating factional disputes, for instance--and are determined not to repeat their mistakes. Like the more militant of conservative students, the liberals, too, tend to be dissatisfied with the leadership of their elders--"adults don't do anything," is a frequent cry. (One few members of the nonstudent left--C. Wright Mills, Michael Harrington, Norman Thomas--are leaders of the nonviolence movement seem to have won their respect. Students expelled from Southern colleges and jailed students are quoted regularly in liberal students' articles and political statements, but polished spokesmen, like Arthur Schlesinger, Jr., are totally ignored.

Collectively, the liberal change-oriented students seem to ask one question of society: a question that the young conservatives would never raise: Can we see our moral urgency and/or meet it satisfactorily within present social and institutional arrangements? These students are coming to believe that the answer might be no. And yet, reluctantly, they are not turning to radical systems or back to privatism; rather, they are doggedly, slowly, proceeding in a search for new ways, new channels, new alternatives to the present. (In case after case this year, ad hoc committees and local organizations have been formed out of moral or emotional response to a particular "cause.")

Like Free!

It's sporty, it's speedy, it's a SPRITE ...and it's yours!

All you have to do is like win!

PACK OR BOX

Grand Prix CONTEST

FOR NEW ENGLAND COLLEGE STUDENTS

REGULAR OR KING

8 PRIZES 8
NEW ENGLAND WINNERS
'62 SPRITES

Here's the story, man. Eight, count 'em, eight of these swinging Sprites will go to eight guys or gals in New England Colleges. The other 44 states strictly don't count. Get the picture, get the odds? This is one deal you've got to get in on.

First thing to do, get your hand on a Registration Envelope, which gives you the easy Contest Rules. You'll find Registration Envelopes *everywhere* -- all around campus and in your local smoke shops. Our Liggett & Myers Campus Rep has stacks of them, too -- so track him down.

Next, you take a little quiz. It's printed right on the envelope, see, it's about sports cars and you can do it in like 47 seconds. Then smoke 5 wonderful packs of Chesterfields or L&M's (or, if you're a menthol man, Oasis), tear the bottom panels off all 5 packs, tuck them in the envelope, sign your name and mail it.

Now comes the brain work. If you pass the quiz you'll receive a limerick in the mail with the last line missing. So finish it! Send in the best rhyme you can think of. If the judges (an independent, impartial lot) think your line is the cleverest, you're like behind the wheel of your Sprite already.

Enter incessantly! Because there are 8 Sprites up for grabs, dad! The 4 winners of the Fall Contest will be announced at the end of the Fall Semester. Then the whole jazz goes into high gear again -- and toward the end of the Spring Semester the other 4 Sprites go on the block. So stay with it all year -- keep smoking those wonderful Chesterfield, L&M or Oasis cigarettes -- keep trying! Win, man!

Buy 5 packs and get started. There will be 8 new '62 Sprites on the campuses of little old New England by next May, and you might as well jingle the keys to one of them in *your* jeans ... right?

GET WITH THE GRAND PRIX ... ENTER TODAY, ENTER INCESSANTLY!

. . . His Political Life

[illegible] need not belittle [illegible] have handled all of [illegible] projects to date. Certainly, [illegible] the example, the stand-[illegible] theatres in Austin [illegible] carefully planned; key [illegible] such as the national [illegible] of the theatre in question [illegible] have been pres-[illegible] coordinated demonstra-[illegible] interim action is being plan-[illegible] for the summer, and continuing [illegible] outlined for the fall.

[illegible] sophistication can also be [illegible] in the approach liberals are [illegible] to the Fourteenth National [illegible] of N.S.A. in Madison, [illegible], this month. In the plan-[illegible] stage is a liberal study group [illegible] will caucus, discuss various [illegible] issues in depth, and try to [illegible] the personal and organi-[illegible] associations necessary [illegible] action throughout the coming [illegible] year.

Furthermore, some students are [illegible] organizing their energies through [illegible] the creation of campus political [illegible] parties, which attack both local [illegible] and national issues, and sponsor [illegible] candidates for student government. [illegible] State, at Berkely (suspended in [illegible] June), helped activate parties all [illegible] along the West Coast. The Pro-[illegible] gressive Student League at Oberlin [illegible] has helped set up parties at [illegible] Macalester, Trenton State, Penn, [illegible] Notre Dame, Wayne State, and [illegible] the universities of Wisconsin, Min-[illegible] nesota, Pennsylvania, and Roches-[illegible] ter. Voice is active at Michigan, [illegible] Beloit at Chicago--virtually none of [illegible] these groups existed two years [illegible] ago.

Liberals have achieved some [illegible] impressive results so far: in the [illegible] integration struggle, in the forma-[illegible] tion of the Peace Corps, in the [illegible] attack on H.U.S.C., (Last summer, [illegible] when the film "Operation Aboli-[illegible] tion" first appeared, few Demo-[illegible] cratic candidates were willing to [illegible] jeopardize their campaigns by [illegible] speaking out in criticism of it. [illegible] Were it not for students, a mil-[illegible] lion persons might have seen the [illegible] film without recognizing its dis-[illegible] tortions.)

This last year, however, has [illegible] seen a lot of dropouts among stu-[illegible] dents who were in the liberal move-[illegible] ment just for thrills. "There will [illegible] never be another spring 1960," [illegible] is an integrationist in Atlanta. [illegible] "There is less glory now, and [illegible] more and more daily plugging." [illegible] What he says applies not only to [illegible] Southern campuses but also to [illegible] many civil rights groups that [illegible] sprang up on Northern campuses [illegible] to support the sit-ins and that are [illegible] running from picketlines to grind-[illegible] ingwork on complex, local prob-[illegible] lems. (I.P.I.C., the Emergency [illegible] Public IntegrationCommitteeform-[illegible] ed by colleges around Boston, is [illegible] bringing up questions of fair housing [illegible] for Negroes and other minority [illegible] groups in the area.)

[illegible] If the chaos of liberal action to-[illegible] day is ever going to evolve into a [illegible] solid social movement, students [illegible] must continue to supplement ex-[illegible] citement with hard work, moral [illegible] protest with political articulate-[illegible] ness, spontaneous demonstrations [illegible] with undramatic hours spent at [illegible] routine education. Through their [illegible] effort, they must work out the an-[illegible] swer to a crucial question--one [illegible] that is a key to the student move-[illegible] ment: Can an ideology without [illegible] reform succeed where only emo-[illegible] tional appeals have succeeded be-[illegible] fore? As the liberal student move-[illegible] ment enters its third year, the an-[illegible] swer seems to be that it can. [illegible] What is needed, and what is [illegible] being now, is calculated rebellion, [illegible] which frees the impulse of out-[illegible] right protest and harnesses it to [illegible] practical programs.

Running through the declarations of purpose put out by student liberal groups is a single moral theme, with several parts: men are common sufferers; freedom is not freedom while a single individual is tyrannized; the world is too small for anything but brotherhood; human life is inherently valuable. These ethical pronouncements take the place of an ideology. The ideologies of the twentieth century--for example, some forms of Marxism--have provided popularly understandable blueprints of the Perfect State, which in the past have roused men to political action.

Ideologies have in the past provided men with the assurances they needed to make all-or-nothing decisions; but disgust with the condition of the social order, not a promise of the coming of a millennium, today prompts students to get finding human affairs too complicated to be condensed in fixed, orderly systems. Ideologies in America, as Daniel Bell states in his *The End of Ideology*, have lost their luster. Ideologies once made men feel part of a cosmic or historic design, but lonely individual responsibility is the core of student protest today.

An ideological social movement has one clear advantage: it rejects the illusions and supertruths that in this century have licensed revolutionaries to use any means, often violent ones, to gain their ends. (Probably the effectiveness of nonviolent techniques, the stability of American politics, and the high value students place on human life would, in any case, prevent students from turning to more destructive methods--such as those employed by students in Korea, Turkey, and Japan last year.)

The absence of ideology, however, leaves a dangerous vacuum which too often is filled with emotionalism. "Students have a mystique about action," says Al Haber, president of the nationwide Students for a Democratic Society (student branch of the venerable and liberal League for Industrial Democracy). "They are thrilled by action per se; the passion usually associated with ideology is transferred to the actual doing of the deed."

Partly because the Student Liberal movement is disconnected and uncoordinated, many of its members have only a shallow understanding of issues. Unless the liberals set up a framework, the movement could go in either of two directions:

It could continue on in shallowness, responding sporadically when a sense of "mission" is felt.

It could end in a return to privatism on the campuses. Mere excitement surrounding political action does not guarantee a stable, long-range (indeed one hopes, lifetime) program of social action and [illegible].

Fraternities Crack Books

The nineteen social fraternities at Washington University are placing themselves under a rigorous academic program designed to promote high scholarship among members. The program was initiated and is being directed by the Interfraternity Council.

Don Fischer, faculty advisor and dean of the School of Engineering, said the important feature of the program is that the fraternities initiated it and are carrying it out on their own. "They did this without any outside urging, and are working hard to make the program effective," he said.

Penalties ranging from curtailment of the group's social activities to recommendation of its expulsion from the university may be issued by the council to fraternities holding a low grade average over several semesters.

Prominently placed bulletin boards in each fraternity house will publicize names of members receiving class or departmental honors, as well as tables listing scholastic accomplishment, or lack of it.

A fraternity may be placed on academic probation by maintaining a grade point average below the average for non-Greek men for two consecutive semesters. Penalty for this offense involves regular reports to the IFC scholarship committee, where checks are made on the group's improvement.

A pledge class can place the entire fraternity on probation by earning a grade average below "C" for two consecutive semesters. In this case the pledge class cannot compete in intramural athletics and certain social activities. If a fraternity ranks below the non-Greek average for four consecutive semesters, the number of pledges it can take the next semester is cut in half.

Ultimate penalty, which is recommendation to the university that the violating group can be denied the privilege of continuing on campus, is issued only when the fraternity's average is below the non-Greek average for five semesters. A pledge class average below "C" for five semesters can also result in a recommended expulsion.

who's charlie?

by Martha Wolf

Jon Tenzer, known to many as Charlie Catamount, is a veteran of many war and two great expectations for UVM.

Jon was elected as head "mascot" to the Pep committee. That organization includes Lee Cregg, advisor, Grace Waters, cheerleaders, members of the Student Association and other interested parties.

"Charlie" must appear at all events that the committee deems necessary. Jon, has gone beyond this, though, and will make the Catamount an active member of the campus scene.

Thus, one will now see Charlie at basketball games, track meets, dances, and at the Catamount benefits and during Greek Week activities. Of course, old cat will still appear at pep rallies and football games. John has given "Charlie" new vitality and from now on, he will take an active part in cheering his teams to victory. Appearances on radio and television are hints of what is to come.

The future successful "Charlie" can only come through the active participation of the student body. Jon commends the freshmen class as "the class with the most spirit I have seen" and hopes that they will inspire the entire university to support their team.

In private life, Jon is a pre-dental, English major. He is Vice President of the Student Association and is Rush Chairman of his fraternity, Sigma Epsilon Pi. Among his outside activities are, in this order, "girls" and piano. As for his musical interest Jon is quite an accomplished pianist. He has developed a professional act which was presented at the Vermont Variety, during Homecoming.

Jon is now a senior and will graduate in the spring. He feels that he will greatly miss Charlie Catamount for it symbolizes to him, a living embodiment of school spirit. Jon hopes to return to his Alma Mater in future years, and to see "Charlie," proud as ever, cheering UVM to victory.

NYC Opera Company - Superb

by Alice Zaret

Time for Mozart's masterpiece, "Le Nozze di Figaro," sung in English" anything but "silly" in English?

This was the question asked by many prior to the New York City Opera Company's performance of "The Marriage of Figaro" Monday evening in Memorial Auditorium. The answer after the performance was a resounding "No."

The Martinis put the themselves in their splendid translation. Beginning with Figaro's first two words "Twelve, Fourteen" instead of the "Cinque, Dieci" which we are accustomed to hearing, the language flowed forth as melodiously as the original Italian, and the possibilities for wit manifested themselves to the greatest extent.

Basically an opera buffa, "The Marriage of Figaro" nevertheless has its share of sentiment and pathos. This latter quality is portrayed most poignantly in the person of the Countess, a typical tragic heroine. Doris Young, in this role, most definitely proved herself to be a "first string" member of the opera company. Her dramatic quality and control being simply breath-taking, although her diction may have been slightly lacking.

Getting to the lighter side of the opera, the women still seemed to excell vocally. Judith Raskin, as Suzanna, displayed a great deal of stamina and dexterity in her performance. Her lovely soprano voice remained lyrical throughout, and her coyly confused "yes" and "no" in her Act Three duet with the Count captured the audience's as well as the Count's heart.

Continuing with the female roles, Nancy Williams as Cherubino, the page, did a fine job standing in for Frances Bible, although this part usually calls for a slightly more "mezz-y" mezzo-soprano. Her diverse predicaments in dressing as a woman, jumping from a window, and attempting to present flowers to the Countess in a ladylike manner, all contributed to make her "steal the show." Her two arias were sung in a most heartwarming fashion.

As for Figaro and the Count, both seemed to exhibit that superb acting talent of the New York City Opera Company's productions, despite a slight crack in the former's arias, for which he more than redeemed himself afterwards. The voices of both were legimately suited to their respective parts, and one felt genuinely convinced of their characters.

In one of the lesser roles was Marcellina, played by Sherts. Concerning her one felt compelled to hearing, "is this girl for real?" But real or not, her added to the part and make her the comical she was.

The orchestra under ship of Julius Rudel, ter Susskind's place as added able support, although was an occasional flaw. Not forget the technical aspect production, lighting and set most effective and adaptable the various moods.

The opera was a delightful experience. Its high point seems to be the second act, which serves as a finale for the first two sometimes being performed as one. There is a unique effect employed here by Mozart in that the act begins with the well known, rather melancholy aria, "Pour O love," But rises to a peak of near frenzy, with people entering upon the scene. Towards the end we ever hear examples of the "patter song," used to such a great extent by Gilbert and Sullivan later on. The cast performed these ensemble numbers with unusual liveliness, and added this victory to last year's equally fine production of "Cose Fan Tutte," (forgetting about "Carmen"). The New York City Opera Company seems to have found a definite niche in Burlington.

Betty Wexler, Gamma Phi, '61, married Dave Merriman, Sig Ep, [illegible] Oct. 28.

Jean Labelle was recently pinned to Jean Greasia, S.A.E. Sigma Chi had well on pinnings this week. Jerry Emery was pinned to Julie Bergen, Theta. John Davis was pinned to Sue Williams and Jack Post was pinned to Norma Robb. Mike Robinson, TEP, '62, will marry Janice Rosenheck from Flushing, L.I. on June 16th.

Kathy Katric, Kappa Alpha Theta, and Toni Eldridge were pinned this Homecoming.

Marvin Epstein, '61, and Ronny Nadel, TEP '59, became engaged Oct. 19, and will be married this year.

Congratulations:

Lola DeGerolamo was recently elected President of the Home Economics Club. She is a member of Kappa Alpha Theta. Steve Gould has just been pledged to Sigma Phi.

Barbara Isham, Alpha Delta Pi, was recently pledged to Alpha Lambda Delta.

The Alpha Delta Pi's wish to congratulate Liz Soule on her leading role in the "Matchmakers."

Sue Krokow was also pledged to Alpha Lambda Delta. Sue is a sister in Alpha Epsilon Phi.

The sisters of AEPhi wish to congratulate Sheila Rosen on one of the leading roles in the "Matchmakers."

Congratulations to Phil Skoolnick, Phi Sigma Delta, on his recent acceptance at NYU and Louisville Dental School.

Potpourri:

A most successful "Pie Party" was held at Gamma Phi on the 28th. Lots of money was made for the new school for Retarded Children and much fun was had by all.

Hanna Crance, has rejoined Pi Beta Phi. Welcome Back, Hanna! P. Phi was very happy to have Mrs. Adams, their Providence President, visiting them on Homecoming weekend.

High-lights of parents weekend at ADPi included the Cider Sip, after the game, followed by the Pop's Boudoir Tour while the mothers held their annual Mothers' Club meeting. Buffet dinner was served that night and Sunday breakfast completed a very successful weekend.

Mrs. Sandy Barrup Burgess, '61, was guest for dinner Monday night at ADPi.

Acacia and ADPi had a very successful Open House after the game last Saturday.

The open house at Sigma Phi during the weekend of the Norwich game proved very successful, with the "Craters" highlighting the afternoon.

Memorial services were held on October 30 for Tau Epsilon Phi's late Brother, Edward Rutner. Mr. and Mrs. Moe Rutner wish to thank everyone who sent condolence during their time of grief. Drewe Love has been accepted at the Sorbonne in Paris and will begin studies in February.

Kappa Alpha Theta recently enjoyed a visit from their district President, Mrs. Bicker.

The ADPi's were entertained Monday night when Mr. Preston of the Preston Jewelry Store spoke about gems and gemology.

A wonderful Parent's Weekend was enjoyed the weekend of October 27th, and 28th by all the Theta's and their parents.

I'd like to wish everyone a great Merp Week!!! I hope that you will all provide me with some really juicy Merp Week news.

SENIOR CLASS

Over the past six weeks, the Senior Class executive officers have been meeting to discuss Senior Week. Our main concern has been to eliminate, by some method, the fallacy in planning which has occured in previous years. We have found that the problem centers around the fact that there is no definite financial backing. We are unsure of the turnout until assessments are paid at the last minute, after all planning has been completed. In many instances activities have to be canceled because lack of finance and students made it necessary. If by the early part of second semester we could be certain of finance we could guarantee a terrific Senior Week with entertainment such as the Kingston Trio and a big name band at the Banquet.

We discussed the prospect of having each senior pay about ten dollars to the University at registration for second semester. In this manner we could be assured of what we have to work with. If we don't have the money, then we can't plan the best possible Senior Week for the Class of '62. In order for this ten dollar class dues to be collected by the University, fifty per cent of the Senior Class must vote in favor of it.

On Monday evening, Nov. 13, members of the executive committee will visit the sororities and fraternities. We would like you to think this over very carefully as we will ask you to vote at your houses when we are there. We will be glad to answer any questions and to discuss this with you.

SENIORS - WE NEED YOUR HELP!

UVM To Host As Vermont Invitational Debate Tournament

Resolved: "That Labor Organizations Should Be Under the Jurisdiction of Antitrust Legislation," will be the theme of this Year's UVM Invitational Debate Tournament, on November 17 and 18 the UVM debators will once again play host to an invitational debate tournament which will include such prominent schools as Harvard, Dartmouth, Brown, and Columbia. This Invitational Debate Tournament is refuted to be one of the largest in the country, attracting more than four hundred debaters representing more than forty schools. UVM will appropriate an equal number of students to serve as guides, hosts and timekeepers.

This tournament gives no award and has no champion, though the individual debates are judged. Its purpose, rather, is to provide more experience for the debators through the debating of the topic. No doubt, this added experience aided the Vermont varsity team of Marilyn Van Graber (pres ident of debate club)and Charles Tierney (a June graduate) to place ninth in the nationals last spring at West Point.

A good debate team requires many good debaters, and UVM can take pride in the quality of its debators. With team members as Bill Germain, Betsy Eisman, Elaine Zak, Bill Lukosky, Mike Cronin, Gil Tornabene, Toni Appel, Pete DeRose and Marilyn Van Graber, UVM, is slated to have an outstanding year.

The public is welcome to attend all debates. The schedules can be obtained in the Waterman building on Friday, November 17 and Saturday, November 18.

THERE'S CHALLENGE TODAY FOR VIRTUALLY EVERY TECHNICAL TALENT AT PRATT & WHITNEY AIRCRAFT

Almost every scientifically trained man can find stimulating and rewarding career opportunities within the broad spectrum of Pratt & Whitney Aircraft activities.

From the solid foundation of 36 years as a world leader in flight propulsion systems, P&WA development activities and research investigations today are far ranging. In addition to continuing and concentrated development effort on air breathing and rocket engines, new and exciting avenues are being explored in every field of advanced aerospace, marine, and industrial power applications.

The reach of the future ahead is indicated by current programs. Presently, Pratt & Whitney Aircraft is exploring the fringe areas of technical knowledge in *magnetohydrodynamics . . . thermionics* and *thermo-electric conversions . . . hypersonic propulsion . . . fuel cells* and *nuclear power*.

To help move tomorrow closer to today, we continually seek ambitious young engineers and scientists. Your degree? It can be in MECHANICAL ■ AERONAUTICAL ■ ELECTRICAL ■ CHEMICAL and NUCLEAR ENGINEERING ■ PHYSICS ■ CHEMISTRY ■ METALLURGY ■ CERAMICS ■ MATHEMATICS ■ ENGINEERING SCIENCE or APPLIED MECHANICS.

The field still broadens. The challenge grows greater. And a future of recognition and advancement may be here for you.

For further information regarding an engineering career at Pratt & Whitney Aircraft, consult your college placement officer or write to Mr. R. P. Azinger, Engineering Department, Pratt & Whitney Aircraft, East Hartford 8, Conn.

EVERY COLLEGE STUDENT needs this book

to increase his ability to learn

An understanding of the truth contained in Science and Health with Key to the Scriptures by Mary Baker Eddy can remove the pressure which confronts today's college student upon whom increasing demands are being made for academic excellence.

Christian Science calms fear and gives to the student the full assurance he needs in order to learn easily and to evaluate what he has learned. It teaches that God is man's Mind—his only Mind—from which emanates all the intelligence he needs when and as he needs it.

Science and Health, the text book of Christian Science, may be read or examined together with the Bible in an atmosphere of quiet and peace at any Christian Science Reading Room. Information about Science and Health may also be obtained on campus through the

Christian Science Organization at

ADVANCED ROTC CORPS HOLDS FIRST SMOKER

The Advanced Corps of Cadets held their first smoker of the year on Thursday night, the 26th of October. The Cadet Brigade Commander, Maurille Fournier, introduced the other members of the Brigade Staff as well as the other members of the Battalion Staffs. The main objective of the Junior Class was to get acquainted with the seniors as well as with the Cadre.

Cadet Second Lieutenant Shepard, a member of the Ethan Allen Rifles Honor Society, then introduced the new members of the Cadre Staff. They are: Captain Thomas T. Brodin and Captain Audrey J.W. Short, MS I Instructors; Captain John W. Hussey, MS II Instructor; Master Sergeant Ernest M. Carroll, Merit and Demerit NCO; Sergeant First Class Robert A. McDonald, Training Aids NCO; and Sergeant First Class John F. Sheridan, Supply Sergeant.

The next speaker was Cadet Second Lieutenant Paris, also a member of Ethan Allen Rifles, who spoke on the awards that both juniors and seniors can obtain for outstanding performance within the ROTC Corps.

Colonel Blanchard then spoke to us briefly. He reminded us of the present world situation and that our role in the Army would not be an easy one. He then preceded to put before us certain situations th as leaders might face in relati discipline and control of our He suggested that we take tim to think about these problem how we would solve them. Colonel Blanchard's spec movie on Communism in C narrated by the first U.S. Fe Correspondent allowed in C was shown. The movie was termely interesting in that it s ed the progress that Red C made, the problems that overcome, and the bigger, r yet to be conquered.

Following the program, formal coffee hour was h

Letters To The Editor

(from page four)

[illegible] past years. There [illegible] what is going on [illegible] campuses in [illegible]. There are [illegible]tions in the [illegible]e and summer [illegible]nsin. Wonderful! [illegible]nic is broadening to all aspects of [illegible]e, there has been [illegible] of adequate coverage of college news.

[illegible], in particular, has [illegible]ttention, where is [illegible] for the "Vermont [illegible] have come across [illegible] "La Dolce Vita", [illegible], and the Lane series, [illegible] concerning the Varieties. [illegible]ronic that the Cynic [illegible] decrying the lack of [illegible] campus, and yet one [illegible] find a mention of the [illegible] Varieties", a well [illegible] custom in the pages [illegible] paper that can be [illegible] repetitious in its criticisms of waning school spirit, [illegible] of talented and ambitious [illegible] put much work into this [illegible] and they aren't even re[illegible] a mention in their own [illegible] paper. Perhaps, I am wrong [illegible] criticism, this all could be [illegible] to the ineptness of one reporter. If that is the case, I hereby [illegible] to review the show myself. It was impressive enough [illegible] I'm sure I could write an [illegible] review. At least, it would [illegible] a review.

I may be wrong, but I feel that [illegible] paper owes to its readers [illegible] coverage of those affairs [illegible] national and local)., and I [illegible] the Cynic is not holding up [illegible] these responsibilities in the [illegible] of local news, concerning the [illegible] population.

Sincerely,
Frank De CAvalcante

First Aid Fraternity

To the Editor:

In a time when the emphasis seems to be more and more on higher scholastic standards for colleges and universities, it appears to me that careful study of the tutoring programs here at the university is merited.

The initial success of the Lambda Associates tutoring program has given rise to the study of a possible tutoring honor society here at UVM.

I would like to suggest that the university institute a "first aid fraternity" similar to the one started by the University of Pennsylvania in 1954. The society, run by the outstanding academic students on campus, has met with unprecedented success and has led to the formation of eight other Sigma Tau Sigma (student tutor society) chapters based on the Pennsylvania model.

At the University of Pennsylvania, 83% of all those students aided by this society received passing grades in their troublesome courses.

Not only would such a society provide sorely lacking recognition for our good students, but it would help many of our fellow undergraduates stay in college and improve their grades.

At present, we have an athletic tutorial service, and some tutoring, on the freshman and sophomore levels is available. However this is not enough.

I strongly urge the student body to take a keen interest in the development of such a society so that its adoption here at the university may become a reality.

Sincerely,
Mitchell Jablow, '64

Invitation

[illegible]

While reading the Cynic last week I came across an article [illegible] that I found very interesting. I [illegible] but notice how apt a [illegible] name. The name was [illegible] "The Circular File."

I would like to personally invite Mr. Grossman to our IFC meeting next week because a person who knows so much about the handling of our problems without going to a meeting or questioning a member of the executive council would be irresponsible once he knew something about the problems which face us.

Let us take his notions one at a time. In regards to the Homecoming Floats, they are not a meaningful part of the UVM tradition, because they are neither meaningful nor a part of our tradition. The fraternities at UVM have been building floats for homecoming for four years and in that time most of these "meaningful" floats have been gigantic litterbugs strewing paper wherever they went. Probably there are students on this campus who were upset when we hit away with the floats; however, there were more who were happy to see them go. The people who built these monsters were the happiest, after all, they were the ones who stayed up all night working on them. As a sidelight, I might point out that every fraternity that was eligible to compete completed a poster. We never had 100% participation in the float contest.

Now about UVM's deferred rushing policy. To clarify Mr. Grossman's somewhat botched semantics, deferred rushing means just that, no rushing until the end of the first semester. What he describes in his article as a deferred pledging program. The reason rushing is deferred is to allow the freshmen a chance to settle down and establish good study habits the first semester before they get fed up on the fraternities and their many activities.

It again seems that Mr. Grossman is misinformed because the system we now use is the one which has been in use many years, not as he states an innovation by the IFC to make things more "practical". Last years system was an experiment and a failure, consequently we reverted to the old system before the end of the first semester last year. If the author of "The Wastebasket" had taken time to check his facts, he would have found that freshmen men's forms have been off limits for fraternity men for several years and that fraternity houses have been closed to freshmen men for an equally long time. Neither of these rules are new nor were they suspended during last years experiment. With the above facts in mind it is hard to make any logical deductions from the article in last weeks Cynic.

Mr. Grossman has committed a grave error in allowing himself to abuse the privilege of the press by printing "facts" which he has not taken the trouble to substantiate. However, it should please Mr. Grossman to know that we on the IFC have taken the time to clip his article and place it in a spot it so richly deserves, the circular file.

Sincerely,
H. Ray Faris, Jr.
Vice-Pres., IFC

STUDENTES

(continued from page five)

artificial measures on the part of the I.F.C. in all its relationships with the freshmen. An example of this is the way that the ride-home-for-Thanksgiving-vacation was handled by the Rushing Committee.

Distrust, suspicion, and futility will soon become the general attitude of the individual members of the Interfraternity Council. With more contact between the fraternity men and the Freshmen, it would be easier to sell the fraternity system on a more informal basis (and more maturely) than is possible during the stilted "Open Houses" and Mass Meetings (a la W.S.G.A.).

EVILS OF NO CONTACT

With a fool-proof No Contact Policy, the fraternities would not know any of the individual rushees until the formal rushing period. Is it possible for a fraternity to really get to know a man, or for an individual man to know the character of a fraternity, when everyone is trying to show his best side only? And what is the result of this? The freshman pledges a house, expecting something, and finding something else; while the fraternity pledges an individual, expecting him to be one kind of guy, and finding that he is, instead, a completely different man than he seemed to be during rushing. Both are deceived, and soon the freshman finds that he can get nothing out of his fraternity, and the fraternity discovers that it can do nothing with its new pledge. The whole purpose of rushing; that of attracting men who will work well with a house, fit into the general attitude of the house; and for the freshmen, finding a house into which they will comfortably fit, is lost. But, our no contact policy is not fool-proof, and instead, the possibility of a freshman being "snowed" (we may just as well use the word) by the wrong impression is even more likely.

Given an opportunity to casually meet the freshmen, and get to know them, outside of the formal context of the rushing situation, the fraternities would be less apt to attract men, or be attracted by men who wouldn't fit in.

But more important is the effect that the no contact policy has on the freshmen. First and foremost, the freshman has no chance to know what the individual houses are like, or if he would find himself in a fraternity situation where he would not be able to reap the benefits that fraternity living has to offer. But there is more subtle disadvantage in that the no contact policy presents to the freshmen. It may be very true that there is very little opportunity for social life available to the freshmen. But a much more important opportunity is denied them, the opportunity of asking for advice. It may be true that there is a perfectly adequate system of faculty and dormitory advisors, but there is no doubt that, in certain situations, the advice of a friendly upperclassman would be easier to take. Consider a freshman, probably away from home for the first time in his life, thrown into a completely different situation, with more academic and social pressures piled upon his shoulders than he has ever had before . . . this man could well use the helping hand of a "big brother". The Fraternity System could offer a substantial service, and a significant aid to the college adjustment of the freshman. It is missing itself this oportunity.

The I.F.C. is considering a change in the no contact policy. I submit to them that the wisdom of this change is obvious.

Hilberg,s New Book

(continued from page one)

written no so much about the victims but rather the perpetrators. He has gone into minute details about the vast organization of the Nazi machinery of destruction and the men who performed the important functions in this machine. He reveals the correspondence, memoranda, and conference minutes which were passed from desk to desk as the German bureaucracy made its decisions to destroy, utterly and completely the Jews of Europe.

Dr. Hilberg says that the destruction of the European Jews between 1933 and 1945 appears as an unprecedented event in history. Five million people were killed as a result of an organized undertaking in the short space of a few years. The operation was ever before anyone could grasp its enormity, left alone its implications for the future.

"Yet," he says, "if we analyze that singularly massive upheaval, we discover that most of what happened in those 12 years had already happened before. The Nazi destruction process did not come out of a void; it was the culmination of a cyclical trend. We have observed the trend in the three successive goals of anti-Jewish administrators. The missionaries of Christianity had said in effect: you have no right to live among us as Jews. The secular rulers who followed had proclaimed: You have no right to live among us. The German Nazis at last decreed: You have no right to live."

Dr. Hilberg has broken his book into four sections, an introduction, two phases of the destruction, and the conclusion. Under process one of the destruction, he discusses the expropriation and concentration measures taken by the Nazis while in the second part he talks about the deportations and mobile and killing center operations.

Born in Vienna in 1920, the author was educated in the United States, receiving his B.A. from Brooklyn College and his M.A. and Ph. D. from Columbia University. He served with the 45th Infantry Division in Europe during World War II. While studying for his Doctorate, he began to work in the vast file on unindexed documents in the Columbia University Law Library. Later he was a member of the War Documentation Project which sifted through all captured German documents.

Dr. Hilberg came to the University in 1956 after having been a lecturer in political science at Hunter College, and in social sciences at the University of Puerto Rico.

He is presently at work on a study of the German motives for the destructive upheaval described in "The Destruction of the European Jews." The latter publication was sponsored by the Frank and Janina Petschek Foundation of New York and the book has been published in this country and England.

UN Contest

Vermont high school students will join thousands of other students from high schools throughout the United States in participating in the 36th annual High School Contest on the United Nations.

Plans for the contest have been announced by the Vermont Council on World Affairs, the University of Vermont.

The contest consists of an examination which tests the student's knowledge of the history and structure of the world body and his understanding of the issues facing the UN. The exam is based on two booklets, "The UN-What It Is," and "The UN-What It Does."

The examination will be given at schools throughout the country on Jan. 18. First prize, nationally, is a trip to Europe, sponsored by the American Youth Hostels Inc., or $500 toward a college scholarship. Second prize is a trip to Mexico or a $200 scholarship. Third prize is a trip to New York City and the United Nations. All three national winners will appear on the March 18 telecast of "Adlai Stevenson Reports."

A state prize of $25, given by the Vermont Federation of Women's Clubs, state sponsors of the contest, will go to the top Vermonter in the contest.

New Computer

The UVM Board of Trustees authorized the purchase of the 1620 computer which it has rented from International Business Machine since February, 1961. Part of the funds for the purchase will be provided by a National Science Foundation grant.

Varsity Victorious

(continued from page twelve)

finished fourth in 24;25, followed closely by George Davis of Wesleyan in 24:41 minutes.

Sixth, seventh, and eighth places were filled by UVM men: Tim Simpson, Bill Stillson, and Harold Billings respectively.

The last two placers for UVM were Spafford in 27: 31 and Harvey in 29:00 minutes.

"UVM's Harriers looked good", stated an excited spectator, "Wesleyan's MacKinnon is a pretty fast runner, but I bet Karch will beat him next time."

Defoe Classic At Fleming

The feature of the Fleming Museum film series program for Wednesday, November 8, is Luis Bunuel's version of the Defoe classic, "Robinson Crusoe." The film is in color and stars Dan O'Herlihy. What words are spoken, are in English.

Bunuel is one of the great names in movie history. His early career as an experimentor in the film medium parallels that of John Cocteau. The film, while intended as family fare, should be of interest to connoisseurs of the cinema as well as those who are smallfry in fact as well as fancy.

The film will be at 7:15, rather than the usual 8:00, but will be in the Arena Theater. Admission is by Museum membership, student membership is $1.00.

"Robinson Crusoe" will be the second program (the first was "Vitelloni" -- see the excellent *Cynic* review of October 19) but there are still six more programs to come after that.

Yankon Meet

(continued from page twelve)

Massachusetts, who won this event a year ago at Kingston, Rhode Island, finished first with 42 points. Maine raced a close second, only four points behind Massachusetts. The University of Rhode Island placed third with 79 points. The University of Connecticut finished fourth and the University of New Hampshire finished last.

Tim Simpson placed sixteenth as UVM's first finisher. Steve Russel captured nineteenth, and following him in the number twenty spot was Bill Stillson. Gary Karch placed twenty-fourth and Harold Billings finished twenty-ninth as UVM's fifth placing man.

When asked about the last two meets of the year, Archie Post said, "Based on our past performance this year we should have no problem with Bowdoin. But, the New England Finals in Boston will be catch as catch can. If we can stay bunched close together near the front, we will do fairly well."

Kittens End Season With Perfect Score

[illegible] Pusey" Evans' [illegible] 6 pts. [illegible] shut out Rensselaer Parkman "B" 46 to 0 at Rensselaer last Saturday.

[illegible] Foster opened the scoring by returning a punt 65 yards with thirty seconds left in the first quarter. Following excellent blocking from guards Al Marsh, Dean Kent, making a circus catch of a Foster pass, scampered 54 yards for a touchdown in the second period. Kent and Foster scored again in the third and fourth quarters on runs of 11 and 19 yards respectively. The [illegible] T-D came in the second period on a two yard quarterback sneak by [illegible] . . .

"The best offense is a good defense" and this year's frosh proved it. In five games they allowed only 12 points, while scoring 126. Many of these scores resulted from 'heads up' defensive play. After the first two games, the defense had [illegible] the offense [illegible] T.

One of the Kittens best offensive weapons turned out to be the punt. With Foster averaging over 40 yards a boot, they either gained valuable yardage on punt exchanges or capitalized on opponents fumbles in handling the kicks.

The ferocious forward wall of Fred Haase, Tom Weinrich, Ron Mertel, Ed Pugit, George Ortiz, "Dip" Blanck, and "Gina" Giardi, averaging 201 pounds, held in check many opponents very [illegible] ingly. Dave Baker, a 240 pound tackle, added weight and talent to the defense. Fred Blackburn, Bill Noyes, and Jim Meredith made up the valuable reserve strength needed for a winning team.

The Kitten's backs played like "wild cats" all season, although at times they "pussy footed" through holes ripped open by the lineman. Quarterback Foster did everything well. He was a triple threat [illegible].

Sideline Cynic

BY BOB BERNARD

The term "Physical Education" is extremely well fitted to the athletic program offered at the University of Vermont. This term is comfortable and well suited because it is flexible. In its broadest sense the Physical Education Department maintains that "Physical Education" means the education of one's physical being. Hence, employing this terminology, it is quite possible to include bowling, archery, horseback riding, folk and social dancing under this program. Going one step farther, the program might include such activities as ping-pong, shuffle-board and tiddleywinks.

These are all wonderful American pastimes. But this is also taking the easy way out. By allowing an individual to take four semesters of two hours a week in such basic and simple motor activities nothing is being accomplished. How often will the male students of this university use either the "knowledge" or "skill" acquired in a semester's course in touch football? Even a mildly strenuous course in basketball does not do the individual very much good except allow him to fulfill his requirements for four semesters of physical education.

Bowling, archery, volleyball, and badminton are, admittedly, physical activities. But they are also social activities. They are more apt (with the exception of strictly competitive or professional tournaments) to be carried out in an entirely different atmosphere than that in which basketball or football is played. Again the Physical Education Department is taking the easy way out. General recreational activities are nice; they can be taken up by an individual on his own free time!

The fault with our present program starts with the terminology from which it arises. "PHYSICAL FITNESS" and not just "Physical Education" should be the goal of the Physical Education Department.

SOUND courses in weightlifting, calisthenics, trampoline, gymnastics, fencing, boxing, wrestling, and swimming would be far superior to those courses now offered. They would train, and they would educate.

Lack of facilities and staff? There's a new gym in our future, remember?

Doctor Van Dellen wrote several weeks ago in the Burlington Free Press, "In the final analysis the report (Taken from the Lankenau Hospital's Division of research) was far from encouraging about our children and leaves no doubt about the need for improvement. The security of a nation is endangered when its youth is soft. Too many parents and teen-agers pooh-pooh the need for regular exercise, calisthenics, adequate diet, and proper rest. Physical fitness should become a prized possession because it is an inseparable part of total health."

Even President Kennedy has stressed the importance of a physically fit youth. If the subject is important enough to command a good deal of attention at a national level it certainly should get some attention at this university.

A true "Physcial Fitness" program should be incorporated into our present program, and participation should be required of every student attending the University of Vermont.

"New Look" A Success UVM Smothers Huskies

In November of 1932, President Franklin Roosevelt successfully initiated the "New Deal". In November of 1961, Coach Ed Donnelly successfully initiated the "New Look".

This New Look, a single wing offense, produced a spectacular 6-0 victory over a highly touted Northeastern Eleven before a Homecoming crowd of 7300 at Kent St. Field, Brookline, Mass. Tailback Bill Fleming passed to wingback Ken Burton in the third period for the only score of the game.

After last Saturday's tie with the Cadets of Norwich, it was evident that Donnelly would have to do something drastic to get the most out of the Cats. The Green and Gold had been running hot and cold all season. They played well against Coast Guard and Rochester but could do nothing right against Maine, Rhode Island, or Norwich. All three of Donnelly's quarterbacks were injured and would not be able to play effectively. The prospects of beating a strong Northeastern team were as bright as the Reds beating the Yankees in the World Series. Donnelly, as they say in Chess, was "in check", and had to make his move.

The single wing attack demonstrated the full potential of a strong Vermont eleven for the first time this year. They went into the game a 16 point underdog, and left the field with a decisive victory. The 6-0 score does not do justice to the superiority of the Catamounts. They made 15 first downs to 7 for the Huskies. They rushed for 227 yards to a mere 47 yards for N.U. The Cats literally ran all over their opponents. Actually, Northeastern should be credited for holding the Cats to only one touchdown, as they were in enemy territory for the majority of the game.

The only advantage the Huskies had was through the air. However, the Cats held the much heralded Jerry Varnum to 118 yards in passes, and they intercepted three of his tosses to stop any threat from the city boys. The only scoring opportunity Northeastern had came with two minutes left in the first half. Varnum had moved his club with ariels in the Vermont 18 yard line. Their attack petered out, and Paul Johnson was wide with his field goal attempt. Other than that it was all Vermont.

The Catamounts continually grinded out yardage around the ends. Their powerful running attack was lead by last year's Captain Maynard Ducatte. "Duke" played the best game of his college career. Kenny Burton, who rode the bench most of the season, was fantastic in his starting role. The slippery back continually evaded the Northeastern tacklers with his fine movements. On many occasions it looked as though he would be caught behind the line of scrimmage, but he bounced and spinned off the opposing tacklers. Bill Fleming showed the promise that he had last year until he broke his thumb. Bill ran and passed very effectively from the tailback position. He was also a hawk on defense as were Ducatte and Burton.

These runners showed great speed and agility. However, without the spectacular blocking of Leo Davin and Billy Burke, their running would have been in vain. Davin and Burke continually gave the Northeastern ends and linebackers a lot to [illegible].

The offense was [illegible] the defense was [illegible] forward wall led by [illegible] Bob Stone has never [illegible] finer. Stone along with [illegible] Sequist, John Fyfe, [illegible] lie" Thorenson were [illegible] able. This was [illegible] their best performance [illegible] year. Paul Toussaint [illegible] Bolden played great [illegible] and were persistent [illegible] ing the N.U. runners [illegible] middle of their end [illegible].

Sophomore Leo Davin [illegible] came into his own [illegible] in this game. He was [illegible] least 15 tackles [illegible] Northeastern quarterback Jerry Varnum talking [illegible] self with his blitzing [illegible].

The pass defense was [illegible] best as it had to be [illegible] to stop the brilliant [illegible] Davin, Fleming, Burke, [illegible] catte, and Weiss were [illegible] brilliant and stuck to [illegible] men effectively. This was truly a team effort with everyone giving out more than 100%.

Needless to say, Coach Donnelly was pleased with the results. As one of the players said, "He even cracked a few jokes after the game." Donnelly stated that the spirit was at its peak, and some credit goes to the students who made the trip to Boston. The dead U.V.M. spirit was reborn at the Kent St. Field. The fans had something to cheer about and they really yelled. Donnelly was really pleased with this as well as the game.

The icing on the cake came a little later as Middlebury beat Norwich 13-12. This means that the winner of Saturday's game at Middlebury will be the Vermont State Champs. The team looks real good, sports fans, but they need our backing.

Sportlight Southwick

J. Alice Hofler

On Sunday, October 29, the girl's tennis team, composed of Jean Beckley, Debbie Mathews, Ann Buch and Gina Sellman, went to Middlebury to participate in a tennis playday. The attending schools were Middlebury, Colby Jr., Mt. Holyoke, UVM and Skidmore. UVM placed third in the tournament.

On Wednesday, November 1, sixty girls braved the rough waters of the Burlington YMCA to compete in the eliminations for the swimmeet. The top four times were taken and these girls swam in the finals. The meet proved exciting and rewarding for all who participated. Amid the thrashes and splashes of the striving swimmers were enthusiastic yells from the sidelines.

Saturday, October 28, found the field hockey team at Middlebury for a hockey playday. The UVM team lost to Middlebury and tied both Skidmore and Green Mountain. Because of the early darkness, this day marked the end of the hockey season for the team.

W.R.A. membership may now be obtained from dorm representatives. The calendar is full of activities this year.

Catalina Club would like to take this opportunity to welcome its eight new members. After two tryouts, these girls were chosen to join the synchronized swim group. They are: Shirley Diver, Sally Ambrose, Susan Monti, Lillian Weaver, Carolyn McCarthy, Carolyn Bard, Leslie Barasch and Lynn Hardenburg.

Harriers

Varsity Victorious

UVM's Varsity Harriers added another digit to the cross country win column when they defeated Wesleyan University on the UVM four and one half mile course. Wesleyan journeyed to UVM from Middletown, Connecticut, only to be cheated out of a victory by one point. The final total was UVM 27, Wesleyan 28.

Wesleyan's William MacKinnon captured first place in 24:00.8 minutes. Gary Karch of UVM paced the course in 24:09.5 minutes to cross the finish line in second place. James Buddington of Wesleyan finished third in 24:23 minutes. Stephen Russel of UVM

. . . Dedicated To The Cause Of World Peace

San Francisco To Moscow... 6000 Mile March For Peace Recently Completed

... reprinted from the ... editorial, PEACE NEWS, ... a protest march. This ... anti-war demonstration ... much in use by pacif...

Ten months on the road, walking 6,000 miles from the desert and mountains of the United States to the Russian steppes, crossing six national frontiers including the "Iron Curtain" dividing Germany -- this is the outline of the march.

Sometimes hundreds or thousands of supporters joined, sometimes a dozen or less paced through deserted stretches alone. A hard core walked all the way, but many long-term personnel kept changing owing to illness, commitments or personal doubts. The attitude of the authorities and of the people in each country varied in both the Western and Eastern countries.

The march started in San Francisco on December 1, 1960, and arrived in Moscow on October 3. The marchers spent six months crossing the United States -- 4,000 miles. A selected team of 13 Americans plus two photographers flew to London on June 1. After a rally in Trafalgar Square on June 4 the marchers -- joined now by two other Americans, four British volunteers, two from Sweden, one from Norway, another from Finland and one from West Germany -- walked via Aldermaston to Southampton, where they took a boat to Le Havre.

The French authorities would not allow them to land. Five of the marchers jumped overboard and swam ashore in protest; and the team had to return to England. They made a second attempt at entry ten days later, were again not allowed ashore, and sent back to England. The marchers then crossed over to Belgium, and on July 2 on the border town of Mouscron met with a group of Frenchmen, who had been carrying on the march through France in the face of continual obstruction and arrests by the police.

From Mouscron the main team of marchers resumed their journey on foot via Brussels to West Germany, crossing near Aachen on July 5. They were joined at this stage by a French girl volunteer and two Belgian students. Their route through West Germany took them through Bonn and Hannover to the East German crossing point at Helmstedt. Members of a "tribal" march through Holland from Amsterdam to the German border joined the main team near Osnabruck on July 29. During their time in West Germany, the marchers defied the ban on demonstrating at military bases and were arrested, but allowed to continue the march.

Credit: Ojanen, S.P.S.

On August 7 the team, joined now by four more West Germans and a Dutch volunteer, crossed the border into East Germany. After marching for a week under strict surveillance, a crisis arose over the question of the team entering Berlin. The crisis in the team's relationship with the East German authorities coincided with and arose out of the beginning of the Berlin crisis. As the marchers refused to bypass Berlin they were "deported" back to Helmstedt.

The march was resumed on August 22 in Poland where the team had a warm welcome and a good deal of freedom. They were allowed to picket the Defence Ministry in Warsaw and made a pilgrimage to Auschwitz. On September 15 they crossed the Russian border at Brest.

In the USSR the march progressed at breakneck speed to cover the 660 miles between Brest and Moscow in three weeks. The team went through Minsk and Smolensk, met large crowds at each town and even in villages and at crossroads, made many speeches and distributed thousands of leaflets.

On the outskirts of Moscow they picketed a military barracks; on October 3 they held a vigil in Red Square. They also spoke at the University and had a meeting with Mrs. Khrushchev before leaving Moscow on October 5.

How The March Began

The idea of the march to Moscow emerged during the Polaris Action demonstration in New England, USA, during the summer of 1960. It was taken up by the American Committee for Non-violent Action, which had sponsored the Polaris Action protests against the building and launching of Polaris submarines.

CNVA has been engaging in direct action demonstrations against nuclear weapons since 1957. They organized and took part in a protest at the Nevada Desert atomic testing area in 1957; the voyage of the Golden Rule, which tried to enter the US Pacific testing area at Eniwetok in 1958; and the civil disobedience demonstration at the Omaha missile base in 1959. These are some of the more dramatic demonstrations from CNVA's record of opposition to US and Western military policies.

But once the San Francisco to Moscow Walk left New York it became an international venture. Among those who joined the team of 17 Americans were British demonstrators, a French girl, two Belgian students, a volunteer from Holland, two Norwegians, and marchers from West Germany, Sweden and Finland. Not all those who joined the main team were eventually able to go all the way to Moscow, and they joined the march at various points between London and Hannover.

Ad hoc committees for the march were set up in most of the European countries directly involved. Support was drawn from pacifists and other Left-wing groups, but there was no official co-operation in any Western country with branches of the World Peace Council. Individuals from all organizations were welcome to join the march in their own country, but only those fully committed to the policy and discipline of the march could join the main team.

In its European phase the American-initiated walk was merged with a similar project initiated by Inge Oskarsson from Sweden and gained its new title "American-European March".

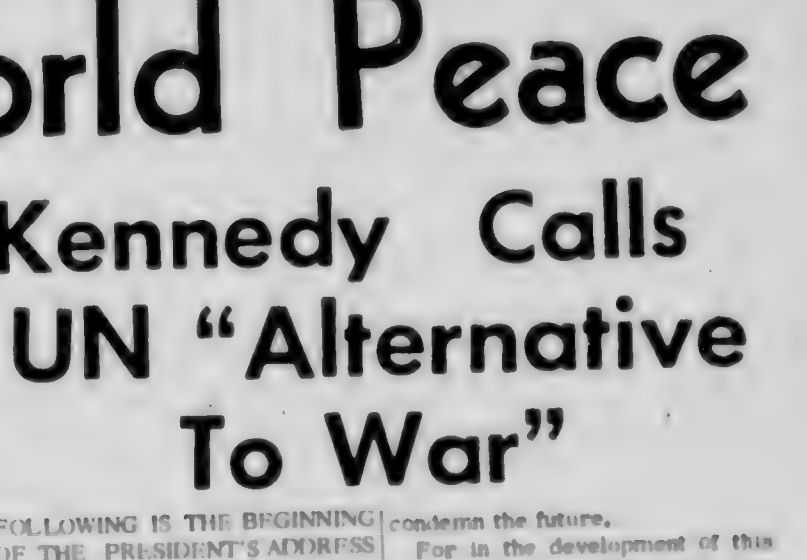
Kennedy Calls UN "Alternative To War"

FOLLOWING IS THE BEGINNING OF THE PRESIDENT'S ADDRESS TO THE UNITED NATIONS, DELIVERED SEPTEMBER 25, 1961.



Mr. President, honored delegates, ladies and gentlemen:

We meet in an hour of grief and challenge. Dag Hammarskjold is dead. But the United Nations lives. His tragedy is deep in our hearts, but the task for which he died is at the top of our agenda. A noble servant of peace is gone. But the quest for peace lies before us.

The problem is not the death of one man -- the problem is the life of this organization. It will either grow to meet the challenge of our age — or it will be gone with the wind, without influence, without force, without respect. Were we to let it die -- to enfeeble its vigor -- to cripple its powers -- we would condemn the future.

For in the development of this organization rests the only true alternative to war -- and war appeals no longer as a rational alternative. Unconditional war can no longer lead to unconditional victory. It can no longer serve to settle disputes. It can no longer concern the great powers alone. For a nuclear disaster, spread by winds and waters and fear, could well engulf the great and the small, the rich and the poor, the committed and the uncommitted alike. Mankind must put an end to war -- or war will put an end to mankind.

So let us here resolve that Dag Hammarskjold did not live -- or die -- in vain. Let us call a truce to terror. Let us invoke the blessings of peace. And, as we build an international capacity to keep peace, let us join in dismantling the national capacity to wage war.

TOCSIN Working For Peace And Disarmament

Since its formation in the fall of 1960, TOCSIN, an organization for peace and disarmament activity at Harvard and Radcliffe, has played a rather experimental role in student disarmament activities. Like all campus disarmament groups, TOCSIN faced the three major challenges of stimulating individual commitment, promoting educational and research activities, and giving meaningful expression to individual and group decisions. On the basis of its experience in meeting these challanges and on the strength of its present activities, TOCSIN would like to promote closer coordination among college peace groups, particularly in New England.

TOCSIN ACTIVITIES

TOCSIN has broken through the barrier of student apathy on disarmament at Harvard by a concerted educational effort. Offering a wide range of project possibilities, TOCSIN has been able to present each student with a meaningful form of activity regardless of his knowledge of the problem or his level of commitment. Among other activities it has sponsored speaker programs, established discussion groups led by TOCSIN members, and issues a monthly News Forum with articles by students and faculty members. It has established research groups on Civil Defense, Psychological and

Kennedy Calls UN "Alternative To War"

FOLLOWING IS THE BEGINNING [illegible] ADDRESS THE PRESIDENT [illegible] TO THE UNITED NATIONS, AT [illegible] DECEMBER 15, 1961.

Mr. President, honorable colleagues, ladies and gentlemen:

We meet at a time of grave challenge. Our hopes and prayers for peace and the United Nations have not been realized. We meet at a time when the cold war has begun to heat up. Not only in Berlin, but around the globe, in every continent, the native inhabitants are rising up against their colonial masters, and the older established powers are struggling to maintain their influence. Science has begun to unlock the secrets of outer space, and the nations of the world have begun preparing for its conquest. Finally, the pressures of population and production are rising, requiring new programs of economic cooperation.

All of these new challenges are heaped upon us as we seek to make our way in a world divided into many parts, beset by many troubles, and lacking sufficient resources to overcome all of its problems. Our efforts are complicated by the cold war, in which we confront a powerful enemy which is dedicated to the proposition that the Communist system must ultimately supplant every other form of government, and is willing to commit its resources to that end. Finally, we are aware that our own future may depend on our ability to persuade other nations that our way of life is not merely a matter of military or economic power, and that we do not consider ourselves the natural heirs of all those who are struggling to be free.

To the solution of these problems, the United Nations brings both hope and danger. As the only world organization in which almost every nation is represented, it is our last best chance to find a substitute for war. But unless the members are willing to support the obligations of the charter, the United Nations may go the way of the League of Nations, which was unable to prevent world war II.

The United Nations is not a static, fixed institution. It can be what we make it. It can be a center for negotiation and discussion, as well as a forum for invective. It can serve to find peaceful solutions. It can provide machinery for mediation in many disputes before they erupt into violence. It can assist in the search for arms control and disarmament. It can stimulate programs of economic cooperation and development. It can protect the weak against the strong, and the rich against the poor. It can do all of these things, or it can be a sterile, expensive, side-show. The choice, in large measure, is ours.

I come here today because I believe we must use and support the United Nations in every way we can. For the troubles we have mentioned are precisely the troubles which the United Nations was established to resolve. If we are to meet the challenge of this age, we must first meet the challenge of the United Nations. We must make it work, not merely talk about it. We must see that the peacekeeping arm is equal to the many tasks that lie ahead. We must see that the United Nations has the resources, the authority, and the commitment of the great powers that it requires. We must see that the United Nations is used effectively to find solutions to disputes before the fighting starts, and to stop the fighting before it gets out of hand. We must see that the United Nations is not merely a static conference room, but a dynamic force in the search for peace in every troubled area of the globe.

The problem is not the death of one man -- the problem is the life of this organization. It will either grow to meet the challenge of this age -- or it will be gone with the wind, without influence, without force, without respect. Were we to let it die -- to enfeeble its vigor -- to cripple its powers -- we would [illegible] the hopes of mankind for a world of peace under law, the only true alternative to war, and we would condemn the next generation to live in the cold and bitter world that we live in today.

So let us here resolve that Dag Hammarskjold shall not have labored and died in vain. Let us call a truce to terror. Let us make the relentless search for peace our first order of business. And, as we build an international capacity to keep peace, let us join in dismantling the national capacity to wage war.

TOCSIN Working For Peace And Disarmament

TOCSIN ACTIVITIES

[illegible] formation of the [illegible] TOCSIN, an organization [illegible] joined [illegible] groups, TOCSIN faced the three major challenges of stimulating its present activities, [illegible] would like to promote closer [illegible]

Shriver Says Peace Corps "A Grass Roots, Rice Roots Volunteer Effort Of Free Men"

Why Students Demonstrate For Disarmament

Dots on the border -- printed on six banners -- which the marchers distributed along their route across Europe.

WE ARE WALKING TO MOSCOW

Some of us have walked from San Francisco, almost 4,000 miles, to the Capitol of the United States -- Washington, D.C.

For we are opposed to the armaments of the East and West. We are marching for unconditional disarmament NOW.

The most effective way to any disarmament today, we believe, is for some nation to start scrapping its weapons. Whenever a country disarms first, it opens the way for others to do the same. Some nation must find the courage to act first.

In each country we pass through we are calling on the government to give up nuclear weapons unconditionally and to discard military pacts based on them. These pacts intensify the Cold War.

H-bombs and missiles are totally evil. They can kill millions of people outright, destroy thousands more slowly from burns and radiation sickness, and harm future generations. We cannot without protest let our own governments use these weapons in our name. And any country which has H-bombs and missiles, for whatever reason, is in fact willing to use them.

In the nuclear age war is outlawed. It cannot deal effectively with major conflicts, and any war is likely to become a nuclear war. Dependence on arms must therefore be rejected.

In this new situation we believe that non-violence such as Gandhi used for the freedom of India, and the Norwegian teachers used in resisting Hitler -- can best defend and enlarge freedom and justice.

All governments should therefore end conscription, start to do away with armed forces, and turn to Gandhian non-violence to defend freedom and resist tyranny and oppression.

BREAD NOT BOMBS

The world is full of hunger, sickness and poverty. We believe that the Soviet Union and the United States with other countries should pool their resources to end such suffering -- by using now wasted on weapons of destruction.

We are appealing to the ordinary people in every country we walk through to take direct action and to work for unconditional renunciation of war in their own country. By doing so in every capital city we visit we shall say what the Marchers have already said in Washington, D.C., to the people of the United States:

"At this stage disarmament can be achieved if one large country is prepared to take a first step and lay down its arms as an example for others to follow."

WE CANNOT PRETEND

Some of us act out of religious conviction, others out of commitment to ethical values, but we are united in opposing mass violence. Because humanity is in great danger of destruction, we are determined to speak what we believe to be true. In our own countries we have all urged the renunciation of mass violence. And we will continue to do this. Some of us have joined demonstrations against armament. Others have refused to pay taxes for war, or have refused military service, or have worked at missile bases and factories or refused to work in factories making arms. As a result many of us have been arrested in various countries and have spent time in prison.

WE SHALL STILL

This is our record of our beliefs. We hope that we can speak out freely wherever we walk. Within each country we will continue on distributing our literature and holding our banners and posters with the people. Because we believe that the discussion of our ideas and our actions we are prepared to go to jail, prevented from carrying out our march or spreading our ideas.

We believe that peace will only come when nations put their dependence on military power and submit to the kind of power that is symbolized in India. We therefore call upon you according to your conscience to work for peace now!

Lowell W. Snyder

OTHER UNIVERSITIES MEET TO DISCUSS PEACE

TOCSIN

(continued from page one)

Economic Aspects of Disarmament, Asian Disarmament Problems, the Geneva Negotiations, and Chemical-Biological Warfare. It has arranged a course under the Freshman seminar program at Harvard. In addition, TOCSIN has participated in effective political activities.

In the last election, TOCSIN members went to Vermont to campaign for Congressman William Meyer. In the past few weeks they have demonstrated with members of Boston SANE against the construction of a civil defense shelter in Framingham, Massachusetts.

Most important of TOCSIN's public activities has been its own walk, held December 6 at Harvard and Radcliffe. During the day, 6000-7000 pieces of literature were distributed, and around 1000 students and faculty members signed the wall by wearing their armbands. Ten days later TOCSIN's Chairman and Co-Chairman went to Washington to discuss specific proposals regarding the coming negotiations with Mr. Leonard Gallois and Mr. James Leonard of the Disarmament Administration of the State Department. The trip was given favorable notice in a editorial in the Nation, and TOCSIN's activities were also mentioned favorably sometime later in The New York Times Sunday Magazine.

COOPERATION WITH OTHER GROUPS

While carrying on [illegible] activities at Harvard, TOCSIN has always been a member-oriented

Robert W. Gillespie, Civil Defense Director of Vermont, has announced the start of UVM professor John Isaac and Lloyd Woodward of the Physics Department are launching a ten-hour course on basic radiological defense. Available to Vermont residents, the course will offer such pertinent information as radiation, contamination, the atomic bomb, protective structures, fallout and basic tactics, fallout meters, decontaminating radiation."

Having received a radiological defense kits from the federal the Vermont Civil Defense sion may distribute to each Vermont city has at least "four trained men readers enrolled radiological defense Here, in Burlington, will take place at UVM Science Hall on November 1,6,8 and P.M. to 9:30 P.M.

Peace On The Editorial Pages Of Other Campus Papers

Retaliation- Sense Or Suicide?

Fifty Megatons Of Terror

(from Vermont College News - November 2, 1961)

October 30, 1961, an event occurred which will go down in the [illegible] of history -- that of the greatest man-made explosion by the [illegible] at their proving ground above the Arctic Circle. It was announced in Washington that the thermonuclear blast had a force of fifty Megatons, the equivalent of fifty million tons of TNT. As a weapon, 2,500 times as powerful as the atomic bombs that destroyed Hiroshima and Nagasaki, has no possible military value. It has many times the power required to annihilate any city in the world.

According to the Times, "A fifty-megaton bomb bursting over New York would destroy homes as far away as Bayonne, N.J., and Scarsdale, N.Y."

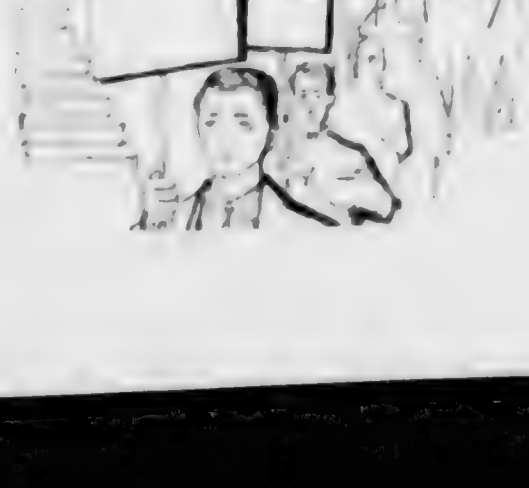
The nation has been living in a state of fear of future repercussions of the event. Pressure on the administration, both military and political, to resume atmospheric testing is mounting.

Since a week, Russian testing has nearly doubled the total tests carried out so far.

The people of the world felt the event both physically as well as mentally. How is it possible that human beings could ever create such a weapon so powerful that it could annihilate a continent, a race, the entire hemisphere? What is the continent of man coming to? What can God do to help us? Now is the time when we must turn to Him and ask God do to help us? Now is the time when we each, as a nation, as a whole, must ask themselves.

Many influential people as former Vice-President Nixon, and Governor Rockefeller of New York, are in favor of resuming atmospheric testing. "We can do everything we have to do underground and [illegible] space."

In another issue of the Times, "Fateful decisions affecting the future of all the people of the world, and possibly of future generations as well as our moral status in the eyes of the civilized world, will not be arrived at in absolute secrecy by a few men on the basis of what they know best".



Other sources say "the Soviet explosion dramatically confirms the true face of Communism, a face without love and greatly like the face of hate. The most fearful to ignore the world's plea to control [illegible] politically, socially, economically and humanely [illegible]."

Finally, we believe the world will long remember October 30, 1961 as the day that will live in infamy.

Home Life

[illegible] no wonder a nuclear war. I was [illegible] Premier Nikita Khrushchev has actually said, not long before a group of [illegible] high school students felt the necessity to march through Washington suffering their fears for peace. Whether they realize it or not, however, these students and others [illegible] are protesting which may eventually [illegible] to prove war not present it. Such protests as "marching for peace" plant a fear in the mind which could possibly lead to a [illegible] war.

Granted, if the shelter or in the event of a nuclear war there is little hope for survival, but in consequence and as technological progress advances the shelter, the experimental tests conducted have been carried out for the betterment of mankind. Many scientists have investigated their potential use in the [illegible] and in others. And being a responsible citizen of the world is to support [illegible] concerned for survival. Only then may [illegible] that power to get real protest or demonstration produce. [illegible] such a strong and [illegible] stop in the positive direction?

EARLY BEGINNINGS

Historically speaking, the development of the present Graduate College spans a number of years. In the University catalog of 1870-71, mention is made of "resident graduates" and "post graduate resident students" first appears in 1888. As far as it can be determined, the first earned degree was a Master of Arts in 1875, while the first Doctor of Philosophy degree was awarded in 1906.

Bryant To Go West

A professor in the college of Medicine will conduct three research seminars at western universities during the next month.

John H. Bryant, assistant professor of experimental medicine, will give research seminars at the University of Arizona, in the Department of Medicine at the University of Washington, and at the University of British Columbia in Vancouver.

While on the West Coast, Dr. Bryant will attend a meeting of the American Physiological Society in Los Angeles, and will visit the experimental laboratories of Stanford University's Department of Medicine.

Annual Meeting Of Land Grant Colleges Held

Saturday, November 4, the annual meeting of the American Association of Land-Grant Colleges and State Universities was held in Kansas City. This group includes some 68 colleges, accommodating some 1,200,000 students -- almost 25% of all the college students in the United States. The meeting takes in a wide range of subjects including rural and the curricula of the colleges, with special emphasis placed upon the Land Grant aspects of the colleges such as agriculture.

The meeting is attended by the presidents of the represented colleges. President Lyle is of the opinion that the conference was especially interesting this fall. One reason this year due to the fact that it is the centennial of the signing of the Morrill Act that was responsible for the establishment of the Land Grant colleges.

"In an anniversary like this one, an association such as this has the choice of either looking back or looking ahead. The Land Grant colleges have chosen the more difficult course of looking forward, basing their plans not on the solid foundation of past facts but on faith in the future, faith in democracy, and faith in education".

It was generally agreed that this Centennial meeting had been very productive and beneficial...

PROFESSORES

(continued from page five)

[illegible] that will [illegible] present, church or family. [illegible]. Great works of art [illegible]. Milton's *Comus* [illegible] and Pascals.

[illegible] the Jews [illegible] the blare of Joshua [illegible] the prophets of the suffering servant, to [illegible] the arrogant Pharaoh and Sennacherib - [illegible] war chariots. The primitive Christians refused [illegible] their expansive power, withheld [illegible] the emperor if he transferred their allegiance [illegible] confessed them, [illegible] just was the only kind Christ [illegible] part in [illegible] expected to take part in [illegible] political [illegible] Christian pacifism, [illegible] Christian [illegible].

AUTHENTIC [illegible] -NICHE LAMSMANSHIP

These, I believe, are [illegible] the medieval [illegible] the path it was wrong. I want to emphasize the efficiency [illegible] the sense of genuine gentleness, because our generation [illegible], the ability of responsible [illegible] withdrawal [illegible] which, creative in itself, will [illegible] and the transportation of the temple, [illegible] the Maccabees, [illegible] who for [illegible] against its false gods. Jesus [illegible], according to John XVI, 7: "It is to your advantage that [illegible] for if I do not go away, the Counselor will not come to [illegible] I will send him to you." His followers began to understand [illegible] St. Bernard could not escape by withdrawal to a Cistercian [illegible] was "the unowned hope," as our freshman history [illegible]. Neither does the dedicated student or teacher withdraw [illegible] ivory tower of the campus, except to learn the [illegible] which gives power to control it.

Statesmanship on the other way -- the way of compromise [illegible] and concession; the Roman tactic; the way of the politician [illegible] Penn learned in the Frecton when he wrestled with the [illegible] state making and maintenance, [illegible] for the independence [illegible] in Bushell's Case, and crafted a proposal for the peace [illegible] simple terms. It is the way of getting along with your wife [illegible]. Part I of Measure for Measure is a good exposition of both [illegible] statesmanship by a man who chose to stay by the [illegible].

The common ingredient in both is trust, as the common [illegible] of all wars is fear. I [illegible] with the Society of Friends [illegible] something trustworthy in every man. We do not expect [illegible] live up to the trust of whatever worthy, nor does the [illegible] the costs of trusting someone who fails him. But these costs [illegible] the lowest total cost and the highest security in the market, [illegible] applied to a man's level of maturity, that converted library [illegible] to open stacks; expanded the parole and trusty system; developed the daylight, financial credits and modern [illegible] methods. Trust is a well-tried but not foolproof way. It [illegible] values than lives, but so does war.

Pittsburgh Symphony Orchestra Disappoints Listeners

by [illegible]

[illegible] Monday evening, November [illegible] the Pittsburgh Symphony [illegible] under the direction of [illegible] Steinberg and with the [illegible] pianist [illegible], gave [illegible] performance of Haydn and [illegible] programs such as this one [illegible] which make the reviewer wonder [illegible] whether [illegible] were [illegible] from the Lord [illegible] getting together, or [illegible] whether it comes from the well [illegible] rehearsed, meaning to fight; for, [illegible] although the fundamentals are [illegible] of the remaining little notes [illegible] must be questioned, the performance [illegible] left much to be desired. The orchestra [illegible] a little bit of "getting together" to play [illegible] started, but then "fought" the music itself.

It is taught with many American orchestras to play as an exercise [illegible] music written before the time of Beethoven, and the Pittsburgh group has just this with the Haydn "Oxford" Symphony. It was as if they went out of their way to make the music as cold and as utterly dull as possible. If this were the only Haydn performance that I had ever heard, I should say that Haydn was a plumber; however, I have heard Haydn when it was buoyant, gay, charming, and delightful, so it would seem that one could not in fairness blame the composer for the sounds of Monday night. Had the string section been cut in half for his piece, the results would have been better, but only proper insight into the art of Haydn could have made it a valid musical experience.

With the Haydn, the reviewer frankly expected that this would happen, but he was quite surprised that much the same thing happened with the Tschaikovsky *Fifth Symphony*. The orchestra loosened up a bit here, but the fire and abandon that are necessary to bring the work off were never approached.

The orchestra played by far its best in the Rene Leibowitz *Overture*, a nicely, constructed work which probably looks better on manuscript paper than it sounds in a concert hall. During the piece some of the brass section walked off the stage to the stairwell, where they played for a time and then rejoined the orchestra with very guilty smiles on their faces. Perhaps one of them had told a joke, or perhaps the joke was on us.

All of this is not to say that the Pittsburgh Symphony is not a good orchestra, but it is certainly not a great orchestra. Not that every orchestra has to be great, but one cannot help but feel that, with the obvious amount of talent that it has, this could be a great orchestra. A new conductor may well do the trick. All in all, the concert brought to mind the Shakespeare play where the court says, "The music, ho!", and Cleopatra replies, "Let it [illegible], let's to billiards."

(continued from page five)

that the United States is keeping its militia at the ready [illegible] of such organizations as NATO, SEATO, and the OAS. In the [illegible] country is combating its foe daily on every battlefield [illegible] The audience learns that there is no guarantee that some [illegible] who envisions himself an "enlightened despot" will not [illegible] and force the world into an all-out nuclear war. At this point [illegible] occur. Someone makes the following statement: "This [illegible] bility but highly improbable. Today, with our sophisticated [illegible] munications system, with super-sonic jets, and with [illegible] lances, our world is very small. The reprisals would be [illegible] to even consider this method of attaining power. Think, what [illegible] fought? To gain land for their resources; to provide for [illegible] ing population; to bolster failing economy; to attain colonial [illegible] needs a war for none of these. Her land area is ample; her [illegible] are more than sufficient; her economy is growing at a pr[illegible] and her land-holdings are swelling with each year. [illegible] economy is based primarily on her war machine, it is [illegible] Her gross national product is considerably lower than [illegible] continues to grow annually. Why then, after all this, Civil [illegible]

Education continues spontaneously and with results as [illegible] answer to this last question is stated: "We must be prepared [illegible] highly improbable but yet, possible "enlightened despot". [illegible] be prepared to cope with a nuclear war if it should ever [illegible] question is not whether or not war will occur but rather [illegible] should" occur will we be prepared for it? All life is [illegible] the game of chance. We buy insurance policies 'just in [illegible] should' concern ourselves with Civil Defense 'just in case' [illegible] tion continues spontaneously and with results.

As a result of several students at a bull-session a [illegible] students have been learning, thinking, discussing.

Every individual should be made aware of Civil Defense [illegible] government's responsibility to educate the masses without [illegible] hysteria. It is our responsibility as citizens and students [illegible] facts, demand the facts, discuss the facts and their implications [illegible] must not remain complacent, nor must we advocate [illegible] of bomb shelters until we know these facts and their implications [illegible] must be alert, prepared and understand the situation. Civil [illegible] education continues spontaneously and with results.

Berlin Lane Series Called "A Rare Musical Experience"

[illegible] Evening, November [illegible] Lane Blue Series [illegible] privileged to share [illegible]ful, and very pre[illegible] musical experience [illegible]ber. The Berlin [illegible]rchestra, under the [illegible]r. Karl Ebehns, per[illegible]formed *orations on a* [illegible] the [illegible] [illegible], and th[illegible] [illegible]. [illegible] - and then only pos[illegible] reviewer had the [illegible] of a Shakespeare, he [illegible] to give those who [illegible] the concert a hint [illegible] like. For those who [illegible], this review is just so [illegible]ink, for they know [illegible]perience it was. Who [illegible] that a Schumann [illegible]d be so impressive? [illegible]fter hearing perform[illegible] performance of the [illegible], would believe that [illegible] hear a performance of [illegible] them feel that they [illegible] the work for the first [illegible] this is what happened. [illegible]ls of some of the finest [illegible] in the Continent, under [illegible] great conductors of the [illegible] the products of a musical [illegible] that has its roots cen[illegible]r Bach, artists with a [illegible] reproach and a sen[illegible] a love for music that [illegible]

Last Wednesday evening, November 15, the Lane Blue Series was privileged to present a beautiful, and very precious musical experience to all those who attended. The Berlin Philharmonic Orchestra, under the direction of Dr. Karl Ebehns, performed *Variations on a Theme of Haydn* by Brahms, and the Symphony No. 4 in E Minor, and then only possibly a reviewer had the command of a Shakespeare, he would like to give those who were at the concert a hint of what it was like. For those who were not present, this review is just so much drivel, for they know not what an experience it was. Who would believe that a Schumann Symphony could be so impressive? Only after hearing performers of the caliber of the Berlin Philharmonic perform a performance of the Brahms Symphony, would believe that they could hear a performance of such magnitude. It made them feel that they were hearing the work for the first time. And this is what happened. The Berlin Philharmonic is one of some of the finest orchestras in the Continent, under the baton of great conductors of the past. They are the products of a musical tradition that has its roots centered in Bach, artists with a conscience reproach and a sensitivity and a love for music that is nothing short of [illegible]

Wednesday evening was a rare musical experience. Although [illegible] is still waiting for [illegible] number one of the [illegible] he can present the [illegible] Berlin Philharmonic.

The Brahms was wonderful. It is thought necessary to mention that I like especially. The performance of the Symphony was [illegible] forget all of the shortcomings of this work. The Brahms was [illegible] maintained to the last and the results were glorious. I felt that was in the room, all around [illegible] one hear a wonderful [illegible] consistent [illegible] These people are not virtuosi, they are artists. "A virtuoso is only a savage among musicians," as Widor used to say.

What a previous gift the Lane endowment is, that it brings us a performance such as this. The only thing more that could perhaps be asked is that the money were used to bring more events of the high quality of this one.

This reviewer has grumbled so much and so many times about the behavior of audiences that he is duty-bound to give credit where it is due this time. The concert manners of the audience on Wednesday evening were excellent and their enthusiasm quite rewarding. Perhaps they too were touched by this sound of greatness.

Dr. Nygreen To Speak To UVM Men

[illegible] Nygreen, National Executive Secretary of the National Interfraternity Conference, will present a program [illegible] Thursday, November 30 at the Inn, Lane Major Room at 6:30 P.M. Dinner will follow. The subject will be [illegible] will attend [illegible] and [illegible] it is [illegible] invited.

Dr. Nygreen, a graduate of Kent State University, is a member of Phi Delta Theta fraternity. He is also associated with several groups in the fraternity field. He is a member of the National Interfraternity Conference and is the [illegible] Veteran's Administration Contact for the Midwest, a member of the National Executive Board of Alpha Phi Omega, national service fraternity, and is the [illegible] Alpha Epsilon Pi. Dr. Nygreen is also the National Vice-President of the Supreme Council.

In professional activities, Dr. Nygreen has held many positions of responsibility in organizations of fellow personnel administrators. These include the National Association of Student Personnel Administrators, American College Personnel Association, of which he is past president. His experience as a speaker qualifies Dr. Nygreen to speak on the topic he has chosen.

All freshmen interested in rushing must attend an orientation meeting for formal rushing. All fraternity men are requested to attend, as the program will be for the benefit of the fraternities. It is also open to the public, for those who are interested.

Letters To The Editor

(continued from page four)

[illegible] that you now have many [illegible]es? Some of these you [illegible]er only a smiling "Howdy, [illegible]" as you pass them in the [illegible]. Others have become your [illegible]losom buddies. We believe [illegible] is possible most people [illegible] be pleased to know chap[illegible]s too. If this proposes new [illegible]ship fitted only the lower [illegible] of the above scale, that [illegible] be fine with us.

[illegible] all we offer is that few [illegible] precepts be followed:

1. [illegible]eers and social chairmen [illegible]troduce themselves to these [illegible] guests at some time dur[illegible] the evening, pass a few [illegible]rds and go on and enjoy [illegible]r evening. In addition, a [illegible] other brothers might be [illegible]rsed ahead of time in [illegible] pleasures of student-fac[illegible] banter.
2. [illegible] brother should have the [illegible]sponsibility for making us [illegible]fortable, a chair to sit on [illegible] will not be usurped by [illegible]lthy young marathon [illegible]ers, a place out of that cold blast every time the door opens, possibly a cup of coffee toward the end of the tour of duty; an offer to reimburse babysitting costs, if any.
3. The critical point in the evening is how you demonstrate your respect for us. We all know there are some University rules. Whether or not we like these rules is another matter. When you pointedly show us you can disregard them we are embarrassed for you. When you violate these basic rules we see that all the "thank you for comings" and other pleasantries are at least insincere. Our decision then is to follow our bylaws and cease accepting invitations to chaperone.

The system does not have to work as it has so often in the past. We believe that students and faculty can chat together, get to know each other a little better, and be pleased with the outcome.

Respectfull submitted,
Name Withheld
Secretary

MUSIC DEPT. TO PRESENT CONCERT

The UVM Department of Music will present the Choir in its annual Christmas Concert in Ira Allen Chapel at 4:00 P.M. Sunday, December 17. The 65-voice choir will be accompanied by the 35-player UVM Orchestra in two Christmas cantatas featuring [illegible] soloists. Prof. Francis Wenzel will conduct "Jesu, Joy of Man's Desiring" by Bach and Prof. Ligtal will conduct a new "Magnificat" by the contemporary American composer Alan Hovhaness.

A carillon and organ presentation will precede the concert beginning at 3:30 P.M. Following the Concert the traditional Round Hearth Buffet will be served at $1.50 in Waterman Cafeteria. Community carol singing will follow the Buffet in the main lobby of the Waterman building. [illegible] to attend the concert is [illegible]

cademic Calendar Again Under Discussion

No School In September

...calendar which would ... ter finals.

...arly in October has ... by the Dean of ... man S. Rowell. ... the University Se- ...endar would be effect- ... in 1963.

... of the proposed cal- ...

...endar would normally ... less than 82 days in ...ester and a total of 166 ...r.

...st semester would begin ... October at such a time ... as 14 weeks of classes, ... or 10 weeks of classes ... the week in which Christmas ...r.

... days recess (excluding ... would be allowed for ... vacation.

... fourteen days would be allow- ... winter recess.

... or five weeks of classes ... provided between the ... recess and the first semes-

6. One day recess would be allowed between the last day of classes and the first day of examinations in the first semester.

7. Nine days would be provided for examinations at each semester.

8. The examination period for the first semester would be followed by eight days allotted to intersemester recess, Mare Walk, and second semester registration.

9. Six days would be allotted for the spring recess which would begin on the seventh Monday following the beginning of the second semester.

10. Final examinations in the second semester would end on a Wednesday but no courses with predominantly senior enrollment should be scheduled for examinations the last day.

11. Graduation will normally fall on the third Sunday in June, occasionally on the fourth Sunday.

Students Support Education And Culture Through Ratification Of Constitution

Weighted Voting System To Be Used

...November 29 saw eighteen per- ...cent of the student body cast the ...New Constitution for Student Gov- ...ernment at the University of Ver- ...mont. Five hundred forty-six vot- ...ed for the constitution while seven- ...ty students voted against. The ...document will be presented to the ...Board of Trustees December 9 for ...approval.

The preface to the constitution, ...written by Dr. John T. Dorsey, states ...that Student Government should pro- ...mote student interest in academic ...excellence and stimulate awareness ...and support for the educational ...purposes of the institution; 2. sponsor, develop, ...approve and evaluate student activities ...which contribute to the educational experience of the students; 3. support an all-encompassing ...social and cultural program which ...will provide for the interests and ...needs of the student body.

Furthermore, the Student Government will serve the student body as its communicative link in the expression of student opinion. In meeting this responsibility the Student Government organization may ...inquire into and report on ...

...to the University ...

MAJOR CHANGE

The manner of student representation is drastically changed. There will be one Senator for each so-called representative from each residence building, e.g. fraternities, sororities and dormitories. Each Senator will have one vote for every one hundred students represented in a segment of population. The mean number is arrived at by adding the sum of all living units having no more than fifty students and having by the number of residences. Senators for the larger residences will have one vote per mean number within the population segment.

Non-resident students will have three Senators at large.

Educational Television For Vermont Feasible

Educational television for Vermont -- "with reasonable expectance for coverage of 97 percent of the State's population" -- is technically feasible, according to a report presented to the engineering firm of Lohnes and Culver, Washington, D.C.

The engineering report is the first of five parts of a study being made under a $25,000 Ford Foundation grant to the University looking toward establishment of an educational television facility for the State of Vermont.

The Lohnes & Culver report recommends a four channel UHF broadcast frequency system, at an estimated five-phase cost of $3,750,000, with high power transmitters at Mount Mansfield and at Camp Johnson near Colchester and at least four translators -- possibly more -- to amplify and retransmit the signal from the ETV ...

The valley area from Bennington to Manchester would require three translators, according to the report, at Equinox Mountain, Mt. ...

...cation, and at Brandon. The Brattleboro region would require a translator east of Brattleboro.

Roger Peterson, who made the Lohnes & Culver report, says that it was possible that additional translators would prove necessary to obtain the ETV goal of "shadow ...ground" and be considered Vermont's responsibility, but said that ...present translator locations ... adequate television reception.

Present at the conference were representatives of Champlain College, Bennington College, Castleton College, Middlebury College, Goddard College, St. Michael's College, Norwich University and Vermont Commission on Educational Television, the representatives of the State Department of Education and the Agricultural Extension Service.

...representative of the Vermont Commission on Educational Television, the representatives of the State Department of Education and the Agricultural Extension Service.

...representative of Vermont ... WCAX, WJEB, WSYE, WCAX and the Eastern Broadcasting Network, had the opportunity to comment. Only two state stations, possibly three now in progress in Vermont.

The report recommends that the proposed Vermont ETV station be placed on the Eastern educational network which would connect Vermont through the cities of ETV stations now on the air in Boston, Manchester, N.H., Augusta, Me., Providence, R.I., Burlington, Vt., all stations connected to Albany, N.Y., New York City and Hartford, Conn.

The report recommends that the licensing agency go on the air with stations at Burlington with provision for future stations at other points throughout Vermont.

...proposed use of Channel 16, now reserved for the use of educators at Burlington, and of UHF Channels 26, 30 and 49, all currently unreserved.

Channel 30 is assigned to St. Johnsbury, Channel 49 to Brattleboro. Channel 26 is currently assigned to Hanover, N.H., and Lohnes & Culver recommend that Vermont work with New Hampshire to obtain educational television privileges to develop use of the channel.

...report, pursuant to the Federal Communications Commission's request for proposed reservation of the three non-commercial channels is currently recommended by the report, and UVT Prof. William J. Lewis, Director of the Bureau of Information & ITV services, indicated the University's Board of Trustees would be unable to make the required ... the ETV for broadcasting at the channels for the early educational ...

Prof. Lewis said that negotiations may ...report would be released in terms of ...recommendations made as a result of the report. Recommendations, the report said, would be subject to ...ing from the state legislature and are expected to be completed by ... 31, 1962.

...Lohnes & Culver report will be ... recommendations concerning ... organization, especially the ... percentage of time to be ... by Vermont and for broadcasting ... will be ... ETV ...

Student Center Committee Formulates Plans

The Temporary University Board of Bridge student Center was established in the spring of ... ear with a directive from the ... administration to begin work on the development of plans for the Student Center Union. The Board, at present consists of administrators, faculty members of the Senate, two alumni and two representatives of the Central ... Office, Comm., and SGA.

The various student organizations on campus were then asked to submit requests for space and their needs in office, bulletin boards, a list of activities and use of various meeting rooms to be set up. These requests were carefully considered after Mr. Hyde, the architect, had drawn up tentative plans to show the various administration and organizations on the campus with a student center. The final tentative assigning of space was done earlier this fall.

Saturday, December 5, the Board of the Board went to Montpelier, Vt. Here to see the Student Center Building Exhibit there, which is just a year old. It was hoped that by talking with them, some problems could be solved as the center and various events could be seen first hand.

No definite date of completion has been set, but the student body should be aware that there is a committee working on it. Any ideas or suggestions may be submitted to Mrs. Webb, in the Office.

Language Seminars To Be Held This Summer

[illegible] groups, and entering [illegible] select American [illegible] students, will form semi- [illegible] across European cities [illegible] to study the language, [illegible] and civilization of these [illegible] during a nine-week stay. [illegible] for the serious student [illegible] not plan to see all of [illegible] a short summer, Class- [illegible] tries to give him a [illegible] and experience through [illegible] of living in one of the [illegible] cities: Berlin, Munich, [illegible] in Germany; Vienna, Besançon, Grenoble, or [illegible] France; Neuchâtel in Switzerland; Madrid or Santander in [illegible] and Florence, Italy.

Small classes in small sections of six to tex students, each under the supervision of American and [illegible] professors, will deal with the reading of classical and modern [illegible], the daily press, contemporary problems, conversation and composition, pronunciation and grammar. Students will also hear lectures and history and literature [illegible] meet with outstanding personalities. They will have full auditing privileges at the university in each of the selected towns and cities and will participate in all academic [illegible] social activities with German, Austrian, French, Swiss, Spanish, and Italian students.

Members of Classrooms Abroad [illegible] live with private families in [illegible], eat many of their meals with their hosts and share the activities of their sons and daughters. They will have ample opportunities to meet young people from student, religious, and political organizations. Regular attendance at theaters, concerts, and movies as well as visits to museums, laboratories, and factories, with frequent excursions to other points of interest are included in the program. A preparatory course will precede the departure and will follow its successful completion. A six- or seven-week tour of Germany, France, Spanish, or Italian areas, [illegible] most programs [illegible] participants have a chance to remain in Europe for private travel after the program.

"We have found through many years of experience that it is quite possible, even if one does not know a word of the language, to learn more than a year's worth of college German, French, Spanish, or Italian in the course of a summer", said Dr. Hirschbach, Director of Classrooms Abroad, "provided that we get serious and mature students who are willing to mix business with pleasure." Dr. Hirschbach who also heads the German-language groups, teaches at the University of Minnesota. The French, Spanish and Italian groups will be directed by John K. Simon, Robert E. Kelsey, and Mr. and Mrs. Charles Affron, all members of the Romance Languages Department at Yale. Classrooms Abroad, now in its seventh year, has grown from eleven students in 1956 to an anticipated three hundred in 1962. Its former students represent some two hundred American colleges.

Full information can be obtained by writing to Classrooms Abroad, Box 4171 University Station, Minneapolis 14, Minnesota. Campus agent for the program is:

Classrooms Abroad is looking for an agent to represent it on this campus.

Outside Looking In

[illegible] great hope and prospect for this [illegible], but because of the foreign [illegible], but for the reason that a powerful country speaks of democracy and freedom. These two great words of course were not originated from this country but were established, and implemented here.

Whether this part-taking of the US in world affairs is a mere interest, or spreading the seeds of Democracy into the entire world for the sake of competition with another strongest nation, I don't know. But, I think it has been precious in several cases. And so long as the UN is not strong enough to rule and control the external affairs of the countries, it takes two equal and opposite forces to establish the state of equilibrium (fundamentals of mechanics).

But I would like very much to remind readers that one simple regime or idea can not be applied everywhere. This is true both theoretically and practically. Nevertheless, I have always wondered how many pro-Western countries receive foreign aid and given democracy have the people who have let them to choose [illegible] and Government.

In many countries, foreign aid has been [illegible] country, [illegible] these countries by subsidizing the [illegible] and rule the [illegible] ment if it is [illegible] [illegible] can put up a [illegible] [illegible] on another if it [illegible] [illegible] the standards of living. In other [illegible] which this aid [illegible] the internal revenue of the government could be utilized in raising these standards, the good part of the aid has been streamed into Swiss banks and the other part which constitutes the highest percentage of the aid has made incredible achievements in shooting and killing the nationalists and the educated group of these countries [illegible] with their [illegible] puppet governments. In addition, these governments always ask an increase of the aid merely to get wealth, not satisfied, a pro-Western government through executing and [illegible] the educated opposition which automatically are labeled communists. On the other hand foreign aid has brought about two difficulties:

1. Concerning the American taxpayer who feels why should he support the foreign countries, and

SZO Plays Host To Foreign Students

Sunday morning, the Student Zionist Organization, with the aid of Hillel, presented an International Brunch at the Hillel House, 359 College Street. The countries represented were Dahomey, Cameroun, Mali, Kenya, Guinea, Dominican Republic, Iran, and Canada; the representatives are all attending St. Michael's College in Winooski.

The festivities began when all present sat down to a brunch of "Jewish Cuisine" -- lox and bagels, that is. Immediately following all filed into the living room for a discussion on Israeli relations with these countries. The program was introduced by SZO president, Ronnie Parks, and was moderated by Larry Holder. Two noteworthy [illegible] which came up were the very friendly relations between Israel and Iran, and those between Israel and the new nations of Africa. The representatives of the latter countries expressed an extreme appreciation and gratitude for the agricultural exchange program which Israel sponsors. Through this program, Israeli agriculturalists go into Africa and teach the modern methods of irrigation, conservation, reclamation, etc. which are employed in Israel. Many of these countries have problems similar to those of Israel, and therefore the knowledge imparted to them

The Vermont Cynic

The Official Student Newspaper of the University of Vermont

VOL. 79 DECEMBER 7, 1961 NO. 25

Editorial:

New SA Constitution

By the undergraduate students of the University of Vermont, in order to assure responsible self-government, hereby established this Constitution for the Association of Vermont Student Government.

The above quote is the preamble of the new Constitution for Student Government at the University of Vermont. In few words this preamble says much--it simply states that the entire student body established this Constitution will serve the entire student body and furthermore it expounds the fact that the Constitution has been wrought in order that students may assume responsibility and participate in University government.

With the establishment of the Constitution it may be said that Student Government at UVM has entered upon the "New Frontier." This "New Frontier" includes: a system of representation which allows each residence building on campus to have one senator, a club evaluation committee which will constantly assess the educational value of the various clubs at Vermont and finally, a second vice-president which will provide depth of leadership. Furthermore, the new document unifies the campus in that all other governing groups have their responsibilities delegated to them by a central, all-representative Student Senate.

It is easy to see that the Constitution provides an excellent means of allowing Student Government to flourish as it never has at UVM. On the other hand, this whole structure is dependent upon that one very important variable--student interest.

Should students choose to have a creative Student Government it is possible--every means has been made available to them, through the Constitution, to have a working group which is interested in excellence. However, should student interest in good government not prevail it will be a sad sight to see the Constitution hanged by the neck 'til dead--bleary-eyed gripers in the background saying: "We told you so."

Good News

Good news!

Good news for rebels, rabble rousers, and rock throwers. Good news for pranksters, politicans, and practical jokers. Good news for the disgruntled, the dissatisfied, and the dypsomaniacs. In short, good news for about ninety per cent of UVM students.

The United States Supreme Court has upheld a decision that the Constitution requires a hearing before a student may be expelled for misconduct from a tax-supported college!

How lovely! Think of the implications. . .

Scene opens in Dean of Men's Office. Dean is reprimanding a student.

Dean: Now, Ralph, you know you were doing wrong when you threw H_2SO_4 on the housemother, didn't you?

Student: Sure, Dean.

Dean: Stern disciplinary action will have to be taken.

Student: I dig.

Dean: I'm afraid you will have to be expelled from the UVM Family.

Student: Hold on there, Dads. According to a Supreme Court decision of December fourth, 1961, I have the right to a hearing, to know the names of the witnesses against me, a report on the facts, and a chance for defense. And since my old man is the best Constitutional lawyer in Vermont, I figger I can get my rights. Dig?

Dean: Dig. Just bring a note from your mother explaining that you weren't feeling well that day. Damn those Liberal Republicans anyway!

Student: O.K. Pops. I gotta get back to class. Road Courtesy 101, ya know.....

Quickie

Dear Sam,

I thought that fraternity hazing had been abolished, but then what were those Pershing Rifle Cadets doing last weekend?

Your friend,
Ralf

Letters To The Editor

Spirit

What's wrong with UVM as a whole has not been clearly defined to [illegible]. The cause of this is not the disinterest in athletic events and rallies or in student organized events which is the result of it is the overall lack of intellectualism on the campus. The Socratic ideal is commendable for this campus, a few words of praise to explain why this school is a good place to learn and [illegible] UVM is a good school to which all sophomores should be proud of.

The men and women of UVM come to this school for [illegible] of the following: it's near Stowe for skiing, it's far away from home, it's the second college of their choice, Vermonters can get [illegible] some faculty members [illegible] stand up and explain why this school is a good place to learn and why students are here.

Students have got to stand up and declare with authority that students need here at UVM to gain knowledge, not to cheer at a football game. Theology must be a requirement of every single person on campus. No one must be excluded. I suppose [illegible] should and must be the prominent feature of the curriculum. The [illegible]-cultural ing. Neither can politician G. Mennen Williams. We need some philosophers on campus. Not Bertrand Russel or Harry Golden or Fidel Castro, but the UVM proletariat must express its views on life and learning.

Cheering overweight boobs ramming into each other is not school spirit. The competitiveness must be in gaining knowledge. The desire to learn must be initiated by someone. It's the teachers, not the athletes that [illegible] Fanaticism for [illegible] and team rah-rahism.

There are [illegible] on student thought be broken. UVM [illegible] its yoke of [illegible] reactionarism [illegible] sized by the [illegible] compulsory ROTC [illegible] many people [illegible] UVM students, [illegible] Trash Can frat [illegible] rock society [illegible] society members [illegible] omores, but [illegible] student.

Who is going to [illegible] must have pride in [illegible] of Vermont. What [illegible] the society of farmers [illegible] climbers into college [illegible] Until then the University [illegible] mont is not an institution [illegible] learning. It is wasteful [illegible] it is an antithesis of [illegible] Help promote intellectualism [illegible] crush naivete, narrowness [illegible] ignorance,

Robert [illegible]
Intellectual snot and [illegible]
Class [illegible]

It Could Get Worse?

You say that you put a nickel in the candy machine and when you didn't get any candy, you banged the machine and it broke and you have to pay $6.50 to fix it?

You say that your roommate and you just had a pillow fight with feather pillows, and the Dean just came in to inspect the room?

And that's not all that's troubling you?

You say, you went in to make a nice warm shower and the water was ice cold, and it finally got a little warm and you went in, and all of a sudden the water got scorching hot and you jumped back suddenly, slipped and landed on your back?

You say that after all that boiling water you look like a lobster?

You say that after the shower you went into your room to dry off and all of a sudden the shade flew up and there standing outside of the window was a group of sorority girls singing Christmas carols and you're standing there in your birthday suit?

Is that why you're having trouble? There's even more?

You say that you and your roommate are finally going to taste some of the hard cider that took weeks to brew and which has been sitting outside of the window to cool? You're waiting with keen anticipation and then you find that someone stole it?

Is that all that's on your mind?

You say that you can't wait to get home, and the great day finally comes and it's snowing like blazes and the plane is cancelled?

You say that you're all dressed up to go to a party and you're walking down the street and a car zooms by and splashes mud all over your Continental suit?

You say that you sneak your date into her dorm an hour late and that you hear the footsteps of the dorm mother so you try to run like hell but your coat is caught in the front door and she's coming to the door to open it?

That's not all that's troubling you?

You say that hot plates are highly illegal and that yesterday your dorm counselor came in and found you making popcorn on it, and besides reporting you he took all your popcorn?

You say that you stay up very late to study for a big test which you have in the morning and when you wake up you find out that you slept through the test?

You say that you're down at swimming class and someone throws you into the shallow end, but you're told not to worry because the scar won't show very much, and even if it does, it's only 3 inches long?

Is that what's bothering you? Well, cheer up and don't despair. From what we've heard here, things are bound to get worse.

[illegible] reporting herself [illegible] We have disposed of the first seven parts of [illegible] be much more convenient for [illegible] or six page Rule Book will [illegible] To avoid unfair discrepancies from house to house it [illegible] to have specific punishments [illegible] misdemeanors.

[illegible] get together a preliminary [illegible] feels that the suggestions for changes should [illegible] women students, and [illegible] the administration rules [illegible] rules that are directly within the control of the women students are so mixed up now that [illegible] in the duties of the Head Resident.

[illegible] are also various other questions to be raised. Why can't [illegible] elect their own House Presidents? Is there any reason [illegible] with the present system it [illegible] Perhaps deeper friendships might [illegible] Center. See what other schools are doing along this line. [illegible] for amending the By-Laws on page 22 and the "petitions" on page 19 need a little more clarification. [illegible] they should both be stated under Article III where they belong.

The three pages of Peach Cart Rules can certainly be reduced to [illegible]. College women at UVM should not be treated as children. There are almost twelve hundred girls now and there would not be enough "mothers" to go around. There is still some merit to learning the [illegible]. Perhaps the Dean's letter to parents should state that the University is too busy to be a babysitting corporation. There are more important jobs to be done at college. The administration cannot treat the student as a child and expect the faculty to educate her mature as an adult.

In closing, after all the years of griping about compulsory Monday meetings, many philosophical old gals think that these get-together[illegible] give everyone a feeling of unity. It should be pointed out that this is ridiculous, what with one thousand girls sitting quietly in the chapel. Unity is felt in accomplishing something, such as the enthusiastic [illegible] Move!

Most important of all, to young Revolutionists: Don't stop QUESTIONING and never take NO for an answer, without a satisfactory, honest clearly defined answer. Say, WHY?

Lectures Held For Pre-College Students

[illegible] the result of [illegible] members of the staff of the UVM [illegible] and [illegible] the Lt. Adams [illegible]

[illegible] interest [illegible] were shown for 1960-61 that showed that only 1.2 percent of all [illegible] expressing [illegible] were in general [illegible] and that [illegible] the two percent were in [illegible] college, and technology [illegible]

"I wondered what happened to [illegible] to attend a university, he said, "and thought that maybe there was something that could be done to help counteract the interest and prestige of [illegible] sports at the universities. An interesting [illegible] there."

Dr. Little discussed the matter with his staff and [illegible] Johnstone. Then he and Dr. Johnstone, professor of [illegible], approached Dean Southmayd, acting head of the Vermont Department of Education. It was determined [illegible] of the idea of trying to [illegible] interest in the [illegible] and [illegible] to [illegible].

Dr. Johnstone and Little then met with science teachers [illegible] St. Albans. The result is that six lectures are being given this year at St. Albans [illegible] schools [illegible] that area. Schools participating are Bellows Free Academy, Milton, Enosburg Falls, Fairfax, Georgia, Milton parochial, Bellows Free Academy of Fairfax, Fairfax, Brigham Academy, St. Mary's of St. Albans, and St. Joseph's of Swanton.

Lectures are on [illegible] and [illegible] of physics and chemistry to [illegible] and fundamental concepts. Topics that have included "great [illegible] that have changed the world" and "[illegible]" [illegible] that will be [illegible] at night school this [illegible] the problems of [illegible] and the [illegible] of science in [illegible] society.

Two lectures [illegible] were given by [illegible] in the field of chemistry.

Among the lecturers [illegible] Kacusen, agricultural biochemistry department; Fred Taylor and [illegible], of botany; Boyd Post, assistant research [illegible]; William R. [illegible], chairman of the department of [illegible], and [illegible] physics, [illegible].

The [illegible] next year. A [illegible] with the high schools, and a [illegible] program [illegible] rather than [illegible].

[illegible] St. Albans, [illegible] the College of Agriculture and [illegible] Professor [illegible] and [illegible] a [illegible] [illegible] [illegible].

PROFESSORES

[illegible] Dissatisfied and [illegible] [illegible] the difficulty of the exam, the [illegible] of the teacher, and most [illegible] all [illegible] [illegible] grade. Students want [illegible] but below, [illegible] that the exam graders will be rather "peeved" or [illegible] if [illegible] to [illegible] the painful search for partial [illegible] points [illegible] [illegible] of the grade. These [illegible] and there [illegible] [illegible] [illegible] [illegible] as expressions of the teacher's viewpoints about exams.

[illegible] [illegible] as a [illegible] [illegible] [illegible] reward the [illegible] student for [illegible] of the [illegible] attendance and [illegible] attitude. This student [illegible] [illegible] the [illegible] of reward [illegible] [illegible] [illegible] [illegible]

New Dorms To Have Public Inspection This Month

At 1 pm today of the new Mens [illegible] there will be [illegible] members of [illegible] and guests. All students are invited and urged to come and see the facilities of the two dorms.

In addition to some faculty members, many city officials, residents of the Burlington area, and people in the educational circles have been invited. Saga Food Service will provide the refreshments.

The new mens dorms will have 192 double rooms and 24 single rooms. In each wing there will be rooms for the floor counselors. [illegible] are study rooms and small lounges. The rooms themselves are twelve feet by sixteen feet and have twin beds, separate dressers and closets and desks and bookshelves. The dorms will house 429 [illegible] and 4 ? without the counselors and head resident.

On the ground floor of the dorm is a large recreational area with facilities for ping-pong and other sports. There are also two TV rooms and the dining room, seating approximately 350 people on one floor.

The main floor has a large lounge and a library area. There is also a kitchenette which can be used for different functions. There will also be an area on this floor with vending machines of all types.

Another feature of the new dorms is a sound system (PA system). There are also possibilities that music can be piped in through this system to different parts of the dorm, e.g. the lounge or dining room.

Women will be allowed into the public areas of the dorm during specified visiting hours and during social functions.

Hofstra

Hempstead, N.Y. - (I.P.) - That it is possible to accelerate the first two years of a college program and still retain quality of education was affirmed recently in an evaluation of The New College, experimental branch of Hofstra College. The report was prepared by Dr. Jack T. Johnson, provost.

Of the 81 students who were enrolled in September, 1960, 72 completed the first forty weeks; two withdrew, and seven were transferred to Hofstra at mid-year. During the first 40 weeks, each student took a morning course called "Introduction to Science and the Humanities," taught in sequence by six teaching fellows who are specialists in English literature, mathematics, chemistry, fine arts, philosophy, and social science.

In the afternoon each student elected a course in one of the six disciplines. Students were required to be on campus from 8:30 AM to 4 PM, four days a week, devoting time outside the regular classes to seminars, group discussions, and independent study.

Intensive summer courses were offered in three foreign languages, biology, and psychology. Only 47 of the 72 students took some form of summer study, and 12 of these ended the calendar year with 58 to 60 credits, equivalent to the junior year in college. Forty-six students earned 45 to 57 credits and may be considered upper sophomores. the remaining 14 varied from 24 to 44 hours of credit.

To test the validity of the curriculum, a control group was selected from the Hofstra freshman class. The New College students and the control group were given tests, prepared by the Educational Testing Service, both at the beginning and end of the year. According to Dr. Johnson, the only significant difference in their grades was that New College students were noticeably superior in the area of humanities.

A number of innovations in the first year of the experiment included: taping of every morning lecture, with the tapes available to students for review; instead of a formal course in English composition, one week of intensive review of the beginning of the year, followed by required weekly essays in each subject studied; numerous field trips relating to study, such as visiting the Phoenix Theater to see "Hamlet" when that play was being studied; and considerable emphasis on the use of adio-visual aids. The term reports of the art students, for example, were taped, with the students reading their essays and illustrating them with appropriate slides.

During its second year, now underway with 80 students enrolled, The New College will experiment with "programmed learning" on a modest scale in English, mathematics and science; will try to further improve the young students' independent study habits; and will continue emphasis on the interrelationships of knowledge through the encompassing morning course.

Wisconson

...the classroom before long. A Uni... ...psychology, Karl U. Smith, con... ...tends that audiovisumatic teaching ... and research.

... control unit. The device works this way: It gives an illustrated lecture, with slides automatically presented at the proper times, and also asks questions which must be answered correctly by the student before it continues its course.

It directs the student to write an answer to a short essay question. The correct answer later is summarized by the machine which he finishes writing and has answer sheet punched for a second question. The feedback of information about the correctness of answers is processed by using the contact between the stylus in the hands of the student and "marked" areas of the answer key.

Every phase of the teaching function except spontaneous give-and-take between lecturer and class members can be used to record such an exchange and play it back to the individual student or class.

According to Dr. Smith, "this is a new concept at all levels of teaching--in individualized tutoring, quiz sections, discussion groups and formal lectures. As a method of automation of teaching functions, it can be used by a teacher or in a teaching center. It also provides the essential tools for a lecture review. Its special tutoring function makes it a big step forward.

"The methods and machines of audiovisumatic teaching are probably of greatest value in providing techniques of comprehensive scientific control of all dimensions of teaching for future research studies."

U.of Miami

Alcoholic beverages will no longer be served at the University of Miami fraternity social functions, for the Interfraternity Council has abolished the serving of liquor in a 19-5 vote.

The IFC also added an 8 point statement of General Principles and Ethics to the Code of Practices on Alcoholic Beverages. Thus, after 35 years of drinking, Miami is now officially a "dry campus."

This new ruling gives the responsibility of enforcing the Code to the IFC Social Standards Committee and not to the Administration. In carrying out this new ruling, this committee will check all parties and will rule on all violations unless the University takes action first.

The new ruling will relax the strain of enforcing the Code within the individual fraternities, removing some responsibility from the house masters.

Another advantage pointed out was that there would be no temptation to drink for those students under 21. But those who had voted down the new ruling argued that well-organized groups would experience no difficulty in enforcing the original code as handed down by the administration.

The seven points remaining in the new IFC policy serve to strengthen points expressed in the original Code.

Miami

...Stuart Myers, Assistant Dean of Men, said the new amendment was the best thing that could happen to the fraternity system.

What especially pleases Myers is the idea that the IFC stated the ruling on its own initiative and assumed the responsibilities of enforcing it.

"HAPPINESS CAN'T BUY MONEY"

I have asked the makers of Marlboro to underwrite my aggressive prospecting activities at the same time wanting to be thought well of by prospective purchasers and those who do not, however, think that continual great heartedness especially evident to all who have ever enjoyed the hospitality of Dear Wayne. I refer of course to Marlboro Cigarettes, a smoke well-laced with such prime tasty and tipped with just the right drawing filter that flavor-cravers grow misty when I think upon it. I have asked I say the makers of Marlboro that aggressive if shrewd but kindly salesperson that cluster of beauty and brains together by the pricht motive and an overpowering determination to promote a cigarette known throughout the country as pleasing. I have asked I say the makers of Marlboro a perfect pleasing. I have asked I say the makers of Marlboro a perfect I might use today's column to take up the controversial question Should a good sport expense on a date?

Yes" said the makers simply We all look I said they and squeezed each other's shoulders and exchanged brave smiles and it our eyes were a trifle moist who can blame us?

To the topic then Should a good sport expense on a date? I think I can best answer the question by citing the following typical case

Poseidon Nebenzal a student at Oklahoma A and M majoring in Ethics and Hollow Tell wildly in love with Mary Ellen Lungo a flax weaving major at the same school He knew he had

"Oh, foolish rester! Why have you not told me before?"

reason to believe from Mary Ellen's subdelog glances and maidenly blushes was not entirely unrequited and so one day he mustered up enough courage to ask her the all important question Will you wear my I H pin?

"Yes," she said simply They shook hands then and squeezed each other's shoulders and exchanged brave smiles and if their eyes were a trifle moist who can blame them?

For a time things went swimmingly Every dance Mary Ellen attended was a real gas and accustomed to costly pleasure Poseidon was being poor and he quickly ran out of money Unable to take Mary Ellen to the posh places he favored and too proud to tell her the reason he turned surly and left of suddenly Soon their romance so promising at the beginning was headed for a breakup But at the last moment Poseidon managed to blurt out the truth

"I adored spending" cried Mary Ellen grappling him close "Or proud I abandoned" "Or foolish rester" Why have you not told me before" I have plenty of money and I will contribute according to my means

Poseidon, of course protested but the female persuaded him of the wisdom of her course From then on they split expenses according to their means Rather than a formal "Dutch treat" or "I'll pay it pride a joint bank account was set up to which they went in turns to make deposits Into the account each week they put \$15 deposited their respective allowances \$5 cents from Poseidon \$2.50 from Mary Ellen

And it worked fine Days were happy truly happy And when in June they graduated they had a nice little nest egg eight million dollars with which to furnish a lovely apartment in Lubbock Texas where today they operate the local laundromat

So you see? You too can salvage your fading romance if you will only adopt a healthy attitude toward money

• • •

Lucre is no obstacle when it comes to popular priced Marlboro, or to Marlboro's popularly priced partner in pleasure—the unfiltered, king size Philip Morris Commander. Get aboard. You'll find long enjoyment for short money.

Debaters Successful In Intercollegiate Competition Across The Country

Hard work and extra practice sessions for the University of Vermont debate team, as two groups in a concerted effort brought home a "W" win, 4 loss record.

Traveling South, to the New York Journal Herald Hall of Fame Tournament were Toni R. Appel and William Libbey (affirmative) and Elaine Zax and Mike Cheaps (negative). This fourth-ranked pair up at N.Y. proved, for the second best win-loss record at the tournament, which was attended by forty colleges.

The affirmative team of Miss Appel and Mr. Libbey beat Manhattan College, Syracuse, Seton Hall, Pittsburgh, North Carolina and Columbia while losing to St. Joseph's.

The negative team of Miss Zax and Mr. Cheaps beat Drew, Queens College, Bucknell, and Fordham, Princeton, while losing to Scranton.

This group was accompanied by Mr. Norman London, coach.

Heading West to the Pittsburgh Cross Examination Debate Tournament were Betsy Lasman and Gus Tornabene (affirmative) and Marilyn VanGraber and Bill Germain (negative).

Miss Lasman and Mr. Tornabene beat teams from Emerson, Oberlin, Iowa, Depauw, and Missouri U., while losing to Michigan and Marq.

Miss VanGraber and Mr. Germain beat teams from the state, Akron, and Georgetown, while losing to the University of Pittsburgh and Colgate. The same team did a demonstration debate against Ohio State on the topic, Resolved: That the various states should lower their drinking age to 18.

The UVM team at 11th record up a 7-3 record and also succeeded in giving the tournament winners (Ohio State) their only loss.

Dr. Robert Huber accompanied the team.

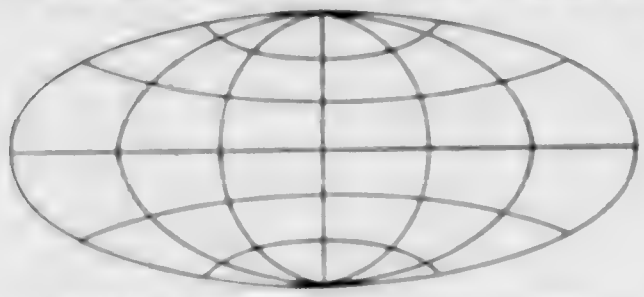
Blundell House To Be Dedicated

The University of Vermont will [illegible] its newly-remodeled [illegible] on Saturday, Dec. 9).

The house, a home management laboratory for seniors in the University's home economics program, will be named to honor the late Alice E. Blundell, who served the home economics program at Vermont from 1918 until her death in 1937.

At UVM, she also served as director of the household management house, and has been hailed in an alumni tribute as "a pioneer in the use of a house in which students live as a means of learning home management."

Following a luncheon Saturday for faculty and [illegible] home economics [illegible] the Blundell House will be dedicated in brief ceremonies at 2:30.



University President Fey will speak.

A tea will follow [illegible] which is located [illegible] Campus.

A native of Ottawa, Blundell graduated from the University in 19[illegible] her M.A. degree [illegible]

At Vermont, she was [illegible] of Phi Kappa Phi [illegible] and of Alpha Gamma [illegible] member of the College Congregational Church.

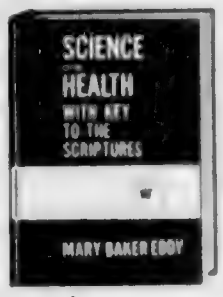
THERE'S CHALLENGE TODAY FOR VIRTUALLY EVERY TECHNICAL TALENT AT PRATT & WHITNEY AIRCRAFT

Almost every scientifically trained man can find stimulating and rewarding career [illegible] within the broad spectrum of Pratt & Whitney Aircraft activities.

From the solid foundation of 36 years as a world leader in flight propulsion systems, P&WA development activities and research investigations today are far ranging. In addition to continuing and concentrated development effort on air breathing and rocket [illegible] new and exciting avenues are being explored in every field of advanced aerospace, marine, and industrial power applications.

The [illegible] ahead is indicated by current programs. Presently, Pratt & Whitney Aircraft is examining the [illegible] areas of technical knowledge in *magnetohydrodynamics* . . . *thermionics* and *thermo-electric conversions* . . . *hypersonic propulsion* . . . *fuel cells* and *nuclear power*.



To [illegible] we continuously seek ambitious young engineers and scientists. Your [illegible] It can be in MECHANICAL ■ AERONAUTICAL ■ ELECTRICAL ■ CHEMICAL and NUCLEAR ENGINEERING ■ PHYSICS ■ CHEMISTRY ■ METALLURGY ■ CERAMICS ■ MATHEMATICS ■ ENGINEERING SCIENCE or APPLIED MECHANICS.

The [illegible] boundless. The challenge grows greater. And a future of recognition and advancement may be here for you.

For further information regarding an engineering career at Pratt & Whitney Aircraft [illegible] your college placement officer or write to Mr. R. P. Azinger, Engineering Department, Pratt & Whitney Aircraft, East Hartford 8, Conn.

THE BELL TELEPHONE COMPANIES SALUTE: BILL PIGOT

Six years ago Bill Pigot graduated from college with an engineering degree. Today he is responsible for the performance of 12 microwave relay stations, numerous communications cables and other equipment. He also supervises the work of some sixty transmission specialists.

Bill Pigot of Pacific Northwest Bell Telephone Company, and the other young engineers like him in Bell Telephone Companies throughout the country, help bring the finest communications service in the world to the homes and businesses of a growing America.

Cats Lose Season's Opener

Richie Ader shoots for two.
(Great. M. Univ.)

[illegible] rebound which put the game on ice but didn't prevent a whirlwind finish. Milt Mason drove through three men to make the count 60-57 with a mere 30 seconds to go. Then, Jack Shabel, atoning for earlier traveling violations, bombed a jump shot through to cut the lead to one point. Fifteen seconds remained. The Larries started working the ball to stall for time when, in his eagerness to [illegible] session, Richie Ader, [illegible] in this contest with [illegible] fouled Grant White. [illegible] remained when White [illegible] line for a one-in-one. [illegible] first shot to make the [illegible] Strassburg grabbed the [illegible] his second shot, but it [illegible] as the clock tolled the [illegible] start for the Cats.

Basketball Coaches In Review

[illegible]

UVM basketball coaches are two of the finest and most experienced in the art of coaching. Without a doubt they have whipped this year's basketball squad into swift well-balanced, hard working teams. They are the persons that make the basketball machine moving. They suffer each defeat and rejoice each win even more than the team itself. A tribute should be paid to these great men.

John C. Evans, head coach of varsity basketball, coach of freshman baseball and freshman football. "Buzz" Evans a graduate of Illinois, where he starred as a big ten halfback. He graduated from big ten halfback. He graduated from Syracuse Law in Canton, Ohio, and taught Physical Education at Medical Dept. in Medina, New York, from 1941 to 1951.

He joined the UVM coaching ranks in '57 and has established a respected reputation with particular success in basketball. In fact the instruction of having coaches was [illegible] present members of the UVM coaching staff, Ralph Lapointe and Norm Strassburg.

[illegible] to become a coach because it is such interesting and challenging work. I have been associated with sports all my life, so it seemed natural to become a coach. I enjoy working with young men.

Ralph Lapointe, Frosh basketball coach, football backfield coach, football and head coach of baseball. A UVM graduate and former star basketball athlete, Mr. Lapointe is in his tenth year as Vermont coach. Prior to coming to UVM as a coach he played major league baseball with the [illegible] and the Yankees.

When asked why he went into coaching he replied, "I enjoy working with young fellows. I love sports.

Hoopsters Compete

The Interfraternity Council basketball tournament began November 27th and will conclude January 13th, 1962. There are four leagues competing in the event. Leagues "A" and "B" are fraternities.

League "A" is made up of: Phi Sigma Delta, Alpha Gamma Rho, Delta Psi, Alpha Tau Omega, Sigma Alpha Epsilon, Theta Chi, Sigma Nu and Lambda Iota. League "B" : Tau Epsilon Phi, Sigma Phi Epsilon, Phi Mu Delta, Acacia, Kappa Sigma, Sigma Phi, Alpha Epsilon Pi and Phi Delta Theta.

Leagues "C" and "D" include all dormatories and independents. League "C" consists of: Buckham A, Converse A, Chittenden A, Wills A, Leftovers and Wildcats. The final league is composed of: Buckham B, South Converse, Chittenden B, Wills B, Ramblers, Rebels and Converse B.

Leagues "A-B" and "C-D" will compete among each other and will determine an all campus champion in a playoff on January 13, 1962. All games begin five minutes past the hour, during the late afternoon and evening and consist of two twenty minute halves. There are no games on the weekend.

Mr. Strassburg, in charge of the tournament, announces the following [illegible]: SP-25, PSI-23; SPE to defeat over SAE; PSE-43, AGR [illegible]; LI-42; KS-42; PMD-[illegible] PSI-43, [illegible]-34, AT[illegible]; AGR B-34, [illegible]; SN-[illegible]; [illegible]-25, [illegible]; [illegible]-46, Wills A-30; [illegible]-44, Converse B-[illegible]; [illegible]-28, Rebels-24; Wills [illegible] over Ramblers.

UVM Approaches 65th Kake Walk

This is a preview of UVM's approaching Kake Walk. Here we two members doing the Kake Walk.

Sign up for
Advanced
Army ROTC...

**And right away,
you'll feel better about
your Military Obligation...**

Because you know, as an officer,

your military service will be a stimulating and rewarding experience. You will enjoy the pay, the prestige, the traditional privileges of an officer . .

your military service can pay off handsomely in later life. For example, ROTC can be tremendously helpful when a man starts his climb up the civilian ladder. Success in the executive areas of business and industry comes earlier and more substantially to the man who can lead. Few are born leaders, but leadership can be learned. And Advanced ROTC is a great place to learn it.

you will be contributing to the limit of your potentialities in one of the biggest jobs we face today . . . you can help keep America so strong the war the whole world dreads need never happen.

During your 2-year Advanced Army ROTC course,

there will be a subsistence allowance of $135. Uniforms and military textbooks are paid for. There is a $117 allowance for your six-week summer camp training, plus travel allowance. And when you re-commissioned, a $300 uniform allowance.

And then, of course, there is the warm sense of accomplishment you will feel in your heart when the gold bars of a Second Lieutenant are pinned on your Army uniform.

VOTE

By Mar[illegible]

Now that [illegible] ratified the [illegible] we must [illegible] that delega[illegible] president of the [illegible] haps one of the [illegible] inclusions in the [illegible] portion dealing w[illegible] officers and re[illegible] Each year we h[illegible] darity Poll" or [illegible] and Queen Contes[illegible] tions are held. I[illegible] to think how m[illegible] uncontended each [illegible] many interested [illegible] rush?

If we want student [illegible] to be more than a [illegible] cussion group the p[illegible] to lead must be capa[illegible] ested. Our new g[illegible] have eight execu[illegible] These include a [illegible] first and second v[illegible] a treasurer, two [illegible] a secretary and a [illegible] It will be the r[illegible] these people to [illegible] plan policies and pr[illegible] the school year. Th[illegible] of the office of s[illegible] president has more [illegible] another title on the [illegible] person's job will be "[illegible] an ex officio chair[illegible] committees of this [illegible] in order to coordinat[illegible] and bring about a g[illegible] ciency among these [illegible] campus organizations. [illegible] words, he will know w[illegible] dent organizations are [illegible] which ones are in nee[illegible] ance from SA and the [illegible] body. Many of the val[illegible] ginations on campus h[illegible] appeared in the past few [illegible] because of lack of organ[illegible] and participation.

For those interested [illegible] coming candidates for th[illegible] executive offices there w[illegible] meeting tomorrow, [illegible] 4 PM in the SA C[illegible] 48 Waterman Bu[illegible]. [illegible] considered for can[illegible] executive office on[illegible] an overall 72 scholast[illegible] or better and presen[illegible] signed by 150 n[illegible] student body. The [illegible] and regulations for [illegible] campaigning will be [illegible] at this meeting. Th[illegible] open to all those [illegible] you wish to be c[illegible] candidacy you, or [illegible] tive acting for you, [illegible] at this meeting.

During the first [illegible] the second semester [illegible] will be held in eve[illegible] on campus to elect [illegible] tives for the Student [illegible] Senate. Every [illegible] sorority and frater[illegible] representatives [illegible] at the living unit. [illegible] be informed of th[illegible] and qualifications. [illegible] elected representat[illegible] office a week after [illegible] this new system al[illegible] student will have t[illegible] and vote in SA Senat[illegible] representative. T[illegible] of these reps will [illegible] according to popula[illegible] will be notified of t[illegible] after second se[illegible] ments are tabulated. [illegible] election of represe[illegible] off campus will ta[illegible]

Each year SA r[illegible] ments that one [illegible] people vote is b[illegible] adequate voting fa[illegible] year we have s[illegible] from the city of [illegible] issue permission t[illegible] voting machines. [illegible] not now vote at [illegible] Board of Alderme[illegible] the voting machines [illegible] will take plac[illegible] room 16.

FINALS are a-comin'

Computing Center Stars In Math; Fails At Love

[illegible] of Vermont's [illegible] is less than a [illegible] already it has made [illegible] felt -- not only with- [illegible] but outside as

[illegible] Center was opened [illegible], UVM was only the [illegible] England institution of [illegible] to possess a com- [illegible]ter; today there are [illegible] installations in 14 other [illegible] universities.

[illegible]er has proven so val- [illegible]ssets in assisting [illegible] projects at UVM that [illegible] the Board of Trustees [illegible]versity approved the [illegible] of the 1620 computing [illegible] from IBM. The Uni- [illegible] rented the equipment [illegible]nce the installation of [illegible].

[illegible]ember the conversion [illegible] to punched cards was [illegible] and was just recently [illegible]. The Center now con- [illegible] 1620 central processing [illegible] room console); a 1622 [illegible] punch unit (attached to [illegible] console); an 836 control [illegible] typewriter (for print- [illegible]ut) and two key punches. [illegible]0 months of its opera- [illegible], Center has been used by [illegible] most departments within [illegible]ersity as an aid in re- [illegible]. The following examples [illegible] to the almost unbelievev- [illegible]nt of time that can be [illegible]ough this electronic [illegible].

[illegible]orge W. Brooks and [illegible]. Weaver, Jr. of the de- [illegible]t of psychiatry used the [illegible] to determine if the selec- [illegible] schizophrenic patients for [illegible]tion could be materially [illegible] by the use of a psy- [illegible]t test battery, administer- [illegible]er more times to more [illegible] patients -- the results [illegible] a variety of ways. It [illegible]ted that it would have [illegible]uired operator one cent- [illegible]t this information using [illegible] calculator. It took [illegible]ter just five hours to [illegible] answer.

[illegible]iam R. Adams and [illegible]d [illegible] of the department of [illegible]ry engaged in a project [illegible]nformation for pre- [illegible]w well northern bar- [illegible]es will grow in a given [illegible]. The analysis of just one [illegible]ssary data required [illegible]ations -- an estimated [illegible] work. The computer [illegible] the same results was [illegible] of programming in 45 [illegible] of actual machine time.

[illegible] of the Center have [illegible] a variety of purposes. [illegible]er and fall the Center [illegible] to help design [illegible] [illegible] other calculators [illegible], with the Interstate [illegible]General Electric [illegible]d settlement before [illegible] connected us with [illegible] of the new Computer [illegible]ber later. The Center [illegible] the Plattsburgh Air-

site base to schedule the con- struction of missile sites around the Plattsburgh area.

The Central Vermont public service Corporation made the Center in connection with cost allocations for the St. Lawrence and Niagra power.

The only problem which the center couldn't solve was a battle with ruggs last summer which found one of the computing consultants leaving to become a housewife.

Vermont Doing Plastics Research For Navy

One of the largest research projects under way at the Uni- versity of Vermont involved the United States Navy, engineers from Larkin and Chadwick, as well as the University.

UVM has a $70,000 contract with the Navy to conduct research in the field of reinforced plastics --ways of strengthening materials without adding to the weight. The present use of and ma- terials would be calculated.

Dr. John C. Ledwater, chair- man of the department of me- chanical engineering which is doing the research, says that the surface hasn't even begun to be scratched yet in uses for rein- forced plastics. "It could be used in boats, lamps, decorative pan- els and seats just to mention a few present possibilities. The material is so strong and light that the future will undoubted- ly see whole airplanes made of it as well as other large objects," he says.

One of the phases of the re- search involves rocket motors, with UVM being one of the few universities using the latest re- search. The basic question is that of how strong materials can be made and what is being sought is tests currently being conducted.

The project is under the di- rection of Dr. Ledwater with four graduate students are plac- ing emphasis. The four are Wayne can Zeltz of Troy, Joseph Mora of Franklin, Lehman Gilbert Cutler of Swanton and Wilbur Seibert of Burlington.

The "team" helped construct a model rocket casing and that the team plans to fire the rocket casing at about the first cost the cost of $ 5 million dollars.

Rocket motors are made of glass filaments which are embed- ded in thermal setting resin. The glass contributes the strength while the plastic holds the mate- rial together.

UVM was originally awarded money for study of reinforced plastics [illegible] Laboratory [illegible]. In addition to the $70,000 [illegible] Naval Research was [illegible] and the total [illegible] of the research $75,000, making [illegible]

VOL. [illegible] [illegible] NO. [illegible]

Editorial:

A Christmas Surprise

[illegible]

Nationals And Locals

[illegible]

The reverend James A. Mulcahey of De Paul University [illegible] the headlines last week when he told the National Interfraternity Congress in Boston that fraternities are private organizations, based on congeniality rather than high principle, and that the current crisis of war, brings administrations to open fraternities to Negroes and Jews as, by implication, an increase of privilege. Most Father Mulcahey's sentiments [illegible] Alpha Delta Pi. It is worth pointing out that what most universities authorities want is not to [illegible] fraternities to accept members they don't like, but to allow them to accept members they do like. Many students in local fraternities and sororities would like to admit friends who are Negroes or Jews. But any 'prohibition' to such national fraternity policies or to local constitutions would be extremely difficult to accept. The removal of these religious and racial bars is not an invasion of privacy but an effort to protect it - by insisting that the next stage of a man's fitness for membership is a responsibility and the students who will be living with him for the next four years, not some remote group of national officers who have never seen nor [illegible]

Quickie

Dear Ian,

I think you were out of [illegible]. Why not apply for an administrative post? I'm sure they can make room for you somewhere.

Girl Watcher's Guide

Presented by Pall Mall Famous Cigarettes

Three views of an average, healthy girl

LESSON 1 - How to recognize a girl

It is not surprising in these days of constantly changing fashion standards that girls are often mistaken for men.

Certain popular items of apparel such as slacks, baggy sweaters and boxy suits contribute to this unfortunate situation. Therefore we suggest that new students of girl watching start with the fundamentals (see above diagram). As you can see girls are easiest to identify from the side. However even the beginner will soon achieve proficiency from front and rear as well.

Advanced students can usually tell a girl from a man at five hundred paces even when both are wearing asbestos firefighting suits. (You might try offering the subject a Pall Mall but you won't prove anything. It's an extremely popular brand with both sexes.)

PIONEERING

Somewhere out there, beyond the realm of man's present understanding, lies an idea. A concept. A truth.

Gradually, as it comes under the concentration of disciplined minds, it will become clear, refined, mastered. This is the lonely art of pioneering.

In the Bell System, pioneering often results in major breakthroughs. Planning the use of satellites as vehicles for world-wide communications is one. Another is the Optical Gas Maser, an invention which may allow a controlled beam of light to carry vast numbers of telephone calls, TV shows, and data messages.

Breakthroughs like these will one day bring exciting new telephone and communications service to you. The responsibility of providing these services will be in the hands of the people who work for your local telephone company. Among them are the engineering, administrative and operations personnel who make your telephone service the finest in the world.

HAROLD GILBAR

ALL- AMERICAN AUSTIN ROSS

A 1937 University of Vermont graduate has been named to the Sports Illustrated Silver Anniversary All-America for 1961.

Austin Holmes Ross of Anchorage, Kentucky, founder and president of his own business, the Austin Construction Co. in Louisville, Kentucky, is one of 25 men named to this year's team. Others include Vince Lombardi, coach of the Green Bay Packers, and Bud Wilkinson, coach of the University of Oklahoma football team.

Ross is the second UVM graduate to be so honored, Dr. Edward Winant, a New York City surgeon, having been named in 1956. Dr. Winant received his B.S. in 1932 and his M.D. in 1936 from the UVM college of Medicine.

A native of Middleburg, Ross was both a superior student and athlete during his undergraduate days at UVM. He played football for three years, serving as co-captain his senior year, also was co-captain of the track team, and won letters in basketball and tennis.

Aside from the athletic field, Ross was just as outstanding. He was a member of Sigma Nu Gold Key, sophomore honorary; president of the Boulder Society, senior men's honorary; Scabbard and Blade, military honorary; was a Dean's List student in civil engineering, and a member of the faculty advisory council.

He was graduated cum laude and was a member of Phi Beta Kappa. He was a co-winner of the Phelps prize in civil engineering for conspicuous merit in professional studies; winner of the Kidder medal for character, leadership and scholarship; took the Dean Wasson prize for scholarship and athletic attainment and was the winner of the Legal Legion saber for military excellence. His classmates voted him as one who had done the most for the University.

Following graduation, he spent three years as a field engineer with the New England Power Co. then entered the Army as a second Lieutenant. He was wounded in France during World War II. When he was discharged, he held the rank of major.

After working in New York for two years, he launched his own business in Louisville, naming it after the famous Kentucky Derby. He described his start as a shoestring venture, "one dump truck and $2,000."

The winners, selected from candidates offered by 60 colleges and universities, will receive their trophies -- in the shape of silver goal posts -- at the National Football Hall of Fame Dinner in New York on Jan. 5. President Kennedy is scheduled to be the keynote speaker.

Lambert, Hendricks, And Ross; Adderley And Duke Ellington To Highlight 65th. Annual Kake Walk

The Famous Duke Ellington.

Julian "Cannonball" Adderley

Dave Lambert, Annie Ross, and Jon Hendricks.

DUKE ELLINGTON AND HIS ORCHESTRA

Perhaps the biggest name in jazz bands, Duke Ellington will appear at the Kake Walk Ball on Thursday evening, February 22.

Duke Ellington and his music and his orchestra have been, from the beginning, a major attraction in this field. As a result, Duke has always been a big box-office attraction. Certainly few jazz bands can claim, as his can, that it has played in every part of the United States, Canada and Europe to every kind of audience, young and old, highbrow and lowbrow, in dance halls and concert halls, in theatres and auditoriums -- and once, in Paris, in a bomb-proof shelter -- and over radio and television. No matter what Duke's repetoire for the occasion, it is sure to be a surprise-filled experience and enjoyment and therefore certain of acclaim.

Born Edward Kennedy Ellington in Washington, D.C., America's foremost composer-bandleader was nicknamed "Duke" at the age of eight by a chum who admired his regal air. After winning a scholarship to Pratt Institute in Brooklyn for his work in art at Washington's Armstrong High School, Duke planned an art career. But he had already begun playing piano and composing, and soon he deserted painting for music. He played all sorts of gigs around Washington and at one time he had several small bands of his own. In 1923, he made the decision of his life to come to New York with a nine-piece band.

Success and recognition came almost immediately here and now, Ellington became known as the creator of a new musical idiom. In Europe, where he scored triumphs in 1933 and 1939, it was said that America's only two original contributions to world culture were Duke Ellington's music and Walt Disney's cartoons. The stamp of his genius was put on American music with such immortal classics as "Black and Tan Fantasy", "Mood Indigo" and "Sophisticated Lady", all composed within a few years after his debut in New York.

After his second European tour, Duke once more ventured onto new paths. This time it was "Jump for Joy", a sprightly and highly original revue which ran for twelve smash weeks in Hollywood. Out of it came such hits as "I Got It Bad And That Ain't Good", a favorite with bands and vocalists everywhere. During the same period Duke introduced -- and has since remained very closely identified with -- "Flamingo", "Perdido" and "Take the 'A' Train", all of which are top standards.

Always seeking new fields to conquer, in 1943 Duke became the first big band leader to "invade" Carnegie Hall setting a fashion which has since seen "jazz" welcomed in longhair surroundings from Newport to the Hollywood Bowl. Every year since then, Duke has returned to Carnegie Hall and premiered a major work. In 1955 it was "Night Creature", a composition which earned the highest compliments from the critics.

Meanwhile the ever-fertile Ellington pen turned out such popular hits as "Don't Get Around Much Anymore", "Do Nothing Till You Hear It From Me" and "It's Beginning to See The Light".

(continued on page two)

THE JULIAN "CANNONBALL" ADDERLEY QUINTET

Sharing the spotlight with Lambert, Hendricks, and Ross at the Kake Walk Jazz Concert will be the Julian "Cannonball" Adderley Quintet. "Cannonball" Adderley is one of the best known names in American jazz today. He has tried many things musically and has been successful in almost all of them.

The reason for Cannonball Adderley's resounding success has been attributed to many things. In the words of Records Inc.'s Orrin Keepnews, "Cannonball in addition to his truly awesome ability as a jazz instrumentalist, possesses one of the most naturally warm, articulate, likeable and appealing personalities of or out of music. It can be heard in his playing and it is there, one feels, in his vast success. And it has also caused him to become a truly amazing magnet among musicians, who are drawn inevitably to the attitudes, likes and dislikes of a fellow musician who is himself a fine musician and a warm human being."

(continued on page two)

LAMBERT, HENDRICKS AND ROSS

The Kake Walk Directors have announced that the Lambert, Hendricks, and Ross Trio will be featured at the Kake Walk Jazz Concert on Friday, February 23.

The well known vocal jazz group has a curious history.

About five years ago, Dave Lambert got together with Jon Hendricks to record for Decca a take-off which Jon had written called "Four Brothers". This was the first meeting of talents which was to develop over the intervening years into the nationally renowned vocal group - Lambert, Hendricks and Ross.

Two years later, Dave started to needle Jon about putting lyrics to some of the well known jazz standards. At first Jon thought Dave was crazy, but after months of persuasion, he finally succumbed to the task. A year and the world was completed and Dave's group began to search for a singer to complete the trio.

In short, this [illegible] the search of the [illegible] persuasion, [illegible] [illegible] [illegible]

ACACIA, SAE, PHI SIG, TEP TO PRESENT SKITS

[illegible] Connecticut Hall [illegible] to present their skits in the Ezra Brown auditorium, right on [illegible] campus. The [illegible], Phi Sigma Delta, and Kappa [illegible] are [illegible] in the annual Kake Walk [illegible] and being a highlight of the winter [illegible].

The skits, [illegible] called shows, are a long-standing tradition at U. V. M. [illegible] to the actual Kake Walking [illegible] each year by members [illegible] fraternities and sororities. [illegible] support and in the midst of [illegible] excitement.

JUDGING

The performances are judged [illegible] faculty members, and alumni [illegible] the group to put [illegible] over-all effect. It will be the usual basis of judgment on originality, unity, [illegible] in short, an all-around [illegible] composite. Perhaps [illegible] should [illegible] Kake Walk [illegible] could [illegible] [illegible] [illegible]

Serving UVM For 79 Years 1883-1962

The Vermont Cynic

VOL. — UNIVERSITY OF VERMONT BURLINGTON, VERMONT FEBRUARY 15, 1962

Chervin;Flashman Lead SA Tickets

Jim Chervin of the Student Action Party.

Jim Flashman of the United Student Party.

This week the students of UVM will have an opportunity to vote for their Student Association candidates.

This election is in a serious vein, instead of choosing a king and queen, this week, UVMers are choosing the officers who will represent their interests next year. The responsibility of these applicants, as stated in the SA Constitution, is that of acting as communicants between the students and officials of this University. Because of the importance attached to this election, the SA asks that each attendant at UVM listen, and vote wisely.

Jim Chervin is running for SA President.

Under the Student Action Party banner he is basing his campaign on his past experience and performance:

President Freshman Class, Soph Key, Chairmen, SA Constitution Revisions Comm. President Sophomore Class, Delegate - conference on World Affairs "Russia and the West", Student Association Parliamentarian, Vice-President, Key and Serpent, Delegate - United States National Student Congress, Air Force ROTC Airman of the Month award, Freshman Orientation-Welcome Committee, General Co-Chairman - Welcome Comm. General Co-Chairman - Homecoming 1961, Outing Club.

Marty Singer is running for the position of SA Vice-President. Marty offers:

SA Council, Chairman S.A. Elections Comm., Chairman S.A. Religious Activities Comm., Vice-President of High School Class, Member of Phi Sigma Delta, Cynic Walk writer, Kake Walk co-director, German Club, etc.

"Based upon our combined two years of student government experience at UVM we feel the following proposals demand immediate action; and these form our platform":

Investigation for improved scheduling of hour exams and labs, foreign job exchange program between European and American students, an annual scholarship to be awarded by a joint student-faculty committee, instituted a greater program dealing with controversial national issues, an active program dealing with Educational Travel etc. of SA, active association with World University Service and the Leon Mandell Foundation, creation of awareness of the "Open Door", and a [illegible] column discussing topics of importance to SA Senate.

"The time is here for SA to assess itself or its existence cannot be justified. The Student Action Party feels that we can make Student Association's values known."

Running under the United Student Party, which is an advocate of the "Reconstruction of the Cynic and SA Budget Program", is Jim Flashman, as their candidate for President of SA, and Al Mintz, as their proposed Vice President. These men feel that through their party, the Cynic will be reconsidered as an unbiased presentation of student opinion, and that the SA budget could be stretched further, and more money allocated to the most important things. "The purpose of SA is to control the cultural and social functions of this campus. Why have there been so few of these functions in the past?"

Jim has offered himself on the basis of these qualifications:

Scope Comm., SA, N.S.A. Chairman, Co-Chairman of Banquet Comm. for Frosh Orientation, Executive Comm. of Frosh Class, Executive Comm. of Soph Class, Assistant Steward of Sigma Nu, Frosh basketball.

Al's contributions are:

IFC Representative, Frosh Orientation Comm. (Finance), Cultural Activities Comm., Co-Director of Frosh Intramural Athletics, Pep Comm., Student Association Evaluation Comm., Member of Alpha Epsilon Pi Fraternity.

Janice Cole is running unopposed for second Vice-President. Janice has been on several committees, as listed below:

Social Chairman of Student Association, '60-'62; Member of class of '64 executive committee, '60-'62; Co-chairman of Greeting Comm., for '60; Freshman representative, Treasurer of Coed-Ette Act, Panhell Representative to Coed-Ette Act.

Cynic senior staff positions for next semester are now open. These positions include:

Editor in Chief; Assistant Editor; Student Affairs News Editor; Feature Editor; Sports Editor; Managing Editor; Business Manager.

Those interested in filling any one of these positions, submit a letter of application to the Editor in Chief, via box 644 Student Union office. Letter must include qualifications and experience and last semesters average.

celamin Committee topics of importance to SA as well.

"The time has come for us to assess itself of its functions and not be afraid. The Student Action Party feels that we can make student government [illegible] as we know it."

Running under the United Student Party, which is in favor of the "Reconstruction of the Constitution and SA Budget Program", is Jim Flashman, as their candidate for President of SA, and Al Mintz, as the proposed Vice-President. These men feel that through their party, the student will be reconstituted as an unbiased presentation of student opinion, and that the SA budget could be stretched further, so more money allocated to the most important things. "The purpose of SA is to control the cultural and social functions of this campus. Why have there been so few of these functions in the past?"

Jim has offered himself on the basis of these qualifications:

Scope Comm., SA, N.S.A. Chairman, Co-Chairman of Banquet Comm. for Lecture Series, Executive Comm. of Frosh Class, Executive Comm. of Soph. Class, Assistant Steward of Sigma Nu, Frosh basketball.

Al's contributions are: IFC Representative, Frosh Orientation Comm., Finance), Cultural Activities Comm., Co-Director of Frosh Intramural Athletics, Pep Comm., Student Association Evaluation Comm., Member of Alpha Epsilon Pi Fraternity.

Janice Cole is running unopposed for present Vice-President. Janice has been in several committees, as Elsie includes:

Social Chairman of Student Association, '60-'62; Member of Class of '64 executive committee, '60-'62; Coeducational Counseling Comm., for '60, Freshman orientation, Treasurer of Freshman Class, Pantheil Representative to Cheerleading.

Senate staff positions for next semester are now open. These positions include:

Editor-in-chief; Associate Editor; Student Life Page Editor; News Editor; Features Editor; Sports Editor; Managing Editor; Business Manager.

Those interested in filling one of these positions, submit a letter of application to the Editor-in-Chief, who will mail you application blanks. Letters must be submitted before the spring semester ends.

Mahoney, Ex-Cosa Named As Director Of Student Center

[illegible] Director. Mr. Mahoney is a graduate of the University of Vermont. He received his B.S. degree in Business Administration in 1950. He was president of the Men's Student Union and worked closely with Kake events in determining the [illegible] for it. Mr. Mahoney also had a great deal of input with the architects about what the students might need at the center.

KW DIRECTOR

Jay Levan, Kake Walk Director and Frosh member, stated when asked how he felt about Mr. Mahoney's return, "We found Mr. Mahoney to be extremely helpful with the Kake Walk [illegible] although he has been employed for several months, his part-time duties seemed to mount. As Director on Mr. Mahoney's part resulted in a loss of almost two hundred dollars to the Kake Walk Committee's account which would have otherwise been [illegible] to student organizations through the Kake Walk Competition Fund. I don't feel that Mr. Mahoney's performance warrants him being rehired in his former capacity."

DEAN OF ADMINISTRATION

Dean of Administration, Lyman A. Powell, who favorably impressed with Mr. Mahoney's previous record at UVM, "I sincerely hope that Mr. Mahoney succeeds there. He has [illegible] here and worked closely with the Student Association in [illegible] the new constitution. I feel [illegible]

DEAN OF WOMEN

Dean of Women, Mrs. Anna Lutkin Burton commented, "I think Mr. Mahoney is a great asset to the University. He [illegible] of this potential will be [illegible]

KING AND QUEEN CANDIDATES NOMINATED FOR 65TH KAKE WALK

...nesday's debate was at 8 ... The public was invited to ...

Representing UVM was the team of Marilyn L. Van Graber and Gilbert M. Tornabene that won seven of nine debates in the Harvard Tournament last week in which 60 teams were entered.

Miss Van Graber, from Burlington, is a senior and president of the Lawrence Debate Club. Last year she and Charles Tornabene garnered a sixth place rating in the nationals. Tornabene graduated last June.

Tornabene hails from Winooski, was the first time that he and Miss Van Graber have debated together this season.

Their opponents were Dan Benson and Don Johnson. Both are seniors and during the first semester of the 1961-62 college year they compiled a won-lost record of 22-6.

Augustana is coached by Martin J. Hekkenl, chairman of the speech department.

Thursday afternoon at 2:15, a UVM team of Betsy Lanham of Burlington and William Germond of Winooski faced an Augustana team of Tom Youngren and Maris Kirsens in a debate at Montpelier High school.

Augustana and Vermont will participate in the Dartmouth College tournament that starts on the evening of Feb. 15 and concludes on the 17th.

The Vermont Cynic

The Official Student Newspaper of the University of Vermont

VOL. 79 [illegible] NO. 23

Editorial:

Our New Director

Arthur G. Mahoney has been chosen for the job of Director of the [illegible] Student Center, and he has accepted the job. The only step left before the appointment becomes official is the approval of UVM's Board of Trustees.

As one can see from the article regarding the appointment, Mr. Mahoney is quite a controversial figure. While the administration is more than satisfied with his possibilities, the student leaders who have worked with him in the past harbor grave doubts about the wisdom of choosing this man for the job.

These student leaders who best knew Mr. Mahoney have said he was "remarkably unfamiliar with University procedures," "did not have the necessary personality to work with students," and "does not seem like a person who is qualified to run the new student center."

Doesn't the administration know how the students felt before they hired Mr. Mahoney? The answer is unfortunately, yes. They knew because the students, upon hearing through rumor, not through the administration) that he was being considered, volunteered their opinions on the subject. These opinions were disregarded. One dean who did not know the ex-COSA was supplied with a list of students and faculty members who had worked with him, and the dean gave assurance that he would speak to those persons. Not one was contacted.

Dean of Administration, Lyman Rowell, set up a temporary governing board of the Student Center consisting of representatives of the students, faculty, and administration. The members were never informed that Mr. Mahoney had been hired or even that he was being considered for the position.

We do not advocate student consultation on the many hirings and firings of the University. We do advocate student consultation when the person is one who will be working so closely with students, and when he is one who has had to deal with them in the past.

We believe that the administration attempted to sneak the new Director past the eyes of the students by keeping secret the plans for hiring him. And unfortunately we believe that the sneak play will probably be successful. By moving quietly and assuring student leaders of their good faith, the administrators have lulled the undergraduates into a trance. But while they may be chuckling over their easy victory, they may find it short lived. In the long run, the other members of the University family will not tolerate such treatment.

Same Old IFC

These past few weeks the fraternities of this campus have been involved in one of the most farcical and humiliating spectacles regarding "interfraternity relations." Charges and countercharges have highlighted efforts to determine the answer to a still unanswered question: What fraternities were "dirty rushing?" It is really a moot question. What is significant, however, is the situation which caused the whole episode to occur.

Aside from the recent trial involving Phi Sigma Delta, there are going to be further investigations. It is not only the fraternities which are on trial, it is the interfraternity Council which is also on trial.

The outcome of rushing has had a great influence on the decisions of fraternities to press charges against other fraternities. These cases must not be allowed to be manipulated through IFC because a few individuals on the board have the interests of their own fraternity in mind. This is not going to be the ultimate purpose of even the existing regulations.

The University-at-large should not be forced to sit idly by to await the decisions of this supposedly immune organization. This is not a hush, hush matter. This is a matter of vital importance to every fraternity and every individual at this University.

IFC has insisted upon its maturity as an organization. They have severely reprimanded their critics in the past. They have accused them of aggravating situations which they themselves "were working so hard to improve." If the IFC is to prove its worth as a necessary affiliation of the fraternities on this campus, they must

Letters To The Editor

Complaint Dept.

To the Editor:

I would like to thank [illegible] for straightening out the topic of school government. It was very well handled, but I had always been under the impression that a school newspaper was just that, a paper with editorial about school news. I was, however, that I was quite wrong.

It appears that the primary role of a school newspaper is to present the philosophical and political views of its editor.

The [illegible] was a fine attempt at presenting the editor's philosophical views about what the United States, or more to the point about what we as students, should do to promote peace. Perhaps I [illegible] the "peace issue" by running up to Nikita Khrushchev, talking to the press, handing out pink and red grass, and begging for peace. At least all that I would accomplish would be to [illegible] and wear a three-inch medal in the middle of my peaceful back. Remember, Mr. [illegible] is to achieve their ends through revelation and subversion. In the words of Mr. Khrushchev: "Coexist, we will bury you!" Strange, but to me, he doesn't sound very peaceful. At the risk of sounding like a reactionary war-hawk, and being trite) "We must fight fire with fire." The only thing the Communists understand is force. We were peaceful in Cuba. We lost it! We acted with peaceful reservations in Hungary, and millions of brave Hungarians lost their chance for freedom. We were quite peaceful when the East Germans put up their infamous wall, and thousands of East Germans lost a chance for freedom. (It might also be interesting to note that the East German suicide rate has increased astronomically since the wall was erected.) However, in Korea, we met the Communists with force, and South Korea is free. We maintain a garrison in West Berlin, and it remains free. And on. . . and. . . and on.

It seems that with the pay checks of university employees appeared certain pamphlets, because these pamphlets supposedly contained information about the negative side of Social Security, Mr. Cider deemed it necessary to devote an editorial to them and their reactionary authors. Really, Mr. Cider, I'm sure that everyone employed at the university in an instructing capacity appreciates your helpful warning, but I really believe they have the intelligence to spot that right-winged propaganda themselves. There happen to be many educators at this school, both Liberal and (it may come as quite a shock) conservative, who can discern the points that the pamphlet tried to bring out, by themselves.

It's very nice of you to let us know that you have liberal views and that you are a Democrat, but recall Mr. Cider, NO ONE CARES EXCEPT YOUR MOMMY.

In short Mr. Cider, who not [illegible] didn't mean to be [illegible] your philosophical and political views out of the [illegible] and use your time to improving the quality of this college newspaper?

Sincerely,
Ben Stanton, 63

Greatful Thanks

[illegible]

Dear Roy,

The Editorial Staff of the Cynic would like to thank you for showing us the errors in our ways. How right you are. A school newspaper should be a paper with information about [illegible] finalization. So [illegible] the Rutland and [illegible] off at Monkton.

[illegible]

Letters

To the Editor:

We have now [illegible] of the year when [illegible] and Fraternities [illegible] each other in [illegible] their membership [illegible] members. It is [illegible] when an individual [illegible] pledge he has a [illegible] loyalty, and pride [illegible]. This feeling of pride [illegible] but it often happens [illegible] individual gets carried away [illegible] it. What happens [illegible] individual's pride [illegible] pressed by printing [illegible] letters of the house [illegible] thing he does or [illegible].

Decals are stuck [illegible] radios, and lamps. [illegible] thing that happens [illegible] individual has to carve, [illegible] or scribble these [illegible] school's desks. Room [illegible] Hall is a good example [illegible]. When the lecture hall was [illegible] every desk was clean [illegible] semester. Towards the [illegible] second semester there were [illegible] few desks which escaped [illegible]. One desk in particular [illegible] the initials of every [illegible] on it, and alongside of [illegible] names were comments written [illegible] by other individuals [illegible] houses.

Science Hall is not the [illegible] building to suffer from this [illegible] of loyalty; almost every [illegible] the school bears such [illegible] only hope that, this year, [illegible] newly initiated pledges will [illegible] frain from marking up [illegible] property. There are better [illegible] of expressing one's [illegible] pride. If everybody [illegible] we could "keep Vermont [illegible] ful".

Sincerely,
Robert E. [illegible]

Letters

To the Editor:

As an advocate of the Innovation Theory, I cannot help but admire the recent advertisement for students by the ROTC Department. Ethical consideration aside, it should be noted that a new technique is now available to all departments in recruiting students. Advise, however, they can do better. For example:

Psychology: "We tailor life styles-formidable role models supplies."

English: "Learn to use English like a good American should."

Classics: "Major in Bacchanalia - the Twist won't last forever."

Economics: ". . . There is the warm sense of accomplishment when you sit on the exchange."

Sociology: "Be wise - socialize - you don't have to be the lonely one in that crowd."

Political Science: "You supply the log cabin - we supply the White House."

These ideals are off the top of my head and are subject to [illegible] your own [illegible]. Why, it was so [illegible] that we hadn't even used a [illegible] last week -- at the [illegible] of your letters. We have seen our [illegible] and now are [illegible] to do something about it.

No longer will our readers be [illegible] at "Peacewatch" with news of the [illegible] editorial opinions. Editorials will now be written by the [illegible] Public Relations Office, and no news will be printed that does not concern us girls, but at college, extracurricular, school spirit, or how this is the best time of our lives so let's make the most of it. These are all safe topics; so we won't have to worry about saving something controversial.

About the Peace issue, Roy, your clever use of figures show how really sharp you are. Thinking of those millions of Hungarians, we realize what a disservice to humanity we really performed. And those suicidal East Germans (you don't have to worry about being trite, Roy) --we shudder to think that the Cynic unwittingly drove them to the gas pipe.

These pamphlets -- Roy, you are right again. We should never have mentioned it. You may rest assured that we will not be guilty of such bad taste again. We'll just mind our own business. (Incidentally, it wasn't a shock at all.)

In short, Roy, we're going to keep all political views out of the Cynic and devote our time to improving the quality of our newspaper. (And, Roy--don't you ever worry about being corny.)

ROTC

STUDENTES

[illegible] instructor of a humanities class asked the students to put the one word which does not belong in the following list: MEN, WOMEN, EGG, SEX, EGG.

Although everyone in the class picked the word "egg," to the surprise the instructor showed them they were wrong. She said, "Men can beat a man, men can beat a woman, and you can beat an egg, but you can't beat sex".

Contributed by G.C.V.

[illegible] haughtily. "I'm sorry, but I don't kiss on the first date." "Aw, cheerily. "Oh, well how about on the last one?"

It was a sweltering summer day and the perspiring obstetrician was rushing frantically to examine all his patients before answering emergency calls from the hospital. "These hot August days really get you, Doc?" asked one woman sympathetically.

"No," said the doctor, "it's not these hot August days that are bothering me -- it's those cold nights last November."

Contributed by W.C.F.

Upon arriving at a showing of *And God Created Women* starring Bridgette Bardot a little late, I asked the usher, "Will we get to see a complete performance?"

"No, sir," he said, "you won't. But I reckon you'll come closer to seeing it than in any other movie I can think of."

Contributed by W.S.

Harry Truman, talking politics with a group of Yale students, was asked by one earnest youth, "How do I start in politics, sir?"

Replied the former President, "You've already started. You're spending somebody else's money, aren't you?"

Contributed from The Grotonian

Four girls from various sections of the United States found themselves in Seattle being checked and red-taped for civil service jobs in Alaska. At the Naval Hospital where the girls were given their physical checkups, the first three were examined, and in short order, found hale and hearty.

The three girls sat down to wait for the fourth, a curvaceous blonde from the Midwest. They continued to wait.

Finally she came out. "My, isn't the Navy thorough," she exclaimed. "Imagine having every doctor and intern in the whole hospital examine you!"

The Circular File

by Mike Grossman •

At times said to be long past, drinking was considered evil; it's effects were said to be the embodyment of the devil; it's result: eternal misery and damnation. Today we smile when we think of the hysterical minister, arms waving in the air, screaming threats of the eternal roast in hell to a trembling audience. We no longer think of the drunk as the devil's advocate but use a more sophisticated term: social maladjust. The words have changed but in many cases our concept of drinking has not.

The point is well taken that too much has been said of our ex-dean. He is gone, good riddance, and let's forget him. But let us never forget what he represented. Cliffordism, especially in it's attitude towards drinking, was a carry over from the hellfire hysterics mistakenly believed to be long dead. It's drinking policy was clouded and completely unrealistic. It considered drinking, any kind of drinking, by students a deadly evil which must be stamped out. Cliffordism reduced dorm *councilors* to dorm *police*, but more important, it came close to eliminating a vital function of our universities: that of allowing students to mature through experience and, if need be, through mistakes. Drinking is not an evil; excessive drinking, yes; uncontrolled, destructive drinking, yes; but not restrained, social drinking. The bottle may have been called the vessel of sin in the days of Moses, but these are not biblical times. Our society accepts and condones drinking. It realizes that there is nothing wrong with a drink; only with excessive drinking. Cliffordism came close to eliminating what should be a vital part of our college education because it's policy was so obsolete. A protective or parental attitude towards drinking has never educated; only restricted. You don't learn to drive a car if your are never allowed behind the wheel. Likewise, you won't learn that drinking can be a healthy, social good if you're always forced to sneek a drink. The strict, mechanical legality of the manic-disciplinarian, though more obvious, is rarely the best social educator. How can there be self-control where there is no free will or morality where there is no other choice? Consequently, how can there be maturation in a university in which self-restraint can not be developed.

Reds Call Daniel's Book "Bourgeois"

[illegible] Communist [illegible] Daniels [illegible] Countries [illegible] Communist [illegible] Communist International. This is not accidental, for the collectivist point of view fully answers to all the demands of contemporary pro-Communist propaganda, which [illegible] Comintern as a weapon for the realization of the so-called peaceful progressive policy of the Soviet government.

Daniels' book was published by Praeger, Inc. in 1962 and is a 391-page documentary in which more than 200 different documents are included.

Dr Dillon Will Advise New Journal

A University of Vermont economist has been named a member of the advisory editorial committee of a new quarterly journal which will be devoted to translations of economic articles published in the Communist countries of Eastern Europe.

Dr. Lubomir J. Dillon, associate professor of economics at Vermont, is a regular contributor to programs of Radio Free Europe, and last summer served as consultant to a Congressional Subcommittee on the Impact of Imports and Exports on American Employment. He is the author of a number of articles dealing with Communist and Eastern European affairs.

Dr. Dillon will serve on the advisory board of "Eastern European Economics," a new quarterly publication issued by the International Arts and Sciences Press. The new publication will concentrate on scholarly journals in Bulgaria, Czechoslovakia, Hungary, Poland, Rumania and Yugoslavia.

The UVM scholar, who reads most of those languages, will be one of several advisors who will [illegible] in the publication of the new journal.

Library Hours For Kake Walk

Thursday: 7:45 AM - 5 PM
Friday: Closed
Saturday: 10 AM - 2 PM
Sunday: 2 - 10 PM

Alumni, parents, and friends cordially invited to tour the building.

PROFESSORES

[illegible] I [illegible] if a student were situated [illegible] "evaluated" by the traditional, memory-oriented examination, it would behoove him to seek out special techniques designed to perfect memory, such as, for example, the latest audio sleep equipment. In truth, one can be conditioned to remember and retain all sorts of infinitesimal, obscure things including, much to the dismay of the administration, opposite sets of opinions, syllables. Then one would acquire a push-botton memory, a sort of [illegible] Kniff, like flipping a coin across one's knuckles, that could [illegible] at parties, home, and on the registrar's stat sheet. A high scholastic average would be virtually assured. Of course, this is not complimentary to scholarship, but then was scholarship solicited in the first place?

Certainly I have had many students who have demonstrated gorgeous memories for various generalizations and facts contained in textbooks and lectures. On the objective part of my examinations they were veritable curve-raisers, but invariably, too many of these students performed dismally on the essay part of the exam in which I asked for a modicum of critical, reflective thinking. In a word, where they bombed it in terms of memory, they botched it in terms of thinking. There is a distinction here. Perhaps these

Sandra Hunter, '63, Pi Phi, was engaged to Bo Goodall, '62, of Delta Phi.

Nancy Margo Lawson was recently pinned to Bill Hughes of Delta Phi.

Linda Hubbard, '63 Pi Phi, became engaged to Dave Mathewson, '62, of Delta Phi.

Peggy Copland, '63 Pi Phi, became engaged to Jon Mellen, Delta Phi, '62.

Susan Manchester, '63 Pi Phi, has become engaged to Ted Morrow, '62 of Alpha Tau Omega.

Caroline Hart, '63 Pi Phi, became pinned to Carl Mahrenholz of Sigma Nu.

Maureen Seiler was recently pinned to Max Isaiff, '63, Montreal, as a member of Alpha Epsilon Pi.

John Hartnett, Kappa Sigma, '62, was engaged to Nancy Elliot, '63.

James Cureton, Kappa Sigma '62, has become engaged to Sarah Taylor of Leominster, N.H.

CONGRATULATIONS TO:

Paul Harris, who was recently elected co-captain of the 1962 football team. Paul is a member of Kappa Sigma.

Alpha Epsilon Pi and Theta Chi are busily working a skeet at the Marlboro Country Club that they hosted at 8:30, 20th week of Marlboro hours.

Congratulations to all the pinnings and engagements announced in passing columns.

Sigma Alpha Epsilon Pi, who are Marcus Eaton, President; John Bashaw, Vice-President; Steve Lowe, Treasurer; Joe Pratt, Recording secretary and Richard Cowles, Rush Chairman.

The recent election of officers of Kappa Sigma Fraternity: Grand Master, Robert Stone; Grand Procurator, Lee B. Brown; Grand Master of Ceremonies, Joseph M. Barry; Grand Scribe, Richard E. Lorenz; Grand Treasurer, Paul M. Harris; Custos, William B. Porter and Joseph Bellan, and Assessor, Basil Lukyanetz.

[illegible]

Let Love to restore get well wishes to Sigma Nu's Earl who was recently hit by a car.

Alpha Epsilon Pi and Sigma Nu had a great time at their exchange dinner on Tuesday evening. Their impromptu skits went over big.

Playertimers' Produce "Beau And The Beast" On Tour

Magic glass, fierce pirates, and princesses [illegible] dwell side by side with giants, enchanted princesses, and goblins in the huge [illegible] of a child's imagination. Each year in Vermont these creatures come to life in the magic of a play for children presented by the University Playertimers through the Playtimers' Tour.

The Tour is a student production which travels throughout the state and goes into New York State and Canada with a children's play during the University's spring vacation. This year's production will be Charles Perrault's *Beauty and the Beast*, a classic fairy-story.

This year is the 7th season the Tour has made the long swing through springtime Vermont. A Chinese play, *The Farmer and the Fox*, was presented last spring. Sixteen performances were given in schools from as far south as Bennington to as far north as Granby, Quebec, with many stops throughout the state in between.

This year's selection, *Beauty and the Beast*, will be presented from April 12th through the end of the spring vac[illegible] is bright, musical, will need acting, dancing talent.

Tryouts for the [illegible] on Monday and T[illegible] and 20th of Feb[illegible] Theater. Callbacks Wednesday the 2[illegible] ers' Lounge. The [illegible] announced on M[illegible] of February. T[illegible] will be: *3 to 4 PM* on Monday the [illegible] *PM* and *7 to 9 PM* the 20th; and [illegible] Wednesday the 21st.

The tryouts are [illegible] students of the U[illegible].

The Playtimers [illegible] opportunity to gain [illegible] all phases of theatr[illegible] scenery construct[illegible] presentation, and [illegible] is also the crew, [illegible] of the compan[illegible] everyone works at [illegible].

Copies of the pla[illegible] serve in the Librar[illegible] who try out must have re[illegible] script before coming [illegible] The play is being [illegible] Fred Labelle, speech [illegible] class of '63.

Nota Bene

Sunday, February 18th, a brunch followed by the first in a series of programs dealing with justice will be held at Hillel House, 389 College Street. Brunches are held at Hillel every Sunday at eleven during the school year.

Professor Hall of the Philosophy Department will introduce the series with the topic, Justice: The Range of the Idea. A discussion period will follow. The brunch begins at eleven and all are welcome.

The University Re[illegible] (364 Waterman) is ac[illegible] istrations for the se[illegible] ter series of develop[illegible] ing classes. The purpo[illegible] classes, which are free [illegible] to any university st[illegible] improve speed an[illegible] sion and to sharpen st[illegible] Further information [illegible] tained at the Reading C[illegible] by calling Ext. 324.

New low-cost luxury in two just-out Chevy II Nova sedans

• Luxury and low cost have never been more beautifully blended than in these two newest additions to the Chevy II line! Like their running mates—the Nova 400 Sport Coupe, Convertible and Station Wagon—they have the same more for-your-money features that have made Chevy II the winner of *Car Life* magazine's Engineering Excellence Award for 1962. Soft riding new Mono-Plate rear springs, proved in the equivalent of [illegible] plus test miles. Thrifty 6-cylinder engine that gets more "git" out of a gallon of regular. Body by Fisher roominess that fits big families and small parking places. An easy loading vacation sized trunk. New ideas that save on upkeep. Plus trim, tasteful styling, inside and out. See the smart, sassy, saving Chevy II Novas—and the other sensibly sized, sensibly priced Chevy II models—at your Chevrolet dealer's.

UVM Hears Polish Views

The Counselor of the Polish Embassy in Washington, D.C. spoke on "Polish Views on the German Question" at the University of Vermont at 8 p.m. Monday (Feb. 12).

Dr. Marian Dobrosielski delivered a talk to members of the International Relations Club in the student lounge of Waterman. The public was invited to attend.

Dr. Dobrosielski was named Counselor in 1959 and prior to that served for two years as First Secretary of the Polish Embassy in Washington.

During World War II, Dobrosielski joined the Polish Army in France. In 1943 he entered the University of Zurich and received his Ph. D. in 1948.

From 1948 until 1950 he worked for the Polish Legation in Switzerland, returning to Poland in 1950 to serve as Section Chief of the Press and Information Department of the Ministry of Foreign Affairs. In 1952, 1953, and 1958 he was a member of the Polish Delegation to the United Nations.

From 1953 until 1957, he was a member of the philosophy department at the University of Warsaw and the Institute of Philosophy of the Polish Academy of Sciences.

Mahoney - New Director Of Student Center

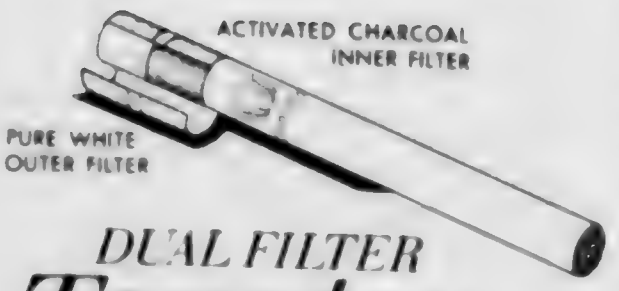
[illegible] a great deal of [illegible] organizations, [illegible] meeting of last [illegible] and instruct- [illegible] which he [illegible] of the lack [illegible] to [illegible]. He is [illegible] Billings Center [illegible] with the hope for [illegible] offices. Last year he worked [illegible] the planning board of the [illegible] center and met with them when he came back a short time ago for an interview. We are very pleased that he could come back and [illegible] us. I think in this new position where there is greater flexibility and freedom of action, a greater portion of Mr. Mahoney's time will be available to help the students in what is necessary to plan their activities."

SA VICE PRESIDENT

Jan Tanzer, Vice President of the Student Association, commented that the students should give Mr. Mahoney time to adjust himself with his new job. "I am very disappointed that a man from the Clifford Regime who willingly left Vermont for Syracuse last year with his 'buddy' Clifford", has been granted a major position in student affairs. I am not doubting his capabilities, but I do question his intent in seeking a position of the school he left. I seriously hope Mr. Mahoney will be greatly influenced by the pleasant [illegible] created by the [illegible] Offices and the [illegible] also feel that Mr. [illegible] be given the opportunity [illegible] himself to the [illegible] thus gave him the [illegible] do so.

DEAN OF MEN

Dean of Men, [illegible] is very interested [illegible] that Mr. Mahoney [illegible] Although Dean [illegible] UVM last year, Mr. Mahoney recently [illegible] think that it is [illegible] going to have some [illegible] in the area of [illegible] dent activities. If [illegible] that is needed, [illegible] feel that the program [illegible] successful. Mr. [illegible] Mr. Mahoney have [illegible] Another student [illegible] Paris, Vice President [illegible] expressed his opinion [illegible] honey's appointment. "The [illegible] experience I have [illegible] on the IFC, Mr. Mahoney [illegible] not seem like a good [illegible] qualified to run the [illegible] center."



These views [illegible] fact that the student [illegible] ministration are [illegible] subject of Mr. Mahoney's [illegible] pointment. The will be [illegible] again, in all likelihood, when Director of Student [illegible] takes over his new [illegible] position.

PROFESSORES

(continued from page five)

...ts were not so much intellectual wastrels as they were ...ined products of an educational system concerned principally ...eveloping successful students capable of eliciting correct ...nses. Similarly, perhaps the student studies for the examination ... than the understanding; perhaps he seeks a grade point pattern ... than a knowledge; a baccalaureate rather than an education. ...here is a distinction here.

...s a disturbing fact, but no matter how you slice it, it is increasingly doubtful that the instructor can measure the quantity and ... of learning that has taken place in the mind of a given student ...n a given course! Quite truthfully, he need protest that he can, at most, he arrives at a given student's paper-and-pencil performance on a given paper-and-pencil test, from which he infers, thereby, the calibre of learning achieved. A shaky bridge indeed. And the instructor, nourished by the aegis of the system running interference, quite incredibly believes himself capable of sound evaluation, while the student, inevitably confronted by an employer ... graduate school taking marks literally, often succumbs, walks statistical tightrope.

...a case in point, I would refer to one of my colleagues, personable colleagues who has the peculiar habit of announcing to his students the very first day of class the following gospel: "Sixty percent of you will flunk this course." Good news indeed. Ostensibly, this itinerant instructor is endowed with the intuitional faculties to predetermine precisely what percentage of his charges will pass and will not. Twenty years of teaching experience (might it be one year repeated twenty times?) persuades him that to pass but forty percent is a sure-fire to impress others with the splendid difficulty of his course and (hence) his competence as a teacher. Some call this an example of "raising academic standards." Of course, it really does not have much to do with fostering learning or getting students excited about ideas, but oh what it can do for individual and departmental prestige!

An attendant point is the instructor who, through some evidence statistical process, arrives at the flat conclusion that student X was "worth" a "90" or "95" or "99" at the course. I am impressed by the accuracy, incorruptible precision of the mark. That last is the pertinent point. Also stemming from a source of an inherently subjective nature is further food for thought. Suffice it that a statistician would have a field day inquiring after the criteria with which the instructor has so meticulously differentiated the "B" from the "B+," of the "C" from the "C-," or the "87" from the "90." Somebody all my acquaintance may have a point of that question.

But two more items. I suppose we will just have to live with examinations and marks. Perhaps they are important (not as goals as an instructor), notwithstanding that they tend to get in the way of learning, take up a lot of important time, and otherwise tell us heartrendingly little about behavioral changes resulting from an educational experience.

Let me wind this up by saying that the human brain is a labyrinth of hidden, intricate, inextricable passageways. The inner cognitive structure of man, consisting of a multiplicity of ideas and values, has been difficult to get at. The "mind" beneath the surface, consisting of those abstract, reflective, higher mental processes, has been noticeable resistant to standard methods of imperical study. To put it bluntly, and in the context of higher education particularly, we simply do not know how to adequately tap human learning or client behavior that would reveal the kind or degree of learning that has taken place. Add to that the fact that we do not even know what learning is, or what happens biochemically, neurophysiologically when we learn, and you can appreciate the whole sticky business.

Letters

(continued on page eight)

ROTC

Dear Mr. Paye,

Without a doubt you mean well when you criticize people who criticize, but aren't you being just a little hypocritical?

In your letter to the editor you mention how disgusted you are with people who criticize. You just can't stand people who pound out worthless words of criticism on a typewriter. Well, Mr. Paye, I advise you to take your own advice. Find a place in the world where such people do not exist. But you'll spend your life searching for such a place because people are natural critics.

Believe me these people who criticize things such as ROTC, are not really trying to undermine or not really trying to undermine the United States, they are just expressing their views, trying to make some sense out of this confusion we call our world. They are utilizing their freedom of speech, a pleasure that in too many other countries is lacking.

What you are doing, is asking that people should not use their freedom of speech. You are asking that people should live like the world Russians, with our mouths shut and our heads empty. You are worse, then the people you criticize. You would take away one of America's basic freedoms, the freedom of speech. You, Mr. Paye, and others like you are really the ones who are undermining the US of A.

Merci

January 15, 1962
Claremont, N.H.

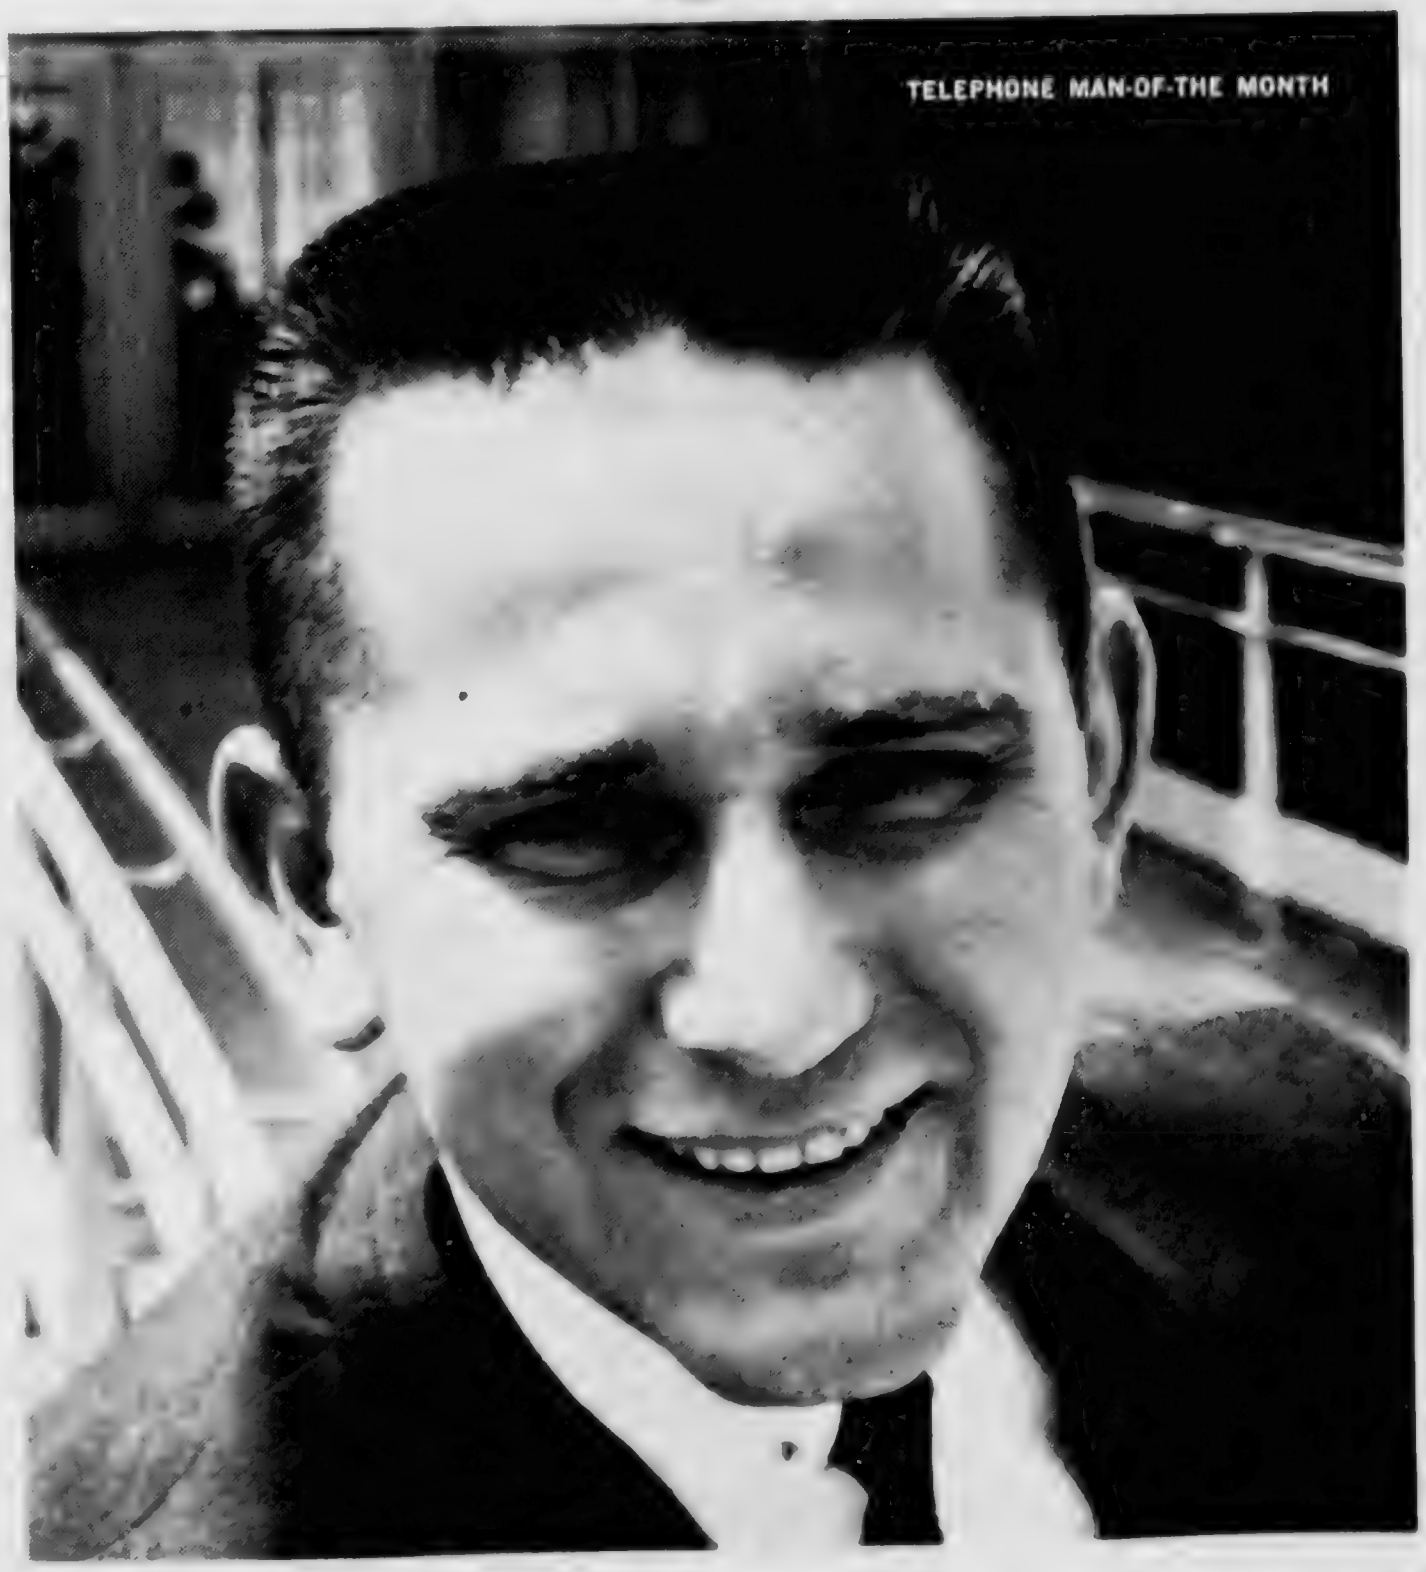
To the Editor:

I just a note to congratulate the group of boys that were here last week when their bus broke down. For 3 hours and they were at it all the time and behaved very well.

It is boys Like these that make a country very good to live in. These boys had been to Randall Junior Academy for a basketball game.

Again I want to congratulate these boys on their behavior.

Sincerely,



Leon Petras

THE BELL TELEPHONE COMPANIES SALUTE: JOE BOBROWSKI

Although he's been with Bell of Pennsylvania only six months, Joe Bobrowski has already made an important contribution at the Company's Data Processing Center near Harrisburg. Joe developed a "mechanized" way to speed up payment of monthly invoices from 1700 suppliers who sell to his company. Joe's excellent idea made an already efficient payment process even more efficient.

Joe Bobrowski of the Bell Telephone Company of Pennsylvania, and other young men like him in Bell Telephone Companies throughout the country, help bring the finest communications service in the world to the homes and businesses of a growing America.

UVM Kittens Dunked By Dartmouth And Middlebury

by Ray B. Wells

Rid off a string of four victories within a month's time, the UVM frosh Kittens were downed by two consecutive losses within three days to lower their season record to a respectable 5-3 mark. The first loss was a one point squeaker to the Middlebury Frosh, 49-48. The second was a second drubbing by Dartmouth as the latter Indians outclassed UVM 69-5. The other season loss was at the hands of St. Michael's Frosh. The Kittens ran up three losses over the season with high hopes of avenging all their season losses with each. Their opposite in each instance, however, were the wheat in reporting [illegible]

Middlebury

At Middlebury a last second basket by the Panthers' Carl Karlson won the tilt. The game was played at Middlebury as a preliminary to the Varsity tilt which saw the UVM Catamounts tame the Panthers. Joe Kleiman paced the usual hard driving, hustling game and topped all scorers with 19 points. The statistics show that the game was knotted up the first time an Middlebury out-pointed UVM 15 to 8 while the Kittens bagged 3 more field goals. This was the first time that the Frosh failed to score less than 60 points. Prior to this game they were averaging 77.8 per game.

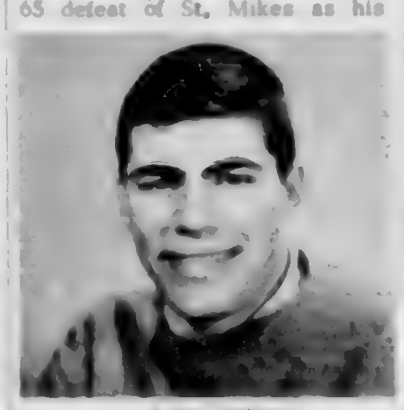
Dartmouth

Dartmouth stymied UVM's great hard-driving offense with a 27-5 zone defense. Led by 6-6 Johnny Baker, the Indians controlled both backboards and won the contest by 21 points. Baker hit for 26 to be the game's high scorer. Ralph D'Attilia netted 23 and hustling Ed Pecaro added 12 in the losing effort.

Meet The Catamounts

by Alan Creaser

Generally, when basketball followers of the college of Arts and Sciences gather in the coffee shop after classes, the conversation can run all types of subjects; but when the three members of the Green Mountain backcourt, Jack Shabel, and John Stabler, the conversation will undoubtedly center around the subject: basketball. I had the good fortune to listen in on such a discussion and found it an interesting way to "meet the Catamounts."



Benny Becton

It is interesting to note the many similarities among these three 'Cats. Each is a junior and a returning lettermen from last year's team. All three come from New York state (Benny and Jack come from Brooklyn while John hails from South Huntington) and each is a fraternity member (John - Sigma Alpha Epsilon, Jack - Tau Epsilon Phi, and Benny - Phi Sigma Delta). One unique difference, however, is that while Benny was a court star for Boys High in New York and John led his high school to a section championship, Jack never played high school ball. His experience in such teams, however, was enough to make him third high scorer on the UVM frosh team.

"Just the right size," was Benny's comment on UVM. The 6-3 forward pointed out that he liked UVM because it was neither a small school nor a huge over-populated campus. Benny, who like John had scholarships to many other colleges, decided on UVM because he felt that it was just the right distance from New York. He added, however, that the present facilities and gym probably had discouraged many prospective players from the Vermont campus. In his usual quiet manner Benny did agree that the new field house would certainly improve the situation.

Commenting on the season thus far, the boys agreed that the young team (starting four juniors and one sophomore) had played fairly consistently although it was erratic at times. Jack felt that many of the close games demonstrated the Cat's fighting spirit and showed that several teams such as Connecticut were far overrated. John, an advanced ROTC student and member of several of the campus honorary societies, was quick to applaude this year's campus spirit. He commented, "This year the spirit at UVM is better than I have seen in any previous year. The guys on the team look forward to every home game because of this."

Looking back on his relatively short basketball career in the Green Mountains, the chess playing Becton cited last years 79-65 defeat of St. Mikes as his

Jack Shabel

biggest thrill in college ball.

Perhaps in the final analysis, the truest opinions concerning their play on the court lies with their coach, Peter Evans. And the Catamount mentor has all praise for these three. Of Stabler, whose nickname is 'Spider', Evans says, "He is a wonderful boy to work with. You always know that he is giving his best." Of the gung-ho hustling Shabel, Evans merely exclaims, "Jack has everything: speed, shooting eye, and ball handling ability." As far as Benny is concerned, the coach went on about this year's captain, "It is hard to say anything more about a player who averaged 20.7 points a game last year and made the All Yankee Conference team among others. Benny is the type of player who makes a coach's job a pleasure."

John Stabler

Catamounts Edged By Purple Knights And Swamped By Huskies

Jack Shabel scores two against the Purple Knights.

The rafters of Memorial Auditorium rocked two weeks ago as the Purple Knights of St. Michael's College came to Vermont 66-61, in the most spirited game of the present basketball season.

Lack of height and failure to hit from the outside was UVM's problem from the onset, but the Cats, playing their most determined game of the season, fought back from a 13 point deficit at 12:00 of the first half, to trail by only 4, 34-30, as the half ended.

The second half was the most exciting of the year. St. Michael's built up a substantial lead after 6 minutes, but the Green and Gold was never out of the contest. With 4 minutes left to play, Jack Shabel hit a set shot to put Vermont ahead 56-54. However, the Knights, using Captain Al Baldini and his backcourt mate, Fred Corrado, to best advantage, fast broke the Cats and Baldini put the game on ice with a layup at 18:30 to make the score 60-59. The last effort by Vermont was a jump shot by Dave Strassburg with only seconds remaining to seal the final count of 66-61. With this, St. Mike's virtually sewed up their second straight state championship.

Following on the heels of their most determined effort came the Cat's most disheartening loss of the campaign, a 91-57 rout at the hands of The University of Connecticut. This was UVM's fifth straight loss in the Yankee Conference play.

The only time the Cats led in the contest was when they jumped in an early 4-0 lead, but then the Huskies lowered the boom.

At the half, the Evansmen found themselves on the short end of a 41-26 score.

U Conn didn't let up in the second half either as the Green and Gold just couldn't seem to find the range. With only 10 minutes left to play, the Cats had only increased their total to 28. On the other hand, the Huskies widened their lead even more as the score stood at 62-28.

Six-foot eight Ed Slomeenski controlled the rebounds and Dave Comey and Dom Perno dominated the Huskies' scoring to feature Connecticut's attack.

Jack Shabel was high [illegible] Vermont with 18 points, [illegible]ny Becton, who [illegible] recovering from his [illegible] snagged 20 rebounds [illegible] only 13 points. The [illegible] the contest was brought [illegible] fact that U Conn was [illegible] UVM was not. The [illegible] over 40% of their [illegible] the Cats hit only 25 [illegible] for a disappointing 27[illegible] average.

Where's Our Ski Team?

by Alan Creaser

It seems strange that the ski team at UVM, located in a state where skiing is not only a popular sport but also the major tourist attraction and a great source of income, is virtually unknown. Yet, this is the case.

Equally unfamiliar to most everyone on this campus is the fact that this team participated in a meet during Dartmouth's Winter Carnival in Hanover, N.H. Not even the daily newspaper in Burlington covered UVM's efforts in this event to any extent.

We did not do very well, if you only consider that out of ten colleges represented we bested only one, Yale. The other teams were Dartmouth, who won the meet, Middlebury, New Hampshire, St. Lawrence, Harvard, Maine, Williams, and Norwich.

To make a fair judgment of the team we must take into account two factors more important than the team's lack of proper publicity. First the team is [illegible]-trained. At the present there are only eight members on the team. They are Tim Terrien, Bob Lutz, the apt team captain, Rick Hubbard, Tom Clark, Owen Mathewson, Ken Auston, Dave Comstead and Sky Thurber. Of the last three, one has a chipped ankle, one has two broken ribs and the other has just had his appendix removed.

Secondly, the team is under-trained. Practice sessions have been nearly nonexistant. However, this situation promises to be remedied by Jake Stewart, the new coach of the team, who has just recently arrived on campus. Mr. Stewart, a graduate of UVM has an aggressive and imaginative personality which should help him in developing the team.

Mr. Stewart said in an interview "We should do better in the future, with our three injured men returning. UVM has a potentially excellent ski team. The team, though small at the present, is growing and in the near future we should develop into a very fine team."

IFC SPORTS ROUNDUP

by Martin Wolf

The winter tournaments of the Interfraternity Council have [illegible] nearly to completion.

The fraternity tenpin bowling championship was won by Alpha Epsilon Pi in a tight battle with [illegible] Iota, 1502-1458. The victorious AEPi's were sparked by John Shrage, capt., Chuck Grutman, Bob Fisher, Mike Harris and Sandy Becker. The Owls, finishing a close second were led by Palmer Martin, with Bill Sorrell, Jim Douglas, Ken Miller, and George Clink. Going into the playoff, AEPi sported a 10-4 record with [illegible] having a 9-5 mark.

The contest was [illegible] with the champions[illegible] on the final game. [illegible] came through with [illegible] sive marks to clinch [illegible] Much enthusiasm wa[illegible] the members of [illegible]

In IFC basketball, t[illegible] has almost ended. 65TH ANNUAL KAKE WALK LAUNCHED HIGH INTO ORBIT

Kake Walk is off to a good start when the snow sculptures begin to appear on campus.
Credit: Romeo-Barcomb, S.P.S.

by Bob Bernard

Kake Walk high-stepped into the Limelight Thursday night, February 19th, to the cool sounds of Duke Ellington and his band. The King and queen reigned supreme over the Kake Walk Ball. They will also be in attendance at all other functions this weekend. If the colorful decorations and the enthusiasm of the many couple who attended the dance are any indication of the spirit of the remainder of the weekend, then watch out UVM.

The pace quickened Friday afternoon to the rollicking rhythms of Cannonball Adderley and tantalizing tunes of Lambert, Hendricks, and Ross. But it's the anticipation of the Walking for de Kake that keeps a sharp edge on the festivities. And even when the Walking, the skits, and the parties of Friday night are gone ... there's always Saturday night to go.

A Kake Walk official drops a handkerchief, and the UVM band sets the tempo for the Walkers. Months of preparation have gone into the fraternities' bid for honors. Each high-hatted twosome kicks its way across the hardwood floor, spotlighted, in a procession routine. The crowd cheers, the band blares, and the Walkers arch their backs, keep their heads high, and kick for all they're worth.

Then, of course, there are always the skits. Musicals, comedies, and even an occasional satire have filtered through in past years. Alpha Phi Sigma Delta, Sigma Alpha Epsilon, and Lambda Chi Alpha Phi capture the spotlight for their event. It's twelve full minutes packed with fun and music four times over.

So, Kake Walk is here for the sixty-fifth time around, in a few more days it will be gone once more. All that will remain, at least temporarily, are the broken and taunting fragmentations of the snow sculptures, and a very littered Memorial Auditorium. But then, there are always the memories, and ... the 66th Annual Kake Walk of the University of Vermont to look forward to!

New SA Officers To Assume Positions

Student Action Party To Head S.A.

Elections for the highest offices on campus were held on February 16 in Waterman and Simpson Hall. Pictures and qualifications of the candidates for the positions in the Student Association were posted in these two voting areas during the day. That night at Memorial Auditorium the new officers were announced. They are: Paul Chervin, president; Maurice Singer, first vice-president; Janice Cole, second vice-president; Suzanne Chagnon, secretary; Eileen Mango, sub-secretary; Steve Cohn, treasurer; Richard Holden and Steve Singer, sub-treasurers.

The officers-elect will be installed on February 28. They will take over the positions held by Ted Edgcomb, president; Jon Tenzer, vice-president; Sharon Comee, secretary; Mike Collins, treasurer.

As a part of the new SA constitution there must also be chosen a certain number of representatives to the SA Council by February 27. This is to be done by each living unit, that is each sorority, fraternity, and dorm. In the instance where dorms have more than one floor, there will only be one rep chosen, although this person will have a larger vote than one who comes from a smaller dorm. This system is intended as an improvement over the past system which provided for representatives elected from each class. The Council felt that this did not provide adequate coverage of the campus. Now that the men students are living in residence halls representation will reach a greater cross-section of the University. As a reminder to all living units, don't forget to elect your representative to Student Association!

...Set The Atmosphere...

Chief . . . It looks like someone has gone back to diapers and a bottle. Tina Brock is Delta Psi's candidate for king.
Credit: S.P.S.

we barely forgot about the skits and the candidates, and concentrated on obtaining as much free literature and trinkets as we could in our recently acquired shopping bags.

The highlight of the evening was the appearance of several rather large ballons which teasingly hovered over sections of the crowd until they magically disappeared in puffs of smoke. Who blew them up seems to be one of those secrets like how they built the ancient pyramids of Egypt.

Tired, but rich in knowledge of another native festival, we once again entered the world of reality as we once again were pushed through the glass portals of Memorial Auditorium.

esting episode.

The second part of the evening was centered around the stage in the auditorium upstairs. It is of interest to note that the old Eastern custom of sitting cross-legged on the floor has managed to sift into our Western world. Of course there are several variations which were evident.

Promptly around nine o'clock the skits, as we were advised they were called, began. Each was a subtle pitch leading up to the presentation of a candidate for Kake Walk king or queen. They generally, so we were told, had a universal theme. Usually this universal theme appealed only to college students. Innocently we sat (on the floor not to be different, for we did not want to appear obvious to the natives) and watched the initial presentation. All at once it seemed as if the heavens had opened and were raining sharp objects and pieces of paper on the congregation gathered in the auditorium. After the few casualties were helped to a neutral corner, we found out that this was merely a part of the "tradition." In a way it is quite sporting, since the lights do go on. Once in the swing of things

Kake Wal Presentatio Is Long And Hard

Origin Of Kake Walk Recalled

"Walkin' fo' de Cake". *Courtesy S.P.S.*

[illegible] Carnival
[illegible] Walk time is here, by [illegible] and, in the words of Tom [illegible], disapproval would be [illegible] because the heart [illegible] Vermont student is [illegible] in the annual Vermont [illegible] of music, mirth and [illegible] dates. Cares are [illegible] aside as eight o'clock [illegible] are a forgotten memory [illegible] minds of the revelers. [illegible] was not always the [illegible] case. Many years [illegible] before East Hall was [illegible], there arose a problem on [illegible] UVM campus. The year was [illegible], and the problem was what [illegible] about the cancelled Mili- [illegible] Ball. (The fact that they [illegible] had ROTC on campus was [illegible] a problem.) One student [illegible] name of Frederick Sharp [illegible] a committee which de- [illegible] a winter event of skits [illegible] was a success, not only [illegible] entertainment wise, but, finan- [illegible]ally. The following year the [illegible] young college students [illegible] up with a new attraction: "walkin' fo' de cake." The idea [illegible] borrowed from the planta- [illegible] traditions where the slaves [illegible] compete in couples to win [illegible]ake. The original, though, was [illegible]ser to "stepping" than the [illegible]ern walking. The contestants [illegible]ere also judged more by cos- [illegible]umes and appearance. Evidently [illegible] recovering from the gala events [illegible]: 93 and '94, the students did [illegible]t present another Kake Walk [illegible]until 1897, when it was used to [illegible]raise money for the football [illegible]am. Again in 1900 support was [illegible]gathered and greater interest [illegible]gan to grow. A new feature [illegible]was added, and that December [illegible]he viewers of Kake Walk saw a [illegible]grand march of costumes, in [illegible]which nearly everyone partici- [illegible]pated. By that time, despite the [illegible]negative attitudes of some fac- [illegible]ty members for damages [illegible]caused during one Kake Walk, [illegible]the winter extravaganza was on its way to fame. A record eight hundred people attended in 1901 when Sherman's Band played for the festivities. Several individual acts, including rope walking, were featured, and five couples walked for the cake.

In 1903 the custom was initiated to hold Kake Walk on the closest week-end to Washington's birthday. This alleviated the administration's problem, since they didn't have to give a separate holiday for Washington's birthday and have all those students taking off a week early to go home. 1904 brought the most important addition to the Kake Walk week-end. In that year Percy Wenrich wrote "Cotton Babes", now the theme song of Kake Walk.

Things went along pretty smoothly with little change until 1934, when the idea of a Kake Walk king was initiated. Instead of the way it is done today, candidates then ran in much the same way as political candidates do. They formed parties and had to campaign in soapbox manner around campus. The first three king candidate parties held the distinguished titles of "Nudist Party", which merely asked the students to "bear with them," the "Communist Petting Party," and the "Dark Horse Party." No doubt spirits were in abundance in those days. After election the king could choose his queen by dice rolling. Some students felt this was not exactly adding to [illegible] the spirit of the game, and in [illegible] the [illegible] were able [illegible] the vote.

In [illegible] the [illegible] of the walking and [illegible] were [illegible] and [illegible] were [illegible]. Largely [illegible] [illegible] [illegible]

The Vermont Cynic

The Official Student Newspaper of the University of Vermont

VOL. 79 FEBRUARY 23, 1962 NO. 24

Editorial:

It's That Time Again

What's troubling you, Charley?

You're two weeks behind in every course, and you promised your mother you'd make Dean's List this semester?

You joined a fraternity to become a gentleman, and all you've been doing for the past week is shoveling snow?

You just got slapped in front of everybody in the Coffee Shop by the little girl you took out all last semester, when she found out about your girl at home?

Think you've got it bad, Charley? How wrong you are! By the end of this weekend you'll be three weeks behind in your work, you will have learned to throw, drink, and sit on like a good sport; and your girl will be pinned to your roommate. And, believe it or not, you're going to love every minute of it.

Charley, it's Kake Walk -- UVM's biggest, bounciest, and best-est blast. Five months of the year are spent planning for it, and five are spent recovering from it. It's a time when professors take a holiday, librarians catch up on their reading, and administrators shrug their shoulders and close their eyes.

The holiday weekend is made for memories. The midnight tobuggan ride, the Kake Walk Ball, fraternity parties, and that wonderful Walkin' for the Kake ... All will seem a bit unreal when memory tries to recreate them ... perhaps like a dream that was too good to have been real.

What are you worried about, Charles? Your parents are coming up for the festivities? Wonderful! They'll love the weekend. Get Them a room at the North Star Motel and have your date stay at the South Burlington Spa? They'll worry less that way, and you may enjoy the weekend more. But you need only keep dates and parents separated at night. It is only polite for you to have lunches and dinners with them during the day.

Still glum, Chuck? You're taking a blind date from New Rochelle? Relax, friend, if you don't like her, someone else is sure to.

Now what's bothering you? You're nervous and jittery before the big event? See one of the upperclassmen in your fraternity. He should be able to suggest something to relax you.

You may be missing the point, Charley. Kake Walk is not something to be dreaded. Rather, it is something to be looked forward to and fondly back upon. Put your all into Kake Walk, and you'll have the finest time of your life. Ask anybody. Anybody who can remember it.

There are those who go so high that they lose track of what is going on. Don't be one of these birds. Remember to save something for next Kake Walk. They keep getting better and better.

Now doesn't that sound like fun? What? You have one more thing troubling you. O.K. friend, out with it. We've solved your other problems-- this one can't be so bad.

What's that? You say you're BROKE! So long, Charley. You do have problems!

Omar Bradley Warns Of Desperate Danger

[illegible] Gen. A. Bradley's [illegible]

By Gen of the Army Omar N. Bradley

The central problem of our time - as I see it - is how to couple human intelligence for the salvation of mankind. It is a problem we have put upon ourselves. For we have befuddled our intellect by the creation of such scientific instruments of destruction that we are now in desperate danger of destroying ourselves. Our plight is critical and with each effort we have made to relieve it by further scientific advance, we have succeeded only in aggravating our peril.

As a result, we are speeding inexorably toward a day when even the ingenuity of our scientists may be unable to save us from the consequences of a single rash act or a lone reckless hand upon the switch of an intercepteable missle. For twelve years now we've sought to stave off this ultimate threat of disaster by devising arms which would be both ultimate and disastrous.

An Electronic House of Cards

This [illegible] can probably be compounded for a few more decades. Missiles will bring anti-missiles, and anti-missiles will bring anti-anti-missiles. But inevitably, this whole electronic house of cards will reach a point where it can be constructed no higher.

At that point we shall have come to the peak of this whole incredible dilemma into which the world is shoving itself. And when that time comes there will be little we can do other than to settle down uneasily, smother our fears, and attempt to live in a thickening shadow of death.

Should this situation come to pass, we would have but one single and thin thread to cling to. We call it rationale or reason. We reason that no Government, no single group of men - indeed, not even one willful individual - would be so foolhardy, so reckless, as to precipitate a war which would most surely end in mutual destruction.

Was Hitler Amenable to Reason?

This reasoning may have the benefit of logic, but even logic sometimes goes awry. How can we assume that reason will prevail in a crisis when there is ordinarily so little reason among men. To those who would take comfort in the likelihood of an atomic peace to be secured solely by rationale and reason, I would recall the lapse of reason in a bunker under the Reich Chancellery in Berlin. It failed before, it can fail again.

Have we already gone too far in this search for peace through the accumulation of peril? Is there any way to halt this trend - or must we push on with new devices until we inevitably come to judgment before the atom. I believe there is a way out, and I believe it because I have acquired a great respect for human intelligence.

It may be that the problem of accommodation in a world split by rival ideologies is more difficult than those with which we have struggled in the construction of harmonious societies. But I believe, too, that if we apply to these human problems,

M. Muddah's First Cake . . . Walk. A play in half the [illegible]

"Man, I gotta great idea. Yeah I'm talking to you, [illegible] cowa, cold, Clifford, councilors and especially about [illegible] What'd ameen, "How come?" Cause it's time for to walken Kake. That's how come."

--"Walken fo de what?"

--Kake, man, Kake"

- Huh?"

--"Ya know, Circular. With frosting . . . like ya mudda makes.

- "I ain't got no muddah."

--"O.K., O.K. so like your grandmuddah makes?"

--"Who says my grandmuddah makes? My grandmuddah bake with nobody see."

-- Maybe that's how come you don't got no muddah . . . but you wanna know about cake walk or not, Huh?"

- "O.K. Just no more cracks about my grandmuddah, a ha

--"Cheezzce! What's wich you anyhow, Can't ya even take a joke? Ya know, joke: funny, ha ha."

--"Well whadya gotta make fun of my grandmuddah for, huh? Can't ya las of it?"

- "Now look who's the wise guy."

--"Whadyyah got some kind of a complex or somethen? My grandmuddah always give you clothes for Christmas? Huh?"

--"MI gotta complex!"

--"Yeay, complex . . . the stuff my muddah useta buy in the stoeah. Ya know it's guys like you that break up happy families, seperate bruddahs from sistahs and . . .

- "WAIT A SECOND WILLYA? Just calm down and restrain more psicotic tendencies, Cheezzce! Whatdy you some new kind a nut or somethen? Ya wanna hear about cake walk or not?

- "Yeah I wanna hear about cake walk, and if you'd just stick the subject for about a second I could find out what it's all about never seen any body get so sidetracked. Whatdayoustudent to teacher or sumthen? It's guys like you that . . .

--"WAIT A MINUTE. Down, ace, down. Just do me a favor will Just a little fabor. Yah know, like a promise only quicker."

- "Whadya want?"

--"Just go to cake walk yourself, O.K.?"

--"Whadya mean, BY MYSELF. You against dating too! It's like you that . . ."

--"JUSTHOLDITASECONDWILLYA. . .please! You got ticket

--"Yeah, but I still. . ."

--"You gotta date?"

--Yeah, but. . ."

--"GREAT' Then you'll find out all about it yourself . . . I with your date. Seeya then." (exit rapidly.)

The author of the famed "wastebaske-t" hopes you'll see for yourself too . . . I mean with your date. Enjoy yourself, and may this be our greatest cake walk yet'

p.s. If you drink, don't park. Accidents cause people'''

Founded in 1883. Subscription rate, $4.00 per year; single copy cents. Second-Class Postage Paid at Burlington, Vermont.

STUDENTES

...g called into the ... Women's Office ... because of failing to Sign ... out Twice

..., another one of And it is definitely ... day of a date. Appointments ... as have relatively little ...ance. I have been sitting ... exactly 31 minutes, and ... each click of the clock the ... ordeal acquires a ... more ominous over- ... 3:45 and

... Miss Emerson will ... now."

... happy day! Strength, forti- ..., courage a deep ... breath, a half a dozen steps, a left turn

"Good afternoon, Miss Emerson."

"Hello Jane. It certainly is cold today, isn't it? I'm ready for ... and winter hasn't even started well yet. Don't you agree, or ... you a skier?"

THE OPENING GAMBIT

(Actually, my skill at skiing leaves much to be desired, but that ... is neither here nor there. Miss Emerson has no interest in me ... for putting the captive at ease for a few brief, but never the- ... effective, seconds. Once the more or less relaxed atmosphere ... been established, the conversation begins its gradual down-to- ...-of-the-matter trend. The transition takes the form of a guess- ... game, an opportunity for the college woman, i.e. the maturing ... to take the initiative.)

"Now Jane, I suppose you know why I've called you in here, don't ..."

(Voice tone has assumed a more serious character for the purpose ... intensifying the inevitable pause that follows. An accompanying ...-glare serves to accentuate one's uneasiness. With such a setting, ...re is no alternative but to plunge bravely on, headlong into the ...re.)

"Yes, Dean Emerson. I guess it's because twice I've forgotten to ...gn out. I'm really sorry, and I have no excuses to offer. It was just ...lain carelessness on my part."

THE BUILD-UP

(Oh, that my hypocritical statement might be readily received and ... that I might be equally as readily dismissed, but leave us dispense ... with idle wishful thinking. There is a pause and that awful, steady ... glare for purposes of increasing my discomfort. Then, the glare ...ftens slightly, and the path of doom does a quick somersault in the ...r. Step three is the build-her-up-to-make-her-feel-a-guilt-for- ...-her-lack-of-responsibility line.)

"Now Jane, you aren't basically an irresponsible or inconsiderate ...ndividual. Your scholarship record is good, you are well-liked by ...our classmates and professors, and you hold responsible positions ...n a number of organizations within the University family."

(Another one of those apropos pauses to intensify the effect. I very ...politely let this new revelation sink in ---- I'm wonderful, but That inevitable "but;" next comes the qualifying clause.)

"*But*, you must remember that in community living you must be ...constantly considerate of those around you. You must abide by the ...rules of the group, both for your own good and the good of others . . ."

(I am now wishing for another pause and the opportunity to say, "Yes, ma'am, you're right, and from now on I'll be more thoughtful ...and considerate," then take heel quickly, but graciously, and escape. ...But also, no pause, thus no opportunity, and hence no escape. It is ...now time for the fourth level of development: the subject ---- my ...self-evaluation of my life.)

"You must care very little for your life to take such chances with ...it. In failing to sign out you are taking quite a risk. If no one has ...knowledge as to your whereabouts, you may well never be missed at ...house closing time, and if you were in danger, we would have no ...knowledge of it. Our system is not for the purpose of, as you would ...say, keeping 'tabs' on you. Rather, it is intended to protect you, to ...act as a safeguard for you. Life is very special, and an individual ...possesses only one chance"

(Let's see, I must go to the library tonight and do that psych. out- ...side reading and look up some material for my history paper oops! almost forgot the Cabinet meeting at 7:00. Oh well, I'll go to ...the library after that I wonder what I have to wear to the party ...Saturday night. Maybe Sue's blue dress, it- ---"Yes, Miss Emerson, ...I realize that's true." ---- If I really settle down to some concen- ...trated work, I can get that history paper done before the week end Oh darm, I forgot to sign out for supper. I hope Sue remember- ...ed -- - "Oh, I agree!" ---- Maybe Ann's dress with)

"Also, how would we contact you in case of an emergence?"

(Now that's an arbitrary question; I *know* she doesn't expect an ...answer. The fifteen minute disertation is terminating, and it is time ...to move on to my mother.)

"Now Jane, when you are at home, I'm sure you tell your mother ...where you're going when you go out."

(I can't take any more. It's time for a polite rebuttal.)

"Sometimes I do, Dean Emerson, but my mother doesn't demand ...that I report in and out. Of course, I realize that in the case of a ...University it is necessary to have a sign-out system, but I don't ...think you can liken it to my practices at home."

(Immediately!)

"Your mother must have very little concern for your welfare. It ...seems to me that"

(What she's saying is that I am the product of a loveless home; my ...mother doesn't love me! I am beginning to lose my temper, but how ...can one refute such an accusation and still be diplomatic, and one *must* maintain diplomacy with the deans! A few tears of sheer anger ...are rolling down my cheeks. She's going to think they're tears of ...remorse. I catch a flicker of a smile of satisfaction crossing her ...face as she plunges into the windup. A cautious peek at my watch ...reveals the time to be 5:00.)

Carol Tyler, a recent graduate, was president of her sorority and a member of Mortar Board honorary.

Dellin Criticizes Rewriting Of Bulgarian History

The fine hand of Communist ...ering has been at work in ...Bulgarian history but, "even at the cost of ridicule," has attempted to hide it, Communist ...ds.

Dr. L.A.D. Dellin, associate professor of economics at UVM, reports the Communist revision of Bulgarian history not only endeavors to apply arbitrary periodization of history and a standard analysis of class divisions where they obviously do not fit, but tries to bring off "the retroactive projection of the adulation of the Soviets into the past in an attempt to rewrite the entire thirteen-country-long history of the Bulgarian nation".

Dellin, author of a book on Bulgaria which is considered a standard text, bases his criticism of the Communist re-write on a comparison of a two-volume *History of Bulgaria* published by the Bulgarian Academy of Sciences in 1954-55 with historical ma-

Prof. Dellin, Expert on Bulgaria. Credit: S.P.S.

terials preceding the Communist take over of Bulgaria in 1944.

The original work has ...mble in Bulgarian historical publications between the Communist seizure of power and the reorganization of the Institute for Bulgarian History in 1950, gave way to a rapid and comprehensive Sovietization of Bulgarian historiography, Dellin asserts.

"Immediate reason," he adds, "was the Party assignment to the Bulgarian Academy to write a 'marxist history.'"

"The history had to be written, to quote from the directive of the Communist President of the Academy, 'with a political edge and purpose,' in order to become a tool in the hands of and influence the people . . . so that communism might be victorious in our country, in the Balkans, and in the entire world.'"

In short, Prof. Dellin concludes, "the re-writing of Bulgarian history offers a rare and classic example of direct Soviet intervention in the recording and interpretation of history to make it serve political ends.

Nadworny Writes For Ec. Journal

A University of Vermont economist has contributed an article to a special issue of Industrial Engineering.

Prof. Milton J. Nadworny, acting chairman of the department of commerce and economics at Vermont, has authored a paper on "Frank and Lillian Gilbreth and Industrial Relations" which will appear in the March-April issue of the Journal of Industrial Engineering and in a reprint issue containing a number of special papers on the Gilbreths.

The reprint issue will include papers to be delivered at the annual meeting in May of the American Institute of Industrial Engineers. The meeting will honor the Gilbreths.

PROFESSORES

Mr. James O'Hara, of the Classics Department, has submitted his second Professores column. It's timely message should prove inspirational during this festival season.

...ing one feature ..., have emerged, to the public mind, into their sideburned counterfeits of Hollywood.

Those who survive in the realm of public myth have no complex histories to confuse the credulous but usually heroic communication. The most fortunate of these truncated heroes died, like Casey Jones, at the moment of their apotheosis, hand on the throttle, and went at one moment into legend and the grave.

In general, however, the unfortunate hero lives on, vainly trying to recapture or forget his brief moment of glory, fat and balding, referees wrestling matches in obscure villages; Jack Dempsey, the tiger of the ring, feeds deferentially the fat faces of café society and relives for journalistic filler the all-too-brief long count.

These pathetic ruins of Ozymandias we encounter only seldom, but chance and the commercial value of Christmas have combined to force on us, almost annually, the consideration of another more pathetic folk hero--Rudolph, the Red-Nosed Reindeer. His story is too well known to need more than brief recapitulation here. The temptation is to call him an ugly duckling, redeemed by the very cause of his ugliness and made a thing of beauty. Not so, however. The ugly duckling, of course, became a swan forever, while Rudolph's glory was only transient.

An unhappy child, disfigured by a huge and brilliantly red nose, he was undoubtedly repulsive to many other ways. The glare of his nose, we may assume, gave him a permanent squint, made his eyes red-rimmed and watery, and withheld from him that chief solace of the unloved child, the ability to read. *Tout comprendre* may be *tout pardonner*, but while we may pity him, we cannot believe that he had many friends. Neglected at home and at school, ridiculed by all, his personality was undoubtedly all thorn and no rose.

That temperature inversion which, by fogging in the airfield, forced Santa Claus to employ Rudolph, must have been at best only a mixed blessing to the introverted reindeer. Undoubtedly his reaction to his sudden and worldwide fame was to disguise his timidity under an assumption of extroverted arrogance, to bluster, drink too much, tell bad jokes, and slap casual acquaintances on the back. The year after his famous feat he was probably a trial even to the most humble of his sycophants. When the next Christmas eve, and the one after that, proved to be cloudless and moonlit, these toadies were undoubtedly only too happy to drop away. Rudolph was left unattended, his only salon the benches in front of the post office, his only audience those elderly, unshaven feeble-minded reindeer too weak or lazy to move away when he appeared.

The rest of the story is only too certain. We hear him petitioning Santa Claus for some sinecure in the government, overpraising both Claus and himself, dwelling at more than accustomed length on the value of the service he had rendered during that memorable eve. Then we hear Claus's short-tempered answer: he admits that the Capitoline geese were praised when, by their cackling, they saved Rome; but he is not aware that they were made senators.

Rejected by all, his nose tarnished and his life spoiled by his own heroic achievement, the hero ends his own life by short-circuiting himself in a rented room.

Happy Kake Walk!

Origin of "Cotton Babes" Belongs to KW Tradition

by Linda Montgomery

Each year, as the month of February arrives and Kake Walk approaches, the UVM campus is filled with the strains of Percy Wenrich's "Cotton Babes." Since 1913, "Cotton Babes" has been the theme song for Kake Walk.

At the time it was popular, "Cotton Babes" was a favorite 1914 waltzing tempo, since a year, Percy Wenrich's song pleases the present glory.

Little known to Vermont is the fact that the composer of "Cotton Babes" was one of the most famous and productive songwriters of the 1900's and 20's. Wenrich is still remembered by music lovers for his biggest hits which included "Moonlight Bay", "Put on Your Old Gray Bonnet" and "When You Were a Tulip and I Were a Boy Boy Blue." When "Cotton Babes" became the UVM theme song for Kake Walk, the music was first played by the Barling Co. Military Band, under the direction of George D. Sherman. Since 1925, Joseph Lechner was the only one who ever performed "Cotton Babes". When the Hayward Building burned down in 1929, Lechner rewrote Wenrich's "Cotton Babes" from memory, thus saving the melody for the sake of posterity.

Percy Wenrich was born in Joplin, Missouri in 1887. His father loved to write music for political conventions and rallies in which he was usually involved. His mother, an accomplished musician taught him to play the piano and the organ. Showing his musical talent in his youth, Wenrich used to perform his compositions with the aid of his pistol at political rallies. At the age of twenty-one, Percy was sent to the Chicago Musical College to study the organ. However, once he had been removed from the watchful eyes of his parents, he broke away from his interest in the organ and began to write popular songs. As is the way with many young artists, Wenrich's first attempts were unsuccessful. His first breakthrough came when Frank Rose of Rose and Tapper Music Publishers gave Wenrich the opportunity to write a song about Mexico. Rose, having just returned from Mexico thought there might be potential in such a song and even supplied the young writer with the title, "Sahara Mexica." Along with this publication was another song, "Just Because I'm From Missouri." His immediate success from these songs established Wenrich in the songwriting business.

When his profession was on the downgrade and Wenrich was about to return home to Joplin, he landed a job playing songs in the music department of Gimbel's Milwaukee department store. It was then that another song of his became a local hit - "Under The Tropical Moon." This provided Wenrich with enough confidence and money to get to New York. The road from here was not all clear sailing, but in the following years several other songs, such as "Rainbow" which established him as a professional composer, led him on to success. One of his songs, "Put On Your Old Gray Bonnet", became President Wilson's favorite song. In the fruitful years that followed, Percy Wenrich composed such greats as "Moonlight Bay" and "When You Were a Tulip an' I Were a Boy Boy Blue."

Wenrich, although still composing, set up his own publishing firm in partnership with Homer Howard which he soon sold to Leo Feist along with the rights to publish his songs. During World War I, Wenrich produced such war hits as "Where Do We Go From Here, Boys," which was sung to the Marines. This was Wenrich's last great popular song but not his last success.

Turning to the musical stage, Wenrich produced Castles In The Sky, an operetta on collaboration with Bert Peck), and The Light Girl, a musical comedy. From 1914 till 1929, Percy Wenrich toured the vaudeville circuit with his wife, Dell, Connelly).

After his retirement from vaudeville, the composer lived in Hollywood until he was stricken with tuberculosis. He and his wife moved to Saranac Lake where she too became ill and was hospitalized for the rest of her life. During this time, Wenrich became an ardent member of the Lambs. In 1948, he wrote "Missouri, My State". His last musical effort was in 1952 when the Civil Air Patrol asked Wenrich to compose an official song. The completion and acceptance of his work, "Cadets of the Civil Air Patrol" - was too much for the elated composer and several days later he died, in March of 1952.

But every year, as there is a tense silence a drop of the handkerchief and the "Cotton Babes" melody fills the auditorium marking the beginning of a new Kake Walk, Percy Wenrich composer of so many well-known hits lives again on the UVM campus.

Percy Wenrich, the composer of "Cotton Babes", shown at home in Hollywood before his recent death.

Cynic Cover Hosts Kappa Sig Walkers

The Kappa Sigma Fraternity Kake Walker's grace this year's Kake Walk *Cynic* cover. They are in the classical starting pose of the walkers. The Kappa Sigma Walkers are Jeff Harvey and Tom Eldridge. Jeff is a Junior from St. Albans enrolled in Education. Tom is a Senior in Arts and Science from Rouses Point, N.Y.

The color photographs for the front and back covers were taken by Mr. Horace Eldred, head of the University's Audio-Visual Services, and Mr. Morton Lord. This is the third year that the Audio-Visual Service has taken the pictures for the cover. T also do their own developing, whole process taking about hours. The final product is transparency which is then s to the George Little Press, *Cynic's* regular printers. Rep duction of this transparenc done in a four color offset met by the press.

The UVM *Cynic* is the f school newspaper in the U States to print its covers color. The first color cover the Kake Walk issue appe in 1954. Since then, many sch throughout the country h adopted this technique for spe issues.

PASQUALE'S

Spaghetti & Pizza House

WE SPECIALIZE IN COOKING YOUR SUNDAY DINNER

[illegible] Avenue Burlington, Vermont

After assessing the 15 entr in the Kake Walk poster com this year, the judges, Mrs. Mil Miss Caldwell, and Mr. Mehl ter, considered that of Wa Gibson, '62, to be the pos worthy of receiving the tro in the form of a cake on Fri evening, Feb. 23. Wayne's ent judged on originality, artis skill, conciseness of informat and general attractiven brings us from the past contemporary Kake Walkers b to the more traditional, realis high stepper.

Born in Island Pond, Vt., Wa attended Brighton High Sch during which time he took a co mercial art course via the mail. His interest in art beca greater when he began draw for the Hart Sign Co. of Burl ton in the summer of his fre man year at UVM. Since time he has continued his work for this firm part t Although Wayne placed secon a Northeastern Vermont Art Exhibition, this is his "first."

At present the winner is st ing under Francis Colburn; he confesses that this is fourth semester in Drawing Painting: Planning a caree commercial art, Wayne hop enter the Air Force Offic Candidate School after gra where he will continue tra in this field.

Royalty Relives Kake Walk '61

Last year UVM's professors and administration live under the impression that second semester begins the first week of February but, in reality, second semester doesn't appear to begin until the last strains of "Cotton Babes" have faded away and Kake Walk ends. For two people each year, Kake Walk magic lives on.

"Cotton Babes", roses, a crown and a robe, - KAKE WALK, '61 - and for Bonnie Burgess, 1961 Kake Walk Queen, the magic of Kake Walk lives on.

Alpha Chi Omega's Bonnie Lassie, a resident of Brattleboro, Vermont, is a senior majoring in elementary education. In addition to reigning as last year's Kake Walk Queen, Bonnie has been scholarship chairman of Alpha Chi Omega Sorority, served on SA Council for three years, was a member of Staff and Sanral (junior women's honorary), was a WSGA House President, and was this year's Freshman Orientation Co-Chairman.

Bonnie plans on attending this year's Kake Walk festivities and on seeing this year's queen crowned. By the way guys, forget it, Bonnie is engaged to Alan MacLean, '62.

Kake Walk Queen and King - Bonnie and Bob. Credit: S.P.S.

Kappa Sig's "Bear", Mike Fearo, a Burlingtonian, was both surprised and honored at having been elected to Kake Walk Royalty. As Mike put it: "Being elected Kake Walk King was extremely satisfying because of all the work that went into it. It was an honor to represent UVM and Kappa Sig and, of course, I was surprised!"

Mike is famous at UVM for more than being Kake Walk King. He's a history major in the Class of 1962 and plans on going on to another university after graduation to get his B.S. in Physical Education, which is currently his minor. Mike would like to coach - "Baseball, it's got to be baseball!" - A varsity football and baseball player in his sophomore year, Mike has also been an officer of Newman Club and has been secretary and treasurer of Kappa Sigma fraternity.

Mike has a sister, Judy, who is a Marine and who is stationed at Camp LeJune, North Carolina.

Last year's Kake Walk royalty have this to say to all those people seeing Kake Walk for the first time - "Just let yourself go - let yourself have a good time. And we'll see you at the 65th Kake Walk!"

Jaffe, Levin, And Matthews- These Are The Men Behind The Kake Walk Scenes

Kake Walk Directors - Joe Levin, Gabe Jaffe, Ralph Matthews. (Credit: Audio-Visual Services)

Kake Walk directors Gabe Jaffe, Joe Levin and Ralph Matthews have spent many hours of endless and enjoyable work preparing Kake Walk, 1962.

The directors of 1962 Kake Walk began work last March soon after the 1961 festivities were over. Fall publicity, band negotiations, and financial work were all the subjects of many summer working hours. Skit rules are out now, and skits have been selected for presentation.

A profit which will be placed on the IFC controlled Kake Walk Disposition Fund. This is distributed to activities like radio station WRUV, Catalina Club, etc. Actually, the Kake Walk Committee is a sub-committee of the Interfraternity Council.

The main problem confronting the committee this year seems to be rising costs. The only source of revenue is the tickets sold for the ball, jazz concert, and walking. Trophies alone for various Kake Walk competitions come to $1,200, and this includes a substantial school discount.

example: In 1960, over 800 alumni applied for tickets, less than 700 of these requests were granted. The number of ticket requests from alumni would have been substantially larger if not for the necessary operation of an alumni preference system where members of the class of the previous years and classes of five year intervals from then on receive preference. An inestimable number of outside applications and student and faculty requests were also turned down because of lack of space. On the basis of these figures, the directors plan to be able to fill the new gym to capacity.

It is also the responsibility of the directors to pick the judges for skits and walking. They have developed a formula calling for qualifications or previous experience, several years on campus of willingness to participate in the student-faculty activity.

The new gym will be a great thing for the admires of Kake Walk - friends and alumni alike. They will all be able, in all likelyhood, to obtain tickets for the walking and skits, which in the past has not been true. Statistics from previous years, for

Assistant Kake Walk Directors, from L. to r. are Frank Amato, Jim Neuman, Bill Cullen and Ned Adams. Credit: Audio-Visual Service

Undergrad Science Ed. Program Receives Grant

The University of Vermont has been awarded nearly $[illegible] by the National Science Foundation for Undergraduate Science Education programs.

The sum of $14,840 has been awarded to Bennett B. Murdock, Jr., department of psychology. And $7,010 to Clinton Cook, Professor of the department of chemistry to conduct summer research programs.

Undergraduate research has been a formal part of the academic program in chemistry at Vermont for more than 60 years but this is the first time that a NSF grant has been awarded. Dr. Cook said that the grant will enable four students to participate in summer research.

Five undergraduates will take part in 10 weeks of research in psychology according to Dr. Murdock. This year's NSF grant is for a two-year period. For the pasttwo summers these students had conducted research under a similar NSF grant.

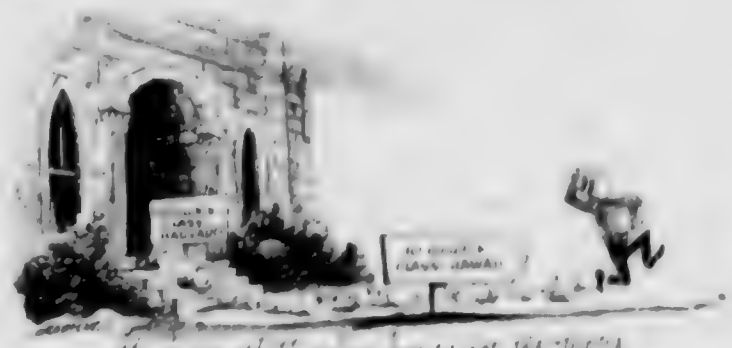
The Undergraduate Science Education program is designed to develop superior students of science in their understanding of research investigative procedures and scientific methods as well as concepts and materials of science.

On Campus with Max Shulman

Author of "Rally Round The Flag, Boys!" "The Many Loves of Dobie Gillis," etc.

UNITED WE STAND

The entire academic world is agog over the success of the Associated Colleges Plan - ACP for short. I mean, you go to any campus in the country these days and you will see students and faculty dancing on the green, blowing paper whistles, grab-bing each other by the elbows and yelling "Avanti Dear ACP! Charley - like you!"



And who can blame them? The ACP is not only simply brilliant, but also brilliant-simple. All it is is a [illegible] federation of small colleges. Let's say, for example, that in seven region we have a group of small colleges each with its own academic specialty. Small College No. 1 let's say, has a fine language department, Small College No. 2 let's say, has a fine science department. No. 3 has fine music department, etc. etc.

Well sir, under the ACP these various colleges federate. A student in any one of the colleges may take courses in the faculty of any of the other colleges and - here's the beauty part! - he will receive credit for the course at his home college. Thus he enjoys all the advantages of a big university without losing the comfy coziness of a small college.

Well sir, you can see what a good idea the ACP is. I respectfully submit, however, that just because a thing is good is no reason not to try to make it better. Take, for instance, Marlboro Cigarettes. Marlboro were good from the very beginning, and people found out quickly and sales zoomed. But did the makers of Marlboro say, "Okay, we've got it made. Let's relax"? Well sir, is that what you think, you don't know the makers? They did *not* relax. They took their good Marlboros and kept improving them. They improved the filter, improved the blend, improved the pack. They researched and developed until today Marlboro is just about the most civilized cigarette you can put a match to. There are, in fact, some people who find Marlboros so admirable they can't bear to put a match to them. They just sit with a single Marlboro at hand and admire it for ten, twelve years or so. The makers of Marlboro are of course deeply touched by this - except for J. Ronnie Sigafoos, the sales manager.

But I digress. The ACP, I say, is good but it can be better. Why should the plan be confined to small colleges? Why should it be confined to a limited region? Why not include all colleges and universities big and small wherever they are?

Let's start such a federation. Let's call it the "Bigger Associated Colleges To Encourage Richer Intellectual Activity - BACTERIA, for short!"

What a bright new world BACTERIA opens up. Take for example a typical college student, Horatio Sigafoos (undoubtedly of the Marlboro Sigafoos's). Horatio, a bright lad in [illegible], is currently majoring in [illegible] at the University of Iowa. Under the BACTERIA plan, Horatio could spend a term at Kentucky where he can study [illegible] and at the same time broaden his [illegible]. Then he could transfer to Harvard for a course in government. Then to Minnesota for a course in [illegible]. Then to Harvard for a course in [illegible].

I admit there are still [illegible] to BACTERIA. How, for instance, could Horatio attend a 9 o'clock class at Harvard, a 10 o'clock class at Minnesota, and also keep his lunch date at Kentucky? It would be difficult, there is no doubt about it, but I feel sure that Yankee ingenuity, which has given us the [illegible], the [illegible] and [illegible], will find a way. Besides, Americans love to be challenged. Tell them that something can't be done, and they will [illegible] it. Tell them that [illegible] and they will [illegible] it. Tell them that [illegible] and they will [illegible] it. Tell them that [illegible] and they will [illegible] it.

• • •

Three cheers for American ingenuity, which gave us the ACP, the collarbone and M&M . . . that's the Mighty Good Makin's you get in Marlboro, the filter cigarette with the unaltered taste. Settle back and enjoy one. You get a lot to like.

Vermont Campus Boasts Modern Expansion

By Maureen Galligan

Bailey Library

Patterson Hall

Men's Gym

Lafayette Hall

New Men's Dorm

completion feasible. The Medical Alumni Building contains the departments of Medical Microbiology, and Pathology besides laboratories for clinical research. Phase II which will adjoin the Medical Alumni Building is expected to be used by the Biochemistry, Medical Microbiology, Pharmacology, and Animal Care Units. Phase III is still in the planning stage but will probably cost around millions.

When the women students returned to UVM in the fall of 1961, they found a new dorm Patterson, ready for occupancy. Patterson provides rooms for 136 women students.

Several other important buildings have been occupied during the 1961-62 school year. The Alice Emma Blundell Home Management House which opened in the fall is one of these. It is located on Redstone Campus and is used by seniors in Home Economics.

Homecoming Week end this year marked the dedication of what is perhaps the most exciting new structure on campus, Bailey Library. Bailey was formally opened to students in November after Thanksgiving Recess. It is being financed by a state bonding issue along with a student library fee. UVM students also helped to facilitate the tremendous move from buildings to Bailey by forming operation BB to move the books.

Besides providing adequate resources for UVM studnets today, Bailey is built for future expansion of the library's collection since it can hold over half a million volumes.

Men students returning for the second semester found Marsh, Tupper, and Austin dormitories ready for them. These dorms contain a kitchen and lounge area, housing facilities and the resident's apartment.

Planned for UVM's future and already under construction, besides those building already mentioned are a new engineering building and the new gymnasium field house which will provide more space for future Kake Walks.

Senior students interested in the Boston College and the University of Chicago Law Scholarships, should submit their applications before March 5th to either Professor R.N.B. Haugen or Lyman J. Gould in the political science department.

SUMMER JOBS
in EUROPE

WRITE TO: AMERICAN STUDENT INFORMATION SERVICE,
22 AVE. DE LA LIBERTÉ ● GRAND DUCHY OF LUXEMBOURG

IBM WILL INTERVIEW MARCH 6-7

Candidates for Bachelor's or Master's Degrees are invited to discuss opportunities in:

Engineering and Sales

This is a unique opportunity to find out about the many career opportunities at IBM. The IBM representative can discuss with you typical jobs, various training programs, chances for advanced education, financial rewards, and company benefits—all important factors that affect your future.

SOME FACTS ABOUT IBM

An Unusual Growth Story: IBM has had one of the exceptional growth rates in industry. It has been a planned growth based on ideas and products having an almost infinite application in our modern economy.

Diverse and Important Products: IBM develops, manufactures and markets a wide range of products in the data processing field. IBM computers and allied products play a vital role in the operations of business, industry, science and government.

Across the Country Operations: Laboratory and manufacturing facilities are located in Endicott, Kingston, Owego, Poughkeepsie, Vestal, Yorktown, N. Y.; Burlington, Vermont; Lexington, Ky.; San Jose, Calif.; Bethesda, Md.; and Rochester, Minn. Headquarters is located in New York City with sales and service offices in 180 major cities throughout the United States.

The Accent is on the Individual: No matter what type of work a person does at IBM, he is given all the responsibility he is able to handle, and all the support he needs to do his job. Advancement is by merit.

The areas in which IBM is engaged have an unlimited future. This is your opportunity to find out what that future has to offer you. All qualified applicants will be considered for employment without regard to race, creed, color or national origin.

Your placement officer can help you to learn more about IBM. He can give you literature describing the many career fields at IBM. He will arrange an appointment for you with the IBM representative. If you cannot attend an interview, write or call the manager of the nearest IBM office:

J. F. Golden, Branch Manager
IBM Corporation, Dept. 882
54 State Street
Montpelier, Vt.
Phone: CA 3-3417

IBM. You naturally have a better chance to grow with a growth company

Essentials Needed In Kake Walking

Thighs are parallel to ground and toes are pointed down before rest of leg is kicked out.

Head is to rear forming arch with shoulders. Leg and knee are straight and toe is pointed.

Head and Shoulders

a. Head should be in rear [illegible] and pleasing.

Kick

a. Thighs should be brought on parallel to the ground before rest of leg is extended.

b. Leg should be straight.

c. Toes should be pointed.

Teamwork and Smoothness

a. Workers should maintain high degree of coordination.

b. Rapidity of movement ought not necessarily be considered desirable over slow, rapid and more decisive action.

c. Hands when raised to or above head should have fingers extended and separated.

KAKE WALK SCORING

Position of head and [illegible]	[illegible] points
Kick (2 2/8 Points for Kick	
Points For Best Step)	50 points
Teamwork and smoothness	40 points
Stunts and special steps	5 points
The peerade of walkers will not count in the judging	

Skit Scoring Points

Presentation		
A. Teamwork and smoothness	25	50
B. Delivery and voice	25	
Plot		
A. Continuity	20	40
B. Originality	20	
Properties and costumes		10

The point scoring for the skits in this year's Kake Walk have been changed. Previously, continuity counted 15 and originality 10 for a total of 25. This year they will count 20 apiece for a total of 40. These 40 points comprise the plot of the skit.

The Kake Walk judges are as follows: Walking - Friday, I. Sproston, P. Moody, E.W. Steele. Walking, Saturday: R. Babcock, E. Bartlett, B. Murdock.

Skits, Friday; B. Gilfeland, A. Tuttell, M. Nadworny, Wite. Saturday; V. Trotter (Mrs.), L. VanBenthuysen, J. Trevithick.

Poster, T. Mills (Mrs.), M. Caldwell (Miss), I. Meherter, sculptures, T. Andersen, L. W. Jones (Capt.), D. Cregg.

Peace Corps Ed. Project Asks For Volunteers

[illegible] project with the [illegible] Government to [illegible] Peace Corps Executive [illegible] to implement [illegible] Freedom & Justice [illegible] of Liberia, [illegible] Volunteers will [illegible] participating in Liberia's [illegible] education [illegible].

[illegible] Volunteers [illegible] from the [illegible] Peace Corps [illegible] Development. [illegible] of [illegible] long [illegible] extension [illegible] training [illegible] for [illegible] high [illegible] schools, junior high [illegible] elementary schools. [illegible] Volunteers will [illegible] help [illegible] schools [illegible] provide [illegible] replacements [illegible] [illegible] who [illegible] to receive [illegible] training.

[illegible] 10 Volunteers [illegible] at the junior high [illegible] level in [illegible] mathematics, [illegible] science, [illegible] English, French, [illegible] crafts. Up to 20 Volunteers are needed at the senior high school level to teach general science, English, French and vocational guidance. In addition, up to 10 Volunteers have been requested for the teacher training schools in the fields of science, mathematics, English, [illegible] arts, and professional education.

Volunteers will be under the supervision of the Liberian Department of Education and of local school officials. They will be expected to teach a full schedule of courses and participate in the after-school activities. About one third will be located in Monrovia, the capital. The others will be assigned to a dozen other locations, primarily [illegible]. It is expected that at least two Volunteers will be assigned to each school.

To help support them in carrying out their teaching assignments, the Volunteers will bring with them a variety of instructional materials and equipment.

Middlebury's Weekend Competes With KW

February 22, 1962 marks the beginning of the thirty-first annual Middlebury College Winter Carnival. Every year over one thousand come to the College Snow Bowl, situated in the heart of the College's thirteen thousand acre mountain campus, to view some of the best skiing in the East. This year there are to be eight men's and seven women's teams competing. These include Colby, Dartmouth, and Williams for the men and St. Lawrence, University of Vermont and Skidmore for the women. Many eastern and national champions as well as 1964 Olympic hopefuls will be skiing in these events.

Middlebury's Carnival is the only entirely student organized event of its kind in the country. More than four hundred students, or one-third of the enrollment, actively participate in the preparation and execution of Carnival, making it an all-campus project.

One of the more important aspects of Carnival is hockey. Middlebury's 1961 hockey team, led by twice All-American captain, Phil Latreille, was both state and New England champions. This year the team has been sparked by Dates Fryberger, who was a second team All-American choice as a sophomore. Over the years, Middlebury has consistently produced outstanding hockey teams, and though a large part of the team was lost through graduation last year, Middlebury has been making a strong comeback in the past few weeks beating such teams as Dartmouth, Bowdoin and C.M.R., and last night playing West Point to a 3-3 tie in overtime.

This year the Carnival co-chairmen have selected a general theme - called "Mountains" - to create a center around which the Ice Show, Carnival Ball, Klondike Rush and the Ice Sculptures will form their individual interpretations. The annual Ice Show, this year called "Manhattan Mountains" or "A Day in New York" is student directed and designed, and stars many recipients of regional and national figure - skating awards. Ski events including cross-country, downhill slalom and of course jumping from the 50 meter jump, are held each afternoon, then climaxed by the social events each evening: Thursday, the Ice Show and basketball game with Clarkson; Friday hockey game with Amherst followed by the Carnival Ball featuring Russ Cole who has played in many prominent hotels in the East. At the ball a King and Queen of Carnival will be crowned to reign for the week end. Saturday's informal Klondike Rush, which has presented such entertainers as the Brothers Four, Duke Ellington, Lionel Hampton, and Louis Armstrong in the past, this year features "Cannonball Adderly" with his jazz quintet.

Is this the only reason for using Mennen Skin Bracer?

[illegible] Skin Bracer [illegible] [illegible] [illegible]

UVM Installs IBM Computing Center

[illegible] Vermont [illegible]

[illegible] the new [illegible] the library and the gym, another addition has come to the UVM campus, an IBM machine, located in the Computing Center, Room 102, Waterman. Installed [illegible] last March 15, the machine has already been kept busy computing.

Technically speaking, the IBM operates a [illegible] [illegible] it can add two numbers [illegible] a thousand [illegible] a second. It can also [illegible] a second.

In operating the machine, the "brain" of the IBM can [illegible] the nature of the problem and the way to calculate the answer. The machine, itself, then proceeds to compute the solution.

Eventually, it will be employed primarily for Education (U.S. teaching centers) and research. Those utilizing its potential storehouse of twenty thousand digits will be members of the faculty as well as Agricultural and Mechanical students.

Vermont Debaters Have A Successful Season

A quarter of "homegrown" debaters sparked the University of Vermont debate team to victory in 72 of 128 decisions during the first semester.

Marilyn Van Graber of Burlington and Bill Germain of Winooski posted the best won-lost records, each copping 14 of 18 decisions. Miss Van Graber is a senior and is president of the Lawrence Debate Club.

Elaine Zak of Burlington and Mike Cronin of Richmond were victorious in 12 of 16 matches.

Other outstanding records were: Gil Tornabene of Weston, Mass. (13-8), Betsy Lisman of Burlington (10-7), and Dan Newcomb of Norwich (8-6).

The UVM talkers got off to a fast start in the annual fall round robin which consists of teams from Dartmouth, Norwich, St. Michael;s and UVM, winning 12 of 16 debates.

[illegible] national tournament at [illegible] and 1954 placed third. [illegible] Vermont was ninth.

The second semester [illegible]

Feb. 2-3 - Harvard; [illegible] Dartmouth; 23-24 - [illegible] Tournament at the University of Maryland.

March 2-3 - Hofstra; [illegible] Boston University; [illegible] Brooklyn College; 22-24 - [illegible] gionals; 30-31 - LeMoyne College.

April 6-7 - New England [illegible] New Britain, Conn.; 13-14 - [illegible] milton College; Norwich [illegible] sity (pending); 14-22 - [illegible] Alpha (national forensic [illegible] ary) Tournament at Terre Haute, Ind.; 23-24 - Judge Mars[illegible] nament at Xavier University, Cincinnati, Ohio; 25-26 - [illegible] tionals at West Point (if [illegible] qualifies in Regionals).

Marilyn Van Graber at debate tournament. *Credit S[illegible]*

In the New York University Hall of Fame tournament, Vermont lost only twice in 10 outings and was almost as successful in the Pittsburgh Cross Examination, taking seven of 10 verdicts.

In the 16th Vermont Invitational debate which usually draws teams from around 40 colleges and universities, the host UVM team captured 22 decisions while losing 18. In this tournament, the team of Germain and Van Graber was undefeated. The same pair also maintained a clean slate in the St. Michael's and Vermont round robins.

Tournaments found the Vermont team at Hamilton College, Dartmouth, Rosemont College, St. Joseph's, RPI, and St. Anselm's.

The 1961-62 season marks the 51st year of debating at the University. In 1950 UVM won the

The Regionals on March 22-[illegible] will be held in Burlington w[illegible] about 25 teams from Regio[illegible] (New England and New Yor[illegible] participating. The top five tea[illegible] will qualify for the nationals [illegible] West Point.

Cast Chosen For Players Musical, Three Penny Oper[illegible]

Profs. Edward Feidner and Frank Lidral announce a joint production of the "Three-Penny Opera" by the Department of Music and the University Theater in the UVM Arena Theater on March 29, 30, 31 and April 1. The performances are a major feature of the University of Vermont Fine Arts Festival. All proceeds from the production will be used to establish a Creative Arts Building Fund.

The "Three-Penny Opera" has just finished a record 8-year engagement at the Theatre de Lys in New York. This marks the first time performing rights for the English version have been available to other organizations. The "Opera" is based on the popular early eighteenth century "Beggars Opera" and was adapted during the "Roaring Twenties" for the Berlin Theatre by Bert Brecht and Kurt Weill achieving instant success. The English translation was prepared by Marc Blitzstein with the encouragement of Lotte Lenya, Kurt Weill's widow, and a star in the original cast. The English version will be used in the production including such hit songs as "Mack the Knife" and the "Barbara Song".

The leads have been cast as follows:

The Street Singer is played by Bill Perlow; The Three Bums, by Don Kerr, Barbara [illegible] kin, and Barb Unger; and Jen[illegible] by Jeanie Cloutier.

Mack The Knife is portra[illegible] by Ralf Bode. Bill Kerr[illegible] and Phil Tarro handle the [illegible] of Rex Kimball and Tiger Br[illegible] respectively. Alice Zan[illegible] Lucy Brown and Filch [illegible] trayed by Bryant Reynol[illegible]

LIBRARY HOURS FOR KAKE WALK

Thursday: 7:45 AM - 5 PM
Friday: Closed
Saturday: 10 AM - 2 PM
Sunday: 2 - 10 PM

Alumni, parents, and [illegible] cordially invited to [illegible] building.

"De Cake" Is Symbol Of Kake Walk

The traditional symbol of Kake Walk, "de cake", which is given as a prize to the winners of the walking, skits, and sculptures.

by ARNOLD D. BERLINER

Like all traditions, the colorful cake awards of Kake Walk Night have deep and historic origins. The symbol of "de cake" has, for the most, a significant meaning, although he may be unaware of the origin of the cake's symbol.

It started in the deep South in the days of the gentleman farmer when plantation workers would celebrate the completion of the year's work with festivities similar to that of our own Kake Walk. The younger laborers would step and kick lively to the music of fiddles. Couples were judged, in the meantime, according to the precision of the grace and agility of their partners. One by one, pairs were eliminated until the winning couple was chosen. This last and final pair of precision dancers was awarded a giant and highly decorated cake. Thus, the origin of the presentation of the cake has evolved.

Sixty-two years ago, the entire tradition of the plantation workers was imitated by the Northern Yankee, it has stayed at UVM ever since. With the development of the Kake Walk tradition, there has been a corresponding increase of competition in various campus activities. Now candidates campaign for King and Queen of the Kake Walk Ball; fraternities and sororities compete for snow sculpture and Kake Walk poster awards. Skits with a common theme have also become an integral part of Kake Walk Holiday. Here the symbolic meaning of the cake appears once again. Cakes of different sizes are awarded to the winners in each of the above categories of competition. When one realizes the work that is involved in trying to win one of the Cakes, no matter what size it may be, the winner's ecstacy should be apparent to everyone present at Kake Walk Night.

Mademoiselle Announces Art And Fiction Contest

March 1st is the deadline for stries to MADEMOISELLE's 961-62 Art and College Fiction ntests. The annual competitions r women students offer cash izes and national recognition to winners. The two College tion Contest winners will reive $500 each and their work ll be published in MADEMOIELLE. Each of the two art ntest winners also will receive 00 and be asked to illustrate e of the winning Fiction Const stories for MILE publication.

MADEMOISELLE's Art Contest, which is open to students between eighteen and twenty-six, discovers imaginative fine artists. At least five samples of the artist's work must be submitted for the judging, and work in any media will be accepted. Judges for the 1961-62 Art Contest are Louise Nevelson, sculptress; Lloyd Goodrich, Director of the Whitney Museum of American Art; and Roger Schoening, Art Director of MADEMOISELLE.

MADEMOISELLE's College Fiction Contest is open to students enrolled in college or junior college. To enter the Contest, students must send one or more original stories of 2,500 to 5,000 words to MADEMOISELLE. All sotries must have fictitious characters and situations or will be disqualified.

Address entries to either the College Fiction Contest or the Art Contest, MADEMOISELLE, 420 Lexington Avenue, New York 17, New York. Additional information and contest rules may be obtained from the same address.

F. C. Marston, Faculty Advisor To Kake Walk

One of the most important behind-the-scene men of Kake Walk this year and four years previous to this is Frederic C. Martson, Jr., Professor of English. As faculty advisor of Kake Walk Dr. Marston takes an enthusiastic interest in his position. He feels that this traditional week end is a time when sprits are at a peak. One reason for his great interest in the preparation of Kake Walk stems from his observation that this is an all-campus project. Many individuals and organizations contribute to assure its success. Marston also believes that Kake Walk is a stimulant to creative thinking. It often results in many innovations which keep interest stimulated. As an example is the recent idea of selling recordings of the Kake Walk program to the general public.

Professor Marston is taking a leave of absence next year so he will not be able to participate in next year's big week end. However, the enthusiasm that he has brought to Kake Walk as advisor will still remain.

Kake Walk is not the only organization that will miss Dr. Marston. For quite a while he has coached the tennis team, and his absence will also affect this group.

On the scholastic side of Marston's life, he is well acquainted with Williams and Duke, having obtained his bachelor's and master's degrees from these colleges, respectively. A ten year period was spent teaching English at Brown University before Marston came to UVM in 1948. Besides the usual freshman and sophomore courses, this semester Dr. Marston is also teaching a course with a rather unique title, *Literature of the Insane Theatre*.

During his short leave of absence during the semester to follow, Marston will also take with him another well-known campus personality. His black point setter, Jenna, who is known to frequent favorite student hangouts.

My Kake Walk Date !

Something NEW has been added

for your greater skiing enjoyment!

It's the *New* Sunnyside Area . . . the *New* Double Chair Lift . . . and unique in New England – *New* high level novice trails, Fox and Vixen located entirely above the 2,500 ft. level

There's no better skiing anywhere in the East!

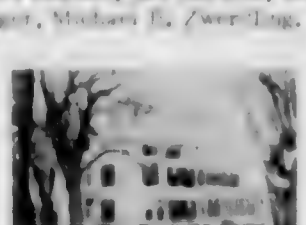
Greeks Capture 278 Men And 119 Women During Pledging



A total of 278 men at the University of Vermont have gone Greek. The 278 were pledged by the 14 fraternities on the UVM campus. Interviewed on the basis of scholarship and financial status, a factor the Dean of Students, the Panel Dean, Deans, and University Deans use.

Language Is More Than Words

(continued from page three)

theories. Then he gave a sentence telling that a certain part of Buffalo was a good place for [illegible] job. This illustrates the [illegible]ering of sentence parts.

Demonstrating his knowledge of linguistics, Dr. Smith gave a definition of language, "A system of arbitrary vocal symbols (voices with the face) through which human beings interact and cooperate in terms of common, cultural experiences." Then, as an anthropologist, he explained that insects do not have the power to do this because of the instinct that is "built into their germ plasm."

Dr. Smith has held his present position since 1956. An author and scholar who has taught at Barnard College, Brown, and Harvard. He also served in a consulting role to both state and federal governmental agencies. During World War II, Dr. Smith served as an education and information officer. Following the war, he was director of the Foreign Service Institute, language and linguistics division.

A summa cum laude graduate of Princeton, Dr. Smith also received his Master's and Doctorate from the New Jersey institution. He is a member of Phi Beta Kappa, is a fellow of the American Association for the Advancement of Science, is a member of the Linguistic Society of America, the Society of General Semantics, and the American Anthropology Association.

In closing, Dr. Smith pointed out the importance of our understanding of language in today's society, "We must understand ourselves to understand our fellows. We must understand the approach by which we communicate. If we do, we will be the first and only citizens of the world."

Dear Bullwinkle:

Although I am only 9 years old, I can lift anything I am strong. I like to lift things. I lift 100 pound weights. I lift planes all alone. Mommie says that this makes me the strongest man in the world. What do you say it makes me?

Big Dumb Dot

Dear Big Dumb Dot
Registered.

Bullwinkle

• • •

Dear Bullwinkle:

In the recent Los Angeles fire, I lost my home and all my furs and jewels. The newspaper and magazine photos during the fire showed my great beautifully. But do you think I should have done all that nude posing or was that in bad taste?

Lovely Hollywood Star

Dear Lovely Hollywood Star

People understood about the intense heat given off by the fire, so I doubt that anyone criticized. However, there was a lot of talk about the way you hampered the firemen by trying to autograph the hoses, nets, and trucks.

Bullwinkle

• • •

Dear Bullwinkle:

On a bet, I have been wearing a gorilla suit every day for 33 years. It's hot and heavy and I want to take it off. Do you think this would be fair?

Gorilla-suit Man

Dear Gorilla-suit Man:

I have no respect for a man who welshes on a bet. Anyway, no one would believe you were you anymore.

Bullwinkle

• • •

Dear Bullwinkle:

I have a complexion problem. The only 18 years old, I have tried everything. What would you suggest?

Frustrated

Dear Frustrated

Gain 300 pounds and no one will notice your face.

Bullwinkle

• • •

Dear Bullwinkle:

My wife says I'm a weak miserable coward, but I don't am. What can I do to prove I real strong type?

Mervin W

Dear Merv:

These things have to be once and for all! Hide be in the dark and wait for h when she comes in - wit manly strength you have - s with a two by four..

ROTC Cadets And Queen Receive Officer Rank

Left to right: Donald Connors, S1, Maurille Fournier, Brigade Commander, Martha Russell, Military Ball Queen, presented with a scroll by Robert Donahue, Brigade S4, and Maynard Ducatte, Brigade Executive Officer.

Sixteen Vermonters were among 27 University of Vermont cadets who received their ROTC officer rank at the ROTC cadet banquet Thursday.

The 27 will execute the various duties of each position during the spring semester. Cadet Colonel Maurille J. Fournier, Jr. of Barre was named brigade commander, highest ranking cadet position in the military science program.

Other key appointments included Maynard R. Ducatte, Lynbrook, N.Y., executive officer, brigade headquarters; and Donald R. Higgins, North Troy; John J. McGowan, Trenton, N.J.; and D. Gregory Pierce, St. Albans, battalion commanders. All four will carry the rank of cadet lieutenant colonel.

Dr. John F. Fey, UVM president, was the main speaker at the banquet.

Additional cadet ranks are: Cadet Major - Robert P. Donahue, Manchester, Conn.; Nicki H. Carmolli, Barre; Robert E. Boynton, Bellows Falls; H. Roy Paris, Burlington.

Cadet Captain - David L. Connors, Hampton, N.H.; James H. Viele, Burlington; Peter M. Sardel, Plainfield, N.J.; James S. Bowers, North Troy; A. Rudd Hendee, Rutland; Kendall R. Lawson, East Barre; Robert L. Dente, Barre; Thomas C. Shepard, Burlington; Arthur A. Altholz, New York City; Carleton L. Eck, Chelmsford, Mass.; Sherrill B. Nott, White River Junction; John T. Lazarus, Sxarsdale, N.Y.; John H. Mills, Milburn, N.J.

Cadet First Lieutenant - Gary K. Robinson, Orleans; Louis Dellefave, Seneca Falls, N.Y.; Phillip J. Judd, Burlington; Theodore A. Giebutowski, West Rutland; George M. Macary, Waterbury, Conn.

Martha Russell of Rutland received the rank of honorary cadet colonel. Honorary Cadet Lt. Colonels are Kay Sanderson, New York City, honorary first battalion commander; Barbara Wool, Burlington, honorary second battalion commander; and Susan Benton, Vergennes, honorary third battalion commander.

UVM Represented In New England Student Movement

Until this week the University of Vermont, through its students, has not been represented in the New England-wide Northern Student Movement Coordinating Committee. At a meeting held today the following students became Vermont's college contacts for the NSMCC: Lorraine Decker (TC-63), Craig Ewart (E-63), Emilie Gruppe (A-63), and William Fenhagen (C-65). Faculty advisors for the group are Dr. Paul Oren, and Daniel Schaaf of the Department of Sociology. We are aware that many persons might not be familiar with the aims of the Committee. They are as follows:

Purpose: To coordinate the efforts of autonomous civil rights groups on campuses in New England; regional organizations such as Student Christian Movement National Student Association Students for a Democratic Society, etc; and community organizations such as CORE, Urban League, the NAACP.

A. To provide an immediate opportunity for support - moral, physical and financial - of the Southern student movement.

B. To provide information concerning the extent and urgency of the racial problem in the U.S. with special focus on the dilemma of the Northern urban areas.

C. To provide immediate opportunity for cognizance of and action upon local problems; discrimination in housing, employment, public accommodations, slum redevelopment, education, social life.

D. To provide a foundation for an ongoing student movement throughout New England. This involves coordination of already existing agencies, establishing lines of communication between all agencies and forging a spirit of unified student expression on this issue.

Structure:

A. Local campus groups: May be either an autonomous civil rights group, a coordinating group composed of representatives from several civil rights groups, or a civil rights group within a larger organization. In any event it should be solely concerned with civil rights and represent the civil rights - oriented community on campus. The local body is the main vehicle for the action of the Northern student movement - each local group retains its right to determine what action it will take and what part it will play in regional action.

B. Regional Committees: A committee of representatives from several geographically related campuses, responsible for inter-campus communication and communication between coordinating committee and the local unit. Administrative tasks for inter-school action. Responsible for establishing relationships with community civil rights groups.

C. Coordinating Committee:

1. Staff function composed of students in New Haven area. Communication and publicity center, clearing house for information on northern problems and methods of action, speakers, southern situation. Set up liaisons with other student and community organizations.

2. Executive body. Composed of New Haven committee plus representatives from regional committees. Will confirm over-all policy and coordinate inter-regional actions.

Program: In that a Northern Student Movement must be created as much as coordinated, the following over-all program would seem the most fruitful.

A. Fund Drive: A response to the urgent need of the Student Non-Violent Coordinating Committee in the south, such a drive would also serve to give a concrete base to each local group and help create a sense of regional unity and the over-all spirit of a student movement. Speakers and information to be supplied by the coordinating committee. If carried out the communal, it would also help establish a wider base for the program of the local groups.

B. Local Action: While the fund drive is going ahead each local group should be forming a program of direct action on the local level or in cooperation with other schools in its region. Reference during the fund drive to this longer range program would facilitate transference of interest from the southern problem to the local one.

C. Continued support of the southern students through programs of public pressure on the government and programs involving northern students directly in the southern problem, both to be set up through the coordinating committee.

D. Direct involvement in northern urban problems via summer work shops in Harlem, Roxbury, etc.

Omar Bradley *(continued from page four)*

the energy, creativity, and the perseverance we have devoted to science, even problems of accommodation will yield to reason. Admittedly, the problem of peaceful accommodation in the world is infinitely more difficult than the conquest of space, infinitely more complex than a trip to the moon. But if we will only come to the realization that it must be worked out - whatever it may mean even to such sacred traditions as absolute sovereignty - I believe that we can somehow, somewhere, and perhaps through some as yet undiscovered world thinker and leader find a workable solution.

The Faith We Need

I confess that this is as much an article of faith as it is an expression of reason. But this, my friends, is what we need, faith we shall never get started. And until we get started, we shall never know what can be done.

If I am sometimes discouraged, it is not by the magnitude of the problem, but by our colossal indifference to it. I am unable to understand why - if we are willing to trust in reason as a restraint on the use of a ready-made ready-to-fire bomb - we do not make greater, more diligent and more imaginative use of reason and human intelligence in seeking an accord and compromise which will make it possible for manking to control the atom and banish it as an instrument of war.

This is the real and - indeed - the most strenuous challenge to man's intellect today. In comparison with it, the conquest of space is of small significance. For until we learn how to live together, until we rid ourselves of the strife that mocks our pretensions of civilization, our adventures in science - instead of producing human progress - will continue to crowd it with greater peril.

The Satellite On Which We Live

We can compete with a Sputnik and probably create bigger and better Sputniks of our own. But what are we doing to prevent the Sputnik from evolving into just one more weapons system? And when we are going to muster an intelligence equal to that applied against the Sputnik and dedicate it to the preservation of this Satellite on which we live?

TRAVEL MINDED FEMALE?

WHY NOT GO ABROAD AS AN EMPLOYEE OF THE THE U. S. GOVERNMENT

Starting salaries $78.00 $85.00 weekly plus overseas allowances which include free living accomodations

Interesting secretarial clerical work, five day week, annual vacations plus sick leave.

Applicants must pass rigid character reference screening plus overseas physical examination

All positions require a minimum typewriting capability of 45 wpm net. Positions also open for stenographers

Note: Positions in Washington, D. C. also are available

Send resume to:

3 Dixon Avenue
Worcester 5, Mass.

CAMPUS INTERVIEWS WILL BE HELD MARCH 2
CONTACT PLACEMENT OFFICE

The Machine Computation Laboratory is engaged in the analysis, programming and solution of a great variety of scientific and engineering problems. It consists of three separate groups. • Analog Computation — Three Beckman Ease analog computers are used for studies of V/STOL aircraft, missiles, advanced aircraft and engine systems, turbojet and rocket fuel controls. • Digital Computation — A Philco 2000 and an IBM 7090 are used to solve problems in engineering applications, program research, numerical control of machine tools, weather analysis and prediction. • Mathematical Analysis — This group made up of mathematicians with advanced degrees, acts as consultant on many mathematical problems that develop throughout the Corporation. This requires the solution of systems of linear ordinary differential and partial differential equations and might also include information theory, optimization, statistics and approximation theory.

HAROLD GILBAR

(continued from page twenty)

"Our rifle team was one of the best in the league, and the new ski coache promises a bright future for the ski team."

This year and in the past, UVM has been plagued by lack of efficient equipment and poor facilities, as all alumni can verify. The new gymnasium promises to dissolve the problems of poor efficiency and lack of equipment. The new gymnasium will be a haven in which UVM teams will grow and thrive.

A new physical education and athletic system with John Donnelly as director, promises a more efficient and energetic athletic department. If only UVM had a better system of scholarships, no university in the Northeast would be able to acquire more or better athletes or athletic teams than Vermont.

In that not too distant future, when alumni return to Kake Walk, they will find the undergraduates playing hockey, golfing, rifling, and swimming with the best schools in America. UVM's football, basketball, baseball, track, and cross-country teams will be some of the best teams in the Yankee Conference leagues. The alumni will find that they will not have to exaggerate the prowess of their teams as being one of the leading contenders in the Northeast.

Baseball And Track Season Preveiw

Last years baseball team in action.

Although the weather outside might be cold and snowy for the Kake Walk week end, the charges of coaches Ralph Lapointe and Archie Post have been hard at work in the inside preparations for the spring sports of baseball and track.

Coach Lapointe has had his varsity pitching and catching candidates working out for the past several weeks. Lapointe, who feels that "over thirty depends on pitching in college baseball," has had his players doing calisthenics, lifting weights, running, and playing handball to get them in shape. The players did not begin actual throwing till only very recently. Formal practice for the entire team will not begin till after Kake Walk.

In surveying his pitching candidates, Lapointe mentioned Dick Cassini, Levi Brown, Ted Jones, John Babcock, Wallo Shilo, Jim Hew, Bill Hanlon, Pete Sarno, and Bob Whitcomb. His catchers include Maynard Ducatte, who was last years regular, Bill Rundel, and Charlie French.

Looking forward to the season, Coach Lapointe stated, "The infield is pretty sound and we have a lot of lettermen returning". Not wanting to go out on a limb, Lapointe continued, "Our record should be about the same as last year's." The record should be pretty good considering the fact that Lapointe has never had a loosing season at UVM!

Track also seems to have a promising future this year, according to coach Archie Post, "We have much depth in all events this year except the sprints, than we have had in some time. A large group of boys have signed up for the team and three transfers will also help." Post was quick to add that this interpretation can only be made on paper, and in track facts on paper are only a small part of the story.

Track candidates for this year's varsity are Harold Billings '63 (distance runner), Al Brown, '64 (sprinter), Ken Burton, '64 (sprinter, javelin thrower), Steve Bernstein, '63 (pole vaulter), Les Cohen, '63 (javelin thrower), Bob Desautles, '62 (javelin thrower), Carl Eck, '62 (hammer thrower), Terry Hun '62 (hurdler), Gary Greer, (hurdler), Dick Gomez, '62 jumper and hurdler), Bill M hern, '63 (440 run and 220 Bill Perkins, '62 (miler an run), Lee Pantas, '64 (high ju er), Dave Sequist, '63 (we events), Tim Simpson, '63 year's team captain who thr faveline, broad jumps, and 880), Dave Strassburg, (weight events), Bill Thurl '64 (weight events), Pete Vo '63 (high jumper and disc thrower), and Pete Weiss, (hurdler).

A practice meet is sched for the team on March 10 w they will go to Union Colle Coach Post hopes that this c petition will help to spur thet on in its training program though he realizes that man the athletes with which the will be competing, will have many more weeks of practic winter facilities which UVM not have until the new field h is completed. The first reg spring meet will be here on 21 with Bowdoin College.

Varsity ski team.

SPORTS QUICKIES

by Sam BONES

The Yankee Conference, composed of the Universities of Vermont, New Hampshire, Connecticut, Rhode Island, Massachusetts, and Maine, was recently elevated by the NCAA to major conference ranking in basketball.

• • • • • •

University of Vermont basketball coach John (Jake) Evans started the 1961-62 season with an all-time record of 222 wins and 147 losses, top mark for the Green Mountain state's collegiate coaches.

• • • • • •

During the Christmas holiday season, the University of Vermont basketball team will play in the Springfield College Tourney along with teams from Buffalo, NYU, Springfield, Wagner, Lafayette, Amherst, and Assumption.

The oldest basketball rivalry on the 1961-62 University of Vermont basketball schedule is the Vermont-Union College game. The Catamounts first played the Dutchmen in 1901.

• • • • • •

Jenny Becton, captain of the 1961-62 University of Vermont basketball team, was named to the first team All Yankee Conference squad last season.

Mass Bash

(continued from page nineteen)

By the time the second team was in (Bob Nurse, Pete Brem, Ed Gallagher, Dick Lawson, and Bill Rundle) the score stood at 63-50 in favor of the Redmen with less than two minutes to go. Two fastbreaks by Massachusetts guard Bernard sealed the Cats fate at 69-52.

The loss for Vermont gave the Cats an overall record of 10 wins against 12 defeats, while Massachusetts now has season's slate of 12-8. High scorers were Twitchell with 19 for Massachusetts and Strassburg with 14 for the Catamounts.

Sportlight Southwick

J. Alice Hofler

From September on Southwick has been jumping with activity. The school year started with the planning conference which was attended by many New England colleges. Dates were set for Sport's Days and Play Days. A calendar was set up with each date and the schools that planned to attend.

The Girl's Hockey Team travelled twice to meet other schools. As soon as the Vermont weather forced us inside, Volleyball was the star attraction. An intramural tournament was well attended by both the living units and the sororities. The Volleyball Team foraved out twice to face the competition of other schools.

The YMCA was the scene of the swimming meet. The waters were churned for two weeks by girls trying to better Chris Van Salzer's record. When the waves settled, Catalina Club took over with plans for their Spring Show.

Penny Carnival was the main attraction at the start of second semester. WRA planned and executed the whole event. This was the first year that it was not done by the faculty. Last Friday was the culmination of extensive activity for the last two weeks.

The basketball tournament has started with several weeks left of play. Tryouts will be held soon for the Girl's Basketball Team. UVM will be the host for a large Basketball and Ski Play Day on March 10. Eight schools have accepted our invitation. Dinner will be served to all those who participate.

1961 varsity football team.

Pland for the spring include baseball and a horse show for the first time in our history. The tennis courts will again abound with activity. Catalina Club will put on its show to the strains of beautiful music. Feminine William Tells will send their arrows flying into the air. The year will end with the Awards Picnic at which those who have shown outstanding participation and ability will be cited.

The year has been a successful one with greater things to come. Watch for your favorite activity and come and join the fun that seems to center around Southwick.

Hoopster Review

(continued from page twenty)

Disaster hit the Evansmen two days before an important Yankee Conference game with the University of Connecticut. Captain Becton was injured in practice and forced to sit out the UConn game. Nevertheless, the Cats, aided by Dick Lawson's finest performance of the season, fought UConn on eventimes all the way, but lost in the final minutes 67-63.

The importance of Bec rebounding and defensive a was evidenced in the s against traditional state riva Michael's. Benny, still fe the effects of an injured played well below par. The of the team, led by Dave St burg's 20 points, saw a d mined effort go to waste w tip shot by the Knights Ed gerald with 46 seconds to gave the game to St. Mike 73.

A week later it was the story. Becton was still in and saw only limited s Lacking rebounding ability Cats had to make their shots good because 6-7 Ed gerald and 6-4 Walt Ba continually snapped any sh misfired. The Knights j off to an early lead, but th playing their hearts out, back. At 14:25 of the secon UVM led for the first tim 41. For 9 minutes the changed hands; then St. Mic captain Al Baldini and his court mate, Fred Cerrato their driving shoes and aft fastbreaks in the closing onds, the game was out of reach, the final count s at 66-61.

Next Years Varsity

Kittens Undefeated 5-0
126 Point Total

1961 Varsity Footmen captain Bob Stone.

by B. Bello

Vermont's freshman football team is affectionately known as the Kittens but this past grid season they played like full grown Catamounts. Coach John "Jake" Evans' yearlings held their first three opponents scoreless and tallied a total of 126 points while compiling their perfect 5-0 season. Many new faces from the Frosh will fit into next year's revamped football program very handsomely. Along with the numerous returning lettermen, next year's Catamounts will welcome their new coach with the valuable experience and super young talent required for a winning season.

After only two weeks of practice, the Kittens played the boys from Norwich on a sultry October afternoon and struggled to a lack-luster victory of 14-0. The game featured quarterback Foster from Andover, Mass., who scored both TD's and extra-point an educated toe by his punting, averaging better than 40 yards a boot. His punting ability was a valuable weapon on fourth down situations all season and will be happily welcomed next season. The line play in this game, especially defensively, gave Coach Evans something to smile about, and right, so for among all five opponents only two touchdowns were scored against UVM. After Norwich, the squad improved steadily, reaching their peak at mid-season against Union with a 40-0 win. The Norwich and R.P.I. games were defensive battles while the remainder of the schedule proved to a high scoring spree. In these two initial contests the defense had out-scored the offense 3 TD's to 2. Two of these scores were registered by linebacker George Oleze on alert pass interceptions. The second game of the season against R.P.I. was played at Troy, N.Y., in a steady downpour. The highlight of the season, defensively speaking, occurred that rainy afternoon when the UVM "shock troops" held R.P.I. for four downs on the one foot line. Then came Union during the Homecoming week end and a 40-0 win for UVM that sent Union back home to Schenectady nursing their wounds and shaking their heads. It wasn't till late in the third quarter of the Williams game that the Kittens' goal line was dented. The final score of the Williams' game was a convincing 30-6 victory for UVM. Going into the last game with their unscored upon status taken away the Frosh soundly defeated Dartmouth 24-6 at Hanover, N.H., completing their first perfect season in eight years.

Quarterback Foster and shifty little halfback, Dean Kent, shared scoring honors with 6 touchdowns each. Kent, an All-State operator from Rutland High, scored mainly on end sweeps by outfaking would-be opponents. Most of Foster's TD's came on punt returns, the most spectacular one came during the Dartmouth game when he picked up a seemingly dead punt and to the amazement of the Little Indians' scampered 94 yards for the six-pointer. Richie Reynolds from West New York, N.J., scored three TD's and played a hard-driving brand of ball all season. Oleze, a guard from Union City, N.J., scored two and and was voted honorary captain by his teammates. Gino Giardi of East Hartford, Conn., scored one touchdown on a pass reception in the Dartmouth game. Jim Brennan from Teaneck, N.J. who was the teams' passing QB also scored one and passed for three more. Other backs who didn't score but who played good ball last season were fullbacks Mike Burke and Stan Griffin and hustling Joe Andreas.

Any team is as good as its line and UVM's Frosh line was one of the best in New England. The Kitten's stalwart line, was composed of Fred Beest, Tom Mongeon, Ron Hertel, Ed Fugit, George Oleze, Don Blanch, and Paul "Gino" Giardi and averaged 201 pounds per man, Beest, a 210 pound end from Union City, N.J., was a solid defensive performer who didn't let anybody run around his end. Coach did most of the pass receiving from his right end spot. Jan Meredith who played both end positions with consistency along with Jack Terrill, a fine blocker, supplied the reserve strength at the flanks. Blanck, a 6-3, 224 pounder from Hackensak, N.J., along with Mongeon, a product of Burlington High, controlled the tackle shots with great skill. The biggest man on the team was Dave Baker who weighed in at 235. He gave Blanck and Mongeon needed rest by alternating with them defensively. Guards, Oleze and Hertel, also from Union City, N.J., cleared the way for backs with some sharp and well directed blocking. On defense they were impregnable as were guards Fred Blackburn and Bill Rova. The all important center slot was capably handled by big Ed Fugit, a 210 pounder from Rutherford, N.J. Fugit was converted from a tackle and became the team's number one center.

The scores:	
Norwich	14-0
Union	40-0
R.P.I.	18-0
Williams	30-6
*Dartmouth	24-6
*Away game	
Average score	25-2

ROBERT CLIFFORD RECOMMENDED TO COACH FOOTBALL

May Transfer From Colby

WATERVILLE, Me. — The appointment of Robert T. Clifford as head football coach at the University of Vermont will be recommended to the University's Board of Trustees at their meeting here in Waterville, Saturday, it was announced by Vermont President John T. Fey.

Clifford is currently head coach of football at Colby College, where he has compiled a 24-19 record in the six years he has served the Waterville, Me., institution since becoming head football coach in 1956.

Dr. Fey said that the recommendation to appoint Clifford to the Vermont football post with the rank of assistant professor of physical education was made by the University's Athletic Council, and that he was "delighted" to give his concurrence to the recommendation. Appointment would be effective July 1, 1962, he said.

Clifford will be taking football coaching reins from Jack Leonard, Vermont Director of Intercollegiate Athletics. J. Edward Donnell, who will devote full time to the athletic directorship and construction of one of Vermont's athletic facilities with the expected completion of UVM's new $2.7 million gymnasium-physical education plant in the fall of 1962.

A native of East Orange, N.J., the 44-year-old Clifford is a graduate of Western State College of Colorado, who served as a Navy P.T. boat commander in the Pacific during World War II.

He brings to the Vermont post an 18-year record in high school and college coaching.

He served as varsity basketball coach, assistant basketball coach and chief football scout at Northwestern University from 1947-1954, when he moved into the New England sports scene as varsity line coach and assistant golf coach at Williams College.

He moved to the head football coaching post at Colby, where he also served as varsity golf coach, in 1956.

His six-year record of 24 wins and 19 losses was capped by two Maine state Series football championships, marking the first time in Colby football history that the college won two successive State Series titles — and the only championships.

At Vermont, he will step into a schedule highlighted by Yankee Conference competition and another ancient and honorable State series which sees the University of Vermont vie for state honors with Norwich and Middlebury.

Clifford is married to the former Virginia N. Lambert, of New York City, and the father of three sons, Robert, Jr., 19, Peter 15, and Lambert, 10.

He is a member of the National Exchange Club, the American Football and Basketball Coaches Associations, The National Intercollegiate Golf Coaches Association, the N.C.A.A. Small College Selection Committee, and a member of the Little League Board of Directors.

In a statement issued at Waterville, Me., Colby President Robert E.L. Strider praised Clifford as "a valuable member of the coaching staff," and called him "a splendid teacher who has earned the respect and confidence of his players and of our community. We are grateful for his contribution to Colby's athletic program which has prospered during the six years that he has been with us. We shall miss him and his family very much, and he takes with him our warm wishes for his continuing success."

Delt Psi Kappa Sig AEPi Dominate IFC Sports

by Martin Wolf

Intramural athletics, between fraternities and dorms played a big part in the 1961-62 sports season. There were competitions in basketball, football and bowling.

Basketball dominated the latter half of the recent season. The IFC-Dorm tournament devided the fraternities and dorms into four leagues, with playoffs between each. The "A" championship was won by Delta Psi over Sigma Alpha Epsilon, 34-32 in overtime. League "B" honors were taken by Tau Epsilon Phi over Sigma PH 28-21. Through a playoff, Delta Phi, was declared fraternity champion by defeating TEP, 29-20.

In the dormitory contests, the League "C" crown was won by the leftovers with "D" honors going to South Converse. These two teams met and S. Converse was victorious, 44-32.

The campus championship was then decided in a playoff. Delta Psi's team of: Don Eaton, Dick Tassini, Bob Johnson, Wendell Carr and Ollie Thorenson defeated the Dorm team of: Denis Blanck, Pete Glazier, Fred Balse, Jim Bigbee and Jim Merridith, 33-30.

The Bowling Crown went to a deserving Alpha Epsilon Pi team, composed of: Capt. Julie Shrage, Chuck Grutman, Rick Fisher, Mike Harris and Sands Becker. They defeated the Owls of Lambda Iota 1502-1458. Both teams sported excellent records going into the finals, AEPi had a 16-4 mark with LI sporting a 19-5 percentage. The match was deadlocked until the final game when Julie Shrage broke it open for AEPi with four successive marks. The enthusiasm shown by both houses was a great factor in adding to the closeness of the match. The owls team made up of: Palmer Martin, Bill Sorrell, Jim Douglas, Ken Miller and George Conk, deserve credit for a valiant effort.

Earlier last semester, the IFC Football Tournament was held. It was a touch football contest that was dominated by Kappa Sigma and Sigma Nu.

Sigma Nu's team of Butch Heller, Don Noble, John Moore, Bob Grecco, Jerry Smith, Jack Catterson and Nick Carmoli went into the playoff match with an amazing record of forty-eight successive victories. However, the Kappa Sig team of Levi Brown, Larry Cohen, Wally Schiro, Ted Jones, Joe Baker, Gordon Miller and Wally Sheriff proved a worthy opponent and edged out the favorites, 30-24.

These were the major intramural events of the 1961-62 season. The various teams were backed by cheering throngs of supporters and in general a very thrilling season was the result.

Catamounts Vs Brandeis

Sporting a 9-12 record going into this week's Kake Walk tilt with Brandeis, the Cats have had their ups and downs this season as their record might suggest.

The Green and Gold pays host to Brandeis during Kake Walk. This contest will be close in view of UVM's overall record and the last meeting of these two squads. The Cats have run hot and cold all year. Some time their play could rank them among the best in New England; at other times they would lose to Burlington High School. Last year, UVM topped the Judges with the help of 37 points from Jenn Becton.

However, this year Brandeis is strong. Brian Hallander, their 6-4 forward has matured greatly as a basketball player, and he will be tough to stop. Moreover, the quintet from Waltham, Mass. have a 7-foot height this year.

Benn Becton always plays well against the Judges, but his play as of late has been well below past performances. As has been seen previously, without Becton the Cats are determined but weak. The game will be nip and tuck all the way, but this year alumni, parents, friends, and students will see the Judges come out on top.

Catamounts Bashed By U Of Mass

After battling on even terms during the first half with the University of Massachusetts, the UVM Catamounts found rough sledding on the Memorial Auditorium court as the were defeated by the Bay State five, 69-52, before a crowd of Kake Walk spirited students last Saturday.

The Cats, who had played a 27-27 standoff in the first half, could not compete with the much taller Massachusetts team and never gained the lead after the second half began.

With Catamount captain and high scorer Benn Becton being guarded closely by 6-6 center Don Black, the Vermont five relied upon fastbreaks and outside shots to maintain a slim margin over Massachusetts during most of the first half. The first half itself was slow in starting as was evidenced by the 6-6 deadlock with over six minutes expired in playing time. At this point sophomore star Dave Strassberg fired in two baskets to break the scoring ice.

With only seven minutes remaining in the half, Becton made his first two points and shortly thereafter, Jack Shabel exploded for five points on two baskets and a free throw (the Cats sank their first six free throws). Trailing 25-19, the Redmen called a time out to examine their attack. After the time out, Strassberg and guard Lock Aber teamed up for two points on a crowd pleasing play, but Massachusetts followed with two quick baskets and charity throws on fouls by Strassberg and Chuck Glick to knot the score at 27 all just before the buzzer.

Coming off the bench for the second half, the Catamounts faced a team with two 6-5 forwards and a 6-7 center, all taller than any UVM player. Although the Cats had out rebounded the Redmen in the first half, 26-23, they lost this advantage in the second half as the Massachusetts coach, Matt Zunic, moved his big men in closer to the basket. This coupled with the fact that UVM cooled off in their shooting during the first part of the half, was in part the reason that the visitors jumped into the lead. After Lesko and Twitchell put in six points for Massachusetts, Becton grabbed two rebounds from the taller Redmen and with three consecutive UVM baskets the score was again tied at 33 all.

At this point, the roof fell in on Vermont. Twitchell pumped in six points and between the point that the Cats called a time out trailing 50-42 with 14 minutes remaining and five minutes later when Strassberg made two foul shots, the team could not find the range. This scoring drought had dropped the Cats 14 points behind with only nine minutes remaining. Coach Dizzy Evans then began to make substitutions to give his bench some experience.

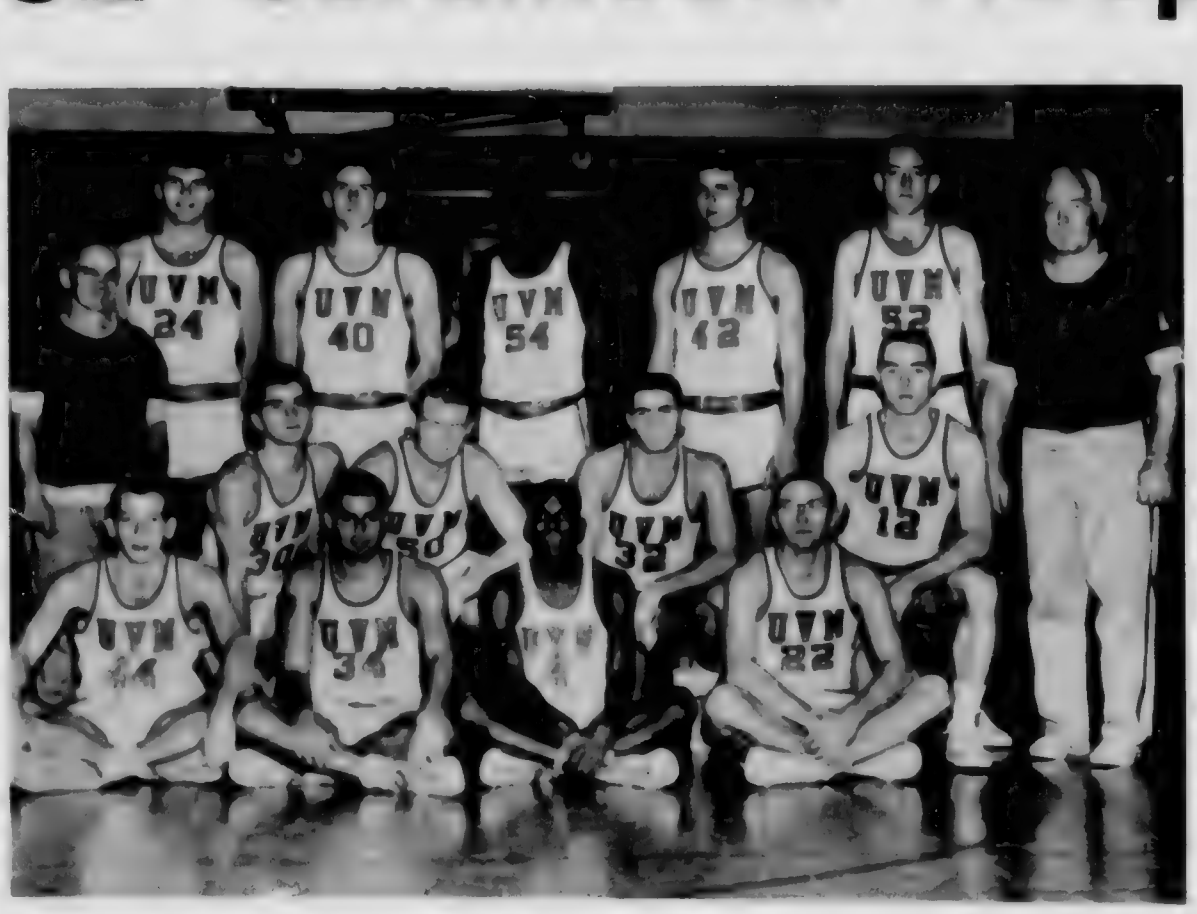
CATAMOUNTS IN REVIEW

HOOPSTERS WIN 9

For those who can't recall the opening game against St. Lawrence, it was a real thriller with the Larries snatching it out at the last moment, 91-89. The Cats showed good offense as they were never out of the contest, but their weak defense awarded St. Lawrence many baskets that could have been thwarted. On the whole, however, UVM looked good and appeared on its way to a winning season.

After dumping Union at Schenectady, 62-46, the Cats returned home to greet Skip Chapelle and Co. from the University of Maine in a Yankee Conference double header. The first game, featuring a 37 point outburst by Captain Benny Becton, was a 71-53 upset of the Black Bears. The shooting and driving of Little All-American Chapelle was too much for the Cats in the next tilt, however, as the Bears topped UVM, 68-68 to gain a split for the series.

A 79-59 rout of New Hampshire preceded the most thrilling contest of the year, a come from behind victory over Norwich, 79-78. Trailing 47-33 at halftime and by 7 mid-way through the second half, the Cats led by Becton and Richie Ader scored to the count of 70 all with 3:00 left. Then, as supplied by Nurse a wizard on defense, showed his offensive powers with a lay-up at :09 to seal the victory, 79-78.



A loss to the New York Athletic Club, 79-69, came just before the Springfield Tournament which was held over the Christmas vacation. Vermont captured consolation honors, losing only to the eventual winner, Springfield, 76-65, and topping Wagner 90-76, and Buffalo, 66-58.

Revitalized by a 74-68 win over Middlebury, the Green and Gold then travelled to Rhode Island to do battle with a formidable Ram quintet led by Charlie Lee. The favored URI squad bumped Vermont twice 82-67, and 70-60. The marksmanship of Lee was too much for the Cats as they ran hot and cold throughout both contests. Lee was also outstanding on defense as he held Becton to a scant four points in the second game.

Playing true to their erratic form, UVM upset Brandeis at Waltham in a real donnybrook, 98-90. It can be said that this was Benny Becton's best effort of his college career. The Vermont captain stole the show and set a new record in the process. He broke his own all-time individual scoring record of 37 points (scored against Brandeis at last year's Kake Walk) with an output of 38 points - 15 field goals and 8 free throws. Becton also controlled the boards, gathering in 19 rebounds.

The next day, the Cats travelled to Amherst to confront a highly touted five from the University of Massachusetts. There were no upsets in the offing for this one as Mass. dropped the Green and Gold, 91-75, although Becton starred for the Cats with 23 points.

Sideline Cynic

by HAROLD GILBAR

Another KAKE WALK brings smiling, happy alumni with their ears tuned to Cotton Babes and their arms wrapped around husbands and wives, remnants of their youthful, lusty college lives. Parents wonder about the campus satiating their inquisitiveness by antagonizing their "children" with hundreds of picayune questions.

The question most often asked during these inquisitive wanderings is "How did our team do?" The alumni can recall the good old days when UVM wrapped St. Mikes up in basketball nets and tossed Maine all over the football field. Though their memories may be a bit exaggerated, the fun they used to have attending the games could never be overly expressed.

This year the men and women of UVM can look their parents and alumni squarely in the eye and say, "our teams did OK. They weren't the best, but they were far from the worst."

"In football we had a respectable 3 win-3 loss-1 tie record. In basketball we ran into a little tough luck at times but we made the most of what we could. We were always much shorter than other teams but we made up for lack of height with spirit, speed and that ever present desire to win.

Doktor and Puyana Will Play For Lane Chamber Series

The Lane Chamber Art Series will present violist Paul Doktor and harpsichordist Rafael Puyana on March 1st, in the Ira Allen Chapel. The revised program will include five French dances by Marin Marais, and Sonata in D Major, No. 2 by Johann Sebastian Bach, both as viola and harpsichord duets. Sonata in A Minor by Adolf Busch will be presented as a viola d'Arpicordo by Giovanni Picchi will be featured as a harpsichord solo. Several other arrangements are also scheduled for an evening's listening enjoyment.

Violist Paul Doktor's performances have been acclaimed both here and abroad. Paul Doktor is the son of the late Karl Doktor, for 35 years violist of the famous Busch Quartet. Paul Doktor studied exclusively with his father and later graduated from the State Academy of Music in Vienna, completing a 5 year course in 2 years. He played the violin until he was called upon to substitute as second violist with the Busch Quarter in Zurich, Switzerland.

Paul Doktor won the coveted first prize at the International Music Competition in Geneva in 1942. It is the only first prize won by a violist to date. He made his debut in this country at the Library of Congress in 1948, and was widely acclaimed.

Paul Doktor has had the distinguished honor of playing the famed "Medici" Stradivari viola at the Cherubini Academy in Florence, Italy.

Rafael Puyana, harpsichordist, made his debut in April 1957, in New York. At this time Mr. Puyana revealed himself as one of the most adept and talented harpsichordists of this era. Rafael Puyana has toured both this country and Europe and was invited to play before President and Mrs. Eisenhower at a reception given for them by the President of Columbia at the Columbian Embassy in Washington. Mr. Puyana studied for six years with Mme. Wanda Landowska.

The colorful, comical, and song-filled skits of Phi Sigma Delta and Tau Epsilon Phi shared top honors in the Kake Walk Skit competitions.

"Good Luck, Homunculus," Phi Sigma Delta's production, took first place Friday night. It concerned man's warfaring ways, and his eventual downfall. The skit traced the history of man and his weapons from the very beginning of time and projected our present state of affairs into the future. The skit ended with two monkeys prancing onto the stage, one saying to the other, "Well, Mabel, it looks like it's up to us again." The finale, however, did offer man some hope for the future.

Tau Epsilon Phi's skit, "Fallout on the Farm," was awarded the first place prize Saturday night. This skit dealt with a new fifty megaton bomb. The government, in searching for a place to test it, wanted to find a site where no important people would get in the way, someplace which would not be missed. And what more likely place than the fair state of Vermont? The test was a success, but the tenacity of Vermonters who remained in their state during the test led to a fabulous new industrial creation. A new and extremely effective bomb shelter was discovered. The Vermonters, it seems, remained in their outhouses during the bomb test, and this proved to be a very effective bomb shelter, so Tau Epsilon Phi's clever lines and effective singing was also good enough to let them capture second place the first night.

Acacia's "The Year UVM Almost Joined the Ivy League" took second place the second night of Kake Walk. Their skit involved the trials and tribunals UVM must endure to join the Ivy League. Vermont, however, turned down the opportunity when the students found out that they would have to abolish Kake Walk.

An error was made in announcing the winners on Friday night. By mistake the positions were reversed and Tau Epsilon Phi was given first place and Phi Sigma Delta second. Later, however, the Kake Walk committee confirmed the fact that Phi Sigma Delta had actually taken first place honors Friday night, with Tau Epsilon Phi second. Both houses will share the rotating Borgman Cup for 1962.

WALKING

Kake Walk this year had more walkers than in any previous year and more precision teams than in any recent year.

Winners and losers alike, nearly every fraternity team made a good showing at the sixty-fifth annual event. But, as usual, the four winners each night received most of the plaudits.

Friday night the high kicking team of Pete Carr and Carl Hausler, from Sigma Alpha Epsilon took top honors. The veteran pair, Ray Weiner and Bill Perkins, representing Phi Delta Theta, placed second. Acacia's long striding duo, Austin Cleaves and John Mills finished third. Perry Cabot and Stephen Bloom, from Sigma Phi Epsilon were awarded Honorable Mention.

On Saturday, with new judges and less nervous walkers, the results changed. First prize was captured by a fast walking pair from Kappa Sigma, Jeff Harvey and Tom Eldridge. These two were posed on the cover of the Kake Walk *Cynic*. Acacia moved up to second place, and a more relaxed team from Sigma Nu placed third. Al McGowen and John "Skip" White walked for this fraternity. Honorable mention was awarded to Phi Delta Theta.

The Walking judges this year were Professors Sproston, Moody, and Steele on Friday night, and Professors Babcock, Bartlett, and Murdock on Saturday night.

Kake Walkers are judged on the position of head and arms, kick, teamwork and smoothness, and special steps.

There are openings for columnists on the *Cynic* staff. Those interested in writing a weekly column may submit sample articles to the mail box of the Editor-in-Chief in Room 40, Lower Buren.

"Operation Abolition" will be presented at Ira Allen Chapel Monday, March 5 at 7:30. Panel discussion will follow.

SAE And Kappa Sig Share Walking Honors; Phi Sig And TEP Split Skits

Doktor and Puyana Will Play For Lane Chamber Series

The Lane Chamber Art Series will present violist Paul Doktor and harpsichordist Rafael Puyana on March 1st, in the Ira Allen Chapel. The revised program will include five French dances by Marin Marais, and Sonata in D Major, No. 2 by Johann Sebastian Bach, both as viola and harpsichord duets. Sonata in A Minor by Adolf Busch will be presented as a viola solo. Arpicordo by Giovanni Picchi will be featured as a harpsichord solo. Several other arrangements are also scheduled for an evening's listening enjoyment.

Violist Paul Doktor's performances have been acclaimed both here and abroad. Paul Doktor is the son of the late Karl Doktor, for 35 years violist of the famous Busch Quartet. Paul Doktor studied exclusively with his father and later graduated from the State Academy of Music in Vienna, completing a 5 year course in 2 years. He played the violin until he was called upon to substitute as second violist with the Busch Quarter in Zurich, Switzerland.

Paul Doktor won the coveted first prize at the International Music Competition in Geneva in 1942. It is the only first prize won by a violist to date. He made his debut in this country at the Library of Congress in 1948, and was widely acclaimed.

Paul Doktor has had the distinguished honor of playing the famed "Medici" Stradivari viola at the Cherubini Academy in Florence, Italy.

UVM Turns Down G.E. College Bowl Bid

Recently, the University received a bid for an appearance on the nationally televised General Electric College Bowl. There was a strong wave of opposition by student leaders and faculty members to accept the bid, but, unfortunately, the University Council turned it down. The chief reason that the show is stupid for itself and does not help the American college, and that it does not test the students ability to articulate facts but only to parrot them out within a certain period of time (or anything to that effect was used. The other three arguments stated that these universities examinations are of the same objective type, and that if it is good enough for the University,

COLLEGE HAIRCUTS
OPEN MONDAYS

it should be good enough for the College Bowl. It seems that if anything, the television program would help with UVM's public relations. Four student leaders and members of the administration committee on the subject.

Paul Chevan, recently elected president of the Student Association, commented, "Realizing that the president of UVM's appearing on the College Bowl was fostered by the Student Association Council, the decision of the University Council, of course, comes as a disappointment. Having heard many criticisms from the public relations and alumni departments that the University is in need of improvement projects, we also felt that this was an opportune time to reveal the University's intellectual capabilities which are often times overshadowed by public appearances placing emphasis on the physical skills. If, appearing for myself, many of my class examinations have not been 'a presentation based upon the speed

of reaction in the recall of factual information' it would be correct to accept the University's decision as one which is consistent with the aims and ideals of American education as interpreted by its colleges and universities."

LYMAN S. HOWELL, Dean of Administration, supplemented the latter with, "I think that the only thing I can say is that I wrote that letter as a result of the council's granting, and I knew that it expressed the views of the Council. If this could have been a program on which this institution and some other institution could have staged a debate on the Justin Morrill Centennial of the Land Grant College, there would have been more meaning and purpose and would have been worth the students time to participate in it.

JULES CLOSE, Editor-in-Chief of the Cynic favored UVM's appearing on the College Bowl. He said "It has been said that the college bowl tests total recall and speed of reaction instead of intellectual ability. It seems to me that these are the things tested in a final examination at UVM. Since other well-known colleges have appeared on this program, I don't understand why our school is too good to make an appearance. The students and faculty seem eager to give it a try, but the administration is blocking it. Once again, it is a case of the tail wagging the dog."

PRESIDENT JOHN T. FEY was emphatically against an appearance on the College Bowl. He stated, "We feel, basically, that the General Electric College Bowl does not reflect the true purpose of the goals and objectives of American education. We feel that it places too great a premium on mental work and recollection and does not portray the development of basic reasoning and intelligence which is the paramount goal in our educational program. Personally, I feel that the College Bowl is a commercial exploitation of the American college. It is nothing more than a 1962 version of the early program known as Quiz Kids which placed a premium on memory and which had no relationship on trained intelligence which is the true objective of American education. I feel that this is a false picture of American education, that it impairs the dignity of our American colleges, and that it has no relationship whatsoever on what we are doing in American education. We would like to have a program sponsored by General Electric or any other American industry which would create a public image of what we think American education is. We feel that the American people are entitled to a true representation of American education as prepared individuals for making decisions, making intelligent

Vermont Hosts Education Meeting

The University of Vermont recently hosted representatives of the Vermont State Colleges, Inc., in what President John T. Fey described as an exploratory session looking toward increased educational cooperation on the part of the state's public institutions of high education.

Invited to meet with Dr. Fey and other UVM officials were H. Ward Bedford, chairman of the Vermont State College Board created by the 1961 Legislature; Dr. Richard J. Dundas, president of Castleton College; Dr. Robert L. Long, president of Lyndon College; Dr. Odino A. Martinetti, president of Johnson College; Richmond A. Young, director of the Vermont Agricultural and Technical Institute; members of the Vermont State Colleges Board, and members of the University's Board of Trustees.

Dr. Fey said the session today provided an opportunity for representatives of Vermont's public higher education institutions to "explore ways in which we may work together cooperatively to increase the efficiency of our operation and provide a better opportunity for higher education for the qualified young men and women of our state."

He said consideration was given to the problem of meeting increased numbers of Vermont students seeking higher education in the years immediately ahead, and to exploratory discussion of admissions, curricula, and to the possibility of sharing educational resources.

Under legislation enacted by the 1961 Legislature the three Vermont Teachers Colleges and the Agricultural and Technical Institute at Randolph are to come under the control of the Vermont College Board, the transfer to be effective not later than July 1, 1962.

Bedford expressed pleasure "with this expression of cooperation has been scheduled at Castleton College in May.

AEPi And Theta Take First Place In Snow Sculpture

Each year the same old problem of snow for snow sculptures crops up. This week end, however, left no doubt in anyone's mind that there would be enough of those tiny white flakes. By Saturday morning, fighting the danger of being buried under fast-falling snow, the members of fraternities and sororities on ready to have their creations judged. By noon, though, some had already disappeared, not to be seen again until spring. Saturday night the winners in both fraternity and sorority sculptures were announced.

First place in the fraternity division went to Alpha Epsilon Pi's "Freedom Walker." This depicted a Kake Walker kicking down the wall between East and West Germany, with colored lettering and symbols of each side of the wall.

Kappa Alpha Theta's first place sculpture, entitled "Bottoms Up to Kake Walk," presented a bloomered little girl with just that.

The second and third places in the fraternity competition were awarded to Acacia and Phi Delta Theta, respectively.

Alpha Delta Pi and Gamma Phi Beta received comparable awards in the sorority division.

Music Competition

Lycoming College, Williamsport, Pennsylvania, will sponsor an Inter-Collegiate Musical Competition on May 10 and 11, 1962. Any student jazz, rock and roll, or vocal group may apply. There will be representatives present from Capital Records, Inc., Liberty Records, Inc., Lycoming Music Corporation, and Continental Artists. Prizes will consist of $600 in cash, trophies, and other non-cash items. This is an opportunity for a college group to become recognized. Applications and information may be obtained from your director of student activities or by writing to IMC, Box 35, Lycoming College, Williamsport, Pennsylvania.

College Bowl

(continued from page two)

choices as to alternatives, and using knowledge for the purpose of reasoning rather than accumulating knowledge and repeating it in a parrot-like fashion. I feel that the time involved in preparing for a display of memory work is an encroachment on our academic program, that it is a waste of student and staff time and if expanded, would reduce effectiveness of our educational program. I do not feel, nor does the Council, that we should indulge in a commercial operation which does not consider the aims and objectives of our institution."

It is hoped by those in favor of the College Bowl that the letter of dclination will not sever UVM's relations forever with the General Electric people. If they ever ask us to appear on their program again, I feel that we might be inclined to accept, as organized protest will possibly achieve positive results.

White Oak • Silver Spring Maryland

The Vermont Cynic

The Official Student Newspaper of the University of Vermont.

VOL. 79 MARCH 1, 1962 NO. 25

Editorial:

79th Good-Bye

It seems a little strange that the changing of the Cynic guard takes place nearly exactly in the middle of the year. The change would feel more natural in June, at year's end.

But the month is February, there is snow on the ground, and Volume 79 of the Vermont Cynic has run its course. Next week the snow will still be there, but we won't. Those youngsters from Volume 80 will have booted us into the cold, rearranged the office, and scraped our names off the door.

The past year has been an exciting one for us. Looking back, it seems as if we've had at least one fight with every organization at UVM. We've been called a lot of names and called a few, ourselves. We've attacked the campus dragons, real and imagined, with all the young venom we could muster. We've done battle righteously and raucously, rightly and wrongly.

Not only have we met the campus villains on the Plains of Abraham, but we have fought on the home front against thetwo unbeatable newspaper scoundrels -- Deadline and Production. Although we have usually emerged victorious against these resilient characters, there have been times when they left deep dents in our armor.

If the Cynic has had a fat year, it is primarily because the staff has enjoyed its work. Every production crisis, inter-organizational wrangle, and lost cause was heartily welcomed, and the staff learned something from each of them. We all know a little more about a lot of things than we did last February.

We are trying damned hard at this point not to get maudlin about the whole thing, but it is becoming increasingly difficult. It's entirely too easy to wax sentimental about the year that has passed and to remember fondly all the cute, little mistakes we have made.

But enough of these perverse pleasures! Rather let us think of all the mistakes we didn't make. Hmmm . . .

Not once has the word "administrationwise" appeared in print.

We have never called for an end to student apathy.

Not one administrator has died of a swelled head incurred from too much praise in our editorials.

Never has the word "newspaperwise" appeared in print.

Our readers have had to find out from other sources that these are "the-best-years-of-their-lives-so- why-not-make-the-most-of-them!"

At no time has the word "teachers' salarywise" appeared in print.

Yes, it's been a pleasurable year. We of Volume 79 shall look back on it fondly. But the Cynic will not get caught in our sticky web of February maudlin. It will move onward, ever onward, to bigger and better fights.

In the words of our outgoing Editor-in-Chief, "I shall not rest so long as there is one windmill left standing at UVM."

Letters To The Editor

College Bowl

[illegible]

Miss Sheila Lavene
Associate Producer
C.B.S. College Bowl Program
"Twenty Grand"
New York 19, New York

Dear Miss Lavene:

Through the courtesy of Professor Lincoln we have reviewed the invitation for the University of Vermont to participate in the C.B.S. College Bowl Program. We thank you for the invitation but we wish to decline. In so doing, we recognize that this is an attitude divergent from that of many other institutions and an explanation of our refusal would seem in order.

The President and the members of the University Council reviewed the material concerning the program and they have on occasions seen the program on the air. It was their unanimous belief that a presentation based upon speed of reaction in the recall of factual information does not present the students or the institutions of higher learning in their proper role to the American public. If by participation we build an image that implies that the well-educated student, the one of whom we are proud enough to spend considerable time and effort coaching him for a television appearance, is the one who has acquired a great many facts and can recall and repeat these immediately on stimulus, then either our institutions are failing or we are doing them a disservice in presenting this image.

The ability of total recall has been played up on the stage, television and radio on many occasions, but we think that it has not yet been shown that this is necessarily the quality which has produced the leaders in our society. We believe that a program which would portray the ability of college students to marshal and utilize facts and ideas in a manner which would stimulate thinking in themselves and in their audience would come closer to portraying the role of the University and hopefully the University students.

We recognize the pressures in television broadcasting for audience response and the tremendous part this plays in the acceptance of the program in a competitive schedule but we believe that the aims and ideals of American education as fostered by its colleges and universities deserve a better student image than that produced by the split second response to a wide variety of dissociated questions. We have no doubt that many of the young men and women who have appeared on your program are well educated and capable individuals. We only wish that they might have had an opportunity to demonstrate this to the general public to whom we look both for approval and for support.

It is for these reasons that we have decided to decline the invitation on behalf of the University in spite of the interest shown by some of the students and some of the faculty.

Sincerely yours,
L.S. Rowell
Dean of Administration

LSR:kj

Morality

To the Editor:

Think of this if you will.

We are, or should be, rational people. The code of ethics, the standards of morality, and the concepts of "good" and "bad" established by our society are supported by those same theorists who have given us all the evils under the shadows of which we all live. We follow, quite blindly, and believe in the hierarchy of values dictated by a way of life which produces wars, murders, prejudice, liars, and war. How can a rational man accept all the dictates of a society which is concurrently producing war? How can I accept the conventional concepts of right and wrong, perversion, and heresay, when those who propound these concepts also propound H-Bombs?

So when you doubt, consider, and then take their word for it, my friend, think of the by-products of the morality you are accepting.

Dissentfully,
Arnold Bendich

Souvenirs!!

To the Editor:

All the work, productions, and walking are not the only things that came and went with this year's Kake Walk festivities. It was hard for me to believe that the students on this campus who pride themselves on their strong ideals could be some of those who took it upon themselves to voluntarily take other people's property. I am trying very hard not to use the "dirty" word, stealing.

Admittedly, it is only a very few of the student body that are responsible for the fact that during the week-end of the royalty campaigns, two banners and at least six expensive portraits belonging to four different houses (one of which was in a privately-owned frame) were taken, obviously for souvenirs. Are the cement blocks in the dorms so cold and bare that embellishing a room warrants a breach of one of the commandments?

The final blow occurred the last night of Kake Walk when a certain group on campus took a large, expensive prop shared by two other houses and used it for kindling wood for a victory bonfire.

Until now, I was under the impression that college students should not be guarded by paternalistic administrators; but perhaps everything does have to be under lock and key, and we should be treated like children. Before we wave our flag [illegible] mature and ideal[illegible] perhaps, a self-[illegible] in order. Then, [illegible] worry about chang[illegible] ple's ideals.

On behalf of all the [illegible] are missing valu[illegible] frames, etc., I am [illegible] appeal for those [illegible] returned to the Lost [illegible] fice. I still have [illegible] in Vermont's st[illegible] that they will be.

Sincerely,
Jerry [illegible]

(Incidentally, one of the [illegible] has already been ret[illegible]

Thank You

To the Editor:

This is just a brief [illegible] tell you that I am enjoying *Cynics* which I have been receiving this year, I suppose because of membership in UVM Alumni Council. I think this is about the best possible method of keeping alumni informed, both as to developments on the campus and the viewpoint of undergraduates.

I was a member of the class of 1923, which must seem as ancient as the Civil War, a member of a class in the 1960s. We had about 1200 enrollment at that time. I had the pleasure of being editor-in-chief of the *Cynic* in my senior year. At that time we ordinarily put out an eight page issue.

You are to be commended for putting out a paper which stimulates discussion of topics other than just those narrowly related to the campus. I liked your editorial, "A Christmas Surprise". It is good that someone called the administration on a blunder and I agree with your final comment.

Editing a college paper is a satisfying experience which you will enjoy looking back upon in later years, especially if you can see that your influence, in some way, helped make UVM better. At the time I was editor, UVM had no one-year rule for athletes and consequently had a few ringers on the football team that vanished after midyear exams. I like to think that the *Cynic* was of at least some influence in the adoption of a better policy that year.

Sincerely,
J. Ralph Spalding

PROFESSORES

The Cynic, whose Editorial [illegible] I assume elective and reflecting the sentiments of the majority of our student [illegible] tends, on balance, to open its columns to criticism of a predominantly negative type and [illegible] of questionable relevance and taste. Alongside pertinent and thoughtful criticism especially in its editorials, I notice [illegible] articles and letters attacking officers of the administration [illegible] unnamed instructors, ridiculing fellow students who participate in the ROTC program and [illegible] the national anthem, or presenting aspects of national and international issues in a rather [illegible] manner.

Professor Dellin of the Economics Department is a world traveler and contributor to journals from different lands. (Credit: S.U.S.)

I do not like for a moment to suggest that criticism should be [illegible], (I myself am critical in this instance) or that any issue or personality should be considered beyond reproach. But I think that we each other minimum respect while disagreeing: the original [illegible] taught virtues, especially self-control, not cynicism in the modern connotations of the term. What I wish to convey in particular is that criticism should also be constructive, offering a meaningful positive alternative to the purely negative approach and then permit the weighing of all "pro's" and "con's."

In this connection several thoughts preoccupy me and they apply to some phenomena of our present reality in general.

It is possible that some people accede to criticism in order to prove their "non-conformity". If this were the case, the lack of positive arguments denoting conviction is easily explicable. The "non-conformists" of this type are satisfied with being just "against" what they consider to be the "usual," the "conventional," without further reasoning. I am sure that, as time passes, most of them are bound to realize that "being against for kicks" or for negative values nor genuine originality.

My next remark deals with serious criticism, that criticism which comes from conviction. This is the type of criticism I consider valid as long as it adds, of course, the positive alternative. In many instances I fail to see the latter and wonder whether people have no beliefs any more, or whether they have lost the courage to state them squarely and openly.

Here I have to be speculative, of necessity, and deal with broad and oversimplified examples. Could it be that those who find *patria and amor patriae* in its traditional manifestations obsolete believe in other values and other forms of human organization which necessitate the suppression of patriotism? Could it be that those who are against the defense of the country by military means have some magic formula which could guarantee peace with freedom under unilateral disarmament or moratorium in the face of a proven aggressor? Maybe some wish peace without freedom? Other alternatives could be parliamentary system of government, socialism, and what not. There may also be some who like Fascism or Communism. Whatever the case may be, a positive belief is better than none. And if such belief exists in the minds of the critics, let them come forward with their values, goals, and the methods to achieve them, rather than stop at the brink of attack and, especially, ridicule; let us leave the "out-sneering" to others and, instead, try to "out-convince" each other if we disagree.

Conviction comes, of course, as a result of knowledge, and knowledge involves comparisons of existing conditions with possible alternatives. It is in this respect that the Cynic could do much by fostering a balanced and many-sided discussion, particularly of basic issues.

• • • • • •

I, for one, having lived much of my life abroad - in many countries and under a variety of regimes and systems, as well as enough of my mature life in my new homeland, have tried to form my views on the basis of personal experience and continuous study of the alternatives available today. Well conscious of our many shortcomings and the need for improvement as well as of several commendable features of other systems, I cannot but opt, on balance, wholeheartedly in favor of the basic values and working of our society. For, I cannot see any other country in which freedom, individual dignity and initiative, material satisfaction and social mobility are approached more closely IN COMBINATION than in the United States. In my scale of values a system which is able to preserve the freedoms of the individual while meeting material needs - both, not one at the expense of the other, and which leaves open avenues of choice and betterment according to the people's will, has the connotations of a modern humane society and is therefore viable and worthy of support and attachment.

In fact, the more I reflect and compare, the more amazed I am at what humans have made the United States within a relatively short span of a most dramatic history: with hard work, not handouts; with risks, not security; with unequalled charity for friends and foes; with no desire to rule over others (a country which has refrained from using its nuclear monopoly to have the world for the asking is hardly the proper target for peace solicitations or accusations of imperialism). Such performance deserves appreciation and a few lines of support. It is worthy of inspiration and pride. Nationalism which is stronger than ever throughout the world, including Khrushchev's Russia, is viewed by many Americans as right if practiced by others but wrong if applied by us. Such self-negation, not to mention the fashionable intellectual masochism of some, cannot earn respect, or prestige, or friendship. Finally, our country deserves supreme sacrifice if need be. Unless we permit the enemy to break the nuclear stalemate, however, his main weapon will remain "peaceful co-existence" (a more subtle variety of "*divide et impera*"), to which we must oppose as much unity and purpose as we can muster, unless we think that his alternative is better.

This is another basic issue to be explored: what is it that the "rival" system which pretends to be the force of tomorrow has to offer? Sputnik, cosmonauts, the biggest megaton bomb - yes; but what about two pairs of shoes per head, or a house, kitchen or [illegible] bathroom all for one family? And more important, at least in our scale of values what about freedom and human dignity? A system which fears pathologically the slightest divergence of opinion and a foreign newspaper or radio broadcast, which permits no choice, which has to erect a wall in order to keep its citizens at home, which has permitted the massacre of millions and the subjugation of millions more, and in which a new privileged class has assumed power over man - to quote Djilas - "most complete known to history," can hardly evoke approval let alone become the "ideal" of our youth. But it can and should generate thought and place these issues in perspective. Could students not commemorate the anniversary of the Hungarian uprising and thus relive the meaning of the sacrifice of their Hungarian confreres? Should the student body not read a latest installment of the situation in Castro's Cuba?

These - and many more, of course, are issues that strike at the core of today's major problems, which make other big things seem small and small things - petty, and which can be tackled with a positive purpose to present both sides of a coin, to outline alternatives, and then compare and argue with perspective and mutual respect.

The challenge to the future leaders of our country is great, but so is their responsibility.

Chaudhuri To Lecture On Physics

Dr. B.D. Nag Chaudhuri, Director of the Saha Institute of Nuclear Physics, Calcutta, India, will serve as a visiting lecturer at the University of Vermont, Monday and Tuesday, March 5 and 6.

Dr. Nag Chaudhuri will be here, under the auspices of the American Association of Physics Teachers and the American Institute of Physics as part of a broad, nationwide program to stimulate interest in physics. The program of Visiting Scientists in Physics is being conducted with the support of the National Science Foundation.

The American Association of Physics Teachers is one of the five member societies of the American Institute of Physics. Other member societies are: American Physical Society Optical Society of America, Acoustical Society of America, and the Society of Rheology.

Professor A. D. Crowell, Chairman of the Department of Physics at The University of Vermont, is in charge of the arrangements for the visit.

The Visiting Scientiest Program, now in its fifth year, has enabled prominent American psysicists to lecture at many American colleges and universities. It has been extended to include visits by distinguished physicists from other countries.

Each visiting Scientist gives formal lectures, takes part in colloquia, meets informally with the physics staff about teaching and research in his country, and often visits nearby colleges and secondary schools to learn about the varied conditions under which physics is taught in the United States.

Basanti Dulal Nag Chaudhuri was born in Calcutta, India; received the B.S. degree from Banaras University, Banaras, India in 1936, the M.S. degree from Allahabad University, India, in 1937; and the Ph.D. from the University of California at Berkeley, California in 1940.

Dr. Nag Chaudhuri was a research assistant in the Radiation Laboratory at Berkeley from 1939-41; a lecturer in the physics department at the University of Calcutta, India from 1942-46. He remained at Calcutta as an associate professor from 1946-53 becoming a full professor at that time. He joined the staff at Saha Institute of Nuclear Physics as its Director in 1958 where he has been since that time.

Dr. Nag Chaudhuri's other activities have been: Member of Government of India Board of Research in Atomic Energy and of the Physical Research Committee, Editor of Science and Culture, and sometime science correspondent to Hindusthan Standard, Calcutta daily newspaper.

Dr. Nag Chaudhuri's fields of research include nuclear isomers, beta gamma ray spectrometry and Cerenkov radiation, the development of low background counters for radio-isotopes and biological studies as well as radioactivity of rocks and minerals.

He is a member of Sigma Xi, the American Physical Society, the American Association for the Advancement of Science, the Indian Physical Society, the Indian Science Congress Association, and the Science Teachers Association in India.

Dr. Nag Chaudhuri led the team that built the 38" Cyclotron and 400KV R.F. Cockroft Walton generator at Calcutta.

Maureen Morris, today's student, is a sophomore from Milton, Vt. This is her second column.

STUDENTES

The world [illegible] in the [illegible] have been [illegible] to make [illegible] for the long. It is bad enough that the people have to be subjected to the "humiliation" of Merry Week without making them suffer the hardship of not being able to [illegible] heart in a one-paper syndicated [illegible] columns.

Having to write a column would provide me with alibis for several of my [illegible] problems. When my parents confront me with the subject of my low marks (much too low for someone as bright as I am, they tell me), I can nod my head wearily and say, "Yes, but I've been devoting so much time to my column lately that my marks have slipped a bit." If I don't have a date for Saturday night, I can tell everybody I'm so busy working on my column that I don't have time for such frivolous pursuits. Whenever I'm caught reading "Life", "Look", or "The Sears Roebuck Catalogue, Spring Edition", or, watching "The Flintstones", "Bachelor Mate", or "The Twilight Zone", I can pass it off as research for my column.

Column writing would give me a chance to let off steam. I could expose the tragic lack of available chairs in the Coffee Shop. (Contrary to a previous opinion stated in the Cynic, I do not think the Coffee Shop resembles a pig pen. I think the crumpled paper cups, empty milk bottles, and the nonsalvagable cigarette butts give the place atmosphere.)

My main campaign would be for the construction of go-kart tracks between widely separated, and often times isolated, campus buildings. Go-karts would eliminate the problem of "walking" from Hills Hall to the Music Building on Williams Street in the ten minute break between classes.

The only big problem column writing would present to me [illegible] paper. I never can find any typing paper.

4 MORE SPRITES TO GO!

IN THE SPRING
Grand Prix CONTEST
FOR NEW ENGLAND COLLEGES ONLY

PACK OR BOX

KING OR REGULAR

If you didn't win in the Fall Contest . . . try again! And lots of luck. If you didn't even enter during the first half, start now! And lots of luck to you, too.

The rules are the same, but we'll give them to you again, fast!

1. Pick up an Official Registration Envelope. You'll find them all around campus and in your local smoke shop. Our Liggett & Myers Campus Rep has a supply too.

2. Take the Sportscar Quiz printed on the Registration Envelope (it's easy). Sign your name and address and mail it in—along with 5 bottom panels from 5 packs of Chesterfield, L&M or Oasis cigarettes.

3. If you pass the quiz, you'll receive a limerick in the mail with the last line missing. Finish it with a good rhyme and send it back. The limericks will be judged for cleverness and appropriateness. The 4 best limericks win the Sprites in the Spring. And one of them could be yours!

4. Enter as often as you like. Registration Envelopes must be in by April 1st. Limerick entries by April 15th when the contest officially closes. Winners get their new Sprites before school's out!

So enter often—and keep smoking Chesterfields, L&M's and Oasis cigarettes—they're in a class of their own!

ENTER TODAY! ENTER OFTEN!

Short Story Contest Seeks Talented Young Americans

Cash prizes totalling $2000 await collegiate authors in a short story contest designed to discover talented young American writers, it was announced today.

Contest winners will have their stories published in an annual hard-cover volume, "Best College Writing."

Eligible to compete is any college or university student or member of the Armed Forces accredited to educational institutions anywhere in the world.

The search for promising fiction writers is the sixteenth in an annual college short story contest conducted by STORY Magazine. Prize money is being provided by The Reader's Digest Foundation, which recently offered cash prizes in a competition to find outstanding news and feature writing among college newspaper editors. The Digest Foundation is adding a grant of $5000 to cover administrative costs of the contest.

Prize for the best short story submitted in the contest will be $500. The number two entry will win $350, and third prize will be $250. The next eighteen winners will receive honorable mention awards of $50 apiece.

Announcement of the contest was made by Whit Burnett, Editor of STORY and by Sterling Fisher, Executive Director of the Digest Foundation. Both urged contestants to prepare entries as soon as possible, noting that the contest deadline is April 20, 1962. Manuscripts shouldbe from 1500 to 9000 words in length and should be submitted to STORY Magazine College Contest, c/o The Reader's Digest, Pleasantville, N.Y. Manuscripts must be certified by a faculty member.

Judges in the competition include Harry Hansen, critic and former editor of the O. Henry Award Volumes; Ralph E. Henderson, Editor of Reader's Digest Condensed Books and Whit Burnett, William Peden and Richard Wathen of STORY. Hallie Burnett is Contest Director.

Further details about the contest are available in the current issue of STORY or by writing to STORY Contest, c/o The Reader's Digest, Pleasantville, N.Y.

Scott Johnson and Roanne Bockar were a happy king and queen for year of 1962. *(Credit: S.P.S.)*

Letters To The Editor

Homer Returns!!

To the Editor:

Enclosed herewith is a program of visits that I had planned in January for February to May.

While Yale and some others were able to arrange sponsorship for our visit I regret to say we did not succeed in getting sponsorship from the University of Vermont and for that reason I will not be arriving on the campus as indicated in the March 1st bulletin.

I send this word along in the event that some news had already gotten around of the possible visit on that date.

I am yet grateful for the consideration given me on my previous visit last year.

Cordially yours,
Homer A. Tomilinson

"Off Color"

To the Editor,

Why is it that each year at Pops Night the fraternities, in presenting their king candidates feel they must entertain the audience with skits composed mainly of "off color" comedy.

Perhaps they wish to embarrass, or impress the female student body. I cannot believe that, if this is the purpose, they succeeded. I am not qualified to speak for the male student body. But, if this tone in comedy is truly amusing to them, I feel sorry that they are not intellectually above it.

It appears that the fraternities do not have the interest or the imagination to compose a skit which is well organized and entertaining. It becomes boring for one to sit and be continually exposed to the same type of skit with the same purpose. Do they feel they are degrading themselves, and their candidates, in the eyes of the audience.

I suggest that in future years the fraternities discard the common burlesque and substitute it with wit and organization. I feel certain that their skits will be more enjoyed and appreciated by those present.

UVM THEATER AND MUSIC DEPT. TO GIVE "THREE PENNY OPERA"

Ralf Bode will demonstrate his acting ability as Macbeath in "Three Penny Opera".

Profs. Edward Feidner and Frank Lidral announce a joint production of the popular "Three-Penny Opera" by the Department of Music and the University Theater in the UVM Arena Theater on March 29, 30, 31, and April 1. The performances are a major feature of the University of Vermont Fine Arts Festival.

The "Three-Penny Opera" has just finished a record 8-year engagement at the Theatre de Lys in New York. This marks the first time performing rights for the English version have been available to other organizations. The "Opera" is based on the popular early eighteenth century "Beggars Opera" and was adapted during the "Roaring Twenties" for the Berlin Theatre by Bert Brecht and Kurt Weill, achieving instant success. The English translation was prepared by Març Blitzstein with the encouragement of Lotte Lenya, Kurt Weill's widow, and a star in the original cast. The English version will be used in the production including such hit songs as "Mack the Knife" and the "Bilbao Song".

The cast is as follows:

Mac Heath - Ralf Bode, AS, '62; Polly Peachum - Barbara Unger, RN, '64; Mrs. Peachum - Barbara Rifkin, EN, '62; Mr. J. J. Peachum - Donald Kerr, AS, '62; A Street Singer - William Perlow, AS, '64; Jenny - Jeanine Cloutier, EN, '62; Tiger Brown - Phil Tarro, EN, '62; Lucy Brown - Alice Zalon, AS, 62.

Bill Kingsland, AS, '64, Bryant Reynolds, AS, '64, Chris Rumph, AS, '65, Dick Lennon, TC, '64, Ivan Karp, AS, '65, Raouf Malak, TC, '63, Al LeBlanc, TC, '63, Louise Allen, AS, '65, Cathy Craig, EN, '64, Pam Press, AS, '64, Iris Shmurak, EN, '64, Mona Ford, En, '63, Helene Coffino, AG, '65.

Business Manager is Jacquelyn Prouty, EN, '62; Assistant Manager Elizabeth Soule, AG, '62. There will be a stage band of eight pieces headed by Richard Lombard, EN, '64, and Francis Coderre, EN, '62. Chris Nie, EN, '65, is in charge of scenery. Stage Manager, Judy Pillsbury, AS, '62, Assistant, Joan Chicoine, EN, '62.

Dear Bullwinkle:

When my mother picks me up from school, she drives a 1938 Hudson Terroplane, wears Dad's old army uniform, and honks the horn loudly. How can I stop this humiliation?

Embarrassed

Dear Embarrassed:

Wear a Santa Claus suit year round, and your schoolmates will not think your mother is quite as unusual as before.

Bullwinkle

Dear Bullwinkle:

My 15-year-old daughter looks ridiculous running around town in a dirty Santa Claus suit all year. How can I make her see that this is not normal behavior.

Distraught Mom

Dear Distraught Mom:

Run her down with your '38 Terroplane.

Bullwinkle

Dear Bullwinkle:

There isn't a day when I don't go through torment with my love for Secretary of State Dean Rusk. He is a married man and I can never get to know him. What can I do?

Desperate

Dear Desperate:

Tell him you are the new Soviet Ambassador.

Bullwinkle

Dear Bullwinkle:

My daddy has stolen 4,000,000 dollars from the union that he is Treasurer of. Is this wrong?

Loving Child

Dear Loving Child:

Yes. The correct figure, as quoted in the papers, was $4,000,324.73.

Bullwinkle

IBM WILL INTERVIEW MARCH 6-7

Candidates for Bachelor's or Master's Degrees are invited to discuss opportunities in:

Engineering and Sales

This is a unique opportunity to find out about the many career opportunities at IBM. The IBM representative can discuss with you typical jobs, various training programs, chances for advanced education, financial rewards, and company benefits—all important factors that affect your future.

SOME FACTS ABOUT IBM

An Unusual Growth Story: IBM has had one of the exceptional growth rates in industry. It has been a planned growth, based on ideas and products having an almost infinite application in our modern economy.

Diverse and Important Products: IBM develops, manufactures and markets a wide range of products in the data processing field. IBM computers and allied products play a vital role in the operations of business, industry, science, and government.

Across-the-Country Operations: Laboratory and manufacturing facilities are located in Endicott, Kingston, Owego, Poughkeepsie, Vestal, Yorktown, N. Y.; Burlington, Vermont; Lexington, Ky.; San Jose, Calif.; Bethesda, Md.; and Rochester, Minn. Headquarters is located in New York City with sales and service offices in 180 major cities throughout the United States.

The Accent is on the Individual: No matter what type of work a person does at IBM, he is given all the responsibility he is able to handle, and all the support he needs to do his job. Advancement is by merit.

The areas in which IBM is engaged have an unlimited future. This is your opportunity to find out what that future has to offer you. All qualified applicants will be considered for employment without regard to race, creed, color or national origin.

Your placement officer can help you to learn more about IBM. He can give you literature describing the many career fields at IBM. He will arrange an appointment for you with the IBM representative. If you cannot attend an interview, write or call the manager of the nearest IBM office:

J. F. Golden, Branch Manager
IBM Corporation, Dept. 882

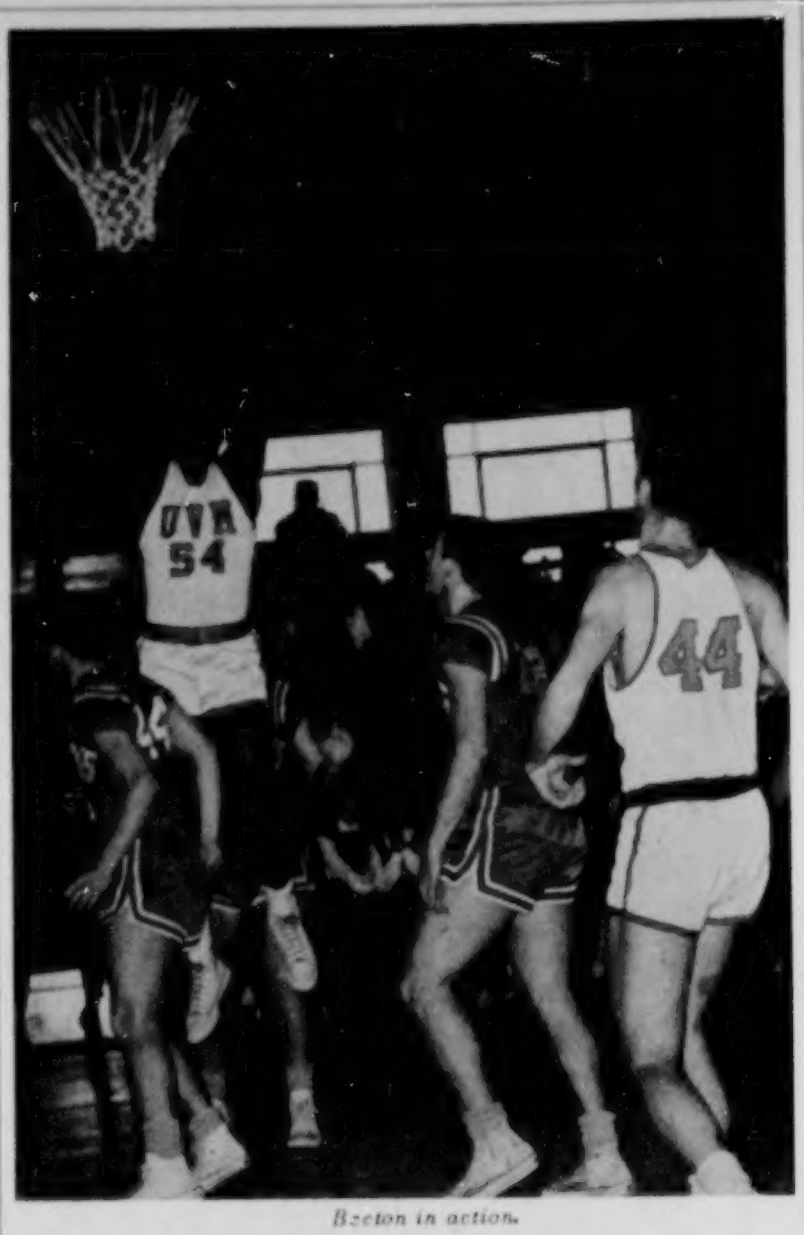
IFC Preview

by Martin Wolf



The Inter-Fraternity Council Volley ball Tournament begins March 5th and will include all sixteen fraternities and several independent teams.

There are three leagues, with "A" being composed of: Alpha Epsilon Pi, Delta Psi, Theta Chi, Kappa Sigma, Sigma Nu, Phi Delta Theta, Phi Mu Delta and Acacia. The "B" League contains: Phi Sigma Delta, Tau Epsilon Phi, Sigma Alpha Epsilon, Sigma Phi Epsilon, Alpha Gamma Rho, Lambda Iota, Alpha Tau Omega and Sigma Phi.

The "C" league is made up of both ROTC squads and independents: MS IV (Donahue), MS III C (Clark), MS III B (Brodie), MS III A (Collins), Cellar Dwellers, Clams, Mishaps, and Bombers.

The tournament will be organized under the U.S.V.B.A. rules, with the exception of a smaller court and a five man team. Each match will be decided by the best two our of three games.

The championship matches will take place on March 29-30th. Leagues "A" and "B" will meet on the 29th for the IFC championship and on the 30th, the all campus crown will be awarded.

Bacton in action.

Yankee Conference Scoring Parade

KINGSTON, FEB. -- Charlie Lee, who tallied 28 points again Maine last Saturday night, continues to lead the Yankee C ference scoring parade, according to statistics released tod by the conference publicity office. The University of Rho Island junior has tallied 150 points in eight games for average of 18.7 points per contest.

Tom "Skip" Chapelle of the University of Maine, who h been handicapped by a bad ankle, has taken over the runner- spot with 121 points in seven games and a 17.3 average. Ro ger Twitchell of Massachusetts and Don Hamum of Maine tied for third with 16.3 averages while Dave Ricereto of Rho Island and Benny Becton of Vermont are tied for fifth o tenth of a percentage point behind.

The scoring leaders follow:

	G.	F.G.	F.T.	Pts.	Av
Lee, Rhode Island	8	62	26	150	18
Chappelle, Maine	7	37	47	121	17
Twitchell, Massachusetts	9	53	41	147	16
Harnum, Maine	8	51	29	131	16
Ricereto, Rhode Island	8	57	16	130	16
Becton, Vermont	8	50	30	130	16
Bron, New Hampshire	8	44	38	126	15
Bernard, Massachusetts	9	56	23	135	15
Logan, Rhode Island	8	41	26	118	14
Shabel, Vermont	9	44	37	125	13
Gale, New Hampshire	8	41	21	103	12
Carlson, Connecticut	7	30	28	88	12
Leslie, Massachusetts	9	47	14	108	12

Sideline Cynic

by HAROLD GILBAR

Nine-tenths of University of Vermont students are physically unfit and nineteen-twentieths of UVM's faculty are physical wrecks!

"In fact," maintains Dr. Fauster O. Oopster Tith, a top U.S. dietician, "more than nine-tenths of the American people today are physical wrecks. Americans today are all head and no body, with a few exceptions, such as Marilyn Monroe or Doris Day. Dr. F. O.O. Tith maintains, "Americans are leading a life of too much leisure. As their leisure time increases so do their fat globules, especially in concentrated areas around the abdomen and derriere. It is all well and good that Americans have leisure time, the trouble is they spend too much of it watching TV, reading sex books, playing cards, or just lying in bed. Americans do not spend enough time building up their bodies. They hardly ever exercise, consequently they get fat and lazy, and never feel like doing much of anything but wasting time. The fatter and more muscularly limp they become they more apathetic they are, and soon they lose their self poise and confidence. Why even one day of good hard work would put most Americans in bed for a week. That is good hard muscular work, not referring to a day planked in a chair behind a desk, pinching the secretary as she goes hipping by.

"Instead of going on rigorous healthful exercise diets, thousands of Americans waddle to the drug stores for dinky diet pills. Sure, the pills help reduce weight but then what do you have? -- Thousands of skinny, bony withered up weaklings. If only large people would lose weight by correct exercise, and if only skinny people would exercise to build their bodies, they would put muscle in the right places. The result would be a nation of decently built men and women who would enjoy looking at each other even much more than they do now. Imagine!"

University of Vermont students and faculty are perfect pictures of the overweight, underdeveloped, listless, physical wrecks so well framed by Dr. Tith. Ninety-nine percent of UVM's students roll out of bed, plop down to breakfast, waddle to class, plop back to lunch, waddle back to classes, plod to dinner, slump at their study desk, and spatter back into bed. The greatest extent of their exercise is walking. Elbow and jaw muscles are well developed, but muscles not so directly concerned with enlarging their stomachs shrivel from lack of exercise.

The physical education department offers little help to these physical wrecks. Those who are lucky enough not to pass the Cozen's test might as well cut every physical education class because the amount of their activity is as useless as a game of tiddly winks. Lack of enough good equipment and facilities accounts for most of the poor physical education course. But apathy on the parts of both instructors and students accounts for a large portion of the poor physical education. Instead of playing a goof off game of football or basketball, instructors should insist on an intensive course of calisthenics and rigorous exercises.

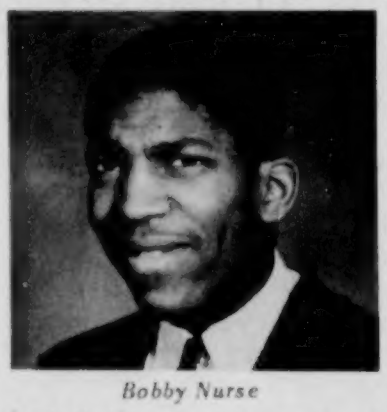
As for those who do pass the Cozen's test, they are so delighted to know that they are more physically fit than those who failed the test, that they resolve that exercise is unnecessary in their case, and before they know it they are physically worse than those who failed the test.

A new gym and physical facilities will help the physical education department develop the physical education program so that students will have the best possible chance to become more physically fit. However, judging the future by the past, the students and instructors will probably be just as unconcerned about physical fitness as they are now

Kittens All Even

by Raymond B. Bello

After a rejuvenating Kake Walk weekend the UVM Freshman Basketball team must face the sobering fact that they own a 6 and 6 record and have only a game with Middlebury left to decide whether they will have a winning or a losing season. At the end of the Christmas recess, Coach Lapointe's men possessed an impressive 5-1 record but since that time they have only won one contest. Losses to Middlebury 49-48, Dartmouth twice 63-51, 77-62, St. Michael's 67-58, and Norwich 89-76 were offset by a romping 88-57 victory over the Plattsburg Teachers. In this game five Kittens hit double figures, while Plattsburg was held to one basket for more than eight minutes. Ralph D'Attilia was high man for UVM with 23 on mostly one handers from the foul-line area. Jim Brennan hit for 21 and directed the attack with some classy playmaking. Gino Giardi rebounded well and scored 16, while Carl Frattini hit for 14 and tricky Dick Whittier ripped the nets for 12. Frattini's points all came in the torrid first half that ended with UVM ahead



With the squad depleated to only seven men Coach Lapointe is hoping for a victory over the Panther Cubs to keep the Frosh's season ledger over the .500 mark. Another wish of his is a change in the rules. He has a great desire to get in the game and play himself; as anyone who has witnessed a Freshman game can verify. The only voice one can hear in the hushed gym is that of Coach Lapointe who coaches his player's every move. His coaching from the bench is a real crowd pleaser and a warming comfort for the players out on the court. "No, Coach, you can never get in the game and play yourself but by your coaching you do much more for the team "

Meet The Catamount

by Richard Badger

This week two UVM guards and a forward are given their chance to expound in the "Meet the Catamounts" spotlight. The three green-and-gold players are Bob Nurse, Dick "Bugs" Ader, and Dave Strassburg.

Bob Nurse, who at 5-9 is the shortest man on the team, hails from Astoria, New York. A member of Delta Psi, Bob is a commerce and economics major in the College of Technology and plans a career in Business Administration. After playing both basketball and baseball (Honorable Mention All City infielder on N.Y. Post's team) in high school, Bob came to UVM and concentrated on basketball. The very personable guard "likes meeting people, dancing, singing, and jazz." Bob, who enjoys playing defense in

Bobby Nurse

basketball, maintains, "It is not a disadvantage to play on a team. It helps to be on a team because one is forced to work on a schedule to keep the marks up in order to stay on the team."

Another guard, Junior Dick Ader, comes to Vermont from New York City. Dick is also a member of the College of Technology and belongs to the Phi Sigma Delta frat. Dick's talent for baseball and basketball at McBurney School earned him a place on the All Prep team for three seasons. The accurate set-shooter claims that this year the team "can't put together two good halves because we are smaller than our opponents and can not adequately control the boards for an entire game." After nearly three years of college basketball, Dick no longer has butterflies before a game, as he puts it, "There is a lot of pressure on a guy before a game, but this year after the Springfield Tournament, I was no longer nervous."

Richy Ader

The third member of this w threesome is the high-scorin phomore, Dave Strassburg w the son of Norm Strassburg, U Director of Intramural Athle Before he graduated from E Junction High in 1960, Dav his team to a 19-3 record. ther student in the Colle Technology, this Mathem major plans a teaching care ter graduation. Dave, a Psi and Gold Key member, strongly that "not enough s arships are given to bask players." He says that Ve can not expect to compete other schools unless it more generous offers, but a time "it does not have the ing power."

In a discussion about the town crowd, each player h own opinion; Dick Ader lev sharp rebuke toward the fans: "The fans up here a weather friends. There a many Monday morning qu backs! Besides getting u yelling against their own they are too critical of the teams." Dick went on t "They are not like other c fans;" he pointed out the e of the University of Main who maintain a constant c for their team whether th behind or not.

Dave Strassburg
